Lady Essex on Visit to the States - The Story of Queen Josephine of France

Lady Essex, who has just arrived in the United States from England on the S. S. Baltic for the first time in many years...

Lady Essex at one time hoped to benefit largely under the will of the late Lady Meux, who was through her marriage a near relative of Lord Essex...

Admiral Sir Hedworth Lambton, according to the terms of her will, has been obliged to assume the name of Meux instead of his own...

The ancestral home of Lord and Lady Essex is Casobury, in the heart of Hertfordshire, a beautiful place which has been tenanted on several occasions to Otto Kahn...

Every student of French history knows about Empress Josephine, the consort of the First Napoleon. But few, even in France, are aware that the latter country has had a Queen Josephine, True, she was never enthroned...

Daughter of Duke Amadeus III, of Savoy, she was married in 1771 to the Comte de Provence, grandson of Louis XV, the younger brother of the ill-fated Louis XVI...

where he stayed, first at Gosfield, in Essex, and afterwards, in 1809 and subsequently at Harlow, in Essex...

Make Believe Taste By RUTH CAMERON

I HAVE always suspected public taste to be a mongrel product, out of affection by dogmatism; and felt sure, if you could only find an honest man of no special literary bent, he would tell you he thought much of Shakespeare bombastic and most absurd, and all of him written in very obscure English and wearisome to read...

And not the least of the surprise, I fancy, would be waiting for us right in our own hearts. For we are all so accustomed to thinking that we ought to admire certain things that we often persuade everybody, ourselves included, that we do like them. While we are thus engaged in our own hearts, our genuine, spontaneous admiration is for very different things.

Don't Pay 50 Cents For Worthless Hair Tonics—Use Old, Reliable Harmless "Danderine"—Get Results

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—the hair falls out fast.

TODAY'S POLICE COURT

Christmas comes but once a year, but Edward Christmas, an Indian, comes to town several times in the run of a year. He came once too often this season, however, for yesterday afternoon, he was arrested by I. C. R. Policeman Smith on charge of lying and lurking in the I. C. R. station. He was brought before Magistrate Ritchie in the police court this morning and admitted the charge. Policeman Smith said that Edward had been drinking for several days and his funds were now exhausted. The big chief was remanded to jail, and an effort will be made to have him sent back to his home in Norton.

Andrew White, arrested on the charge of assaulting his father pleaded not guilty and was remanded.

Hiram Alward, reported for allowing his cows to run at large in Riverview Park, Douglas avenue, did not appear this morning. A woman called at court and wanted to pay the fine, but His Honor said that Alward must come.

PROGRESS IN ST. JOHN

The last few days have brought some interesting announcements relating to the forward movement in St. John. It is evident that the very satisfactory developments of the present year thus far are to be followed by others of a no less important character.

Edmonton has a woman police officer. Perhaps the present enquiry at St. John will reveal the need of a police matron in this city.

A voyage has been made in a dirigible balloon from Hamburg to Sweden, with a call at Copenhagen. This is a notable feat and another illustration of the growing success of the air-men, despite their many fatalities attending their experiments.

In Alberta the man who improves his holdings of farm lands gets a rebate of 25 per cent on his taxes, and an effort will now be made to have the rebate increased to 50 per cent.

When the Tory press asserts that reciprocity is dead, Sir Wilfrid Laurier replies that the problem of wider markets is not solved, but must be faced.

At the Child Welfare Exhibition which will be held in Montreal in October some striking facts will be presented to show how hard it is for the man who earns only a small wage to get a bare living for his family.

BULLFIGHTERS WHO EARN GREAT SUMS

Two in Spain Who Make Quarter Million Dollars a Year

Madrid, Sept. 20.—There is probably no sport in the world so lucrative as that of Spain's national sport, bullfighting, and the statement that there are twenty-three famous toreros who earn annually \$1,000,000 is by no means exaggerated.

He is withal a stolid and serious-minded man. He never smiles. His life has made him a stoic and his satisfaction is reserved for the ring.

He is also the most religious of mortals, at any rate, in Spain. It is indeed curious to find a man of his profession and marching into the arena.

There are at present two toreros who earn anything up to \$250,000 a year. They are Romita and Machaquito. The former is married to the daughter of a French nobleman with a highly historical name, and the latter to a Scotchwoman.

THE CHAMOOCK SARDINES

Mr. Howes, a Boston fish merchant, who has handled the Maine sardine products for many years, was in St. Andrews last week and inspected the samples that are being put up by the Canadian Sardine Company.

