### Report on the War Eagle and Tenderfoot.

## THE YEAR'S SLOCAN SHIPMENTS

### Strikes Upon the Mascot and Sovereign of Slocan and the Boundary Sunset—Notes of Interest From Many Camps—Prospectors Usually at Work.

There is an interesting report from the Kamloops district this week on the Tenderfoot mine, which, according to Mr. Monekton, is a first-class low grade proposition. From the Lardeau old timers will peruse with interest the recent discoveries made upon the Primrose and Old Gold properties, which were considered good properties here a couple of years ago. The Nettie L. has uncovered a fine body of nearly solid galena ore. The B. A. C. are developing their properties in East Kootenay and their manager there, Mr. A. T. Pollett, reports good progress on the Hoskins group. At Ymir the same company have practically proved the possibilities of the Mist Fraction, and are said to be contemplating the introduction of machinery. Strikes are reported on the Mascot and Sovereign in the Slocan and also on the Sunset in the Boundary country, where some particularly rich gold-copper ore has been located. In the Similkameen the Royalty group is the latest which has attracted the attention of English capitalists.

## KAMLOOPS.

### Report on the Tenderfoot Mine—The Hill Top and Others.

The Iron Mask vein is being crosscut in the tunnel and some very fine ore is being encountered. Several feet of ore has been cut through. The crosscut is now 11 feet from the shaft.

The tunnel on the Kimberley is now in 254 feet, and 48 feet of ore has been driven through, of a value of \$12 to \$14 per ton. From the looks of the face the indications are that the main ledge will soon

## THE LARDEAU.

### The Primrose and Old Gold—A Strike on the Nettie L.

The men working on the Ruby Silver a Lexington creek property, are getting some fine ore.

Two men are at work on the Alma group on Pool creek. The tunnel on this property, which is owned by Cory Menhinick, is being driven in solid galena ore.

Work will be begun on the Useless and Valkrie shortly. This claim, which is located on Lexington creek, is owned by W. Price and has a lead exposing 8 feet of fine concentrating ore.

Andy Ward and E. M. Morgan have now driven a 19-foot tunnel on the Golden Gate. They are now at work and will add another 15 feet to this before many weeks.

Randolph Higginson and G. Fordred went up to the Randolph, located on Gainer creek, last week, as a preliminary to commencing assessment work in a week or two.

Thomas B. Johnston recently of Kaslo, but now of Moyie City, was in Ferguson last week sizing up the Crackshot, a property in which he and a brother, and J. B. Johnson of Rossland, are interested. A deal is now pending on this property which is consummated will mean a lot of development work.

W. H. Jackson will spend over \$25,000 in development on the Black Bear group of claims. These claims, which are located on Boyd creek, are a silver-lead proposition and have an ore body of between 4 and 5 feet of solid shipping ore. Development will also be commenced on the Wide West, a property owned by the same company.

E. F. Boyles of the Inland Empire Co-operative Mining company, Spokane, was in Ferguson last week to look over some Lardeau properties, but as the ones he wanted to see were located in the snow belt Mr. Boyle decided to return to Spokane and again visit the camp in July, when in all likelihood, he will purchase two or three properties for his company.

E. M. Morgan was in Ferguson last week. He says he has sunk a 19-foot shaft on the lead on the Alpine, owned by himself and Andy Ward, and located over

He says good progress is being made on the work on the lines mentioned recently. He states that a large, strong lead is being developed, but as they have been making no assays he is not prepared to say anything regarding values.

An average of 7.8 carloads per day 22 tons to the car—have been shipped from the North Star mine and Sullivan group during the ten days ended last night. This is not a spurt, but steady shipments, which are increasing, and will continue to do so with greater rapidity when the Sullivan bucket tram is installed. The Cranbrook Herald has what it deems authentic information to the effect that net returns of the first shipment of Sullivan ore was \$13 per ton, which considerably exceeded expectations.

George Douglas, a prospector from the vicinity of Empire City, was in town last week. Mr. Douglas has two claims, the Bluebell and Bluebird, which adjoin, in that vicinity, and have two ledges traversing the entire length of each, one being 2 1-2 feet wide and the other 20 inches; no assays have been had as yet; although the quartz is generously spotted with galena and there is some indications of copper and gold. Mr. Douglas says they have been throwing out considerable stuff resembling carbonates, and it is to be tested by assays. Further over the "Bishop Boys" are working their claims; they have been drifting alongside the lead and are now crosscutting, or about to do so; the appearances at the present time, it is said, being quite satisfactory. Many prospectors are coming in either to search for mineral or work their assessments. The same conditions also apply to the Sand Creek district.

