If you feel tired and stupid, with no ambition to get out and hustle; if you have spells of despondency and a desire to give up the fight, you need new energy. The race is to the strong. Show me a failure and I'll show you a weakling, lacking in courage, strength and ambition, three essentials to the make-up of a successful man.

I can take a man like that and pump new energy into his body while he sleeps, and in a few weeks' time transform him into a giant in strength and courage. It is proven that energy and electricity are one and the same thing. If you lack this energy you can get it only by filling your nerves with electricity. Dr. McLaughlin's Electric Belt does this. I first tried various household remedies, but as these waved allowather weekers. first tried various household remedies, but as these proved altogether useless, I took medical advice. Not one, but several doctors in turn were consulted, but I was unable to get any permanent relief. Some time back I determined to give Zam-Buk a trial, and after a thoroughly fair test, I can say I am delighted with it. I have the best reasons for this conclusion; because, while everything I tried failed absolutely to relieve my pain and rid me of my trouble, three boxes of Zam-Buk have worked a complete cure. It was Mr. Hamilton who discovered the big vein on the Hudson Bay mine, over which he now has a lawsuit pending. It was Mr. Hamilton who, the other day, sold properties in Gowganda and Miller Lake people for \$33,000. And as the things were not coming fast enough, Mr. Hamilton happened to be the man who staked a claim on which the townsite of Gowganda was located. The government settled with Mr. Hamilton on the basis of one-third of the cash receipts from the sale of town lots. No miner in the north has more

confidence in the future of Gowganda than Mr. Hamilton, and few men know the resources better. "The element of doubt that exists in the formations at other camps has no place here," he said. "The veins dis-

PROVIDENCE, May 4 .- (Special.) -- To-That the competition is even more popular than a year ago is evidenced by the thousands of coupons received daily. The official paid autendence is variously estimated from 3782 to 8375, the larger figure by a fair lady of Peterboro.

Mullen, Mahling, Phyle, Goode, Kelley and Weddy are the favorites for scoring the first three runs.

According to the latest guesses Tononto's percentage after the double header on Victoria Day will range anywhere between 381 and 619.

As predicted yesterday the Maple Leafs closed the first road tour by a victory and come home for the opening to-morrow with an even break as to wins and losses.

Even if the pitchers fail to hold the enemy down to a run or two, the Kellevites yesterday showed champion swatting form, and the last victory was due to the big stick.

It was a great day for the visiting teams and should Buffalo win again to-day they'll all return home for the opening without the need of an excuse.

Neil Got the Decision.

BALTIMORE, Md., May 4.—In the eleventh round of what was billed as a fifteen round fight before the Eureka Athletic Club to-night, Frankle Neil of California, was given the decision, Young Britt, being disqualified for wrestling by Referee Ulman. Britt threw Neil and was warned by the referee, but almost immediately attempted to repeat the offence. Altho Neil was in manifestly, poor condition and let many opportunities slip, he did most of the fighting, and had the better of the argument, tho Britt drew first blood in the opening round.

for Wednesday are : FIRST RACE—Selling, 2-year-olds,

The past couple of days has made a wonderful difference in the track at the Woodbine. The wet spots have nearly all dried out, and the footing on the rail is fast, which was shown by the work of yesterday morning. The infield is fast getting into shape, but it will be at least a week before it will be dry. There were no new arrivals, but word was received from James J. Walsh that his stable would be here Thursday or Friday next. A new record for the mile, as well as the three-quarters for this spring was hung up yesterday, Restoration going the fastest six furlong, while Uncle Toby did the best mile so far this season. The work done by the platers was on the slow side as the majority of them were worked on Monday, and they are not asked to step it out more than every other day at the most. The Hendries horse will not be brought from Windsor to the Woodbine for another week, according to a letter from Trainer Nixon, while the Seagram string may come in any day now that the fine weather has set in. The horses in both of these strings are said to be going along nicely, the Seagram horses at the farm at Waterloo and the Hendrie lot at Windsor. Shimonese is said to be in rare good shape for her work when she arrives at the Woodbine.

