

[From the Scientific American.]
EDUCATED FARMERS.

If we were asked to point out any special fact as denoting beyond all others our rapid progression in knowledge and in civilization, we should select the strong tendency everywhere manifest to abolish empiricism in all pursuits of life. It is not very long ago that the physician administered his remedies blindly, and knew less of the functions of the heart than does his modern descendant of the spleen and gall bladder. Meteorology, most fickle of all sciences, based as it is on the most changeable of all things, the weather, has within a very few years made marvellous strides; and we are certainly advancing to a point where it will be as easy to foretell the rain and storm of tomorrow as to remember the fine weather of yesterday. Even cookery is no longer to be the science in which unscrupulously compounded ingredients, under constant varying conditions, are supposed by some pleasant fiction to yield invariable results, for has not a college been endowed, to educate our future chefs *de cuisine*? Thumb rules in every trade are now scouted by intelligent workmen. The world has shaped itself into a gigantic point of interrogation: "why" is the question of the hour, and faith in things earthly is confined only to those who, like the deluded partisans of Keely and others of his ilk, mistake ignorance of that which is possible for belief in that which is not.

Of all the sciences, none within recent years has so quickly emancipated itself from the fogs of empirical conjecture as that of agriculture. Up to the end of the last century even, people believed that air, water, oil, and salts were the sources of plant nutrition. Wallace, Bergson, Palfrey, Davy, De Saussure, and Sprengel's discovery after discovery, investigation after investigation, but their work was scattered and little known outside their laboratories. It was reserved for the genius of Liebig to unite all these fragments of truth; but it was not until 1840 that he produced his great work "Chemistry in its Application to Agriculture and Physiology," and thus gathered in concrete form the materials which are the basis of a new great and rapidly growing science. It is hard to realize that agricultural chemistry has found its application for but 25 years, so clearly are its benefits before us in tangible form. But on the other hand, this only serves to indicate to us how vast must be the results yet to come, when agriculture through the instrumentality of its knowledge, shall have become in its turn as exact as its sister sciences, and as susceptible of being taught and learnt in the same manner as they. And to attain this much desired end, our schools and colleges, under the guidance of far seeing men, are doing splendid work.

The youngest of our universities, Cornell, established an agricultural department three years ago, under the charge of Professor Roberts, the farm consisting of 150 acres, in not over good condition. Upon this tract of land the whole science of raising crops, as well as the business of managing a farm, is taught with a thoroughness which we doubt has ever been exceeded. Eighteen square rods of clover, for instance, are set apart for eighteen different modes of treatment with fertilizers. In the experiments with corn, three rows of each kind, or of each mode of manuring, or of the different modes of management in other respects, extend across the field. There are also experimental strips of oats and wheat; and thus every method of cultivation of all the farm products incident to our climate is practiced directly before the student, who is required personally to perform the labor necessary in connection therewith. The results of the experiments are carefully recorded and stored away until sufficient shall have been gathered, over a number of seasons, to justify the determination of accurate averages.

Besides this, the students are taught a complete system of accounts. Every hour of labor hired, every product of farm sold, is minutely registered. The food which live stock consumes is recorded on one side and balanced yearly by the market value estimated by a skilled butcher. So that, in this way, the gains or losses, not only of the farm as a whole, but of every branch, are known with the utmost accuracy. Every student is required to become proficient in this account keeping. Each keeps his books separately, and determines estimated values; and as he may sell his own labor to the farm, outside the time required of him, which is but two hours and a half for two days of the week, he is directly interested in the task. Besides the farm, there is a garden of six acres conducted under the same admirable system; and in addition, lectures on practical agriculture are given four times weekly by Professor Roberts. The *Country Gentleman*, to which we are indebted for these facts, states that the number of agricultural students is still too small, so that there seems to be abundant opportunity for all who may desire to acquire a thorough and most valuable education. Certain it is that such instruction is most urgently needed in this country. It has become too much the fashion for young men to crowd into the great cities, and there to eke out lives behind desks and counters which should be spent in developing the vast resources of the thousands of square miles where in the richest soil on earth awaits the plowshare. In the Centennial Exposition are exhibited actual glass-enclosed sections of prairie soil with the black unctuous loam extending downwards far below the reach of the deepest

furrow. Go look at the superb exhibit in Agricultural Hall, and think of the possibilities which educated farmers cultivating such land might accomplish. Think of it, stalwart young men, who meditate coming into the city after the present harvest is garnered, to find work where there is none to be had. Expend your labor and means at Cornell, Amherst, Dartmouth, and other like colleges, and obtain such an education as we have described; then "go West," pre-empt your land, and start on the high road to independence and ultimate fortune.

