Principal Office: Imperial Bank Building, MONTREAL

REINFORCED CONCRETE BRIDGES

This cut shows ONE of SEVEN arch bridge spans which we are now completing at Ottawa, Ont. All parts including arches and railings are in concrete thoroughly reinforced with steel bars imbedded in same. This construction is very rigid under heaviest loads, and will resist any flood or ice flow. No painting or maintenance; they are there to stay as long as the native rock. Cost about same as for steel bridges, and superior beyond comparison. Plans and tenders promptly submitted.

STEEL CONCRETE CO., Limited
Merchants' Bank Building, MONTREAL

1-storey brick and steel restaurant, 35-37 Queen streets east, \$30,000.—The Ontario Cabinet will be asked to consider giving an additional \$150,000 towards the new Physics Building to be erected in Queen's Park.—J. D. Farquhar, 12 King street east, is asking for tenders for all trades except brick and stone, for erection of three houses.—E. C. Whitney, Ottawa, is interested in the erection of a residence for Toronto University, for which plans have been prepared.—The G. T. R. are considering the erection of a large brick freight shed, on Wellington street, from Simcoe to John.—The Board of Control will receive tenders up to August 28th, for construction of Asphalt pavement on Ulster and Hayter streets, Mulock, Howard and Laxton avenues, also a number of concrete sidewalks and other works; also up to September 4th for slating etc., of roof of Firehall No. 8, College street.

CONTRACTS AWARDED.

LANARK, ONT.—Alterations to St. Paul's church: W. Connors, contractor.

ELGIN, MAN.—Erection of Methodist church: Israel McGrath, contractor, cost about \$5,000.

MAXVILLE, ONT.—Construction of granolithic walks: Morrisburg Concrete Co., contractors.

Stackpole Patent Improved Street Sweeping Machine

Is the Standard of Perfection

Because no sweeper so effectively does the work for which it is designed as "The Studebaker." It Sweeps Clean. No sweeper is constructed with the same degree of care and mechanical precision. It Wears Well. "The Studebaker" has the smallest number of working parts, and has less gearing than any other sweeper made. It is free from all unnecessary complications. With reasonable care it does not get out of order. Send for complete descriptive catalogue.

Studebaker Sprinkler

(PATENT IMPROVED.)

Does not clog or get out of order. Greatest width of spray

Can be graded from driver's seat to any volume.

We also make an . . .

IMPROVED VERTICAL SPRAY

for Pavement

FOUNDATION OF ROADS is the subject now under most earnest investigation by Engineers throughout the World. Poor foundations and good surfaces are found everywhere—caul, short lived roads. THERE IS NOT ONE FOUNDATION ON THE MARKET TO-DAY THAT PROPERLY SUPPORTS THE SURFACE. The steel rail and the wooden cross tie always the same, but the highway is a different thing; different surfaces and different foundations are required for different services. We have these different foundations; they DO properly support the surface, and, IN OTHER WORDS, they give a life to the surface that was never before even contemplated. **The Nash Road, Borough of Brooklyn, N.Y. City, U.S.A.**
