Now, as to annexation, I cannot see how the United States can have the ef-frontery and audacity to annex the kingdom. The provisional government, even to judge by its own claims, only captured the Island of Oahu, which by no means represents even a fair division of the people. Kamai, Haw-aii, Maui and Molokai, with a much greater population, have also to be considered. Half the population of the islands consists of Chinese and Japanese, who are the very essence of contract labor. This class the United States proposes to claim as her citi-zems. Annexation was unsought, unneces-sary and unwise."

THE TAXES WE PAY.

British Columbia's representatives in the House of Commons are doing only what is fair to the taxpayers of the Province when they direct the attention of Parliament to they direct the attention of Parliament to its contribution to the general revenue, and when they compare what it gives with what it receives. terday for the man who could tell a Coron-isr reporter what year they were short to celebrate—that is numerically. The infer-mation gleaned was that since the accession of Emperor Chin, B. C. 349, the Chinese, wherever they are, count their new year from the date of the accession of each suc-cessive emperor. How many rulers pre-ceeded Chin no man knows, but tradition says that the empire dates back 11,000 years before Christ. Whether there were fire crackers used in those days history does not record; but it is pretty certain that Joes will not be successfully dealt with this year. There is great poverty in Chinatown just at present; even the leading merchants cannot rake in cash, and conseguently the "display" will not be as extravagant as usual. BEPORTS OF COMMITTEES.
