The Downward Revision Of The Freight Rates

A downward revision of freight rates would induce a larger volume of railway traffic, increase railway revenues and tend to eliminate the existing discrimination against the western producer and consumer, who is compelled to provide the major portion of the revenue at the present time according to statements made in the case filed by the Canadian Council of Agriculture with the Board of Railway Commissioners. The case has been filed in view of the impending general revision of freight rates and is of a preliminary nature, the Council of Agriculture assuming that there will be public sittings of the Railway Board at which detailed evidence can be submitted.

"In striving to bring about a reduction of freight rates," states the document, "the Board of Railway Commissioners might well take into consideration the feasibility of reducing overhead, expenses and costs of operating the railways. So long as the Board is prepared to fix rates at such a level that the railways are under no compulsion to keep the costs of operation, including sales and wages at the lowest possible level, the cost of living considered, so long will freight rates tend to take from the primary producer too large a share of the price received for his products on the consuming markets."

Commissioners might well take into consideration the feasibility of reducing overhead, expenses and costs of operating the railways. So long as the Board is prepared to fix rates at such a level that the railways are under no compulsion to keep the costs of operation, including sales and wages at the lowest possible level, the cost of living considered, so long will freight rates tend to take from the primary producer too large a share of the price received for his products on the consuming markets."

Tid-bits on the Tip of Everybody's Tongue

Vol. 2 No 31 NEWCASTLE, N. B. AUG. 4 1925 FREE

Horse Sense

You've noticed that Moirs horses are all black—beauties every one of them. They are groomed twice daily by a special staff under

Mr. Frank Boutillier, in ideal quarters. For example, their feed is all electrically cut, their water provided from special taps which the horses turn on themselves by pressing their nozzles in the bowls. And, by the way, to protect their feed a number of cats are kept; all black like the horses.

New Brunswick Defeats Premier Veniot's Administration

MIRAMICHI HOSPITAL ANNUAL REPORT

During the Fiscal Year ending 30th April, 1925, the Miramichi Hospital has had a large measure of success in carrying out the object of its Founder in establishing an Institution "for the care and treatment of sick, disabled and infirm persons."

The patients admitted during this period numbered 473, being an increase of 26 over the admissions of the previous year, and of these many received Hospital care wholly through the Institution and the generous aid of its supporters.

Thirty free patients were admitted and treated, and fifty-four others made no contribution. These 84 patients mean 1510 days of free Hospital treatment and care, and in addition to these, forty patients have been able to pay only in part. Surely in these items alone there is "full reason" for our continued effort.

Training School.

The Training School for Nurses has also grown both in its provision and equipment and also in the number of Student Nurses. The Superintendent's Report shows that since our last Report Three Nurses have been graduated and successfully passed the R. N. Examinations; Twelve Nurses are now in training and Five Nurses have been admitted as Probationers. Our affiliation with the Training School of the Montreal General Hospital has been an advantage both to our Students and to our Hospital and we are pleased to report that the Records of our Nurses in this affiliated course show the efficiency of the training in our own School.

The Board takes this opportunity of acknowledging the faithful services of the Medical Staff in providing lectures to the Student Nurses and also the generosity of Lt. Col. MacKenzie of Chatham who at much personal inconvenience has again given the Students the advantage of his weekly lectures throughout the year.

Nurses' Home.

The Home was formally opened on the fourteenth day of October last and already it has contributed to the success of the Training School and the Hospital itself. We were particularly fortunate in procuring the services of Miss Rebecca Moffat, its first Matron. Miss Moffat not only organized the Home as an Institution but to her efforts are largely due its auspicious start and its unique position as a real Home for the Staff.

The furnishing of the Home has been provided in generous measure by special contributions as follows:

- Living Room: by Lounsbury Co., Ltd. in memory of the Late Major W. H. Belyea.
- Bed Room: by Whitney Branch of the Hospital Aid.
- Bed Room: by Mr. F. Neil Brodie, Saint John, Architect.
- Library: by the Medical Staff of the Hospital.
- Dining Room: by Lord Beaverbrook Chapter I. O. D. E.
- Lecture Room: by Northumberland Lodge F. & A. M.

The balance due on the building and its furnishings amounts to \$2246.78; Arrangements have been made for carrying this indebtedness

Opposition Conceded 36 Seats and Government 12. Much Interest taken Throughout the Province.

Yesterday the Opposition forces under the leadership of Hon. J. B. M. Baxter were successful at the polls in defeating Premier P. J. Veniot's administration. Throughout the entire province, much enthusiasm prevailed on both sides and the vote polled is regarded as being an ordinary one in provincial elections. During the early hours the voting was small but as the day progressed the electors turned out in large numbers, which continued until the polls closed at 4 o'clock. Workers on both sides did their utmost for their respective parties and this had much to do in securing the vote that was polled. In this section the weather was dark threatening rain, but notwithstanding the ardor of the workers was not dampened until time for the polls to close. In Northumberland County the polling, generally, was straight ticket voting and when the returns were received the respective supporters were given many surprises. Places, where the government felt they were sure to get majorities went the opposite and many predictions proved to be worthless. The returns were very slow coming in and it was difficult to get anything authentic, although it was soon realized that the Opposition had swept the province.

In the evening the Newcastle Band rendered a musical program from the band stand and the large gathering was addressed by Candidates-elect

O'Brien and Lavoie, C. E. Fish, Joseph Manderson and D. S. Creighton. The latest results obtainable here give the Opposition 36 seats and the Government 12.

| MORRISSY | 4190 |
| PRICE | 4166 |
| SAVOY | 4158 |

reasonable interest but it is imperative that early effort be made to liquidate the debt in whole or in part.

Hospital Aid.

Next to the provision made by its Founder the Hospital Aid continues to be the principal support of our Hospital. During the past year it has given the same steady generous aid in the general maintenance; simply we could not carry on without it.

Extension.

By reason of relief given by the opening of the Nurses' Home, the Hospital has been able to open two new wards, both on the ground floor; one a Children's Ward, and the other a Medical Ward for Women. The former has been fully furnished by Mr. R. Corry Clark in memory of the Hospital's first President, the Late William A. Park.

Obituary.

During the year the Hospital has met serious loss through the toll of death. Mr. Park died in June, 1924. He was our first President and it was chiefly through his foresight, sound judgment, and active interest that the Hospital Management adopted the lines of business conduct which have carried it through which we hope to continue.

To the Superintendent, Miss Campbell, loyally supported by her Assistant, Miss Grace Moffat and the Hospital Staff, the success of the Institution is primarily due.

The co-operation of the Medical Staff and their faithful services along the best traditions of the Profession, and the efforts of all connected with the Institution towards betterment in the several branches, urge the Board towards greater effort.

On behalf of the Board,
(sgd) ALLAN A. DAVIDSON,
Vice-President.

"Let the Maritime Provinces Flourish by Their Industries."
BORDEN FACTORY-TRURO, N.S.

WILL BOOST THE MOVEMENT TO BUY IN CANADA

Unequivocal support for a "buy-in-Canada" movement that will be extended from coast to coast was voiced at a representative meeting of Montreal bankers, brokers, bond dealers and transportation companies.

"To promote the purchase as much as possible of goods produced in our country, work has been going on for ten years," said J. H. Fortier, Dominion President of the Canadian Manufacturers' Association, following the meeting. He declared that if a national movement having this for its aim were once started its result would be immediately felt in the great boost that it would give to native industry.

