The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BULLETIN No. 263

CREAM OF TARTAR

OTTAWA, July 15, 1913.

WM. HIMSWORTH, ESQ.,
Acting Deputy Minister of Inland Revenue.

SIR,—I beg to report upon a collection of 148 samples of Cream of Tartar purchased throughout Canada in February and March of this year,

The last inspection of Cream of Tartar was made in 1910, and the results of analysis are published in Bulletin No. 222. In that report I suggested the advisability of legalizing a standard for a commercial grade of Cream of Tartar, less exacting than that fixed by the British Pharmacopoeia. The B.P. standard described is that for a highly refined article, containing not less than 97.5 per cent of Bi-tartrate of potash.

It will be seen that 49 samples of the present collection reach this high standard, while 94 samples of good quality, and containing about 90 per cent of Bi-tartrate of potash, are relegated to what I have designated as the commercial grade, falling a few per cent lower than B.P. requirements.

Five samples are adulterated as containing starch and other foreign matters.
I beg to recommend publication of this report as Bulletin No. 263.

I have the honour to be, Sir,
Your Obedient Servant,

A. M. MCGILL,
Chief Analyst.
