tell off-hand what these do for. We might explain the initial letters of a that has been started in a school of Technology—School of Science in Domestic Engineering. We all welcome that will add to the convenience of life and the betterment in the economic home, an improvement of doing things in the so as to minister to the and health of the different of the family. All who science has been a valuen-aid to industry, cannot ous of the fact that foods according to hygienic princi-ple be conducive to greater happiness than under pres-criptions where much of the lone is more to the interests medicine vendors.

means let us have Domestic instruct the young women at of home making, but it is to crown the course with a degree. In any academic he magic letters B.A. or L.L.D. case may be, are of little encc if the possessor does not himself, a man of scholarship.

are not satisfied with the cer-A man must prove his fit-hold any position he may be pon to fill. We doubt if Mary B.S.D.E., will command any respect from her mistress, ipso of her academic honors, than she plain Mary Jones, capable reful domestic. If the young of twenty-two is "Bachelor of e," her mother should be candi-for the honorary degree of "Mas-Science in Domestic Engineer-

She is like the self-made, ex-ceed bridge-builder, who has not a college education." And for mother, nothing will do but the et honorary degree. Just as un-ties honor men who have made mark, even if they are not col-education, so grandmother d be summoned to the university commencement day, dressed in emic gown and lace cap, and be a D.D.E., "Doctor of Domestic neering."

much as we value instruction domestic science, it is advisable to carry the matter too far. The subject of study is as yet not versally accepted and prejudices, in our prejudices, are entitled to a ain amount of respect. While coming anything that will amel-ate conditions in the home and tore household work to its true nity which has been lost sight of a great many who should know ter, we do not wish to see a good ing exposed to ridicule. — Windsor cord.

MUSKOKA'S POPULARITY.

The following voluntary testimonial of the Muskoka region and Royal Muskoka Hotel was received at the Grand Trunk General Offices recently from one of the most prominent doctors in New York City, who was sojourning for a few weeks in that district:

"I take pleasure in recommending the 'Muskoka' region as a health resort of the first class. Its altitude, dry atmospheric conditions, and water supply free from infection, make it particularly beneficial."

"The Royal Muskoka Hotel, a hotel perfect in all its appointments, adds materially to the comfort of the tourist."

"The thousands of people who are now enjoying the summer months in the 'Highlands of Ontario,' are profuse in their praises of that part of the country, as a summer resort, and consider it the finest on the continent."

There is no Condition of Health that a course of Magi Caledonia Springs Waters and Baths will not Benefit.

PURSUITS OF MONEY.

SEVERE REBUKE TO MEN WHO MAKE GOLD THEIR GOD.

Points for the Consideration of Those Who Sacrifice Everything to Gain It.
—"How Tough the Old Man Is," Say Children of Their Father, Whose Wealth They Wish to Spend Unhindered.

Following is the text of a sermon that has attracted much attention and that was delivered by Rev. D. C. Hossack of Deer Park, Toronto, to his congregation a Sunday or two ago.

"It cannot be denied that the love of money leads to corruption and crime. A man who has loaned a small sum and who has received a comparatively large amount as interest inquired of a friend what rate of interest he had made. This friend replied that the Babbage calculating machine had demonstrated that at certain points in progressive numbers the law governing them changes, and that long before his rate of interest would pass out of percentage and into larceny.

"The desire for money is a great source of evil. In the United States the Government report indicates that in one year 6,536 weights and measures had been found incorrect. It has been said that if a Boston merchant had the privilege of selling the Atlantic he would cheat in measuring it by the quart. It has been estimated that the United States loses more than half a million dollars a year by the use of a second-hand postage stamps. During one year there passed between Britain and the United States and Canada 14,000 newspapers containing correspondence. A convict making shoes by order of the Government was instructed to place pasteboard between the soles, where there should have been sound leather and, as he toiled, he may have thought of the blind leading the blind or Satan reproving sin.

Unable to Enjoy Life.

The love of money has a demoralizing effect and makes men think that beyond the pursuit of money there is nothing worthy of attention. The pursuit of money dulls the moral sensibilities and makes dim the spiritual vision. A blind man passing through a picture gallery cannot see the pictures, and if he never had sight cannot imagine their beauty. Not only are they who pursue money unable to enjoy the pleasures of life, but they place themselves beyond the possibility of enjoying other pursuits. They become warped by greed, and as the aged are seldom able to engage in the pursuits of youth, they cannot appreciate the nobler pursuits of life which might once have been theirs.

"Every occupation is a little world in itself. There are pleasures peculiar to it and a philosophy that is its own. The lumberman sees the beauty of the primeval forest with its pines and hemlocks murmuring in the breeze, the snow of winter and the grass of summer. The breath of the balsam is for him and the peace of the mighty solitude. The sailor has in his world the dark blue ocean and the glory of God's works upon the sea. "They that go down to the sea in ships, that do business in great waters, these see the works of the Lord, and his wonders in the deep." Many in their "little world" fail to see the beauty, to learn the lessons, and to appreciate the philosophy; and of none may this be so truly said as of them who make haste to be rich and are blinded by their desires.

Striking With a Split Stick.
"Men think that the money is theirs, forgetting that it is God's. The image is Caesar's, the gold is God's; and for its use men must account to God.

"By many, success is supposed to atone for faults and to determine merit. What error! What is success in the market place? A number of men combine, rightly believing that in union there is strength. They obtain a corner on some commodity and advance the price higher than it has been for years. They think they are safe because they are in control, and have they not pledged their word to stand together? But one rogue breaks his word and sells and sells while the price is rising. The combination is broken, and the rogue who was false has made millions, his portrait is in the magazines and he is applauded as an able financier and a success. But he is only a liar and a cheat. Cheating injures the cheat as well as the victim. Cheating is like striking with a split stick; it hurts the person struck and stings the hand that delivers the blow.

"In the pursuit of gold a man often begins well, but the love of money grows until it is a fire within him and he falls into temptation and a snare. At first he promises well, he will aid his family; he will be charitable; he will be a public benefactor. But he grows in his desire to be rich faster than he can afford, like the tree that makes wood too rapidly, and when he becomes rich he cannot properly control his wealth, for his nature has changed, he has become vulgar and coarse and will not do what he promised and what he intended to do.

