THIS DAY IN HISTORY.

July 8.

1100—Peter the Hermit, who excited the first crusade, died; birth date unknown.

1601—Jean de la Fontaine, famous writer of French tales, born; died 1695.

1721—Elihu Yale, founder of Yale college, died.

1759—General Abercrombie attacked Ticonderoga with 16,000 men and was repulsed with a loss of 2,000.

1790—Adam Smith, author of "Wealth of Nations," died. Fitz Greene Hallock, poet, was born in Guilford, Conn.; died there 1867.

1792—The federal congress voted to make Washington the permanent seat of government.

1818—The remains of General Richard Montgomerie, brought from Quebec, were interred with great ceremony in old St. Paul's churchyard, New York city.

1822—Percy Bysshe Shelley was drowned in the bay of Spezia; born 1792.

1850—The Duke of Cambridge, seventh son of George III, died, aged 76.

1857—Ben Holladay, organizer of the pony express and pioneer of western transportation, died at Portland, Or., aged 63.

N. F. French died at St. John's, N. B., aged 76. He was a member of the cathedral and many public buildings, being destroyed, at a loss of \$100,000. 20 persons being killed and 8,000 rendered homeless.

LONDON AND ENVIRONS.
—If that sign were changed to read like this: "Would look more 'chic' by far: 'If you wish to see the world, don't export to the car.'"
—Mr. C. D. Gower, city, left for Chicago yesterday via the C. P. R.
—The family of Mr. G. C. Dolbe, of Gloucester, have removed to this city.
—Mrs. H. E. Gardner, Brantford, is the guest of her sister, Mrs. Alex. Gardner, 243 Dundas Street.
—Mr. J. J. Dunn, of Chicago, son of Joseph Dunn, Clarence Street, is visiting the parental home.
—Mr. Harry Branton has returned to Chicago after attending the funeral of his father, the late W. V. Branton.
—Miss Lulu Landown, of St. Louis, and Miss Iva Peters, of Shelbyville, Mo., are visiting Mrs. A. W. Mayell, city.
—The delegates to the B. M. E. convention took a trip to Springfield yesterday afternoon, the guests of Mayor Bessy.
—Mr. F. W. Daly is in Montreal attending the C. E. convention as delegate from Dundas Street Center E. L. of C. E.
—John Johnston has taken out a building permit for a \$2,000 brick store on Wellington Street. J. Munro is the architect.
—Miss Seaborn, of Burlington, N. Y., who has been a guest of the London in this city, left yesterday via the C. P. R. for the World's Fair.
—Mr. E. Ruess, of Mr. E. De la Hooke's office, left last evening for the World's Fair to gain pointers for G. T. R. passengers.
—Arthur Lloyd, the great English vocal comedian, will appear with his company at the Grand Nov. 17 and 18. He is recommended by Henry Irving and others.
—W. R. Hobbs, of this city, has been elected vice-president of the Consolidated Gas Company of Canada, and Thos. S. Hobbs has been elected a director.
—Manager A. E. Rothe of the opera house, left via steamer Flora for Cleveland, Thursday. From there he will go to his home, Siamtown, Va., for two weeks' rest.
—Mr. W. D. Gillen, manager Canada Paper Company, Montreal, and wife, Mrs. Cleghorn and son, city; Hon. S. H. Blake, and others have arrived in Liverpool per steamer Parisian.
—A letter from the daughter of Mr. Joe Ross, from his home at Caledonia, N. Y., says that her father has had a third paralytic stroke, and that the most serious consequences are now feared.
—Mr. Joseph Case, of New Haven, Conn., formerly assistant secretary of the Y. M. C. A. here, is home visiting his parents. Mr. Case is doing remarkably well at his trade, like all steady Canadians. He is busy shaking hands with old friends.
—Five drunks appeared in the Police Court yesterday morning. One of these was looking exceedingly woe-begone. To him the magistrate remarked: "You look penitent; you may go." He got out of the dock with alacrity. George and Thomas Dwyer were accused of playing ball on the street. They were discharged.
—Contractor Craig has been notified to let the following work in Ward 15: North side King, Adelaide to Lyle; north side York, Adelaide to Lyle; west side Lyle, King to York; east side Oak, Pine to Gore Road; west side Rectory, York to King; west side Eva, Dundas to Francis; west side Elizabeth, Elias to Central Avenue.
—The following dispatch from Asbury Park, N. Y., will interest band concert attendants: "Vice-Chancellor Pitney, of New Jersey, to-day issued an injunction against the Asbury Park Razzle Dazzle company. The company complain that 'The Man in the Moon,' 'Mollie and I and the Baby,' 'Annie Rooney,' and 'The Man That Broke the Bank at Monte Carlo,' music was too much for them, and prayed the court to relieve them of the alleged nuisance."
—He for Cleveland, via the Saturday daylight trip by the Joe Milton. The steamer leaves Port Stanley on arrival of the morning train from London, arriving in Cleveland at 3:30 p.m. in time to witness the league baseball match, and on Saturday evening the grand pyrotechnic display, "The Carnival of Venice," which is being played every Saturday night to audiences of fully 15,000 people in the pavilion in East Cleveland Park.
—Worth-Brown.
Mr. Charles Worth, of this city, chief clerk for Mechanical Superintendent Smith, of the G. T. R., took a trip to Stratford this week and was married to Miss Lillian Brown, daughter of Mr. Magnus Brown, of that city. It was a quiet affair, only relatives being present. Mr. and Mrs. Worth returned to this city the same day, and will reside on Oxford Street. They have the congratulations and best wishes of a host of friends, both here and in Stratford.
—"Look Out Point."
"Scribner" writes from the Y. M. C. A. camp, under date of July 6: Things are getting into good shape in camp and the boys are beginning to enjoy themselves. The cook is kept busy supplying the hungry lads. With to-day came rain and more campers. The rain came first, closely followed by Owen Falls, Fred Bryan, Thos. and George McHattie, Arthur Switzer and
In these days when dry lumber and shingles are essential, and are specified by architects, it is necessary to know where to get what will fill your bill. A call on W. D. WILLIS & Co. will convince you that they have what will suit you, and at right prices. Yard corner York and Adelaide streets. Phone 786. ywt