HARD ON THE DIVES

The Halifax steamer engaged in wrecking the steamer Hestia has been able to take away three corpses this season. A new diver has recently been put on, the former diver, Edward Cosson, of Grand Harbor, having met with a painful experience, which has resulted in his being placed in the Halifax hospital.

WHERE IGNORANCE IS NOT BLISS

A Toronto Exchange says:—With the spread of the cooperative movement throughout the country stories are daily being told of instances where a farmer has made unusually well from his membership in a cooperative association, and where non-members have been forced to accept smaller prices for the same commodity.

A woman in the forest district was approached by a couple of apple-buyers to sell the crop of her ten-acre orchard. They told her of a slump in apple prices, and that by winter she could expect to hear of only 75c a barrel being paid in Toronto. Nevertheless they were willing to buy her crop for \$125 on the trees.

The woman asked for a few hours in which to consider the offer, and this was reluctantly granted. In the interval she made a trip to Mr. Johnson's and sought his advice. He told her not to sell, and the next day visited her orchard to put a value on the crop.

Mr. Johnson estimated that she could obtain \$800 for it if she were but a member of the Forest Fruit-growers' Association. The woman was naturally anxious to join. Being interested in her case, Mr. Johnson negotiated with the officers of the association and had her enrolled as a member. The product of the woman's ten-acre orchard is now being picked and packed according to the association's rules, and she will receive the advantage of the association's higher prices. It was only ignorance of the cooperative idea that had prevented her from joining long before.

ONE HAPPY FACE. "It was the first night of a new play. 'I say,' remarked the author to the manager, 'that actor shifter over there—' 'Yes, he's an Eskimo,' said the manager." "Oh, Eskimos!" "What on earth made you take him in?" "Oh, I thought it would be a comfort to see one happy face if the play turns out to be a fiasco!"

LOCKHART & RITCHIE, 114 Prince William St., ST. JOHN, N. B. Live Agents Wanted. RHINE ROBBING THE RIVER DANUBE. Latter in Upper Portion is Losing Volume From Year to Year.

Berlin, Sept. 20.—After ten years of close observation, the river authorities of Southern Germany have come to the conclusion that the upper Danube is losing volume from year to year, and that the change is such that it will be a matter of only a few decades before several industries on the stretch of river above Ulm are completely ruined in consequence. It is said that already the loss during the last few years is equal to several hundred thousand dollars. Near Singaringen is a water mill erected in 1817, when it was in constant use and received constant power from the stream. Owing to the fall in the stream it is now able to work only in autumn and winter, and in dry summers it can be used less than half the days of the year. Time, in the years with dry summers, 1883, 1897 and 1911, it was working only 175, 142 and 172 days in the whole year. Similarly the Danube stream, which was at one time seventy-five feet broad and five to eight feet deep at Immenstadt, and at Singaringen was even navigable in the sixteenth century, is now very frequently represented by a dry river bed. The secret of this disappearance of water can have little effect on the lower Danube owing to the constancy of the larger tributaries, loss in a phenomenon in physical geography which, can best be explained by saying that one river is robbing another. European and American geographers and geologists are fond of quoting the question of the Meuse Valley, and English geologists have the classic example on the east coast of Yorkshire, of an inland river gradually eating away the supply of the coastal streams, but here in Southern Germany.—Ludy Tree.

Drinking Vessels Few vessels can compare with the old fashioned pewter mugs, either from an artistic or epicurean point of view. Unfortunately they are expensive vessels, and are seldom met with save at old-fashioned hostesses. Some of them are fitted with glass bottoms, for those who like to gaze through a glass, even if darkly. It was customary in old taverns to place rows of glistening pewter mugs along the mantelpieces, and these, along with bright candlesticks, and other shining utensils, formed a delightful contrast to the dark beams. The "mug houses" were a feature of London during the early days of the 18th century. They were the resort of those who were strong adherents of the House of Hanover, and were to be distinguished by the prominent display they made of pewter mugs. Earthenware mugs held an unassailable position by reason of their cheapness. Our forefathers were greatly attached to two-handed mugs which are popular in Somerset, and from which a couple are wont to drink perpetually an old custom. Our forefathers were greatly attached to mugs, which were large earthenware mugs, equipped with half a dozen or more handles. The mug was passed round, and each took a different handle and applied a different part of the mug to his lips.

