EXCEED ALL PREVIOUS HORRORS

Bombs — Ambulances Summoned Thirteen Within Five Hours — Military Obligated to Resort to Bayonet Charges to Dispel Mobs.

From London says:— "Nine civilians were killed in the battle between the military and the mob since the morning in the Roman areas between Grosvenor Falls Road. The Evening Belfast correspondent

More than thirty houses were burned in the Milfield and Peter's Hill area of Belfast on Thursday. Only the skeleton walls of 13 houses in Boyd Street remain. All the 14 houses on Peter's Place were destroyed, while dwellings on California Street and Woodford Street were damaged by fire and looted.

The barracks of the special constables at Crossmaglen and Jackson House, two miles inside the Louth-Armagh border, were attacked by parties of armed men. Heavy rifle firing ensued for half an hour, after which the attacking party withdrew, apparently without casualties.

The British destroyer Warwick held up a steamer from Moville to Londonderry in Lough Foyle, off the Northern county Londonderry coast. The destroyer put police on board the steamer. They searched the passengers, but made no arrests.

cut task in suppressing the gunmen. Their concentrated fire reduced the gunmen to silence for a while, but later the rebels mounted a machine gun and swept the streets, causing men, women and children to fly for their lives.

On Thursday a public house in Peter's Hill was burned. Heavy firing occurred near the Stanhope Street area, after which the police made extensive raids for arms.

The maximum price, he explained, applies solely to soft coal.

Among certain African tribes brides can be purchased on the instalment system.

ASKED TO MEDIATE IN IRISH AFFAIRS

Four Appointed by Cabinet to Unravel Entire Situation.

A despatch from London says:— "The Earl of Balfour has been asked to try and smooth out the Irish situation, both as regards the land and the border situation north.

meantime Sir James Craig, Premier, has given the views of the state of affairs in Ulster. Although he now has

10,000 British troops apart from his "Ulster volunteers" and special constabulary, he complains that his control of the situation is insufficient and he wants a free hand to use the troops as he pleases.

He also put forward an explanation as to why the Ulster Government is unable to maintain law and order in Belfast, but he apparently failed to impress the Cabinet, which finally consented to the use of British troops for the sake of the defence of Ulster, but refused to allow him to use them for operations across the border.

Canada From Coast to Coast

Charlottetown, P.E.I.—With a cargo of 60,000 bushels of Island potatoes for the Canadian Coastliner left for Havana. Last fall shipments of the amount of 75,000 bushels were made to the same port and the present consignment is one of the largest shipments made from this province.

Annapolis, N.S.—Announcement has been made that F. D. J. Barnum has expressed his willingness to purchase a few small timber lots containing a good growth of pine or spruce trees, in different parts of Nova Scotia, either on the main highways or bordering on the line of a railway, for the purpose of saving and perpetuating some of the present forest tree growth. These lots are eventually to serve as picnic grounds or forest parks.

St. John, N.B.—Efforts are being made to secure the use of the powerful wireless plant at Newcastle, which has been used since it was erected 10 years ago for the purpose of establishing a broadcasting station for the stations in the United States.

Quebec, Que.—A party of thirty Swedes arrived here on board the new Canadian Pacific steamer "Svea". They are proceeding west to Redwood, Alberta, where they will engage in farming. This party forms the vanguard of a large influx which is expected from the Canadian countries this year.

Onto, Ont.—A report from London states that the first party of the members of the Royal Irish Constabulary, numbering 20, will leave at the end of the month for Toronto, under the auspices of the Ontario Government, which has undertaken to find work on farms for them. All the men

are single. The British Government is commencing a sufficient portion of the men's pensions to give them passage money and something in hand.

Winnipeg, Man.—With the object of producing high-class seed grain in car lot quantities for sale to outside points, 45 farmers in the Birtle district have organized a seed center, according to the Provincial Minister of Agriculture. It is proposed to install cleaning machinery, standardize the grain and sell it to Manitoba wheat producers or through country agents in Minnesota and the Dakotas where Manitoba seed is in steady demand.

Regina, Sask.—The total number of big game animals killed last year in the Province of Saskatchewan was only 927 as compared with 2,200 in 1920. Last year there were but 409 moose captured as against 1,200 the previous year. The season for prairie chicken this year will be for a month instead of the customary two weeks, and the shooting of partridge, prohibited for many years, will be allowed. Beavers, too, are becoming so plentiful in the northern part of the province that the council at Dundurn has declared an open season on the animals.

Edmonton, Alta.—As a result of the radio-telephone popularity which has swept the length and breadth of the province, three new radio companies have been organized and have been incorporated under the joint stock companies act.

Victoria, B.C.—Headed by a group of Chinese of British nationality, mainly of the younger set, a Chinese flying school is to be opened in Esquimalt. The first machine, a Cross-Curtiss, with pontoons, was ready for service on May 25. The object of the flying school which will follow one in operation in Kamloops for the last two years, is to train pilots for aviation, so that these men when trained may return to China to carry on the flying services of that land.

THE SCHOONER MAUD
Capt. Raold Amundsen's exploration ship ready for a journey to the frozen north. Carrying food and other equipment to last for seven years, the vessel left Seattle, Washington, recently. The party on the trip will be in constant communication with the rest of the world by means of a powerful radio set by which they will report their progress.

Fix Maximum Price For Bituminous Coal

A despatch from Washington says:—Establishment of a maximum price of \$3.50 a ton for bituminous coal at the mines in 80 per cent. of the present production fields for the duration of the strike was announced on Thursday night by Secretary Hoover.

Sir Douglas Hazen
Chief Justice of New Brunswick, when speaking at the University of New Brunswick Club, voiced the opinion that the Province wants a University of its own, and opposed the establishment of one central university at Halifax for the Maritime Provinces under the Carnegie fund.

Strange Cattle Foods

It begins to look as though Canadian cattle are going to have a more varied and extraordinary diet in the years to come than any other cows in the world. The Council of Scientific Research at Ottawa, announces that an excellent cattle feed can be manufactured from sawdust. A good deal of the waste of the British Columbia saw-mills will doubtless be utilized in that way in future. It also states that a plant was recently established in Canso where food for cows is being manufactured from fish waste. As the losses by waste in the Nova Scotia fisheries amount to a staggering figure every year, similar enterprises will doubtless spring up in other towns besides Canso.

EXCHANGE ADVANCES ON U.S. MARKET

The University of Toronto is managed, the Bulletin state, with the most careful economy consistent with efficiency; no dollar is wasted. The British Government received an adverse vote in the House of Commons recently because the majority of the members apparently thought that the attempt to effect so-called economies in education was ill-advised. The feeling of the people of Great Britain, may perhaps be most concisely expressed in the following sentence from the "Montreal Gazette": "Economy at all times is requisite, it is admitted; but a failure to secure the best and most progressive system of education for a country is not economy in any sense of the word, but rather a peculiarly reprehensible form of extravagance."

