Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Thomas Fisher Rare Book Library,
University of Toronto Library

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Thomas Fisher Rare Book Library,
University of Toronto Library

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

CHEAP HOMES

ON EASY TIME AND TERMS

IN the rich bottom lands of the Lower Red River Valley which withstood the drought of last year better than any other portions of Manitoba, and yielded the largest crops. These farms are held under Torrens' Title, and are within 30 miles of Winnipeg.

—○ GOOD WATER AT FROM 10 TO 40 FEET. ○—

Owing to the park-like character of the Lower Red River Valley, meadow and wood are frequently to be found on the same quarter section.

40,000 ACRES TO SELECT FROM.

Apply to **G. E. FULTHORP, Agent,**

311 MAIN STREET,

Opposite Ontario Bank.

WINNIPEG.

Where lists will be furnished and maps may be seen, and intending purchasers afforded facilities to inspect the land themselves.

40,000 ACRES

Of land for sale in the best districts of Manitoba. Near the best markets, railways, schools, churches, post offices, etc.

PRICES FROM \$2.00 AN ACRE UP.

EASY TERMS TO ACTUAL SETTLERS.

HOUSES WILL BE ERECTED, if required, to be paid by instalments.
These lands possess Torrens titles, most of them in the
Red River Valley, near Winnipeg.

Manitoba Produced 25,000,000 bushels of Wheat, Oats and Barley in 1887.

311 MAIN STREET, WINNIPEG,
April 10th, 1890.

In presenting this catalogue of lands to the public, a few words may be said for the information of those contemplating settling in this country, and of those seeking investments for money.

As will be seen most of the within lands are situate in the Red River Valley and within about a day's drive of Winnipeg, the great commercial and railway centre of the North-West. Railways run in all directions from it, making it the great receiving and shipping point for grain and all kinds of farm produce. Steamers ply on Red River from the boundary line to Lake Winnipeg and farther north. The comple-

tion of the Hudson's Bay Railway would place Winnipeg nearer the markets of the old world than Chicago. Notwithstanding the many difficulties she has had to contend with Winnipeg has now a population of 20,000, with buildings, schools, churches, colleges and other institutions that would do credit to a city of a century's growth. To be within reasonable distance of such a city is an advantage not to be overlooked by an intending settler. Lands can now be purchased for very little more near Winnipeg than in any other part of the province. With the difference in prices for all kinds of farm produce the farmer near Winnipeg will have such an advantage over the farmer farther west that he may well afford to pay a dollar or two more per acre for his land. Then again the district around Winnipeg has social, educational and religious advantages not to be secured farther west.

It is often asked why the lands near Winnipeg are not all settled. The reason is that these lands were included in the reserves selected from the best parts of the country by the half-breeds for their children, they having the right to select the lands where they chose. Only recently has it been possible to acquire full title to these lands, and now that they are in the market they possess the great advantage of being *en bloc*, i.e., the sections are not separated by intervening homestead claims.

It is an admitted fact that the lands in the Red River Valley are richer and more productive than in any other part of the North-West, and clear prairie land is not to be found to the same extent in any other place, besides it is amply supplied with wood and water. No need to go farther west. Take your ticket to Winnipeg and locate on a farm there. Prices are low and terms are very liberal, and anyone with a few hundred dollars and a pair of willing hands can soon have a comfortable home of his own, and be laying up money for himself and children. The rent paid by tenant farmers in Great Britain in one year to their landlords will pay for a good farm here, stock it and fairly start the owner, and it will be his own fault if in a few years he is not independent, having a home of his own in a country as rich as any under the sun.

The within list comprises some improved farms with everything ready for occupation. A small house will be erected on the unimproved farms, if required, which can be paid for by instalments.

GEO. E. FULTHORP,

311 Main St., Winnipeg,

Manitoba, Canada.

LIST OF FARMS IN MUNICIPALITY OF SPRINGFIELD.

(EAST OF RED RIVER, MANITOBA.)

The Municipality of Springfield, as shown by the accompanying map, is one of the most conveniently situated in the Province of Manitoba, its western boundary being only a few miles from the City Hall, Winnipeg, and the main body of the settlement being inside of twenty miles. This is an advantage not to be overlooked in selecting a new home, as the settlers in this district have at once a market for all their produce at fair prices, and are enabled to have a choice from all that they require from some of the largest stocks of goods in America. The Municipality is naturally adapted for mixed farming, the good arable land and hay meadows so lying that almost every quarter section has a proportion of hay land; the soil is of the very best, ranging from sandy loam to heavy clay, the generality of it being very rich, and therefore it is well adapted to grow all kinds of grains and roots, a large quantity of the garden produce for the Winnipeg market coming from this district. Dairying is carried on to a large extent, the butter and cheese of Springfield always being in good demand on account of its excellent quality, and the farmers finding that they can command a good price for their dairy products are anxious to produce the very best, the excellent pasturage giving them a great advantage. Large stretches of good open farming lands, with woods and hills interspersed, give this part of the country a very park-like and comfortable appearance,