Agriculturists and other producers and consumers will be approached to lead their aid.

Drummondville will be the scene of a large meeting in connection with the movement on August 12, and thereafter meetings will be held in all the principal centres of Quebec.

A similar campaign is being conducted in Ontario, and when the Central Provinces have been thoroughly organized the movement will be extended to embrace the Maritimes, the Prairie Provinces and the Pacific coast.

Ferocious Hurricane In The Alps

Turin, Aug. 5—A hurricane raged through the Alps today tearing up houses and trees and endangering the lives of dwellers among the peaks.

From Monterosa came word that two Alpine climbers had been swept away by the swirling force of the storm. One of them was blown down into an abyss, while the other, for a fleeting moment, clung in safety to a rope above the gaud chasm. Then a stronger blast swept him, too, down to the depths.

Customs House Burned

Another tale of tragedy came in from Everea, relating the fate which had befallen Montegarone, 2500 feet above sea level. There the pious villagers were celebrating the fast of the Redeemer when the hurricane roared in from the mountains, knocking down houses and tearing up trees.

In its path wind seized a woman, dashing her as though she were no more than a blade of straw down the abyss below.

From Bolzano on the border of the Tyrol came the report that customs houses had been burned with enormous damage.

IN THE WORLD OF INDUSTRY

Kansas Claims a Champion Wheat Grower

Tempico is the largest seaport and chief industrial city of Mexico.

United States consumes 75 per cent. of all the rubber grown in the world.

One hundred years ago the only known use for rubber was for removing pencil marks.

The only cobalt mine in the United States is located near Fredericktown, Missouri.

Many valuable products come from the mangrove forests of Siam, which cover an estimated area of 320,000 acres.

Largest and most powerful motor vessels in the world, the Royal Mail liner Asturias (22,000 tons) has just been launched at Belfast.

Castle soap, although made in Spain, is little used in that country, for toilet use the Spanish taste requires a highly perfumed soap.

The bricklayers' union, which took over the marble setters' union ten years ago, is now credited with an ambition to absorb the plasterers.

Sugar-cane was first grown in territory now constituting the United States in 1751, and seven years later the first American sugar mill was built near New Orleans.

An official report just issued by the Ministry of Labor shows that on July 1 there were 1,304,300 unemployed registered in Great Britain, or nearly 300,000 more than a year ago.

Northwestern Kansas claims a champion wheat grower in Albert Weaver, of Bird City. Mr. Weaver has harvested 4200 acres of wheat this year, amounting to more than 80,000 bushels. He expects the crop to net him in excess of \$120,000.

In celebration of the centenary of the first railway and in honor of the memory of its builder, George Stephenson, the British Institution of Mechanical Engineers has decided to give an annual prize, and to raise a fund for research fellowship.

The first United States patent for a sewing-machine of which there is any existing record was granted to John Greenough on February 21, 1842. This machine employed two needles that were pulled entirely through the cloth by pincers, and the stitch was formed with two threads. The machine was used principally on leather work.

The present coal crisis in England has served to recall the methods employed by the miners in bringing their grievances to public attention more than a century ago—in 1815. At that time the workers made their protest in person. They dragged loads of coal to London and demanded to see the Prince Regent. But the magistrate sent for them, told them they must not bother London's august personages and bade them get back to their work. And they went back home, carrying their loads behind them.

Russell Scott Declared Insane

CHICAGO, Aug. 6—Russell Scott today won his last fight to escape the gallows.

A jury of the Court of Superior, Judge Joseph B. David found him insane.

The jury reached its verdict after deliberating three hours and 40 minutes. Its first ballot was reported to have been seven to five for insanity and thereafter the vote gradually swung to the insanity verdict.

Scott immediately was committed to the Chester Asylum for the insane.

See "The Fire Patrol in Opera House, Wednesday and Thursday, August 12 and 13th"

MINERS VOTE TO RETURN TO WORK

Halifax, Aug. 5—The miners of Nova Scotia employed by the British Empire Steel corporation agreed by a majority of 1,133 in a plebiscite today to return to work under the proposals of the provincial government. There were 6,693 votes polled 3,913 for and 2,780 against, many of the miners abstaining from the balloting. The directors of the corporation meeting in Montreal today to consider the same terms, characterized by the government when they were presented last Friday as "final proposals," adjourned to meet again tomorrow. It is still undecided therefore, whether or not there is to be an early resumption of work in the five-months idle mines of the Province. The resumption, as proposed by Premier Rhodes and his cabinet will be under interim six months contract pending a thorough investigation of the industry. Wages paid would be those of 1922 or a reduction of six to eight percent from 1924 rates, and working conditions would be those of 1924. The government would rebate one-fifth of their coal royalties and the controversial collected by the company would be submitted to a referendum held by the government.

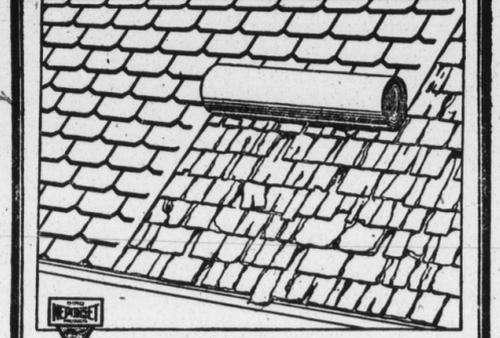

Final figures will probably show some slight changes but the approximate results were given by the United Mine Workers headquarters in Glace Bay.

The large southern areas of Cape Breton, New Waterford excluded, gave a majority of about seven hundred for the proposals. New Waterford'inned them down by about 150 votes and Pictou county on the mainland did likewise by a narrow majority of ten. Cumberland county gave a majority of 384 votes and the northern Cape Breton areas a majority of 151. A notable vote against, was that at Reserve, in the southern area, 69 for 317 against.

The proposals went to the miners with the endorsement of their district board, whose acceptance was given with the stated understanding that the terms did not prejudice the case which the miners would later submit to the commission of investigation. President John W. McLeod, of District 26, United Mine Workers, stated that the executive would resign if the pronouncement was not favorable.

BIRD'S ROOFS

Art Craft Roll Roofing

Lay Bird's Art Craft Roll Roofing right over your old roof!

1. Save time—laid without ripping off old shingles with consequent litter and dirt.
2. Makes a permanent, double roof that keeps out the cold in winter and the scorching heat of summer.
3. Is waterproof, spark-proof, and handsome. Comes with decorative red or green slate surfacing.

Bird's Art Craft Roll Roofing is made by Bird & Son, Limited (Est. 1795), manufacturers of Neponset and Canadian Twin Shingles, Paroid Roofing, Neponset Black Building Paper and Combination Wall Board. There's a Bird product for every sort of building.

We are headquarters for Bird's roofing, building papers and wall board.

End Of World In Russia Is Near

Moscow, Aug. 5.—The story that the end of the world is approaching is always likely to get a hearing in the backwoods peasant districts of Russia. Only recently two enterprising prophets in Volodga province proclaimed the end of the world and the appearance of Anti-Christ, adding the message:

"Save your soul, ask forgiveness for your sins, and give away all your property."

This last piece of advice was apparently calculated to fill the pockets of the prophets themselves; for the peasants who believed their message were urged not to give their possessions to unbelievers. One peasant who had nine cows remained with two. The peasants in one village gave away not only their cattle but also their clothes and slept in the forests, awaiting with great fear the arrival of Anti-Christ and the last day of the world, which was promised for January 1.