Ralph Wilson. Dinner was partaken of in the mess tent and the company ate in detachments. It cleared up toward evening, and the boys enjoyed an impromptu concert, there being two or three musicians in the party.

A string of flags adorns the front of the tent now. For particulars as to how they got there you need to inquire of Mr. Ed Reid or Secretary Sawyer.

What might have been a tragedy, but ended differently, occurred with a quartet of city friends, ladies and gentlemen, of course. One of the young men was so overcome he expressed a desire to hang, and so the rope and hangmen were provided, but the intended victim backed out, thereby spoiling your correspondent's craving for sensational news.

World's Fair Exhibits.
Mr. Henry Wade has left for Chicago to make the final entries for horses and cattle, which will be closed on July 15. There will be about 150 cattle and 75 horses. The animals are to be centralized at Toronto and London for shipment, and will be sent on about Aug. 15.

Stationary Engineers.
The Canada Association of Stationary Engineers, London, No. 5, have elected the following officers: Fred Mitchell, president (acclamation); G. B. Risler, vice-president; G. Taylor, secretary-treasurer (acclamation); W. McLean, conductor; Henry Gold, hardy, door-keeper; Wm. Westhead, P. T. and T. Patterson, trustees. Two members were initiated last night and the total membership is now 30. The object of this association is to meet together socially for mutual improvement and to discuss the best methods of managing the world's greatest motor, steam, and its appliances to power. This association will at no time be used for the furtherance of strikes, or in any way interfering between its members and employers in regard to wages. The Canada Association of Stationary Engineers will hold their annual convention on Sept. 7, 8 and 9, in Montreal.

The B. M. E. Conference.
The B. M. E. Conference convened Thursday morning at 9 a.m. The guests of the day were: Rev. J. E. Adams, of the church, Bro. Daniel Eady, of Peace River Mission, and Rev. R. A. Ball arrived and made favorable reports. The evening was set apart for a missionary meeting, and was large audience assembled and was ably assisted by Rev. Messrs. Brooks, of Buxton, and Moore, of Toronto, and Miss Lewis of London city. The meeting was a success. Dr. Oliver called for the collection and was handsomely responded to. The conference feels obliged to extend their undivided thanks to the people of London for the courtesy received at their hands. There will be a grand concert to-night given for the conference's benefit in the B. M. E. Church.

The chair sustained the point which was raised by the conference in relation to Rev. Superintendent R. Miller, who is assigned to the Bermuda, having any right to operate in common with the members of the Ontario and Nova Scotia annual conference and be subject to its conditions. The chair ruled the conference had no right to place said superintendent upon any work because he was not a member of the conference anywhere except in his own district. This ruling settled a very important matter, which had caused the members of the conference much anxiety.

A HORSE BARN.

Plain and Convenient, Suited to the Ordinary Farmer.

We copy by permission from Mr. J. H. Saunders' book on "Barn Building" the following cuts and description of such a barn as the ordinary breeder of a few horses would want. Mr. Saunders writes:

The horse barn, plans and specifications of which are herewith given, was built by M. Rich of Flanagan, Ill., who says he would not change it in any particular were he to rebuild it, and that it has been duplicated by his neighbors. The estimated cost is \$275, although Mr. Rich thinks it cost somewhat more.

HORSE BARN—SIDE ELEVATION.

The foundation is of blocks of stone about four feet apart laid on top of the ground except about the box stalls, where it is solid wall. Frame consists of 6 by 8 inches by 18 feet posts, with 8 by 8-inch sills and 6 by 8-inch plates and girders, and two middle posts of 8 by 8-inch stuff, all braced and staid. Joists are 2 by 8 inches and a foot apart. Floors are 2-inch plank. Floor and loft and floor and sides of grain bins are of matched pine and floor of box stalls is dirt. Rafters are 2 by 6 inches and 24 feet apart. Roof one-third pitch. Sides of barn are boards planed and battened. Body of barn is painted red, with white trimmings.