SAINT ANDREWS, SEPT. 27, 1876.
The News in Brief.

The Eastern question is still unsettled. The Porte is throwing difficulties in the way of an armistice; the great Powers however demand the conclusion of the armistice. In the meantime large public meetings are being held in England for the purpose of compelling the Government to insist upon the punishment of bloodthirsty Turks who committed such barbarous and inhuman treatment of the Bulgarians.

The great explosion at Hell Gate, New York took place on Sunday afternoon, and was successful. No damage was done to any building or person. It is supposed that the obstacle to navigation has been removed. The operation was witnessed by 200,000 people, and the results from soundings are to be made this week. The next operation will be the removal of the loose rock by dredging.

Lord Carnarvon has transmitted a despatch to the Governor General, in which he states that the Queen will not be advised to disallow the Supreme Court and Court of Exchequer Act. This leaves the Act in force.

The Drinking Prohibitory Act is being carried in several counties in Ontario. Prohibition appears to be the order of the day.

The Bank of Montreal has given notice that it will issue Letters of Credit to travellers going to any place on the globe.

C. H. Poizer has been gazetted to the Senate. He formerly represented Beauce.

Cattle and Produce are being shipped in large quantities to Great Britain; the trade is on the increase.

INDUSTRIAL CANADA.

is the title of a pamphlet received, written by A. Baumgarten, Ph. D., of Montreal. Its main object is to show how Canadian Resources may be developed. From a cursory glance at its contents it appears to us that it is strongly impregnated with a "protective" policy, and as this is to some extent a debatable subject, we leave the matter in the hands of Parliament. From recent political speeches in Ontario, we are inclined to the belief, that a "protective tariff" will be one of the main questions during the next Parliamentary elections, and it is to be hoped the happy medium will be reached.

The Hon. Mr. MacKenzie and Sir John A. Macdonald have dealt with the question in their late, real political speeches from different stand points. Sir John favors a moderate protection, while Mr. MacKenzie, whose constituents are protectionists to some extent, cannot adopt an ultra protectionist policy, simply because it is not adapted to this new country. England's Free Trade has prospered the parent country, while the high protective tariff of the United States is being denounced by the principal interests of that country; of this there is no question a strong protective tariff begets monopolies, of which there are an abundance at present. Before there is general prosperity, there must be a liberality commensurate with the aspirations of the people—extreme measures are of the past, more liberal and enlightened policy is what is required for the advancement of the Dominion.

The proceedings at By Side for the foundation of a Farmers League, have called forth some comments from one of our exchanges. The Farmer which approves of the movement comes down in heavy terms on the *Telegraph*. Indeed our brethren of the Press, have been rather combative recently, about printing and other matters; unflinching expressions have been used, and uncalculated personalities introduced. The good old rule of "who can best work and best agree" has become obsolete. We would like to see papers get all the advertising they can, and have just as large a circulation as possible, and discuss questions on their merits, without resorting to scurrility and imputing unworthy motives to their contemporaries. Let us have peace.

FOR THE CENTENNIAL.—Mr. and Mrs.

Bradford left on Thursday last, by steamer to visit the centennial; others are to follow early in October.

AS OTHERS SEE US.

Our friend, Mr. Rignobon, (who by the way is a young man of excellent abilities and parts, and calculated to make his mark,) has written a capital letter to the *Bradford Ont. Advocate*, in which he gives a glowing description of St. Andrews, its scenery, climate, and surroundings, from which it appears he was favorably impressed with the people and town. We agree with his views and criticisms, and the justness of his conclusions. There can be no doubt that his letters will be of essential benefit to the place, in making it known to the Ontario people, as a "delightful summer resort," and is worth more than any articles written in local papers, commencing it does from an intelligent and disinterested writer. It is to be presumed that his favorable description of St. Andrews, will be the means of inducing many from Ontario, to spend their summer vacation here, where they have a pure invigorating climate, healthful sea bathing, pleasant drives, a diversity of amusements in fishing, shooting, sailing, and hospitality. On the part of our townsmen we tender their acknowledgments to our young friend, for his kindly reference to the Shiretown of Charlotte County, the birth place of his maternal relatives, many of whom still reside here. Mr. Rignobon, his sister, and Mr. Wood, left here a week ago for their homes, in Ontario and Manitoba.