When the catastrophe did not occur on January 1 the prophets postponed the date first to Easter, then to a later religious holiday. At last accounts they still maintain their hold on the credulity of the peasants, but are believed to be meditating a rapid getaway with their rich acquisitions in cattle, grain and money.

Another popular legend in the Russian villages is the miraculous renovation of ikons, or pictures of saints. A priest in Buzuluk county, Samara province, professed to discover a miraculously renovated ikon in the hut of an old woman. He called the villagers and proposed to celebrate special masses, as the ikon was supposed to possess unusual power. For these special masses the peasants

No Fixins'!
Yes, madam, you can serve

Royal Milk Lunch
BISCUITS

direct from the package—no butter or jam needed. And my, but they are crisp and satisfying!

HAMILTON'S BISCUITS
THE FAVORITES SINCE 1840

were obliged to pay considerable sums. This incident started a wave of similar "discoveries" in the county, and finally an investigation was ordered. The investigators included two representatives of the local authorities, a chemist, a painter and some priests, and in every case they reported that the renovation had come about, not as a result of any miraculous intervention, but as a result of repainting the iron or rubbing it with oil.

The communist party pays a good deal of attention to these developments of the peasant superstition in connection with its anti-religious propaganda. The peasant tendency in this propaganda is not to attack directly or ridicule the ideas of God and religion, as it has been found that such methods merely irritate and offend the peasants without achieving the desired results. Communist agitators in the villages are now instructed to concentrate on scientific explanations of such natural phenomena as rain, wind, thunder and lightning, as it is believed that as these explanations find their way into the minds of the peasants their religious faith, which is so largely based on superstition, will be slowly but surely undermined.

NOBODY LOVES A DEAD TOWN ANY MORE

"Stay away from that town. It's a dead one." Do you want that to be said of your town? Of course you don't for you wish as a matter of local pride, if for no other reason to have your town stand high in the estimation of the world. But are you sure that you are doing everything in your power to place your town in the position which you wish it to occupy? That is the question that every person should ask himself or herself at frequent intervals.

When things are running smoothly, when times are good, and when it is fairly easy to make a good living for the wife and kiddies, it is so easy for a man to forget that these things do not come to a town as a matter of course but are the results of the right kind of effort on the part of the citizens of the community. It is so easy for a man to grow careless and think that because this condition existed it will continue to exist without an effort on his part or that of the other residents of the community. That is why it is important for every one to stop and think seriously once in a while about what it would mean to him if the prosperity that makes life worth living

Blames Dole System For Conditions

The London Morning Post discussing the declining emigration since 1913 as disclosed by Lieutenant Colonel L. C. Amery, Secretary of State for the Dominions, says it is impossible to attribute any cause to the check in the flow of population from Great Britain's overcrowded shores to the underpopulated spaces of the Dominions beyond the seas. "It is impossible not to conclude that a very considerable influence has been exerted in this connection by the dole which in so many ways discourages enterprise and effort. It leaves the old familiar surroundings to seek a living in a new unknown world implies a wrench that requires an exertion of will," the Post says, "and if a living wage can be obtained for doing nothing at home, why should the wretch be endured or the exertion made? It is notorious that systematic attempts to organize emigration parties from the various towns and villages generally have failed because the unemployed prefer to stay where they are."

The tendency indicated by the official figures of the decline in emigration demands earnest attention and statesmanship. The official figures stated that migration British North America has dropped from 164,566 in 1913 to 47,194 in 1924; to Australia, from 44,428 to 364 in the same period, and to New Zealand from 11,809 to 8,740.

Showing Other Countries What This Country Looks Like

1.—Interior view of the Basilica of Ste. Anne de Beauce which is featured in "A Woman's Faith."
2.—Scene from "A Woman's Faith."
3.—Another scene from "A Woman's Faith" showing Alma Rubens and Percy Marchmont in the Basilica.
4.—The plot thickens.

Canada continues to grow in popularity with the motion picture producers in the United States. Every year, they come over, in steadily increasing numbers, bringing their stars, cameras, megaphones and what-nots with them and proceed to help themselves to large portions of our scenery and sizeable lumps of our history as well. Then, with the Rocky Mountains in one hand and a couple of provinces in the other, they return to the States and obligingly show their fellow countrymen and the strangers within their gates the sort of stuff Canada is made of. And, when all is said and done this does not do Canada any harm. On the contrary, the latest film to be released which has an all Canadian setting and an all Canadian story is "A Woman's Faith" produced by the Universal Film Corporation and the scene is laid in provincial Quebec with a splendid climax at Ste. Anne de Beauce. It is at first a distressing story. There is a young man, a cynical young man, named Steele. And there is a young woman, an amorous young woman who is not all she ought to be. And there is another young woman, named Merve Caron who is all that young women ought to be and, in the second part, she and Steele—but we must not give the story away.

The film is rich in local color. There are scenes of French-Canadian peasant life in a quaint picturesque Quebec village which cannot fail to favorably impress those who have never visited the province and the interior views of the old basilica of Ste. Anne de Beauce are works of art in themselves.

Another item which enhances the value of the film at this particular time is that it shows the last, if not the only, moving-picture of the late

Cardinal Begin whose death so recently shocked the Catholics of this continent. The late Cardinal is shown in full robes and surrounded by ecclesiastical dignitaries of all ranks, attending an important ceremony at the Basilica.

Incidentally, Alma Rubens whose refined emotional acting stands in a class by itself, has probably starred in more made-in-Canada pictures than any other luminary in the motion-picture firmament. She did particularly good work in the picturization of James Oliver Curwood's "The Valley of Silent Men" which was filmed near Banff, in the Canadian Pacific Rockies a year or so ago.

Among the other stars who scintillated in a Canadian setting are Thomas Meighan, notably in the northern drama "The Alaskan" Milton Sills, in "The Knock Out" filmed in Northern Quebec in which he added to his laurels as an actor and collected a blackeye from an over-conscientious villain; and 'Hoot' Gibson who starred in a picture centering around the Calgary Stampede while Field Marshal Earl Haig was present at that famous Western celebration.

The Importance
Of A Good Hock

Whether a horse is used for speed or slow, heavy work, it is important that it have good quality underpinning, and possibly no joint in a horse's leg is as important as the hock. The hock joint has been referred to as the pivot of action in a horse. Not only does it play an important part in propulsion, but it decreases the evil effects of concussion on the hind leg. In reality it is the hardest worked joint in the body, and when it becomes unsound the horse's value is considerably decreased.
It is important that the hocks have the proper angle. Crooked hocks are predisposed to unsoundness which may be transmitted from parent to progeny. Crooked hocks tend to give the hind legs too much set, with the result that the feet are placed too far beneath the body. This throws extra strain on the hock and may result in a curb. When a horse is taking a very heavy pull one cannot help but notice that the hock joint is bearing the brunt of the labor.
Among the unsoundnesses common in the hock are jack spavins, bone spavins, curbs and thoroughpins, any one of which depreciates the value of the animal. According to score card directions the hind leg of the horse is correctly placed if a plumb line dropped from the point of the buttock divides the leg and foot into lateral halves. Viewed from the side this same line should touch the point of the hock and strike the ground a few inches behind the heel. The experienced judge can tell at a glance when the hocks and hind legs are properly set. He has trained his eye to see these things. It is important

that the breeding stock used be free from unsoundness, as there is always a danger that weaknesses may be transmitted to the progeny.