Provisional Moratorium to Germany Caused British Securities to Soar.

A despatch from Paris says:—The Reparations Commission have fully approved the German reply to its ultimatum and definitely decided to grant the year 1922. The text of the Commission's letter to Chancellor Wirth and also its decisions were issued after the Commission had framed them at a session lasting many hours. The decision was unanimous, the French delegate joining in it, despite the report of opposition from a section of the Chamber, which caused deep concern in commission circles during the day.

True Economy in Education.

Renewed interest in Ontario's Provincial University and its needs has been aroused by the publication of a series of bulletins, issued by the Alumni Federation of the University of Toronto. One of these bulletins refers to questions asked by some who are interested in the University as to why the expenditure for maintenance should be so much greater than it was seventeen years ago, before the re-organization which took place in 1906. In reply to these inquiries it is pointed out that, for some years previous to 1906, the University was literally in a daily struggle to remedy the state of affairs the Royal Commission of that year recommended greatly enlarged government support and this was forthcoming. Then the Provincial University began to expand and to offer the type of education demanded by intelligent people. To compare maintenance expenditures of seventeen years ago with those of the present year is like comparing the food cost of a delicate, starving child with that of a vigorous, full-grown man.

Weekly Market Report

Toronto.
Manitoba wheat—No. 1 Northern, \$1.42 1/2; No. 2 Northern, \$1.37 1/2; No. 3 Northern, \$1.29.

Cheese, finest Eastern, 12¢ to 13 1/2-16¢. Butter, choicest creamery, 29 1/2 to 30 1/2¢. Eggs, selected, 35¢; 29 1/2 to 30 1/2¢. Car lots, 25¢.
Good veal calves, \$7 to \$7.50; choice lots, \$8; light yearling calves, \$5.50 up; sheep and veal lambs, mixed med. quality, \$6.50; spring lambs, 13 to 15¢ per pound. Light cull sheep, \$4.50 up; hogs, selected, \$15; mixed lots, \$14.50 and up; thick, smooth, com.-fed, \$14; sows \$10 to \$11.

A despatch from Chicago says:—A party of Chicagoans left on Thursday night for an expedition to search for the remains of "the terrible lizard," a beast of monstrous size, equipped with huge armor plates of bone and horns. The expedition is being sent out by the Field Museum.

MINE CANADA FOR PREHISTORIC MONSTER.

Chicago Scientists to Search for Remains of Extinct Lizard.

No museum in the country has yet acquired an entire skeleton of one of these prehistoric monsters, but the expedition from the Field Museum, headed by E. S. Riggs, Assistant Curator, hopes to return with a complete specimen.

Hunting for dinosaurs is very much like prospecting for minerals, according to J. B. Abbott, one of the party. Often fragments of bone are found in a wash which comes from some distance. These are traced back to the mother rock and digging is begun there.

Do you know what country has the largest unexplored area? Africa. You're wrong; it's South America. The civilized people of the world use, on an average, over three million matches every minute.

REGLAR FELLERS—By Gene Byrnes

8 JUNE 1922

JUNIORS PLAY WELL AT OWEN SOUND

(Owen Sound Sun-Times)

The Owen Sound W.F.A. Junior Football eleven will go to Mildmay with a lead of only one goal next Friday evening, as a result of the game last evening ending in the score of 1 to 0 in the Owen Sound boys' favor. The game was the first of home-and-home games to be played between Owen Sound and Mildmay, and it was hoped that the Juniors would pile up a score large enough to allow them some latitude when they play in Mildmay on June 9th but owing to the fact that the locals could not find the goal last evening they will go there with only one goal. In spite of the small score the Owen Sound boys played a very good game and deserved to have more than one lone tally. For every shot on the Owen Sound nets there were at least four on Mildmay but some way the local boys could not get the range and so had to be content with one tally they obtained when Kreutzwiser shot in a penalty kick.

The crowd at the game was disappointingly small considering that a Junior Football game is just as interesting, if not more interesting than a senior match. The game was slightly delayed in starting owing to the difficulty in securing a referee. However, Mr. Charlie Wendt, of Mildmay, took the whistle and everyone agrees, handled the game absolutely without partiality.

Mildmay brought over a bunch of eleven of the huskiest juniors that ever stepped onto a local field. Two of them, Buhlman and Doering, play with the Mildmay Intermediates and were in Palmerston on Thursday evening to help Mildmay defeat that place 4 to 0. The whole Mildmay forward line had played football before and they knew the game. The players said they had little practice together, and if this was the case the forward line certainly worked well together. They could pass the ball from one to another with great ease but their players were inclined to bunch. As long as they kept the ball their tactics worked well, but as soon as the forwards would lose the ball the Owen Sound forwards had a clear road down one side of the field or other. The Mildmay halves and backs played a great game and many times saved almost sure goals for Owen Sound. The visitors were not very careful with their hands and arms and nearly all the fouls of the evening were declared against Mildmay players. Owen Sound's one goal was due to a foul by Stephens within the Mildmay penalty line.

When the game opened up it looked as though Mildmay with their heavy men were going to give the Owen Sound goal tender a hot time but Campbell was right on the job when Becker passed the ball in from the wing and one of the forwards attempted to head it in. The local boys got over their stage-fright and Kreutzwiser and Ferguson came back down the right wing and nearly scored. Kreutzwiser and Ferguson both had well placed shots on the goal but both were flared too, kicked high when he had an open goal before him. Kreutzwiser and Ferguson again nearly worked the ball in but clever work by the Mildmay goaler prevented a score. Just before half time Stephens of Mildmay drew a penalty and Reg. Kreutzwiser booted in a nice clean goal.

The second period opened with the play in Mildmay's favor, but the locals soon came back. They were playing all around the Mildmay goal but failed to score. The play almost crawled right into the goal with the ball but again the Mildmay goaler fooled him. During the second period Owen Sound had at least six corner kicks but somehow these could not be converted into goals. The period ended with the lone tally for Owen Sound.

The line-up:—
 Owen Sound: Campbell Goal, Schell Backs, Moffat Halves, Dudgeon Halves, Kinch Bell, Ferguson Forwards, Kreutzwiser Forwards, Flarity Forwards, Armstrong Forwards, Haston Forwards.
 Mildmay: Schaus Goal, Sutcliffe Backs, Ellig Halves, Schmidt Halves, Kunkel Forwards, Buhlman Forwards, McNab Forwards, Schneider Forwards, Doering Forwards, Becker Forwards.
 Referee—Chas. Wendt, Mildmay.

THREE YEAR OLD GIRL ESCAPES SERIOUS INJURY WHEN ATTACKED BY COW

The three-year-old daughter of Mr. and Mrs. J. S. Peters, 4th of Minto, narrowly escaped serious injury on Wednesday last, the 24th when she was trampled on by an enraged cow at the Dixon home just across the road from the Peter's home. The little tot had gone over to the Dixon farm and was sanding near the gate when some cattle were being let out of the barn. One of the cows, which had just had its calf taken away, saw the little one and making a rush knocked the youngster down, trampled under foot and cut the child about the face and arms with its horn. The animal was chased away as quickly as possible and the little house. Doctors were summoned but upon examination only cuts and bruises were found. This little girl is doing very well and unless unforeseen circumstances set in, she will be bright again in a few days. —Palmerston Spectator.