The expense items were as follows: Barn boards, 5,200 feet at \$19, \$98.80; stuff lumber, 11,000 feet at \$16, \$176; matched lumber, 1,800 feet at \$20, \$36; incidental, \$10.80. Total, \$320.60.

HORSE BARN—GROUND FLOOR.

sheeting, 2,100 feet at \$14, \$29.40; shingles, 15,000 at \$3.50, \$52.50; piping, \$12.50; carpenters, hardware, glass and paint, \$120; one car load of stone from Joliet, \$27; 8,200 feet battening at \$5, \$41; incidental, \$10.80. Total, \$375.

A Girl's Pet Lamb.

I am a farmer's daughter who believes in developing the resources of the farm before going into other business. I would like to tell the girls one way in which I am making a little money this spring. On Feb. 13 one of my father's sheep had twin lambs. Neither of them was strong enough to stand on its feet, and both were brought to the house, where I heated water and put them into it, letting them remain until they were thoroughly warmed through. Then I wiped them dry and gave them a little warm milk. They were soon on their feet, when we took them back to the barn. There, to our dismay, we found their poor old mother stretched out on the stable floor dead. Of course I had to adopt the lambs. We had very little milk, but having a new milk cow, so I took some hay, and having made a strong tea of it diluted the milk with it. Having slightly sweetened the mixture, I fed it to them, and they have grown like the proverbial weed. They came when I call and follow me about the barn and yard. I feed them from an old tin teapot, with a nipple such as is used for baby's bottle tied onto the spout. They are now by all odds the nicest lambs in the flock. If they keep on growing as they have done, they will be worth at least \$5 apiece by fall. They have always been kept at the barn except during the first night.—Lucy Taylor in Rural New Yorker.

Glanders in Horses.

Authorities make a rather arbitrary distinction between the different manifestations of glanders. Thus they describe nasal glanders, farcy and pulmonary glanders. The nasal form is most common. In this form a nasal discharge is present, and in the latter stages the nasal cavity becomes covered with ulcers. In farcy the lymphatic system is the chief seat of the disease. The legs swell, and small hard nodules appear on the inner surface. Later the nodules become soft and break, discharging a viscid liquid. The nodules may also appear on the head and neck. Pulmonary glanders seldom if ever occur alone, but follow the other forms. No medical treatment can be recommended. The only thing to do with affected animals is to destroy them and either burn or bury the carcasses deeply. Everything with which the diseased animals have come in contact should then be thoroughly disinfected.—Exchange.

A Useful Recipe.

A good condition powder for indigestion, lack of appetite and to make a horse sleek and active is made as follows: Take of opium salts, 2 ounces; powdered gentian root, 1 ounce; nitrate potash, 1 ounce; nux vomica, 1 ounce; fenugreek, 2 ounces; charcoal, 2 ounces. Give a tablespoonful night and morning in the feed.

Caution.—If you desire to retain your nervousness and ill-health, do not use South American Nerve, as it is an absolute cure.

TREATMENT OF BROOD MARES.

Great Care Necessary to Avoid Injury to Dam and Foal.

Well ordered work is not an injury to mares with suckling colts, but conditions arise in the rush of farm labor which make great care necessary in order to avoid serious injury both to mare and colt. Overheating the dam by violent exercise in the middle of the day is one of these, but it does not represent all the danger. In the hurry of his work the driver of the team is often inclined to a fractious handling of his horses, with a resulting use of the whip and harsh words and tones that fret and often greatly excite the nervous system of mares in milk, the nervous system being particularly sensitive at this time to disturbing causes. It is very well known to intelligent dairymen that harshness in the treatment of cows is at once followed by a decrease in the quantity both of milk and butter, and that, too, where the harshness is not accompanied by blows. What may be thought then, of the effect upon the milk producing organs of the mare of the use of the lash, the brutal jerking upon the horse's mouth with the reins and the rough language that one too often notices in the driving of horses?

Humanity and a love for dumb animals ought to insure kind treatment of all the animals upon the farm, but if that idea does not carry sufficient weight with one's self interest, ought to come in and show that unkindness means a positive loss in dollars and cents. It is often, however, not a question of real brutality on the part of unkind drivers of horses. The drivers are themselves peripatetic and fretted, and thoughtlessly and impulsively a blow of the lash is given or the harsh commands uttered that would not be given or uttered under other circumstances. In such cases the driver must keep a check upon himself as well as upon his horses.

Mares in milk are more susceptible to changes of temperature or to sudden chills from drinking freely of very cold water when heated. In all ways brood mares must be treated with extra care and kindness if their own future usefulness is to be conserved and the thrifty growth of the foal assured. They should be given a nourishing supply of food that will provide abundant sustenance for the dam and an ample supply of milk for the colt. Good pasture and a liberal ration in which bran or ground oats predominate will be found to yield most satisfactory results.—American Agriculturist.

Experiments in Hog Feeding.

