IF YOU PATRONIZE
The Everyday Bargain Store
YOU LEARN TO SAVE MONEY.

The General Saying and It's True!

Goods are getting scarcer and scarcer—prices steadily going up—many lines practically wiped out—importation almost at a standstill.

With these unavoidable and increasing difficulties the live buyer realizes that it's wise to supply wants for now and later.

Our ample stock of general Dry Goods, Clothing, Boots and Shoes enables us to give low prices and satisfaction.

FRANK SMITH FOR PUBLIC WORKS

Fredericton, Aug. 14—The expected addition to the provincial cabinet is forecasted by the Gleaner, the local Conservative organ, tonight. That paper editorially states that B. Frank Smith, of Carleton, is likely to take the portfolio of public works. This is generally taken to be merely a temporary appointment. Mr. Smith, through his connection with the potato trade and hay trade being better suited for the agricultural portfolio, while Hon. J. A. Murray is eventually to be minister of public works—of the government lasts.

Under the caption "B. Frank Smith for Minister of Public Works," the Gleaner says: It is not unlikely that B. Frank Smith, M. L. A. of Carleton, will be called to the portfolio of public works made vacant by the resignation of Hon. P. G. Mahoney, now in the hands of his honor the lieutenant-governor. His honor has been ill at his home at Sackville for some weeks. He had hoped to be at St. John when the adjourned meeting of the provincial government was held there last week but he had not even then sufficiently recovered to permit of his leaving home and it is understood that Mr. Mahoney then went through to Sackville and there tendered his resignation. Mr. Smith will probably be sworn in minister of public works in a few days and the date of the by-election will be fixed immediately thereafter.

Revision of the Voter's List

The attention of all electors interested in Better Government for New Brunswick is directed to the fact that the revisors of the voters' list should, according to law make up and post their first lists of voters between September 1st and 10th.

1 Any young man who is of age before September 1st is a British subject and has resided six months in the provinces, can have his name added by applying to his parish councillors who are revisors, or to the chairman of the revising board.

2 If application is not made before the first list are made up and posted the same may be done any time before October 5th. The applicant must be prepared to make oath then before the revisor (who is authorized to take his affidavit for this purpose) that he was 21 years of age before September 1st, that he is a British subject and has resided in the province for six months previous to August 24th, 1916.

When elections are announced young men who have not attended to this important matter are often surprised and indignant that they are unable to vote. If the provincial elections are held this fall under the law as it exists at present, no young man, even if he became 21 years of age on the second day of September, 1915, whose name is not on the voters' list, can vote but if the elections are postponed until January 1, 1917, it is all important for those who wish to vote for better government that they should insist that their names be placed upon the voters' list at the revision this fall.

Any further information with respect to this matter will be gladly given to any person who inquires of E. S. Carter, Provincial Opposition Organizer, Fair Vale, Kings County.

Mrs. W. W. Boyer

The Baptist church of East Florenceville waited upon the burial of one of the aged saints of Carleton county on the afternoon of August 8—Mrs. Mary Boyer, aged 82 years, seven months and six days.

Mrs. Boyer was Mary Rideout, of Carleton county born in January, 1834. When but a young girl she passed a very satisfactory examination for license to teach school, from Provincial Normal School, and for 25 years she retained the high standard for education. She was a teacher of great worth, imparting to her students a hunger for education and a determination to make good in life. Her teaching had character.

It was when teaching she experienced the work of grace in her soul, and on the profession of "the faith" was baptized in the fellowship of the Simonds Baptist church.

Her marriage to William Boyer resulted in a family of three—two sons and one daughter: William of Fort Fairfield, Fred of the King's soldiers and Maud, Mrs. Taylor, of East Florenceville, where she died. With these to mourn her going, she leaves two brothers: William Rideout of Vancouver, and Frank of Peel, and eight grandchildren.

As a wife Mrs. Boyer was ever loyal and patient; as a mother, loving and watchful; as a Christian, steadfast and true.

The Baptist pastor, Rev. E. C. Jenkins, preached a very fitting sermon from Phil. 4: 13, "I can do all things through Christ which strengtheneth me."—Contributed.

Armand News

F. T. Atkinson of Florenceville was a guest of Robert Henderson recently.

Mrs. Rebecca E. Robinson of Shiloh, Maine, and her daughter, Mrs. J. S. Faulkner of Hartland, are visiting relatives here.

Mrs. Armand Henderson who has been visiting at the home of her daughter, Mrs. John Belyea of Lower Windsor returned recently.

Mrs. O. A. Frazier of Sedgewick Alta., arrived after an absence of ten years to visit her brothers and sisters who are overjoyed to see her. Long years of absence have caused many sad changes in her old home.

The farmers have nearly completed their haying, which is an immense crop.

The grain is looking beautiful. Mrs. A. A. Kimball was suddenly called to the home of her daughter Mrs. Elwood Foster Lower Windsor to nurse her little grandson Gordon, who is very ill with pneumonia.

Mrs. Henry London, Mrs. Osmond Frazier and Mrs. Edmund Robinson were guests of their cousin Mrs. Henry Smith of Windsor on Tuesday.

The many friends of Mrs. Leighton Kimball will be glad to know that she is recovering from a serious illness.

Miss Grace Lewis of New York, a recent guest of Mrs. Willie Kimball, has returned home.

Henry London who has been absent for some time is soon to be in our midst.

Mrs. Armand Henderson is spending a few days with Mrs. Wm. McEwen of East Knowlesville.

J. W. Lawson has greatly improved the looks of his house by a new addition.

Big stock, of pint jars at Baird's.

LETTER FROM LEE DYER

The following is a letter from Lee Dyer of Howard Brook, this county, who while doing his bit in France was very severely wounded. At one time he was reported to have died but happily the report was false. The letter was written from Woodcote Park, England, on July 28, and says:

Through your paper I wish to thank all of my friends in Carleton county for the tobacco and boxes of cake which they have so kindly sent me during the last year.

I was at the front line only a short time—about four months, but I did my share while there. I have lost the sight of my left eye and lost my left leg, but I am coming all right. I was in County of London War Hospital and was used fine. All of the staff were very kind to me, and if a man goes there with only a pair of old pants they can make him all over into a big healthy man.

Well, I always will be lame, so I guess they are going to send me to Egypt just as soon as I get able. I like the army life fine. Sometimes a man will get a little downhearted, but Kaiser Bill will soon send over something to make you mad and then you feel like going over to see some of the "square-heads." I was over three times and the Canadian boys did their duty.

Canadian wives and mothers have something to be proud of the way the boys do their duty. I never saw a Canadian boy but who would like to put the steel into a German. It is just like being on the stream drive. It is so exciting a man would sometimes think he was on lumber at "Hell's Eddy" and George was coming with the lunch the way the boys move.

It is a pity to see the nice towns and cities that are completely demolished by shell fire. I never will forget the first big shell I saw burst. It was quite close by, but I have since seen them altogether too near for safety.

I have often wished I had one of those machine guns out on North Branch. I would never wait for the moose to break their legs—I would break them first.

It is a great sight to see five or six thousand men waiting to kill each other, with the artillery behind sending over the big ones.

Well, I again thank all my friends for their kindness and remain, Yours truly,

Lee Dyer.
(Note Mr. Dyer's good cheer. Crippled for life as he is he passes over the matter in a dozen words. He has a wife and a large family of small children at Howard Brook.)

Accident at Bairdsville

James Lamereau met with a serious accident last week. When hauling a load of hay from the field the horses became frightened and ran away. The waggon upset and Mr. Lamereau received a severe blow on the head, fracturing his skull. Drs. Brown and McIntosh were called and performed an operation, removing several splinters of bone and a clot of blood from the brain. Though in a critical condition at present it is thought he will recover. Much sympathy is felt for Mr. Lamereau and family, who seem to be having more than their share of trouble this summer. Mrs. Lamereau having died recently after a long illness.

Be Progressive—ADVERTISE

WHY YOU ARE NERVOUS

The nervous system is the alarm system of the human body.

In perfect health we hardly realize that we have a network of nerves, but when health is ebbing, when strength is declining, the same nervous system gives the alarm in headaches, tiredness, dreamlike sleep, irritability and unless corrected, leads straight to a breakdown.

To correct nervousness, Scott's Emulsion is exactly what you should take; its rich nutriment gets into the blood and rich blood feeds the tiny nerve-cells while the whole system responds to its refreshing tonic force. Free from harmful drugs. Scott & Bowne, Toronto, Ont.

Vol. VIII. AUGUST 16, 1916 No. 10

ANONYMOUS WRITERS

The St. John Standard and other Conservative newspapers of the province are these days distinguishing themselves by the publication of anonymous diatribes of abuse of well known men. The chief object of their vindictiveness is Frank B. Carvell. These articles to date do not, and would not if boiled down into good newspaper English, bring a solitary charge that in even remote degree can damage the character or reputation of Mr. Carvell, or of any one else. The correspondence reflects to the discredit of the newspapers that print it and even more seriously to the discredit of the Conservative party as a whole. The anonymous writer, who would not for anything reveal his identity, is bringing under suspicion many decent Conservatives who with unctious disclaim any connection with the scurrilous articles. While one individual may be the author of all, a score are being blamed. And there is no praise coming from any quarter.

When such matter appears editorially in a newspaper, or over some one's signature, it will be time to take the matter seriously.

MERCHANTS HUSTLING

This issue of The Observer is jammed unexpectedly with ads, excluding much reading matter that will have to stand over until another time. The occasion of the Knights of Pythias' picnic all day Aug. 25 is being taken special advantage of, by local merchants who are preparing to give, for that day only, price reductions rarely equalled.

On the fourth page are the large ads of Hartland Clothing Co. and A. L. Baird, Opposite them J. T. G. Carr, H. R. Nixon and C. R. Violette are bidding for trade in a generous way.

While C. R. DeWitt's announcement is on the last page it is by no means least. Mr. DeWitt is making a special bid for business on picnic day and housewives will find his dollar offers certainly alluring.

Friday of next week will be a big day in Hartland. Come! Bring your purse. What you can save in special values at the stores will leave you sufficient cash to do the picnic in good style.

The Observer invites friends and foes to call that day and get the paper a whole year for only 50 cents. Furthermore, subscribers who are in arrears can settle up on that date and get a discount of 10 per cent.

A Flat Contradiction

I wish to contradict some statements which appeared in the last issue of the Observer concerning the offers made me by F. W. Smith after I had been injured in his mill. Your informant as to statements concerning the offer of a job was absolutely false. Smith did offer a sum of money but if he intended this to cover surgical attendance, which consisted of a two hours operation and about a month's attention he must think that surgical attendance does not cost much according to his offer which was \$30. Time in his estimation is worth nothing. Smith did tell me after I had refused the \$30 offered that I could look elsewhere

for compensation which I did with the results stated. I can prove these statements by several witnesses present at the time Smith's offer was made.