Not many women draw but a lot of them paint.

CULLED FROM THE PRESS

Born leaders of men—women. Mysteries—Love, women and hash. Marry a chicken and you'll be henpecked.

When you lose your temper hold your tongue. Sunny dispositions put trouble in the shade.

The honeymoon ends with the groans last quarter. You don't need a sharp voice to make cutting remarks.

Don't spend today regretting what you have to do tomorrow. Many a promising young chicken develops into a regular old hen.

From now on, it promises to be a race between the seeds and the weeds—with odds greatly in favor of the latter winning out.

Farmers are advised when being solicited by agents for lightning rods to demand to see their license. For their protection and for worthless protection, a license is required and every agent for lightning rod equipment must carry a license bearing the signature of the Ontario Fire Marshall.

NEW AGRICULTURAL ASS'T.

Mr. C. M. Meek, B.S.A., who has just graduated from the Ontario Agricultural College, Guelph, has been appointed assistant to Mr. Lamont, the Agricultural Representative at Walkerton. Mr. Meek is rated to be possibly one of the best men in the graduating class this year and it is expected will give valuable service. Mr. Lamont has been somewhat handicapped during the past eight months owing to lack of assistance and has not been in a position to give the service that he would like to have done.

BOWLERS FORM LEAGUE

At a meeting of the Lawn Bowlers of this district held at Walkerton on Thursday, May 18, a league was formed composed of twelve clubs grouped as follows:—Group 1, Mildmay, Walkerton, Cargill; Group 2, Paisley, Port Elgin, Southampton; Group 3, Durham, Hanover, Chesley; Group 4, Teeswater, Ripley, Lucknow. Each club will be represented by two teams and home games will be played. Each group must finish their games by July 1st, so that the winners may enter the semi-finals. Prizes will be presented to the winners and runners up in the final game.

THE WESTERN FAIR

Sept. 9th to 16th, 1922.

A large amount of work is in progress at Queens Park, London, Ont., in preparation for the big Exhibition in September. A new floor will be laid on the Amusement platform. The roofs of practically all the buildings on the grounds will be repaired and relaid where necessary. A contract has been let for the construction of a subway (for foot passengers only) under the track at the north end of the Grand Stand. This will afford easy access to the Automobiles that are parked inside the horse ring. Several other important improvements will be made on the grounds, as the board is anxious that everything possible may be done for the safety and convenience of all visitors and exhibitors. All information about the Exhibition will be furnished on Application to the Secretary, A. M. Hunt, General Offices, London, Ont.

A CHILD'S ADVENTURE

Doug, Fairbanks, the famous movie actor has nothing on the youthful "Doug" Cooper when it comes to pulling real "thrillers," so local spectators think who saw his unconsciously staged feat of a few days ago. To ride for a distance of over a mile on the running-board of a car—sleeping and without falling off is some stunt, but was nevertheless the unique experience of this diminutive youngster last Saturday.

WOMEN MAY VOTE

The Ontario Legislature has amended the Municipal Act by giving the wives of property owners or tenants the right to vote at municipal elections if the property is assessed sufficiently high to entitle both to a vote. If the wife is the owner of the property then the husband too is entitled to a vote.

"BLOOD MONEY"

That's what a few fellows felt they were paying Friday of last week when Magistrate McNab came over to Lucknow to deal with a number of charges laid by Constable Blood for infraction of the traffic laws.

It was at first reported that there were charges against 11 and the number at one time reached 20. On the day on which the Court was held the number dwindled down to four. J. Mackenzie, of Kinloss was driving his car with the tail light out of commission. R. J. Button had a defective lighting while J. W. Joynt and Douglas Bros. had neglected to replace markers which had become detached.

For the month of May Standing is based on the daily marks received. Sr. IV—Antonetta Meyer, Besilla Cronin, Martina Eilig, Bert Cronin, Amelia Steffler. Jr. IV—Marcella Cronin, Catherine Meyer. Sr. III—Thomas Cronin, Amelia Weber, Cornelius Steffler, Loretta Steffler, Eddie Meyer, Frankie Doer, Hilda Meyer, Eugene Bohnert, Francis Schmurr.

WHERE IS YOUR BOY TONIGHT?

This question arises involuntarily when one reads the statement made by the minister of justice in Parliament that 153 Canadian boys are inmates in our penitentiaries. Over half of these are 18 years old, 62 are one year younger, and 18 have reached no more than 16, the age when they leave school under the new law.

AN INDICTABLE OFFENCE

It may be that the young lads are unaware of the enormity of the offence which seems to be growing common among the school children, of robbing birds' nests. Not only is this a wanton cruelty but an offence for which one is liable to a heavy fine, even imprisonment.

What This Buffalo Physician Has Done For Humanity

The picture which appears here of Dr. Pierce of Buffalo, N. Y., was taken in 1910. As a young man Dr. Pierce practised medicine in Pennsylvania and was known far and wide for his great success in alleviating disease. He early moved to Buffalo and put up in ready-to-use form, his Golden Medical Discovery, the well-known tonic for the blood.

NIGHT AIR PUREST

After having believed for years that morning air is the purest of the whole 24 hours, an Ottawa paper comes out with the statement that by actual test it has been proven that night air is the purest, that bacteria count in the night air is much lower than that in the air during the daylight hours when the industrial world is pouring forth its dirt to pollute the air, and well-developed microbes are looking for a suitable breeding place in the human system.

The tragic death of Miss Dora K. Hall happened on Monday morning at her home in Invermay, when in a fit of despondency she slashed her throat with a razor and passed away in a few minutes. Deceased had been in poor health for some time, suffering from mental and nervous illness, and arrangements were being completed to have her removed to a hospital.

The Formosa Mutual Fire Insurance Company

Head Office Formosa Established 1880 John F. Waechter, President E. G. Kuntz, Man. & Treasurer Thomas Inglis, Vice-President

Amount of Insurance in force Dec. 31st, 1921, \$9745047.00 Cash Assets \$26276.49 Available Assets \$268846.11

This old reliable farm Company insures farm buildings, churches, schools and dwelling houses in cities, towns and villages at a low premium rate on the instalment plan and collects lower first, second and third instalments than other mutual Companies and allows a preferred rate on buildings well equipped with lightning rods and is capable of carrying any such risks.

The Company has a record for prompt inspection and payment of losses without quibbling or fear nor favor so that the assured doesn't need to worry if he sustains a loss because payments are made very punctual after proof of loss is considered by the Directors.

The Board of Directors meets every last Thursday of the month and the office is managed by honest, efficient management. Never negligent. With such low rates it merits the approval of intending insurers.