IRISH LINEN TRADE
SUFFERS BIG SLUMP

Belfast, Ireland, Aug. 6—Ulster is not suffering from unemployment to the same extent as the United Kingdom, and the Irish Free State largely because this great shipbuilding centre recently obtained substantial shipbuilding orders.
It is stated here that the Irish linen trade is much depressed because of the decreased demand in the American market, which in former years absorbed about half of the entire Irish linen production. Only one-fourth of the output goes to the United States at present.
In the south of Ireland agriculture has received the worst blow, because the Free State mainly relies upon farming and the breeding of horses and cattle for its prosperity.
The general trade slump has reacted on agriculture and the whole Free State countryside is at present stagnant as compared to its former activity.

"BUY AT HOME"

WAR-TIME FLEET
WILL BE BURNED

Greatest Bonfire in History
of Potomac River Planned

Washington, Aug. 5—The greatest bonfire in the history of Potomac River will begin to burn within the next few days when a \$200,000,000 war-time fleet of the Shipping Board, comprising 200 vessels, will be towed to Mallow's Bay, three miles below Quantico, Va., and set fire.
Meanwhile the Shipping Board is preparing to sell 200 other ships. The bid of Henry Ford, who offered \$1,706,000 for the lot, will be taken up by the boards and is expected to be accepted. The vessels which are to be turned over cost a million dollars a piece to build. They are the dilapidated remains of part of the gigantic fleet which transported munition and supplies to France during the war.
Unlike the treatment customarily accorded historic vessels, these remnants are to be denied the dignity of a watery grave. They are to be cremated and their ashes blown to the four winds.
At the end of the war these ships were veritable "white elephants" on the hands of the Government. Only a few could be put into peace-time commission. They were sold to a salvage company for \$4,000 apiece.

After stripping them to the hulks, the company made an unsuccessful effort to beach and burn them.

The Government now has stepped in and made arrangements for a second attempt to destroy the useless fleet. The chief of army engineers has worked out the new plan.

The vessels will be destroyed in unit groups of 35. An immense net will be constructed so as to safeguard against any floating debris which might escape and menace the channel.

Harvesters For Western Canada

Extensive preparations are being made by the Canadian National Railways for the transport of 50,000 harvesters to the western wheat fields and indications point to a big movement on the day of the first excursion---August 11th. Special trains will leave Sydney, Halifax, Charlottetown, Moncton and Saint John and these will be trains of the best equipment of colonist cars with special cars for women and children. All special trains will run through to Winnipeg without transfer or change of cars, and harvesters will have the advantage of both low fares and fine service. The second excursion is booked for August 26th.

OBITUARY PERSONALS

ROBERT GERRISH

The death of Robert Gerrish, youngest son of Mr. and Mrs. Henry Gerrish, occurred at his home Quarryville, N. B. July 17. He was 27 years of age and is survived by his parents, one brother, Otto, of Plaster Rock, and four sisters, Mrs. Robert Tushie, Quarryville, and Glornie, at home. The funeral was held Monday at St. Mark's Cemetery, Quarryville. Service was conducted by Rev. William Gartshore. The pallbearers were James Astle, Arthur Schofield, Weldon Schofield, Herman Tushie, Cecil Oak and Robbie Garrish.

WILLIAM STYMIEST

The death of William Stymiest occurred at his home here Saturday evening after a lengthy illness. Deceased was a native of Tabusintac but resided in Newcastle for a number of years, where he conducted business and managed the Newcastle Opera House. He leaves to mourn widow, several brothers and a niece Miss Janet Stymiest of Newcastle. The funeral will be held this afternoon at 2.30 o'clock, from his late residence, Pleasant Street, with interment in St. James' Cemetery.

MRS. WELDON HARPER

The death occurred on August 1st, of Leora MacKinley, wife of Weldon Harper at her mother's home in MacKinleyville after a painful illness. The deceased who was only 26 years of age was a highly respected member of the community, and will be greatly missed as she was an active worker in church and social circles, having been organist in St. Andrew's Presbyterian Church for ten years. Her death is particularly sad having come so soon after her father's and sister's death.

Funeral services at the house was conducted by Rev. J. S. MacKay and the True Blue Order of which the deceased was a loyal member marched to the grave and conducted their service. The hymns sung were "Lead 'ndly Light", "Asleep in Jesus" and "Forever with the Lord." The pallbearers were Miles MacGregor, Weldon Schofield, Harry MacKinley, Hugh Shaw, Cecil Harper and David MacGregor.

The floral offerings were: Sprays, from Leora's Sunday School Class, Mrs. George Bell, Mrs. Grace MacKinley, Mrs. J. V. Argyle and a wreath from the True Blue Order.

The sympathy of the entire village is extended to the sorrowing ones in their great loss.

Canada Coal Bins Are Well Supplied

OTTAWA, Aug. 6---Possibilities of a strike in the American anthracite fields on Sept. 1 are not causing any undue worry in official circles here. It is stated that imports of anthracite have been pretty well maintained. Imports of American anthracite for the 12 months ended June 30 were 3,902,476 tons, against 4,168,877 in the 12 months previous. Nearly 60,000 tons of British anthracite entered Canada in June. During the 12 months ending June, imports of British anthracite were 388,353 tons, about double the imports of the year previous.

Canadian National Railways Earnings

The gross earnings of the Canadian National Railways for the period ending July 31, 1925 were \$7,059,027.00 being an increase of \$524,787.00 or 8 per cent over the corresponding period of 1924.

The gross earnings of the Canadian National Railways from Jan. 1 to July 31, 1925 have been \$125,914,357.00 being a decrease of \$8,934,871.00 over the corresponding period of 1924.

Mr. M. Schaffer, of Blackville was a visitor to town on Thursday.

Mr. H. M. Ferguson, of Rexton spent Sunday in Newcastle.

Mrs. David Gulliver is spending a few weeks in Sackville.

Mr. Jack McKean is spending a vacation at his home here.

Miss Margaret Boyle, is the guest of Mr. and Mrs. Walter Raymond, Fredericton.

Mrs. Gertrude Payce, of Sussex, is visiting her mother, Mrs. Daniel Sullivan.

Miss Vivian McKnight of Chatham, is visiting her aunt, Miss Mary Ingram.

Mrs. Windsor of Moncton, is visiting her daughter, Mrs. Clifford Falconer.

Mr. Warren Bailey of Boston, is visiting his uncle Mr. A. A. Davidson, K. C.

Miss Adele Buchanan, of Toronto, is the guest of her cousin, Miss Althea Aitken.

Mr. Robert Falconer, of Calgary, who spent a vacation at his home here returned to the west on Friday.

Dr. F. C. McGrath and Mrs. McGrath and son Ray were visitors to Charlottetown, P. E. I. last week.

Mr. Joseph Campbell, has returned from a pleasant vacation spent in Hamilton and St. Catharines, Ont.

Mrs. P. J. McEvoy, returned Sunday from a delightful vacation spent at "Oversteppes" Tabusintac.

Mr. Thomas Quilty of Boston, Mass. is visiting his brother Mr. and Mrs. Hugh Quilty.

Mr. Edward McGrath, of New York is spending the summer at his home here.