T. A. Pankhurst.

Methodist Picnic

The Sunday School and congregation of the Methodist church held a very enjoyable picnic in the grounds of Mr. David Underhill on Friday.

The weather was perfect and exactly suitable for showing the beauty of the upper St. John valley. The high hill on which Mr. Underhill's farm is situated, makes it possible to see for a long distance up and down the river, appreciate the undulating country which makes the wealth of Carleton county.

The picnic company was very representative, as the Methodist people had invited friends from the other churches of the village and there were also visitors from Bath, St. John, Boston and elsewhere.

A Plummer showed his skill in cooking beans in a "bean hole" and most of the party entered into the fun as Mr. Plummer, with mock ceremony, dug out his large pot of beans from the mound where they had been buried for twenty-four hours.

The evening was spent in playing games, and when dusk came on, the young people gathered round a fire in the middle of the field and sang old favorites in patriotic and other songs. The afterglow of the sunset, at the end of a perfect day, the full moon just risen, and the ruddy glow of the fire, made a charming setting for a half-hour of song, as a fitting close of a delightful open-air gathering. — Contributed.

Hagerman's Building For Sale

Having a desire to make a change in my business I offer for sale that centrally located concrete block in the village of Hartland. The building is 28x80, with basement 10ft. in the clear, the whole size of building. Store well finished, lighted and heated. Two upper stories contain three 7-roomed tenements besides halls and closets; also an office. All the tenements are furnished with modern conveniences. There is sufficient room behind the building for a barn or large warehouse if necessary. This is freehold property and possession can be given any time. Enquiries by mail promptly answered. Late Local and Personal News

A son was born to Mr. and Mrs. Brazil Seely one day last week.

Miss Kelly of St. John is visiting her cousin, Miss Blanche Kelly.

William McEwen of East Knowlesville was in Hartland on Saturday.

Miss Cambridge of St. John is a guest of her sister, Mrs. William McPherson.

Sergt. A. R. Rigby spent last week at his home here, returning to Valcartier on Saturday.

This afternoon the Church of England congregation have a picnic at the Pratt farm on the Rockland road.

W. G. Clark and family of Fredericton were at the Exchange on Monday, making a tour by automobile.

Murray Montgomery of Glassville and Guy Mean of Esdraelon spent last week at their homes returning to Valcartier on Monday.

Mrs. Amanda Boyer left on Monday for Vancouver where she will remain for an indefinite period with her son, Hartley Boyer, who is a successful druggist there.

Rev. Frank C. Rideout, pastor of the Second Baptist church at Bridgeport, Conn., has been visiting his brother Wilmot at Somerville, and old friends and the scenes of his boyhood at Simonds.

Mr. and Mrs. W. D. and Kenneth Keith and Mrs. E. M. Gilland left on Monday for an auto trip to Fredericton, St. John and Moncton. They will also visit Mr. Keith's boyhood home in Kings county.

On Saturday Carl Nelson, the movie man, while riding his motor cycle at a pretty good rate of speed, was struck in the face by some kind of winged insect that stung orbit at the moment of contact. At once Mr. Nelson's face began to swell and in a short time one eye was closed and he suffered intense pain until Sunday. Just what kind of creature attacked him Mr. Nelson is at a loss to know.

Sleepless Nights With Eczema

Mrs. Link, 12 Walker St., Halifax, N. S., states:—"After three years of miserable torture and sleepless nights with terrible eczema, and after trying over a dozen remedies without obtaining anything but slight temporary relief, I have been perfectly and entirely cured by using Dr. Chase's Ointment. After the third or fourth application of this grand ointment I obtained relief, and a few boxes were sufficient to make a thorough cure."

NEWS FROM ENGLAND

NEWS BY MAIL ABOUT JOHN
BULL AND HIS PEOPLE

Occurrences in the Land That Reigns
Supreme in the Commer-
cial World.

Windsor workhouse master has been
instructed to send casuals apparently
of military age to the recruiting office.

The Local Government Board has
sanctioned the appointment of two
women as sanitary inspectors at
Greenwich.

Captain F. Stanley Clark, of the
Border Regiment, has been appointed
Deputy Chief Constable of Kent
County Police Force.

Godstone (Surrey) Rural District
Council at a recent meeting decided
to refuse to employ conscientious ob-
jectors to military service.

The Metropolitan Drinking Foun-
tain and Cattle Trough Association
is erecting 30 troughs and 20 foun-
tains in London this year.

At the convocation of London Uni-
versity Sir Edward Henry Burk was
re-elected chairman, this being his
twenty-fourth year of office.

The Belgians at Letchworth, who
now number 4,000, have a special
constable of their own, who speaks
English, French and Flemish.

Nottingham Corporation has voted
\$301,750 from the profits of the gas,
tramways and electrical undertak-
ings in aid of the district rate.

For the second time in a week fire
has broken out in the gorge and un-
dergrowth on Littleborough Common,
Essex. Altogether six acres have been
destroyed.

Nearly 1,000 old boys of the Church
of England Waifs and Strays Society
were serving in the navy and army,
of whom six have gained commissions
and 38 have lost their lives.

With a view to economy and owing
to the scarcity of doctors, Willesden
Council have decided to suspend the
medical examination of school chil-
dren and of the maternity home.

The death has occurred at Buxton of
Captain Holland, for 19 years Chief
Constable of Derbyshire. Captain
Holland was 58 years of age and was
formerly with the 15th Hussars.

There being no prisoners for trial,
the Croydon Quarter Sessions were
not held. The Recorder, Mr. R. F.
Colam, K.C., has had only one prisoner
before him since October, 1914.

Last year 626 boys between 12 and
14 years of age were allowed to leave
school by the Berkshire education
authorities for farm work.

The amount lost in grants was \$6,250.
It is proposed to increase by about
4 cents per 1,000 gallons the charges
for water in Manchester. The revised
scale will mean an additional annual
revenue to the corporation of \$150,000.

London's first Polytechnic V.C., Sec-
ond Lieutenant F. H. Johnson, R.E.,
was at the Battersea Polytechnic,
where he was formerly a student, pre-
sented by the governing body, staff
and students with his portrait in oils.

News has reached the St. Andrew's
Steam Fishing Company of Hull that
their trawler, "The Hawk," had been
sunk in collision. Four of the crew
are missing and the rest have been
landed.

Strawberry Recipes.

Strawberry Sandwiches.—These are
delightful for afternoon teas. Fine
French bread or tender baking powder
biscuit serves as the binding for large
sweet berries sliced and sprinkled with
sugar. Sometimes a spoonful of
whipped cream is added to the berries.
Strawberry Salad.—One quart straw-
berries, 3 tablespoonfuls olive oil,
dash of salt, 2 tablespoonfuls honey,
1½ tablespoonfuls lemon juice, let-
tuce. Wash and hull berries; cut in
halves, lengthwise. Make a dressing
by beating the honey, oil, lemon juice
and salt together until frothy; pour
over the berries and let stand thirty
minutes in a cold place. Drain ar-
range on lettuce leaves and serve at
once.

Strawberry Roll.—Make a rich bis-
cuit crust, then roll out the dough to
about a quarter of an inch in thick-
ness. Spread thickly with berries,
dredge lightly with flour and a lit-
tle sugar; roll up, moistening the edges
to keep them together, and tie in a
cheese cloth. Lay on a plate and
set in a steamer. Steam two and a
half hours for a medium-sized roll,
then serve with sweetened cream or
hard sauce.

Strawberry Shortcake for Five.—
A large cupful of flour, two teaspoon-
fuls of baking powder, a teaspoonful
of lard and one of butter. Mix with cold
milk, mold into two large biscuits and
bake in quick oven. Split through
center and butter and pour over same
one box of strawberries which have
been mashed with one and one-half
cupfuls sugar. Serve with whipped
cream or ice cream.

Strawberry Sunshine Preserves.—
Select nice red, firm berries; wash
and drain. To every quart of ber-
ries have ready a syrup made of two
cups of sugar and one-half cup of wat-
er. When syrup has boiled five min-
utes add berries and boil exactly ten
minutes, no longer, and then skim out
berries, placing them on a platter. Boil
the juice twenty minutes, removing
the scum. Then pour the juice over
the berries and place in the sunshine.
Cover berries or dish with a piece of
glass. One day usually suffices to
reduce to proper consistency—which
should be a jelly-like state. Reheat
and then seal, or place in jelly glasses
and cover with paraffin. This makes
a very delicious preserve.

Inexpensive Cakes.

Orange Cake.—One pound of house-
hold flour, one-half pound of mar-
garine, half a pound of sugar, one-half pound of
currants, half a pint of milk, one tea-
spoonful of carbonate of soda. Mix
all the dry ingredients together. Place
the margarine in a basin a little way
from the fire until it gets soft, beat it
up with a fork until it is like cream;
mix a good teaspoonful of carbonate
of soda in two teaspoonfuls of milk,
set aside until you have mixed with a
knife the flour etc., with margarine
and milk, then pour in the milk and
soda; beat well until thoroughly mix-
ed, place in a greased tin, leaving
plenty of room to rise, bake slowly
for half an hour, then in a hotter oven
for one hour.

Date Cake.—One pound of household
flour, one-half pound of currants, six
ounces of margarine, a tablespoonful
of vinegar, milk (less than a quarter
of a pint), one-quarter pound of sugar
mixed spice, carbonate of soda. Rub
all the dry ingredients well together,
melt the carbonate of soda in the milk,
and add the mixture, then add the
vinegar, beat all well together and
bake for one and a half hours in a
moderate oven.

Date and Currant Cake.—One pound
of flour, one-half pound currants, one
of granulated sugar, six ounces of
margarine, one teaspoonful of car-
bonate of soda, one large teaspoonful
of marmalade milk as required. Beat
the butter and sugar together, add the
flour, then the other ingredients. Dis-
solve the soda in the milk and add to
the above. Mix all to a stiff batter.
Bake two hours in a fairly hot oven.
Keep two days.

Ginger Cake.—Three-quarters pound
of flour, three-quarters pound of syrup
one-quarter pound of lard, two tea-
spoonful of spice, a little candied peel,
one teaspoonful of ground ginger, one
teaspoonful of carbonate of soda, a
little milk. Mix all dry ingredients
together, then add enough warm milk
to make a stiff dough. Bake one and
a quarter hours in a moderate oven.