For rates and information apply to District Agent or Head Office, Phone 134-5 E. G. KUNTZ, Manager.

I'll Show You A Silo that will boost your farm earnings

My Toronto Silo will put dollars in your pocket.

It will boost the value of your farm. Its double-tongued-and-grooved selected Spruce makes the Toronto Silo absolutely air tight, which keeps the ensilage in perfect condition.

Its famous Hip Roof allows you to tramp the Ensilage to the top of the staves—and adds greatly to its appearance.

Drop in next time you're in town and let us talk it over.

I have other lines of Toronto Farm Equipment too. Let me show you their dependability and economy.

(Cont'd.)

engaged the doctor and in a few minutes the main facts of the case were known, which it had been under his observation now, and which she was not able to pay for years of discipline.

After breakfast Irene attended to the wants of her father, and by this time the visiting doctor was manifesting impatience to be away. Other people were calling him, and he assured Doctor Hardy, what the latter quite well knew, that nothing more could be done for him at present. He would come again at any time it was summoned by the young man, or if his professional duties should bring him into the neighborhood of the Elden ranch. But Dave declared with prompt finality that the horses must rest until after noon, and the doctor, willy-nilly, spent the morning rambling in the foothills. Meanwhile the girl busied herself with work about the house, in which she was effecting a rapid transformation.

After the midday dinner Dave harnessed the team for the journey to town, but before leaving inquired of Irene if there were any special purchases, either personal or for the use of the house, which she would recommend. With some diffidence she mentioned one that was uppermost in her thoughts—soap, both laundry and toilet. Dr. Hardy had no hesitation in calling for a box of his favorite cigars and some new magazines, and took occasion to press into the boy's hand a bill out of all proportion to the value of the supplies requested. There was an argument in the yard, which the girl did not fully hear, between father and son, but she gathered that the old man insisted on going to town, and, falling that, that Dave should replenish his stock of whisky, to neither of which would the young man consent. It was evident that Dave was the responsible person in the affairs of the Elden ranch. The day was introductory to others that were to follow.

Dave returned the next day with cigars, magazines, and a soft little package to be a sponge, which he used to his own initiative, and Irene agreed to Irene. She took to rising color, and with misgiving whether this was a contribution to the toilet of the house, or a quiet appeal for soap.

The following day it was decided that the automobile, which since the accident had lain unturned by the roadway, should be brought to the ranch buildings. Dave harnessed his team, and, instead of riding one of the horses, walked behind, driving by the reins, and accompanied by the girl, who had proclaimed her ability to steer the car. When they reached the stream she hesitated, remembering her mishap, but the boy slipped his uncles hand firmgrip under her arm, and they walked the log in safety. It seemed to Irene that she continued his assistance when it was no longer needed, but she accepted the courtesy without remark.

With the aid of the team and Dave'sariat the car was soon righted, and was found to be none the worse for its deflection from the beaten track. Irene presided at the steering wheel, watching the road with great interest, and turning the wheel too far on each occasion, which gave to her course a somewhat wavy or undulating order, such as is often found in bread knives, or perhaps a better figure would be to compare it with the undulating motion affected by fancy skaters.

However, the mean of her direction corresponded with the mean of the trail, and she eventually until she reached. Here was the first when purpose to engage horses in a contest of speed. The rivals were suspicious enough at first of their strange wagon, and had sought of allowing it to assume over for a haven from the intrusion of business or professional cares, he

fectly well where the brake was, and how to use it. In fact, there were two brakes, operated by different members, and perhaps it was this duplication, intended to insure safety, that was responsible for her undoing. Her first impulse was to use the emergency, but to do so she must remove her hand from the steering-wheel, where it was very fully occupied. She did start to put this impulse into effect, but an unusually violent deflection caused her to reconsider that intention. She determined to use the foot-brake, a feat which was accomplished, under normal conditions by pressing one foot firmly against the steering-post. She shot a quick glance downward, and to her alarm discovered not one, but three contraptions, all apparently designed to reach the steps of a stair. This involved further hesitation, and in automobile driving he who hesitates invites a series of rapid experiences. By this time all Irene's attention was required to bring the car to some unimpaired direction. It was quite evident that it was running away. It was quite evident that the horses were running away. The situation assumed the qualities of a race, and the only matter of grave doubt related to its termination. Dave, still holding fast to the reins, ran beside the car with prodigious strides which enabled him to bring but little restraint upon the team, and Irene held to the steering-wheel with grip of desperation.

Then they struck the water. It was not more than two feet deep, but the extra resistance it caused, and the extra alarm it excited in the horses, resulted in the breaking of theariat. Dave still clung fast to his team, and now that the terrifying rival no longer pursued them, they were soon brought to a standstill. Having pacified them, he tied them to a post and returned to the stream. The car sat in the middle; the girl had put her feet on the seat beside her, and the swift water was flowing by a few inches below. She was laughing merrily when Dave, very wet in parts, appeared on the bank.

"Well, I'm not wet, except for a little splashing," she said, "and you are out of reply to me?" With cold water, took her in his arms, and soon repaired, and the car hauled to the ranch buildings without further mishap.

Later in the day he said to her, "Can you ride?" "Some," she answered. "I have ridden city horses, but don't know about these ranch animals. You know, but a ranch horse seems to do pretty much as he likes. But I would like to try—if I had a saddle."

"I have an extra saddle," he said. "But it's a man's. They all ride that way here." She made no answer, and the subject was dropped for the time. But the next morning she saw Dave ride away, leading a horse by his side. He did not return until evening, but when he came the idle horse carried a saddle.

"It's a strad-legger," he said when he drew up beside Irene, "but it's a girl's. I could find anything else in the whole diggins."

"I'm sure it will do—splendidly—if I can just stick on," she replied. But another problem was already in her mind. It apparently had not occurred to Irene that women require special clothing for riding, especially if it's a "strad-legger." She opened her lips to mention this, then closed them again. He had been to enough trouble on her account. He had all ready spent a whole day scouring the country for a saddle. She would manage some way. She would scissored and needle.

CHAPTER III.
Dr. Hardy recovered from his injuries as rapidly as could be expected, and, while he chafed somewhat over circumstances, the time passed not unhappily. Had he sought the world over for a haven from the intrusion of business or professional cares, he

could have found it nowhere in greater perfection than in the foothill country centering about the Elden ranch. Here was an Arcadia where one might well return to the simple life; a little bay of still water sheltered from the on-rushing time of affairs by the warm brown prairies and the white-bosomed mountains towering through their draperies of blue-purple mist. It was life as far removed from his accustomed circles as if he had been suddenly spirited to a different planet. It was life without the crowd and haste and out the crowd and jostle and haste and gaiety and despair that are called life; but the doctor wondered if, after all, it did not come nearer to filling the measure of experience—which is life.