"The greed for money prevents men from taking advice, and they feel that while others have perished, disaster is not for them and they will succeed. The minister may warn them from the pulpit and they report that he had better confine his attention to preaching the gospel, and not discuss what he does not understand. Their old fathers warn them, and they say that times have changed, that old, worn-out cliche methods are useless now. The old merchant advises caution, and they declare that they must be abreast of the times.

Wealth Grinds Money Lover.

"A man learns to live with his money, thinks of it, gloats over it and is fascinated by it. The love of wealth grinds him as a grindstone

EASY WORK

the backache, the headache, the nervousness and other ills which are the result of womanly diseases.

"I suffered from female weakness for five months," writes Miss Belle Hedrick, of Nye, Putnam Co., W. Va. "I was treated by a good physician but he never seemed to do me any good. I wrote to Dr. R. V. Pierce for advice, which I received, telling me to take his 'Favorite Prescription' and 'Golden Medical Discovery.' When I had used the medicines a month, my health was much improved. It has continued to improve until now I can work at almost all kinds of housework, but I still have gained several pounds in weight. Dr. Pierce's medicines have done wonderfully well here. I would advise all who suffer from chronic diseases to write to Dr. Pierce."

"Favorite Prescription" makes weak women strong, sick women well. Accepts no substitute for the medicine which works wonders for weak women. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of customs and mailing only. Send 31 one-cent stamps for the paper-covered book, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

whats steel. On the farm the grindstone was placed in the shade of the apple tree and at the noon hour the scythes were ground. A man is ground and sharpened by money. He begins to look at other men to calculate how much he may cut from them.

"What evil springs from the love of wealth? It breeds extravagance. Having made money and lived in splendid and extravagant fashion, men begin sometimes to fail, and when reduced in wealth they dare not curtail their expenditure, for a reduction in the cost of living would arouse the suspicion of watchful creditors or competitors. How many are living in gorgeous and extravagant misery!

"In the race for gold there is intense excitement, and, feeling the need of stimulant, men crave drink and with drink come other evils.

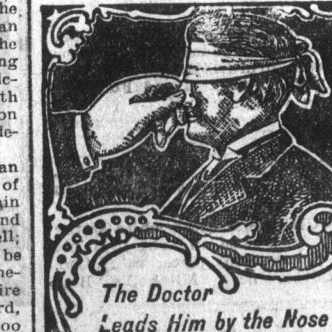

How Tough the Old Man Is.

"The love of money makes the heart hard and callous, and the bond of affection which unites the family will be destroyed. Children lose both love and respect for their parents and wait impatiently for their father's money. How tough the old man is! Who would have thought he would have lived so long! There never was trouble in the home before; there is trouble previous to his father's death; there is trouble when he dies; the will is contested in a suit at law; and discord is king.

Money, if properly used, is a blessing. It is a good servant and a poor master. It may be an aid to happiness, but it is a curse will not bring it. Loving kindness, genuine sympathy, unadulterated taste and freedom from dissipation will bring happiness when wealth will fail. If a man has an old father, mother or any helpless relative depending upon him, it is his duty to lay up money to provide for them. Money, thus used, is a blessing. It may be foolish to lay up money for sons who, knowing of it, will not apply themselves to any honest toil; money then is a curse.

"Money is a blessing or a curse according to its use. It is like gravel, for if it is in a great heap it will impede travel; and if it is applied to the highways it will benefit all. It is like water, for in rain it will cause the earth to blossom, and in a flood it will destroy. In itself money is a good thing, for it may relieve distress and make a land smile with plenty. Many use it well, and men and women who have been sitting in great darkness."

The Doctor Leads Him by the Nose

Ninety-nine hearts out of a hundred are filled to do their work. There may be no pain there, but it is felt somewhere for some organ is robbed of its proper need of blood by this insidious heart failure, and distress follows. Common sense says, cure where the trouble and pain begin. Use

DR. AGNEW'S HEART CURE, because it begins at the blood's distributing organ, beating that rapidly and making it strong and able, quickly sends strength and health to every other organ. It is the only way that combines science and sense and relieves and cures.

HENRY AXEY, of Peterboro, Ont., writes: "I suffered with my heart, nerves and general debility. The best doctors said I must die within a month. On my wife's advice I tried DR. AGNEW'S HEART CURE. Relief from the first dose. I am fully cured. Weighed 128 pounds—now 160 pounds."

DR. AGNEW'S HEART CURE will drive the heart away from the chest, and restore it to its proper position, and give it the strength and power to do its work. Sold by Messrs. Gunn and McLaren, Druggists, Chatham.

THE NEW MOWN HAY.

Along the shaded lone concession way
At sundown, when the sky turns grey,
The dew drops down and sucks aloft
The small elusive, subtle, soft,
Of new-mown hay.

The farmer boy—his feet may far off stray
Down many a weary, strange and heated way—
It helps a headache if he smells
Even in a dream the breath that swells
From new-mown hay.
How many perfumes come and go, but they
Are half forgotten in the freshening day—
On mountain, mere, on sand and sod
There is no smell this side of God
Like new-mown hay.

SUMMER READING.

A View of the Subject That Much May Be Said in Favor Of.

English weeklies, one and all lament over the decline of literary taste and pursuits in England; and a great deal of the depression in the book trade they ascribe to the rage for "bridges" within the house, and out-of-door pastimes. Now we are inclined to think that the rage for "speed" is at the root of the evil, says The Toronto News. It has destroyed the taste for books in several ways, and, first and foremost, by bringing the art of writing down to the level of "book making." The rate at which authors are expected to conceive, arrange, and develop their wares has resulted in an immense quantity of unwholesome food being put on the market. Literary indigestion is the outcome. The men and women who rush madly through the air in their motor cars, who fly from city to country in yachts, who are forever receiving new impressions which obliterate those of the moment before, can have no possible corner in their receptive brain-cells left for the written impressions which have taken even months to ripen.