Currant Cake.—One pound of flour,
one-half pound of currants, six ounces
of sugar, six ounces of margarine, two
ounces of mixed peel, one teaspoonful
of carbonate of soda, one teaspoonful
of powdered sugar, one teaspoonful of
mixed spice, one cup of milk. Melt
the margarine in the milk, but do not
let it boil; add to the dry ingredients,
which should be well mixed. Bake
three hours in a moderate oven.

Household Hints.

If potato peelings are dried, they
will make a quick fire.
You can get more juice from a lemon
than that is heated than from a cold
lemon.

Whatever fruit is in season should
be made the most of, especially for
desserts.
The bone should be left in the roast,

it will keep the juice in and add flavor
and sweetness.
The blossom buds of rhubarb are
said to make good greens if stewed
like spinach.

Use cold milk to soak the bread or
cake in for puddings; the pudding will
be more light.
To hurry the cooking of anything
in a double boiler, add salt to the
water in the outer boiler.

Any cooking that is done in ves-
sels that are not thoroughly clean is
poisonous to the system.
If muslins are ironed wet, they will
be smooth; if ironed dry, they will
have a rough appearance.

A good sweet sandwich is made of
banana cream spread between thin
slices of sponge finger cake.

Never allow a baby to use a nurs-
ing bottle with a tube attached to it—
the tube can never be cleaned.
Grapes are much more delicious if
they are allowed to lie in ice water
at least five minutes before serving.

When hamburger steak seems dry
put two or three tablespoonfuls of
fresh cream and a few breadcrumbs in
with it.

Remove fruit stains by pouring boil-
ing water over the stained surface,
having it fall from a distance of three
feet.

When warming a steamed pudding
put it in a colander and stand it in
the steamer. This will make pudding
or cake delightfully light.

Patent leather shoes should be wip-
ed off with a cloth when they are re-
moved and then all the olive oil should
be rubbed into them.

Sifted wood ashes will clean tin,
agate or corks. Dampen a
cloth and apply the wood ashes by
rubbing it on the stained places.

Time is saved by cutting the dough
for baking biscuits with a knife. The
biscuits will be in pretty squares, and
there will be no waste.

IMPORTANCE OF VERDUN.

A Sufficient Reason for the Fighting
in That District.

Why do the German armies bat-
tle continuously at the road to Ver-
dun? The question has been asked
by thousands, answered by few. Le
Courrier des Etats Unis, a French
newspaper published in New York,
gives the most reasonable of all the
explanations. The article, in trans-
lation, follows:

"The Basin of Brie, lying between
Verdun and Metz, is the field of bat-
tle for the control of iron, and iron
is king in this war. Before the war
Germany mined 28 million tons of
iron ore every year. Of this 21,000,
000 came from that part of the Basin
of Brie annexed in 1870-74. France
mined 22,000,000 tons, and of this
15,000,000 tons was procured from
that portion of the Basin still in
French hands.

"Since the war France, having lost
the Basin of Brie by invasion, has
been forced to rely upon England and
the United States for iron ore. Ger-
many, on the contrary, having occu-
pied the iron district not only of
France, but of Luxembourg, has kept
the machinery going full blast, thus
adding to its normal production of
28,000,000 tons over 15,000,000 and
6,000,000 more from Luxembourg, a
total of 49,000,000 tons of ore. In
Germany 100 tons of pig iron give
92 tons of steel. Probably, therefore,
over 40,000,000 tons of steel per an-
num make Germany's war output.

"If the Germans could become mas-
ters of Verdun they believe that
they could prolong the war indefi-
nitely, but, on the contrary, if we could
advance to Metz we would at one
blow put an end to the war, for we
would cut off nine-tenths of the total
steel production of the German Em-
pire."

LONDON SQUARE FOR TOMMIES.

Plan to Throw Open City Gardens to
the Wounded Soldiers.

"Throw open the squares to the
wounded soldiers!" is a popular cry
in Mayfair, Belgrave, Kensington and
Bloomsbury, London.

Some of the prettiest squares are
on the estates of the Duke of West-
minster and his leaseholders. These
include Grosvenor Square, Eaton
Square, Belgrave Square, Eccleston
Square, St. George Square, Warwick
Square, Chester Square, Wilton
Crescent.

Grosvenor Square is used by of-
ficers and men from three hospitals in
the square, but no general invitation
has been given to other wounded men.

Berkeley Square, one of the most
open and inviting spaces in Mayfair,
is used by the wounded from three
hospitals.

Other famous squares which at
present are only used by those who
have keys include the wooded lawn
of Onslow Square and the long gar-
dens of Cadogan place facing St. Anne's
Square and St. James's Square.

Riches have wings but it is foolish
to sit in a rocking chair waiting for
them to fly away.

HOW TO OPERATE THE GASOLINE ENGINE

Told by C. W. Jakes, of the Ontario Agricultural College.

[No. 2.]

Now that we have a knowledge of
the working principle of the en-
gine, we are in a better position to
discuss troubles in starting, and for
that purpose we'll imagine we are try-
ing to start an ordinary four-stroke
engine.

First, let us thoroughly oil the ma-
chine and be sure that the cylinder
is getting plenty of oil. Lack of
oil in the cylinder is usually shown by
over-heating and a subsequent tight-
ening of the piston. But this point
will be dealt with under the discus-
sion of operating troubles. A too-lib-
eral supply of oil on all working parts
is much better than not enough, but
the supply to the cylinder requires
special care.

Now, see that the water tank or
hopper is full, or nearly so, of water.
In cold weather the hopper should al-
ways be drained, as freezing will
cause cracking of the cylinder walls
and a serious loss is entailed.

Next, open the carburetor—most
if the engine has not—close the air
valve. This makes the mixture a
little richer for starting, but it should
be opened as soon as the engine has
made one or two explosions. If not
opened, the engine will smother and
stop as it must have air mixed with
the gasoline.

Now close the switch and turn over
the flywheel quickly. A few smart
turns should start it going; if it does
not start there is something wrong,
and we must make the cause of trouble
there are three main points to consid-
er: (1) The supply of gasoline; (2)
the working of the valves; (3) the
ignition or firing device.

What of the Gasoline Supply.

First we'll examine the gasoline
supply system. It may be that the
supply pipe leading from the gaso-
line tank to the cylinder has become
plugged with dirt, or if it has a pump
plugged with dirt, or if it has a pump
forcing the gasoline into the car-
buretor it may be broken. In order
to ascertain whether the engine is ex-
ting gas or not stand close to the ex-
haust pipe and have some one crank

engine with leaking valves might be
likened to a gun with a hole bored
into the firing chamber. When the
gun is fired, part of the force would
escape through the hole instead of be-
ing exerted against the bullet to force
it out. In order that the engine may
give satisfaction and develop its full
capacity the valves must fit tightly on
their seats.

Accompanying diagrams explain the
importance of having the valve seats
free from any deposits.

Suppose in our examination we find
that the exhaust valve is leaking—it
is usually this one that gives the most
trouble as the inlet valve is not sub-
ject quite as much to the deposition of
carbon and to pitting, then the valve
must be reground. With the average
farm engine on intermittent duty, the
valves should be ground once a year.
We say that a valve is pitted when
the head or seat, as the case may be,
shows the presence of small holes or
pits due to the action of the burned
gases which are of an acid nature and
eat holes in the metal.

To grind the valve, remove the lock
nuts and spring from the valve stem
and then the cap from the valve pal-
let, or better still, remove the entire
cylinder head for greater ease in
working, and the facility thus obtain-
ed of doing a much better job will
repay for the extra trouble of remov-
ing the head. Now scrape off all
deposits of carbon on the seat with a
knife and apply valve grinding com-
pound, or if it is impossible to buy
this in a hardware store, make a
paste of fine emery flour and lubricat-
ing oil. Apply by raising the valve
head from its seat, and place some of
the paste around the seat. Let the
head drop down into place, and then
revolve by twirling the stem between
the palms of the hands. Do not use
much pressure, but lift the head fre-
quently and remove dirt balls that will
accumulate. When the head turns
without friction, examine frequently
and discontinue the motion when a
bright, smooth ring appears all around
the head and seat. This shows that
the head is now fitting snugly on its
seat; wash all the parts with gasoline,

Fig. A shows the valve head resting on a seat that is perfectly smooth and free from carbon deposits. Result—no escape of gas and no loss of power. Fig. B shows the valve head resting on the seat that contains some deposits of carbon and has a pitted surface. Result—an escape of gas and loss of power.

the engine. If gasoline is coming over,
it can be distinctly smelt after one
or two revolutions of the flywheel. A
frequent cause of trouble is the fact
that the gasoline tank is empty and
the operator is not aware of the fact
or dirt of some kind or another has
gotten into the air valve and clogged
it, so examine that.

The bowl of the carburetor—if the
engine has one—may have become
filled with sediment, preventing the
free flow of gasoline. To prevent this
accumulation, some engines have at
the base of the bowl a cock which
should be opened frequently to drain
should be opened frequently to drain
it. The carburetor or air inlet may
have become choked with dust and
dirt. To prevent this the source from
which the engine draws its air should
be pure and free from dust. If the
engine be set in the feed room or in
the workshop where the air is full
of floating dirt particles, the air in-
let should be connected by a pipe to
the outside atmosphere.

If after examining the feeding ap-
paratus we find that the engine is get-
ting gasoline in sufficient quantity for
normal operation we'll now take a
look at the valves. Here is a fre-
quent source of trouble to the aver-
age operator of a gasoline engine—
whether the valves are leaking or not,
have someone turn the flywheels slow-
ly against compression, and keep your
ear close to the cylinder head. If the
valves are leaking, the compressive
will be weak, and a hissing sound will
be escaping air will be distinctly ap-
parent. This leaking is caused from
two sources: either an accumulation
of carbon—the residue left when gaso-
line or oils are burned, between the
valve head and the seat, thus prevent-
ing a close fit and allowing an escape
of gas, or from a worn and pitted sur-
face which has the same effect. The

wipe dry and re-assemble. In replac-
ing the cylinder heads or valve cages,
be sure that the packing is in proper
positions and that the nuts are tight-
ened evenly in order to prevent
leak or probably a blow out.

Care Needed in Grinding. The valve
head should not be turned completely round
and round, but rather backwards and
forwards. In a semi-circle, that is
turned to the right, then to the left,
alternating the movements. After
repeating these movements for some
time, occasionally lift the valve pal-
let from its seat, turn part way round
and let it drop back into its seat and
repeat the grinding operations as be-
fore. This insures even grinding all
round. When the valve turns with-
out any apparent grinding friction
take it out, wipe it clean, examine the
seat, apply more of the oil and emery
mixture or compound and put it
through another course of grinding.
This process may have to be repeat-
ed a number of times.