## YMIR.

### The Ymir Mine Returns—The Mist Group of the B. A. C.

W. F. Edgar and J. Gill left town last week with a pack train and crew of men to commence work on the Libee. This is a very promising prospect on Big Horn mountain, adjoining the Sophia and Happy Thought.

Messrs. Blanchfield, Goodald, F. Philbert and Jackson are in from the War Eagle group on Sixteen Mile creek. They have brought in some splendid specimens of free gold discovered at the depth of 20 feet in the shaft.

Amos Thompson is resuming work on for milling purposes. His properties situated close to the Mountain Chief.

The Slocan Star will soon commence a 2,000-foot crosscut tunnel. It will be opened a short distance from the mill and will be double-tracked. This will be the longest tunnel in the Slocan.

It was once thought that there was only one vein in the Noble Five. Late developments have shown three veins within 140 feet in one of the levels. Work has been suspended until the flow of water from one of them ceases. James Duasmur will inspect the property some time this month.

The Graves company has commenced work on the Rockland, a claim not far from New Denver. The wagon road from the Galena Farm will be extended to the property and later in the summer a compressor will be installed. James Hamilton is manager and superintendent.

The Silver Bell, near the Last Chance in McGuigan Basin, is the latest property to start up. More work is to be done in the lower tunnel to crosscut the vein. It is in from 350 to 400 feet and is thought to be within 60 feet of the ledge.

Mr. O'Neill, the locator of the Ruth mine, is in Kaslo. He says the recent find on the Hope is 30 feet on the Ruth company's ground. Mike Kerlin is above and certainly has the lead. Mr. O'Neill is now working the Chicago of which more will be said next week.

A strike of importance was made on the Sovereign when the Reco-Goodenough ledge was found cutting across this ground. Surface work has shown 12 inches of clean ore. Manager G. T. Ransom has started a tunnel 55 feet below the find. J. M. Harris and J. A. Whittier, who own the adjoining claims, the No. One and Twilight, have started a tunnel lower down to catch the ledge on their ground.

The Minnesota Silver company, which has been steadily developing its property at Sandon since 1892, recently placed an order with the Hamilton Manufacturing company for a 200-ton concentrator, which will be erected at the earliest possible moment. B. C. Ribblett succeeded in securing the contract for the building of the tramway at a cost approximating \$25,000. Altogether the company will spend \$75,000.

The manager of the Hazel mine says: "We have very good prospects on the

## THE MINING WORLD

### Col. Wharton has Sold His Interest in the Cliff Mine.

## SHIPMENTS FROM THE WINNIPEG

### The Net Returns are Satisfactory to the Management—Work has Been Resumed on the Green Mountain—Progress of the Development of the Ca'ornis.

Colonel S. M. Wharton, one of the pioneers of the camp, is in the city from Georgia, on a visit. He, in the early days of Rossland, operated the Cliff mine, and extracted about \$25,000 worth of ore therefrom, and declares that there is plenty more there yet. He owned the mine jointly with Mr. John K. Cook, the well known capitalist, but some differences arose and the work ceased upon it about two and a half years since. An effort is being made to have the Cliff incorporated, which, it is thought, will be successful. Colonel Wharton was asked if he knew anything about what is going to be done with the Cliff and replied that he did not, for the reason that he had recently disposed of his right, title and interest in it. He declared, however, that it had some excellent ore shoots and would, with proper development, make a mine, he thought, of prominence.

Colonel Wharton showed the reporter some large lumps of virgin gold of an aggregate value of \$250 or \$300. These, he says, came from his mine in Georgia, in which he had invested \$40,000 and which had paid him dividends for a long time. "Still," he said, "my interests are more in the west than they are in Georgia, and I consider my home to be in Spokane. I have made money out here and hope to make more, and notwithstanding my mining venture in my native state, I will spend most of my time out here looking after my interests."

## THE WINNIPEG.

### Good Return from Ore Sent to the Trail

Alaska, in all of which a few of us here hold stock. C. H. C.

