PREFACE.

The Publishers of this work have used every effort each year to place before the public as reliable information as can possibly be obtained for the short period of time allowed to obtain it. There are quite a number of persons who evade giving their correct names, substituting fictitious names instead, being afraid our agents are taking their names for taxes. Errors like these occur in every Directory published, the publishers not being able to detect them. The publishers request the inhabitants of this City to inform them at any time if their agents are detected in copying from old Directories while at work for new information. The publishers are pleased to say that the sale of the work has increased, owing to the fact of leaving all names out of the Business Directory who do not support this work. There is a wrong impression among business men in regard to the Directory being a poor medium for advertising. Why this idea is prevalent the publishers cannot understand. The reading of an advertisement is the same, place it where you will, and surely the Directory is used more than any other medium they can possibly advertise in, except, perhaps, newspapers. There are hundreds of persons referring to the Directory who do not purchase it, including those who persistently annoy their neighbors by borrowing it so often that complaints are made to the publishers about them. The publishers are well aware who does this borrowing, and that is one special reason why such persons are left out of the business part of the work.

In conclusion the publishers thank those who have supported the work so heartily, and those who in any way have given information to the work.

The Time Ball on Custom House, St. John, N. B.

Will be hoisted half its elevation each day (Sundays excepted) at fifteen minutes before 1 o'clock. At one minute before 1 o'clock it will be hoisted its full length; and at 1 o'clock, mean time, the Ball will be dropped. A Chronometer keeping correct Greenwich time should then show 5hrs. 24m. 15s., and the difference between this and the time shown by a Chronometer is its true error on Greewich time at the moment. At the above hour of 1 o'clock, when the Ball drops, represents 5h. 24m. 15s., at Greenwich. the error of Chronometer may be ascertained, no matter where the ship is lying. Masters of vessels arriving in Saint John, should compare their Chronometers by the Time Ball, as it will enable them to get sea rate, which frequently varies from harbor rates. Latitude 45h. 16m. 42s. N., Longitude 4h. 24m. 25s. West of Greenwich.