When a good bearing seat has been
secured, wipe the valve pallet and
stem as well as the valve seat and
alve, in which the stem works, en-
tirely free from emery, oil and grit.
Return the pallet to its seat, close up
the valve and adjust the spring and
lock nuts to the stem ready for ser-
vice.

Where it is not possible to remove
the cylinder head or valve-cage, con-
taining the valve, provision for grind-
ing has usually been provided by the
manufacturer in the shape of a re-
movable cap, above the valve. The
following diagram may aid in showing
how the grinding process may be ac-
complished in a case like that.

A handful of waste or cloth is put
in the valve port or entrance into the
cylinder, to prevent any emery falling
into the cylinder; this is very import-

ant because emery dust in the cylinder
would cause the walls to be roughened
and abraded. Then the valve seat
is coated with the grinding compound
and the blade of a screw-driver is
inserted in the slot in the top of the
valve head, and the handle worked
backwards and forwards by friction
with the palms of the hands, as illus-
trated.

Now that we have the valves work-
ing properly, if the compression still is
weak and a hissing sound is heard at
the end towards the flywheel, we ar-
rive at the conclusion that the piston
rings are worn, and allow the gas to
escape past them. If such be the
case, frequently changing the position
of the rings will effect a cure, that is,
placing the first ring in the second
and third place, the second in the first
and third place, etc. If this does not
prove satisfactory, a new set must be
obtained.

Ignition Must Be Faulty.

If the engine still refuses to go, the
fault must lie in the ignition. Per-
haps we may have forgotten to close
the switch. I have seen men crank
away at an engine for two or three
minutes and then when looking to see
what was wrong, discover that they
had forgotten to close the switch. The
current is generally taken from the
primary battery consisting of about
five cells depending on the size of the
engine. The total output of the bat-
tery is the sum of the number of am-
peres given by each cell, and the total
voltage of the battery is total num-
ber of volts given by each cell. Gen-
erally speaking, a current of eight am-
peres at a voltage of four is required
for make-and-break ignition. For
jump-spark systems over 10 amperes
is required at about a voltage of
four.

It is very important that all wiring
connections be kept tight and clean, as
a loose or dirty connection means a
loss of energy and a shortening of
life of the cells. It may be that the
cells are run down and that new ones
will have to be purchased. In order
to tell whether a cell has played out
or not, every engine operator should
have a small pocket ammeter, costing
75 cents, and tests his cells from time
to time. A good dry cell when new
will show about one and one-half volts,
sometimes a little more, and a cur-
rent strength of from twenty to thirty
amperes.

With the battery in good condition,

the fuel supply, the valves and the
ignition working properly, the en-
gine, unless something is broken, will
start. In cold weather the gasoline
does not vaporize so readily as in
warm, and in order to facilitate start-
ing operations, warm water should
first be placed in the water-hopper,
changing to cold when the engine has
gotten nicely started.—Canadian
Countryman.

How the Bayonet Was Originated.

The bayonet, which was thought to
be obsolete three years ago, has come
back into great favor with military
authorities, due to its unquestionable
utility in hand-to-hand fighting. The
first bayonets ever to be used were
brought forth in a mountain fight in
Dayanone when the Basques, the wild
mountain men, tied scythe blades and
sickles to the ends of their muskets
when charging the Spanish enemy. So
efficient were these weapons in the
fight that followed that reports of a
new and terrible arm spread over
Europe. The French appropriated the
weapon and the name and the other
nations followed in rapid order.

Fly in the Ointment.

Mrs. Higgins was an incurable
grumbler. She grumbled at every-
thing and everyone. But at last the
vicar thought he had found some-
thing about which she could make no
complaint; the old lady's crop of po-
tatoes was certainly the finest for
miles around.

"Ah, for once you must be well
pleased," he said, with a beaming
smile, as he met her in the village
street. "Everyone is saying how splen-
did your potatoes are this year."

The old lady glared at him as she
answered.

"They're not so poor. But where's
the bad ones for the pigs?"

India's Rice Crop.

India's rice crop of this year is
estimated at 75,792,000 acres, slightly
in excess of the acreage of the year
before. The total yield is expected
to be 21 per cent. greater than last
year. Estimates for both area and
yield are the greatest on record.

Paid to Smoke.

Manager—"I caught that fellow
smoking on the job out there and
fired him. I gave him his four days'
pay and told him to clear out."

Owner—"Goo! heavens that fellow
was only looking for a job."

This diagram shows how the valve is ground to eliminate pits.

WHY YOU ARE NERVOUS

The nervous system is the alarm system of the human body.

In perfect health we hardly realize that we have a network of nerves, but when health is failing, when strength is declining, the same nervous system gives the alarm in headaches, tiredness, dreamless sleep, irritability and unless corrected, leads straight to a breakdown.

To correct nervousness, Scott's Emulsion is exactly what you should take; its rich nutriment gets into the blood and rich blood feeds the tiny nerve-cells while the whole system responds to its refreshing tonic force. Free from harmful drugs.

Scott & Bowne, Toronto, Ont.

Vol. VIII. AUGUST 16, 1916 No. 10

ANONYMOUS WRITERS

The St. John Standard and other Conservative newspapers of the province are these days distinguishing themselves by the publication of anonymous diatribes of abuse of well known men. The chief object of their vindictiveness is Frank B. Carvell. These articles to date do not, and would not if boiled down into good newspaper English, bring a solitary charge that in even remote degree can damage the character or reputation of Mr. Carvell, or of any one else. The correspondence reflects to the discredit of the newspapers that print it and even more seriously to the discredit of the Conservative party as a whole. The anonymous writer, who would not for anything reveal his identity, is bringing under suspicion many decent Conservatives who with unctious disclaim any connection with the scurrilous articles. While one individual may be the author of all, a score are being blamed. And there is no praise coming from any quarter.

When such matter appears editorially in a newspaper, or over some one's signature, it will be time to take the matter seriously.

MERCHANTS HUSTLING

This issue of The Observer is jammed unexpectedly with ads, excluding much reading matter that will have to stand over until another time. The occasion of the Knights of Pythias' picnic all day Aug. 25 is being taken special advantage of by local merchants who are preparing to give, for that day only, price reductions rarely equalled.

On the fourth page are the large ads of Hartland Clothing Co. and A. L. Baird. Opposite them J. T. G. Carr, H. R. Nixon and C. R. Violette are bidding for trade in a generous way.

While C. R. DeWitt's announcement is on the last page it is by no means least. Mr. DeWitt is making a special bid for business on picnic day and housewives will find his dollar offers certainly alluring.

Friday of next week will be a big day in Hartland. Come! Bring your purse. What you can save in special values at the stores will leave you sufficient cash to do the picnic in good style.

The Observer invites friends and foes to call that day and get the paper a whole year for only 50 cents. Furthermore, subscribers who are in arrears can settle up on that date and get a discount of 10 per cent.

A Flat Contradiction

I wish to contradict some statements which appeared in the last issue of the Observer concerning the offers made me by F. W. Smith after I had been injured in his mill. Your informant as to statements concerning the offer of a job was absolutely false. Smith did offer a sum of money but if he intended this to cover surgical attendance, which consisted of a two hours operation and about a month's attention he must think that surgical attendance does not cost much according to his offer which was \$30. Time in his estimation is worth nothing. Smith did tell me after I had refused the \$30 offered that I could look elsewhere

for compensation which I did with the results stated. I can prove these statements by several witnesses present at the time Smith's offer was made.
T. A. Pankhurst.

Methodist Picnic

The Sunday School and congregation of the Methodist church held a very enjoyable picnic in the grounds of Mr. David Underhill on Friday.

The weather was perfect and exactly suitable for showing the beauty of the upper St. John valley. The high hill on which Mr. Underhill's farm is situated, makes it possible to see for a long distance up and down the river, appreciate the undulating country which makes the wealth of Carleton county.

The picnic company was very representative, as the Methodist people had invited friends from the other churches of the village and there were also visitors from Bath, St. John, Boston and elsewhere.

A Plummer showed his skill in cooking beans in a "bean hole" and most of the party entered into the fun as Mr. Plummer, with mock ceremony, dug out his large pot of beans from the mound where they had been buried for twenty-four hours.

The evening was spent in playing games, and when dusk came on, the young people gathered round a fire in the middle of the field and sang old favorites in patriotic and other songs. The afterglow of the sunset "at the end of a perfect day" the full moon just risen, and the ruddy glow of the fire, made a charming setting for a half-hour of song, as a fitting close of a delightful open-air gathering. — Contributed.

Hagerman's Building For Sale

Having a desire to make a change in my business I offer for sale that centrally located concrete block in the village of Hartland. The building is 28x80, with basement 10ft. in the clear, the whole size of building. Store well finished, lighted and heated. Two upper stories contain the 7-roomed tenements besides beds and closets; also an office. All the tenements are furnished with modern conveniences. There is sufficient room behind the building for a barn or large warehouse if necessary. This is freehold property and possession can be given any time. Enquiries by mail promptly answered. Big stock, of pint jars at Baird's.

I. A. J. Ward is building a new house on the flat near Mrs. G. E. Boyer's new dwelling.

Paris Green 33 cents a pound at Baird's.

Archie Stevens of the Royal Bank staff at Woodstock is home for two weeks vacation.

10% off corsets until Aug. 19 at Baird's.

H. J. Aiton, the popular telegraph operator, commences his annual vacation tomorrow.

Ladies' Rain Coats worth \$7, only \$4.75—at Baird's.

H. W. Annett went to St. John on Saturday evening to attend a meeting of railway telegraphers.

Ladies' tan Oxford shoes and pumps at half price at Baird's.

C. R. Violette has for sale cheap a nickel-mounted, curved glass show case.

Come to Hartland on picnic day prepared to buy necessities. All the merchants are giving special values for that day only.

Mrs. Austin Adams and daughter Helen of Centerville have returned home, after spending five weeks at the home of J. W. Adams.

Miss Hattie P. Ebbett and brother Ernest of Middle Simonds left Thursday for Fort Fairfield and Limestone where they will spend a few days visiting their sister.

Mrs. M. E. Thornton and daughters Glenda, Helene and Mildred, of Calgary, are guests of her daughter, Mrs. G. S. Larlee, Bath, and other relatives in the county.

S. S. Miller and family left yesterday for a few weeks sojourn at "The Ledge," near St. Stephen. They made the trip by auto, going to Houlton and down the Calais road.

Mr. and Mrs. S. J. Wallace of Upper Woodstock have been visiting old neighbors at Cloverdale, where they used to live, and their daughter, Mrs. H. N. Dickinson at Hartland.