A considerable acquaintance had sprung up between him and the senior Elden. The rancher had come from the East forty years before, but in turning over their memories the two men found many links of association; their persons known to them both; places, over streets and houses common to their feet in early childhood; events of local history which each could recall, although from different angles. And Elden's life in the West had been a treasury of experience, in which he now dipped for the first time in years, regarding his great with tales of the open range long before barbed wire had stuck its poisoned fang into the heart of the ranchman; tales of horse-stealing and cattle-rustling, with glimpses of sudden justice unrecorded in the official documents of the territory; of whisky-running and excess and all those large adventures that drink the red blood of the wilderness. In his grizzled head and stooping frame he carried more experiences than would fill a dozen well-rounded city lives, and he had the story-teller's art which scorns to spoil dramatic effect by a too strict adherence to fact. But over one phase of his life he kept the curtain resolutely down. No ray of conversation would he admit into the more personal affairs of his heart, or of the woman who had been his wife, and even when the talk turned on the boy he quickly withdrew it to another topic, as

Woman's Interests

The Care of Your Mesh Bag.

Mesh bags have been increasingly popular for several years because of their pleasing appearance, but some who have received mesh bags of gold or silver as gifts, or who have purchased them, have been disappointed in regard to their wearing qualities. Either the meshes soon begin to show tiny holes like dropped stitches, or the bags themselves begin to look dark and dingy.

Keeping the bags in good condition is really a matter of personal care. The mesh bags of better quality are made of soldered links, and while solder is a metal, it is not what might be called a tough, resistant metal, and the meshes themselves are all fine and delicate.

If the mesh bag is used thoughtlessly it will suffer, of course. No sharp article should ever be carried within its folds, such as nail files, orange-wood sticks, hairpins, sharpened pencils, or anything with a point which will penetrate the meshes and cause tiny breaks to appear.

In one case, the owner of a very beautiful mesh bag found that her treasure was beginning to show mysterious breaks. She traced it to a small, bead change purse which she was in the habit of carrying inside the bag. The beads were of just the right size to force themselves into the mesh opening if circumstances were right. She had the bag repaired and stopped using the little bead change purse and had no further cause for complaint.

It is also a mistake to force the carrying capacity of the mesh bag, for it is essentially a dress article, and not one to be used for utilitarian purposes. The owner of the mesh bag should remember if she goes shopping that a more capacious leather or silk receptacle into which she can stuff parcels of different sizes will be a convenience, while the mesh bag will be saved for its proper use.

If the article is gold or silver plated, the plating will wear off in time, although if this is a good quality it should last as well as any other plated article would if it is taken care of. But under no circumstances should it be cleaned with gritty scouring powders or soaps, or with unknown materials.

One owner of a mesh bag scrubbed it vigorously with a borax preparation. After the first cleaning, it was certainly improved, but after several cleanings, the plate was removed also. The bag was replated and the owner was sadder and wiser for the expense was unnecessary.

In the future, she used a good silver cleaning polish and a soft little brush. After cleaning, the bag was rinsed thoroughly under the warm water faucet until it was quite clean; then it was dried on a soft, clean towel and hung wide open in a draught of air, that any clinging moisture within the meshes might be evaporated.

Bags of gold plate or of solid gold should only be cleaned with some preparation obtained from a reliable jeweler for the purpose. Naturally the bags will grow dingy if they are carried throughout a season without being cleaned. The meshes are peculiarly adapted to catch dust anyway, so a frequent cleaning with suitable materials, or a good rinsing in clear water, and a process of gentle drying

will help to keep the bag attractive. Some owners of mesh bags have lined them with silk or kid, to prevent soiling dainty handkerchiefs, light cases, or anything of that kind. This really spoils the effect of the dainty article itself, making it look thick instead of fine and filmy. It also complicates the cleaning process, for, of course, such a lining has to be removed before cleansing is undertaken.

The trouble can be avoided by keeping the bag clean and by using a small, inner, removable envelope of silk into which handkerchiefs or anything else of a light color can be slipped. Even this is unnecessary if all meshes are quite clean, as they should be.

A Novel Playhouse.
Take the old, worn-out, large umbrella and make it into a playhouse. Find a stump into which the umbrella handle can be securely fastened—use a bit of cement to hold it if necessary. Draw a circle around the stump, about six feet in diameter. Do this, tie a string three feet long to the handle of the umbrella; on the other end of the string tie a sharp stick with which to make the circle. Then make a flower-bed about ten inches wide along this circle, and in the flower-bed plant morning glory or other quickly growing vine seed. By the time the seeds are up, tie stout hemp strings from each of the ribs of the umbrella to form a green wall, and the umbrella forms the roof of a charming little playhouse.

Refinishing of Furniture.
Are you going to paint that chair or table that is stored away in the attic or shed? Painted furniture is very popular nowadays, why not make the most of what we have and bring in those old deserted pieces of furniture and rejuvenate them?

To make a perfect job of an old varnished piece, every bit of varnish should be removed. Unless this is satisfactory, the work will not be entirely satisfactory. Varnish may be removed on smooth surfaces by scraping with a knife blade, piece of glass, steel wool, or sandpaper. This is too harsh a treatment for veneered or delicate surfaces. Care must always be taken not to mar or dent the wood. Ammonia, turpentine and alcohol will dissolve varnish but the most satisfactory method is to use a commercial varnish remover. There are many of them on the market and all are about equally good. They soften the varnish and it can be easily removed by scrubbing or wiping with a heavy cloth. For final cleaning use gasoline.

Minard's Liniment for Dandruff.
A Hospital for Plants.
A hospital for plants is the latest device, designed by an ingenious Englishman, for the aid and comfort of lovers of flowers, who are often distressed at sight of their favorite plants ailing and dying from maladies for which they know no cure. When a sick plant is brought to the hospital, it is immediately examined and sent to the room prepared for its case. If it is suffering from a cold it is tended with heat; if it has become anaemic from an excess of solar rays, it goes through a freezing treatment. The unwholesome branches are removed, while those that are anaemic are fed. It seems that certain plants are very nervous. Some easily get neurosthenic, while their neighbors show undeniable symptoms of hysteria. But special managements permit the application to each of them of the treatment it requires.

\$2,000 in cash prize

Many people have discovered that 2 in 1 Shoe Polish is good for other things than for shining shoes. For example:

- 2 in 1 BLACK—Good for polishing motor cars; refinishing suit cases, kodaks, black gloves, rubbers, hats, etc.
- 2 in 1 WHITE—cake or liquid—Good for cleaning hats, stains in white skirts, white kid gloves, auto tires, etc.
- 2 in 1 TAN PASTE—Good for polishing furniture, hardwood floors, etc.

For the Best List of New Uses for 2 in 1, We are Awarding Cash Prizes as Follows:

1st award \$500.00—for the most acceptable list	20 Prizes of \$15.00—for the next twenty
2nd " 300.00—for next best list	50 " 5.00—for the next fifty
3rd " 200.00—for third best list	50 " 2.00—for the next fifty
30 Prizes of 25.00—for the next ten	100 " 1.00—for the next 100 lists

Try to find new uses for any of the 2 in 1 Shoe Polishes, either black, tan, oxblood, or brown paste, white cake or white liquid, black or tan combination.