TAX REFORM IS BIGGEST QUESTION NOW

PROGRESS IN BRITAIN

Victory For Single Taxers in Recent Election - Bitter Fight Against Vested Interests on Land Question in the Old Country

"It is not through Marconi and the cable that we are getting into touch with one another and making friends all over the world, but we are getting into touch with our brothers everywhere because we have got a principle that is a great world-movement. Addressing a largely attended meeting of the Tax Reform League of Eastern Canada held in St. James' Hall, Toronto, on Friday, Sept. 19, Mr. M. P. of London, England, thus explained his presence in Canada. In an eloquent address on the subject of taxation of land values he referred to the bitter fight that is being waged against the vested interests of the land question, which he characterized as the greatest problem of the day. Addressing the principles of advanced taxation were also delivered by James R. Brown of New York, and W. W. Buchanan of Winnipeg.

Mr. Neilson, who was enthusiastically received, said that the people in England were eager to hear what had been done in the United States and Canada with reference to the adoption of the single tax, and they had sent him to the country because they wanted to learn of the progress here from one of their own men. As an indication of the interest in public opinion in Great Britain he cited the recent contest in Northwest Norfolk, stating that it was significant that Mr. Hemmings, M. P., who had fought on the question of the taxation of land values in a constituency composed almost entirely of land, was elected by a majority of over six hundred, and had polled a larger vote than the preceding member in the two previous elections. The victory was so complete that the people began to think there really was something in the single tax, and the Whigs and Cabinet Ministers were so surprised that they commenced writing for pamphlets concerning the single tax and some of them even joined the league. The speaker also referred to the comfortable majority that had been given to Leonard Outwater, who favored the taxation of land values in the recent election in Ontario. He said that if there was a man qualified to represent the workingmen of England it was Outwater. Speaking of the fact that has been waged against the vested interests and monopolies of England, he said that the cause of the single tax is being labored by the young men of England, and they are taking an interest in living issues. Their hope lay in the Brotherhood movement, with all the best types of professions waiting to know what their position in the universe is and what are their natural rights. Once having it established in their own minds that they had natural rights they asserted themselves. At night schools every winter thousands of young men were studying economics. When they get these young men, with their knowledge of conditions and their determination to do things as they should be, they cared not for vested interests. They would shift.

Mr. Buchanan thought the time was ripe for the application of the principles that had been long proclaimed. He was ready for laws far in advance of any on the statute books today, and he nominated candidates for election to the provincial legislatures. It was time to stop going with their eyes to their backs and their reactionaries to do something, he said.

General Ignorance to Blame

In an address replete with humorous and graphic illustrations of the workings of the single tax system, James R. Brown of New York presented the subject in a manner which made it clear to all. During the course of his speech he said that all human activity was registered in the value of land and the economic system was always gathered in by the landlords. If there was anything to blame for present conditions it was the fact that the whole order of things could be changed without chaos or disorder and without injustice to anybody, but everybody would be benefited, he said.

The third annual meeting of the league, which was held recently in Toronto, was attended by delegates from all parts of the province. Mr. Stewart Lyon, the president, presided over the meeting for the annual reports for next year and received the annual reports, plans were discussed for the advancing of tax reform, those taking part in the discussion including Messrs. Francis Neilson, M. P., London, England; R. N. McCormick, M. P., for East London; W. A. Douglas, J. J. Hurley of Bramford; Ald. Johnson, London; Stewart Muir; John L. Wideman, St. James; J. J. Morrison, The Grange; Thos. Sinclair, Hamilton and J. M. Walton, Aurora. The Canadian Manufacturers' Association was unofficially represented.

The secretary's report referred to the advance that has been made during the last few years in economic thought, and submitted that no part of the world had more rapid progress been made than in western Canada. The successful adoption of advanced methods of taxation in western cities had proved a great stimulus to the movement in Ontario and eastern Canada. The report continued, noting that splendid progress had also been made in other countries. Reference to the success in China of Dr. Sun Yat Sen, a confirmed single taxer, was vigorously applauded. The report mentioned the fact that there was a growing demand from the public for information concerning tax reform, and expressed the belief that the government could not ignore the question much longer as Liberals and Conservatives alike had shown themselves to be in sympathy with the reform. In N. W. Howell, the report said, the cause of tax reform had a most ardent advocate.

