The country classification employed in this document is designed for purposes of geographical identification only and therefore does not reflect the view or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction.

Unless otherwise indicated, the Canadian import and export figures in the following tables are shown on a "customs" basis. The figures on a "customs" basis are the totals of detailed merchandise trade data tabulated from customs documents according to procedures and concepts explained in Statistics Canada's Summary of External Trade. The figures on a "balance of payments" basis reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. The adjustments include timing adjustments to exports of crude petroleum, natural gas and wheat and to receipts and payments for capital equipment; deduction of transportation charges included in the customs returns and the reduction of import values calculated for customs duty purposes to values which reflect transaction prices.

Reconciliation of United States-Canada Merchandise Trade Statistics, 1982 - Advance information. Reconciliation of merchandise trade data for Canada and the United States shows Canada had an estimated U.S.\$ 9.7 billion surplus in trade between the two countries in 1982. This represents a record surplus for Canada, up U.S.\$ 6.9 billion from the 1981 record surplus of U.S.\$ 2.8 billion. The higher surplus was mainly the result of a \$ 6.5 billion drop in Canadian imports from the United States.

The largest reconciliation adjustment in 1982 was an addition of \$ 4.2 billion (12.4%) to United States exports, representing a residual estimate for non-receipt of export documents. The equivalent Canadian non-response adjustment was \$ 1.5 billion (3.2%), down from \$ 1.6 billion (3.5%) in 1981.

Another significant adjustment included a reduction of Canadian imports by \$ 713 million for goods priced above transaction value, mainly attributable to crude rubber, plastics and non-electrical machinery imports. Another significant adjustment was a deduction of \$ 482 million for trade definition that represents a \$ 356 million increase over 1981. This larger deduction was attributable to a deduction for special automotive tooling charges from published data. In previous years, data did not include these special charges at the time the reconciliation