Let Canadians rejoice that nature and circumstances have not yet handed our people in the vortex of speed. We may safely look forward to at least a month or three weeks of weather, when the strenuous President of the United States would be compelled from sheer muscular relaxation to "put on the brakes." The state of the roads in Canada preclude the chance of the motor car disturbing the tranquility of the inhabitants, and endangering the lives of the live stock of rural Canada. There will be hot days in July and August when, for some hours at least, a "shady nook and well-bound book" will be the only possible solution of existence. Lampanian has drawn a picture of an ideal Canadian summer's day in his poem "Heat."

"In the sloped shadow of my head,
I lean at rest, and drain the heat;
Nay more, I think some blessed power
Has brought me wandering idly
here;
In the full furnace of this hour
My thoughts grow keen and clear."

The quality of brain power during the mid-summer heat is exactly that of all that is best in literature. Business, for the average Canadian is fairly at a standstill. Households are not run at concert pitch. The intellectual, rather than the intelligent, portion of the human mechanism is in the ascendant. Out of door lounging is conducive to reverie, and the absorption of abstract ideas. "It is in the fight and battle of life we learn and grow, and during the hours of rest and lassitude that we gain understanding, that makes the fullness of life."

A big library in a summer house is a mistake; one or two good books, a magazine or two, and the daily paper, will suffice. But a summer devoid of books, even for those who are indefatigable readers during the rest of the year, is a mistake, for the very quality of intellectual power which comes with what Lampanian calls the "full furnace of the hour" is one for which the most casual, as well as the most devout book-lover, may be thankful, as all Canadians may be thankful for a climate which insists upon their enjoying sylvan as well as intellectual pleasures at the same period.

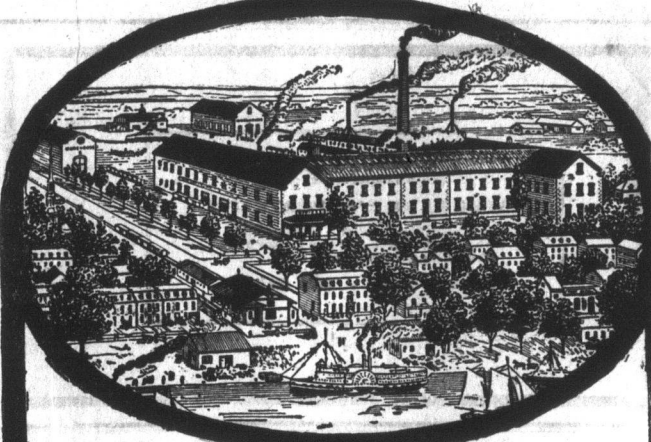

One Theory of Music.

He was whistling "Annie Laurie" while he worked. Now, Annie Laurie was apparently a lovely girl, and her music is captivating, but she's not slow and this particular worker was whistling her about as slow as the "Dead March," and his hand kept time. He was only polishing a door plate, but it would have been all the same had he been doing anything else, for music has a subtle influence over the human soul, and through that over the human body. When the general wants to cheer his troops up he doesn't start the band playing mournful airs, when he wants his troops to step quickly he has the band play lively airs.

It seems to me that if I were an employer of labor, which I probably will be if I live to be about a million, I'd have a band hired to stay around the factory and play lively airs, and if I couldn't have a band I'd rent a piano and get some girl to play ragtime melodies and jigs and two-steps, and I think that besides giving the hands pleasure the experiment would pay me because the hands would keep time with the music.—H.D.C., in Toronto Star.

The Abitibi Waterpower.

Mr. Vaughan Roberts, C. E., D. L. S., has just returned from exploring some of Ontario's North Lands. As a sample of Ontario's great natural wealth he instances the Abitibi River, which at a distance of a hundred miles from its junction with the Moose averages four hundred feet in width, contains numbers of magnificent water powers, awaiting development, varying from 15,000 to 150,000 horse power each. The banks of the river are lined with the best of pulpwood of all descriptions, which is practically valueless, however, until it is made available by the construction of a railway into the territory.

Advantages to the New Generation.
He—Yes; I suppose it was awfully good of the "governor" to leave me this place, but I don't care for it. He was too practical a man to have really good taste.
She—Still, you ought to be glad to have a place like this to rest in after your father's labors.—Brooklyn Life.

Wanted to Have It Over.
"Mamma," said Bennie as there came a brief pause in the conversation on the part of the callers, "Isn't it time for you to ask me what I learned at the kindergarten today? If you don't do it pretty soon, I'll forget what you told me to say."—Chicago Tribune.

Unsatisfactory.
"I tried the plan of thinking things before speaking," he said, "but it didn't work."
"No?"
"Well, hardly. Why, by the time I'd thought twice my wife had me roasted to a finish."—Chicago Post.

Close and Cautious.
"They are continually quarreling, and yet he persists in saying that she is near and dear to him."
"Correct. He means that she hangs to his coat tails and buys lace dresses and imported bonnets."—Baltimore News.

THE RED CROSS DRUG STORE.

With the changed and improved appearance of our store comes a change in the name. We have adopted this name because we wish to make this

The Distinctive Store of Chatham.

We want this to be a store unlike any other you have ever known—a store which shall in every respect meet the requirements of this community. By constantly placing the interests of our customers before our own, we shall earnestly endeavor to make this a place where you will like to trade and where you will always feel at home. We shall continue to improve and add to our stock, and, as heretofore, our prices shall be as low and fair as can be had anywhere for the quality of goods we sell.

STRUCK BY A TRAIN.

Henry Campbell's Scalp Torn Off—Thos. Thompson's Back Broken.

Stratford, Aug. 18.—Henry Campbell, a section employee in the G. T. R. yards at Atwood, was struck by a train there this morning and received injuries which it is thought he cannot survive. He did not hear the approaching train, to which his back was turned. His scalp was almost completely torn off, one of his legs was broken in two places, and he received internal injuries. Campbell is about fifty years old and a married man.

