Dangerous Currents. It is just being learnt in New York that the electric light wires which now cross and recross the city in every direction are rendering buildings exceedingly liable to destruction by fire.

With such possible and mysterious death before their eyes, the moral effect on firemen must be very great. Indeed, it is the moral effect which is chiefly to be apprehended, for it will render a whole population where the actual danger to be apprehended is nil.

Blaine on the Whisky-bend. The Hon. J. G. Blaine, Conkling's lifelong enemy, and the most recent and eminent convert from the cause of politics to ease of letters, has contributed lately to the periodical literature of the country.

But why should it cost so much as that for the bare death losses no reserve or provision being made for old age—in a society only four years old, most of the members not two years from the medical examiners' hands? We observe that some of our esteemed contemporaries are making much of the Rev. Henry Ward Beecher's advocacy of free trade. The funny part of Mr. Beecher's free trade policy is that when an election is pending, whether presidential or municipal, he invariably takes the stump for the protectionist candidates.

Educational Reform. To the Editor of the World. Sir: A new minister of education and a new deputy, and let us hope that the end is not yet. I am, pleased with the prospect of change, but not with all the names mentioned in yesterday's World.

The New Canadian Town in the Rockies. Remains of the West.

Of the many paths to fortune opened up by the building of our great railway line, across the prairies and through the mountains, none perhaps commands more attention, or excites greater hopes in those who follow them, than those which lead towards the mineral wealth of these almost unknown regions.

The freight business of the Toronto, Grey and Bruce railway was never so dull as at present. The reason assigned for this is that there is very little timber left along the line, and that on account of the bad crop and had roads farmers' produce is not offering.

An Islander occupies one of the wards in the hospital, suffering from a malignant tumor. She understands no English, while the medical staff are equally ignorant of her language. Prognosis and diagnosis are therefore somewhat difficult. A middle-aged woman arrived from the east by the late train Saturday night. She behaved in a ridiculous manner around the station and Police-magistrate Breckenrid took her in charge. The woman, who is evidently insane, did not give her name.