Ory to Africa.—One of St. Andrews' best young men, and an able mechanic, Mr. Benson Latta, left this morning by train to catch the Mail Steamship at Boston, for England. He has received an appointment with the African Diamond Company of London and will proceed with the Engineers and workmen for the diamond fields, Africa, about 12th October. While regretting the loss of our St. Andrews son, we congratulate him on the lucrative and responsible position to which he has been appointed. Mr. Latta was a universal favorite, and deservedly so; and will undoubtedly be as popular in his new field of labor as he was in his native town. Mr. J. W. James is Engineer to the Diamond Company, and has been for some months in England, obtaining the necessary arrangements for the prosecution of the work. Mr. James is very highly known, and we are glad to hear of his early departure. Mr. Lamb comes with him the best wishes for his success in his new townsmen. Thus it is our young man are leaving the Province at this time.

Telegrams state that Lord Dufferin addressed reception committees of Victoria, who were invited to meet him; he said "he had come to British Columbia, not to make official announcements, but to learn and report," he assured them that Canada considered the Treaty entered into upon Confederation binding, and was anxious to fulfill her engagements under it as soon as possible.

The Rev. Wm. Ross is to be inducted to the charge of the Presbyterian Church in Prince William, York Co. This gentleman preached here for a few Sabbaths last week, and a Divinity Student, with much acceptance. The congregation at Prince William are to be congratulated on obtaining such an excellent clergyman.

At the late meeting of Presbytery at St. John the following notice was given which reference to Mr. John Hoar; from which it appears he applied for admission to the Presbytery, and a trial was rejected; he is considered to be unworthy to perform the duties of a minister in any capacity, not being recognized by any church.

Notice was given that Mr. John Home, formerly on trial as a Preacher by the late Presbytery of St. John, of the Presbyterian Church of the Lower Provinces, and afterwards settled here, has been preaching and expounding the ordinance of Baptism within the bounds of this Presbytery, it was agreed that public notice be given that Mr. Home is not a minister in connection with this Church.

DEATH OF REV. MR. DUNPHY.—The death of the Rev. Edward J. Dunphy, P. P., of Carleton, St. John, took place, on Sunday last at his residence, in the 54th year of his age. The Rev. gentleman was formerly stationed at Milltown, and was beloved by all who knew him. He was a native of Waterford, Ireland, but left there when but three years of age, and came with his parents to New York. He was educated at Montreal and New York.

FARMER'S LEAGUE.

The organization of a Farmers League for Charlotte County, was effected at a meeting held at the school house, Bay Side, Parish of St. Croix, on Saturday evening last, by the election of the following office bearers:

James Russell, Esq., President;
Henry Hutchings, Esq., Vice Pres.,
Charles E. Mewatt, Secy.,
John Curry, Treasurer;
Messrs. Joseph H. Mears, John C. Wren and David Johnston, Committee.

An additional number of persons came forward during the evening and signed the roll of membership.

Public meeting were appointed to be held, on Thursday evening next, the 28th inst., at seven o'clock in the school house, lower district of the Parish; and on Wednesday evening, October 11th, at the school house, Waverly, upper district of the Parish, in order to lay before the resident of these districts the aims and objects of the League.

The regular meetings of the League are to be held fortnightly; the next regular meeting will therefore be held on Saturday evening October 7th, when the following topic will be discussed, viz:—

"How Farmers shall produce more, and buy less."

The thanks of the meeting was by a unanimous vote tendered to John S. Magee Esq., for kindness in acting as Secretary to this and previous meetings.

The Shore Line.—Work on the Shore Line is to be commenced at once. Had Galois voted a proportion of all it would have been commenced at this end. As it is the first work will be done at Ellisworth, and the laborers of Galois will be out in the cold. Proper action before November 1st will set the matter arguable, in which event the general manager, promises that we shall ride to Madras by railroad in a year from this fall.—*Calais Times*.

UNIVERSITY MATRICULATIONS.—The Matriculation Examinations at the University were held on Friday last, and fourteen students were admitted to the Freshman Class. Mr. Leonard and Mr. Roberts, from the Collegiate School, led the class, the first with a standing of 820 and the second with a standing of 720. Mr. Leonard therefore takes the beautiful prize of books (value upwards of \$40) given by the old pupils of the school to the student from the school who enters highest on the Matricula.

The example thus set might be worthily followed in other schools. At least one and probably more at-dents will yet join in the Freshman Class, but, strange to say, not a single one out of the whole number comes from Saint John. This certainly does not tell well for the intellectual aspirations of the youth of such a large and wealthy city, nor is it likely to elevate the standard of learning therein.—*News*.