Thomas Thomson, sectionman of the G.T.R. at Blyth, was removed to the hospital here yesterday with a broken back. He is in a critical condition, but slight hopes are entertained for his recovery. He was riding to his home on the wagon of a merchant when a bolt broke and the wagon tipped over. Thomson was pinned under it and sustained a fracture of the spine. He is thirty-five years of age, and is unmarried, but is the sole support of his mother and sister.

KILLED BY TURKS.

Terrible Stories From Various Parts of Macedonia—Females Slain.

Berlin, Aug. 18.—According to a despatch received by The Frankfort Zeitung, the river near Monastir, Macedonia, is full of the mutilated bodies of women and children who have been massacred by bashi-bazouks.

Sofia, Aug. 18.—A despatch received here from Uskub says that 600 bashi-bazouks, under the command of Albanian chiefs, who are notoriously cruel, have pillaged and destroyed a number of Christian villages in the districts of Debre and Okrida. The Turkish authorities, it is added, connived at the outrages, and furnished the bashi-bazouks with old uniforms, so that they might appear to be regular soldiers.

Constantinople, Aug. 18.—A despatch from Salonica says two persons were killed, a number of people were injured and several cars were destroyed by an explosion which occurred yesterday on the railroad between Amatori and Karazoni.

Constantinople, Aug. 18.—An Imperial trade has been issued calling out fifty-two additional battalions of troops (about 52,000 men) from the European Provinces of Turkey, in consequence of the spread of the insurrection in Macedonia. These troops comprise twenty battalions of reserves of the first-class from the Adrianople and Salonica army corps. The balance are reserves of the second-class.

St. Petersburg, Aug. 18.—The squadron of the Russian Black Sea fleet, under orders to sail for Turkish waters, consists of the battleships Catherine II, Tri Sviatitelia, Rostislav and Dvenadzat Apostoloff, four torpedo boat destroyers, and six mine and torpedo transports. The squadron arrived at Sebastopol yesterday preparatory to sailing last night for the Turkish coast, under command of Rear Admiral Krueger.

"A SUMMER FAIRYLAND."

To those who are planning a summer outing and seeking "green fields and pastures new," some place where they may cast care aside and commune with primitive nature, where, though the sun shines ever brightly, cooling breezes always blow and great heat is unknown, it is safely promised that among the rocks and lakes of the Muskoka district, about 100 miles north of Toronto, situate in the Highlands of Ontario, (1,000 feet above sea level), they will find enchantment.

Handsome, illustrated, descriptive publications will be sent free to any address on application to W. E. Rispen, City Pass. Agt., 115 King Street, Chatham.

SELF-INDUCED ILLMENTS.

The Folly of Nursing the Habit of Not Feeling Well.

Few people realize that their ailments are largely self-induced, says O. S. Madden in Success. They get into a habit of not feeling well. If they get up in the morning with a slight headache or some other trifling indisposition, instead of trying to rise above this condition they take a positive pleasure in expatiating upon their feelings to any one who will listen. Instead of combating the tendency to illness, by filling the lungs with pure, fresh air they dose themselves with "headache tablets" or some other patent specific warranted to cure whatever ill they think they are suffering from. They begin to pity themselves and try to attract pity and sympathy from others. Unconsciously by dwelling upon their symptoms they re-enforce the first simple suggestions of illness by a whole army of thoughts and fears and images of disease until they are unfitted to do a day's work in their homes or offices.

There is greater danger that young girls who are delicate while growing up and lounge around the house and lie down whenever they feel the least bit out of sorts will form a habit of invalidism when they reach maturity.

How often do we see such girls "brace up" at once when anything happens which interests or excites them! An invitation to a reception or a ball or any other pleasant social function acts like a tonic. For the time being an instantaneous cure is effected. They are as well as anybody until after the entertainment.

Indulgent mothers are frequently to blame for this physical and mental laziness, for it is nothing more, on the part of their daughters. A lounge or sofa is a positive curse in many a home, because it is such a temptation to lie down and succumb to trifling suggestions of illness or the least indisposition. A habit of giving in whenever you "don't feel like it" is fatal to all achievement and ruinous to self discipline, self poise and nobility and dignity of bearing.

THE AURORA BOREALIS.

A Spectacle That is Magnificent in its Impressiveness.

It was a trifle past the afterglow of sunset, and the sea was a deep rich purple, with long flowing swells. The sky, a fine light turquoise blue at horizon, gradually deepened into a rich cobalt, in which a few stars twinkled. A majority of the men were absorbed in various occupations below when a call of enthusiasm brought all up on deck. At a point low on the southwest horizon a faint film had arisen, which quickly, silently assumed the form of a curtain, waving and mounting upward in two stately columns past a group of finely shaped cirrostratus. In a few seconds it was across the zenith, displaying beautiful pale yellows, greens and delicate pink and blue lights, with edgings at intervals of faint purple and red. The columns descended rapidly in ever varying spirals of perspective until the avant garde was lost behind the far northwest horizon.

We were about off the Danish port of Godthaab, Greenland, a sufficiently southern latitude at this season for the alternation of day and night, and as the heavens darkened the stars shone with increasing brightness through this great shimmering veil of light.

The heavens and the sea grew darker and darker, and the aurora brighter and brighter in lightning changes of form and color, with the green and yellow and blue rays predominating and the delicate sheen from the aurora's light writhing in fiery serpent forms over the face of the moving waters. What impressiveness, what magnificence! It held the soul in a spell. There was not much talking. Splendid as it was, I afterward witnessed auroras which produced a deeper impression, due doubtless to the presence of the long night of the far north.

Arizona Sunshine.

To one who has been there, says Caspar W. Hodgson in Sunset Magazine, the name Arizona, first of all, suggests sunshine and plenty of it. Nowhere on the globe is sunshine more abundant, more appreciated or more harmless. Indeed, a sunstroke has never been recorded in this territory. Though all good Arizonians have crossed the Hualapai river, which act, according to tradition, divests one of the power to tell the truth, I believe their records are accurate as to sunstroke. The explanation is found in the fact that heat is not so much a matter of thermometer as of humidity.

