SCHR. WRECKED AT SHELburne

The Ethel Cora, with Cargo of Herring for Gloucester a Total Loss

The Freeport, Digby County schr Ethel Cora, Captain Charles Morrell, bound from Port La Tour for Gloucester, Mass., with a full cargo of pickled fish, went ashore Thursday night near Stony Island, Shelburne County and will, according to the latest reports prove a total loss. The schooner is owned by her master, and was built at Deer Island, N. B., last year. She was a well designed vessel for the general freighting business. As a coaster the Ethel Cora was well equipped with every convenience including auxiliary power.
When the news of the mishap reached Clark's Harbor the auxiliary schooner Enid Hazel, which was in port at that place was dispatched to her assistance, as was also the tug Mary H. Cann, from Yarmouth.
A later telephone message from the Captain stated he had little hope of saving the craft, and her loss will prove a serious one as he had no insurance on the hull. The Ethel Cora, registered about sixty tons.

Surely there can be no more need of reminding our readers that cash must accompany all small ads, such as cards of Thanks, For Sale, etc. It is surprising how many in this world are almost continually trying to get something for nothing.

FORGOT TO PAY HIS BILLS
(Digby Courier)

During the recent convention of Taxicab boys in Bridgetown one boy from Yarmouth county took an active part in the discussion and became quite friendly with several of the delegates. On his way home he stopped off in Digby and spent a week, leaving suddenly without paying his board bill. It has since transpired that he went to Yarmouth and made several purchases in the local stores tendering cheques in payment and receiving the change in cash. The cheques proved to be bogus and as it was ascertained he had taken the boat for Boston he was stopped at that end and returned to Yarmouth on Tuesday under arrest.

Pat gazed long and earnestly at the photograph of a very small baby sitting in a wash basin.

"Shure, now," Pat shyly asked "phwat would it cost me wid me clothes on?"

Nova Scotia Man Says Taking Tanlac was the Wisest Thing He Ever Did

"Since I began taking Tanlac I have found relief from troubles that made life a burden to me for three years," said John R. Gray, of Richmond, N. S.

"I suffered from indigestion so bad that even the lightest foods soured on my stomach. Gas bloated me up and I had pains in the pit of my stomach that nearly drew me double. Sometimes after these attacks I was so weak it was all I could do to stand up and I had headaches that nearly drove me distracted. I was so nervous and restless I hardly ever got to sleep for hours after I went to bed, and I would wake up in the morning feeling as tired as if I had just finished a hard day's work. I lost weight rapidly and was so weak and short of energy it was an effort for me to get any work done.

"After taking a few bottles of Tanlac I am today as well as I ever was in my life. I can now eat three square meals a day and never have a particle of trouble afterward. My nerves are steady and I sleep soundly every night and get up in the morning feeling good. I have gained ten pounds in weight and am in the pink of condition and feel like I can do as big a day's work as anybody."

Tanlac is sold in Bridgetown by S. N. Wear in Middleton by Clifford A. Mumford and in Bear River by L. V. Harris.

A Great Canadian Mining Region

(1) Trail Smelter, B.C. (2) One of the Mine Buildings at Fernie, B.C.

The Province of British Columbia is fifty per cent larger than the state of Texas, and Kootenay is a 30,000 square mile block. It is covered with mountains throughout, there are dozens of peaks exceeding 10,000 feet in height. And these mountains are alive with wealth; nearly all the lead and zinc and much of the silver and gold of Canada come from Kootenay, and it is the leading bituminous coal producer of Western Canada. But the surface has only been scratched; it will sometime produce a hundred-fold what it at present produces.

Kootenay has the minerals, the timber, and the pulp, and it has the waterpower to turn the wheels of a thousand mills. On the Pend d'Oreille 200,000 horse power can be developed, and on the lower Kootenay 100,000 horse power, with half a million more scattered throughout the district. Many mountain streams are power generators.

The district is well supplied with railroads. The main line of the Canadian Pacific crosses the north part of the Kootenay and the Crow's Nest line of the same railway crosses the southern part. The Lake Windermere Branch, running north and south through the beautiful Windermere region, connects two lines in the great Northern Branch route connecting Revelstoke on the main line with Nelson on the Crow's Nest. Car ferries operate on the lakes. Branches of the great Northern Branch, crossing the American border, connect with the Crow's Nest line at Grand Forks, Trail, Nelson and Fernie; a branch of the Crow's Nest runs from Yakk to the border to Spokane.

The leading industries of Kootenay are lumbering, mining, and fruit raising. At present other lines of industry are in their infancy.