Progress in Ontario

In his presidential address Mr. Lyon spoke of the progress which had been made in the province of Ontario during the past year, and urged the need for men who believed that the community created the value of land, and that the taxes should go to the municipality to be used in defraying the cost of public improvements and utilities. They had a good deal

NOBEL PRIZE WILL NEXT GO TO HAUPTMANN

German Dramatist's Name Is Guaranteed Majority Of Votes

A ROYAL AUTHOR

Cousin of King George Publishes Work—Russian Poet Persuaded to Suicide by Student Who Wanted to Use Unpublished Verses as His

(Times Special Correspondent.)
rip, Sept. 5—Gerhart Hauptmann will be the 1912 Nobel Prize winner for belles-lettres. His name has been considered by the Swedish Academy and is guaranteed a majority of votes.

Grand Duke Ernest Ludwig of Hesse is one of Europe's crowned authors. The grand duke is a son of the "Princess Alice," the favorite daughter of Queen Victoria of England.

He is a first cousin of the Kaiser and of King George, and a brother-in-law of the Czar and of Prince Henry of Prussia. He has published under the initials "E. L. H." a poem dealing with a Rhine legend.

The students of Bonn have taken up arms against the plan to erect a worthy monument to Heinrich Heine, Germany's greatest lyrical poet. It is thirty years since the new veteran novelists, Hauptmann, Dörmann, and others have all had the idea of erecting monuments to Heine.

At present the Borussiaeans, the student corps of which Kaiser Wilhelm is chief, threaten to march to the offending town and kick the Heine monument into the dust.

Germany are the greatest readers of books, particularly books on political and social subjects. The Chemnitz Literary Society says that in 1911 there were issued from the press 11,500 serious works dealing with international affairs, home politics, armaments, and sociology.

THERE'S MUCH TO BE DONE

Vital Matters For St. John Are Calling For Work and Workers

To the Editor of the Times, Sir:—I have read with much interest your editorial in regard to questions concerning our city, and your comment on the same.

We rejoice in the good work being done by the playgrounds, the Y. M. C. A., and other societies, and still there is need of greater effort.

We must not forget that it is righteousness that exalts a nation. Some one has said: "When godliness ceases to be the ruling force in individual or national life, then the time when signs of disaster are discovered."

I notice that Mr. Bradford spoke of community effort, and would like to mention something that has been done in this line in the North End of our city under the auspices of the W. C. T. U.

More than 100 children are members of the legion and have shown much interest in, and enthusiasm for, its lessons.

CHURCH CEASING TO BE HOUSE OF PRAYER

Hon. S. H. Blake Points to What He Believes to Be Present Day Conditions

"Verily, we are living in perilous times. The spirit of prayer is departing and the church, ceasing to be a house of prayer, is becoming an institution dealing largely in short entertainments; family worship and the reading of the Bible are almost unknown."

In these words Hon. S. H. Blake, points what he believes to be the condition of the churches, in a pamphlet he has just issued, entitled, "True Church Extension is Extension of the Church of Christ."

James Peacock, foreman in Randolph Blake's mill had two fingers taken off yesterday afternoon while working at a lathe machine. He was attended by Doctor Roberts.

NEW RECORD IS MADE BY SUBMARINE

San Francisco, Sept. 20—The submarine F-1 of the United States navy, bow maneuvering in the waters of the Pacific, holds the world's record for diving, having reached a depth of 283 feet.

The submarine remained at this depth for ten minutes, cruising at a speed of six knots and finally rising to within fifteen feet of the surface with as much ease and certainty as a sporting porpoise.

"We are overburdened with forms, ceremonies and machinery—without reality," concludes Mr. Blake, "and we often find the preacher seeking to tickle one ear and the choir the other—but there is no Gospel—the heart of the unfortunate hearer is not touched."

TRADES AND LABOR COUNCIL. A report was given last evening at a meeting of the Trades and Labor Council by James Sugrue and John Montague concerning the dominion convention which they attended in Guelph, Ont. J. H. Van Duren, organizer of the International Moulders' Union, addressed the council.

It was reported that a moulders' union had been organized in the city with a good charter membership. Attention was drawn to the fact that plasterers here were organized in the city with a good charter membership.

UNIONISTS MAY INCITE PEOPLE TO CIVIL WAR

Sir Edward Carson's Inflammatory Speech—Pledge Against Home Rule Drawn Up

London, Sept. 19—The condition of Ulster today suggests, in the words of The Times, that "a fire has been lighted in a magazine filled with gunpowder."

"I am sometimes told by the yellow press of the Radical party that I am a lawbreaker, and that I am a criminal, it is the present government which has made me a criminal. I say to the government: "It is you who are prepared to break the law. It is I who am prepared to resist you when you break it."

