Unusual Number of Places Return Chief Magistrates By Acclama-

tion.

Municipal nominations were general thruout Ontario yesterday. A feature was the unusually large number of elections of mayors and reeves by ac-clamation. Belleville, Guelph, Hamil-ton, Kingston and Ottawa's present chief executives are returned unop-

posed.

The Hamilton Herald last evening editorially referring to the sudden withdrawal of Ald. Hopkins from the mayoralty race, said that the alderman and the mayor had been brought together at a little Xmas party at ex-Mayor Biggar's. "It is understood," said The Herald, "that the sole subject of conversation was the desirability or undesirability of having the doctor opundesirability of having the doctor op-pose the present mayor next Monday. It is understood, moreover, that there were negotiations in which the ex-mayor as well as the present mayor and the would-be mayor took a hand. The result of the negotiations was evi-dently satisfactory all round, for the doctor agreed to decline no mination to-

council meeting last night Mayor In council meeting last night Mayor McLaren gave an emphatic denial to any allegation that there had been any thought of making "a deal," stating that he had gone reluctantly and that the conference had been brief.

In Kingston, it is more than ten years since there has been no contest

for the mayoralty.

Lively at Berlin. At Berlin nomination meeting last night, ex-Mayor Huber was proposed as mayoralty candidate, altho he is no longer an elector. In addressing the electors, he made a vicious attack on County Judge Chisholm, who recently dismissed Huber's appeal regarding his assessment. Mayor Hahn in his official capacity refused to allow the speaker to continue his harangue and he was removed from the platform by police officers.

At Woodstock, Water Commissioner Afred Watts and Whitaker declared a surplus of \$10,500 for the year in the municipal plant, and were re-

> PORT ARTHUR, Dec. 27.-(Special.) fellows' Hall, Broadview-avenue, 1981 -A big meeting was held to-night in the interests of the hydro-electric contract. Hon. Adam Beck was enthusiactically received.

One feature of the meeting was that James Whalen, son-in-law of James Conmee, went from the audience to the platform, shaking his fist in Beck's face and offering to bet \$5000 that Conmee had rights on the Nepigon River. Mr. Beck replied that he had not, but at that he did not propose to have the government's reputation dragged about the country as a thing to gam-

ble with. Conmee was given an opportunity to speak and admitted he had no rights on the Nepigon, but stated that after the O. and M. P. got a Dominion charter he went to Premier Whitney and procured a promise that the company would be as fairly dealt with as any

PROMOTER'S DENIAL Declares He Can Prove Innocence In New York Court.

MONTREAL, Dec. 27 .- (Special.)-Wills Humphrey, the promoter of the Northern Commercial Telegraph Company, who was charged before the New York Police Court by one Constantine with irregularities, made the following statement to-day:

"I went to London and there I started in floating two and a half million dollars of bonds of the Northern Commercial. On Friday morning, when I returned to New York, two detectives met me and asked me to accompany them to the assistant district attor-ney. I was dumfounded at the charge and I told the magistrate all the facts of my connection with Constantine. "The Bloor-street viaduct is some thing that the citizens of Toronto hould support to a man," declared Ald Thomas Foster at a meeting held by him in O'Nelli's Hall, corner Queen and Parliament-streets last night.

The viaduct, he said, would be a link that would join the east to the busiadvantages would be that the workingnome within a few minutes' ride of the centre of Toronto. As it now was they had to go aver a mile out of their way, and if they settled there at present they would be practically isolated from their business. This delated from their business. This defect, the speaker claimed, would be remedied by the viaduct, and that insteed of having a barren space to the east of Bloor-street the place would be thickly populated. The extravagance of the city council was given a

gance of the city council was given a roast by the speaker.

W. F. Maclean, M.P., in speaking in favor of the tubes, declared that they would be a paying investment for the city. "The tubes," said the speaker, "would remedy a great deal of the inconveniences made by the street railway. The people have only to provide the undertaking of this service and we will have an asset worth milvide the undertaking of this service and we will have an asset worth millions, which we will own. The difference between the service given by the people and by a corporation is that the former will work for the convenience of citizens and try to give a good service, while the latter work only for dividends and profits. The tubes will be one of the greatest steps that can be taken in favor of public ownership, and can be worked along business methods, so that it will help to reduce taxes and prevent the crushing and taxes and prevent the crushing and overcrowding of the cars."