Mrs. J. F. Jardine of Beverly Mass. is visiting her sister, Mrs. James Robinson at Millerton, New Brunswick.

Mrs. Ingram, Miss Annie Bell and Kenneth Ingram spent last week at Oak Point, the guest of Mrs. G. G. Stothart.

Mrs. Noah McLean of Campbellton spent a few days of last week in town, the guest of Mrs. Wm. McGrath.

Mr. and Mrs. W. F. Comeau left today for St. Catharines, Ont. where they will in future reside.

Miss Lillian M. Atkinson, R. N. of Malden, Mass. is spending her vacation with her parents, Mr. and Mrs. H. T. Atkinson, Chatham Head.

Mrs. D. P. Doyle and Miss K. C. Quilty returned last week from a pleasant vacation spent at "Oversteppes," Tabusintac.

Mrs. Lester Jeffrey and little daughter Winnifred, are enjoying a vacation at Washburn Beach, the guests of Mrs. Perley Roy.

Mr. Chas. Sargeant, Jr. of Halifax, N. S. is spending his vacation with his parents Mr. and Mrs. Chas. Sargeant.

Mr. and Mrs. W. L. Durick were visitors to St. John, last week and while in the city Mr. Durick attended the convention of the Maritime Druggists.

Mr. and Mrs. John Morris and family of Summersville, P. E. I. are visiting Mr. Morris' parents Mr. and Mrs. Hugh Morris, Pleasant Street.

Mr. and Mrs. Albert Robertson, Harry Robertson, Mrs. J. Henderson and little daughter Irene, left on Sunday by motor for a two week's visit with friends in Bangor, Maine.

Mr. H. Williston was in Halifax, N. S. last week having been called to that city owing to the sudden death of his brother the late Charles Williston.

Miss Mary and Messrs. Ned and Bill Sinclair entertained a number of their young friends last Friday from 7 to 11 p. m. to a fancy dress party at the home of their parents Mr. and Mrs. E. M. Sinclair.

CHAS. WILLISTON DIED SUDDENLY

Well Known Retired Merchant of Halifax Passed Away Yesterday.

Charles Williston, retired merchant of Halifax, where he conducted a meat and commission business for over thirty five years, died very suddenly at Herman's Island, Lunenburg County, where he was spending the summer, at five o'clock Thursday afternoon. Mr. Williston, who was seventy one years of age had been ill with pneumonia several months ago, but had recovered with apparently no ill effects remaining. Accompanied by Mrs. Williston, and their daughter, Mrs. H. B. Clarke, wife of Rev. H. B. Clarke, pastor of St. Andrew's (United) Church, he was enjoying a happy vacation. Late Thursday afternoon he and his family, party, including Mr. Clarke, returned from the shore where some members of the family had been in bathing. On reaching the house, after a rather vigorous walk up hill, Mr. Williston made a slight complaint of not feeling well, and was afterwards lying on a lounge. A few minutes later Mrs. Clarke noticed her father was apparently ill, and before she could summon any aid, he had passed away. Mr. Clarke motored to Lunenburg for a doctor, but when the physician arrived he said that Mr. Williston had been dead for some time.

The deceased was the son of the late Judge Williston of Newcastle, New Brunswick, where he was born. He came to Halifax when comparatively a young man and established a commission business, which became one of the leading commercial houses of that nature in the city. He retired a few years ago.

Mr. Williston is survived by his wife, and one son, Hedley, head of the Farmers Limited; and one daughter, Mrs. Clarke. He was predeceased by one son, H. B. Williston, killed while on service at the front during the South African War. Of his father's family Mr. Williston is survived by several brothers and sisters, among them being Mrs. Hedley Parker, wife of Hedley Parker, Marine Editor of the New York Herald; Frank Williston, New Jersey; Mrs. Gaynor, of Chicago; who is at present visiting Halifax; Howard Williston of Newcastle, and Mrs. Emily Babbitt of New York.

For many years Mr. Williston was a consistent attendant at Brunswick Street Methodist Church in which his family took a very active interest. He was a member of the Odd-fellows Fraternity, having been for over fifty years a member of Mystic Lodge. Mr. Williston was a great lover of the out of doors, and every spring, especially, he spent many days fishing, and had numerous friends among the sport lovers of Halifax.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless, even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

FOR SALE.

"WHAT CONSTITUTES A NARROW MIND?"

The woman of the world took out her lipstick and painted her lips a deep and rather startling crimson. Then she attended to her eyebrows and then she put a nice fresh blush on her cheeks and then she dusted her face with powder and then she leaned back in her seat and said: "This play bores me awfully—it's all about such common people. Narrow-minded things without an interest in life, outside their little old narrow walls."

"Me and my husband, Julie and his doings, sister and her tonsils, mama and her rheumatism—Church and the Missionary Society. The new minister and the gossip about the soprano and the tenor in the church choir."

"Pouf, it makes me feel if I were smothering only to think about it."

"I can forgive anything on earth but narrow-mindedness, but when I meet one of these narrow-minded, live-in-a-groove and think in a rut people, I just want to shake them as hard as I can to wake them up and give them a scare or something. They don't know they are alive, poor things."

I looked at the women of the world in her smart frock and impudent little hat and delicious little shoes—and thought: I wonder why you don't realize that you are just as narrow minded in your way as the other woman is in her way."

Why can't you realize my dear that there are a good many people in this world all of them has just as much right to live as you have?

How much broader is your world after all? Let's see, how many people

do you really know? The husband you divorced and a few of his friends who are so much like him that it is hard to tell them apart in the distance. Poker, bridge, golf, a bit of swimming, a little gambling in stocks, a cabaret evening or so—the same old round over and over. They wouldn't know what to say to a farmer or a woodsman or a vineyardist or a street car conductor to save their lives. They live in a rut and they can't get out of it.

Now your old friends—the women. What do they ever talk about? Bridge the new song from the cabarets, what town they got on the radio last night.

How perfectly awful the new make is and what an impossible price she asks for her services. The newest thing in bathing suits,—and, whisper, is Tibia really going to run away with Tommy or not, do you suppose?

So many cocktails, so many highballs, where do you get yours, how much do you pay a quart—nothing so very broad and universal about that is there?

Seems to me I wouldn't call you narrow minded, if I were you, my dear. I really wouldn't. Not if I were either type of woman. The church choir type or the highball type.

Somebody might feel like laughing at you.

Find need For Standard Size Bank Checks

Another step toward the simplification of business forms is being brought to the fore. Along with movements for the adoption by business houses throughout the country, of standard invoice, inquiry and purchase order forms and of warehouse forms, which are receiving the cooperation of the Division of Simplified Practice, Department of Commerce, inquiries have come from the business houses as to promotion of standard bank check sizes.

While inquiry reveals that the American Bankers Association in 1921 adopted three sizes to cover as many classes of checks, and the banks of the country have quite generally put these sizes into use there are yet many business houses which have their own checks made and do not preserve the standard sizes.

"What is the result?" says one letter to the Division. "In the first place, the operating machinery is tremendously slowed down in every department. Machine operators naturally cannot handle a bunch of odd-size checks nearly as efficiently as they could a standard size." Other comments also are being appended in the handling of various checks, this writer points out, and at the same time there is a waste of paper from such variation. It is indicated that the use of checks of uniform size would expedite clerical work for the business house as well as the bank, and that economies in this direction could be augmented by more effective services and similar economies from printing and lithographing companies which print checks in large quantities.