Eighty per cent of the total area is covered with forest. The question of wood-pulp is intimately associated with the lumber industry. The demand for pulp and the scarcity of paper are felt in Canada and elsewhere. Canada has 33 pulp mills, but there is not a mill within the west coast of British Columbia and Rainy River, a distance of over 1,800 miles.

For the purpose of mining, Kootenay is divided into two distinct parts; the coal mining field and the metal mining field. The coal measures are limited to the extreme eastern part of the district, and there are no metals there. The rest of the district is rich in metals, but has no coal.

There are three known bituminous coal areas in Canada, two of them on islands at the extremities of the country, Cape Breton Island at the eastern end of the country and Vancouver Island at the western end and between these two islands no bituminous coal is produced save on the slopes of the main chain of the Rockies, the great bulk coming from the Crow's Nest field.

The mines of the Crow's Nest were opened in 1858, since which time they have produced millions of tons of coal. The annual production is now in excess of 3,000,000 tons. The following figures, giving the exports to the United States alone, will give some idea of the present production and potential resources of this coal field. In 1915 the coal exports to the United States amounted to 535,187 tons, valued at \$1,277,417; in 1917, 541,518 tons, worth \$1,206,440; in 1918, 507,222 tons, valued at \$1,920,963; and in 1919, 534,675, worth \$2,116,552.

This great coal field has been tapped only at a few points where railway facilities are available.

TOURING NEW ENGLAND

Deep Brook Couple Visit Their Children in United States

Mr. and Mrs. John E. Henshaw, of Deep Brook are enjoying an extended tour through New England, visiting their children, many of whom are located in that section of the States. They are making the tour by auto, having left their home on the morning of August 27th. Upon reaching Digby, their auto was taken across to St. John on the steamer with them. After spending the night at the hotel, they started early the next morning for Fredericton, N. B., a distance of 85 miles, where they stopped for dinner, and then drove 85 miles to Topsheld, remaining there for the night, finding splendid accommodations at a hotel in the town.

Sunday morning they resumed their journey, motoring as far as Lincoln before stopping for dinner. After a short stay here they went to Hollowell, remaining at the Hollowell House over night. Monday morning they left the hotel about 8 o'clock and drove as far as Marples, lunching there, and then finishing their journey at Montpelier, N. H. which was to be their first stopping place, their daughter, Miss Jennie Henshaw, residing there. Upon their arrival they found they had covered a distance of 650 miles with the remarkable record of no tire trouble.

While at Montpelier they made a tour of the White Mountains before leaving for Concord, N. H., to visit their daughter, Mrs. Carrie J. Read where they remained for about one week, from there going to Boston and then to Salem, where two sons, John Bickford and Wallace L., each carry on a large milk business. From Salem they went to Berwick, Me. where Frank P. Henshaw is located on a large farm. Here they will remain for a visit before leaving for Springfield and Turner's Falls, Mass., Hartford, Conn and Windsor, Vt., where other children reside.

On the 8th of October the family gathered at Berwick, Me. to celebrate the 50th anniversary of the marriage of Mr. and Mrs. Henshaw. Several of the children with their families were present and gave the couple a royal greeting, remembering their unforgettably with valuable gifts, among them a purse of gold.

The children include: Capt Herbert A. port superintendent of the Pan-American Petroleum & Transport Company, New York City; Mrs. Carrie J. Read, Concord, N. H.; Warren H., and L. Fred, Windsor, Vt.; Joseph E., Hartford, Conn; J. Bickford and Wallace L., Salem, Mass.; Frank P., Berwick, Me.; Mrs. Blanche Huff, Turner's Falls, Mass.; Mrs. Pearl Ware, Springfield, Mass.; Miss Jennie Henshaw, Montpelier, N. H.; Mrs. Laura Belle Burrell, Deep Brook, N. S., and Mrs. Abbie M. Moran, Lansdowne, N. S. Only two children are deceased, they being the oldest daughter, Mrs. M. Adams, and youngest son, Wendell Henshaw.

Since leaving home, Mr. and Mrs. Henshaw have covered a distance of 1500 miles by auto. They are both enjoying the best of health, and it is hard to realize they have nearly reached the four score mark, both appearing at least 20 years younger and being very active.

May they continue to enjoy good health for many years to come.

Trail the Consolidated Mining Smelting Company possesses the necessary facilities for reducing lead, copper and gold, and its Sulphur mine at Kimberley is the greatest producer in the Dominion. Actually all the lead and zinc produced in Canada come from the company. The district also possesses deposits of fluorite and manganese. Agriculture takes a secondary part in the Kootenay. Only along the shores of the lakes are vegetables, not 2,000 square miles of the 20,000 can ever be brought under the plow. At the present nearly all of the cultivated land is devoted to fruit raising and trucking of fruit—apples, pears, plums, cherries and strawberries—are shipped from the neighborhood of Nelson, Creston and Penticton to the prairie provinces. The Kootenay is a sportsman's paradise. All the streams of that region teem with mountain trout and steelhead. The district is famed for its big game, the mountains are full of deer, mountain goats, elk, moose, and smaller game of many kinds. Bismarck and grizzly bear are plentiful in the upper reaches of the Elk Valley.