Ald T. Church was given a rousing

reception when he rose to speak. He spoke in favor of the tubes and the viaduct. These, he stated, were the two things that the city needed. There was no city in America that had been treated in the manner that the street allway had treated Toronto, It was therefore time that the citizens should have a system of their own, and put a have a system of their own, and put a stop to the crowding of the cars.

S. R. Heakes, Simon Yakee and F. H. Greer also spoke in fav n of Ald. Foster, while James O'Hara delivered colicus praise of himself, both as a landed gentleman and a business man. The other candidates, who made brief speeches, were Thomas Davies, James Hales and Dr. W. Harper.

Controller Hocken was given an en thusiastic reception and an intelligent hearing at a meeting held in the Oddnight. He addressed the ratepayers of ward one, and to them he appealed for support on his record rather than on

what he proposed to do. "I want you to take my record," he said. "I claim to have dealt with every question in a fair way, and I have al ways been on one side or the other." The speaker enumerated cases in which he had taken a stand even at the risk of injuring himself as a municipal representative, citing as an in-

WHY CORPORATION SUPPORT GOES WITH GEARY AGAINST HOCKEN

Mayor Oliver offered the Toronto Electric Light Company \$125 a share for its stock some time ago. The shareholders are feeling pretty by the city. Buyers are offering \$118 at present for what Mayor Oliver then offered \$125. And yet some people thought Mayor Oliver was

With tubes in prospect to take care of the constantly growing suburban traffic, there appears one of the most important adjuncts conceivable to the city municipal electric light, heat and power system. Tubes mean in a comparatively short time the control of the surface railway system. This means a greater and greater consumption of electric power thru the city system. But under the hydro-electric power commission's agreement, as the consumption of power increases the cost of power decreases. And it decreases not only for Toronto but for all the other municipalities on the transmission line, except Hamilton, where Mayor McLaren objects to Hamilton getting the full benefit of the commission's plan.

As soon as the consumption of power under the city system reaches 18,000 horsepower the price of power will automatically go down in Toronto to \$14. This is an unprecedented price for a city of this size. It means power for manufacturers and light for everybody at unexampled

It means such low-cost light that the Toronto Electric Light Company will be unable to compete with the city rates at a profit.

This is why the Electric Light Company is now trying to get consumers to tie themselves up to five-year contracts. This is why the company and the street railway are working so earnestly in opposition to the tubes. This is why the electric corporation organs, like The Star and The Mail and Empire, are doing everything in their power to defeat Controller Hocken. This is why the henchmen of the street railway are out working for Controller Geary. That gentleman denies any knowledge of such support, but he does not repudiate it. He plays the street railway game by his efforts to defeat Controller Hocken. He plays the Electric Light Company's game by his efforts to defeat the man who proposed tubes as the remedy for corporation arrogance.

The Star, and The Mail and Empire and the Street Railway and the Electric Light Company know very well why they are supporting Controller Geary. He represents their cause against Controller Hocken. and against tubes and against cheap light and power.

These brokers credited with executing the orders declined to throw any light on the subject. They will testify later before the investigating committee.

One theory to the situation is that an attempt at manipulation in the stock miscarried. According to this explanation, heavy buying orders were

placed on the market, but thru some oversight the corresponding selling orders did not appear. The result following this theory, that there was comparatively little stock for sale and the brokers who had charge of the buying orders had to bid the market up in order to execute them. Mayor McLaren Might Explain.

At the last session of this year's ouncil Mayor McLaren made a statement in reference to an editorial in The Herald about the meeting of Ald. Hopkins, ex-Mayor Biggar and himment in reference to an editorial in The Herald about the meeting of Ald. Hopkins, ex-Mayor Biggar and himself, aand the calling off of Dr. Hopkins as mayoralty candidate. He admitted that he had attended the conference, but said that he had deen invited three times before he went. He said there was no thought of making any kind of a deal whatever, and if there was any thought of anything of the kind it was soon dissolved, as the meeting lasted only a few with the premier and colleagues told the member for St. Anns that the pertition would be carefully considered, and that their request for the appointment of an English-speaking gentleman would be looked into.

the citizens have to put up with on the street railway. The project, he explained, would pay for itself.

