BAZAAR

flort of Charlottelands.

IN AID OF Furnishing the New Temperance Hall.

(Under the Paironage of Lady Bannerman.)

HE New Temperance Hall in this Town being searly completed it has become necessary to provide the requisite Funds for uitably furnishing the same. A Bazaar will therefore be held, for his purpose, in the said Building, on

FRIDAY, The 2nd day of January next,

The 2nd day of January next,

The projectors of this Bazaar doem it essential to the prosperity of the cause in which they are engaged, to render the Hall as comfortable and attractive as possible—to make it at once a rallying point for the Sons and their friends, and a credit to the community. To accomplish this object, however, from the Funds of the several Town Divisions, was found to be totally impracticable, without causing serious embarrassment thereto. An appeal to the liberality of the public has, therefore, been determined upon; and it is hoped that those friends who feel disposed to further this object, but who have not yet commended their labors, will do so without delay. Ladies can promote this object, not only by working for it themselves, but also by directing the attention of their friends towards it, and soliciting their sid.

The following is a List of Ladies who have kindly consented to receive contributions:—

mr. Fitzgerald,
— Yates,
— Lydigrd,
Miss P. Davie
— Lydigrd,

Articles may also be sent to the Rev. Mr. Fitzgerald, Mes B. Dawson, W. Heard, J. Rider and B. Moore. B. Dawson, W. Heard, J. Rider and B. Moore.

N. B.—Every parcel should be labelled, FOR THE TEMPERANCE BASAAR, with a list of the Articles, the name of the contributor and the price set upon each Article. As a guide to those who may wish to contribute, the following is a List of such Articles as are most likely to be useful:—Ornamental needle-work of all kinds, Millinery, Baby Linon, Toys of all sorts, Dolls dressed in the contume of different nations, as the possession of France, Italy, Wales, Soutland, &c., Miniature Articles of Furniture, as chairs, tables, beds, &c.—Models of Public Buildings, ships, &c.—Basket work, Turner's goods, Engravings, Drawings of all kinds, Paintings, Curious Mineral specimens, Dried Botanical specimens, as Heaths, Mosses, &c.—Shells, Frepared Insects, Choice Flants, Books, Sweetmats, Cakes, &c.—Materials for Needlework, and Money to buy Materials.

And on the Evening of Wednesday the 7th January, A Vocal and Instrumental Concert will be given in the Hall by

Several talented Vocalists and Mus who have kindly volunteered their services for the occasion. Tickets to be had at the Bazzar.

By order of the Committee,

W. B. DAWSON, Chairman.

October 6, 1851.

Molasses, Oatmeal and Seal Oil.

TENDERS will be received at the Sheriff's Office, until Wednesday the Thirty-first day of December, from persons desirous of furnishing the Charlottetown Jail with such quantities of Molasses, Oatmeal and Seal Oil, as may be required for Twelve Months, the same to be of an unexceptionable quality. Tenders to express the price per gallon and per pound. Payment will be made quarterly.

WILLIAM HODGES.

WILLIAM HODGES, Sheriff of Queen's County.

Charlottetown, Nov. 28, 1851.

NOTICE.

WNERS of Farm-steadings or Proprietors of Land for Sale and to Let or Lease, in Prince Edward Island, are solicited to communicate with the Subscriber, as to terms and particular of same, for the information of intending settlers of small capital, and of the Scotch Agricultural class. An early notice, per Post (prepaid), will meet atte WILLIAM LA'MONT,

General Com. Agent.

5th September, 1851.

NOTICE.

THE Members of the Georgetown Branch of the Royal Agricultural Society, whose Subscriptions for the present year are not paid up, are hereby notified, that unless the same be paid on or before the 1st January, 1852, they will not be entitled to any of the privileges of the Society. Persons desirous of becoming Members, are requested to signify their intention to the Secretary, and pay their Subscriptions on or before the same date.

VOL. 21 CHARLOTTETOWN, PRINCE EDWARD ISLAND, TUESDAY, DECEMBER 9, 1851.

(From the London Athenaum.)

- EXPEDITION TO CENTRAL AFRICA.

Your readers have already been made acquainted with the death of Mr. Richardson in Borau, which melancholy event adds another name to the large number of those who have fallen a sacrifice in the cause of African discovery. His venturing on so gigantic a journey as that which he originated, could indeed only be looked at with apprehension by all who know him personally, as he was of feeble constitution; though he successfully accomplished his first journey in the northern part of the Sahara, occupying nearly a year, during which he endured considerable hardships and privations, without apparent injury to his health. His death is the more to be deplored by his friends, as he was so near Lake Tsad, the end of his mission, whence he was to return by the direct road to Tripoli.

without apparent injury to his health. His death is the incre to be deplored by his friends, as he was so near Lake Tsad, the end of his mission, whence he was to return by the direct road to Tripoli.

As the deceased traveller had little or no part in the scientific interests of the expedition, these will suffer no interruption from his untimely end; Dre. Barth and Overweg will continue their journey as before. It is earnestly to be hoped, that they will be permitted to bring their perilous undertaking to an end, and have the good fortune to return to Europe with the results of their extensive and important labours.

Full accounts from the two last-named travellers have just arrived in Europe. In these they confirm, your readers know, the tidings of the death of their companion, and report favourably on their own health and progress. Your readers will recalled, that Dr. Darth had arrived at Kano in February. At this place he remained during that mouth and the early part of March; and then, Dr. Overweg not having yet rejoined him, he set out for Kuka, which place he reached, as you know, on the 2d of April. On his arrival he presented himself at the Shiek's palace as one of the surviving Christians who had come from England to bring him presents from Her British Majesty. Mr. Richardson had died os suddenly, that he was unable to leave, in his capacity as head of the expedition, and efficial representative of the English Gevernment, sind directions as to the course to be pursued generally; and his interpreter and servants had deposited every thing belonging to him with the Vizier of Bornu. Dr. Barth was received with great kindness and hospitality by the distinguish this enterpreter and servants and hearing Europe after a lapse of nearly nine months, he says he was unable to describe.

While awaiting the arrival of Dr. Overweg, Dr. Barth made preparations for the exploration of Tead, and collected information respecting every quarter of Central Africa, with the zeal and indefating blut which distinguish this ent

water into it.

Dr. Barth has sent a vocabulary of the Duddumas to the Chevalier Bansen, which it is presumed, will prove of great interest, as
being that of a nation that has preserved its independence from the
remotest nerical.

emotest period.

Dr. Barth has also sent home at various times, a great number of

MYSTERIOUS DEATH OF A LADY.