The horse Restoration has been well-

The horse Restoration has been well-entered in all of the stakes this spring, and is showing that his owner has made no mistake in putting him in the events for Canadian bred and owned horses. Restoration was never in better shape. In former years he could not be gotten to work, while this spring he is free in his work, and yesterday stepped the fastest six furlongs of the spring. He broke from the three-quarter pole and went the six furlongs in 1.16 3-5 and could have done it better had he been asked.

his work, and yesterday stepped the fastest six furlongs of the spring. He broke from the three-quarter pole and went the six furlongs in 1.16 3-5 and could have done it better had he been asked.

The next best trial for six furlongs was made by Reidmore, who stepped the journey alone in 1.18. This horse was full of running at the end and shows himself to have improved greatly after the long rest up during the winter months. Reidmore is a much better horse from the Shields string were not asked to step. The Davies plater shore Lark seems to be track sour and runs out when he is galloped. Shields works him on a leader along side a pony, but this has not had the desired effect of breaking him of his bad habit of running out. The two-late galloped a half at a two minute clip.

The Hon. Adam Beck was at the track to see his platers, Generou Moore and Moore Shot at work. The pair were sent is six furlongs, which they did in 1,21 2-5 well in hand at the end. The horse for his work this morning.

PROVINCIAL RIGHTS AND NATURAL RESOURCES. Mr. Conmee let the cat out of the bag when he interjected during the de-

bate on his Ontario Michigan power bill, that he had no regard for the Ontario Government's power policy. His knowledge that Ontario had declared itself in favor of a policy which protected its water powers from spoliation and secured them for the promotion of provincial industries that unless something effectual is done was the true reason why he prefered to proceed at Ottawa rather than at Toronto. Possibly he thought there and will result in similar abuses to those would be no great difficulty in obtaining everything that he wanted and presuming on the past record of par- control. Nothing could better serve the Dominion as a whole and the provinces individually than the formulation of a national policy, recognizing the advantage and necessity of respecting provincial rights. With reactionaries in the cabinet like Mr.A.B. Aylesworth, who would willingly hand over the public services and resources of the country for private profit without restrictions of any kind touching over-capitalization; or anything else, the outlook for such a national policy is none too promising, but it is at least hopeful that Sir Wilfrid Laurier has exhibited some responsiveness to the quickening of public opinion with regard to the protection of provincial rights and the conservation of natural resources for national

PRESIDENT TAFT AND U. S. WATER POWER.

Our neighbors to the south have been concerning themselves for some time about the conservation of such of their natural resources as still remain to them. If not exactly preparing to lock the stable door after the steed is stolen. they are at least finding the stalls mend them to everyone. Once tried, you largely vacant and that makes them will never be without them in the largely vacant and that makes them the more insistent to prevent further losses. What the United States would have been to-day had a wiser policy prevailed regarding its originally vast wealth of timber and mineral and its

public services, it is scarcely possible to affirm. But certain it is that its public life would have been purer, its industrial productiveness vastly enhanced and the standard of comfort materially higher.

Now that water power has become so important a factor in the generation of electricity, the conservation of its resources in that respect is to-day a very live question. Alarm is freely expressed and done speedily, these too will have passed into the hands of speculators that have attended the passing of the coal fields and the forests under private the matter of the water power and as national domain. Wesley Robcovered the book debt. The company inson is the husband of the legatee, borrowed by it. If then, this mortgage was ultra vires, the moneys in question having been realized from debts beneficially owing to the mortgagees, would belong to them, and the liquidator would have no right to withhold them. The liquidator's position here is that of a plaintiff asking for the rescission of a contract. It would be manifestly unjust to permit the estate of the flax company to retain the money which it borrowed on

the security of the mortgage and at the same time to recover from the mortgagees the proceeds of any of their securities for the loan. If the contract is to be undone at the instance of the borrower, it should be undone wholly, each party being restored to its former position. I am of opinion that the rights of the liquidator in this matter are limited to those of a mortgagor in a redemption suit and that this appeal should be dismissed with costs.