Controller Hocken's strongest supporter at the meeting was W. F. Maclean, M.P., who explained why the ratepayers of ward one should support the Bloor-street viaduct bylaw, the tubes and Controller Hocken. Dealing first with the viaduct, he pointed out that it meant prosperity to the northeast section of the city, just as that section around Gerrard-street developed when the Gerrard-street bridge was constructed. After showing that the city had grown in a westerly direction, he said:

The difference between a public owned railway and a private owned was also noted.

"When owned by a private company." he said, "the only object is to make money for the shareholders, but the object of a public owned road is to give the best service to the public."

Mr. Maclean then said that Controller Hocken should be supported for mayor because he was the best exponent of public ownership. nent of public ownership,

What the member for West Birmingham promises his friends in the intimacy of his library is the recapture of the seats which were lost by the Unionists in 1906. He has been in his time one of the most practical politicians in England, but as an invalid, reading newspapers and hoping that his life may be prolonged until his fiscal policy can receive public appreval, he may not be in close touch with public affairs, and his forecast of the result of the approaching election may be oversanguine. If the Unionist seats lost four years ago be regained, the lords will receive a striking vindication from the general electorate.

That will be a victory fraught with danger to the upper chamber, for as soon as it is achieved the nation will awaken to full consciousness of the truth that the lords have obtained power over the purse, forced a dissolution of parliament and driven from office a Liberal government supported by an immense majority in the commons. It will be so evident that the old constitutional order has passed away that a reaction is likely to set in immediately.

Star

Wonderful Bicycle Act.

The aitraction at the Star this week is one that is seldom equaled among the burlesque shows that play Toronto. The feature of the entertainment is the big picycle act by the five Mantells. These talented artists do not use the ordinary up-to-date bicycles, but do their tricks on the old-time high machine. Their sketch is vithout doubt one of the cleverest that have been seen in the city. The youngest member of the troupe is a little girl, who is just about as clever as the oldest, and if one can judge by release the presence one of the season's best bills.

The new theory of Prof. Parker, it is said, is destined to create a revoluists and laymen alike, for at the bottom of it lies the scientists' contention that there are really many more than the traditional "five senses." No longer, says Prof. Parker, should we hold that we possess only five senses feeling, hearing, smelling, tasting and seeing. Instead, each of these senses may be subdivided into four or five, or perhaps more, subsidiary and independent

Ball players are a funny lot. At times during the season they make certain appointments, and in order to fill these cursors whereby they will be dismissed from the game. One day during the middle of the season Isbell of Chicago made an engagement with a certain friend. The first time up ne cracked out a one-base waltop. Right off the reel he essayed for a steal of the keystone sack, and was the desired change for the first-sacker of the White Sox. He called the "ump" all kinds of names, and the more he shouted the more he was brightening his chances. This same stunt happened on the second and third times at bat, and still silk rejused to give him the clebhouse sign. On the fourth trip list, was determined. After the players was determined. TURF GOSSIP.

James Butler has just arrived in Juarez, Mexico, for an extended vacation. Mr. Butler is one of the financial backers in the new rate track opposite El Paso and is anxious to make a few personal observations. The track cost nearly \$800,000, it is said, and the meeting which began on Dec. 1 and has not been a really fair test, is encountering numerous setbacks. When the Juarez track was projected it was believed that winter racing in the United States was a dead issue, but with Jacksonville, Tampa and Oakland all in full blast the plant in Mexico appears to be having an uphill fight.

W. K. Vanderbilt, who this year is far in the lead of winning turfmen the world over, has at the Haros de Villelou the stallions Turenne, Maintenon and Prestige and 40 brood mares. Many of the brood mares are American bred. The horses in training are at St. Louis de Poissy, with William Duke in charge. Duke is at present at Wellsville, N.Y., his home. Frank O'Neil and William Mitchell are engaged to do the riding for Mr. Vanderbilt in 1910. This year for the first time the get of Prestige and Maintenon will be seen in public, Fifty horses in all comprise Mr. Vanderbilt's stable for 1010.

Classy Indoor Rumors.

Buffalo News: The next indoor games at the 74th Regiment Armory which will be run off on New Year's Eve, has received the entries of more athletic stars than have ever appeared on an indoor program in this city.

With such famous mile runners as Jack Tait, the Canadian champion, and Wilton C. Paull, the college record holder of this country, both of whom will battle for the international championship fat this distance, the contest should be worth going many miles to see. In addition to this splendid attraction there will be the famous Bobby Kerr with a record of 9 4-5 seconds for 100 yards and the winner of the 200 metre race at the Olympic games, in which event he defeated all the European and American Sprinters.