Sweaters at the old price at Baird's.

Simonds Red Cross will meet with Mrs. Oscar Shaw on Aug. 24.

S. S. Miller is offering for sale at a low price a second-hand Ford automobile in excellent running condition.

Mrs. H. M. Stevens who has been in rather poor health at her home in Somerville is recovering and yesterday returned to Hartland for a few days.

Service will be held in the Methodist church on Sunday, August 20, in the evening at 7.30, when the pastor, Rev. G. S. Helps, will preach. A hearty invitation is given to all.

S. W. Smith of East Florenceville is offering at a rare bargain a second-hand five passenger McLaughlin-Buick touring car in good condition. All worn parts replaced new this season. All new tires.

Soon the Bank of Montreal will occupy the whole of the lower flat of the building it now occupies. The office occupied by the Farmer's Telephone Co. will be added to the banking rooms. The clerks' office will be extended and new grills and fittings will result in great improvement. L. E. McFarland is doing the work.

In the report of the golden wedding of Mr. and Mrs. S. Hayden Shaw the name of Mrs. Annetta Tracy was accidentally omitted. She came from San Diego, Calif., almost especially in view of the anniversary celebration, and, a sister of the bride, she was one of those present at the original wedding.

For sale: One 4x5 pocket Seneca camera for plates and films, with rectilinear lens, automatic shutter and long extension. Has 4 plate-holders and supplementary lens. Cost \$24; make offer. Also 1 post card Kodak with anastigmatic lens, carrying case, portrait lens, color and sky filter. Cost \$31; will take \$25 cash. Both cameras are like new. Apply to J. H. Barnett, Hartland.

Hartland has been pretty fresh of late but Carr will have lots of Salt this week. Coarse, fine and rock.

Word was yesterday received from the front that Curtis Simms of Hartland is in the hospital wounded in the foot by shrapnel and suffering from gas poisoning.

On Saturday Fred and Arthur Thornton, Mr. Morrell of Fredericton, J. H. Barnett and Lieut. Harvey Reid went to Miramichi on a fishing trip. The party was got up especially for the pleasure of Lieut. Reid who will not have the opportunity for fishing New Brunswick pools very soon, since he is called to go forth to battle again on Aug. 24.

An unlooked demand upon our advertising space this week makes necessary the omission of much matter of interest which came to the office after articles of less importance were set up ready for the forms. Contributors should remember the importance of being early with their offerings. Typesetting commences for the next issue immediately one issue is off the press.

A patriotic social is scheduled for West Florenceville on Saturday evening of this week and a large public patronage is confidently solicited. It will be held on the grounds of Mrs. Geo. Gray (the McGaffigan grounds) and is under the auspices of the Woman's Institute. A good musical program is being prepared and refreshments of all kinds will be on sale. Captain (Dr.) Arthur M. Fisher of Woodstock, recently returned from the front, will be present to address the gathering on the war situation.

Specific For Bronchitis

The turpentine used in Dr. Chase's Syrup of Linseed and Turpentine is not the ordinary commercial article, which is little used because of the unpleasantness of taste, but is specially extracted from tamarac and spruce gum and so combined with other valuable ingredients as to be at the same time pleasant to use and wonderfully effective in the cure of affections of the throat, bronchial tubes and lungs.

An Editor Talks

Our aim in these talks is to reach all kinds of persons so far as the course of our reading and trend of our thoughts prompt to the discussion of various subjects. As any writer who undertakes to produce several columns of printers' copy weekly knows, the chief difficulties that confront him are of finding a sufficient variety of subjects to write up to sustain the readers' interest in what he writes. Our desire and aim in these talks are to make them instructive, interesting and seasonable. In order to accomplish these objects we find it absolutely necessary to replenish our knowledge box with the best thoughts of other writers, for in writing as in other courses in nature, the axiom holds true that from nothing you get nothing. In other words there must be a constant inflow if there is to be a continual outflow.

This week the factory man and industrial worker will receive our consideration at considerable length. The subject to be discussed is some arguments in favor of the eight-hour working day in factories and other machine shops where men are engaged on one kind of work day after day. We have received more convincing information on this much discussed and truly important economic question from reading a thesis entitled "Some Facts Concerning the Eight-hour Day," from the pen of Mr. P. W. Litchfield, factory manager of the Goodyear Tire and Rubber Company, Akron, Ohio, than in all the other material we have before us. We propose to give our readers in a condensed summary some of Mr. Litchfield's arguments. In his introductory remarks he says: As the Goodyear company started several years ago to introduce the eight-hour day into the factory, and has been steadily increasing the number of departments brought under this system, a statement of our attitude toward and belief in the eight-hour day is in order.

For sake of comparison consider the labor conditions of 100 years ago when agricultural pursuits engaged chief attention. Factories were few and the villages were made up largely of mechanics who worked for the farmers' needs. Society was not classed as now. There were no very rich and no very poor, therefore practically no class distinction between the two. Under these conditions men worked "farmers' hours," usually from daylight until dark, fifteen or sixteen hours a day in the summer and usually very much less in the winter. No one thought of regulating the hours of labor, as each man regulated his own, and a man who didn't do all that he could, and work as many hours as he could, did not have the respect of his neighbors, produced less, and usually lost out in reward and position. Under these conditions, while a fifteen or sixteen-hour day was usual and expected, the conditions of labor were quite different from what they are today. The life was in the open; there was variety to the work, changing from hour to hour, from season to season, giving the man health, increasing his knowledge, and making him more efficient as a man, and as a good citizen. These were the days of man power.

Introduction of steam and electric motor power has wrought a "revolution" in manufacturing and in farming operations. Big factories were built to convert the raw materials into finished products and the man-power small shops disappeared. Bigger farms and better farming produced greater bulk and cheap transportation of the raw material to large cen-

ters, where location and volume made the cost of power by steam or electricity low, and the organization of larger groups of men, made the labor cost of production low, and again the cheap and efficient transportation of the finished product back to the consumer made a new industrial system, justified by the test of more economic production. The result on the nature of the work and the time devoted to it was to decrease the variety, narrow the experience of the man, and shorten his working hours to ten or twelve hours per day. He still performed many operations during the day, and made a good percentage of the article on which he worked. This was the day of the craftsman, the all-around carpenter, mechanic, etc.

This introduced another important period: the gathering together of large numbers of workmen necessitated a closer regulation of hours, a subdivision of labor and increasing the importance of organization in industry. The result was naturally increased efficiency of production, the expanding of the country in wealth, power, modern conveniences and standards of living. It gave the inhabitants shorter working hours, so that the thrifty man had more time of his own to improve his education and physical training, but decreased the chances of his acquiring mental and physical efficiency during his working hours. The result was that the man who did not improve his spare time, relatively went backward, while the man who did, advanced in proportion, and thus increased his earning power. Those who in addition to this were thrifty and saving, became capitalists.

The conditions outlined brings the progress of industrial affairs pretty well up to the existing industrial period and its conditions. Those of us who can trace the course of industrial expansion and change to the largeness of production and the subdivisions of labor as now found can appreciate more place than can the present generation. The percentage of our total population as wage-earners in large corporations is far greater than ever before in our history, and with what result? There is no question as to the increased efficiency of production, the greater total wealth of the country, the improved standards of living, and our ability to manufacture and export our products, even in spite of lower wages in other lands. What, however, is the effect on our wage-earners? Recalling his progress through the first two periods, his present position is a continuation of the same tendency and development.

Power is developed to-day by machine rather than by man. Also man's productive efficiency is increased by his ability to oversee and direct the machine and more especially to direct other men to do this. The reader must see that this increased efficiency has brought about a sub-division of labor to such an extent that the average man has now a simple task performed repeatedly over and over, day after day. He learns very quickly and by constant practice makes him extremely skillful, enabling him by the piece-work system to earn a relatively high wage with comparatively little experience. What, however, is the effect of all this on the mental and physical condition of the workman, the steadiness of his employment, his ability to save, his ability to maintain his earning power in case there is an over supply of the product of the particular operation in which he is skilled? There can be no doubt that the present sub-division of labor offers less opportunity for the working man to broaden mentally, or all around physically, during his productive hours, than ever before. It also narrows the scope of his knowledge to such an extent that he is more and more dependent upon one little thing for his prosperity, and cannot adjust himself to shifting conditions of industry without financial loss. What, then, is the justification of this?

The answer is almost self-evident, and yet we quote the writer verbatim here for clearness, as this answer contains the kernel of the 8-hour system. With proper direction and organization, the wage earner of to-day can produce much more in a less number of hours than he could under the "craftsman" system of thirty years ago, or the "jack-of-all-trades" system of one hundred years ago. It is also quite generally conceded that in a very large percentage of factory operations a skillful workman can produce the maximum amount of product in eight hours, while extending his work over a longer period only results in a lesser amount of product per hour, and necessitating the use of increased plant floor space and equipment. The amount of product being constant, the shorter the time, and the less investment in buildings and equipment required, the more economical will be the production. Therefore, the shortest number of hours necessary to produce a given product by the average workman, is economically the most efficient number for the company. Also, the specializing of labor on simple operations many times repeated, narrows the opportunity of the workman to broaden

Vaseline Camphor Ice

mentally, morally and physically, it is only reasonable and just to shorten the productive hours on specialized labor, to allow extra time for self-improvement. No man can stand monotonous work for as many hours a day as he can stand variety. It is for these reasons that we are extending and believe in, the eight productive hour day for many of our operations.

We have long been an advocate of what is known as the School Savings Banks, and believe there should be such a bank in every town and several in large cities. To make this banking system for children's savings effective there must be loyal co-operation and continued interest shown by the teachers and parents. It has truly been said that "Thrifty needs to be encouraged as steadily as any other desirable habit." Dr. James L. Hughes, Toronto, has sent us a circular letter from which we take this bit of good advice and suggestion. The Banks of England have recently sent a circular to the British people urging the necessity for saving the money now spent for things that do not promote either health or happiness. Sir Frederick Williams-Taylor, manager of the Bank of Montreal, urges Canadians to be equally thrifty. A committee in Birmingham, England, sent out the following saved helps: "Every penny saved helps you and your country. Every penny spent unnecessarily helps the enemy. Save your money now; later it may save you. Some can serve their country by fighting. Some can serve their country by working. All can serve their country by saving." Canada may become a country of great influence in two ways; by greater production and by greater thrift. The surest way to train a race or a people to be thrifty is to train them while at school. We should be thrifty always, not merely during the war.