When hand tailoring is essential to good fit or long wear you find it in garment:

The collar, for instance—Draughted and cut by hand, it is further basted on, lightly padded, and "rounded to" bit by bit-all by hand-until it fits the neck snugly and accurately. And, that the shapeliness shall be enduring, the collar is then hand-stitched.

Throughout the whole suit this carefulness is displayed; this effort to produce the unbeatable garment. And do it at moderate prices.

Police Chief Ads to List of Aldermen Who Made Requests.

MONTREAL, May 4.—(Special.)—At the civic enquiry to-day, an ex-barkeeper, Simoneau, stated that when in the employ of a saloon on St. Lawrence-Main-street, he was in the habit of paying Constables Benoit and Cantin \$10 a week for not reporting Sunday selling. Later he had laid an affidavit before Chief Campeau.

Chief Campeau said the constables had denied it. Simoneau was a saloon-men's spy and he had no faith in him. He had, however, transferred the two men to another section of the city. Questioned as to the suspension charges laid against liquor dealers, he admitted that if he had not been ap-proached by various parties he would not have suspended any of these

Use Electricity

To Restore Your Strength

It has been established beyond any possibility

It has been established beyond any possibility of refutation by the world's most foremost physicians, scientists and philosophers, that all living beings are endowed with an inherent constitutional electricity distributed throughout their entire nervous and muscular systems.

It has been demonstrated beyond the shadow of a doubt that in the nerves and in the muscles, and in the blood, currents of electricity are constantly circulating, and by this circulation the functions of life are carried on and maintained, movement and sensation are produced and the vital heat generated and diffused throughout the body

Therefore, it must be clear to any man who is able to think, that overwork or anything that abstracts part of this native electricity from the body will affect the health of the individual by depriving the vital organs of their rightful amount of operative power.

Consequently, it is but natural and logical to suppose that all those allments which are due to lost vitality or exhaustion of nerve power, such as Debility, Nervousness, Indigestion, Constipation, Inactive Liver, Rheumatism, Sciatica, Lame or Weak Back, Kidney Complaint, etc., etc., can be cured by the proper application of the galvanic current.

The latest improved DR. SANDEN HERCULEX BODY BATTERY or BELT is constructed to meet all the requirements of proper and successful electrical treatment without the least derangement of the habits or daily occupations of the patient. It is worn about the body either day or night, and the soothing, invigorating current poured into the system during these hours, starts an immediate renewa. If the functions and supplants weakness with strength.

The Appliance is simple and inexpensive and cannot possibly produce injurious results. It is sold and used in every country of the civilized world. It has attachments to convey the current to every part of the body. It is a real strength-giver and not a stimulant.

PAY WHEN CURED

In order to make the use of electricity more general, and to prove its superiority over drug treatments, I now offer the Dr. Sanden Herculex Body Battery on free trial until cured. Guaranteed for at least one year. Discount for cash.

I have testimonials from Lawyers, Doctors, Clergymen, College Professors and people in every walk of life—thousands of them.

I also have two splendid little books on Medical Electricity, called "Health in Nature" and "Strength," which I will be glad to send free, sealed, postage paid, to all who are interested. They give prices and full particulars.

WE BELIEVE IN THE FUTURE OF

This is said to be absolutely the best Town-

site proposition in Western Canada.

Here is "Stirling." A new townsite situated in the heart of Sunny Southern Alberta. It has a great future before it because it is located at the junction of three great railroads which run through a positive sea of golden grain. The Elevator at 'Stirling" was working overtime last fall, and another under way to support it when the time comes this year.

Remember there is an old town of Stirling a few miles east of the new location and there are seven hundred inhabitants there alone. The Railways, however, erected their new station on the new townsite.

The Syndicate are using the returns from the sale of lands to develop "Stirling"—to make good roads and clear up the land ready for building.