(On inquiry of the local agent of the English-Canadian Company, Limited, it was learned that nothing was being done on the Lily May, nor on the properties of the Fourteen Gold Mines Consolidated. As to the other ventures of the company in Oregon, on Vancouver Island and in Alaska, he said he knew nothing.)

## Monte Christo Is Shut Down.

Chicago, June 10.  
Editor Miner: I write you for information regarding the Monte Christo Gold Mining Co. Are they mining, and with what prospects? What is the stock quoted at?  
EDWARD M. JOHN.

The Monte Christo shipped, during the early part of the year, 273 tons of ore to the Trail smelter. The ore was of low grade, and was taken by the smelter on account of the iron in it. Early in the year the property was shut down, and then it was stated that it was to start up later in the year. Mr. C. R. Hosmer, the leading spirit and later one of the larger stockholders of the company, is in Europe, and it is thought when he returns that operations will be resumed. On the Rossland stock exchange 4 1-2 cents is asked for Monte Christo shares and 3 cents bid.)

## EAST KOOTENAY.

### Three Big Mines There That Are Producing Ore—More Coke Ovens.

Mr. George C. Hinton, of the Hinton Electric Company, is in the city, having just returned from a trip through East Kootenay. He reports that East Kootenay is flourishing. The North Star, near Kimberley, is shipping 100 tons of ore per day. Mr. Frank Robbins is in charge of the North Star, and is pushing the work upon it. The Sullivan is sending a couple of carloads of ore daily to the smelter. The St. Eugene is actively engaged in extracting ore and operating its concentrator. It is sending out a considerable tonnage of concentrates. Besides these banner mines a number of smaller properties are being developed, and the entire section is rapidly coming to the front. In addition to the coal mines there is considerable activity in coal mining and coke making. At Fernie the Crow's Nest Coal company has over 200 coke ovens

clusion that the selection of Mr. Dunsmuir would be the easiest and quickest way of preventing any coalition of the members from the Island and the Mainland and therefore of bringing about, in the near future, another dissolution of the assembly.

If such was Mr. Martin's idea in recommending that Mr. Dunsmuir be sent for, no speaker, no newspaper nor any political opponent of his in British Columbia can have an reason to reproach themselves with any harsh things, no matter how severe, which they may have launched during the campaign against Mr. Martin. More than anything else, it shows the inherent maliciousness of the man, the desire he possesses of serving his own personal animus and satisfying his own private ends. If Mr. Dunsmuir should prove, as many people of the province will fear that he will prove, not only an impossible man for the office, but a cause of disintegration, rather than union, among the opponents of Martinism, then the late premier must be regarded as very largely the cause of a trouble which will yet farther prove a source of endangerment to the interests of the province, and he should henceforth be considered not only by those who were his opponents in the recent elections, but by those who supported him, as a most serious menace to the progress and prosperity of the country, and as such should be retired by common consent to the obscurity of private life. This as much as anything else, more perhaps than anything that has previously taken place, ought to lend decision to Sir Wilfrid Laurier's wavering resolution and convince him of the absolute necessity of the immediate dismissal of Lieutenant-Governor McInnes, the man who seems to have no mind of his own, and who allows Joe Martin to do his thinking for him.

#### REPORT OF MINISTER OF MINES.

In another column will be found extracts from the report of the British Columbia minister of mines for the year 1899. These annual reports contain much data of value, and the one just issued is quite as valuable as any that have hitherto been issued. There are minor blemishes, it is true, but nothing which seriously affects the value of the report. The total value of the mineral output for the year 1899 was \$12,393,131, against \$10,906,891 for 1898. This shows an increase in 1899 over 1898 of \$12 2-3 per cent. This is a gratifying showing, and reveals that the mineral industry is growing, despite the fact that operations were suspended for the greater portion of the year in the Slocan, one of the leading mining divisions, owing to labor troubles.