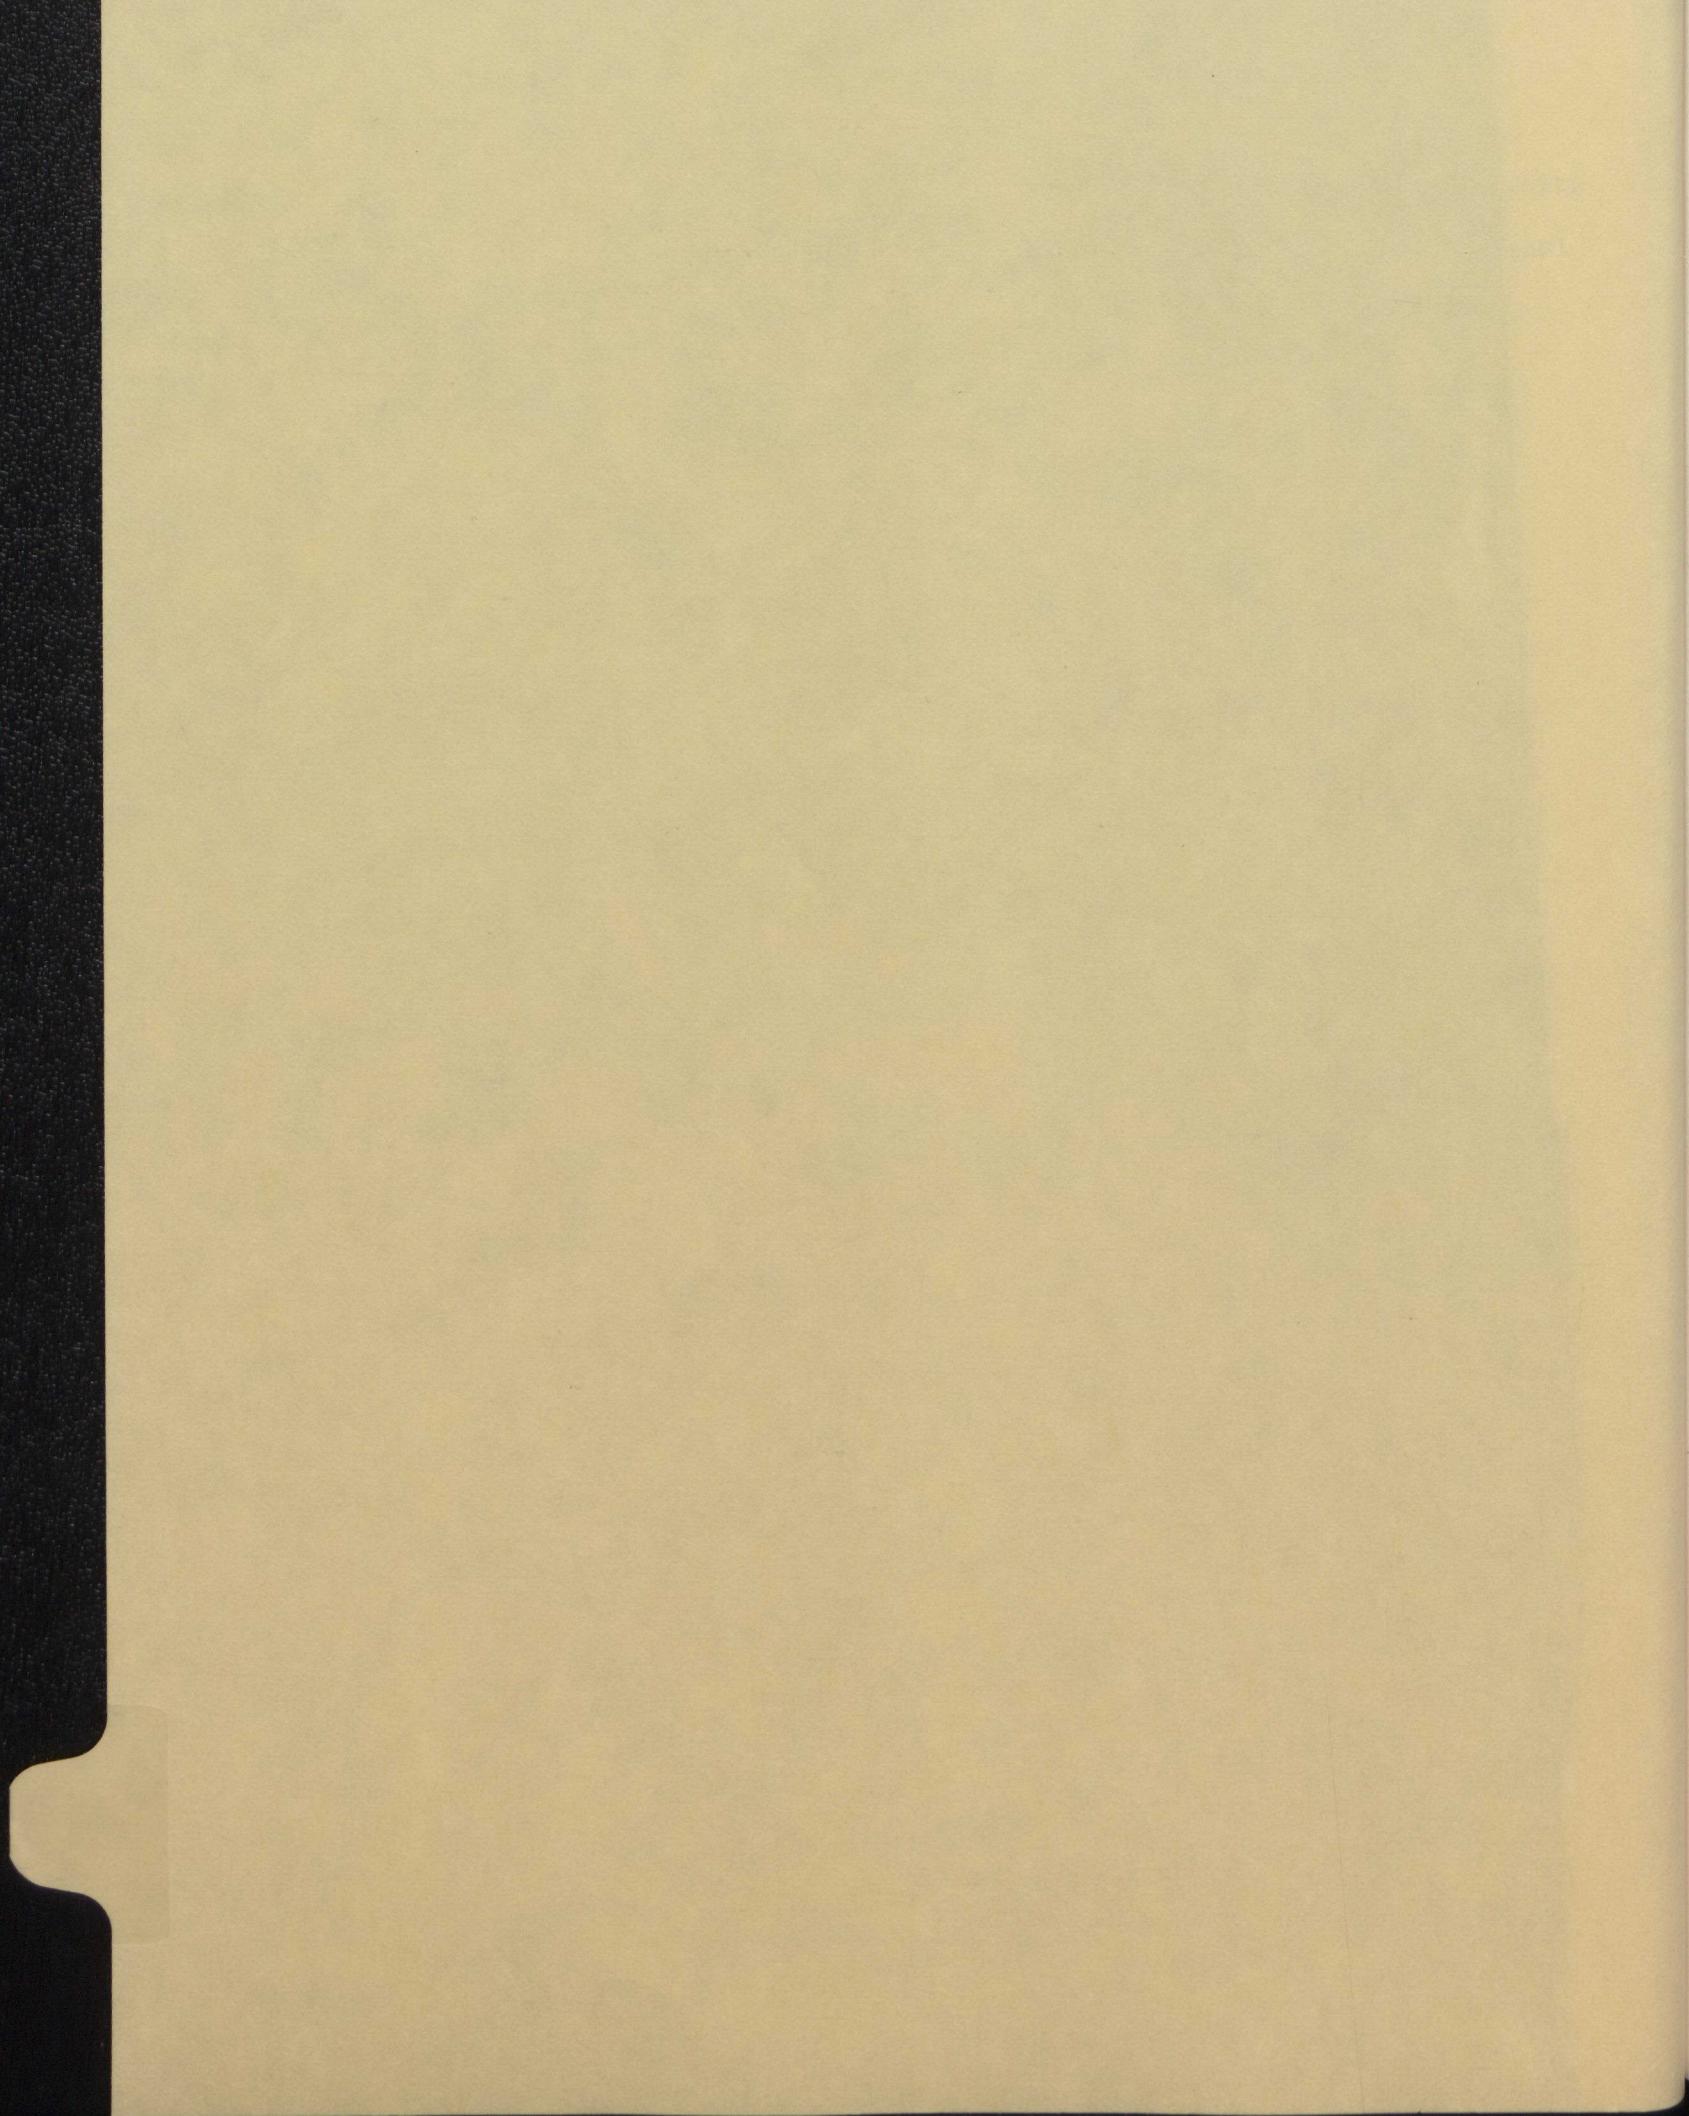

was carried out. United States imports were increased by \$ 885 million for trade definition, most of which was for Canadian exports of electricity that the United States includes in services, i.e. not in merchandise trade. Canadian exports were decreased by \$ 403 million because of special automotive tooling charges and of exports of contractors' equipment and tools that are leased and are not included in the United States merchandise import statistics.

Starting in January 1982, the Bureau of the Census has published import statistics on a Customs value basis in lieu of a free alongside ship (f.a.s.) basis. In the case of overland shipments from Canada, the f.a.s. value of imports included costs incurred in bringing the merchandise from the point of origin to the Canadian border point. As a result, the transportation charges adjustment has been reduced by \$ 800 million over 1981 to a level of \$ 69 million, to account for transportation costs included in United States imports of fertilizers.