Write on one side of paper only. List uses according to colors. Awards will be made according to decision of special committee, and payment made on or before October 1st, 1922. All lists submitted to become our property. Address:

Prize Editor, F. F. DALLEY COMPANY OF CANADA LIMITED, HAMILTON, CANADA.

though the subject were dangerous or distasteful. But once, after a long silence following such a diversion, had he betrayed himself into a whispered remark, an outburst of feeling rather than a communication. "I've been alone so much," he said. "It seems And—sooner or later—it gets you—It gets you."

(To be continued.)

SPRYWHEEL

A Single Wheel Tractor and Cultivator Combined.

Sprywheel does any work for which a wheel or hand hoe can be used. —Does Five Times As Much.

Small enough for the half acre home gardener—a labor saving money maker for every market gardener, nurseryman and insuring Uniformly Thorough and Economical Cultivation.

or turpentine. These will remove all traces of the varnish remover. If, however, it takes too much time to remove the varnish, be sure the varnish is absolutely clean, for paint will not stick to greasy surfaces. Rub with steel wool, emery paper, or a fine grade of sandpaper. This will smooth the rough pieces of varnish and at the same time scratch the smooth surface so that the paint will adhere to it. Use a no-gloss house paint for the first coat, and two coats of a light-colored paint is to be used over a dark surface. Allow each coat to dry thoroughly, then add a coat of enamel paint of the color desired.

First Woman Enters Inner Temple Bar.

The sacred portals of the Inner Temple were passed recently by a woman when Miss Ivy Williams became a member of the British bar, the first to be called in the Temple, says a recent London despatch. Miss Williams is an Oxford lecturer, who says she does not intend to practice, although she took precedence over a score of men because she possesses a certificate of honor. She appeared in a black evening dress, gowned as a barrister.

H. E. Dickens, son of the novelist, said: "Women have attained this eminence in law not by virtue of the frantic suffragist activity, not by dropping ink and smoke bombs, but by virtue of their great and inextinguishable service to their country during the war. The days are long past when women were regarded as mere chattels by men. They are no longer regarded as mere ornaments, but as the equals of men. The work of women during the war has won down every existing prejudice against women taking active part in the management of the country and in dispensing its laws."

Call night at the Inner Temple is always a memorable occasion, but this year's ritual made history for the British bar when a woman adorned herself in wig and gown and was warmly received by her fellows.

Some easily get neurosthenic, while their neighbors show undeniable symptoms of hysteria. But special managements permit the application to each of them of the treatment it requires.

Let the Fresh Air Enter.

Stiffness in a room is due to twice or thrice-breathed stale air, and there is nothing more mentally and physically debilitating. Unfortunately, the usual demand of "open the window," does not do much good, and that is because, when the opening is effected by pulling down the top sash a few inches, the impossible is being attempted.

There cannot be an exit of used air in the same place as there is an ingress of fresh air. Warm, rarefied air will, of course, escape through the top of an open window, unless it is beaten back by a cold and heavier air current. The cross action then produces a swirling draught—a fertile source of colds. Also, the amount of fresh air so obtained will be negligible, for the used air will rob the fresh air of part of its oxygen, and the result will be a second-grade air.

The proper and scientific way of securing the egress of used air and the ingress of fresh air, is to push up the lower window sash to the top and pull down the upper sash to within four inches of the sill.

A board, cut to size, should be placed between the sill and the pulled-down upper sash. Its purpose is to exclude a horizontal draught from any person sitting close to the window.

With the sashes thus arranged the outer and fresh air will find, as is obvious, a downward and natural entrance, and the lighter and stale air will escape upward and out.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Frezzone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Frezzone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toe, and the corns, without soreness or irrita-

You Can Stand on this Wash Board

Our SMP Pearl Ware Wash Board is so strong, tough and durable that a full-grown man or woman can stand on it without doing the rubbing surface or any part of it the least harm! The enameled surface won't chip, flake or peel off. Think of the wear there is in such a wash board! There is the same wearing qualities in all plates in SMP Pearl Ware. Try out the wash board and be convinced.

Let's Have Raisin Bread Tonight

How long since you've had delicious raisin bread—since you've tasted that incomparable flavor?

Serve a loaf tonight. No need to bake it. Just telephone your grocer or a bakery. Say you want "full-fruited bread—generously filled with luscious, seeded, Sun-Maid Raisins."

The flavor of these raisins permeates the loaf. A cake-like daintiness makes every slice a treat.

Serve it plain at dinner or as a tasty, fruited breakfast toast.

Make delicious bread pudding with leftover slices.

Use it all. You need not waste a crumb. Raisin bread is luscious, energizing, iron-rich. So it's both good and good for you.

Serve it at least twice a week. Start this good habit in your home today.

But don't take any but a real, full-fruited genuine raisin bread.

Your dealer will supply it if you insist.

Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

Surnames and Their Origin

COSTELLO
Racial Origin—Norman-French.
Source—A given name.

Here is a family name that is likely to puzzle you. Forgetting any particular knowledge you may have of it, it looks more as though it might be Italian than anything else. But all those of this name that you have ever met have probably been Irish. As a matter of fact, the name itself is Norman French.

But though the name and the original blood of the Costellos was Norman, they really have more right to call themselves Irish than any one in Canada, except the Indian, has to call himself a Canadian. For the Costellos began to be Irish long before any Caucasians, except perhaps certain Norsemen, began to be Canadians.

The Costello clan in Ireland became famous in the early days of the Norman invasion. It derived its name from one Costello Fitz-Gilbert, who was the son of Gilbert de Angulo, one of the first of the invaders. As was the case with many of these Norman chieftains, they gathered around them, when they settled in either Ireland or Scotland, many native followers together with those of their own race and, falling into the Gaelic custom, gradually evolved their own clans, adopting the Gaelic language and the Gaelic system of names. Thus, those who would otherwise have been known (under the Norman system) as "Costello" became instead "O'Costello" and finally just Costello. But it has been so long since the eleventh and twelfth centuries that it is safe to bet that but little of the original Norman blood remains in the veins of the average person bearing his name to-day.

Do "Box Numbers" Baffle You?

While the system of "box numbers" addresses used by advertisers in newspapers has been in operation for a good many years, there are some people who do not know what a "box number" really means.

The "box number" came into being as a result of the great increase in the use of newspapers as a medium for advertising. It helped to save content and labor.

A person who advertises in a newspaper may not wish to disclose his address. In such cases, when he inserts the advertisement he informs the clerk at the counter that he desires a "box number." The clerk gives him a receipt on which is a number. It is this number that appears in the advertisement; for instance, "Apply Box No. 1234."