The dry, hot air of the Arizona desert is invigorating to the initiated. One can learn to love the desert. There the sunrises and sunsets are intensely beautiful and nowhere on earth richer in color. This is sometimes called Sunset Land. It might also be called Land of Sunrise.—Sunset Magazine.

Retraction.

"Look here, Mr. Editor," explained an irate caller, "you referred to me yesterday as a reformed drunkard. You must apologize or I'll sue your paper for libel."

"Very well, sir," replied the editor. "I'll retract the statement cheerfully. I'll say you haven't reformed."

THE THINGS WE LEAVE UNDONE.

It isn't the thing you do, dear,
It's the thing you leave undone,
Which gives you a bit of heartache
At the setting of the sun.
The tender word forgotten,
The letter you did not write,
The fever you might have sent, dear,
Are your haunting ghosts to-night.

The stone you might have lifted
Out of a brother's way,
The bit of heartsome counsel
You were hurried too much to say,
The loving touch of the hand, dear,
The gentle and winsome tone,
That you had no time or thought for
With troubles enough of your own.

These little acts of kindness
So easily out of mind,
These chances to be angels
Which even mortals find,
They come in night and silence,
Each chill, reproachful writhing,
When hope is faint and fagging
And a blight has dropped on life.

For life is all too short, dear,
And sorrow is all too great
To suffer our slow compassion
That tarries until too late;
And it's not the thing you do, dear,
It's the thing you leave undone
Which gives you the bitter heartache
At the setting of the sun.

Sawdust and Fish Life.

"Sawdust and Fish Life" is the title of a brochure recently issued. A reprint from the Transactions of the Canadian Institute, it is the record of a series of experiments made by Professor A. P. Knight, of Queen's University. An ancient feud subsists between the angler and the sawmill owners, and Professor Knight's investigations will be watched with great interest by the parties thereto. His conclusions go to show that there are two sides to the question, and also that there is need of further investigation. Undoubtedly, strong solutions of sawdust are deadly to fish life. But the weakest of the solutions which he used was thirty or forty times as strong in sawdust extracts as the water immediately below a specimen mill on the Bonnechere River, and in this water chub and brook trout were found. "No stream," he says, "can be pronounced off hand as poisoned by sawdust. Each stream must be studied by itself, and the varying conditions must be thoroughly understood before a judgment can be pronounced. The chief things to be considered are (1) the quantity of sawdust, and (2) the volume of water into which the sawdust is discharged. Subordinate conditions are the rapidity or sluggishness of the stream, the amount of sunlight or shade, and the character of the water, whether from agricultural lands or from primitive forests."

"What is the Press?"

The Levis Quotidian has discovered the answer to the question, "What is the Press?" As it is calculated to give a new sense of dignity and superiority to even the junior reporter, we reproduce it herewith, somewhat damaged in translation, says The Toronto News. "The Press is one or more men who, in a solitary chamber, thinking and writing in the interests of the fellows, who, more fortunate than themselves, are frequenting concerts, theatres and so on in the sole intent of procuring their own delight. The journalist, too, goes to the theatre, to the concert, to the circus, the public festival; but he goes in a frame of mind quite different from that of the ordinary spectator. He goes in duty bound, to see that which is reprehensible, is evil, is calculated in a word to compromise the honor, the dignity, the morality of man. He takes his notes and returns to the office, not to surrender to delicious reflection on the beauty of his eyes have seen and the charm his ears have heard, but to set forth and put down on paper what there has been of good and of evil, to the end of warning and instructing the public, of keeping it so far as may be in the right way. In one word, he preaches in his newspaper a lay sermon."

Canada Outstrips the States.

Most of us to the southward of the border have been so occupied with our own individual and national affairs that we have failed to note what has been done by our Canadian neighbors, says The New York Sun. In energy the Canadians are now our rivals; in achievement they have perhaps outstripped us. If the foreign commerce of the United States, per capita of total population, corresponded with that of Canada, our exports and imports would aggregate six billions of dollars per year instead of their present two and one-fourth billions. In other words, the total foreign commerce of the United States approximates \$30 per capita, whereas that of Canada approximates \$80. Her railway activity, in its proportion to population, within recent years has outstripped our own. Vast areas which a few years ago were known only to Indians and trappers are now covered with towns, villages and thrifty farms. A generation has seen her railway mileage and her freight traffic multiplied by twenty and her railway equipment and her passenger traffic multiplied by ten.

Canada's Holiday Resorts.

Besides being a great country to work in, Canada is a very beautiful place in which to holiday. Down South they have long admitted the truth of the latter statement, as the yearly increasing throng of visitors testifies. Nor have we ourselves been blind to the fact, though as a nation we have done little to advertise our sylvan wares. Year by year, however, the fame of Canada's summer glories is spreading. Quiet nooks where we used to sprawl in lazy enjoyment are taking on the hectic appearance of fashionable resorts. Where once the picturesque canoe alone was seen, steam launches and luxurious yachts now cruise. The old farmhouse, where people could get board for about \$2 a week, has been transformed into a fashionable hotel.

BLOOD POISON

On account of its terrible effects, blood disease is called the king of all diseases. It may be either hereditary or contracted; so while it may not be a crime to have the disease, it is a crime to permit it to remain in the system. It may manifest itself in the form of Scrofula, Eczema, rheumatic pain, stiff or swollen joints, sore throat, falling out of hair, disordered stomach, and a general depression of the system. If you have any of these symptoms don't neglect yourself. You have become a victim of Quack and Fakery. DR. KENNEDY & KERGAN'S NEW METHOD OF TREATMENT is guaranteed to cure this disease, never to return. Bank Bonds will protect you. Our treatment is not injurious in any way, but reaches the very root of the disease and eliminates all poisons from the system. The symptoms of disease gradually disappear. The blood becomes pure and enriched, the whole system is cleansed and purified, and the patient feels prepared anew for the duties and the pleasures of life. **CURES GUARANTEED OR NO PAY. 25 Years in Detroit. 250,000 Cured.**

AN MAKE MEN SOUND AND STRONG

Treat Specialist Discovers Something Entirely New For the Cure of Men's Diseases in Their Own Homes.

