30 DAYS.

Historical Memoranda, &c.

PEBRUARY—In Latin Februarius, which signifies parify and to make expisations; this was practised uring twelve days. Feoruary comes also from Februar agriculture of the death, and father of Piston; and probably from theme Februar, terry sichesse which send the sonany subjects to that god. Them the sith the days increase of 48 minutes in the foreston, and of 48 in the evening.

MARGH—From the gftd Mary, believed father of Romulus, and for that reason was probably put by him the first of the year. Nume, his ancessor, put January. In this mouth new year's gifts were given, the sacred redders of the years. This mouth has 31 days, and the moon 30. From the 1st to the 27th, the days increase of 54 minutes in the forenon, and 67 sk intuities in the forenon, and 68 sk intuities in the

 2 and 4. a. m. Cold with fre showers. December. 31 62 90 121 151 182 212 243 274 304 335 365 The above Table shows the number of days from any date in one month, to the same date in any oth Booth.

REASPER:—How many days are there from November 1 to July 1 Pind November in the first column, and July at the heaft of the Table, and in the angle is 242, the number of days required. But if the given days be different, it is only adding or subtracting the difference, for instance, had the shower example been from November 1 to July 10, you must have added 2 days to the number found in the Table; and on the other hand, had it been from November 1 to July 1, you must have subtracted 2 days, and so in everyother instance when the date of one month is different from that of the other. In isapyear, if February be included, add one to the number found as above.

the observer without further trouble, with the knowledge of what kind of weather there is the greatest probability of succeeding, and that no near the truth, that nearly fee instances will it be found to fail. The nearest the time of the moon's change, first quarter, but, and last quarter is to mid-sight, the fairer will the for this calculation occupies from tag at night, till two next morning.

The moon's change first quarter, full and last quarter happening during six of the afternoon hours, i.e. from four to ten, may be followed by fair weather; but this is mostly dependent on the wind, as it is noted in the table.

table. The neaver to mid-day or noon, these phases of the moon happen, the more foul or wet the weather may be expected during the next seven days; the space for this calculation occupies from 10 in the forenoon to two interactions. These other rations refer principally to the afternoon. These other rations refer principally to exist the stem of the state of the stat

Though the weather is more uncertain in the latter part of Autumn, the whole of Winter, and the begin-ning of Spring; yet in the main, the above observations will apply to those periods also.

MEDIUM TEMPERATURE

OF BACH MONTH.

If we compare the extreme temperature of each month, with the medium or normal temperature of all the other months, we will arrive at the following probabilities:

JANUARY is sometimes as mild as the month of March, medium.

medium.

Passuaar resembles sometimes to the second fortaight medium of April, or to the first formight medium of Jannary.

Manor resembles sometimes to the month of April medium, or to the second fortaight medium of Annary.

Arau. never reaches to the temperature of the month of May.