The Toronto University will send over its undefeated medley relay team to try conclusions against the 74th champions, who up to date have not been defeated in a race of this description and who will give the Canadians the race of their lives on the night of the 3ist.

Facts About Bloor St.-Danforth Ave. Viaduct

The estimated cost of \$769,000 is the outside figure. The actual

expenditure may be less. City Engineer Rust figures the cost of construction at \$619,000. Assessment Commissioner Forman says positively land damages will not exceed \$150,000.

The viaduct will consist of two sections one 1200 feet long, to span the first Rosedale ravine from Sherbourne-street; the other, 1450 feet long, crossing the Don River at a height of 120 feet.

Mr. Rust says: "The extension between these viaducts is comparatively level, and will involve only a small amount of grading." The viaducts will be built of steel and concrete, at a width of 54 feet. This will give a splendid, broad roadway 42 feet wide, with six-

foot sidewalks on either side. The whole cost of roadways, grading, paving, sidewalks, is included in the \$619,000 estimate.

Ten years ago the city engineer reported that the viaduct could be built for \$350,000. The cost has doubled, and in a few years the figure

Practically everyone, even those opposed to going ahead now, agrees that the work must be done some day. Why wait, when the cost of material and labor is going up year by year?

The hostility of the Guild of Civic Art is due to the influence of a little clique of members who live in Rosedale, and who mistakenly imagine that its stately quiet is to be invaded.

The viaduct will give a thru thorofare from the extreme west to the extreme east of the city.

Toronto's growth has been so rapid that Bloor street is now the actual geographical centre. With the bridging of the yawning gap, it is bound to become a great commercial therefare.

Bonds to cover the cost can be issued from year to year. Even if debentures for the entire amount were issued at the outset, the yearly interest and sinking fund charges of \$40,000 would be twice met by increased assessments, which, it is estimated, would yield \$80,000.

While the viaduct is an essential part of the tube system, it is needed whether tubes are built or not. Everyone voting for the tubes, if a property owner, cannot consistently vote against the viaduct.

The viaduct plan is not an undigested matter. It has been before the city council for ten years. The principle has been overwhelmingly approved by the councils of 1906 and 1909.

Ex-Mayor Thomas Urquhart, whose knowledge of the city's financial status is unquestioned, says: "A few years ago Toronto could not afford to build the viaduct. The city can now do so. The viaduct should certainly be built." Mr. Urquhart's view is that of scores of Toronto's leading business men interviewed by The World.

City council advocates of the viaduct have pledged themselves to seek legislation so that the city can expropriate lands immediately benefited. Thus the city gets the increment.

There is no sounder city financially in Amercia. Torogto's latest flotation of bonds was actually on more favorable terms than the Dominion Government could secure.

Toronto's non-producing debt is only about \$19,000,000. But it owns property outside its public service works worth \$20,000,000. The income from this property is alone this year half a million above the total debt charges.

If the three money bylaws pass, the city's borrowing power next year

Let everyone vote for the viaduct in the city's interest and give Riverdale, known as the dumping ground for every undesirable institution, something to be grateful for.

Hotel accommodation is not a theory to the commercial traveler, it is a very serious fact, and is striking his pocket and life physical well being pretty hard for the past few years, because of the uncertainty and turmol created by local option legislation.

The question as it affects the traveling public generally is getting to be a very important one, and some scheme is needed to adjust the authority which is divided at present between the government and municipalities

Province.
Hotel accommodation is not a theory

the government and municipalities adopting local option.

When one reflects upon the care and

When one reflects upon the care and attention given to the comfort and convenience of the immates of our asylums, our jails and prisons by our government, and the large sums of public money that are yearly expended to provide said comforts and accommodation it seems strange that men who are compelled to travel for a livelihood, and who pay sometimes excessive hotel who pay sometimes excessive hotel rates, get little sympathy and less consideration than the immates of our public institutions, from the people and overnment.
On a former occasion the

On a former occasion the writer called public attention to the fact that whereas under a liquor license law the public traveler is considered and provided for in the regulations governing a hotel license, under local option he is ignored, and he has no cright, and is subject to the greed, or avaries of people who may give him accommodation as a favor.