YOU PAY ONLY IF CURED

Requires No Money Unless He Cures You. Method and Full Particulars Sent Free. Write for it This Very Day.

A Detroit specialist who has 14 certificates and diplomas from colleges of medical boards, has perfected a startling method of curing the diseases of men in their own homes, and so that there may be no doubt in the mind of any man that he has both the shield and the ability to do as he

DR. S. GOLDBERG.

he is the possessor of 14 diplomas and certificates from medical boards, and he does not earn.

Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their names and addresses. He wants to hear from men who have suffered that they have been unable to get cured, prevalent conditions, sexual weakness, varicose veins, hemorrhoids, blood poisoning, hydrocele, inflammation of parts, impotency, etc. This wonderful method not only cures the condition itself, but likewise all complications, such as rheumatism, bladder or kidney trouble, heart disease, etc.

Dr. Goldberg realizes that it is one of the claims and another thing to him, so he has made a rule to ask for money unless he cures them when you are cured he feels that you will willingly pay him a fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and pay your case before him. He sends the method as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him, Dr. S. Goldberg, 208 Woodward Avenue, Room P, Detroit, Mich., and he will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

POPULAR ASTRONOMY.

New Amateur Observers May Study the Sun—The Sun's several Layers—Planets Visible in August.

These brief notes on the phenomena of the sky will be issued monthly, and are intended for those who, without making pretence to much learning in astronomy, are yet interested in the heavenly bodies, their appearance, nature and movements. writes "Astro" in The Globe. Events of note will be drawn attention to, and brief descriptions given of those features which, while old, are ever new and wonderful to the observer.

Observational astronomy is by no means limited to the hours of darkness. Every day almost we have opportunity to study that orb upon which we might well say, physically, we depend for existence, the sun. Ever since the telescope was first used to examine the heavenly bodies, the sun has been favored with great attention. In looking directly at it through any telescope, screen, or dark glass must be used. Various appliances, all somewhat expensive, are used to temper the brilliancy of the rays, but the amateur generally makes use of a piece of London smoked glass. Anyone who has a small hand telescope can view the solar surface by the projection method. Arrange your telescope at a window, so that the object glass is some inches outside the window and pointing to the sun. Let the window be covered with somewhat dense curtains or other opaque material. Then upon a sheet of white cardboard, placed a few inches away from the eyepiece end, an image of the sun some six or eight inches in diameter will be seen. The smaller the image the brighter it will be. The cardboard must be at right angles to the axis of the telescope. By adjusting the eyepiece the image can be made very sharp. Any spots will then be visible. One cannot say that the method is as satisfactory as that of direct vision, but it is an excellent one for small glasses. A record by means of sketches of the spots should be kept. Spots are now occurring more frequently than for some years past.

Few people have an idea of the enormous size of the sun. Its diameter is 865,000 miles. Were the sun placed at the centre of the sun, the moon, which seems far enough away, would be a little more than half way out to the visible surface of the sun. We say visible surface, for as a matter of fact the sun consists of several layers, the innermost of which (the photosphere) is the one we ordinarily see. Outside of this lies the chromosphere, a shell of incandescent gases, and outside of that again the mysterious corona. This last can only be seen during the few moments of totality at the solar eclipse. The chromosphere can be rendered visible by a clever application of the spectroscopic.

In the moon the amateur observer can find a never-fading object of interest. Even a small telescope will reveal features of her strange scenery. Look along the terminator (i.e., the concave edge of the crescent, or, waning, moon), and the detail, as brought out by the strong shadows, will prove highly interesting. The fifth, eighth and tenth days of the moon's age are especially fine time for moon-gazing. At present four of the major planets are visible. Venus is the brilliant star visible in the west in early evening; Mars is near the star Spica, in the constellation Virgo, and is seen in the west also in the early evening. Saturn is on the meridian on August 11, shortly before midnight. During that month he will be well placed for observation. Look for him in the constellation Capricorn. Jupiter may be seen about midnight as a brilliant star low down in the southeastern sky.

The present is a fine time to become acquainted with some of the summer constellations. On August 15, at 9 p. m., the following constellations may be traced: Overhead, Lyra, with the brilliant star Vega; Cygnus, sometimes called the Northern Cross. Low down in the south-west will be seen Scorpio; in the west Libra and Serpens; and in the northwest Bootes and Corona Borealis. Due south, yet high up in the sky, is Aquila, easily recognized as a large V-shaped constellation. Immediately east of it is Delphinus, with its little diamond-shaped figure; and still further east Pegasus, with its great square, and Andromeda, with its slightly curved long line of three stars, one of these forming a corner of the square of Pegasus.

Full moon occurs on the 8th August, last quarter 16th August, new on 22nd, and first quarter on 29th. Of late a small, yet quite visible, comet has been crossing the northern constellations at a rapid rate. It is recognizable as a hazy patch of light. On July 23 it was close to Alpha Draconis. It will soon vanish, as it is very quickly nearing the sun. The writer, using a very low power on his three-inch telescope, saw it well several times in July, though the frequency of wet, hazy evenings greatly interfered with observations. It had a well-defined nucleus surrounded by a mass of dimmer material, and had a short, somewhat ill-defined tail.

The World's Railways.

The total number of miles of railway now open for traffic in the entire world is estimated at about half a million, of which over two hundred and twenty thousand are in North America, about a hundred and seventy thousand are in Europe, something less than forty thousand are in Asia, about thirty thousand are in South America, about sixteen thousand are in Africa, and something over fifteen thousand are in Australasia. In the list of nations the United States comes first, having 199,376 miles of railway (Bureau of Statistics figures at the beginning of 1902), other nations coming in the following order: Russia, German Empire, France, India, Austria-Hungary, Great Britain and Ireland, Canada, British Australasia, Argentina, Italy, Mexico, Brazil and Spain.