Two important experiments with feeding hogs have been made, says American Cultivator. One is at the Canada experiment farm at Ottawa, and the question considered was whether warm or cold feed is the better. The results of the experiment seemed to show that cooking the food for the hogs was not profitable. In the experiments peas and small grain were fed raw and cold, and also the same amount warmed by steam. In bulletin 22 of the Minnesota station the question of wet or dry feed for hogs has been considered. Hogs are such greedy creatures that they are inclined to swallow their food so rapidly that it is not mixed properly with the saliva. In the case of dry food this is impossible, but a great deal of their wet food is thus taken into the stomach. The wet feed, however, is so much more attractive to the hogs that they will eat a great deal more than of dry feed, and as they digest most of it they gain more off such feed. Where hog feed is cheap it pays the farmer to give them wet feed in abundance rather than dry. But feed is expensive, and every pound is a loss unless great gain is obtained, a less liberal feeding on partly dry feed would result more profitably.

For the Winter Lamb.

The greatest desideratum is a heavy lamb crop. My favorite plan, therefore, in Wisconsin is to set aside a narrow strip of blue grass in June, so that in December the grass lays over the fields in large, dense tufts, on the inner portions of which are to be found generous bites of fresh green grass. This grass keeps in this condition all winter. When the cultivated pastures begin to fail late in the fall, I turn the breeding ewes upon this reserve blue grass. They stay by it as close as though it were a patch of turnips. This grass does not die down like tame grass nor freeze, and the ewes get constant exercise picking over these green tufts for the tender morsels within. I aim to keep my ewes on this until the very latest possible moment, taking care to have them brought down to the buildings and carefully divided up and placed in dry, airy quarters before lambing.—Cor. Norwest Farmer.

Live Stock Points.

An international show of stallions will be held at Vienna Oct. 14-17 at the instigation of the royal ministry of agriculture.

Sales of wool in Australian colonies are increasing very largely, the aggregate quantity disposed of for the 1892-3 clip being 725,000 bales as against 634,000 for the previous season.

Experiments at the Wisconsin station indicate that the heavy feeding of dairy cows is profitable. A cow producing a full flow of milk should receive over 70 per cent more food than is necessary to sustain life.

Dehorning is cruel when it is done with a club in the hands of an angry man.

Brushing a cow daily with a stiff horse brush dampened with kerosene will soon rid her of lice.

Whether it is for the best or not, this is the age of differentiation in live stock, as in everything else. The breeder who would catch on to the times must rear animals for a special purpose in every line of his domestic stock, even down to the hens. If he wants eggs, he must get an egg breed.

For the family cow nothing is better than a pint of warm water in which is stirred a quart of bran. Give it three times per day and add a little salt.

Give Holloway's Corn Cure a trial. It removed ten corns from one pair of feet without any pain. What it has done once it will do again.

SOCIAL PROGRESS.

SIGNIFICANT FACT.

Here is a significant fact which our Canadian prohibition commissioners may do well to grasp the meaning of while they are making their investigations into saloons. During last year there were no less than 2,106 distilleries opened in the United States, here and there. Not one of these was opened, however, in Maine, or Kansas or Iowa—three where increased activity States. Whatever increased activity there may be in the liquor making business elsewhere in that country, liquor making has ceased to be a "thriving industry" in prohibition States.—[The Templar.

PLEBISCITE CAMPAIGN.

The immediate and important step in the plebiscite campaign, is the organization of municipalities. It is a very simple operation and demands no outside help. Every township, incorporated village and town, should have a public meeting at once for the organization of a committee on voters' lists, a committee on the circulation of literature and the preparation of matter for local papers, a committee on public meetings, and a committee on finance. A general chairman and secretary should also be chosen so that meetings may be called whenever necessary.

It is the duty of any temperance organization to take the initiative and lead a movement where there is no society, then some temperance worker should ask a few friends to join him in announcing the meeting.—[The Templar.

THE PRICE OF LICENSE.

Gentlemen, as business men, when we have anything to sell, we first ascertain its cost to us, and upon that estimate our profit, and the addition of the two will tell us what we should sell for. You, gentlemen, are discussing among other things in the bill the price of a license, know wisdom would dictate that you first ascertain its cost to the commonwealth, and then you can form an intelligent judgment of what you should obtain for the same. Statistics show that there is expended in the United States \$900,000,000 yearly directly for strong drink, and an equal sum indirectly to take care of the victims of the traffic, making a total of \$1,800,000,000 a year. Now if we divide this amount by \$180,000, the number of saloons in the country, we have \$10,000 as the cost of every saloon and consequently of every license. You cannot accept a less sum than that without conducting your business at a loss.—[H. Clay Gascon before the committee at Albany, N. Y., in reference to the license question.

BIBLE WINES.

The grapes were to Palestine what the apple is to America—the most common and abundant fruit. And it was used very much as we use the apple, eaten fresh and dried, and its juice drunk in various stages of fermentation, as our cider is, sweet, fermented or grape juice was used in all its stages from sweet wine to vinegar. The "honey" so frequently mentioned in descriptions of the promised land was made (so Dr. Thompson tells us) by mixing the pulp of the grapes in grape juice, very much as Tennessee housewives make apple butter. But distilling was not known for a thousand years after Christ. The wines of commerce are a mixture of brandy and grape juice. The easiest, cheapest, surest way of preserving grape juice is to mix or fortify it with brandy. The alcohol will keep the grape juice from rotting as it preserves snakes in bottles. But the wines of the New Testament have nothing whatever to do with the wine of commerce or the traffic in them. Wine whether fermented or unfermented is one thing, and a mixture of wine and brandy is an entirely different thing. We cannot argue from one to the other.