yesterday offered portfolios consent to join the government. He has divided the positions equally between the Island and the mainland, a fact which might call for some criticism of an adverse nature, the population and importance of the Mainland being so much greater than those of the Island. However, as Mr. Dunsmuir has had many conflicting interests to reconcile and much factional feeling to overcome before he could harmonize the various elements necessary to the patching up of his administration, this seeming bias in favor of the Island may be pardoned. This much may be said, too, that there has been a better division of the offices than has been known in any previous administration, and a franker recognition by the Turners of the dominant importance of the Mainland. Yesterday Messrs. Turner and Ebberts were sworn in as colleagues of Mr. Dunsmuir, and it was learned that last evening Mayor Garden of Vancouver, A. W. Smith of West Lillooet, and Wells of Northeast Kootenay, had been offered the remaining positions. This should make an excellent government, provided these gentlemen accept and are returned when they go back to their constituencies for re-election. Mr. Dunsmuir's announcement that business and not politics will be his chief consideration in the conduct of Provincial affairs is certainly pleasing, and if adhered to Mr. Dunsmuir ought to become a political, as he now is a financial, power in the Province.

There is some doubt about the re-election of Mr. Garden should he accept the position offered in this Turnerite administration. The old-time jealousy with which the people of Vancouver regard the Island has never died out, and it is very probable that should Mr. Garden go back for re-election he would be opposed by a Martinite, and, not unlikely, be beaten. The other two Mainland representatives, however, would in all probability again find favor with their constituencies. With a fairly good business government and 23 supporters in the house, Mr. Dunsmuir should be able to carry on the business of the country without any fear of successful machinations on the part of Fighting Joe and his faction.

It would be unfortunate, we think, if by this happy termination of the political trouble Lieutenant Governor McInnes were allowed to retain his office and his sins be overlooked in the feeling of general satisfaction which would prevail. He has done all that he possibly could do to put the Province to trouble and expense, and his action was calculated to inflict an immense injury on all the commercial and industrial interests of the country. He

the claims of this district to so important a portfolio.

In view of these facts, this is Mr. Dunsmuir's opportunity. Everyone admits that Mr. Mackintosh would be the best minister of mines that could be selected. His services in bringing capital to develop our mines should be gratefully recognized. His standing abroad, with the financiers of London, would restore confidence and prove a tower of strength to the Dunsmuir administration. His experience and knowledge of the requirements of the mining sections would be invaluable in framing a policy calculated to place the mineral wealth of this great country before the investors of the motherland. Apart from all considerations of political expediency, the mines department should be considered the most important in the gift of the premier, and should not, therefore, be handed over to an unknown politician of no experience, simply because of his election in a rural constituency. Mr. Mackintosh is the right man for the position, and a constituency can always be found for men of his standing and ability. And it is certain that Mr. Dunsmuir, in offering to Mr. Mackintosh the portfolio of mines, would receive practically the unanimous support of the district to which he would be so justly entitled. The feeling of uncertainty and gloom which has settled upon us would be dispelled, and the mining districts would emerge from their befogged political condition into the full brightness of an era of prosperity and good times, which means much for the advancement and betterment of the commercial condition of the province as a whole.

#### A MENACE TO THE PROVINCE.

The Rossland board of trade, in no uncertain tones, asks for the recall of Lieutenant-Governor McInnes, and requests that other like bodies join with it in requesting that Her Majesty's representatives be removed from his present sphere of non-usefulness and relegated back to the quieter scenes of private life. They request this, too, for a very good reason, which is that he is a "menace to the prosperity of the province." A public official must, indeed, have most flagrantly misbehaved himself to have caused a body like the Rossland board of trade, which is slow to anger and does not move without due and careful forethought, to demand the dismissal of an official of his exalted rank. Mr. McInnes is evidently not of the opinion that a public office is a public trust, but rather that it is a private holding which he can use to his own aggrandizement, and to help his relations. Indeed, judging from his actions he strongly favors nepotism, and is ready to break time honored constitutional practices and set aside ancient precedents

doing that which is necessary in the interest of the province. Mr. McInnes, by his conduct, not only attempted to serve his personal feeling of enmity to the majority of the last Legislature but he outraged the common sense of every resident of British Columbia, and as his action was the result of malice, he should bear the punishment which the failure of his designs ought reasonably to entail. The Liberal Association at Vancouver or a portion of that organization some little time ago attempted to defend the Lieutenant-Governor, and presuming to speak for the party throughout the province, counseled the Federal Premier to take no action such as the convention of yesterday called for. In doing so the association at Vancouver was simply obeying the behests of Mr. Joseph Martin and was not speaking for the Liberals of British Columbia. Over 90 per cent of the members of the party in this province are anxious for Mr. McInnes' removal, and will be disappointed if Sir Wilfrid Laurier does not take action almost at once. The association at Vancouver does not represent Liberalism or the Liberal party at all. It ceased to do so some months ago. It is a purely Martin organization, and speaks for him and him alone. As such it should have no standing and has none with the Liberal party in British Columbia and the members of the government at Ottawa should understand this and act accordingly.