In this entightened age, when Christian ethics are professedly practiced, and good intentioned people are legislating in the hope to give an uplift to public morals, it should be remembered that Christ himself declared about some professedly enthusiastic people of his day, "That they compassed land and sea to make one Proselyte, and when he was made, he was ten feld more the child of hell than he was before."

The real question, so far as I am enabled to comprehend it, is chiefly one of jurisdiction. The government is responsible under the license act for hotel accommodation, while under local option the municipality automatically assumes the powers exercised by the government, to provide the same accommodation. So it follows that those interesting themselves in prohibiting the licensed sale of intoxicating liquor should ask the government to provide legal machinery whereby municipalities adopting local option can assume the direction and control of hotels, providing accommodation to the traveling public, and have them carried on under proper inspection.

ALDERMAN-

BREDIN CONTROLLER

TO THE ELECTORS:

Ladies and Gentlemen:

After serving the city as alderman for the past two years, I now at the urgent request of almost every friend I come in contact with, have decided to allow my name to be placed in nomination for the higher office of membership on the Board of Control,

thereby representing the city as a whole.

I might say that I have taken this step largely from a sense of duty of what I owe Toronto and its people, where as an individual I have prospered and grown with the growth of the city, so that finding myself with some leisure and still being possessed with a great deal of that restless energy that succeeded in building up the business with which my name is connected; if the experience I have gained has been of any benefit during the past two years, or if you think it will be of any service in the higher position to which I am aspiring, then I ask for your

The most important question before the people at the present time is the one of transportation of the people, more particularly those in the newly annexed or outlying territories. Being a resident of one of said districts where we have two car fares to pay, you can easily understand that my sympathies are with all those situated in like localities; for that reason I would like to see a majority vote cast in favor of the tubes, the larger that majority the stronger it will be against existing conditions.

I have always favored Bloor Street Viaduct, and believe that long ago we should have had direct communication on our most central and finest thoroughfare, running in an almost straight line from end to end of the newer and greater city, and one that I look for to see the centre of our population inside of five years. I look for the people of the west to gain almost if not as much advantage as those of the east by the carrying through of this

I do not look upon it that a candidate's platform is everything; of even more importance is your belief and confidence that he will deal in a fair and sane manner with every question that should arise, permitting neither local nor personal sentiment to play any part in his decisions, but with an eye single to the city's best interests.

One more and final reason why I am a candidate for the Board of Control is the greater scope for accomplishing more for my fellow citizens; all close observers will have noticed that the Board is gradually drawing more and more of the Council's work into its own sphere and to some is taking on in a marked degree the aspect of a Commission elected by the people. The best purpose the Council serves even at the present time is to act as a brake to refer back for further consideration any hasty or illadvised legislation, thereby giving more time for on the matter under consideration

Toronto is now a metropolitan city in every respect; the day is past when her affairs can be played with and her interests left to the control of those to whom selfish interests rather than the public good are the controlling passion, and no one realizes this more than one who has been so closely identified with the city's commercial and financial growth as I have been, and in offering myself as a candidate for the Board of Control, and a whole-hearted service in the city's welfare if elected, I do so as a business representative of the Toronto electors as a whole.

Soliciting your vote, influence and support, be-

Respectfully yours,

MARK BREDIN. December 24th, 1909.

Kerr Lake the Sensation

Monday Evening, Dec. 27.

Kerr Lake furnished the minng markets with a sensation

points from last week's clos-ing figures. A despatch emanating from New York, to the effect that an increase in the dividend rate was to be

made, was field responsible for the movement, while, as usual, the demand

became more pronounced as prices advanced. At the top figures, however, some profit-taking and short selling

combined to bring about a reaction, the

combined to bring about a reaction, the shares closing easy at \$8.35.

With the exception of Kerr Lake the market was singularly duff. Beaver was in fair demand and sold up to 37 and a fraction, but eased off to 36 3-8 at the close. The other lower priced issues were comparatively steady

somewhat easy tone, selling down from \$4.10 to \$4 during the session. La Rose

was quiet at \$4.90.
The market closed dull, but generally firm. Speculation continues of an easy-soing nature, and until a better movement of any

demand arises, no movement of any consequence is expected.

Ore shipments from the Cobalt camp for the past week were 512 tons from seven mines, as against 744 tons the previous week. La Rose was again the heaviest shipper, while the list was augmented by one new consignor, the Argentite mine, which sent out a car of 20 tons.

