"Nothing is so great a source of annogance to telephone users as the inconvenience of being called to the telephone and then having an office boy tell you to 'hold the wire' until the calling party is ready to talk. If there's waiting to be done it's the CALLING party's obligation to do it." -Prominent Business Man

It's Your Place to Wait.

OULD you call on a busy man at his office, send in your card, and then, when he had indicated in you, keep him waiting while you finished reading an article in a magazine in his outer office?

It is just as important when you telephone that you be ready to talk when your party answers!

It shows consideration for the other person's time. It makes for a more cordial welcome, and it gives you the advantage of having gained good will by your correct telephone practice.

A prompt and courteous greeting at the telephone helps to smooth the way for a successful conversation.

Reported By Thomson & McKinnon.)

New York, Sept. 21.

Prices ran up 20 to 23 points from the low level of the morning on a report that a Chicago house will issue a very bullish crop report in a day or two. This was followed by good buying by the west, the Waldorf element and Wall Street, as well as covering by room shorts, and last, but far from least excellent buying by trade interests.

Spot houses and mills want the cotton, and they are buying it on breaks right along. Some of the buying of December, too, was believed to be taking in hedges by southern spot houses, as they sold the cotton to exporters.

New York and Liverpool, as well as New Orleans, belfeve that the October Government report will be bullish.

The crop is being picked, ginned and Government report will be bullish.

The crop is being picked, ginned and marketed with greater celerity than any crop for years. Spot markets are strong, with a good demand, and weevil reports from Texas are bad.