#### COST OF MINING, ETC.

In a report recently cabled to London, Mr. Macdonald stated that for the four weeks ending May 19 he had shipped to the smelter from the Le Roi 13,216 tons of ore of an estimated value of \$219,000, and that the cost per ton for mining, development, smelting, refining and realization expenses, added together, did not exceed \$8 per ton. The mining done by the Le Roi is on a large scale, and is carried on economically and scientifically. The smelting is done in a plant which is owned practically by the Le Roi company, and is, therefore, at cost. Under the circumstances it shows that \$8 is about the minimum cost of mining and smelting, etc., in this camp when carried on on a large scale and under the most advantageous circumstances. An ore which would yield \$9 to the ton would, therefore, pay the Le Roi Mining company to send to its smelter as it would give \$1 per ton profit. On the other hand, a smaller company, operating on a restricted scale, and paying the prices asked by the customs smelters could not mine ore that went under from \$10 to \$11 per ton at a profit. There are, however, some very large deposits of ore in the camp which run from \$10 to \$13 per ton, and this, if economically handled, would yield such a good margin of profit that the companies operating them could be made to pay dividends.

From Mr. Macdonald's figures it will be

Despite the fact that the attention of the council was called to the crying grievance in connection with the Fourth avenue roadway nothing was done at last night's council meeting to relieve the situation, and this was largely owing to the fact that Alderman John Dean insisted on having his way, and the bare quorum of members of the council who were present were not disposed to dispute matters with him. He has now another scheme on foot which he proposes to manage in the same way that he has most of the civic work which he has bungled during his term in the council. He urged on the council the necessity of extending Columbia avenue west from Davis street, and he wants the work to be proceeded with at once without submitting any estimates of the cost or any proof of the necessity of the work. With the desirability of this extension of Columbia avenue we certainly agree, but when it is proposed by the head of the works department we naturally expect that he will place an estimate before the council showing what it will cost and within what time it can be done. Alderman Dean evidently did not think that this was necessary, and when questioned in regard to it by Alderman Hamilton he said that it would take the city engineer too long a time to go into the details of the matter, and he suggested that if it were found to be too great an expense the work might be stopped at any moment as work had been stopped on Second avenue and Davis street. He also assured the council that the work would not cost more than \$250 or \$300. His assurance, however, in such matters, does not count for much, since he made the same statement in regard to the work on Davis street, which, uncompleted as it was, cost just double what he declared it would. He advanced the ridiculous argument that if this work were not gone on with, the corporation laborers would be idle and the corporation horses would be eating their heads off. What necessity is there of this when the grading on Fourth avenue can be done by them, and done much quicker and more cheaply than by contract, which Alderman Dean appears bound to impose upon the city? The whole course of Alderman Dean since he has been in the council has been consistent—consistently stupid, and in direct opposition to the interests of the rate-payers; and, so far, the council seems to have lacked either the intelligence or the courage to put a stop to his useless method of expending the city's money. It is to be hoped that the mayor will very soon return and restrain with a very strong hand the imprudence and improvidence of this inexperienced and burlesque member of the council.

to actual fighting Canada could at once put a most effective force in the field. The outlook at present, judging by the way matters are trending in China, is certainly not in the direction of peace, and the citizens of this dominion must be prepared to play men's parts in any emergency that may arise in which their own interests or those of the Mother Country are jeopardized, as they are at present doing in South Africa. They must practically follow out the old maxim which says that "in time of peace prepare for war."

#### A Notable Visitor.

Mr. Thomas Skinner of London, Eng., one of the directors of the C. P. R., and also a director of the Hudson Bay company, was in the city yesterday, and spent some time visiting the principal mines. Mr. Skinner was much impressed with what he saw, and was very pleased with the evident signs of progress in and about Rossland. He was particularly pleased with the developments in the Le Roi and other Red Mountain properties. Mr. Skinner is well known in London financial circles, and is looked upon as a very conservative authority. He is the editor and proprietor of the Stock Exchange Year Book, which is the recognized standard work with regard to stock exchange securities in London. He is also the editor of the Canadian Gazette. Mr. Skinner is traveling in the car Metanedia, which is President Shaughnessy's private car, and was accompanied to the city by Mr. Marpole, western superintendent of the C. P. R. Mr. Skinner and his party left last evening for the coast. After visiting the coast he will return to London via the C. P. R.