A special general meeting of the shareholders of the Otisse-Currie Consolidated Silver Mines Co. will be held at the head office of the company, this city, on Wednesday, Dec. 29, at 11 o'clock in the forenoon, to consider, and, if advisable, to ratify and confirm a special bylaw enacted by the directors of the company on Dec. 16, 1909, enabling the company to dispose of its treasury stock at a discount not to exceed 90 per cent., and modifying the present bylaw in force in that regard.

SUFFRAGETTES AT OTTAWA

If Organization Can Be Perfected English Tactics Will Be Adopted.

OTTAWA, Dec. 27.—(Special.)—The first gun in an organized campaign for woman suffrage in Canada will, it is stated by The Ottawa Journal, be fired in the coming by-election in this city for the Dominion Parliament. The initiation of the campaign depends upon the ability of the leaders to bring their organization to a sufficient state of efficiency.

Plans and preparations have been quietly made during the past few weeks.

Should the organizers find that their organization warrants the initiation of a fight for suffrage, it is stated that the campaign will be conducted on the approved lines of English suffra-gettes. Meetings will be interrupted, speakers "heckled" and meetings for the cause will be held. Interference, they think, will bring out more vigor ous measures.

Canada's \$15,000,000 **Annual Bonfire**

If fifteen million dollars of CANADIAN PROPERTY -build-

ings, farm products, stock and household furniture (besides a goodly number of persons whose lives we won't attempt to reckon in money values) were brought together in one vast heap; if this whole accumulation were deliberately BURNED; the act would shock the whole world BY ITS MADNESS. Yet this is EXACTLY the kind of national bonfire that Canada indulges in every year, except that the destruction goes on in THOUSANDS of separate conflagrations instead of in ONE VAST HOLOCAUST.

Fifteen million dollars represents Canada's annual fire loss. If CEMENT were used to-day in all the building operations for which it EXCELS other available materials this yearly waste would be reduced to a SMALL FRACTION of its present extent. That is a result that we want to HELP to bring about. We believe that if we can do this we shall be rendering a public service. DON'T MISUNDERSTAND. It is a matter of BUSINESS with us, of course, but THAT does not alter the fact.

World Office,
Monday Evening, Dec. 27.
There was no great breadth to the transactions at the Toronto Stock Exchange to-day.
Two stocks only, Toronto Rails and Twin City, attracted any speculative attention.

In the former the buying was stated to be on Montreal orders, while others attributed it to a movement to en-deavor to arrest sentiment in regard

Twin City was well taken during the morning session, and fresh buying orders in the afternoon sent the price to a new high quotation on this move-

Dealings in Steel and Coal shares were insignificant to-day with dealings of only ten shares of the latter, while Steel sold down over a point.

The first sale of Porto Rico for some time was made at 35 1-4, at which price the stock seems to be now supported.

Public participation in the day's business was exceedingly small. New investors and speculators are still scarce, but public sellers are likewise keeping out of the market.

Wall Street Pointers. London stock market closed on Monday, boxing day.

He states that at the request of the British minister he visited the colony, and "cannot imagine a picture more desolate or a situation more hopeless." The only ray of hope among the people, he says, is the rumored intention of an American syndicate to buy the whole property. The colony has been swept by three hurricanes in the past few months, and the trees largely destroyed.

The announcement that the Rock Island affair is to be investigation. 20 p.c. pai Rock Island affair is to be investigated by the governing committee of the stock exchange created the impression that nothing beneficial to the participants can come out of the matter. It is altogether likely that stocks would have sagged off this week, even if what looked like an attempted corner in a single stock had not occurred. It was apparent that various interests were single stock had not occurred. It was apparent that various interests were tired of supporting their specialties and probably no longer considered themselves as held to the agreement to keep Sao Paulo the market strong until Christmas. The frequent bidding up, such as was noted to-day, is a feature of a receding pools, much is to be gained by keeping prices steady until Jan. 1.

Continue the same policy of business.

Continue the same policy of buying only on drives for moderate turns.

Finley Barrell & Co. wired J. P. Bickell: We believe that the Rock Island incident will postpone the upward movement of the stocks temporarily, because it will frighten many persons away from Wall-street. HOLIDAYS DO NOT STIMULATE ORDERS.

World Office Monday Evening, Dec. 27.