MILK DANGERS

Sir Henry Gauvin, speaking at the earlier session on the prevention and treatment and after-care of surgical tuberculosis in children, said that between 30 and 40 per cent of children under ten suffering from surgical tuberculosis had been infected from bovine sources. As age increased this percentage dropped, so that in the adult it became relatively small, though still considerable enough to need attention. No single article of food produced more misery, disability, or a higher mortality than milk. He could not appreciate the logic that permitted this state of affairs to persist, when by courageous action it could be avoided. No one could persuade him that it was anything but wrong to allow many thousands of children to die annually and many thousands more to be permanently disabled, detrimentally affected, or even simply imperilled by being exposed to a danger which was entirely preventable. As to the argument that drinking slightly infected tuberculosis milk would enable them to acquire immunity to infection, he regarded it as a dangerous, filthy and unnecessary doctrine. It was a pure theory, and even if proved to be correct there would be better ways of obtaining such immunity than drinking infected milk from a diseased cow. They would hesitate to eat infected oysters, knowingly to immunize themselves against typhoid fever.

Sir Henry pointed out that the stamping out of bovine tuberculosis was only a part of the problem. He dwelt upon the importance of education in personal hygiene, and with regard to the treatment of the child subject to surgical tuberculosis referred to the work at the institution at Alton. The problem of the child victim of surgical tuberculosis was not, he said, an easy one, but it was soluble.

Dr. John Fraser, professor of clinical surgery, University of Edinburgh referred to the relative incidence of surgical tuberculosis among town and country children respectively. He showed how cases had been classified into rural and urban groups, and said that to their surprise they found that the preponderance of affected children came from country districts. They had come to the conclusion that in Scotland surgical tuberculosis was more frequent among dwellers in the country districts than among those resident in the cities. The explanation, he thought, was closely related to the question of milk supply.

Dr. W. T. Gordon Pugh (Metropolitan Asylums Board) read a paper in which he described the work at Queen Mary's Hospital, Carshalton.

New "Baby City" of Ontario

(1) North Bay's Main Street. (2) The Canadian Pacific Station, North Bay. (3) The Post Office.

An Old Home Week Celebration to celebrate the attainment of City status will be the big attraction for Northern Ontario the first week in August. North Bay, 10-day the largest town in the Province, with a population officially estimated at 13,011, will become the Baby City of Ontario on Sunday, August 2nd. For the following six days, it will be a case of "open house" with all the well-known hospitality of the North Country.

Special services in all the City churches, conducted in most cases by former pastors, who were identified with the early history of the town, will inaugurate Old Home Week. The following day officialdom takes charge with "Civic Day", when the formal presentation of the City Charter will be made at Memorial Park and representatives of the Federal and Provincial Governments will extend their congratulations to the Gateway City of the North. A race track has had to be pro-

visionally rebuilt, two privately owned parks have had to be taken over for the year and other large expenditures incurred, but the citizens are behind the celebration movement and are determined to make it something that will be long remembered in the Northland.

The history of North Bay is one that is not generally known to all Canadians, even though the name is familiar from the Atlantic to the Pacific, as a great railroad centre. North Bay was originally discovered by Samuel de Champlain in 1615 and was a post on the old trail from the Ottawa to the Great Lakes in the time of the great French explorer.

The first settlements here are recorded as in 1852, with the coming of the first train over the Canadian Pacific Railway. North Bay was never incorporated as a village. Like Topsy, it just grew and became officially a town in 1891. In 1905 the population was 2,024, in 1906 it was 2,813, and in 1915 it was 10,041, and

the last municipal census placed it at 13,011, while the rapid growth of the town this year indicated that it will be at least 15,000 when it takes its position as a City next August.

The Canadian Pacific paved the way for North Bay. The old Grand Trunk followed with its first train in June, 1854. Next was Northern Ontario's own railway, the Temiskaming and Northern Ontario, which was built north to the mining areas from North Bay in 1904, the first train being operated out of here on January 12th, 1905. The Canadian Northern was the fourth line to come in here, their first train arriving on September 14th, 1915.

Three and a half tons of gold bullion pass through North Bay every month from the Northern Mines, together with 13 tons of silver bullion, 602 tons of high-grade silver ore, 6,090 tons of pulp and 12,150 tons of paper. It makes a formidable array when checked up.

NEW "STEEL" HOMES FOR ENGLISHMEN

Designs Readily Adapted to Dwelling Houses and Relieve Housing Situation.

Dwellings of steel, which can be erected, painted, finished, and ready for occupancy in two weeks, are regarded as the solution of the housing shortage in England and Scotland.

The advantages of these houses are the speed and economy with which they can be built; their moderate cost; their structural soundness and permanence; their freedom from dampness; their fire protection and vermin proof features. The essence and novelty of the scheme consists in standardized design carried out by mass production methods. The system can be applied to practically any type of house for which there is a demand sufficient for mass production.

There are two principal types of steel houses on the market—the Atholl houses manufactured in Glasgow from designs by the Duke of Atholl, and the Weir houses at Cardonald.

The Atholl steel houses have a framing of steel angles and T sections, and the roof trusses also are steel. The outer plating of 3-16 inch steel is fastened to this framing, and the inner lining is asbestos cement sheeting fastened to a timber framework, with an adequate air space between the outer plating and the inner lining to insure an equable temperature. The ceilings are also of asbestos cement sheeting. With a view to preventing corrosion, all the steel work is treated to remove scale before being put into the houses.

The steel superstructure is bolted together, not riveted, so that it can be erected by semi-skilled or even unskilled labor, and the whole structure is bolted down to the concrete foundations. The sections are standardized and can be erected in a very short time by a few men of normal intelligence not necessarily craftsmen.

The essential features of the Weir houses are a concrete foundation carrying a timber frame covered externally with steel sheets one eighth inch thick. The wall unit consists of a steel sheet, a double cellular air space and an inner composition lining. Careful experiments have shown the rate of heat transmission through this wall is practically the same as in the case of a double brick wall.

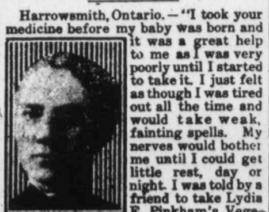

Steel offers one marked advantage over brick, stone or concrete, all of which are more or less absorbent of moisture. Steel is impervious. A damp-proof course prevents any moisture rising from the concrete foundations, so that houses will be absolutely dry. The steel sheets are painted on both sides with a new type of paint. External corrosion on the inner side of the sheets is eliminated by the double cellular air space, which separates the steel from the atmosphere of the rooms.

Great Peril of Infected Milk

The eleventh annual conference of the National Association for the Prevention of Tuberculosis has just ended. The outstanding feature of the final session was an explanation of the sanocrocin or gold treatment of tuberculosis by its discoverer, Professor Holger Molgaard, of Copenhagen, and of results obtained at the university clinic in Copenhagen.

TIRED OUT ALL THE TIME Nerves Gave Little Rest

Relieved by Lydia E. Pinkham's Vegetable Compound

Harrowsmith, Ontario.—"I took your medicine before my baby was born and it was a great help to me as I was very poorly until I started to take it. I just felt as though I was tired out all the time and would take weak, fainting spells. My nerves would bother me until I could get little rest, day or night. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to publish this good medicine. I lend that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will serve to help others."
—MRS. HARVEY MULLIGAN, R. R. No. 2, Harrowsmith, Ontario.