which is generally pleasing to new comers, and is certainly preferable to the clear open prairie without a tree to vary the monotony. Being at the extreme east of the fertile belt is another advantage, as the Municipality is bounded on the east and north by the forests which extend to the Lake of the Woods on the east, and to the east of Lake Winnipeg on the north. These woods supply large quantities of timber, cordwood and ties, making work in the winter for parties wishing to find employment for their teams. The water supply is excellent, from both open springs around the hills and wells on the level. In a great many cases the wells are flowing. The Bird's Hill, Moose Nose Hill and Oak Hammoek have inexhaustible supplies of gravel, which will no doubt be used in time to gravel the roads and in building, as concrete makes a cheap and lasting material for houses and stables. Schools, churches and post offices are well situated through the settlements, the map showing how conveniently they are placed. Public libraries are also in operation, and others can be formed as required, as the Council grants sums to help in their formation. The Municipality has two leading roads, which are graded for over twenty miles on each, besides side roads all through the settlements. The village of North Plympton, on the southern of these two roads, about 14 miles from Winnipeg, has a cheese factory, store, blacksmith shop, and a hotel and feed stable, kept by Mr. Dougald Gillespie, who is also postmaster and telephone agent, and well fitted to give information to parties looking for land in that part. A telephone line extends out to the village of North Plympton, and then on to about five miles north to the secretary-treasurer's office at Oak Bank, in this way giving communication with Winnipeg, an advantage rarely possessed by a country district in any country, the convenience of which is at once apparent. As might be expected from its situation and advantages, the financial position of the Municipality is so good, that in many cases the Council has loaned money to settlers, within its boundaries, to enable them to improve their farms and add to their stock.

LANDS IN THE MUNICIPALITY OF ST. ANNE, MANITOBA.

The settlement of Point du Chene and a portion of Little Point du Chene are in this Municipality, and its lands generally being fertile and well watered, are well adapted to mixed farming while its nearness to extensive wooded districts makes wood for building and fuel easily obtainable. The inhabitants are nearly all of French origin, and are well supplied with churches, clerical stations and schools.

LANDS IN THE MUNICIPALITY OF PORTAGE LA PRAIRIE.

This municipality, which is situated about 60 miles west of Winnipeg, is acknowledged to be the best wheat-growing district in the Province; in the worst of seasons the farmers have never failed to raise very heavy crops of grain and all kinds of roots. Particular attention is invited to the prices asked for lands in this desirable locality.

LANDS IN THE MUNICIPALITY OF ST. CLEMENTS.

The lands in this municipality, which is about 20 miles north-east of Winnipeg, are among the best in the Province, and admirably adapted for mixed farming. West Selkirk Station on C.P.R. Branch is within the Municipality. Farmers of limited means will find here a good chance of securing good farms at a very low price.

LANDS IN THE MUNICIPALITY OF
ST. LAURENT.

This Municipality, which is between the town of Stonewall and Lake Manitoba, is a fine grazing district and well suited for small ranges for stock. It is one of the best cattle raising sections in the country, as abundance of the best hay is always to be had, and small lakes are plentiful. The Hudson's Bay R'y passes through this Municipality and land will be in great demand there this season.

A portion of above mentioned lots are 66 x 132 ft., and the balance are 50 x 150 ft., with lane at rear, 30 ft. wide, with exception of Main street lots, which are 66 x 165, containing a full quarter acre.

MARKET GARDENS

IN AND NEAR WINNIPEG.

FROM 1 TO 20 ACRES EACH.

READY FOR IMMEDIATE USE.

At the west end of Logan street (which street crosses Main street south of the C.P.R. track), a slight turn to the right before reaching the race course brings you to eight twenty-acre garden plots, each lot being fenced, and 5 acres of it prepared for immediate cultivation. One of these twenty-acre plots lying nearest to Logan street has upon it an entirely new dwelling house and a well. The price of these twenty-acre plots, \$500; \$100 cash, and the remainder in one, two, three and four years, with interest at seven per cent. The one with house upon it, \$1,000; \$200 cash, balance in four equal annual instalments.

On Pritchard street are a number of acre lots, side by side, so intending purchasers may have from one to ten of these lots *en bloc*. Terms reasonable.

D.G.S. lots 19, 20, 21, 22, 23 and 24, in all 24 acres. These lots are situate on Point Douglas, fenced and ready for planting, and are for sale or rental on reasonable terms.

For those who do not understand the Canadian system of surveys, it may be explained that a municipality is made up of a number of townships, each of the lines of which run invariably north and south and east and west, 6 miles each way, making 36 square miles. Each square mile is called a section and contains 640 acres, which again is divided into quarters of 160 acres, and described as NE $\frac{1}{4}$, the SE $\frac{1}{4}$, NW $\frac{1}{4}$ and SW $\frac{1}{4}$. The sections are numbered as shown on the diagram. These townships are in tiers numbered one, two, three, etc., northward from the United States boundary line while the ranges east and west are those townships lying east or west of a fixed line running north and south through the Province of Manitoba, called the First Meridian. There is a Government road allowance around each section, so that every quarter section faces upon a road.

DIAGRAM OF TOWNSHIP.