#### FROM THE RECORDS.

##### Bills of Sale.

June 19—Republic and Democrat, 1-2; H. Hansen, Jas. Hanley and Dennis Murphy to F. R. Blockberger; \$1.

THE STOCK REVIEW

Sales for Last Week Aggregated 91,500 Shares.

WINNIPEG IS THE BIG SELLER

The Other Stocks That are Moving at Present—A Good Market is Promised as Soon as the Crops are out of the Way—Other Pointers.

The seasons come and go and bring no great change in the condition of the stock market, but when the profits does come for the better some large profits will be made out of shares which are going a begging at present.

Brokers, when asked where there will be a lively market, say that there will not be a good real active movement in stocks until money gets easier.

The sales for the week ending yesterday were as follows: Thursday, 13,000; Friday, 15,000; Saturday, 17,500; Monday, 16,500; Tuesday, 21,000; Wednesday, 8,500.

Winnipeg has been the leading seller during the past week, and sold to the extent of about 27,000 shares.

Brandon & Golden Crown is quoted at 20 asked on the board. Shipments continue to be made from this mine and the smelter returns, as will be seen elsewhere in this issue.

Alderman Hamilton again objected on the score of expense. Chairman Dean declared it would not cost more than \$250 to \$300.

Winnipeg, 500, 500 at 15 1/2c; 500, 500 at 15 1/2c; Waterloo, 1,000 at 1 1/4c; Morning Glory, 1,500 at 4c.

Table with 2 columns: Stock Name and Price. Includes entries like Athabasca, B. C. Gold Fields, Big Three, Black Tail, California, Brandon & Golden Crown, Canadian Gold Fields, Cariboo, etc.

Winnipeg, 500, 500 at 14 3/4c, 500, 500, 500, 500 at 15c, 5,000, 500, 500 at 15 1/2c; Noble Fire, 500 at 4c; I. X. L., 500 at 1 1/4c; Evening Star, 1,000 at 8 1/2c.

THE COLUMBIA-KOOTENAY ROAD

THE MINE HAS TO SHUT DOWN FOR LACK OF SUPPLIES.

The Civic Authorities Will Make No Effort to Relieve the Situation—Unaccountable Actions of Alderman Dean.

The force of men employed by the owners of the Columbia-Kootenay mine in cutting a road for over 1,000 feet from the corner of Fifth avenue and Georgia street to the wagon road to the Iron Coot, establishing a very good grade, is practically finished.

While the mining people have done their share of the promised work and have brought a road to the city limits, the city authorities under the autocratic rule of the acting mayor, as he is pleased to style himself, are yet supreme, and nothing has been done towards opening the road to be supplied with provisions and the necessary accessories for working.

The aggrieved parties, and there are several properties in that neighborhood, say that it is customary to consider the mines as the life-giving arteries supplying blood to the town itself, and they think that some attention should be given to them, even if some ratepayer has to go without a board sidewalk for a few weeks.

THE CITY COUNCIL

The City Limits and Government Roads—The Board of Works.

At the city council meeting last night at the city hall there were present Aldermen Talbot, McKenzie, Hamilton and Dean.

LEAGUE MATCHES.

Rossland Beats Three Coast Teams and Is Beaten by Three.

The scores of the rifle teams at the coast show how far the young company in Rossland have to travel before it is reckoned among the first teams in the country.

AN ATHLETIC CARNIVAL.

A Number of Very Interesting Events Have Been Arranged.

WILL HAVE A GOOD TIME.

Greenwood Intends to Elaborately Celebrate Dominion Day—The Program.

Mr. Percy T. Godenrath, the Greerwood newspaperman and resident correspondent of the Miner, arrived in the city yesterday.

At Greenwood great preparations are being made for the Dominion Day celebration on a Sunday the holiday falling on Friday and Saturday, the 29th and 30th inst.