We came across a splendid inspirational article recently that presents in epigrams some wholesome truths and we shall try to reproduce the pith of the article which we think is excellent doctrine for all people regardless of age or circumstances to imbibed freely, but particularly young people who have most of life before them and so can put into practice the teaching of this address from Ford Times entitled "You Get What You Really Want." If you want it bad enough—you'll get it. The power of persistence overcomes all obstacles and lands you where you set out to go. The chief reason why you are not a Caruso, a Lord Kitchener or a Kipling, is because you don't will to do it, or you wouldn't try to carry out don't, or you wouldn't do it, but really you don't, or you wouldn't try to carry out so much excess baggage up the steep path success.

Perhaps you pruned your young shade tree this spring. You trimmed off the superfluous twigs so the little tree could shoot on up toward the sun. How lately have you snipped off your useless branches? Did you quit that card club because it was interfering with your getting down to the office on time the morning after? Did you cut out that trashy story stuff to have time to read books of man-and-information building value? Did you lop off the hundred and one other little useless sprouts that were diverting your energy and leading you away from the main chance? Did you? If you didn't, it was because you don't want the big thing you are after bad enough to deserve to get it. And you won't get it unless you prune yourself.

Cats-Up.

"Sarah," said her mistress during the dinner hour, "will you go down to the basement and get the catsup?" Sarah departed, and a few minutes later the family heard a great shoeing and scampering of feet. Shortly after Sarah came breathlessly into the dining room and said to her astonished mistress "They're up, mum."

"What are up?"

"The cats, mum."

Safety First and Last.

Mrs. Catterson—I am actually afraid to get my bank book balanced for fear I have made a mistake. Mrs. Hatters—Why don't you do as I do? I keep on drawing the money out until they won't let me have any more.

PRACTICAL FARMING

The Farm Home Grounds.

During 1915, an agricultural survey was conducted by the Commission of Conservation on 400 farms in Ontario. In answer to the question "Are the grounds around the house neat?" it was found that 53 per cent. of the replies were in the negative. In travelling over Canada one cannot but be impressed by the general untidiness and the absence of plan or system in the planting and care of the farm home grounds.

Clean-up and Arbor Day campaigns, conducted each spring in many of our towns and cities, should be extended to rural communities. The first question the farmer asks is: "What will it cost?" feeling that he cannot afford it. It will cost a little time in planning and work in planting, but the results will be well repaid by the added attraction and consequently increased value of the farm. In many parts of Canada trees and shrubs for planting can often be secured from the wild. Nothing is better for home planting than the common weeds from the surrounding woodland; no shrubs purchased from an agent are superior to those native to the district, and no purchased vines can surpass some of those growing wild, such as the Virginia creeper, bitter sweet or the wild grape. Many of the choicest wild flowers, when transplanted to the flower border, often flourish more than in the wild. Yet in spite of the ease with which these attractions may be obtained, many farm home grounds are unplanted, untidy and unattractive. All that is needed to make them really beautiful is a little planting and care.

The morning glories, used to beautify the cabin, were planted by the housewife. In fact, it is usually the woman who takes an interest; the man is too busy with the crops to bother with such things.—F.C.N. in Conservation.

Try Alfalfa Again.

Although it is now generally admitted that alfalfa is the one best feeding crop for live stock, and despite the fact that it has been proved suitable to nearly every district in Ontario, many farmers refuse to give the plant a trial on their farm, while others give up trying to grow it after making a very feeble effort for success.

Those who wish to excuse themselves for neglecting to even try alfalfa say that it interferes with their rotation, is hard to break up if once established, and is not suited for pasturing; while those who give up trying to grow the crop say that their land is unsuited for it. The first reason given for not sowing alfalfa is perhaps the best, but is not a very good reason at that. Alfalfa is known to improve with the length of time that it occupies a field, but even if the third or fourth year are sacrificed to maintaining a rotation the whole benefit of the crop is not lost; and what cuttings are made in the first few years of its life are equal, if not superior, in value to cuttings of any other crop in the same period.

As for the trouble of breaking up a field of alfalfa, this only occurs in very old fields, and the fault found by the plowman—that the roots run his plow out—is often due to the occurrence of an odd plant of alfalfa that comes as a surprise after the plow has been running through light or poor sod for some time.

The third reason for objection to alfalfa cannot be very well maintained by many who make it, and is especially so valuable as hay, and is capable of producing so many cuttings in a season that other ground than the alfalfa field may well be given over to pasture and the alfalfa crop used for soiling if the Summer feed is insufficient.

The Contented Cow.

There is a firm, whose business it is to supply milk to city consumers, who make a specialty of advertising that their milk is drawn from contented cows. There is a lot in this for the farmer to consider. Milk production bears close relationship to nervous condition. An excited cow will not readily "let down" her milk, an eventuality body knows. Excitement is an irritation that she may require her energies for self-preservation, and the milk making process is journeyed its activities to allow her to meet the apprehended emergency.

Annoyance in any form produces some degree of worry, irritability, and consequently excitement. Keep the cows contented, and functional activity in milk secretion will be the more generous.

Hence it is that dogs, unusual odors, sudden chills or draught of air, irregular feeding or watering noise, roughness in handling, all help to decrease the milk yield. Keep the animal quiet and contented, in well ventilated but quiet quarters, feed regularly, and act in a kindly and gentle manner when about the cattle.

The War on Smut.

The prevalence of smut in the Ontario grain crop last season induced many farmers to treat their seed before sowing this spring. One drug-

gist in a small town told a representative of this paper before seeding started that he had sold 200 pounds of formalin and expected to sell 75 pounds more before the season was over. This is significant, especially where his sales of this material amounted to very little in 1915. There are farmers in the Province who have treated their seed for the past ten or fifteen years annually, and without fail, and the results have well repaid them for their trouble. We have also known of farmers who have never treated for smut, and their grain has become so badly infested and their threshings so dirty that the neighbors refuse to assist them at threshing time. Fruit growers are obliged to spray in order to produce a marketable commodity, and the time may come when farmers generally will be obliged to treat their seed grain in order to prevent severe loss. Anyway, it is a precaution that costs little except labor and trouble, and, like it, what the season will do when you get there, David?" (David being the name by which he is called at home).

Harrow or Roller?

There is often a considerable difference of opinion as to whether a field of grain should be harrowed or rolled in the spring, and if it is to be both harrowed and rolled, whether the rolling or the harrowing should be performed first. The proper method of procedure is really determined by the state of the soil. If the soil is lying very light and open on the surface, then the rolling is the best; for it will consolidate the soil round the plants; but in nearly every case the rolling should be followed by a light harrowing with a chain harrow or a set of very light seed harrows, so that the top half inch or so shall be again broken up. When the soil is inclined to be solid, then rolling is generally a mistake, and should not be undertaken unless it is necessary to smooth the surface somewhat or press in the stones in anticipation of harvest. Rolling is very seldom really required unless the land is quite light on the surface.

Little Potato Disease.

The Little Potato disease causes little potatoes as big as a pea or a little larger to form on the potato stems, and not on the roots. The disease is caused by the pores in the stem so the starch made in the leaves cannot go back to the roots to form potatoes. Potatoes affected with this disease have small spots on the surface made up of germs, masses, that look like a little soil stuck on the surface. The difference comes out when one tries to remove the spots. They do not come off the whole soil will. This disease is also called Russet Scab and Rhizoctonia. It is best not to use affected potatoes for seed. If they must be used first treat for two hours in a solution of 4 ounces corrosive sublimate to 30 gallons of water. (Corrosive sublimate is now four dollars a pound.)—D. G. M., North Dakota Experiment Station.

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances

A Free Prescription You Can Have Filled and Use at Home.

Philadelphia, Pa. Do you wear glasses? Are you a victim of eye strain or other eye trouble? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel as if they were in a mitre to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to do so.

to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any drug store and get a bottle of Bon-Opto Tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clearing perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, stop to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time.

Notes: Another prominent Physician to whom the above article was submitted, said: "Bon-Opto is a very remarkable remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. The manufacturer guarantees to strengthen eyesight 50 per cent in one week's time in many instances or refund the money. It can be obtained from any good druggist and is one of the very few preparations I feel should be kept on hand for regular use in any family."

It is sold in Toronto by Valmas Drug Co.

MONTREAL, QUEBEC
BRANTFORD, 218 FORT WILLIAM.

THE PRINCE OF WALES.

Is Unaggressive, But Will Not Stand for Nonsense.

When the Prince of Wales got short leave to go to Buckingham Palace to say "good-bye" to his parents and brothers and sister before going to the front, Prince John asked him: "What are you going to do when you get there, David?" (David being the name by which he is called at home).

"I think I'll grow a beard for one thing," he answered. "Figuratively speaking, the Prince of Wales has 'grown a beard' since the war began—that is to say, he has ceased to be a boy and has become a man. The change is very apparent to all who come in contact with him. Always inclined to seriousness, he has taken his share in the war very seriously indeed. His staff work has included carrying despatches, acting as interpreter, superintendent of the making of trenches, and duty as assistant transport officer, and he has been in imminent danger of death scores of times.

There is nothing aggressive about the personality of "P. W.," but he has a quiet way of standing no nonsense.

One day at the front he was on duty watching transport wagons being filled. Packages were being thrown up to the man in the wagon, whose duty it was to count 25 packages were reached. The man in the wagon, "died it on" with the Prince; "several packages trouble he started calling out '25' when he should have been saying '20.' But it did not work. 'Twenty-five already?' said the Prince blandly. 'I make it 20. One of us is wrong. Just unload the whole wagon and begin from the beginning again.'

The world can get along without you but that's no reason for not trying to be one that the world doesn't want to get along without.

When a mother begins to tell her children how smart their father is, they look at her as reproachfully as if they thought she was losing her mind.

A combination of both liquid and paste. They produce a brilliant, lasting shine with very little effort. These polishes contain no acid and will not crack the leather. They preserve the leather and increase the life of your shoes.

NUMBER FORTY-TWO

—By—
Mary
Garland
Knight

(Copyright by W. G. Chapman)

When the uncle of Willis Templeton died, leaving ten thousand dollars "to his beloved nephew," the latter felt like the richest man in the world. He did not start out on a madcap, haphazard quest. He had missed real home life since his parents died two months previously. Young Templeton quickly set out to find a wife. He was not after style, money or position. Some sweet little woman who could appreciate a comfortable home was his ideal.

"There seems to be none such in Elsdene," he decided, after every fortune-hunting girl in the country had set her cap for him.

"Business is what you want to think of, old boy," declared his lawyer, a young man who was really loyal to his interests.