An investigation, which did not terminate till nearly one o'clock on Saturday morning, was opened on Friday afternoon, before Mr. Wakely, the coroner, and a jury of householders of Nary-le-bone, at the Buffalo's Head Tavern, New-road, as to the circumstances connected with the death of Mrs. Mary Elizabeth Kelly, aged 70, an independent lady of large fortune, residing at No. 9, Nottingham-terrace, Regent's-park. The proceedings, from the ramours affast on the subject, had excited great interest, being alleged that the deceased had died in a very mysterious and suspicious manner,

deceased had died in a very mysterious and suspicious manner, leaving property to the value of £30,000, which was claimed by Captain Frederick Cornec (late of the Indian army) as the alleged son of the deceased lady, who had never been married, and who had a will in his pocket, stated to have made by the deceased, leaving the whole of the deceased lady's property to him. The registrar had refused to register the death, and hence the inquest. The jury having viewed the body of the deceased, which lay at her residence, Margaret Liddell, a servant, was first examined, and stated, that she found deceased in her bed in a state of insensibility in which condition she lay for several hours and then died. Contain tessuence, sargaret Educien, a servant, was intre examined, and stated, that she found deceased in her bed in a state of insens-tibility in which condition she lay for several hours and then died. Captain Corner, deceased's son, was aware of her condition, but no medical man was sent for. She could not in any way account for deceased's death. Believed she had left a deal of property. The coroner, after hearing this evidence, consulted with the jury, and resolved to adjourn the inquiry till nine o'clock the same evening, for a post mortem examination of the body, which was entrusted to Mr. Giltham, the head surgeon of Marylebone Infirmary. On the re-assembling of the jury, Captain Frederick Corner was examined. He said he was the son of the deceased lady, who was seventy years of age. She had been sickly several times, but always had an abhorrence of doctors, and would never have medical advice until about four months since, when a friend of his prescribed for her. The name of his friend, was Dr. Frith, of New-cross, Deptford. He prescribed some pills for her, but she only took two or three, and positively refused to take any more. He repeatedly advised the deceased to have advice, and so did the servant, but without effect.

By the Coroner: The deceased had made a will five years since.

vised the deceased to have advice, and so that the contest of the

sent for a modical man, he replied—As a datiful son he did not feel justified in going beyond the wish of a parent, and therefore he sent for no one.

Anne Merculith, a charwoman, stated she was employed at deceased's house. She had never seen deceased until within three minutes of her death, when she was called to look at her. She knew the family through the kindness of Captain Corner to her late hashand some time before his death. Always understood the captain to be the son of the deceased lady, but could in no way account for the death of Mrs. Kelly.

Mr. Gilham, head surgeon of Marylebone Infirmary, was then examined, and deposed that he had made a post mortes examination. He found the brain, lungs, intestines, and liver perfectly healthy. The stomach appeared nearly empty, and he could not detected any evidence of poison. The heart was rather fatty, but the ventricles were all healthy.

On the Coroner enquiring what was the actual cause of death, Mr. Gilham stated, that it was inexplicable. There was no disease of any organ, or any thing to indicate what had been the cause of death.

Captain Corner (in answer to a jaryman, as to why he applied to St. Marylebone workhouse on the subject of the death) and his object was ta register the death; but, finding he could not get it registered, he applied to the coroner's officer; and the coroner, upon

THE BROKEN HEARTED.

I have seen the infant sinking down, like a stricken flower, to the grave—the strong man fiscrely breathing out his soul upon the field of buttle—the miserable convict standing upon the scaffold, with a deep area quivering upon his lips—I have viewed death in all his forms of darkness and vengeance with a tearless eye—but I never could look on woman, young and lovely woman, finding away from the earth in beautiful and uncomplaining mehaneboly, without feelings are considered to the seed of the seed of the transit of the seed of

the flet being communicated to him, issued his warrant for the inquest.

The coroner, having remarked upon the singular character of the case, the jury returned the following verdict—" That the deceased had died from some mortal cause unknown to the jury, and not discovered on making a post morten examination."—Daily News.

NO. 1132

them.

Dear brother, I want you and all the ministering brethren to preach a good charity sermon, that will warm the hearts of the congregations and give them to know that they who give to the poor, lend to the Lord, and no doubt, he will give them good interest.

poor, lend to the Lord, and no doubt, he will give them good interest.

I will say no more on that head, as I intend by and by, to give you a brief sketch of brether Catherine's course, since he was bore again. We have reason to be thankful that all that God has done is well done. He is still carrying on his good work amongst us. I have baptized eight since I last wrote, and there are four more received for baptism.

On leaving home last Mosday, to come to St. John, as I came to the Roman Catholic Chapel at St. George, in turning to come into the St. John Road, my horse, who is like myself, somewhat strongheaded, would turn into the Magaguadevic, I tried to turn him into the St. John, and finding he could not go the way be wanted, he turned quickly round and run the fore wheel under the box of the waggon and unlocked it, and out I went headforemast and landed on my left shoulder, dislocating it. I thanked God it was no worse, and being within forty rods of Dr.Thomson's office, he put it is with hard work to himself but harder to me; he did it well, and after it was bound up I came on to the City, and feel as comfortable as can be expected, and thank God for his mercies to me a sinner.

James Walker.

Masquareen, N. B., Nov. 5, 1851.

Machinery for Cooperage.—A novel method of constructing casksand barrels, and all vessels connected with cooperage is now in operation at the patent cooperage works in Wenlockroad, London. By the employment of the steam-engine, the circular saw, and a recently invented jointing and back machine, a cask of the largest dimensions can be completely formed and made ready for use in the short space of five minutes from the raw material—viz., a piece of oak. The staves of the cask are first cut with straight sides, the circular saw being placed at right angles with the oak plank. The stave is then placed horizontally, and bent into a curve by a powerful machine, and brought into contact with a circular saw on each side of it, placed at an angle. This process gives the proper shape to the stave, the sidea being gradually tapered at the end and being made to bulge in the middle. The jointing and backing machine, the new invention, is also used for this purpose, and is more rapid in its execution than the angular saws; it in fact, works with the most marvellous rapidity and precision. The staves and one end of the cask are then placed in a machine formed of iron rods, called a trussing machine, each rod acts upon a separate stave, and the whole of the staves being equally compressed into a circle, the hoops are placed around them, and the cask is complete. The neatness and finish of the work is equal to what a good cabinet-maker can produce, every part being true and accurate. The calculation is, that 15 workmen with the use of this machinery, can make 150 casks a day; whereas the same number of persons using only manual labour could scarcely produce a seventh part of that number. The importance of the invention, and the application of steam power to it, may be imagined from the fact, that the great brewing firms of the metropolis alone expenditure of the navy is still greater, and that the demand of the vintages of the Continent is so great, that a great deal of wine is

CURIOSITY OF WATER.

CURIOSITY OF WATER.