THE EAGLES GRAND LECTURER

HE IS A MAN OF MORE THAN AVERAGE ABILITY.

He Has Started on a Tour Which Will Occupy Him for Over a Year—A Fraternal Democracy.

Mr. H. H. Thompson, the grand organizer of the Fraternal Order of Eagles, is in the City on an official visit.

Mr. Thompson is a man of many sides and of more than ordinary ability. He shines as a raconteur and as an after-dinner speaker, and there are not many who can set the table in a roar as readily as he can.

Mr. Thompson has taken a prominent part in the political affairs of the State of Washington. He has dabbled in mines and has had the ups and downs that are to be found in that business.

THE NEW GOVERNMENT.

Joe Martin Promises Them a Hot Time as Soon as They Meet.

Vancouver, B. C., June 20.—(Special.)—Nearly all the politicians have left town for their homes, the Victoria delegation going by Premier Dunsmuir's special steamer at 2 o'clock this morning.

Mr. Dunsmuir is out with a very sarcastic interview in which he says, when referring to the convention, that of course, there is no law against politicians making asses of themselves.

Dennis Murphy and Wells will probably be offered cabinet positions, it being thought better that one or two Liberals should be appointed. Joseph Hunter as commissioner of lands and works, and Green for the mines portfolio are receiving considerable support.

McInnes Won't Talk.

McInnes Has Refused to Make any Statement Regarding his Dismissal at the hands of the Laurier cabinet.

A Detesting Policeman.

Victoria, B. C., June 20.—The attorney-general's department is endeavoring to locate Sergeant Atkins of the provincial police. He was last heard of in Seattle on Tuesday, the police locating him when his absence commenced to arouse suspicion, he having remained away on a case longer than he should have done.

DEVELOPMENT IN BOUNDARY

MANY OF THE PROPERTIES ARE OF HIGH GRADE ORE.

What Is Being Done and What Is Expected in Deadwood Camp—Interest Again Manifested in Camp McKinney.

Greenwood, B. C., June 11.—(Special.)—Mining development in the many camps of the Boundary district is moving along smoothly and interest now centres in the smelter returns of the mines that have started shipping.

A brief despatch recently told of the starting of work on the Marquette claim in Deadwood Camp.

Today the writer spent the best part of the forenoon visiting another Deadwood Camp mine, the Buckhorn.

Interest has again been manifested in Camp McKinney. Superintendent Thomas Graham when here yesterday with his 105 ounce gold brick did a considerable amount of missionary work in showing what the development of a property in that camp is capable of doing.

For a new district the West Fork of the Kettle river is claiming a large share of attention.

arranging for the purchase of a sawmill plant to supply lumber for the various properties nearby as also for building up the townsite.

GREENWOOD NEWS.

A Newspaperman's Enthusiasm Over Myers Creek—Visitors to the City.

Another visitor in the city has been the Ven. Archdeacon Pentreath, Archdeacon of New Westminster and Kootenay, who has been here the guest of Mr. and Mrs. Robert Wood.

OUTLOOK AT GREENWOOD.

Toronto Operators Have Secured an Option on the Early History Group.

Greenwood, B. C., June 15.—(Special.)—The prospect of a third smelter being built in the Boundary district is again being talked of.

Mr. Jay P. Graves wishes to acquire the City's Waterworks.

GREENWOOD NEWS.

Plans Being Perfected for the Dominion Day Celebration.

Greenwood, B. C., June 16.—(Special.)—Since the commencement of the week, and the change in the time of running on the Columbia & Western branch a notable increase of travel has been inaugurated.

GRAND FORKS NEWS.

Proposition of Mr. Graves to Purchase the Waterworks System.

Grand Forks, B. C., June 16.—(Special.)—Some additional details of the proposition made to the city of Grand Forks, looking to the acquisition of the waterworks and electric light plants.

There was a fear this afternoon that Governor McInnes, who had been asked to resign, would dismiss the minister who had been unfaithful to him in asking the Governor-General of Canada for his dismissal.

GRAND FORKS NEWS.

Mr. Jay P. Graves wishes to acquire the City's Waterworks.

GRAND FORKS NEWS.

Grand Forks, B. C., June 15.—(Special.)—Jay P. Graves, general manager of the Granby smelter, has submitted a proposition for the acquisition of the city's water works and electric light plants.

GRAND FORKS NEWS.