CURED LONG AGO BUT STILL CURED

S. Kernohan's Incurable Disease Cured by Dodd's Kidney Pills.

Five Doctors Agreed there was no Hope for Him, but He Has Been Strong and Well for Years.

Gelert, Ont., Aug. 17.—Special.—The wonderful cures by Dodd's Kidney Pills published almost daily, recall the case of Samuel Kernohan, of this place. It is years now since he was cured, but as he is still cured it is well worth recalling the facts, and Mr. Kernohan delights to relate them. "Some time in December, 1893," he says, "I was taken sick and laid up for fourteen months. During my confinement to my house and to my bed I was attended at various times by five doctors. Three of them decided that my disease was incurable. Floating Kidney, and two of them that it was Spinal Disease. All agreed on one thing—that my case was incurable.

"When my money was all gone, as a matter of necessity, and as my bed had only taken three boxes when I was able to walk about. I took in all eighteen boxes, when I was entirely cured and quite able to work. "Dodd's Kidney Pills are the best friend I ever found."

His Harvest.

"Young Briefly has only been admitted to the bar a week when he made fortune. He was caught in a railroad wreck in which forty people were injured."

"And he was one of those who got damages." "He was all of them. He got all the victims to retain him."—Philadelphia Public Ledger.

REWARE OF OINTMENTS FOR CATARRH THAT CONTAIN MERCURY.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them. Hall's Catarrh Cure, of Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co., Testimonials freely furnished. Sold by Druggists. Price, 75c. per bottle.

Hall's Family Pills are the best.

When a man is under a cloud you can't always convince him that it has a silver lining.

"Cleanliness is next to Godliness." Dirt and depravity go hand in hand. This is just as true of the inside of the body as of the outside. Constipation clogs the body and the mind. Constipation means that corruption breeding in the body, poisoning the blood with its foul emanations, befogging the brain with its faint exhalations. Constipation is the beginning of more diseases than, perhaps, any other single disorder. The consequences of constipation are legion. Headache, pain in the side, shortness of breath, undue fullness after eating, coolness of the extremities, nervousness, indecision, lassitude, dizziness, flatulence, and a score of other ailments are directly caused by constipation. Cure constipation and you cure its consequences. The quickest cure of this evil is obtained by the use of Dr. Pierce's Pleasant Pellets. They are small in size but wonderful in result. They cure permanently. They contain no injurious ingredients. They are pleasant to take and do not "pill" the habit. Ask your druggist for them. Send 31 one-cent stamps, the expense of mailing and customs, and receive Dr. Pierce's Common Sense Medical Adviser, in paper covers. This work contains 1008 pages and 700 illustrations. For 50 stamps it can be had in substantial cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

The Customs of the Country.

There was once a Newfoundland fisherman—he chanced to be a Catholic—who in old age came to die. He had lived in debt all his life and, no doubt, had never once given his whole catch to the dealer who supplied him, but had wrongfully slipped many a quintal over the side of a rival schooner and traded it out on the spot.

"Send for Fawther Rafferty," he said. "Send immediate!"

He wanted to confess his sins, to be shriven and to depart in peace, but his old priest had been transferred to Trinity Bay. A young man, just back from Rome, was now the spiritual head of the parish.

"Sure, 'tis Fawther Codlin," they told him.

"Fawther Codlin's a fine young man—a clever young man, I doubt not, but 'tis old Fawther Rafferty I want to hear me confession."

"An' why?" they asked.

"Sure," the dying man gasped, "he knows the custom of the country."—Norman Duncan in World's Work.

Ancient Table Manners.

A description of a dinner given in 1350 shows that there has been a vast improvement in table manners since then. As a rule, one knife had to serve for two people, and often a bowl of soup was used by two persons. For this reason the party giving the dinner arranged his guests in couples, trying to place people together who would be congenial and not adverse to this common use of table appointments.

Spoons were seldom supplied to the guests, and the soup was drunk directly from the bowl, the latter usually having side handles by which it was held. In less refined company there were no separate soup bowls, only one large porringer, which was passed around to the guests in turn. The diners helped themselves to the pieces of meat they desired from the common dish with their fingers.

Napkins were considered a luxury, and were only provided in very aristocratic and wealthy families.—Philadelphia Inquirer.

Sponge Growing.

Sponges are cultivated in West Indian waters and the Mediterranean. In its natural state the bath or toilet sponge is fleshy and covered with a black skin. To obtain the light colored, horny and elastic skeleton, sponges are left in shallow sea water for several days in a staked inclosure until the rotten animal matter can be beaten out. For artificial cultivation a living sponge is cut into small blocks, about a cubic inch in size, with a portion of the outer skin on each. These, fixed to a frame of weighted trellis-work, are sunk into a few fathoms of clear water, where they flourish best on a bottom of green seaweed free from mud. In about seven years the cuttings grow into sponges of marketable size.

A Caustic Retort.

An Englishman of somewhat questionable reputation, who was criticising the American way of spelling, once turned to Maurice Barrymore, the actor, and said: "I'll leave it to Mr. Barrymore. Is it right to leave out the 'u' in such words as harbor, neighbor, honor, candor, etc?" "Well, about harbor and neighbor I am not sure," replied Barrymore, "but when it comes to honor and candor I leave you out."

Oranges and Tobacco.

"Did you ever notice," asked a well known physician the other day, "that men who eat oranges are not much injured by smoking? It is a fact. Orange juice has the faculty of neutralizing nicotine, and that is the reason. I have seen men weakened and even made ill by excessive smoking, and a few oranges were all that was necessary to straighten them out."—Philadelphia Record.

Cause For Pride.

Wanton—What's the matter, Blankley? You're all out about and your arm in a sling, as though you had been in a fight, and yet you look beaming and smiling over it all.

Blankley—The fact is I have all along thought my boy Harold a sort of muf, and the other day I undertook to give him some boxing lessons. This is the result of the first lesson. Oh, I'm proud of that boy!

He Was Competent Himself.

Bobby's father was breaking the news to him.

"How would you like to have a little brother, Bob?" he asked.