PASTORS' PROHIBITION LEAGUE.

Another new organization is proposed, which seems to us to be getting at the real core of the temperance reform, and that is a "Pastors' Prohibition League." This is to be composed of all pastors of Christian churches who will sign the following pledge: "I hereby promise, with the help of God,

"1. To preach, pray and vote for the absolute prohibition of the traffic in alcoholic drink."

"2. To preach every three months a special sermon on the duty of Christians in regard to the drink traffic, with special reference to political activity."

"3. To arrange and hold, as a regular church duty, a monthly temperance or prohibition meeting."

These pledges, when signed, should be returned to 10 East Fourteenth street, New York City, the office of the Anti-Naliance League, which generously proposes to keep as being getting at the real purpose. It is expected that 20,000 ministers will enter into this movement as soon as invited, and W. C. T. U. members are urged to extend the invitation, with the pledge, to their pastors. This new league is for the concentration of the great force of the Christian pulpits upon the drink traffic, and as such will form a more uncompromising and intelligent foe to strong drink than any previously inaugurated movement. We wish it success.—[Union Signal.

THE CURSE OF LICENSE.

Under the license and tax laws of this country the liquor traffic has secured a firm hold. Manufacturing is unrestricted, wholesaling is unlimited and retailing has no bounds. The liquor man simply goes ahead and does as he pleases. Sometimes he pays for his privilege and sometimes he does not. Occasionally he respects the law and complies with its requirements, but generally he is a law unto himself, asking no favors and fearing of consequences in his dealing with the nation.

He is doing more injury to this nation than almost any other sinner. He is debauching consciences, beclouding intellects and sowing seeds of ruin. He is destroying moral bodies and ruining immortal souls. He is leading young men astray, unfitting them for usefulness and preparing them to be—

come a public burden. His work is evil, only evil, and that continually. He enriches himself at the expense of his fellow. His trade is one-sided. It injures everybody and, save in cash, is of no benefit to himself.

Even to be legally suppressed. In relation to it the only righteous law is prohibition. Yet the bulk of our citizens do not see it so. They are so used to saloons, or so fond of drink, or so proud of self, or so lacking in the humane feeling, or so indifferent to the country's weal, or so wedded to party, or so unbelieving and fearful, that they say nothing, do nothing and think nothing that will help to put down this terrible curse and inaugurate an era of blessing. The license evil is gaining ground. There is more said in its favor, or by way of excusing it, than ever before. The saloon is here. Tippling is here. Debauchery is here. Murder is here. The bloody sacrifice of youth to this monster is here. The whole gigantic curse of rum in full-orbed ferocity is upon the American people, and few say nay. The churches denounce it theoretically, but who is fighting it practically? Glasgow, Glasgow! Even the old forms of temperance lecturing and pledge signing are little in vogue. Lodges and leagues are seldom heard from. The curse lives on, and grows gains vantage ground. Where are the patrons of state and nation. Where are the reformers who can arouse the people from their stupor and put enough life into some practical policy to overthrow the curse forever?—[Michigan Christian Advocate.

MR. MOODY ON WINE.

Mr. D. L. Moody, in addressing the noon-day prayer meeting recently in the Christian Institute, Glasgow, referred to the miracle performed by Christ at Cana of Galilee in turning water into wine. He said some people had a difficulty about this subject in regard to what kind of wine Christ made. They were somewhat afraid Christ made a deal with the devil, but he was quite certain Christ never made alcoholic wine. He never made alcohol in nature. It was only when men took the good grain and destroyed it that alcohol was produced. Mr. Moody said he was in Jerusalem lately, and he asked a Jewish rabbi there what kind of wine they used at their feast. The rabbi replied: "We use the pure juice of the grape; we do not use leaves or anything else. We do not use anything but the pure juice of the grape in our wine." When the pure juice of the grape could not be got they poured hot water on the raisins and drank it. Those people in this country who have some scruples about the use of fermented wine at the communion need have no difficulty in this matter, as it is quite clear Christ never made or used alcoholic wine. Mr. Moody remarked that he just gave utterance to these statements to show he still held sound views on the temperance question. He was glad to say he was a teetotaler.—[League Journal.

Edward Lincol, of St. Peter, C. B., says "That his horse was badly torn by a pitchfork. One bottle of MINARD'S LINIMENT cured him."

Livery stable men all over the Dominion tell our agents that they would not be without MINARD'S LINIMENT for twice the cost.

HUMPHREYS'

Dr. Humphreys' Specifics are scientifically and carefully prepared for years in our private practice and for over thirty years by the people with entire success. Every single Specific special cure for the diseases named. They cure without drugging, purging or reducing the system, and are in fact and deed the sovereign Remedies of the World.