"YOU'LL LIKE THE FLAVOR"

Ten Years After

Ten years ago the first packages of KING COLE TEA were packed and put on the market. The time that has elapsed since then has been filled with hard work and with many difficult situations to be met and overcome. But withal, it has been a period of unquestionable, steady and persistent progress. KING COLE TEA has never looked back. Every year has brought its increase. Today its sale is ten times greater than the first year's business. This is the public's remarkable tribute to the worth of KING COLE TEA. It speaks for unusual service.

UGHT TO BE GENUINE

Sam, the choroman, returned from the city with a scarfpin that contained a "diamond" of no usual size. It was the pride of his heart and the envy of his village companions. He treated all inquiries from them as to its value and its authenticity with high scorn.

His employer, after a week of basking in its radiance, asked Sam about its history.

"Sam" he said "is it a real diamond?"

"Wall," said Sam, "if it ain't been skun out of a half dollar."

HE BORROWED HIS NEIGHBOR'S PAPER

A woman who was too economical to subscribe for her home paper asked her little boy to borrow the copy taken by her neighbor. In his haste the boy ran over a four dollar stand of bees and in ten minutes looked like a warty summer squash. His cries reached his father who ran to his aid, falling to notice a barb wire fence, ran into it, breaking it down, cutting a handful of flesh from his anatomy and raising a ten dollar pair of pants. The old cow took advantage of the gap in the fence and got into the corn field and killed herself eating corn.

Hearing the racket the mother ran, upset a gallon churn of rich cream into a basket of kittens, drowning the whole litter. In her hurry she dropped and broke past all hope of mending, a twenty five dollar set of false teeth. The baby left alone, crawled through the spilled cream and into the parlor, ruining a forty dollar carpet. During the excitement the eldest daughter ran away with the hired man, the dog broke up eleven setting hens, and the calf got out and chewed the tails off of four fine shirts.

All to save two dollars. Moral—Subscribe for THE MONITOR and protect yourself from such calamities.

RICH RED BLOOD

NECESSARY TO HEALTH

When the Blood Becomes Weak and Watery a Remedy is Needed to BUILD it Anew

Why are we being continually told that good, health giving blood must be bright red? What has color to do with the quality? Just this—the oxygen in the air is the great supporter of all organic life. One function of the blood is to take the oxygen from the air—which it meets in the lungs and deliver it to the tissues of the body. When the blood, filled with life sustaining oxygen, is sent out by the heart, it is bright red. When it returns, impure and deprived of oxygen it is dark.

You will see, therefore, that there are two prime requisites of health, pure air and bright red blood—the pure air to furnish oxygen, the rich red blood to carry it where it is needed. Dr. Williams' Pink Pills make your blood rich and red because they increase its power to carry oxygen, actually making it so much more able to carry increased life and strength to every organ in the body.

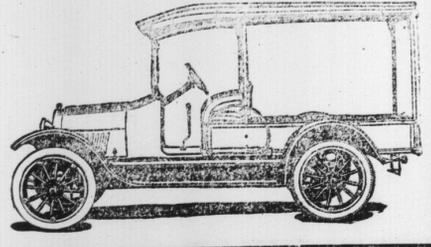

Pale anemic people whose nerves are on edge, whose cheeks are pale, and who tire and easily, should try Dr. Williams' Pink Pills, and note the steady improvement that follows their use. A case in point is that of Mrs. J. P. Rolston, of South River, Ont., who says:—"About two years ago my system was in a badly run down condition; and I kept growing worse all the time until I could hardly do my house work. I had severe headaches, and pains across my back and under my left shoulder. I did not sleep well and would feel just as tired when I got up in the morning as when I went to bed. Life seemed a burden. I had taken doctor's medicine for a long time, but it did not meet my case, at least it did me no good. Then as a result of reading about Dr. Williams' Pink Pills I decided to try them. When I had taken a couple of boxes I felt much better, and when I had taken five boxes more I felt that I was again a well woman. I have not since felt any return of the trouble and I advise all women who are broken in health to give Dr. Williams' Pink Pills a trial."

These pills are sold by medicine dealers or will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

Made in Canada

WE know the sale of the Chevrolet Light Delivery Wagon depends on the satisfaction it gives in actual service. We also know that its valve-in-head motor eliminates fuel waste and delivers fullest power, that its ample bearings cut friction to a minimum, that its perfect balance—strength without weight—insures stability and makes a maximum of power available for actual hauling. These are only a few of the obvious reasons for Chevrolet ability, durability and economy.