Willis considered many business propositions. Then came a wonderful chance to increase his few thousands to a million, according to Vance Traf-

ton. This latter was a cousin. He had been a scapegrace in his youth. Later Willis had heard he had figured as promoter and speculator. He had appeared at Elsdene about a month after Willis had been pestered to death with mean, indigent and really deserving relatives. He had more or less got rid of most of them according to their deserts. When Traf-ton appeared, it was an enjoyable relief to Willis to find someone who was not scheming to beg or borrow of him.

"I'm north closing a big deal," reported the fashionably dressed relative who bore all the earmarks of permanent prosperity. "Went to Florida ten years ago, bought one thousand acres of swamp land at two dollars an acre. We've sold it all out at twenty and I'm trying to buy a tract from a man in the city. You'd ought

"I'm North closing a big deal."

to see how we've made the wilderness blossom as the rose. Think of it—ninety thousand pineapples this year's crop, some of them weighing as much as nine pounds. Juicy, mel-

low—I want you to come back with me and see a real climate. Willis, by degrees the wily, sly, sardonic Traf-ton worked on Willis until the latter was actually anxious to buy an interest in the wonderful proposition. It was finally agreed that he should invest eight thousand dollars for a one-fourth share in the new land about to be opened up.

"I'll go to the city and arrange to get the deeds for the land," announced Traf-ton. "In the meantime I'll have a choice half dozen of our pineapples shipped to you, just to show you what magnificent fruit we raise."

In a day or two along came a crate directed to Willis. As he opened it, wrapped in tissue paper were half a dozen pineapples. Certainly they were superior and standard. More than ever in love with the proposition, the elated Willis was about to hasten to distribute the luscious fruit among his friends and possibly influence other investors to go into the enterprise, when he noticed a neat-looking card in the bottom of the crate.

Beside it lay an unstamped letter. It was simply directed to "Miss Landon." The card read "Acme Fruit Co.," and gave an address in the city. At one end was the written notation: "Packed by No. 42."

In a moment somehow the suspicions of Willis were aroused. The thing didn't look straight. Had Traf-ton simply gone somewhere and bought any old fruit to palm it off on an investor victim?

"It doesn't square up right," decided Willis, and straightway started for the city.

He found out where the fruit company named had its warehouse. It was a busy place devoted to the specialty of packing fine tropical fruits. Willis saw the manager. He was soon convinced that the crate of pineapples had been shipped to him on a casual order two days before.

"They came from Florida?" inquired Willis.

"Oh, no. We get all our pines from Central America," was the amazing declaration.

And who was No. 42? Ah, yes—one of their fruit packers, Miss Landon by name. Could she be seen?—for Willis had opened the letter to find that it contained an offer of marriage from one "Richard Martin."

Miss Landon was not at work. Address—yes, such and such a number on a certain street. Thither Willis

proceeded. There was a streak of romance in him. An important letter with great news for Miss Landon had in some mysterious way got into the fruit crate and miscarried. This Miss Landon had saved him eight thousand dollars. He felt grateful towards her, interested in her.

Willis located Miss Landon's home in an upper flat of a neat little house. A good-natured old lady was in charge. She invited Willis in, saying that Miss Landon would soon be home. She had gone with her two little brothers to visit a sister who worked in a photograph gallery.

"I have been tidying up for her," explained the old lady. "Not that her flat needs much of that, for she's the cleverest, neatest little dear ever was. She's a jewel, she is. Supports the two little ones and housekeeps. Such bread as she makes! Such dainty wholesome meals! She teaches them nights. You'd ought to hear them sing! She's saving up to buy a piano, bless her."

Certainly the refined homelike air of the delightful little flat was soothing. Willis lingered. Miss Landon arrived.

Bluntly he told her the whole story. He handed her the letter. He was sorry, as her bright gentle face grew upon him, that she had ever was.

"Oh, dear!" she cried, as she received the missive. "I've wondered where I ever lost it. It must have fallen from my pocket into the crate. I am glad to get it. A friend of my sister, a gentleman friend, asked me to give it to her. Now I can straighten up a tangle."

Then she, Lucia Landon, as Willis soon found out her name to be, was heart free! Somehow the discovery pleased him.

Miss Landon, he said, "you can see what finding your card in that crate means to me," and he told of how he had nearly been swindled out of his little fortune. "I owe you considerable. I feel it my duty to send you a piano for your little muscians here. For your intervention at a critical juncture in my business affairs."

Lucia demurred, but Willis was determined. He sent the piano the next day. Then he went back home to have it out with his false-hearted relative. Then he found himself strangely restless.

Those little singers! How were they getting along? The city and that little flat in it proved an irresistible magnet.

He found the Landons happier than ever, the flat more charming. Its dainty mistress welcomed him like the lady she was.

"She is the girl I have been looking for," he told the old lady friend of Lucia one day.

"Why don't you tell her that?" intimated the good old soul archly. "I will," resolved Willis. He did, and the result was that he gained the dearest little wife in the world.

FOOL-PROOF POISON

Absent-mindedness Could Not Excuse Mistake in This Case

The latest thing on the drug market is "foolproof" bichloride of mercury. During the last year or so there have been so many cases of accidental poisoning from this dangerous but highly effective antiseptic that manufacturers raked their brains to produce a tablet that could not be mistaken for anything else—even in the dark.

"Foolproof" bichloride of mercury was the answer. The tablets are strung permanently on a thread, like beads, and in addition they are dispensed in a bottle having a distinctive shape—unlike the ordinary bottle. Furthermore, the tablets themselves have a peculiar shape, are bright blue in color, and each one is labeled "poison."

The manufacturers say, and it seems with reason, that a person would have to lose all his mental faculties in order not to be able to detect these pellets from headache or other tablets. He might not notice the shape of the bottle or the peculiar shape of the tablet, its color and marking of "poison." But he would not be expected to ignore the string, which must be cut before the tablet is detached.

The First Typewriter

The typewriter is not such a modern invention as is popularly supposed. Two hundred years ago Henry Mill patented in London a writing machine but it was so clumsy as to be practically useless.

Nothing more in the same line seems to have been done until 1829, says The London Chronicle, when the first American typewriter was patented; it was christened "the typographer." Four years later France tried its hand in this direction, while between 1840 and 1860 Sir Charles Wheatstone invented several writing machines.

It was not, however, until 1873 that the typewriter became a commercial proposition. This was invented by an American, C. L. Scholes, who interested E. Remington & Son, a firm of "gun manufacturers," in it, and in 1874 it was put upon the market.

Vertical Mower For Tangi Grass

A machine which mows both vertically and horizontally has been invented by an Oregon man. It has been used with good success in heavy clover and vetch which were badly lodged and tangled, and which usually require one or more men to clear the divider on the outer end of the swath. The vertical cutting bar is a little more than two feet high. Connections between it and the horizontal cutter bar actuate the cutting blades. These connections consist of rods and cranks operated by the movable cutter bar of the horizontal mower.

Keeps Feet Off Radiator

A bracket to be fastened to a steam or hot water radiator to enable a person to warm his feet has been patented by its inventor.

A ROYAL SOLDIER

Among the most popular of the
Royal soldiers of Great Britain is His
Serene Highness Prince Alexander
Augustus Frederick William Alfred
George of Teck, who was born in
Kensington Palace, the third son of
the late Duke of Teck and the late
Princess Mary Adelaide. Prince
Alexander is the brother of Queen
Mary, who has always been devoted
to him. He has spent more than
twenty years in the army, and saw
his first active service in the Mata-
beleland campaign in 1896. Three
years later he went to South Africa
to engage in the Boer war. He was
present at the relief of Kimberley and
took part in Lord Roberts' advance
on Pretoria. In both campaigns he
won mention in the dispatches, and
earned the Distinguished Service Or-
der and promotion to the rank of cap-
tain in the Seventh Hussars. Four
years after the war he was transfer-
red to the Royal Horse Guards and
promoted to the rank of major. In his
South African experience he had the
ill fortune to arouse the animosity of
some war office officials because of his
rather free criticism of the food sup-
plied to the soldiers. On one occasion
it was said, the Prince and the men
under him were without food for two
days, and were then supplied with
meat which made him violently ill.
His greatest popularity is among the
rank and file of soldiers and the hos-
pital patients, and the boy scouts have
exalted him to the position of a hero.

LIMBLESS SOLDIERS

Clever Feats Done With New Sci-
entific Devices

British soldiers who have lost an
arm in the war are doing some amaz-
ing feats. Indeed, with the artificial
limbs now offered, it is possible for a
persevering man to almost equal
nature. Queen Mary Auxiliary Hos-
pital at Roehampton is exclusively for
disabled soldiers and sailors. The
King and Queen visited this institution
founded by Mrs. Wynne Holford, and
were deeply impressed. At one of
the branches the King saw a Tommy
working and found that though he had
lost an arm and leg at Armentieres,
he is now able to do useful work.
With a special clip taking the place
of a dummy right hand he used a
variety of tools under the King's in-
spection, and afterward took a medal
from a box and lighted it with dex-
terity and ease.

"Can you shake hands?" asked the
Queen of an armless private of the
First West Ontario Regiment. "Try
me, your majesty," promptly replied
the Canadian. The Queen shook
hands with him, laughing merrily at
the convincing grip of the artificial
hand.

Professor Laverau showed the
French Academy of Science a re-
markable substitute for a missing arm
invented by Professor Aupar. The
arm hand and fingers are of aluminum
and very light. With a glove on it
is almost impossible to perceive the
limb is artificial. Certain movements
of the thorax, acting on fine steel
wires give to the hand and arm almost
all the movements of the natural limb.
Mutilated soldiers equipped with this
device played the violin, made cigar-
ettes and gave out change for a bank-
note before the Academy.

A pupil of the London School of Art
went out to the front early in the
war and lost the use of his right hand.
He has now taught himself to draw
with his left hand and his work is
considered as good as he ever did
with his right.

FOR RETURNED SOLDIERS

Nova Scotia Government Proposed
Many Practical Measures

The Murray Government of Nova
Scotia announced that free vocational
training will be given disabled sol-
diers at the Nova Scotia Technical
College, and expert training in farm-
ing to physically fit soldiers at the
Nova Scotia Agricultural College.
When the soldier is ready to purchase
a farm eighty per cent. of the value
of the farm may be loaned him, if
necessary, for the purchase of prop-
erty, stock, and implements. The
soldier will have the expert guidance
of a skilled farm inspector in pur-
chasing, surveying, and cultivating
his farm. Farmers' co-operative so-
cieties will be developed. These or-
ganizations will enable all farmers to
purchase their seeds, fertilizer, im-
plements, and feeds at the lowest whole-
sale prices; also to transport and sell
their products co-operatively without
recourse to middlemen.

