**Original copies in printed paper covers are filmed  
beginning with the front cover and ending on  
the last page with a printed or illustrated impres-

other original copies are filmed beginning on the  
first page with a printed or illustrated impression,

whichever applies.**

**Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be

required. The following diagrams illustrate the  
method:**

Bibliothèque  
Agriculture Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plet et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plet, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur le dernier image de chaque microfiche, selon le cas: le symbole → signifie "À SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaires. Les diagrammes suivants illustrent la méthode.

## THE UTILITY POULTRY HOUSE.

### ADVANTAGES OF THIS TYPE OF COLONY HOUSE.

1. When the two parts are run together it makes a house large enough to accommodate 25 or 30 laying hens throughout the winter.
2. The front section can be used for brooding chicks in the spring and the rear section for a breeding pen, or the whole winter flock, when they get free range, can be accommodated in this half.
3. For poultrymen who have only one horse, this gives a fair-sized winter house, but one that can be moved by a single horse when required.
4. In rough or uneven land the fact that it can be separated into sections makes it possible to move it from place to place.

### UTILIZED THROUGHOUT THE WHOLE YEAR.

The main feature which distinguishes this house from others is the arrangement whereby it is possible to utilize the building to the full by converting the winter scratching shed into a separate brooder house during the summer months when the scratching shed is not needed.

The building, as constructed in the accompanying drawings is of the movable type, and so that it may be constructed as lightly as possible it is suggested that the corner studs only are constructed of 2 by 4's and that the rest of the studding be of 2 by 2's.

It being of the first importance that the birds should be supplied with comfortable roosting quarters in the cold season the rear portion, as shown in the accompanying sketches, should be lined with building paper on both sides of the studding, and a second sheathing of lumber affixed on the inside of the studding, making a dead air space and preventing draughts.

If desired the front of the roosting section may have cotton instead of wood in the front, fifteen inches above the floor to a few inches below the place where the front roof joins.