"First rate," replied the youngster cheerfully. Then he reflected a minute. "No," he said slowly. "I guess, after all, I'd rather have a sister. I'm a boy myself, you know."—New York Tribune.

Propinquity of Now and Then.

"Bigglesworth isn't addicted to drink, is he?"

"Addicted? Oh, no. Of course he takes a glass now and then."

"I see I must modify my question. Doesn't Bigglesworth let his 'now' blend with his 'then' a little too frequently?"—Cleveland Plain Dealer.

A Question of Courage.

Phyllis—Yes, he was paying attention to her quite a long time.

Blanche—Perhaps he hadn't the courage to propose.

Phyllis—Oh, I don't know. Perhaps he had the courage not to propose.—Town and Country.

An Obstinate Man.

"Is it true the jury disagreed in that murder case?"

"Yes; they say there was one blamed crank that held out for conviction the man who done the killing."—Chicago Tribune.

VALUABLE STOCK

Mr. Jas. Chinick has just returned from Hamilton, where he attended the great dispersion sale of short-horns of the late Hon. Senator M. H. Cochrane, who had been a successful breeder and importer for upwards of forty years. The sale was very largely attended by all interested in that particular line. One noticeable feature was the large number of ladies present. One of the largest purchasers was Sir Wm. VanHorne, who got five of the best young things for his ranch at Selkirk, Man. There were fifty females sold, 33 of them imported at an average of \$287.00, and seven bulls at an average of \$131.50, the 37 head averaging \$207.55.

Partial list of sale:—
Imp. Lester's Pride, 2 yr., Sir Wm. VanHorne, \$800.

THE WORLD'S RECORD

"The man laying these gas mains put in a big day's work one day last week," remarked Ab. Savage, civic inspector, ex-ambassador to the Planet, this morning. "A gang of sixteen men placed 55 of those 24 foot 8-inch mains in the nine hours. Mr. Wigle, the contractor, says it was the record for laying mains for artificial gas."

HAMILTON CARNIVAL OPENS.

Citizens Extend Warm Welcome to Visitors.

Hamilton, Aug. 10.—Every citizen did his or her best yesterday to make the first day of the Summer Carnival most enjoyable for the thousands of visitors, who have arrived for the four days' celebration. Hamilton never looked prettier. The streets are crowded with people bent upon making the old boys feel at home. A cordial welcome was extended to all yesterday who called at the carnival headquarters on King street east and registered. The committee who have the arrangements in hand are delighted with the results of their labors, which have extended over a period of several months, and the indications are that the immense success of the carnival will be their reward.

Merchants and others who have gone to a lot of expense fitting up their premises and homes are to be congratulated for what they have done in the way of putting the city in holiday attire. Flags and bunting are to be seen on all sides.

The carnival colors of, course predominate, but there is a good display of red, white and blue, and American flags are entwined with the Union Jack in honor of the old boys from across the line. Everyone seems to have had the good idea that what was needed was to cover the building fronts with bunting and flags. Gore Park and the Gore exterior are particularly attractive, and this adds to the general attractiveness of things. Yesterday nothing was done by the citizens and visitors, save to move around freely meeting and exchanging greetings with friends. Beyond a lacrosse match in afternoon and a massed band concert at Dundurn Park last night, there was very little to attract the attention of the visitors and citizens from the main streets, which are overcrowded.

Open Door in China.

Washington, Aug. 17.—United States Minister Conger, at Peking, has secured a written promise from Prince Ching to sign on October 8 a treaty with the United States, which will include a guarantee that Mukden and Tatsungiao shall be open ports.

PURITY. LAGER BEER

"The Beer That is Brewed in Glass"

Steel tanks, glass lined, are cleaner than wood can ever be, and an inspection of our closed, glass lined tanks will convince anyone of their undoubted advantage in that great essential of a successful brewery, viz., CLEALINERS.

Our beer differs in no way from a beer perfectly fermented in open tanks, providing the cellars, the tanks and the atmosphere in which the beer is fermented are absolutely free from bacteria or contaminating infection. These conditions are seldom possible and THE CLOSED TANK SYSTEM IS THE ONLY INSURANCE AGAINST RISK OF CONTAMINATION.

To be reasonably successful an open fermentation system should have floors, walls and ceilings lined with vitrified tile, and wooden fermenting vats must be without the slightest flaw and renewed frequently. The ordinary wood and brick cellars generally become impregnated with foul odors known as "cellar smells" which is absorbed by the beer, in an open fermenting vat. WATCH FOR IT and REJECT BEER that has any aroma other than hops and malt.

A loose knot or stave joint, or slaky wood in a stave, will secrete enough bacteria to render every brew unhealthy and unfit to use.

A cellar or vat once infected can never be purified, except by destroying them, and most brewers will keep on using them, rather than incur the great expense of reconstruction.

IS IT NOT BETTER TO USE A BEER that is NOT SUBJECTED TO DETERIORATING INFLUENCES?

WHY IT WAS NOT

"We have been forced to postpone our projected picnic to celebrate the opening of the new bridge, payment on Cross street," said remarked School Trustee W. H. Benson. "In the first place, some miscreant cut down nearly all the trees in Brookside Park and badly damaged the rest. In the second place, the boulevards along the street are not yet presentable, so the picnic has been postponed until Labor Day."

WHAT ABOUT

That order for Groceries. We will take it to-day, please. Our goods are fresh. Our prices right.

Good Ginger Snaps, 6 cts. per lb. Pickles, mixed, 10 cts. per bottle. 1 lb. can Sunlight Baking Powder 10 cts. Lemon Biscuits, 9 cts. per lb. 6 cans Sardines, 25 cts. Rubbers for fruit jars, 5 cts. per dozen. Fine Flavored Japan Tea, 25c per pound. Fresh ground coffee, 15 cts. per lb.

Crockery.

A quantity of pretty glass water sets, will be sold at a bargain. China, lots of it, new goods at cut prices. Dinner, Tea and Chamber Sets, at prices that make people look pleased to hand over the money for them.