THE GREAT SOUTH AMERICAN NERVE TONIC

Stomach and Liver Cure

The Most Astonishing Medical Discovery of the Last One Hundred Years.

It is Pleasant to the Taste as the Sweetest Nectar. It is Safe and Harmless as the Purest Milk.

This wonderful Nerve Tonic has only recently been introduced into this country by the proprietors and manufacturers of the Great South American Nerve Tonic, and yet its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the general public.

It has completely solved the problem of the cure of indigestion, dyspepsia, and all the diseases of the general nervous system. It is also the greatest value in the cure of all forms of failing health from whatever cause. It possesses, and by its great curative powers upon the digestive organs, the stomach, and the bowels. No remedy compares with this wonderfully valuable Nerve Tonic as a builder and strengthener of the life forces of the human body, and as a great renewer of a broken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on the continent. It is a marvelous cure for nervousness of females of all ages. Ladies who are approaching the critical period known as change of life, should not fail to use this Great Nerve Tonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use a half dozen bottles of the remedy each year.

IT IS A GREAT REMEDY FOR THE CURE OF

Nervousness, Nervous Prostration, Nervous Headache, Sick Headache, Female Weakness, Nervous Chills, Paralysis, Nervous Paroxysms and Nervous Choking, Hot Flashes, Palpitation of the Heart, Mental Despondency, Sleeplessness, St. Vitus' Dance, Nervousness of Females, Nervousness of Old Age, Neuralgia, Pains in the Heart, Pains in the Back, Failing Health, Broken Constitution, Debility of Old Age, Indigestion and Dyspepsia, Heartburn and Sour Stomach, Weight and Tenderness in Stomach, Loss of Appetite, Frightful Dreams, Dizziness and Ringing in the Ears, Weakness of Extremities and Fainting, Impure and Impoverished Blood, Boils and Carbuncles, Scrofula, Scrofulous Swellings and Ulcers, Consumption of the Lungs, Catarrh of the Lungs, Bronchitis and Chronic Cough, Liver Complaint, Chronic Diarrhea, Delicate and Scrofulous Children, Summer Complaint of Infants.

All these and many other complaints cured by this wonderful Nerve Tonic.

NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nerve Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nerve Tonic has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous derangement.

CRAWFORDVILLE, IND., Aug. 20, '88. I have suffered from a distressed condition for two years from Nervousness, Weakness of the Stomach, Dyspepsia, and Indigestion, until my health was gone. I had been doctoring constantly, with no relief. I bought one bottle of South American Nerve Tonic, which does me more good than any \$20 worth of doctoring I ever did my life. I would advise every weakly person to use this valuable and lovely remedy; a few bottles of it has cured me completely. I consider it the greatest medicine in the world.

J. A. HANDEE, Ex-Treas. Montgomery Co.

A SWORN CURE FOR ST. VITUS' DANCE OR CHOREA.

CRAWFORDVILLE, IND., June 22, 1887. My daughter, eleven years old, was severely afflicted with St. Vitus' Dance or Chorea. We gave her three and one-half bottles of South American Nerve Tonic and she is completely restored. I believe it will cure every case of St. Vitus' Dance. I have kept it in my family for two years, and am sure it is the greatest remedy in the world for Indigestion and Dyspepsia, and for all forms of Nervous Disorders and Failing Health, from whatever cause.

JOHN T. MISH, State of Indiana, Montgomery County, ss:

Subscribed and sworn to before me this June 22, 1887.

INDIGESTION AND DYSPEPSIA.

The Great South American Nerve Tonic

Which we now offer you, is the only absolutely unfailing remedy ever discovered for the cure of Indigestion, Dyspepsia, and the vast train of symptoms and horrors which are the result of disease and debility of the human stomach. No person can afford to pass by this jewel of incalculable value who is affected by disease of the stomach, because the experience and testimony of many go to prove that this is the one and only one great cure in the world for this universal destroyer. There is no case of unalloyed disease of the stomach which can resist the wonderful curative powers of the South American Nerve Tonic.

HARRIS E. HALL, of Waynesville, Ind., says: "I owe my life to the Great South American Nerve Tonic. I had been in bed for five months from the effects of an exhausted stomach, Indigestion, Nervous Prostration, and a general shattered condition of my whole system. Had given up all hopes of getting well. Had tried three doctors, with no relief. The first bottle of the Nerve Tonic improved me so much that I was able to walk about, and a few bottles cured me entirely. I believe it is the best medicine in the world, and do not recommend it too highly."

No remedy compares with South American Nerve Tonic as a cure for the Stomach. No remedy will at all compare with South American Nerve Tonic as a cure for all forms of failing health. It never fails to cure Indigestion and Dyspepsia. It never fails to cure Chorea or St. Vitus' Dance. Its powers to build up the whole system are wonderful in the extreme. It cures the old, the young, and the middle-aged. It is a great friend to the aged and infirm. Do not neglect to use this precious boon. If you do, you may neglect the only remedy which will restore you to health. South American Nerve Tonic is perfectly safe, and very pleasant to the taste. Delicate ladies, do not fail to use this great cure, because it will put the bloom of freshness and beauty upon your lips and in your cheeks, and quickly drive away your disabilities and weakness.