Messrs. Coleman, O'Brien, Balkam, McLeod and Horseman take the Scholarships from the following Counties respectively, namely, Sunbury, Gloucester, Charlotte, Kent and Albert.

A Largo Boar Killed.

Upper Musquodoboit has been afflicted by the depredations of a wild beast, which finally reared itself at last in the shape of a formidable bear with a full set of teeth, huge claws, and a terribly keen appetite. Benn got into a way of helping himself to whatever he wanted; he walked into a man's barn and, selecting a nice fat sheep, had a delicious luncheon. Then a day or two after he fancied a change—beef tempted him, so he assaulted and slew a cow.—All this, of course, was highly unpleasant and Musquodoboit vowed death to the bear but between making the vow and fulfilling it there was quite enough room for many slips. However, last Sunday morning Mr. John Butcher, of Upper Musquodoboit, sallied forth after the robber and murderer accompanied by his dog, which possesses the reputation of being "a lion among bears." The canine justified his reputation by leading his master straight to the spot where the bear lay, and the gave up of it immense common sense by gently walking round in a circle, mutely declining to enter into the thicket and face the music, but suggesting that his master, being armed, might proceed to the interview alone. Mr. Butcher struck right in and was fortunate enough to secure first in the little game, sending a bullet, into the bear's brain. When he came up to the fallen brute he was not unreasonably astonished at its size; it was a mighty bear, in fact, the following figures give an idea of its dimensions and weight:—Length, 6 feet 2 inches; girth of neck 2 feet 7 inches; girth of arm, 1 foot 7 inches; depth of fur on back 5 1/2 inches; weight of hide 35 lbs. total weight, 492 lbs. And now Musquodoboit sheep and cows rejoice over the fall of their enemy.—*Halifax Chronicle*.

DR. WALLACE'S LETTER TO THE PRESBYTERY.—At a meeting of the Edinburgh held September 2, a letter was read from Dr. Wallace resigning the pastoral charge of Greyfriars' Parish, and demitting his powers and functions as a minister of the Church, having, as he said, resolved to devote himself to a calling in life to which he believed he might be better suited. It was resolved to allow the letter to lie on the table, and in the meantime to cite the congregation of Greyfriars' to appear in their own interests at a special meeting of the Presbytery to be held on 4th October next. A committee was appointed to confer with Dr. Wallace, particularly in re-

gard to his resolution to sever himself from the ministry.—*Edinburgh Ad.*

THE EQUINOCTIAL STORM.—The Boston Globe says:—

"The equinoctial storm began early Sunday morning; and the rains descended and the fogs came for twenty-four hours with but brief intervals of cessation. Though the rain-fall was very heavy—amounting to more than the whole register for August—there was but little accompanying gale. On the New England coast scarcely any damage appears to have been caused, while all along the Atlantic seaboard from Long Island to Hatteras the storm raged with great fury. The bay was rough on Sunday, but Hingham and Nantasket steamers made regular trips. Late in the evening a heavy fog settled over the waters and a schooner went ashore on George's Island yesterday, and was pulled off without much trouble. The thick fog which prevailed all along the coast prevented the arrival of many vessels."

Mr. J. H. Morrison, late of the Portland High School, went to New York on Monday last to study medicine at Bellevue College.

The Rev. Messrs. Naught, M. Lachlan and Taylor, who had congregations, have been formally received by the established Presbytery of Glasgow, whilst in the Glasgow Free Presbytery some very severe strictures have been passed upon the action of the Glasgow Free Church Building Society in relation to the secessions. A committee was also appointed to watch over the interests of the church in the matter; and by many it was felt and said that a grave crisis is at hand.

A NEW FLYING MACHINE.—Experiments were made on the 25th ult., within the military lines at Chatham, Eng., with a flying machine invented for use in military reconnoitering, the invention of Mr. J. Simmons, a civil engineer, and also celebrated as an aviator. The results obtained are considered to be fairly satisfactory. They have proved that a reconnoitering party may be raised to a moderate height, to watch the manœuvres of hostile forces.

The English Government has decided to plate the hulls of war ships with steel instead of iron, in order to attain the requisite strength with a considerable diminution in weight.

The defences of London on the Thames are fast approaching completion. The new works and extensions of old ones which have been effected within the last few years have added materially to the protection of the Thames.