Children Cry for Fletcher's CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. Marine News

Schr. Lucille M. has gone into winter quarters at Yarmouth. Dredge W. S. Fielding Capt C. F. Lewis, will lay up at Liverpool for the winter.

Schr. Hattie McKay, Capt Sims, cleared from Parrsboro Thursday with coal for Westport. Schr. Stewart T. Saiter from a New Jersey coal port, sailed from Vineyard, Haven Nov 1st.

The total stock of the Yarmouth schooner Grace & Ruby for the past year, so the Telegram reports was \$76,000.

Yarmouth Light: Schr Dorothy M. Smart, Capt A. Snow, landed 12,000 pounds cod and haddock on Wednesday; the fare was purchased by A. E. Nickerson.

Schr Loran B. Snow was aground in Yarmouth harbor for a while last Wednesday. On that day she landed a fare which stocked \$2,748.60. Considerable gear was lost during the trip which made the share small—\$18 per man.

The tern schr Mapleland, Capt Randall, which was at the railway wharf Bridgewater, the past two weeks loading lumber, has cleared for Cuba. The cargo was shipped by the Davison Lumber & Manufacturing Co. Y.M.

The steamer Prince George arrived at Yarmouth from Boston Friday morning with 193 passengers and sailed to return with 225, which are both record lists for November sailing. Among her outward cargo, were over 600 barrels of fresh mackerel shipped from the traps at Hubbards and other points along the south shore.

Steamer Bernard M., on which carpenters have been engaged rebuilding and enlarging the hatches in the forward deck, cleared Thursday from Yarmouth for Parrsboro to bring soft coal to Yarmouth. Captain Everett R. Nickerson, of Port Clyde, is in command of the Bernard M., and sailed Friday noon for the above port.

A handsome three masted schooner was launched a few days ago from the yard of E. R. Gaudet, Yarmouth. She is a vessel of about 200 tons, gross substantially constructed and finished throughout and will make a most desirable piece of marine property. The vessel is now at a wharf at Yarmouth, where her rigging is being completed, cabins and other work finished.

The steamer which ran into the explosives ship Mont Blanc at Halifax and destroyed part of the city is now known as the Governoren. The original name of the Governoren was Runic and for twenty four years she sailed in the White Star line fleet under the British flag. Then she was sold and renamed Tampian and later the Imo. She is now in Barry.

The British schooner Yelverton, lumber laden, and bound from Bear River (N. S.) for Boston, put into Portland, (Me.) about ten days ago for shelter, and after remaining for several days started out on Saturday morning with a favorable breeze, but when off Cape Porpoise ran into a strong northeasterly gale during which the flying jib was blown away, and her decks flooded with water, some little damage being done. The captain kept on his course and succeeded in getting into Boston on Sunday.

Yarmouth Telegram: The D. G. steamer Aberdeen Capt Loran Kenney left St. John Thursday and arrived in Yarmouth at noon Friday. Thursday the steamer put down the Pettie Passage bell buoy and then went to Little River, Digby Co., and took off the shore at that place the Meteghan bell buoy which went astray some Little River. The Aberdeen went to Westport and took on board the automatic gas and whistling buoy, but out to mark the Larcher and which went adrift and was towed into that place.

Once the passenger "flyer" between Digby and St. John, later, at the outbreak of the war, a scout cruiser in the North Atlantic, off the Canadian and American coasts, then a troop transport across the English Channel, and now a coast training ship in the British navy—that is the record of the steamship St. George since the C. P. R. bought the vessel and brought her out from England three years previous to the war and placed her on the Bay of Fundy route; she succeeded the side wheeler Prince Rupert, another Clyde built "flyer," in those days, and which was sold to Cuban purchasers. The St. George is now out on another cruise from Plymouth, Las Palmas being her destination. She has a full complement of cadets from the Nautical College at Pangbourne. Captain Cardiff was master of the St. George when she was on this side of the Atlantic, but now Capt J. Hamilton Blair, D. S. C., is in command of the ship.

Our price and policy is closing up mills because they can't compete. Catalog houses sell at \$10, \$15 and \$20 more, others ask \$65 for what we sell at \$27.85, delivered to your door.

A giant purchase permits these dwarf prices. The British Government sold the cloth below cost. We bought enough for 5,000 overcoats in one lot.

Military quality cloth, civilian dyes, tailored in Canadian styles.

Don't consider a coat at any price in any place until you have had one of these on your shoulders—seen the style, considered the quality, appreciated the saving.