Further, there was no valuation adjustment on United States imports as the Customs valuation reflects the transaction value as closely as possible.

Data users should note that beginning in 1981, the Canadian import values used in the reconciliation include imports from the Virgin Islands. Imports from Puerto Rico have been included since January 1976.

Le système de classification des pays utilisé dans ce document n'a d'autre but que de permettre l'identification géographique. Il ne reflète en aucun cas les positions et intentions du gouvernement du Canada relatives à des questions internationales telles la reconnaissance, la souveraineté ou la jurisdic-tion.

A moins d'indication contraire les totaux des exportations et des importations sont présentés dans les tableaux suivants sur une base «douanière». Les chiffres établis sur la base «douanière» sont les totaux des données détaillées du commerce de marchandises calculé à partir des documents douaniers, selon les méthodes et concepts exposés dans Sommaire du commerce extérieur publié par Statistique Canada. Les chiffres sur la base de la «balance des paiements» tiennent compte d'un certain nombre d'ajustements apportés aux totaux douaniers afin de les rendre compatibles avec les concepts et définitions utilisés dans les systèmes des comptes nationaux. Ces ajustements renferment des ajustements de période apportés aux exportations de pétrole brut, de gaz naturel et de blé ainsi qu'aux recettes et paiements reliés à l'équipement investi, à la déduction des frais de transport compris dans les déclarations douanières et à la réduction des valeurs des importations calculées aux fins de l'établissement des droits de douane afin d'obtenir des valeurs qui rendent compte du prix des transactions.

1. f.o.b. (free on board). Valeur à la frontière du pays exportateur.