The half yearly report of the North British Railway shows a revenue of £1,044,984, against an expenditure of £594,339. The net revenue available for dividend is £450,645. This is evidently a paying institution.

MARRIED.

On the 5th instant, at St. James Church, St. Johns, P. Q., by the Rev. H. J. Evans, Rector of Trinity Church, Christierville, Arthur Christopher Evans, eldest son of the late R. W. Delmege, Esq., C. E., of Court Lodge, Limerick, to Amy King, eldest daughter of A. K. Lavicomt, Esq.

[Many here will remember the late Mr. Delmege, as one of the engineers connected with the Railway, during its construction].—*Ed. Standard*.

GOVERNMENT HOUSE, OTTAWA.

Friday, 4th of May, 1875
PRESENT
HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.
WHEREAS it is provided by the 58th Section of the Act 31 Victoria, Chapter 8, intitled, "An Act respecting the Customs," that the importer of any cattle or swine may slaughter and cure an i pack the same in bond, under such Regulations and restrictions as the Governor in Council may from time to time make for this purpose.
And whereas it has been found expedient to give effect to the said Section 58, in so far as regards the importation of swine, and to alter the terms of the Regulations for this purpose, adapted by Order in Council of 22nd of May, 1868—
His Excellency the Minister of Customs and under the provisions of the said Act has pleased to order, and it is hereby ordered, that the Order in Council of the 22nd day of May, 1868, and the Regulations therein established be and the same are hereby repealed, and that the following Regulations be and are hereby adopted and established in lieu thereof—that is to say,
1. Upon the importation of swine for the purpose of slaughter, the Importer shall enter the same for Warehouse, upon the usual form of such entries, stating upon its face, the number and value of the herd, and also the quantity of pork, bacon, hams and lard, which the importer intend will produce when slaughtered and dressed at 112 pounds weight for each live hog so imported, and the amount of duty to which such produce is or may be liable under the rate prescribed by the tariff in force at the time being as the proper duty on such kind. Such Importer shall then execute a bond to the Queen, in double the amount of such duty, the condition of which bond shall be, that upon the due exportation within one year of the said products of the swine so imported and converted into pork, bacon, hams and lard, or payment of the duty secured by the said bond, the said bond shall be and become void, or otherwise shall remain in full force and virtue.
2. Upon the reception into the Bonding Warehouse, the swine shall be regarded only as meat, and it shall not be lawful to remove any of them from such Warehouse alive; nor shall any part of the produce of such swine be removed therefrom, for any purpose, without a permit from the Collector, or proper Officer of Customs, as in the case of all other bonded goods.
3. Swine imported in the carcasses to be cured and packed in bond may be entered in the usual way for Warehouse, and be placed in the premises established as a Warehouse of this class for the special purpose of curing and packing. The weight of such carcasses to be duly ascertained by the proper Officer of Customs, and the Importer shall give bond to the Queen in double the amount of duties accruing thereupon under the tariff then in force, conditioned for the due exportation of the same, or payment of duty within two years from the date of his entry.
4. The killing pen, curing and packing house, and all cellars, stores or other apartments included in such a mark use, shall be accessible at all times between sunrise and sunset to the inspection and survey of the Collector or Inspector of Customs, or any officer of Customs to whom the duty of such inspection may be assigned by them or their officers.
5. The produce of swine imported alive and slaughtered for slaughter, at the said rate of 112 pounds for each hog, and the meat of the swine supported in carcasses for curing and packing, at the actual accepted weight at first entry, shall be entered white in bond to all changes in the tariff rate of duty, and when entered out of bond for some consumption, shall pay the rate of duty force at the date of such entry.
W. A. WIMSWORTH,
Clerk of the Council.

THOMPSON & CO.,
No. 20, N. 3,
16, 1875. 3m
Proprietors of Patent

Representative and Champion of American Art Taste.
PROSPECTUS FOR 1875—EIGHTH YEAR.

THE ALDINE,

THE ART JOURNAL OF AMERICA.
ISSUED MONTHLY.

A MAGNIFICENT CONCEPTION, WONDERFULLY CARRIED OUT.

The necessity of a popular medium for the representation of the productions of our great artists, has always been recognized, and many attempts have been made to meet the want. The successive failures which so invariably attended such attempts in this country to establish an art journal, did not prove the indifference of the people of America to the claims of art. So soon as a proper appreciation of the want and an ability to meet it were shown, the public at once rallied with enthusiasm to its support, and the result was a grand and successful triumph—THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an elegant miscellany of pure, light, and graceful literature; and a collection of pictures, the most specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will be most appreciated after it is bound up at the end of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely without competition in price or character. The possessor of a complete volume can not duplicate the quantity of fine paper and engravings in any other shape or number of volumes for ten times its cost; and then, there is the chromo, besides.