When the advertiser calls for a receipt, he presents his receipt, and the clerk is obliged to him. Perhaps you have seen a "box number" do with the

FRANCOMB
Variations—Francom, Frankham.
Racial Origin—Anglo-Norman.
Source—Descriptive.

Here is a group of family names the meaning and origin of which you will find it difficult to guess, for in each one of the three cases the present spelling of the ending is misleading.

It is not an uncommon thing for names of Anglo-Norman origin to change in this fashion, and the reason lies in the peculiar mixture of the old Anglo-Saxon tongue and the French of the Normans and from which modern English is the outgrowth. It must be remembered that the mixture occurred in a peculiar way. The Normans, for a couple of centuries after the conquest, spoke nothing but French and their tongue was but slightly changed by the influence of the Anglo-Saxons. Then came a period when, as a result of political separation from Normandy, the Normans began to adopt the English, which, in radically changed form, finally again became the dominating element of speech. It was natural that when this final stage was reached the meanings of the Norman names were quickly forgotten and there was a tendency to spell them as they were pronounced at the time.

In the Middle Ages the "middle class," lying between the nobility and their vassals in the social and political scale, were known as "freemen" and Freeman has come down to us as a family name. The Norman equivalent to this word was "franc-homme," or as it was spelled at various times, "franchome," "franch-homme" and "franchome." It came to be pronounced, after it had become a surname, "francome," whence the spellings Francomb and Frankham have developed.

fact that usually the replies are kept in boxes, being docketed in pigeon-holes.

Some newspapers—trade journals in particular—allow readers to send money in payment of goods advertised. This "deposit" is kept by the newspaper until the buyer receives the goods, when it is sent on to the seller.

By this means the buyer is assured of fair play, for if the advertiser fails to carry out his part of the bargain, the buyer's deposit is returned.

Seeing the King.

For mine eyes have seen the King, the Lord of hosts—Isaiah vi: 5.
Unclean lips: yea, all uncleanness, I can nothing righteous bring:
Woe is me, undone, unholly—
For mine eyes have seen the King.

But the coal from off the altar—
Purged and cleansed; oh, wondrous thing!

Here am I, send me—what glory!
Lo, mine eyes have seen the King!
—Edith L. Mapee

Dust Explosions

The recent explosion of a bin of oatmeal in some London works is said to have been due to an admixture of dust and air. It is a curious and unpleasant fact that such a mixture is extremely explosive, and that some of the most terrible accidents in industrial history have been caused by dust floating in dry air.

Coal dust is specially dangerous, and it is in order to guard against dust explosions in mines that all dry mines have, by law, to be regularly watered.

The dreadful disaster at the Tradeston flour mills at Glasgow was caused by a spark igniting the fine flour dust with which the air was filled, and resulted in the loss of twelve lives. The mill itself was a roaring furnace inside five minutes.

The worst explosion of the kind on record was that which destroyed the Washburn corn mills in Minneapolis, reputed to be the largest in the world. The result was a loss of eighteen lives and a million dollars worth of property.

In the year 1908 Paris was shaken by a most tremendous explosion, caused by the blowing up of the great Say sugar refinery, near the Orleans Station. It is believed that a spark from a dynamo ignited the finely powdered sugar floating in the air. Forty-two workpeople were injured, and the damage was \$90,000.

In the early days of the last century, all such explosions were attributed to escapes of gas, or to lightning flashes; yet as early as 1815 Sir Humphry Davy seems to have had a suspicion of the real reason, and to have made some investigations.

Later, the Royal Commission of 1891 went into the matter more closely, and their investigations proved that explosions in coal-mines, even when not caused by dust, were often aggravated by dust floating in the air. It is not really difficult to understand the why and wherefore of such explosions. To light a fire, you first chop up wood into small sticks or shavings, and the smaller these are the more readily they burn. The reason is that the act of combustion is merely the combination of the carbon of the wood with the oxygen of the air.

Naturally, therefore, when a particle of dust is floating in the air, with oxygen all around it, there only needs the requisite degree of heat for that particle to burst into fierce flame, which of course is instantly communicated to all the other atoms of dust in succession.

PALE, WEAK GIRLS AND DELICATE WOMEN

Can Find New Health by Enriching Their Blood Supply.

Nature intended every girl and every woman to be happy, active and healthy. Yet too many of them find their lives saddened by suffering—nearly always because their blood is to blame. All those unhappy girls and women with colorless cheeks, dull skins, and sunken, listless eyes, are in this condition because they have not enough red blood in their veins to keep them well and in the charm of health. They suffer from depression, weariness and periodical headaches. Dark lines from under their eyes, their heart palpitates violently after the slightest exertion, and they are often attacked with fainting spells. These are only a few of the miseries of bloodlessness.

When the blood becomes thin and watery it can be enriched through the use of Dr. Williams' Pink Pills and the troubles that come from poor blood disappear. In almost every neighborhood you will find some formerly ailing woman, or pale breathless girl who has a good word to say for this medicine. Among them there is Miss Laura Monaghan, Campbellton, P.E.I., who says:—"Before using Dr. Williams' Pink Pills I was in a badly run-down condition. I was pale, thin and scarcely able to go about. The least exertion made my heart palpitate so violently that I actually was afraid one of those spells might carry me off. Often my nights were sleepless, and as the treatment I was taking did not help me I was almost in despair. Finally a friend advised the use of Dr. Williams' Pink Pills, and in the course of a few weeks after beginning this treatment there was a decided improvement in my condition. I continued using the pills, and am now enjoying good health. I am glad to give you my experience in the hope that some other sufferer may find the way to better health."

These pills are sold by all medicine dealers or may be had by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Wild Animal Sanctuary.

At Yorkton, Sask., J. A. M. Patrick, K.C., has established at his own expense, and as a means of affording him pleasure, a sanctuary for wild animals. He has succeeded in obtaining a number of specimens of our rapidly disappearing wild life, among them being antelope and white-tailed deer. He has recently purchased four pure white deer from Grand Rapids, Mich. These deer are exceedingly rare, only seventeen being known to be in existence on the continent. Mr. Patrick is having the usual difficulties in protecting his sanctuary, but is continuing the good work.

Mingard's Liniment Relieves Neuralgia

The "Silent Nine."

A silent aeroplane engine has at last been invented, says a London newspaper.

In a recent test the deafening roar of the engine and exhaust was completely eliminated when fitted with the "Silent Nine," as the new invention is called.

Passengers will now be able to converse with ease while in the air, and not be forced to shout at the top of their voices.

The "Silent Nine" is very simple in construction and in principle. It consists of an expansion chamber fitted to the end of a long exhaust pipe, and arranged in such a way that the gases from the engine are cooled immediately they leave the red-hot exhaust hole. This is the secret of engine silence.

The inventor is Major Grant, the superintendent of the Croydon aerodrome depot.

One "Silent Nine" can be sold at a profit for less than \$50, and already there is a great demand for it.

In Canada's Favor.