Nor is the halistone less soluble in earth than in air. Placed under a belighas with twice its weight of lithe, it gradually melts and disappears; and there remain four parts, instead of three, of perfectly dry earth under the glass. Of a plaster of Paris statue, weighing five pounds, more than one good pound of solidified water. Even the precious opal is but a mass of fint and water, combined in the proportion of nine grains of the earthy ingredient to one of the flaid. Of an acre of clay land a foot deep, weighing about one thousand two hundred tons, at least four hundred tons are water; and, even of the great mountain chains with which the globe is ribbed, many millions of tons are water soldified in earth.

Water, indeed, exists around us to an extent, and under conditions which escape the notice of cursory observers. When the dyer buys of the dry salter one hundred pounds each of alum, carbonate of so-da, and soap, he obtains, in exchange for his money, no less than forty-five pounds of water in the first lot, sixty-four pounds in tha second, and a variable quantity, sometimes amounting to seventy-three and a half pounds, in the third. Even the transparent air we breathe, contains, in ordinary weather about five grains of water diffused through each cubic foot of its bulk, and this rarefied water no more west the air than the solidified water west the lime or opal in which it is absorbed.—Quarterly Review.

From late English and American Papers.

(From the Halifax Colonist, Dec. 3.)

In the investerious silence of midnight, when the streams are glowing in the light of many stress, that image comes floating upon the beam that lingurs around my pillow, and stands before me in the stream and the girls of years is turned to decame of blesseedness and peace.

[The following letter, inserted by request, is capied from the Chriz, lien Fisitor, published at St. John, K. B. It will doubtless, be read with interest in this laband, as it has reference to the aviation of the control of t

on the female department, and three, Miss Ellen D. Traphagen, we Louisa McFarlane, and Miss Julia Blake, from the primary partment, were forced over the baunisters and fell with the chiles into the well. They were, however, happily not seriously

department, were forced over the bannisters and fell with the children into the well. They were, however, happily not seriously injured.

The time in which all took place was much less that than we have occupied in describing it. Meanwhile the excitement in the street was intense. The alarm of Fire had collected a dense crowd, and though the police were early on the spot, in strong numbers, they had great difficulty in obta ning a passage through the excited assumblage.—Finding all their efforts at forcing the front doors usedess, the police entered the building by the back way, and broke open a door leading into the well, from the busement. The children were then taken out, nive and doad, and conveyed to the Station-house near by, followed by a large number of mothers and sisters, each one anxious to ascertain if her own little relatives were uninjured. In the station-house, the wounded were placed in cots, and efficient medical aid immediately summoned. The dead were laid out to be recognized by their friends. We are incompetent to describe the heart-rending grief of the searchers, while looking among the mutilated bodies for their little ones.

Accustomed as we are to frightful cassatties in this city, we have never seen an secasion that called so loudly for the synapthics of the beholder. Many mothers were there, who, but a fow ninutes before had equipped their only children for school, and now were suddenly called from home, to look among the fearfully mutilated hodies for all that remained of their offspring. Others there were, who after searching in vain for their lost ones, again and again turning over the ghastly remains, were almost proxitated with by at discovering their children alive and well. We leave mothers and fathers to imagine the scene, as they only can describe it, we cannot.

New York Courier & Enquirer, Noo 22.

In New York there are some seven thousand grog shops, of which fifteen hundred are known to be unlicensed. We learn from a recent report of Marshal Tukey to the Boston Common Council, that the whole number of places in which liquor is sold in the city of notions is 1,800. In ward 1 there are 335 places; ward 2, 285; ward 3, 120; ward 4, 218; ward 5, 36; ward 7, 186; ward 3, 97; ward 9, 26; ward 10, 111; ward 11, 67; ward 1, 295. American dealers, 490; Germans and Swedes, 110; Irish, 900. Sold in cellars 310; above ground, 1,196. Male dealers, 1,374; female dealers, 126. Sold in cyster and ice-cream salcons, 53; bowling alleys, 90; buildings for same, 14; groceries, 469; other places, 1,031. All first-class hotels, except four, have an open bar for the sale of liquor. In answer to the eight interrogatories, requiring him to give an opinion of the means best calculated to check the progress of crime in intemperance, whereby our faxes are greatly increased, and the reputation of the city injared, Mapsial Tukey replied, "Execute the Laws."

There is again trouble among the Mormons. Brigham Young, the temporal as well as spiritual Governor of Utah territory, having fillen out with some of his chief official coadjators, has ordered them to abdicate his dominions. These functionaries, on the other hand, accuse the Governor of analyzactice, in having aquandered twenty thousand dollars of the money appropriated by Congress for the general benefit of the people of the territory; in addition to which, he attempted to get possession of twenty-four thousand dollars which was in the hands of the Secretary, who is one of the exited officers. The Mormons have recently made a settlement at San Bernardine, in Les Angelos county. They are about to build up a city at that point, which is expected to contain six thousand inhabitants in six months. They are talking about a railroad from Great Salt Lake City to that point.

A man in New York has discovered a new mode of "shooting shead." It is a Mr. Daggett, who has acquired so no notoristy by his connection with a Flying Machine, and he undertakes to propel an engine by the action of powder instead of steam. The Times are the power is obtained by regular explosions of small quantities of ganpowder. A working model in operation is estimated to consume about two onnees of ganpowder per mile with the proportionate weight offour or five cars attached. It can be used on common roads, applied to common carriages, and it is said to be perfectly noiseless in its operations. It is said, several successful tests have been made in the presence of two or three scientific men and engineers, and that Mr. Lee, Superintendent of the Boston and Providence Railroad thinks favourably of the invention, and has consented to lay the subject before the Directors of that road.

ENGLAND.

PHILLIPS' PATENT FIRE ANNHILLATOR.—With a view of adopting the fire annihilator machines at Knowsley, as a protection against fire, Lord Derby put the efficacy of the machines to a sovere test on Wednesday last at Knowsley. He had the building in the park, known as the dairy which his lordship is about to poll dawn, prepared for the purpose. The building is circular and of considerable dimensions, with windows and doors all round, all of which were taken out, admitting a strong current of air, which was increased by a sort of founce wentilator opening through the roof. This was filled with a very large body of dry poles, pine boards, a large quantity of dried faggots, and the place well bedded with shavings, &c. For the purpose of keeping up a fierce fire, a dozen tar barrels were placed in the centre of this pile. Mr. Francis Morton of the firm of Francis and H J Morton, of North John street, the sole agents for the patent, attended and minutely described the invention and the machines to Lord and Lady Derby. The fire was allowed to larm some time when his lordship gave the word, and the machines were struck off; from the moment the vapour was brought to bear upon the berning pile, the flames became instantly controlled, and were extinguished with the marvellous rapidity which characterizes the invention and in a few minutes the whole body of fire was put out.

All present expressed their satisfaction at the complete success which had attended the trial.