In a recent canvass of purchasers of Lydia E. Pinkham's Vegetable Compound over 100,000 replies were received and 98 out of every 100 said they had been helped by its use. This medicine is for sale by all druggists.

PREDICTS NEXT WINTER WILL BE LONG AND HARD

Next Winter will be long and hard according to investigations by the astronomer priest Fr. Gabriel, which Prof. Guillaume Bigourdan, director of the Paris Observatory has described to the Academy of Sciences.

Fr. Gabriel has discovered that the lunar solar cycle of 744 years is divided into two periods of 372 years and four periods of 186 years. He claims that the weather follows the periods and that this winter will be as severe as were the Winters of the years 1553 and 1740. His observations are based on researches into the works of historians, poets and writers which were likely to give weather indications.

The noted French astronomer, Arago, had already remarked on this recurrence of hard Winters, without however, indicating the periods between them.

TRADE MARK FOR THE WHOLE EMPIRE

LONDON, Aug.—In the House of Commons yesterday a member suggested to Lt. Col. L. C. Amery, secretary of State for the Dominions, that he should recommend to the dominions the adoption by all the manufactures of a trade mark for the whole empire or a trade mark for each dominion and request the dominions to give their views with regard to a trade mark for goods manufactured in Great Britain.

Col. Amery replied that he doubted whether the suggestion in the form it was made would be a satisfactory or practical method of achieving the object in view.

Replying to a supplementary question along somewhat similar lines Col. Amery said he did not wish to commit himself to any specific suggestion, but he hoped that it might become possible for the people of Great Britain in buying manufactured goods to know which were British or Dominion made goods and which were not.

SOME OF THE TRASH READ BY CANADIANS

Under the title "Trash that people read" Kathleen Redman Strange, of Fenn, Alberta, sounds a warning note to Canadian mothers, ignorant of what their children are reading. She described finding her two boys avidly consuming the contents of a certain American newspaper—very unsavory—and on enquiry found they had progressed from the 'funnies' to other articles. Mrs. Strange says:—

"Women have already succeeded in having some of the unwholesome and unsavory magazines banished from the bookstalls of certain cities in certain parts of the country, and a great deal has been said and written about the growing output of decadent stuff produced by decadent writers for the often decadent young. But it is not of the decadent young—who are, after all, in the vast minority, thank heaven,—that I am thinking. It is of the splendid, wholesome-minded growing Canadian boys and girls, into whose hands such evil literature often falls with such possibly disastrous results.

"Our own Canadian magazines and farm journals are clean and wholesome. Why, then, should we find it necessary to admit filthy foreign trash? We can not afford to import its filth. Good American literature is welcome, but not its trash. Western farmers may believe in free trade, but western mothers certainly demand protection against foreign mush."

Kill them all, and the germs too. 10c a packet at Druggists, Grocers and General Stores.

DECONSTRUCTION WORK IN FRANCE

WILLIAMSTOWN, Mass Aug. 4.—France hopes to divert part of the Dawes plan reparations from Germany to her work of reconstruction, but we don't have to turn over to our friends the whole of the moneys we get out of it," Robert Masson, prominent French banker and virtual head of the Credit Lyonnais, in Paris, said in a lecture on "The Peace Problems of France," at the Institute of Politics.

The reconstruction could be completed in five years, he added, by using all the Dawes plan proceeds for that purpose.

Masson reviewed the French war losses and the reparations she has so far received, and placed the money still needed for material reconstruction at \$1,000,000,000. Taxes could be increased to supply that sum, and both internal and foreign borrowing were inadvisable. Hope in the Dawes plan and the United States had a certain moral responsibility that ought to be carried out, he said.

Local and General News

SCOUTS & CADETS RETURN HOME

The Boy Scouts and Cadets returned home Saturday from a pleasant six day outing at Washburn Beach.

ENJOYABLE DANCE

Rattaray's Orchestra of Campbellton held an enjoyable dance in the Town Hall last Friday evening. Despite the wet weather there was a fair attendance and all enjoyed the music and dancing.

ENGAGEMENT ANNOUNCED

Dr. and Mrs. Robert Nicholson announce the engagement of their daughter Annie Ritchie to Rev. Robert H. Scott. The marriage will take place on September 2nd. in St. James Church.

STEAMERS IN PORT

At present there are five steamers in port. Frazer Co. Ltd. is loading two with lumber for the U. K. and two with laths for the U. S. A. The other steamer is at Sinclair's loading lumber for Mackay.

OPPOSITION MEETING

The Opposition held a political meeting in the Opera House last Friday evening with Mayor Russell as Chairman. The speakers included Senator Black, J. D. Palmer, F. T. Young and J. K. Loggie.

ANOTHER LARGE CROP

This year's apple crop in the Annapolis Valley will be about two million barrels, or from fifteen to twenty per cent. greater than last year, according to a statement made by George E. Graham, of Kentville, N. S., general manager of the Dominion Atlantic Railway.

THE FIRE PATROL

The Newcastle Fire Department is holding a Benefit Night in the Opera House, on Wednesday and Thursday, August 12th and 13th, when the moving picture entitled "The Fire Patrol" will be shown. It is a wonderful picture and merits your patronage. See advt. elsewhere.

SHIP BUILDING

Shipbuilding, one of Saint John's chief industries in the days gone by, will commence again. A local company announces that they had secured the contract from the Dominion Atlantic Railway, a subsidiary of the Canadian Pacific Railway to build a steel ferry for the service operated between Wolfville, Kingsport and Parrsboro. It is planned to have the motor ship delivered by November 15.

CONTRACT AWARDED

FOR GRAND FALLS
The Dominion Construction Company, of Montreal, has been awarded the contract for the building of the dam, power house and other buildings in connection with the proposed development of Grand Falls, at a figure of \$1,546,556. It is announced. The gross estimate of the engineers for the work was \$2,013,000, or \$466,444 above the winning tender. There were eight tenders.

Presbyterian Church In Canada

Newcastle, N. B.
Sunday, Aug. 16th.
Service at 11 A. M.

OPERA HOUSE

Rev. J. A. Hilts, of Davenport Road Church, Toronto, will be the speaker

Bring your Bible and Hymn Book
All Are Welcome

BORN

At Sault Ste. Marie, Ont., August 16th to the wife of Roberts Redvers, a son, John Redvers.

OCCUPIED MONCTON PULPIT

Rev. Thomas S. Roy, of Brockton, Mass., and a former Newcastle boy, occupied the pulpit of the First Baptist Church, in Moncton, at both services on Sunday.

POSTPONED BALL GAME

The called ball-gam between Newcastle and Chatham, on Friday evening was postponed on account of rain. The game will be played on Wednesday evening of this week, (weather permitting).

PRESBYTERIAN SERVICES

Presbyterian service was held last Sabbath evening at 7 o'clock in the Opera House, Newcastle, N. B. by Rev. Dr. J. A. Alexander Hilts, Minister of Davenport Road Presbyterian Church, Toronto. About 135 persons were present, who listened with rapt attention to a most eloquent and inspiring address by Dr. Hilts. The platform was beautifully decorated with flowers. Next Sabbath, Dr. Hilts will preach in the Newcastle Opera House at 11 a. m. in Tabuslat at 7 p. m.; and in Chatham at 7 p. m.