The exchange of immigration and trade between Canada and New South Wales during the fiscal year 1920-21 shows that both were considerably in favor of Canada. Imports of Canadian produce, according to the New South Wales Statistical Bulletin for December last, amounted to \$1,045,650, while exports to Canada were valued at \$626,210. During the first nine months of last year, 1,398 emigrants left New South Wales for Canada, while but 871 arrived from Canada.

CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Fully nine-tenths of all the minor ills of childhood have their root in indigestion. There is no medicine for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Real "Boat Trains."

When men are up against a difficulty they are not satisfied until they have got over it. The result of one of these difficulties in overcoming Nature has taken the form of the strangest railway in the world.

The question that had worried the engineers for a long time was how to improve the transport of goods through the vast Belgian Congo to the coast.

Great tracts of this country are swamps, intersected by ridges of steep cliffs. In consequence, river transport is the only practical way by which goods can be carried to the sea.

But the number of waterfalls, rapids, and shallows has made this a tedious business, as the cargoes have to be unloaded many times on one journey, and carried down the bank for some distance to the next boat.

However, as the result of experiments in Belgium, it is hoped this difficulty will be overcome. The invention consists of twin boats bracketed side by side, with a space of three feet or so between the two hulls.

Along navigable water this double boat travels in the normal way, propelled by a screw at the stern of each hull. But over all rapids and shallow parts a single railway line has been constructed, supported on trestles, the rail rising up from the water-level at each end of the unnavigable section.

Guided in by two guard rails, the boat floats up over the end of the rail; then the wheels between the two hulls engage with the line. The driving power from the engines is switched off from the screws, and drives the wheels in contact with the rail. The boat runs forward on the line, and slowly lifts clear of the water. In this way the boat travels by rail over the rapids, the hulls hanging one on either side, and so preserving the balance.

In this ingenious way the boat, in making its non-stop run to the sea can rise out of the water and pass over a steep waterfall, or skim just above the surface of shallows. At a narrow gorge the boat can avoid it altogether by leaving the river and cutting across land on its single rail, rattling along a cleared pathway through the jungle like a New York overhead railway.

Mrs. Newlywed (on her first day's shopping): "I want two pieces of steak and—about half a pint of gravy."

He who plants a tree lightens the burdens of his fellow-men. He who plants a tree erects to himself a living monument and makes bold an attempt to leave the world more beautiful than he found it.

MONEY ORDERS.

Send a Dominion Express Money Order. Five Dollars costs three cents.

The roses of pleasure seldom last long enough to adorn the brow of him who plucks them.—Hannah More.

Marmion, Ontario.—"Before I met Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not go up stairs without stopping to rest half-way up. I saw your medicine advertised in the newspapers and gave it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, and do all my household work and enjoy the best of health. I also found the Vegetable Compound a great help for my weak baby before my babies were born. I recommend it to all my friends."—Miss HENRY JANKE, Marmion, Ontario.

TROUBLED WITH ECZEMA 2 YEARS
On Face and Arms. Lost Sleep. Cuticura Heals.
"I was troubled for about two years with eczema. It broke out on my face and arms in pimples and itched and burned so badly that I lost much sleep on account of it. My face and arms were covered with pimples, and I was ashamed to appear out of the house.
I began using Cuticura Soap and Ointment and immediately found relief, and after using one cake of Soap and one box of Ointment I was healed." (Signed) Miss Helen Mark, 4259 Maryland St., San Diego, Calif., April 18, 1921.
Use Cuticura Soap, Ointment and Talcum exclusively for every-day toilet purposes.

UNION STOCK MARKETS TORONTO

Cattle receipts were a little heavy for the opening market of the week at the Union Yards, but trade became brisk after a slow beginning. The offering exceeded that of the previous Monday by about 800 head but prices remained steady under a good demand. Exporters were in the market, and heavy cattle were numerous. If anything, the feature of the market was the activity in the heavy offerings, about 20 loads selling mostly to exporters. While prices generally held steady, tops for heavy cattle were up from 10c to 20c per cwt.

Eight loads of heavy cattle were bought for export at from \$9 to \$9.20 per hundred, and there were a few more loads from \$8.50 to \$8.90. The best sale of the day was a load of 25, averaging 1200 pounds, which sold at \$9.40 per hundred. Some of the rough Western cattle that were recently bought as shortkeep feeders were marketed yesterday. Butcher steers and heifers held steady best load selling from \$8.75 to \$8.85, and the bulk from \$8 to \$8.75. Cows sold steady, bringing up to \$7.50. One cow weighing 1075 lbs. sold at \$8.50 per hundred. Bulls held steady, selling up to \$6.75 and \$7, with exporters buying them up to \$6.25. There was no activity in stockers and feeders.

Calves held steady at last week's close, with the best shipments bringing from \$10 to \$10.50, and a few at \$11. Tops for calves in Buffalo were \$12.50. A good lamb trade was in evidence, with the best offering bringing from \$16 to \$18 per hundred. There was a slow trade in sheep, heavies bringing from \$3 to \$4.50, and handyweights from \$5 to \$7 per hundred. Best spring lambs were selling in Buffalo at \$16. The hog market held steady at \$14.25 fed and watered. Several loads of corn-fed hogs were received and these were hard to sell. Hog receipts in Buffalo totalled 13,000 and the best grades there brought from \$11.25 to \$11.35.

SEVENTY-ONE FINED

Several of our citizens were in Durham last Saturday night advertising the 3rd of June Celebration here. They inform us that no fewer than 71 drivers of autos received summonses from Prov. Constable Blood of Walkerton for neglecting to keep the tail lights of their cars lighted. This should be a warning to autoists who visit Chesley on June 3rd. Constable Blood is also said to have blood in his eye for the bootlegger whom he is trying to 'run out of the county.—Chesley Enterprise.

HOG FOR SERVICE

Junior Yorkshire Hog for service pure Bacon Type. Lot 32, Con. D, Carrick. 2 young hogs, (same breed) early ready for service for sale. Apply for terms to Wm. W. Perschbacher.

Parliamentary Candidate: "And how did you like my speech?" His wife: "Well, it reminded me of the time when you were courting me—I thought you would never come to the point."

Raymond, 5-year-old son of Roy Hoffman of Riversdale, met with what might have proved a fatal accident the other day, when he struck a loaded cartridge with a hammer, the shell exploding and tearing a hole in a plank in a platform on which he was sitting at the time. Mrs. Hoffman, on hearing the report, rushed out of the house and found the lad crying fiercely with the hammer and empty shell lying alongside of him, and a large hole torn in a 2-inch plank, where the bullet had passed through.

A move will be made to resume the annual Grand Trunk Railway excursions this year. The matter will come up for consideration soon and negotiations will likely be opened with the Montreal officials to see if equipment can be provided for a one day excursion. The annual excursions, which were operated under the auspices of the welfare department of the Grand Trunk several years ago to Niagara Falls and other places, were most successful and the railway employees would gladly have the excursions conducted.