The London Times says that there is now no doubt of the permanency of the crystal palace, her Majesty having expressed herself favorably to its remaining.

in man autonome trust.

To London Times says that there is now no doubt of the per-necy of the crystal palace, her Majesty having expressed herself ably to its remaining.

IRELAND.

An Irish paper says, that an epidemic of a serious character, causing very extensive mortality, is at present very prevalent among the children in the County of Armagh, and other parts of the North. The affection is of the threat, and presents something of the character of croup and scarlatina, and in most cases has resisted the anticating of medical treatment. racter of croup and scarlating application of medical treatm

NOVA-SCOTIA. (From the Halifax New Era, Nov. 28.)

(From the Halifax New Era, Nov. 28.)

There are not at the present moment two distinct parties in the Legislature, as there were last session. For the moment the old line of definarcation has been ewept away, and the complexion of the present House is varied by men of every shade of political options. At the commencement of the last session, every man knew the ground on which he stood—he had fought his way to the judicities halls, parely as a political partizan, and each man ranged himself by the side of his respective leader. The question on which the public mind could unite, was clearly defined—every man understood it—the advocates of the new system of Government were victorious, and the result was, the formation of the present ministry.

If we look on the Boar of the House for the old Liberal majority—whore is it? The Hon. Speaker may support the ministry—he may there to the distribution of the control of

A SCHOONER CAPSIZED AND TRIRTY PERSONS LOST.— The schr. Newholl, Capt. Maine, was espeized a few days since on Lake Michigan, with about thirty persons on board, all lost.—She was on her passage from Chicage to Graud Traverse, with full supplies for a lumbering establishment at the latter place.

FRENCH OFFICERS AMONG THE KAPFIRS.—It is stated that a French officer of distinction named Parel, is among the Kaffirs, as a leader of the forces against the English. He is said to have acquired a great ascendancy in the country by his bravery and intelligence.

THE TRUE LIFE.—The mere lapse of years is not life. To eat, and drink, and sleep to be exposed to darkness and light, to pace round in the mill of habits and turn the wheel of health, to make reason our book-keeper, and turn thought into an implement of trade—this is not life. In all this but a poor fraction of she consciousness of humanity is awakened; and the sanctities still-slumber which make it meet worthy while to be. Knowledge, truth, love, beauty, goodness, and faith, alone can give vitality to the mechanism of human existence; since the music that brings childhood back, the prayer that calls future near, the doubt which makes us mediate, the death that startles us with mystery, the hardship that forces us to struggle, the anxiety that eads in trustare the true nourishment of our natural being.

ELECTION.—The Election for one Member to represent George-town in General Assembly, is going on to-day—and, it is thought, will be sharply contested. The only Candidates are Martin Byrne, Eaq., who is said to be a supporter of the present Government, and R. M'Aulay, Esq., formerly a Member of the Assembly, who takes his stand on the principle of the exclusion of Members of the As-sembly from certain Offices of Emolument under the Government.

Fire.—On the morning of Saturday last, at about six o'clock, a brilliant light was observed, by those who were stirring in Town at that early hour, in the direction of the Princetown Road, proceeding evidently from some large building on fire. On the alarm being given, several persons immediately proceeded to the spot, with the Barnek Engine and the Military. The building turned out to be a large new dwelling house, in the course of erection and nearly finished, for the Hon. Chas. Hensley, on part of the grounds lately known by the name of Charlie's Hope, on the West side of the Princetown Road. With the atmost exection of all on the spot, the main building, in which the destructive element had had fall and undisturbed scope for some length of time, was catirely destroyed, but a projection in the rear, intended to be used as a kitchen, was saved without much damage. Had the building been uninsured, the loss would have fallen heavily upon Mr. Silas Barnard, the contractor, but fortfinately, about a mouth since, an insurance was effected at the Equitable Office, (of Lonlon,) for about £400 Halifax Currency, which will make the loss more easily borne. Mr. Barnard is a considerable loser in tools, lumber, shujgles, &c., uninsured. No cause can be assigned for the origin of the fire. Mr. B. went over the building himself at 8 o'clock, on the previous evening, leaving all safe—as he thought. No person slept on or near the premises.

when the punite mind come unite, was meanly unined—every into anderstood it—the advocates of the new system of Government were victorious, and the resist to the formation of the present anistry.

But time his rolled on, and changes have marked its ebb and flow, since the day of its formation. With the success of the struggle, the struggle itself cessed—and more uninds relapsed into comparative indifference—and he who expects that the present diversement will be sustained by that party, the cased to reflect the altres—and most assertedly will not receive it.

Let us glance healily at the caising supect of affairs, and ascertain, if possible, if we are correct in the above.

Up to the present moment, it is not known, which of the political parties that divide public opinion in this country, is appeared to the superiory—the Likerals smile at the idea, and quietly await the denomement. We will not known and quietly await the denomement. We will not known and quietly await the denomement. We will not known and quietly await the denomement. We will not known and the monitority of the present Chines, or who are supposed to be supported of the supported of the supported of the support of the present moment, it is just possible, that their denomement. We will not known a califical faint up.

When we look at the men who either belong to the present Chines, or who are supposed to be supported of the support of the supp

The body of a man, supposed to be an American fisherman, was found near Treendie Harbour, about three weeks since, with a mark on his right shin bone, about six inches above the nucle, supposed to have been caused by a blow of an axe. Two other bodies came on shore at Savage Harbour on or about the 28th ult.; on it is an of one of them was marked, in black ink, William Wallace and Mary-Wallace. They were both decently interred in the Presbyterian Church Yard at St. Peter's, by order of James Coffin, Esq., J. P. J. P.

Royal Agricultural Society.

MONTHLY COMMITTEE MEETING, DEC. 3, 1851. PERSENT :

Hon. Stephen Rice, Present.
His Honor Judge Peters, Flist Vice President,
Hon. J. M. Holl,
Hon. J. Swabey,
Benjamin Davies, Esq.
Mr. John Thorn,
Hon. George Coles,
Hon. Joseph Pope,
Mr. George Beer, jun.,
Bergenedius of last meeting. Also the Rener

Read the proceedings of last meeting. Also the Report of the Inspector of the Crops of Turnips entered for competition in King's and Prince Counties; which was ordered to be printed. Mr. John J. J. Eppay, the contractor for printing, stitching and hinding 8000 copies of "Hints to Farmers of Prince Edward Island," having brought in the work, presented his Bill; whereupon it was

it was

Resolved, That the Committee appointed to make the centract be
requested to examine the work, and ascertain whether Mr. Pippy
has executed the same according to his contract, and send in their

has executed the same according to his contract, and send in their report.

Ordered, That all Reports from time to time made by the Visitors of this Society, be entered in the Minute Book—and that all Letters written by the Secretary to the respective Branches and Depots, be entered in the Letter flook; and also that the Secretary do make an Index to the Minute Book and Letter Book, for the purpose of more conven ient reference thereto.