Being convinced that home rule will be disastrous to the material well-being of Ulster as well as the whole of Ireland, the present government is endeavoring to subvert to our civil and religious freedom, and perilous to the unity of the empire, whose names are underwritten, men of Ulster, loyal subjects of His Gracious Majesty King George, humbly relying on God on whom our fathers in days of stress and trial confidently did, hereby pledge ourselves in solemn covenant, throughout this, our time of threatened calamity, to stand by one another in defending for ourselves and for our children our cherished position of equal citizenship in the United Kingdom and in using all means which may be found necessary to defeat the present conspiracy to set up home rule in Ireland; and in the event of such parliament being forced upon us we solemnly and mutually pledge ourselves to refuse to recognize its authority, in the sure confidence that God will defend the right."

It was reported that a moulders' union had been organized in the city with a good charter membership. Attention was drawn to the fact that plasterers here were organized in the city with a good charter membership.

SCHOONER IS ASHORE AT QUACO

American Three-Master Driven On Rocks by Gale Today

WOMEN WERE ON BOARD

Wife and Daughter of J. M. Huston's Captain, With Members of Crew, Got to Land After Time of Peril—Was on Voyage to Boston

The schooner "J. M. Huston" of Tremont, Me., is ashore at Quaco and if the gale continues will go to pieces on the rocks. The schooner took on a load of lumber at River Street, N. B., for Robin & Robinson and was on her way to Boston when forced to seek shelter in Quaco Bay. She has been here in safety for the last three days but this morning the gale shifted to the east and her cables parted.

It was impossible to do anything to save her and the vessel was speedily driven ashore to the east of Quaco Head and about opposite White Rock. This occurred at nine o'clock and for a time the position of those on board, including the Captain's wife and daughter and a crew of seven, seemed extremely perilous. Fortunately the vessel held together until the tide receded and, at eleven o'clock, they were able to get ashore. If the gale dies down the vessel may escape destruction but otherwise she has called her last voyage. The schooner is a three masted craft of 221 tons and, as she is thirty-nine years old, carries no insurance. The cargo is insured. The schooner is in command of Captain Charles Limpert.

CHOLERA RAGING

Thirty-Two Deaths in Fifty Cases, Says India Letter to Baptist Board Here

In a letter to Rev. Dr. McIntyre, received this morning, Rev. R. E. Gillman, of Stanley H. Elkin, missionary at Bimlipatan, India, tells of an outbreak of cholera which is raging in their district. Out of fifty cases there were thirty-two deaths and the disease was still spreading. So far the missionaries and their converts had escaped.

FACTORY ACT CASE

Inspector Brings to Court Matter of Accident to Maritime Nail Works Employee

A rather important case came up for hearing in the police court this morning when Stanley H. Elkin, manager of the Maritime Nail Works, was called upon to answer to a charge of violating Section 18 of the Factories Act. The informant was Factory Inspector Kenney who contended that under section 18 all factory owners and others are required to report to him any accident. In the present case Frederick Dunham, an employee, was injured in the factory on Aug. 29, and the inspector said that the matter had not been properly reported to him.

Mr. Elkin pleaded ignorance of the law, and told the court that his firm did not act intentionally in the matter, but was also willing to adhere to the law. In the case of Dunham, he said that it was not the fault of any of the machinery that he had been hurt, but that a crow bar had fallen against his hand, breaking some of the small bones.

The matter was allowed to stand over until ten o'clock tomorrow morning, when several witnesses will be called.

BEQUEST RECEIVED

The treasurer of the St. John Protestant Orphan's Home gratefully acknowledges the receipt of \$100 from A. H. Wetmore, executor of the late Mrs. L. C. Dearborn, being the amount of a bequest left to the home by her.

VISITED COURTESY BAY

Sir Edmond Percy Girouard, who arrived in the city last evening, accompanied by N. W. Smith-Covington and Joseph P. Dawson, also of London, Eng., spent this morning inspecting the works in progress at East St. John and left on the noon train for Halifax.

BAGGED A MOOSE

W. George Grey of North Red, returned this morning after a successful hunting trip to Seven Mile Lake, a few miles from Lepreau. He was accompanied by Mr. Shaw as guide, and was successful in bringing down a large moose. The animal was a good-sized one, weighing about 1100 pounds. Mr. Grey says that big game seemed plentiful in that locality.