SPECIAL SERVICES

Next Monday, Tuesday and Wednesday, twelve crusaders of the Church Army, an English Church organization of more than 40 year standing will visit Newcastle and Nelson by invitation of the rector and consent of the Bishop. Special services indoors and outdoors will be held, particulars of which can be seen elsewhere.

Blemishes of The Skin

Are Proof the Blood is in a Weak and Watery Condition.

One of the surest signs that the blood is out of order are the pimples and unsightly eruptions that break out on the face and body. The same condition is indicated by an attack of eczema or scrofula. You cannot get rid of these troubles by the use of purgative medicines, as so many people try to do. Purgatives merely gallop through the system and leave it still weaker. What is needed when the blood is shown to be out of order is a tonic which will restore its missing elements and leave the blood rich and red. For this purpose there is no other tonic can equal Dr. Williams' Pink Pills, every dose of which helps enrich the blood, drives out impurities, and brings a new feeling of health and energy. Mrs. R. E. Bishop, Hawthorne Ave., Hamilton, Ont., tells for the benefit of others what these pills did for her. She says:—"I was suffering terribly from scrofula. I doctored with several doctors, but without success. My complexion was sallow, I had no strength, feeling very weak and languid. My neck was full of lumps called scrofula, and at times they were very painful. After trying several so-called blood medicines, Dr. Williams' Pink Pills were recommended to me and I got half a dozen boxes. After taking them I found a decided improvement in my appearance, and to my joy the lumps were disappearing from my neck. I persevered in the treatment, and finally the only sign left of the trouble was a scar on my neck where one of the swellings broke. Since that time I have been in robust health and heartily recommend Dr. Williams' Pink Pills to any suffering from impure blood."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

EDITORS MAIL

We are not responsible for opinions expressed by writers under this heading. Correspondents would oblige by writing legibly, both on one side of the paper only, name and address (not necessarily for publication) must always be sent. Correspondence should be as concise as possible.

Newcastle, N. B., Aug. 11th. 1925
Editor Union Advocate

Dear Sir:-

I will answer Mr. MacLean in so far as I can, categorically.

First I have not taken up the cudgels for Mr. Macintosh.

Second I may not have offered anything "new to the discussion of the Union question but if it is not valuable, why does Mr. MacLean write a column and a half in answer to it?

Third "OUR BIRTHRIGHT". May I suggest to Mr. MacLean the Subordinate Standards—the Westminster Confession of Faith, the Larger and Shorter Catechisms? I will apologize for using the words "mess of pottage". I respect the other parties to the Union. The words I used were merely in the nature of a quotation and intended only to express my feeling that subordinate standards cannot be replaced.

Fourth—That there are anti-unionists "all over Canada", I will admit. Mr. MacLean's statement that they are ignorant, I resent. Why should Mr. MacLean assume that he and his party are "a combination of brains, education, etc."? Vituperation is not argument and convinces nobody.

Fifth—I cannot find in Mr. MacLean's quotation from the Mother of Parliament's Act of 1921, that the Church of Scotland ever agreed to enter into organic union with any other church.

Sixth—I cannot recall that I used the words "Presbyterian freedom." Is it Presbyterian freedom that induces Mr. MacLean to refuse to mount an unsigned ballot? Truly does K. M. Campbell say

"expressly to provide for the voters of the Church the same protection which is afforded to the voters of the state in the exercise of their function". Will Mr. MacLean take this from us as a fact?

Seventh—That the second vote was taken much against Mr. MacLean's will to me is quite evident, and I regret I cannot take the statement back. It is not false and the very fact that Mr. MacLean would not count UNSIGNED ballots proves it. How what reason on earth did Mr. MacLean allow such a proposal to be entertained except for the purpose of CONTROLLING THE VOTE?

Eighth—Mr. MacLean's play on words regarding the churches which have voted by ballot is, in my opinion, neither here nor there. That a vote MUST be taken by ballot (not signed statement) is a fact.

Ninth—I cannot agree that Church Union is an accomplished fact "as far as PRESBYTERIANS are concerned."

Tenth—Mr. MacLean calls the anti-unionists "rebels to constituted authority". Then Presbyterianism itself was an act of rebellion. Methodism was an act of rebellion. The congregation of the parish of Auchterarder were rebels when they refused to accept Mr. Young? The parishioners of Marsoch when they took their bibles in their hands and mournfully and in tears passed out "into the open snowy waste, banished, certainly by no court of Christ, from His Father's house of prayer" were rebels. And when, as a protest against "these traffickers in religious matters", the Free Church of Scotland was organized. Will Mr. MacLean say they were rebels? And are they, who in spite of Legislation, determined to hold to their faith, to be termed rebels by Mr. MacLean? Is the reverend gentleman going to put us back two or three centuries and make us "rebels" because we cannot accept dictation in spiritual matters? Why should he not go a little further and tie us to the stake.

The Ministers from the Presbyterian church who have entered the Union church say that the people should follow them in loyalty under the "Barrier Act". That act was adopted by the Church Courts and approved by the people at a time when Britain was fighting for Constitutional Government in Church and State. In each case it was and is accepted by Sovereign Clergy and people because it rests on the sanctity and inviolability of ordination vows. Betrayal by either party is treason or betrayal as to the other party to the High Contract.

Who are the rebels?
Eleventh—Mr. MacLean certainly intimated to me that the Act which I call the St. Andrew's Act would be repealed if it were necessary to do so.

Lastly—I wish to assure Mr. MacLean that if the Antionionists decide to contest his voting methods, he will find he has made two abortive attempts to bring about union.

Yours very truly,
R. T. D. AITKEN
Newcastle, N. B.
August 7th. 1925.

To the Editor of The Union Advocate.

I was surprised when I read the announcements in your Paper and also "The North Shore Leader" re United Church services for the month of August.

I wish to inform you that there are no Presbyterian or Methodist Churches or Congregations in Newcastle at present.

There are two United Church of Canada Churches or Congregations since June 10th. If you will refer to Mr. MacLean's letter to Major R. T. D. Aitken, where he says "Church Union is an accomplished fact as far as Presbyterians, Methodists and Congregationalists are concerned." It will be noted that my contention as above is upheld by him. I think it is about time that the "Unionists" would acknowledge their new name and not make a show of themselves using names, which the Unionist Ministers and their followers say their Church Courts abolished, and also by Acts of Parliament, which they had passed. I am pleased to know that the Continuing Presbyterians are to have services on Sunday evening in the Opera House, and it is hoped that in the near future they will be holding regular services.

Yours very truly,
SCOTCH PRESBYTERIAN.

RADIO LISTENERS, ATTENTION!
New Wave Length is Now Used at Moncton.

Recent experiments conducted at radio station C. N. R. A., have resulted in a change of the wave length from 313 m.

to 291. The object of the change is to eliminate interference from some of the United States stations. The new wave length was successfully used in the afternoon broadcast from C. N. R. A., on Wednesday and will be used henceforth in all regular broadcasting. Radio engineers are satisfied that this change will greatly improve reception throughout the Maritime Provinces and also in the United States where lately there has been considerable interference. The greater efficiency of a lower wave length should also enable C. N. R. A. to get across the Atlantic with more regularity than heretofore. The aerials have been changed and shortened so that they will not be so directional. Listeners are advised to note the change in wave length and are asked to report reception to the Moncton Station.