Ordered, That the Secretary do write Mr. M'Monagle, of Sussex Vale, New Branswick, enquiring whether he will exchange one of his Entire Horses for 'Saladian'.

Ordered. That the charges of the Visitor of the Branches, and Inspector of Turnip Crops for King's and Prince Counties, be paid. On refering to the Report of Charles Stewart, Esq., respecting his visit to inspect the Accounts, &c., of the Branch Societies—
Resolved, That the Secretary be directed to write to the Secretaries of the respective Branches, enclosing a copy of the conditions required, in order to constitute a Branch Society, and to state that he has directions—before the requisition of any Branch Society be complied with—to ascertain that the necessary conditions are completed.

By Order.

By Order, GEORGE BEER, Secretary.

The Steamer Rose brought over on Frida y, the mails due on that

The Schooner Damzel which had been engaged to bring over from Picton, the mails due last Tuesday, not being able to make way against the North winds, the Steamer Rose was despatched on Saturday morning after her, and returned with her mails on the evening of the same day.

By a Proclamation in the Royal Gazette of vesterday, the General Assembly of this Island stands prorogued to Tuesday the 18th January next.

CHARLOTTETOWN, P. E. ISLAND, December 8th, 1851. To Captain R. ROLLO,

42 Regiment, Royal Highlanders, &c., &c.

Sir; I take an early opportunity to return my warmest thanks to you, to Lieutenant J. W. P. Order, and the Petty Officers and Soldiers of the detachment of the 42d Regiment Royal Highlanders under your command, for the very efficient and energetic assistance afforded at the Fire which took place at my house in the vicinity of this Town on Saturday morning last. To their willing and skilled efforts, zealously sided by the Sergeant of the Royal Artillery and his men, and by such of the neighbours as were informed of the calumity, it is swing (under God's Previdence), that the building was not totally consumed.

Although the part of the building which remains is of little value when compared with that which was destroyed; still, it remains an honorable testimony of the very great and hazardous exertion made by these gallant men for its preservation.

I have the honour to be,
Your obedient Servant,
CHARLES HENSLEY.

CHARLES HENSLEY.

Birth.

At the Warren Farm, on Saturday, the 6th inst., Mrs. Lyall of a

Alarried.

On the 24th ult., by the Rev. D. Fitz Gerald, Mr. Heyman J. P. Terlizzick, to Elizabeth A. L., daughter of Mr. John M. Donnell, both of Charlottetown.

Died, At Halifax, N. S., on Wednesday last, William Arthur, fourth son of Thomas Owen, Esq., Postmaster General of this Island, aged 21. The deceased was on his return home from Liverpool, G. B., via Halifax, when attacked by a violent fever at soa, by which he was so speedily reduced, that he survived but a few days after disembarking. By the kind sympathy of his father's friends in Halifax, his remains were forwarded without loss of time to this Town to his afflicted relatives, and interred yesterday.

On Thursday morning, the 4th inst., Sarah A., aged 18 months, only child of Mr. S. C. Holman, of this town, late of Boston.

At New London, on Wednesday, the 19th ult., John Adams, eldest son of Mr. Thomas Adams, in the 19th year of his age.

On Sunday night, Mr. Theophilus Rodd, Blacksmith.

Passenger.

In the Brig Rio, from Georgetown for Dublin-F. Longworth,

Ship News.

A letter dated Gaspe, Oct. 29, 1831, and addressed to the Postmaster, Charlottetown, has been handed as, wherein it is stated that the Sehr. Barbeanne, (Barbara Ann.) Franceis Candee, master, sailed from the above place, for Malpaque or Cascumpeque, P. E. Island, on the 28th Sept. last, having on board, besides the crew, the following passengers:—Mr. M. Donnell, Mr. M. Carthy and family, and a Miss M. Fannes, and that since her departure no tidings have been heard of her, and it is feared that she foundered at sea in the disastrous gale of the 3d October last. Should any persons have heard anything of either vessel or crew, they are requested to communicate the same either to the Post Office at Charlottetown, or to the Office of the Islander Newspaper.

(From the New York Herald, November 11, 1851.)

(From the New York Herald, November 11, 1851.)

Mr. E. Smith, of Provincetown, who has returned from Prince Edward Island, reports:—That schrs. Grafton and Cohannet, of Harwich; Naisd Queen and Charles Augustus of Hingham, have all been got off shore, and the last named eailed for home 20th ult.; schr. Rival of Trure, has also been got off. Schr. Melrose, of Provincetown, remained sahore at St. Peter's, and a contract was made with Gifford's Scrow and Lever Company of Provincetown, to get her off and deliver her at home for \$775. The night heads and forward part of a schooner with chain attached, came ashore on Hog Island, after the gale, name, &c., unknown. Appeared to he a small Vessel. The chain was of three different pieces, from half an inch to seven-eighths of an inch. Had a five-inch stay; the jib was 46 feet on the luff, had no bonnet, and had one reef in it. Schr. Eleanor M. Shaw, of Trure, which was seen near Malpeque during the gale, has not since been heard from. Mr. Smith reports that a part of the stern of a vessel, much broken, came on shore at Hog land, having "Eleanor" on it. Mr. S. visited schr. Eleanor, of Gloucester, ashore about 5 miles from the place where the plank was picked up, and accertained that k did not come from the Gloucester vessel, which remained unbroken. A schr. is sunk near Tignish; had two topmasts, and the heads of her masts were above water. Seven or eight soltrs, are sunk off the coast, between Cascumpoque and St. Feter's, whose names are unknown.

Schr. Princeton, of Gloucester, and it is feared she must be reckozed in the list of vessels lost off the coast of Prince Edward Island in the late gale.

Port of Charlottetown.

Cape Tormentine commencing on FRIDAY the 19th of December,
instant, and the Mails for England will be forwarded on that day,
and on
Friday, 2d January,
16th January,
15th February,
and 27th February,
THOMAS OWEN.

y. THOMAS OWEN.

General Post Office, harlottetown, Dec. 9, 1851. The Mails from Nova Scotia will be due every Monday night. (All the Papers.)

NFORMATION is wanted of JAMES DRINAN, a native of Kinsale, Cork, a House Carpenter by trade, who left that place about 24 years ago, and is believed to have settled in Prince Edward Island. A letter is stated to have arrived from him 10 or 12 years ago, addressed to his brother, but, is consequence of his death, it was returned through the Post Office. Two daughters of that brother survive and are married, Sarah Meagher and Marianner Delany, who are instituting the enquiries. Information can be addressed to Messra. SIMMONDS & Co., Colonial Agents, 5, Barger Yard, London. dressed to Yard, Lond

London. ember 9, 1851. [Editors will oblige by copying.]