The accumulation of orders for domestic securities over the holidays was light. Montreal sent in a few orders for Toronto Rails, which made a new high record. Twin City was about the only issue to attract local speculation, the buying of which was satisfied without raising the price much above last week's figures. As a rule, the market was exceedingly tame, with no change from the position as recently noted. The absence of any pressure from offerings is as pronounced as has been the case for weeks past.

GRAIN AND PRODUCE.

The Liverpool market was closed on Monday and trading on the Chicago pit continued generally 'dull. Shorts in the December option attempted to cover early in the day and bid up that future 3½c to \$1.19, but there was a slight setback under realizing later on. The other futures were steadier, closing at a slight advance over previous session.

The Winnipeg market was firm, but closed comparatively unchanged and local dealers held quotations for Manitobas, steady at last week's closing prices. Western oats were also unchanged.

Local grain dealers' quotations are as follows:

Wheat-No. 2 mixed. \$1.05 to \$1.06; No. 2 white, \$1.05 to \$1.06 outside.

is unlikely and we continue to advise purchases on all declines.

Erickson Perkins & Co. had the following at the close:

Wheat—The market opened a shade higher. The trade was light for a while, but became active later on bidding up of December by shorts. The close was dull with most of the advance lost, we believe no decided stand should be taken on this market. Prices are high but stocks are so small that they exert no particular pressure. Receipts, however, will undoubtedly be heavier, both in the northwest and southwest, as soon as the railroads can handle the grain.

Corn—The stormy weather over Sunday evidently gave the alwance of 15 to 25, cattributed to smaller market opening with a rush and selling one cent over the close Priday. There was steady liquidation thruout the day, however, with prices as the close only a shade higher for the day. We believe prices are high and that accumulation of stocks will be felt if the near future.

Oats—The market was stronger in sympathy with the other markets. The market will probably sympathise with corn.

I have a shade and a shade the grain.

PEERAGE FOR GLADSTONE New South African Governor-General

First to Accept Title.

LONDON, Dec. 27.—It is understood in official circles here that, before leaving England for South Africa in April, Herbert Gladstone, the newly appointed governor-general, will receive approach to the high position. ceive a peerage. In the high position to which the third son of the great founder of the family has been called he regards a title as indispensable, and it is authoritatively stated that he will not refuse it.

This is contrary to the traditions of

the Gladstone family. Twice Queen Victoria pressed an earldom upon the acceptance of Gladstone, and twice he begged to be excused acceptance of the honor. But, with the new govnor-general of South Africa, the peerage has the prized accessory of plac-ing on a permanent footing his connec-tion with parliamentary affairs. If he finds the house of lords still to the fore when his term of governorship

ENGLAND HOPES FOR MUCH

Should Go a Long Way Toward Improving Conditions of "Submerged Tenth."

LONDON, Pec. 27.—Coincident with the passing of the current year and the opening of the new a heavy load of new laws, legacy of the dead parliament, will become effective in Great Britain to engage the attention of the body politic and of legal experts.

On Jan. 1, following the example set already by New York State, the children's court will become an established institution, and thus means will be afforded for the separation of juvenile and adult offenders, for the new court will deal with children and young persons who are charged with minor and serious offences. Neglectful parents will come under the supervision of probation officers, and the magistrates will have extensive powers in regard to sending delinquent children to reformative institutions.

The new housing act is expected to deal effectively with the condition of the "submerged tenth." Each county council must have a "live" housing committee to keep an eye on tenement and the submerged powers of

AURORA.

AGINCOURT. Dec. 27.—(Special.)—
Scarboro Township nominations, held here to-day, brought out a big crowd. Kennedy's Hall being filled. There was little in the way of excitement and Reeve Annis and all the old members of the council were re-elected by acclamation. The charge of Queensville became vacant in September, when Rev. Hugh Perguson resigned to take up work for the Children's Ald Society. Notime has been lost in securing another minister, and the call to Mr. Ross was a unanimous one. Those taking part in the induction services to-day are: The moderator of Presbytery, Rev. D. G. Cameron, Rev. F. C. Overend of Sutton, Rev. Malcolm MacArthur, a former minister of Queensville, and the Rev. H. F. Thomas, who has been acting moderator during the vacancy. Toronto men may leave by the 10.20 a.m. Metropolitan car and reach Queensville in time for the service.