Large 16 ounce Bottle, \$1.00. EVERY BOTTLE WARRANTED.

If your druggist hasn't the Remedy in stock ask him to procure it for you from his regular wholesaler.

CREAMERY GOSPEL.

Creameries Double Dairy Profits Where They Are Right.

Creameries are money mills. It is putting it extremely mild to say that they have doubled the dairy profits of the places where they are successfully running. The butter-making of the future will be in creameries. They are here to stay. But they are not here to stand still in any sense. They must run and run by constantly improving methods. Some follow is always getting ahead of the average of creamery operatives, and others find it out and come up alongside and perchance outstrip him. The race is to the quick witted and observing. To stand still is to fall back. To progress slowly, even, is to fall back in the procession. All must be on the alert or they will be left in the rear.

This is why we so often refer to standard topics, such as flavor, etc. One-third of our creameries are no credit to themselves nor to the business. It is not enough that they make better looking butter than the curdy lumps their patrons make at home. It is no honor to compete with packing stock and particularly grease. The competition is with creamery butter made as it should be made, and the good butter catches the prices that are quoted with pleasure. It is this lagging third that we want to spur up, and we want to encourage the winning two-thirds and keep them up to their best efforts. Experience that don't track is poor experience.

Making all the creamery butter gilt edge will be a benefit to the whole business, as it will give it a better name. We find the demand for private dairy butter is kept up by the fact that some one some time saw the tawdriness of some dirty, ill starred creamery, and over afterward he went around crooning in a guttural undertone the refrain about "creamery butter looking well, but he had seen it made and did not want any." Help each other, boys. Let us all get there with flying colors.—Creamery Journal.

Dairy School Building.

Hiram Smith of Wisconsin was one of the most enthusiastic devotees of the butter and cheese interests of this country. Much of the fame Wisconsin dairy products have attained was owing to him. A favorite idea of his was to attach a dairy school to the state university at Madison. This was at last done and the building named in honor of him Hiram Smith hall.

WISCONSIN DAIRY SCHOOL.

The structure cost \$40,000, completely equipped with approved dairy, butter and cheese machinery. It is built of Dunville white sandstone and white brick. The upper part is finished on the outside in pebbles and bean work. Especial attention is given to cheese factory and creamery work in the Wisconsin dairy course. The building will accommodate 100 students.

Dairy and Creamery.

The best butter cows now give an average of 7 per cent fat to their milk.

The expert can tell a good milk cow at a glance. She is small boned, with lean neck, large udder and thin tail. Your large, oily looking cow will make a milk udder is built for beef, not for milk.

They do not seem to know much about cows in Scotland, well as they are in theology and some other things. The average Scotch cow's milk contains only a little over 8 per cent butter fat.

Our creamery men need to learn the Danish secret of ripening cream by means of a "ferment." The ferment is made from sterilized skim milk, and it is prepared fresh every day.

For all the Danes have the name of making the best butter, their cows do not give as rich milk as our Jerseys and Guernseys. The per cent of butter fat is only 8 1/2.

The reasons for the high price of Danish butter in Europe are, first, its uniformity; second, its aroma or butter flavor, which our agent declares is secured through the use of an artificial ferment in the cream. All Danish butter is of a bright straw color and is salted all alike. There is only one grade of Danish butter, merchants say, and that is A No. 1. You cannot get an inferior grade if you ask for it.

At one of the experiment stations a test was made of raising cream by the ordinary process and then of separating it with the Babcock separator. The separator gave an increased yield in butter of from 1 to 1 1/2 pounds of butter a day in the herd of 30 to 35 cows kept at the station.

Look out for the oily tongued creamery machine agent about this time of year. Don't be bamboozled into the belief that you can start a co-operative creamery or any other kind of a one with less than 300 cows on an average. Let each farmer go by slow in his own mind and find out all about the cost of a creamery from somebody else than the agent, who wants to sell the machinery and does not care a rap what happens to anybody after that. There are hundreds of just such. A large proportion of all kinds of traveling agents are of this sort unfortunately.

One reason given in favor of winter dairying is that at that season of the year there is not much outdoor work to be done, and farm people will have more time to milk and take care of the cows.

Get rid of your indigestion before the threatened outbreak of cholera. R. D. C. will cure the worst form of indigestion. It will prevent cholera.

THE SUNDAY SCHOOL.

LESSON II, THIRD QUARTER, INTERNATIONAL SERIES, JULY 9.

Text of the Lesson, Acts xvi, 19-34.—Memory Verses, 29-31.—Golden Text, Acts xvi, 31.—Commentary by the Rev. D. M. Stearns.

19. "They caught Paul and Silas and drew them into the market place unto the rulers." The previous three verses tell of the healing of a woman who had an evil spirit, by means of which she brought gain to her masters, but being healed was of no more use to them, and hence their rage against the apostles. What a devil we have to contend with, to whom a sound mind in a sound body is something distasteful! Let us all the more bless the Lord, who healeth our diseases.