We firmly believe in the future of "Stirling." If you will call at our office we will show you the solid foundation we have for this faith in the future.

It is on the direct line from Montana into the great Canadian West, and on the only line running this direction for five hundred miles either way.

You've heard of the rush of over one hundred thousand settlers into Canada from the Western States. Most of them must go through "Stirling." Many are locating in the "Stirling" district. There are 1,418 lots in Stirling, at prices graded according to their proximity to the commercial centre

of the place. "The Trusts & Guarantee Company, Limited," of Toronto, will execute all agreements with the purchasers on behalf of The Stirling Townsite Syndicate, and issue deeds when lots are fully paid for. All checks and money orders should be made payable to them.

Lots Range in Price from \$50 to \$225 according to their central location--and are selling rapidly.

WALL STREET TOO ATTRACTIVE.

World Office, Tuesday Evening, May, 4.

An unexplained apathy still pervades the trading element as sociated with the Toronto Stock Market, and transactions are still of the most meagre kind of character. The only reason that can be assigned for this coolness on the part of local operators is the still greater attractiveness of the New York market. Securities in which there was any business done to-day showed a slight betterment, but there was an entire absence of what may be termed market buoyancy. It is still believed that attention will later revert to domestic securities, and that when this takes place some good advances will occur in several of the stocks which are still regarded as low in comparison with the dividend HERBERT H. BALL. returns which they now make.

which was dealt in freely and closed at practically the top price of the day, an advance from yesterday's quotations.

The South American stocks were firm and somewhat inactive. There was not the slightest indication of weakness in any security, and brokers are a unit in declaring that there is more difficulty in buying at the present time than in selling. more difficulty in buying at the present time, than in selling.

In the investment end of the exchange, interest is concerned in bonds, which are selling at comparatively low prices, but other securities which also come within this category were somewhat limited in offerings, and were not pressed for marketing.

Illinois Traction.

It was stated yesterday that the \$750,000 of Illinois Traction preferred stock, which was underwritten by Montreal and Toronto financiers, has been distributed, the whole operation being effected in about a week. The increase in capital of the Illinois Traction Co.is for the purpose of constducting a bridge across the Mississippi for connect with St. Louis. It is thought that this connection with a city of a million population will provide big returns for the cost of this outlay, and will substantially add to the earnings of the Traction Compay.

NEW MINING COMPANY

Interested in Cobalt, Gowganda and South Lerrain.

COBALT, May 3.- (From the Man or the Spot.)—The Great Northern Silver Mining Company, capitalized at \$1, 500,000, with 300,000 shares in the treas ury, is a new company that has many ell-wishers. Its acreage extends in different sections. It owns the holdings of the Cleveland-Cobalt, the Clear Lake and the Cobalt Light, Water and Pow-er Company, and has 200 acres in the unsurveyed territory south of Lorraine and a thirty acre Gowganda property. General Manager Cody has just re-turned from South Lorraine, where on the company's lot R.L. 477 a good vein is being worked. A strong cobalt-nico of 50 feet some good samples are being taken out. The lot is near the Keeley and Wettlauffer in good formation. The vein is said by Mr. Cody to improve with every foot and when a depth of 100 feet is reached, drifting will be started. There are seven par-allel veins on the lot, which will be tested by diamond drill. One of these veins has a surface width of twelve inches, but very little value. It will be tested by drill at depth.

All the Coleman properties, including the lot 104 just north of the La Rose Extension, forty acres, will be drilled this summer and a determined effort made to find something.

The Gowganda lot is one claim south-west of the Boyd-Gordon. The company has money in the treasury and will try to make good for Cleveland-Coshareholders. With its various holdings, a good treasury and the careful business management that characterises its conduct of the Cobalt Light Company, is seems to have a fair chance of accomplishing what it has started out to do. Very little work has been done on the Gowganda lot. It will be thoroly prospected this summer. The Cleveland-Cobalt was capitalized at one million dollars. The capitalization of the new company is only half a million dollars in excess of this and

Influential Banking House Wants Controlling Interest in This Property.