2. Système du commerce-exportations: les marchandises sortantes consistent (a) en marchandises nationales, c'est-à-dire entièrement ou partiellement produites dans le pays; (b) en marchandises étrangères, ni transformées, ni déclarées pour la consommation nationale dans le pays, qui sortent des entrepôts des douanes; (c) en marchandises nationalisées, c'est-à-dire marchandises étrangères, déclarées pour la consommation nationale, qui sont exportées sans avoir été transformées. Les exportations générales (G) comprennent les 3 catégories et, dans le système du commerce général, le total de (b) et (c) peut être enregistré comme réexportations. Les exportations spéciales (S) comprennent les catégories (a) et (c). Les exportations mi-spéciales (Si) représentent les exportations nationales, c'est-à-dire la catégorie (a).

3. Etats-Unis, Canada, pays développés d'Europe à économie de marché, Israël, Japon, Australie, Nouvelle-Zélande et Afrique du Sud.

4. Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stade de développement auquel est parvenu un pays

Les importations américaines sont mesurées sur une base douanière, sauf entre 1976 et 1981, où les importations étaient mesurées sur une base franco le long du navire (FAS). Note: Les chiffres sont arrondis indépendamment.

Rapprochement Canada/Etats-Unis des statistiques du commerce des marchandises, 1982 - Information anticipée. Le rapprochement des statistiques du commerce entre le Canada et les Etats-Unis s'est traduit par un excédent canadien estimatif de \$ 9.7 milliards E.-U. au titre du commerce entre les deux pays en 1982. Cet excédent constitue un record pour le Canada et dépasse de \$ 6.9 milliards E.-U. l'excédent record de 1981 qui s'établissait à \$ 2.8 milliards E.-U.. Cet excédent record est principalement imputable à une chute de \$ 6.5 milliards des importations canadiennes en provenance des Etats-Unis.

La correction la plus importante en 1982 a été une majoration de \$ 4.2 milliards (12.4%) des exportations américaines, attribuable à la non-reception de documents. La correction correspondante des exportations canadiennes en 1982 était de \$ 1.5 milliards (3.2%) soit une baisse par rapport à \$ 1.6 milliard (3.5%) en 1981.

Les autres corrections appréciables comprennent une réduction de \$ 713 millions des importations canadiennes au titre des biens dont le prix était supérieur à la valeur de transaction, principalement attribuable aux importations de caoutchouc brut, de matières plastiques et de machines non électriques. Une autre correction

appréciable est une réduction de \$ 482 millions au titre de la définition des échanges, ce qui constitue une augmentation de \$ 356 millions par rapport à 1981. Cette augmentation est attribuable à une déduction des données publiées concernant les frais pour outillages automobiles spéciaux. Les années précédentes, les données n'incluaient pas ces frais spéciaux au moment du rapprochement. Les importations en provenance des Etats-Unis ont été augmentées de \$ 885 millions au titre de la définition des échanges, dont la plus grande partie touche l'électricité exportée que les Etats-Unis incluent dans les services, c'est-à-dire pas dans le commerce de marchandises. Les exportations canadiennes ont été réduites de \$ 403 millions à cause des frais pour outillages automobiles spéciaux et de l'exportation de matériel et d'outils d'entrepreneurs, lequels sont loués et ne sont pas inclus dans les statistiques d'importation de marchandises des Etats-Unis.

A compter de janvier 1982, le Bureau of the Census a publié des statistiques d'importation sur la base de la valeur douanière au lieu de la base franco le long du navire (FAS). Dans le cas d'expéditions terrestres en provenance du Canada, la valeur FAS des importations incluait les coûts encourus pour transporter la marchandise de son point d'origine au poste frontière canadien. En conséquence, la correction des frais de transport a été réduite de \$ 800 millions par rapport à 1981 pour atteindre un niveau de \$ 69 millions, afin de tenir compte des frais de transport inclus dans les importations américaines d'engrais.

De plus, il n'y a pas eu de correction d'évaluation des importations en provenance des Etats-Unis étant donné que l'évaluation douanière est aussi fidèle que possible à la valeur de la transaction.

Les utilisateurs des données sont priés de noter qu'à compter de 1981 les valuers servant au calcul du rapprochement comprennent le commerce avec les îles Vierges. Porto-Rico est inclus depuis janvier 1976.