20. "These men, being Jews, do exceedingly trouble our city." It is all right to ruin people's soul and body, but those who seek the welfare of soul and body are accounted troublemakers. It grieved Sanballat and Tobiah exceedingly that a man had come to seek the welfare of Israel (Neh. ii, 10). It grieved the Jews that Jesus had come to heal the sick and raise the dead. And I have actually seen ministers grieved that a man should in their town teach people to love the Bible more, and thus be saved from sin and folly.

21. "And teach customs which are not lawful for us to receive, neither to observe, being Romans." They did not know that the men they were persecuting were Romans also (verse 37) and loyal citizens. It to honor God is contrary to Roman custom, then Rome is not on God's side.

22. "And the multitude rose up together against them." The whole world leith in the wicked one (I John v, 19, 20). Marvel not if the world hate you (I John xv, 18). If the world does not hate us, we cannot be very like our Master, but it was the religious world that hated Him.

23. "And when they had laid many stripes upon them they cast them into prison." This seemed like very poor treatment from the man of Macedonia who said, "Come over and help us," but Paul understood it, having been told at the start that he was to suffer for Jesus' sake (chapter ix, 16) and having already on his first tour had considerable experience of it.

24. "Who, having received such a charge thrust them into the inner prison, and made their feet fast in the stocks." And it is not at all likely that he used much tenderness in handling them. So with torn and bleeding backs they find themselves well under the power of the enemy. Without friends and without influence they suffer this shameful treatment (I Thess. ii, 2) simply because they had interfered in the unlawful gains. Men have been murdered in our day for the same cause. The world changes not.

25. "And at midnight Paul and Silas, prayed and sang praises unto God, and the prisoners heard them." Truly they were putting in practice the words of the psalmist: "I will bless the Lord at all times. His praise shall continually be in my mouth." (Ps. xxi, 1). They were filled with the spirit of Daniel and his companions, who went cheerfully to the lion's den and to the fiery furnace for the sake of their God.

26. "And suddenly there was a great earthquake, and every one's bonds were loosed." Their songs were heard in heaven as well as on earth, and though they had no influence in the city see the power they had in heaven. A quaking earth, open prison doors and all bonds loosed. Such a suggestive of coming events and reminds us of His death and resurrection and the accompanying events of earthquake and resurrection of the saints. He came to proclaim liberty to the captives and the opening of the prison to them that are bound (Isa. lxi, 1).

27. "And the keeper of the prison, awaking out of his sleep, would have killed himself." While the righteous, although in great suffering, were praising God, the ungodly, though perhaps on the verge of eternal torment, were in health and sleep. What a mercy to awaken such as it be too late! Then in his blindness, not knowing of the hereafter, the jailer would have rushed madly into it, only to find himself in hopeless despair. Read carefully Luke xvi, 23, 28; Rev. xiv, 9-11; Job xxxvi, 18.

28. "But Paul cried with a loud voice saying, Do yourself no harm, for we are all here." Here is good for all on the part of Paul. In the true spirit of his Master (I Thess. v, 15). He could not rejoice to see the jailer suffer, nor permit him to injure himself, though his own body must have been full of pain. If we endure grief, and suffer longingly, or if we do well and suffer for it, and take it patiently, God will bless (I Pet. ii, 19, 20).

29. "Then he called for a light and sprang in and came trembling and fell down before Paul and Silas." How well he knew to whom to go! He had never seen prisoners like these, nor met with such conduct under such treatment, and that had not Paul called out to him that he should do himself no harm? Paul's interest in him and in his welfare wrought upon him by the Spirit of God.

30. "And brought them out and said, Sirs, what must I do to be saved? Whether he had before heard anything of Paul's preaching or had through others received any light on things eternal we are not told. But through a combination of marvelous events he is now powerfully wrought upon for his soul's good and made to see his great danger. See how much God will do to save a soul from death. Read Job xxxiii, 18, 29, 30, and the context and consider the sorrow of Jesus to save us.

31. "And they said, Believe on the Lord Jesus Christ and thou shalt be saved and shalt be added unto the church." This is the teaching of all Scripture as to the work of salvation. His work has finished work. It is impossible to add to it or to improve upon it.

32. "And they spake unto him the word of the Lord and to all that were in his house." No doubt they would show from the Scriptures that Jesus was the Christ and that the law cannot give life, but that Christ is the end of the law, and that believing means receiving, for he that hath the Son hath life, and he that hath not the Son hath not life (I John iii, 2; I John v, 12).

33. "And he took them the same hour of the night and washed their stripes and he was baptized, he and all his, straightaway." Here is a public confession of their faith in Christ, or, perhaps more correctly, a formal confession, and also their baptism. Here is a public confession of their faith in Christ, or, perhaps more correctly, a formal confession, and also their baptism.

34. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

35. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

36. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

37. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

38. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

39. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

40. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

41. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

42. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

43. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.

44. "And when he had brought them into his house he set food before them and he rejoiced, having believed in God with all his house." In verse 18 we saw Lydia's household all saved and now another. Behold the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work, blessed not forget the Spirit of God at work.