A striking instance of the interest taken in Ontario silver fields by otner countries, who have watched the growing importance of Cobalt from he in fancy, has come to light. An influential firm of Paris bankers have turned their attention to Gow-ganda and are determined to be in on

and New York, but is now a confirmed the ground floor this time. The reason for this is that they were too late to take active interest in cobalt at the start, and have been sol impressed by its rapidity of growth, earning power, and possibilities that they are going to be on the spot for Gowanda.

These bankers have made a bid for the controlling interest in the cold line. "The place is growing very rapidly," he said. "Many buildings are in course of erection. The market for mining stocks continues under the influence of profit taking. A heavy American shareholder, badly in need of money, is causing the slump in Peterson Lake. This opportunity for purchasing the stock should be taken advantage of. Despite these reactions we regard the market as shaping for higher prices. EVERY DOLLAR COUNTS

The public has learned to discriminate between promotions which aim to realize profits out of organization and those which have in view the profits which come from legitimate mining.

Canadians and citizens of United States have shown remarkable enterprise in the development of the natural resources and mineral resources of their respective countries, and have spent billions of dollars to this end. A large percentage of these investments, unfortunately, has gone to promoters whose field of enterprise is legitimate enough, but who nevertheless fill a similar place to the middleman between producer and consumer, and absorb much of the power of the capital invested.

The Fairplay Mining Company realizes that much capital that would otherwise have gone into the Canadian Silver Fields has been withheld because the capitalist and investor wants some assurance that every dollar he puts into any enterprise will count. Hence this Company has undertaken to dispose of its own stock, and to burden the Company with only such obligations as will give the investor a chance of return commensurate with what may be regarded as a fair return on a mining speculation. The desired result has been attained by two methods:

Low Capitalization --- No Brokerage for Sale of Stock.

The Fairplay Mining Company has secured full ownership and control, subject as are all mining lands to the mining laws and regulations of the country.

160 Acres -- 80 Acres in James Township

No. Acres at Gowganda

Half of these mining lands are located in the heart of the world-famous district of Gowganda and half in the centre of James Township, the banner district of the Montreal River country.

For the purposes of the Company the capitalization has been placed at 500,000 shares, par value \$1 per share, and these are being sold direct from the Company's office at 25 cents per share.

It can be readily calculated that the basis of investment is less than \$800 per acre, tho the lands are extensively mineralized and in a location that strengthens the faith of the Company's directors that they will prove among the first of rich silver mines now being developed in silverland.

Ore is being bagged on the property immediately adjoining the claims in James Township.

The properties at Gowganda are on the same diabase ridge which contains the celebrated discoveries of the camp. Their lo cation near the terminal of the proposed railroad, the new wagon road and the east branch of the Montreal River gives them a great economic advantage in the way of future development and mining.

The Story of the Silver Fields: The Company has issued a booklet that is conceded to be one of the best pieces of descriptive mining literature ever issued free of charge. This booklet tells the fascinating history of the great silver camps of Gowganda and the Montreal River. It will be sent on request free to any reader of The World, along with prospectus and maps, showing location of the Company's properties, official reports and so forth.

chicago, May 4.—July wheat on the board of trade to-day, made a sensationally bullish showing, advancing from \$1.12, the low point of the day, to \$1.16, at which the market closed. This marked a net advance of 3%c to 3%c. May closed at \$1.28. The market has been advancing steadily for the last week, following the spectacular decline which set afloat reports that James A. Patten had dropped out of the market. To-day's high prices were but 1%c under the best prices of the bull campaign for May, and only 2%c below the July record.

To-day's advance on top of the gradual gains of last week are said to indicate that the bull campaign which was alleged in many quarters to be dead, was only sleeping.

The closing figures to-day were 10 cents higher than the bottom reached on April 27 last. Mr. Patten is still absent on his partner's New Mexico ranch.