The national feature of THE ALDINE can be taken in no other sense. Two art associations, the American Art Union and the National American Institution, do not confine themselves entirely to the reproduction of native art. Their mission is to cultivate a broad and appreciative art taste, one that will discriminate only on ground of intrinsic merit. Thus, while placing before the patrons of THE ALDINE, as a leading characteristic, the productions of the most noted American artists, a temptation will always be given to specimens from foreign masters.

The artistic illustration of American scenery, or original with THE ALDINE, is an important feature, and its magnificent plates are of a size more proportionate to the satisfactory treatment of details than can be afforded by any inferior page. The judicious interposition of landscape, marine, figure, and animal subjects, sustain an unbroken interest, impart to the scope of the work a coherence and unity which the artist too closely to a single style of subject. The literature of THE ALDINE is a light and graceful accompaniment, worthy of the artistic nature, with only such technical discussions as do not interfere with the popular interest of the work.

PREMIUM FOR 1875
Every subscriber for 1875 will receive a beautiful portrait, in all colors, of the same noble dog whose picture in a former issue attracted so much attention.

"MAN'S UNSELFISH FRIEND"
will be welcome in every home. Everybody loves such a dog, and the portrait is executed so true to life, that it seems the veritable presence of the animal itself.

Besides the chromo, every advance subscriber to THE ALDINE for 1875 is constituted a member, and entitled to all the privileges of THE ALDINE ART UNION.

The Union owns the originals of all THE ALDINE pictures, which, with other paintings and engravings, are to be distributed among the members. To every series of 5,000 subscribers, 100 different pieces, valued at over \$2,500 are distributed as soon as the series is full and the awards of each series as made are to be published in the next succeeding issue of THE ALDINE. This feature only applies to subscribers who pay for one year in advance. Full particulars in circular sent on application enclosing a stamp.

TERMS.
ONE SUBSCRIPTION ENTITLING TO THE ALDINE ONE YEAR, THE CHROMO AND THE ART UNION.
\$6 per annum in advance.
(No charge for postage.)

SPECIMEN COPIES OF THE ALDINE, 50 CENTS.
THE ALDINE will, hereafter, be obtainable by subscription. There will be no reduced or club rates; cash for subscription must be sent to the publishers direct, or handed to the local canvasser, without responsibility to the publishers, except in cases where the certificate is given, bearing the facsimile signature of James Sutton, President.

CANVASSERS WANTED.
Any person wishing to act permanently as a local canvasser will receive full and prompt information by applying to THE ALDINE COMPANY, 58 Maiden Lane, New York.

REMOVAL.
JAMES STOOP, MERCHANT TAILOR, begs to intimate to his friends and the public generally, that he has removed his Establishment to the building lately occupied by W. D. Hart, next door to J. R. Bradford's, where he will be happy to see his customers, and by promptness and efforts to please, to receive a continuance of the patronage hitherto afforded him.

Dr. J. Walker's California Vinegar Bitters
Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Walker's Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease men are heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases.

If men will enjoy good health, let them use VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form.

H. H. McDONALD & Co.,
Druggists and General Agents, San Francisco, California, and our Washington and Charleston, N. Y. Sold by all Druggists and Dealers.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Grateful Thousands proclaim VINEGAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

Bilious, Effluvia, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon the various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's VINEGAR BITTERS, as they will specially remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offspring of Dyspepsia. One bottle will prove a better guarantee of its merits than a long list of advertisements.

Serufolia, or King's Evil, White Swelling, Ulcers, Erysipelas, Swelled Neck, Gout, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional Diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Discharges of the Blood, Liver, Kidneys, and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.--Persons engaged in Painting and Minerals, such as Plumbers, Type-setters, Gold-beaters, and miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetter, Salt Rheum, Boils, Spots, Pimples, Pustules, Itch, Carbuncles, Ringworms, Scald Head, Sore Eyes, Erysipelas, Itch, Scour, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuge, no anthelmintics, will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the date of womanhood or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Jaundice.--In all cases of Jaundice, read assured that your Bitters not doing the work. The only sensible treatment is to promote the secretion of the bile and favor its removal. For this purpose use VINEGAR BITTERS.

Cleanse the Vitiated Blood whenever you feel its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