ENGINE BROKE DOWN

The breaking of an axle on one of the rear driving wheels of engine 100 to which the L. C. R. suburban train was attached near Hampton station this morning, caused a blockade on the road for more than an hour as the engine was helpless and there was no relief until an auxiliary car was sent from St. John. The Maritime Express due here about 10:20 o'clock did not reach the city until a little after twelve o'clock owing to the accident, as it made the stops of the suburban train besides bringing to the city the cars held up.

HAD TO RETURN

A heavy sea was running in the bay this morning following the strong wind of last night and early this morning, and it was considered unwise for the steamer "Prince Rupert" of the D. A. R. line to make her regular trip across the bay. She started at the usual time and had reached off Black Point when it was thought safer to return to port and this was done. She carried about seventy-five passengers and quite a freight. The steamer will leave tomorrow as usual.

START NEW ELEVATOR TOMORROW

Will Be Ready For Opening of Winter Season Next Year

SEA WALL COMPLETED

It is 2,100 Feet Long and 20 Feet High—Forty-Four Charges Exploded on Wednesday Night, Leveling Blue Rock—Work For Many Men

The actual work of construction on the new million bush elevator at West St. John will be commenced tomorrow. The preliminary work, which has taken considerable time, has been so far advanced as to make this possible and the construction will be undertaken without further delay. The big structure is to be built by the J. S. Metcalf Co., Ltd., of Montreal for the C. P. R., and it is their intention to have it ready for the opening of the winter season of 1912-1913.

The elevator is to be built on the shore of the cove between Blue Rock and the present C. P. R. wharf and the preparation of the site alone was a big undertaking. The first requirement was a sea-wall to protect the foundations and to enable the surrounding area to be filled in to supply room for sidings, track room, etc. This work was performed by D. C. Clark of West St. John. He started on the contract on May 23 and has just completed it, with the exception of a couple of days' work for the finishing touches. A gap has been left in the wall to allow access to the elevator. The sea-wall is 2,100 feet in length, twenty feet in height, constructed of solid timbers and filled to the top with stone.

The next step in the undertaking was the leveling of Blue Rock and this contract was awarded to the Courtenay Construction Company. The shingles and bathing houses were removed and a big gang of men have since been busy with modern equipment blasting the rock away and placing it on the beach to fill in behind the sea wall. The rock is exceptionally hard and requires continual blasting. On Wednesday evening forty-four charges were exploded in quick succession. The largest number at one time so far. They have still several weeks work ahead of them.

On the meantime, the J. S. Metcalf Co., Ltd., the successful tenderers for the elevator contract, have started to work. For several weeks they have been engaged in the preliminary arrangements and now have everything ready to commence on the contract. Their preliminary work included the assembling of equipment and materials and the construction of eight buildings for their own use during the period of construction. These buildings include their office, sawmill, blacksmith shop, tool house, cement shed and store houses. They have one concrete mixer set up on a second another here ready for use.

ON CONCRETE PIERS

They are now ready to commence on the foundations of the elevator and this work will be something new here. The elevator will be built on ninety-one concrete piers 9 by 2 feet in dimension and from 8 to 15 feet deep, which will be sunk through the sand and mud to bed rock. They will be built with the aid of open wooden caissons which will be sunk with iron weights while the material inside them is pumped out with a suction dredge. When they reach the rock the concrete will be filled in and allowed to harden, the wooden caissons remaining around them. On account of the approach of winter, the work of erecting the main building, which is to be of reinforced concrete, will then be commenced and will be continued throughout the winter. When the preliminary work is completed the elevator will be connected with the conveyor system which supplies the present plant. As soon as the new government wharves are completed will also supply them.

Official Here Today in Connection With New Marine Depot

There has been considerable criticism concerning the way in which the work of replacing the wall at the Union Depot is progressing or not progressing, according to the point of view. Different people are wondering as to whether this job, which it was thought would have been finished a few weeks ago, will be completed before the snow comes or not. It is being done by day's work, and some nice-sized pay envelopes are being distributed to those of whom it is complained as "turning the work."

Venturing a criticism on this point yesterday was the means of getting a citizen who is frequently about the depot into a little altercation. He had watched two of the workmen loading brick into a wheelbarrow, and happened to remark to a bystander how carefully they laid them down. That was enough. The bystander, very kindly informed his friends, who were loading the barrow, and the citizen was in hot water.

An argument ensued in which the men were told that they had been all summer at a job which should have been completed some time ago, and which would assuredly have been done had the work not been as slow as it is. Practically the only remark was that it was "none of his business." Being a government job, however, the citizen thought otherwise.