Notice.

A MEETING of the Peu-holders of St. James's Church will take place in the Church, on THURSDAY 25th of DECEMBER, at 11, a.m., on business of importance.

J. MACKIESON. Charlottetown, Dec. 4, 1851.

ships 81, 40, 53,57, 58,59,60 and 62.

ships 31, 40, 53, 57, 58, 59, 60 and 62.

TAKE NOTICE—That a unjority of the present House of Assembly, during its last Session, passed an Act, which determined that all RENTS due in this Colony, shall henceforth be paid in current money. I do, therefore, hereby Notify Tennuts residing on the various Townships under my management, that all Rents and Taxes must hereafter be liquidated in Money, as it becomes due, or the still berigidily enforced; and also, that no excuses will in fature be received for its nonpayment; or indigence be permitted them as formerly. Those persons in Arrenrs of Rent are requested to one to an immediate arrangement for the payment of their respective Accounts, to prevent my being obliged to have recourse to legal proceedings for its recovery, or ejectment. And all Tennuts who have performed labour on these Estates—or made payment in any other way—on account of Rents, and who have not been settled with for the same, are requested to call at my office in Charlotte town without delay.

OFFICE HOURS from 10 to 4.

Wilderness Lands, on the above Estates, are notified that they will be presecuted to the atmost rigour of the law, without distinction.

Charlottetown, 2d December, 1851.

Blake's Metallic Fire Proof Paint, OR, ARTIFICIAL SLATE.

OR, ARTIFICIAL SLATE.

THIS admirable article has been tested for some years and proved the deep valuable, becoming a perfect siate, as hard as marble in a few months, completely protecting whatever is coated with it from the action of the weather and fire—a better fire-proof than time a zinc. Several Insurance Companies certify they will insure buildings covered with it at a cheaper rate, than if covered with those metals. It is of two colors, the black is best for noofing—the chocolate the best thing ever discovered for sides of either brick or wood, forming a perfect stone coating of a handsome stone or chocolate color, can be easily changed by a little white lead or other coloring matter to suit the taste. There is nothing equal to it for steamboat and car decks, and all kinds of iron as it forms a coating nearly as hard as the iron itself, and never cleaves off.

BEWARE OF WORTHLESS COUNTERFEITS.

BEWARE OF WORTHLESS COUNTERFEITS. As the popularity of my paint has induced scores of unprincipled individuals to grind up, and offer as fire-proof paint, all kinds of worthless stuff, much of it nothing but rotten stone that has no cohesive attraction, is held on only by the oil with which it is applied; consequently as soon as the action of the atmosphere destroys the oil, it will wash or rab off like Chalk or Whiting, nothing can yet he known of its lasting qualities, as it is but little over a year since they got them up, whereas mine has been tested about seven, and where first applied is now like a stone.

The original and geaunine article can be obtained of PATRICK STEVENS, Orwell, my authorized Agent for the Island.

WM. BLAKE, Patentee.

TRICOPHEROUS

MEDICATED SYRUP—Truth loves an incredulous audicance, for if they listen, they are sure to become converts. If there is any man or woman who challenges the statement that Barry's Tricopherous is a specific for cutaneous diseases and injuries, and the best preparation for the hair extant, all that is asked is that he or she will try one twenty-five cent bettle of the fluid, and read the pampihlet in which it is enclosed. Read and make the trial. Truth will then force conviction upon the mind, that all, and more than all, that has been claimed for the preparation by the inventor, is as palpable a fact as the existence of the sun, or changes of day and night. Referring the reader to the thing itself, and the accompanying treatises for a solution of all his doubts, if he entertains any, we will here briefly state what the Tricopherous will do. It will remove scarf and andarfuff; it will restore, preserve and beautify the hair; it will prevent it from becoming harsh or gray; it will dispose the hair to curl and render it glossy: it will relieve inflammation, itching and all irritation of the skin; it will cure bites and sprains; it will take away the pain of cuts, burnes, bruises and sprains; it will take away the pain of cuts, burnes, bruises and sprains; it will take away the pain of cuts, burnes, bruises and sprains; it will allay the pain of sheumatism and cure headache. For these reasons, it ought never to be absent from the dwelling of any-family, and no one should travel without it. Sold in large bottles, price 25 cents, at the principal office, 137 Broadway, New York. For sale by the principal merchants and druggists through-

Charlottetown, Sept. 2d, 1851.

JUST PUBLISHED, PRICE 28.

or How to Live and What to live for; with ample rules for Diet, Regimen, and Self-Management; together with Instructions for securing Perfect Health, Longevity, and that sterling state of Happiness only attainable through the judicious observance of a well-regulated course of life. By a PHYSICIAN.

OPINIONS OF THE PRESS.

"There is a vast deal of good sense in this little volume. The rules relating to the 'important operation of cating' are admirable. The moral rules are as good as the physical, and the writer is well entitled to be heard."—Allas.

"The work before us is written in a plain homely style, and the information which it contains in connection with all matters relating to Trace.

health and are, to o an various Times.

'A little book abounding in round, seasible, and practicable advice for the management of health from infancy to old age. The writer's instructions are eminently judicious. This is a manual which every house bodd should possess, and which young and old will read with profit."—

structions are enmently indicious. This is a manual which every house-hold should possecs, and which young and old will read with profit."—

Critic.

Here we have sure and practical rules laid down for adoption, which if followed accurately, will tend to the comfort, if not to the longitude of the considered of the As a naumal for general use, it is so prepared, as to avoid every thing that is offensive, whilst treating upon topics requisite to be considered."—Bell's Weekly Messenger.

"The design of this eveny is extremely laudable, it being intended to promote a most useful and important study—the study of diet and morals which is at prevent too much neglected. There are, scattered through the work, several useful and important observations."—Weekly Times.

"A little work which appears to us to possess much merit, and to be suited to the capacities of all who can read. On such a subject it is often discult to avoid the use of Language which is offensive to delicate cars; but in the volume before us, the author has treated in the most familiar way, and yet without ever being bed into the commission of an unguarded expression."—Mining Journal.

"A book written in the spirit of the niesteenth century by a man of the world, with a keen eye to all the "conforts and conveniences of this life," and on his guard against its material and disconforting issue. We have rules for eximg, drinking, and sleeping; but it strikes us that a man must have un teast £500 a -year, before he cam practice them, for which class, we believe, the author intended his labors."—Tablet.

"The book abounds with admirable maxims for the preservation of health, as dependent upon the choice of food, abutiones from access of all kindy, the control of the passions, air, exercise, and other matters which form the quals staple of aniatry administric."—Engrant.

Sold at G. T. Haszard's Book Store, Charlottetown, Prince Edward labard; for the passions, air, exercise, and other matters which form the quals staple of aniatry administric."—Engrant.

