The habitant interposits. See B. The best of the complete of t tell them that Newfoundland was only two and a half hours' sail from Canada. With Canada the Island was connected result of the O'Connell case.

Newfoundland covered 42,000 square miles. It was equal to the size of Denmark, Norway and Sweden. Its position at the mouth of the St. Law-rence made it the hour for the size of the st. Law-rence made it the hour for the size of the st. Law-rence made it the hour for the size of the st. Law-rence made it the hour for the size of the st. Law-rence made it the hour for fisheries, without which next to the fisheries some 36,000 fishermen. England owed her strength to the navy, and Newfoundland was the nursery for her seamen. The value of the fisheries annually was \$6,700,000 the Grand Trunk and Quebec Central of the Grand Trunk and Quebec Central Railways.

There were 2000 square miles of white pine and the output of the forests this year was valued at \$300,000. This industry was but comparatively new. It was only about nine years ago since lumber was first exported.

Then there were 3700 square miles of mineral land untested. In mines already in operation there were \$5,250,000 in rested. This was the result of random discoveries along the coast lines. Up to a very recent date there were no connections between the coast line and the interior. A large coal area had been retained in the hands of the Government. This would be an inducement to the ministers to win over the Island to Confederation, because, as he understood, a large part of the coal fields of Canada had been retained by Collapse of a store.

When the crash came there were \$4,500,000 deposits in the banks, or about \$20 per head. Newfoundland also had a dependency four times the size of herself. On the Labrador coast she had reseasions of 140,000 square miles. had possessions of 140,000 square miles.
The timber land was of great value. The
hanging up of the convention, which
they had succeeded in making with the United States, had prevented the opening up of markets, which helped to bring on the financial troubles on the leland.

Newfoundland was not knocking at the door of the Dominion, but was merely taking advantage of that invitation which was open to them for the past 28 Mars to come in and join confederation. They were in Ottawa anxious to know what the Dominion was to do for them.

"I answered the advertisement, writing that I would take all the stamps they had at that figure. In reply I received a letter saying they could not let me have more than \$300 worth a month. They added that they were making the first shipment Friday via Buffalo so as to save the expense of sending the stamps across the line. An express messenger brought in the package yesterday. On examining the stamps I found the color light and I suspected from the general appearance that they were not genuine and I told the messenger of my belief. The messenger replied that I need not be afraid, as he had delivered four similar packages within an hour and had received pay without hesitation. As the Hamilton concern had said only \$300 worth could be supplied each month, I knew then the stamps were counterfeit and notified the postal officials, who obtained possession of the packages."

develops into pneumonia or bronchitis. A little indigestion grows into "liver complaint."

The best way to cure a disease is to prevent it. The next best way is to catch it before it develops to its worst stage.

Dr. Pierce's Golden Medical Discovery is a medicine for the whole body. It searches out the weak spots and builds them up. It is a strengthener, a purifier and a cure. It puts the digestive system into an active, healthy condition, purifies and enriches the blood and forces out all poisonous matter. Taken in time, it will cure 98 per cent. of all cases of consumption. It is a purely vegetable compound that works in perfect harmony with nature. It tones up the whole body and produces strong, hard, healthy flesh. It has cured hundreds of cases of consumption, bronchitis, asthma, chronic nasal catarrh and kindred maladies, which had withstood the effect of every other medicine.

A large number of testimonial letters and photographs of those cured have been printed in book form. Henry A. King & Co.'s special wire from Ladenburg, Thalmann & Co., New York: After showing indecision, ac-companied by some weakness during the morning hours, the afternoon hours today displayed some symptoms of renewed strength. The coal stocks, it is true, were heavy throughout, on a beief that a settlement among the a thracite companies would be delayed Burlington was sold on its bad annu report. On the other hand, Sugar was strong on short covering; one of the theories was that the Government's loss of revenue through the practical demolition of the Income Tax can only be met by an increase in sugar duties. London is so cheerful over the expected peace between China and Japan that it is disposed to take a more favorable view of American stocks also.