FOR SALE.

HE. Subscriber is now building at 7 Mile Bay, near Bedeque, a Vessel of about 240 Tons, O. M., of good model, and which may be ready for launching, in the ensuing Spring, if any person will purchase the Hull and Spara, and supply her building. An early application is desired, in order to the completion of the suld Vessel, either to J. Weatherbie, Esq., Charlottetown, or to the Subscriber, on the apot, where all particulars may be had.

7 Mile Bay, November 25, 1861. JAMES HANNAH.

BY CHARLES P SHIRAS. No more we sing as they sang of old,
To the tones of the late and lyre,
For lot we live in an Iron Age—
In the age of Steam and First
The world's too busy for dreaming.
And hath grown too wine for wor,
So, to-day, the glory of Science,
Let us sing of the Railway Cart

The golden chariots of nacient Kings
Would dazzle the wondering eye,
And the heads of a million slaves might
As the glittering toy rolled by;
But this is the Car of the people,
And before it shall how all Kings—
Be they warned when they hear the shall of the Dragon with iron wings!

The blood-staimed Car of Juggernaut,
O'er millions of necks bath rolled,
And its Priest has cried, "such a triump!
The world shall never behold!"
But wo! when this harnessed Dragon
Couses vomiting smoke and fire,
For the Priests with their Car and Idols,
Shall perish beneath his ire!

And we to all who uphold the wrong— Love darkness rather than light— For Science has opened a broad highway For Knowledge, and Truth and Right. And he ends forth his car to gather The people of many lands, Until the uttermost nations Are grasping each others' hands.

185

3

And thus, when the people as one, are joined. And each to his fellow is known. and each to his fellow is known, are joint and Art, and Skill shall work At the bidding of Science alone. And who can tell of the greatness. The world may hope for then? For the faith that moveth mountains. Hath entered the mountains.

Then sing no more, as they sang of old,
To the tones of the lute and lyre,
But sound the praise of the Iron age—
Of the age of Steam and Free!
And sing to the glory of Science—
Exult in the downfall of War—
And shout for the fiery Dragon,
As he flies with the Railway Car!

A WILD IRISH GIRL TO HER FAITHLESS LOVER.

My dream is o'er. Those pleasing hours are ended, In which you promised to be ever mine,
For I was truly thine;
When every thought was with your spirit blended—
When in each feeling of this sickening heart
You shared the largest part.

Yes, all is over; yet a painful sadness
Tortureth still my-distressed mind,
To think you—once so kind—
Should change so far. It drives me near to madness,
That he, I though through life would ease my wee,
Should strike the hardest blow!

Once I had hoped, if pain or sickness raged,
To tend your couch even with a partner's claim,
And always felt the flame
Of pure affection, when the mind engaged
In such delightful thoughts—delicious bliss;
And yet I think of this.

But resterday the world to me was charmi For all around bespoke a beautous spring, The birds did sweetly sing, And I was happy; not a thought alarming Disquieted my bosom—now I feel More than I can conceal.

Farewell! The shades of night are round me stealing, No more I hear the hum of busy bee, Yet still I think of thee. Each balmy zephyr bloome, as if revealing
Your once loved name, that still can cast a spell
Around my heart—farewell!

Furewell! No besom friend I'll have to boost Of, to cheer my lonely journey through the earth — No hasband's hand in death To close my weary eyes—yet, by an host Of weeping friends surrounded—none to tell How much I loved—farewell!

Varieties.

The Last Word:—The last word is the most dangerous of infernal machines. Husband and wife should no more fight to get it than they would struggle for the possession of a lighted bomb shell. Married people should study each other's weak points, as skaters look out for the weak parts of the of the ice, in order to keep off them. Ladies who marry for love should remember, that the union of angels with women has been forbidden since the flood. The wife is the sun of the social system. Unless she attracts, there is nothing to keep heavy bodies like husbands from Jing into space. The wife, who should properly discharge her daties, must never have a soul above trifles. Don't trust too much to good temper, when you get into an argument. Sugar is the substance most universally diffused through all natural products. Let all married people take a hist from this prevision of nature.

Going from market, the other day, we observed a very small boy, who gave no special indication, by dress or fises, of other than ordinary sensations or training in life, carrying a basket that was ao heavy as nearly to bear him down beneath it. We observed—"My boy, you have a heavy load." "Yes," said he, "but I'd rather carry it, than that mother should." The remark was one of a nature we like to hear; but we do not know that we should have thought enough of it to have chronicled it, had we not seen across the street a highly accomplished young lady playing the piano, while her mother was washing the windows.

WORTH HERRING.—If men gave three times as much attention as they now do to ventilation, ablution, and exercise is the open air, and only one-third as much to eating, furnishing and late bours, the number of dectors, dentiers, apothernies, and the amount of neuralgin, dyspapsy, gout fever, and consumption, would be changed in a corresponding ratio. Mankind would rapidly present the espect, not only of a far healthier and thriftier, but a far more beautiful and more virtuous race.

CHERRY AND LUNGWORT.

coughs, Colds, Hoarsness, Spitt of Blood, Night Sweats, Asthu Liver Complaints, and CONSUMPTION.

DO NOT NEGLECT IT.

Consumption can be and has been cured, in thousands of cases, by this only certain remedy,
JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT, edy has ever before been discovered that

Cure Consumption. The most strongly marked and developed cases of Pulmonary Consumption, where the lungs have become diseased and ulcerated and the case so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be cying, have been cured by this wounderful remedy, and are now as well and hearty as ever. It is a compound of medications which are peculiarly adapted to and essentially necessary for the cure of

COUGHS AND CONSUMPTION.

are peculiarly adapted to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is mild, yet efficacious; it toosens the phlegm which creates so much difficulty, relieves the cough and assists nature to expel from the system all diseased matter by expectoration, producing a delightful change in the breathing and cheat, and this, after the prescriptions of the very best medical men and the inventions of kind and sorrowing friends and Nurses; have failed to give the smallest relief to the Consumptive sufferer.

THOUSANDS OF CONSUMPTIME

persons have been deceived repeatedly in buying medicines which were said to be infullible cures, but which have proved only pallialitives, but this inclicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious Drugs and one trial will prove its astociating efficacy better than any assertions or certificates in curing consumption and all diseases of the Lungs, such as Spilting of blood, Coughs, pain in the side and chest, night-sucats, &c. &c.

About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen and Merchants, have been sent us for this medicine, but the publication of them looks too much like Quackery, [ww will show them to any person, calling at our office.] This medicine will speak for itself and enough in its own favour wherever it is tried.

Caution—This medicine is put up in a large bottle and you must find the name of Judson & Co., Proprietore, New York, on the splendid Wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9 John St. New York.

To Owners of and Dealers in Horses.

CARLTON'S FOUNDER OINTMENT,
For the cure of Founder, Split Hoof, Hoof-bound Horses, an
ontarted and Feverish Feet, Wounds, Bruises in the Fiesh, Galle
sacks, Cracked Heels, Beratches, Cuts, Kicks, &c., on horses.

CARLTON'S RING-BONE CURE.

For the cure of Ring-bone, Blood Spavin, Bone Spavin, Windgall and Splint--a certain remedy. CARLTON'S CONDITION POWDERS FOR HORSES AND

CALTON'S CONDITION POWDERS FOR HORSES AND CATTLE.

The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at these changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow water, Heaves, Worms, Botts, &c. All of which will be prevented by giving one of these powders, and will at any time, cure when any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigerate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon all the secretive glands, and therefore has the same effect upon the Horse, the Ox, the Ass, and all Herbivorous animals—gli diseases arising from or producing a bad state of the blood, are speedily cured by them. CATTLE.

Remember and ask for CARLTON'S CONDITION POWDERS,' and take no others.

CARLTON'S NERVE AND DONE LINIMENT FOR HORSES,

A HORSES,
and for the cure of all diseases of man or beast that require external
application, and for contracted cords and muscless weightens weak
timbs, and is also used for sprains, bruises, sadars galls, swelled legs,
sores of all kinds on horses.

CANLTON'S articles for Horses and Cattle are prepared from the
recipe of a very celebrated English Farrier, and will cure in minetynine cases out of one hundred of any of the above complaints. They
have then used by Farmers, livery-men, stage proprietors and others
with the most marked and decided success.

Caution.—None can be genuine unless you find the name of J.
Carlton Comstock, on the Wrapper of each article.

cannot harm the most delicate infant or strongest Adult, and never fails to completely root out and destroy all kinds of Worms. The cost, 25 cents per bottle, puts it within reach of all, and all parents who are without it, are wantonly exposing the lives of their children to those fell destroyers of youth. Worms. Look for the name of Comstock & Brother, proprietors, on the Wrapper of each bottle.

To the Old and Young!! Ho ! ye Red Heads and Grey!!! PHENOMENON IN CHEMISTRY ! !!!

EAST INDIA HAIR DYE. COLORS THE HAIR, AND WILL NOT THE SKIN.

COLORS THE HAIR, AND WILL NOT THE SKIN.

This dye may be applied to the hair over night, the first night turning the lightest RED or GREY HAIRIO a dark brown, and by repeating a second night, to a bright jet black. Any person may, therefore, with the least possible trouble keep his hair sny dark shade or perfect black; with a positive assurance that the dye, if applied to the skin will not colour it. By an occasional application, a person turning grey will never be known to have a grey hair. Directions complete with the article. There is no colouring in this statement, as one can easily test.

These facts are warranted by the gentleman who manufactures it, who is the celebrated Chemist, Dr. Constrocks, author of Constock's Chemistry, Philosophy, and other works, and School Books, well-known and widely celebrated by the public.

Deafness.

Use Dr. LARZETTE'S ACOUSTIC OIL, for the cure' of Desines Also, all those disagreable noises, like the buzzing of insects, fallin of water, whiazing of steam, which are symptoms of approachin desiness. Many persons who have been deal for ten, fifteen or twee ty years, and were subject to use car rumpets, have after using or two bottles, thrown aside these trumpets, being made perfect well. It has cured cases of ten, fifteen, and even thirty years standing of deafness.

HAY'S LINIMENT FOR THE PILES. The worst attacks of the Piles are effectually and permin a short time by the use of the genuine Hay's Linimen of our first citizens throughout the country have used

HOLLOWAY'S PILLS

CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.

Extract of a Letter from Mr. Matthew Harvey, of Chapel Hall; Airdrie, Scalland, dated the 15th Jenuary, 1850.

To Professor Hollowar:
Sir,—Your valuable Fills have been the means, with God's blessing of restoring me to, a state of perfect health, and at a time when I thought I was on the brink of the grave. I had consulted averal entirest Dectors, who, after doing what they could for me, stated that they considered my case as hopeless. I ought to say that I had been suffering from a Liver and Stomach complaint of long standing, which during the last two years got so much worse, that every one considered my condition as hapeless. I as a hat resource got a Box of your Fills, which soon gave relief, and by percessing in their use for some weeks, together with rubbing slight and morning your Ointenent over my cheat and atomach and right side, I have by their measur alone got completely cured, and to the astonishment of myself and every body who knows me.

(Signed)

CURE OF A CASE OF WEAKNESS AND DEBILITY OF

ach and right side, L have by merr means amone got completely cured of the astonishment of myself and every body who knows me.

(Signed) MATTHEW HARVEY.

CURE OF A CASE OF WEAKNESS AND DEBILITY OF FUUR YEARS' STANDING.

Extract of a Letter from Mr. William Smith, of No. 5, Little
Thomas Street, Gibson Street, Lambeth, dated December 12,

Extract of a Letter from Mr. William Smith, of No. 5, Little
Thomas Street, Gibson Street, Lambeth, dated December 12,
1849.
To Professor Holloway.

Sin,—I beg to inform you that for nearly 5 years I hardly knew what
it was to have a day's health, suffering from extreme weakness and debiity, with constant nervous ineadachee, giddiness and sickness of the
stomach, together with a great depression of spirits. I used to think that
stathing could benefit me, as I had been to many medical men, some of
whom, after doing all that was in their power, informed me that they
considered that I had some spinal complaint beyond the reach of cure,
together with a very disordered state of the atomach and liver, making
my case so complicated that nothing could be done for me. One day
being unnaually ill and in a dejected state, I saw your Fills advertised
and resolved to give them a trial, more perhaps from curiosity than with
a hope of being circle, however I sono found myself better by taking them
—and so I went on persevering in their use for aix months, when, I am
happy to say they effected a perfect cure.

(Signed) WILLIAM SMITH.

(Frequently called EDWARD)

CURE OF ASTHMA OF TWENTY YEARS' STANDING.

Extract of a Letter from Mr. J. K. Heydon, 78 King Street,
Sydney, dated 10th November, 1849.

To Professor Hollowar.

Sig.—I have the pleasure to inform you that many extraordinary cures
of Asthma have been effected here by means of your Fills. One is that
of a lady residing near the "Razorback," who after having far Twenty
years been unable to make the slightest exertion, suffering way fearfully
from shortness of breath. coughing and spitting, but is now, (to use her
own expression) able to run up to the top of that mountain. Another
case is that of Br. Caton, Tailor, Hutchinson's buildings, Clarence-street,
who was so dreadfully but that he was confined entirely to his bed -room
or six months, prior to his commencing with your Fills, and attended regularly by his medical man, who pronounced him to be in a dying state,