Rugby Player-officers

Jack Maynard, twice captain of
Toronto University rugby teams; Jack
Lash and Alex. Snively, who also
figured on champion rugby teams at
Varsity, were officers in the 2nd
Battalion (C.B. Battalion) and were
killed in action. The medal medals in
specimen of their battalion only two
were declared unfit for overseas.

SNEEZING OMENS.

At One Time to Sneezes Was Respected
as a Death Warrant.

Sneezing from very remote times has
been regarded with superstition.
Our forefathers went to bed at night
if they sneezed while putting on their
shoes. A sneeze to the right was
deemed lucky; to the left, of evil por-
tent. To sneeze near a burial place
was very unlucky.

Tradition has it that sneezing was at
first a fatal sign—every human being
sneezed but once and then died—but
Jacob petitioned the Creator to re-
move the sneezing ban and succeeded.
Thence arose the once universal cus-
tom of saluting a sneezer with "God
bless you" or "May you live long!"
The custom still obtains in some parts
of Europe.

In England not only was a sneezer
blessed, but friends raised their hats
to him as well. In an old book "The
Code of Conduct," it is directed that
"if his lordship sneezes ye are not to
bow out, 'God bless you' but bow to
him handsomely." All over the world
the sneeze was recognized. Whole na-
tions were under orders to make ex-
clamations when their king sneezed.

Sneezing was believed to be a sure
cure for hicough and was also looked
upon as a sign of sanity. If ancient
and universal belief goes for anything
it is good to sneeze.—London Tele-
graph.

WHEN WORK BECOMES PLAY.

The Secret of Contentment Is Found
In Proper Employment.

A philosopher once said that "no
man properly employed was ever mis-
erable." And a more truthful state-
ment was never made.

To be properly employed one must
be engaged in a business in which he
has faith and confidence and for which
he has respect. If he doubts the legiti-
macy of the business, if he must re-
sort to practices which he feels are
questionable, if he isn't proud of his
occupation, he is not properly employ-
ed. If the work he is given to per-
form puts upon him, if he feels that
he ought to be doing something else, if
he envies the other employee his place
in the shop or factory, then the work
deadens and destroys, and misery fol-
lows.

The writers got things balled up
when they talked about work and
play. Too great a distinction was
drawn. Play was pictured as some-
thing that gave happiness and work as
something which one performed only
because he was hungry.

The truth is, it is all play or ought
to be, for the man who is properly em-
ployed is only engaged in playing. He
gets as much delight from it as he for-
merly got from the childish games or
sports. Certainly there can be no mis-
ery where a man has found his work.

Knew Just How.

Many years ago in Paris, at the first
presentation of a tragedy that had for
its closing scene the murder of a Swed-
ish king which had taken place nearly
half a century earlier, all went well
till the murder scene came on, when a
very dignified old gentleman in the
stage box called out angrily:

"Absurd! They've got it all wrong!"
The manager himself heard this plain
spoken comment, and, being naturally
disturbed by so sweeping a condemna-
tion, he sought out the critic and po-
tently begged to know what fault he
had to find with it.

"Why, my good sir," cried the old
man, with an air of authority, "the
whole grouping of the scene is incor-
rect! You have made them kill the
king to the right of the door, whereas
we murdered him on the left!"

Barbarous Tattooing.

Formerly the Marquesans had such a
barbarous manner of doing their tattoo
work that it often took nearly six
months to heal that which had been
done in a single day. They covered the
whole body of the natives with crudely
imitated rough designs, circles, curves
and many designs of small work, in-
cluding round and angular spots, even
to the finger nails and the top of the
head. Thus, beginning at infancy,
some were upward of thirty years old
before their tattooing was completed.
Marquesan tattooing was perhaps more
remarkable in appearance than that of
any other primitive races.

Durable.

The admiration which Bob felt for
his Aunt Margaret in her all her at-
tributes.

"I don't care much for plain teeth
like mine, Aunt Margaret," said Bob
one day after a long silence, during
which he had watched her in laughing
conversations with his mother. "I wish
I had some copper teeth, ones like
yours."—Youth's Companion.

Close.

"What sort of chap is this man Skin-
ner?"
"He's the sort of chap who wouldn't
think of offering you a match to light
your cigar unless he were sure you
had another cigar in your pocket."

Mercenary.

He—You used to say there was
something about me that liked She—
Yes, but you've spent it all now.

Limited.

"Why did you slap your lady's face?"
"Cause th' rest of my face was com-
plaining."

Duty is due to the service of its re-
sult.—Ninomiyu Sontoku.

IMPERIAL

as applied to flavoring extracts is our
registered trade mark, and no other
maker of extracts can lawfully apply
this word to their preparations.
Notwithstanding, there is being of-
fered in this district a line of essences
bearing the word "Imperial" and
infringing our legal rights. While
this is highly complimentary to the
genuine IMPERIAL Flavoring Ex-
tracts it is otherwise an injury to our
trade. Therefore, we warn mer-
chants against offering for sale any
other Imperial flavoring extracts ex-
cept those made by

Local News and Personal Items

Big stock, of pint jars at Baird's.

I. A. J. Ward is building a new house on the flat near Mrs. G. E. Boyer's new dwelling.

Paris Green 33 cents a pound at Baird's.

Archie Stevens of the Royal Bank staff at Woodstock is home for two weeks vacation.

10% off corsets until Aug. 19 Baird's.

H. J. Aiton, the popular telegraph operator, commences his annual vacation tomorrow.

Ladies' Rain Coats worth \$7, only \$4.75—at Baird's.

H. W. Annett went to St. John on Saturday evening to attend a meeting of railway telegraphers.

Ladies' tan Oxford shoes and pumps at half price at Baird's.

C. R. Violette has for sale cheap a nickel-mounted, curved glass show case.

Come to Hartland on picnic day prepared to buy necessities. All the merchants are giving special values for that day only.

Mrs. Austin Adams and daughter Helen of Centerville have returned home, after spending five weeks at the home of J. W. Adams.

Miss Hattie P. Ebbett and brother Ernest of Middle Simonds left Thursday for Fort Fairfield and Limestone where they will spend a few days visiting their sister.

Mrs. M. E. Thornton and daughters Glenda, Helene and Mildred, of Calgary, are guests of her daughter, Mrs. G. S. Larlee, Bath, and other relatives in the county.

S. S. Miller and family left yesterday for a few weeks sojourn at "The Ledge," near St. Stephen. They made the trip by auto, going to Houlton and down the Calais road.

Mr. and Mrs. S. J. Wallace of Upper Woodstock have been visiting old neighbors at Cloverdale, where they used to live, and their daughter, Mrs. H. N. Dickinson at Hartland.

Sweaters at the old price at Baird's.

Simonds Red Cross will meet with Mrs. Oscar Shaw on Aug. 24.

S. S. Miller is offering for sale at a low price a second-hand Ford automobile in excellent running condition.

Mrs. H. M. Stevens who has been in rather poor health at her home in Somerville is recovering and yesterday returned to Hartland for a few days.

Service will be held in the Methodist church on Sunday, August 20, in the evening at 7.30, when the pastor, Rev. G. S. Helps, will preach. A hearty invitation is given to all.

S. W. Smith of East Florenceville is offering at a rare bargain a second-hand five passenger McLaughlin-Buick touring car in good condition. All worn parts replaced new this season. All new tires.

Soon the Bank of Montreal will occupy the whole of the lower flat of the building it now occupies. The office occupied by the Farmer's Telephone Co. will be added to the banking rooms. The clerks' office will be extended and new grills and fittings will result in great improvement. L. E. McFarland is doing the work.

In the report of the golden wedding of Mr. and Mrs. S. Hayden Shaw the name of Mrs. Annetta Tracy was accidentally omitted. She came from San Diego, Calif., almost especially in view of the anniversary celebration, and a sister of the bride, she was one of those present at the original wedding.

For sale: One 4x5 pocket Seneca camera for plates and films, with rectilinear lens, automatic shutter and long extension. Has 4 plate-holders and supplementary lens. Cost \$24; make offer. Also 1 post card Kodak with anastigmatic lens, carrying case, portrait lens, color and sky filter. Cost \$31; will take \$25 cash. Both cameras are like new. Apply to J. H. Barnett, Hartland.

Hartland has been pretty fresh of late but Carr will have lots of Salt this week. Coarse, fine and rock.

Word was yesterday received from the front that Curtis Simms of Hartland is in the hospital wounded in the foot by shrapnel and suffering from gas poisoning.

On Saturday Fred and Arthur Thornton, Mr. Morrell of Fredericton, J. H. Barnett and Lieut. Harvey Reid went to Miramichi on a fishing trip. The party was got up especially for the pleasure of Lieut. Reid who will not have the opportunity for fishing New Brunswick pools very soon, since he is called to go forth to battle again on Aug. 24.

An unlooked demand upon our advertising space this week makes necessary the omission of much matter of interest which came to the office after articles of less importance were set up ready for the forms. Contributors should remember the importance of being early with their offerings. Typesetting commences for the next issue immediately one issue is off the press.

A patriotic social is scheduled for West Florenceville on Saturday evening of this week and a large public patronage is confidently solicited. It will be held on the grounds of Mrs. Geo. Gray (the McGaffigan grounds) and is under the auspices of the Woman's Institute. A good musical program is being prepared and refreshments of all kinds will be on sale. Captain (Dr.) Arthur M. Fisher of Woodstock, recently returned from the front, will be present to address the gathering on the war situation.

Specific For Bronchitis

The turpentine used in Dr. Chase's Syrup of Linseed and Turpentine is not the ordinary commercial article, which is little used because of the unpleasantness of taste, but is specially extracted from tamarac and spruce gum and so combined with other valuable ingredients as to be at the same time pleasant to use and wonderfully effective in the cure of affections of the throat, bronchial tubes and lungs.

"I FEEL LIKE A NEW BEING"

"FRUIT-A-TIVES" Brought The Joy Of Health After Two Years' Suffering

MADAM LAPLANTE
35 St. Rose St., Montreal. April 4th.
"For over two years I was sick and miserable. I suffered from constant headaches, and had palpitation of the heart so badly that I feared I would die. There seemed to be a lump in my stomach and the constipation was dreadful. I suffered from Pain in the Back and Kidney Disease."

I was treated by a physician for a year and a half and he did me no good at all. I tried "Fruit-a-tives" as a last resort. After using three boxes, I was greatly improved and twelve boxes made me well. Now I can work all day and there are no headaches, no palpitation, no heart trouble, no constipation, no pain or kidney trouble and I feel like a new being—and it was "Fruit-a-tives" that gave me back my health."

MADAM ARTHUR LAPLANTE.
50c. a box, 6 for \$2.50, trial size, 25c.

RECRUITING MADE EASY

No Excuse Now for Young Men Who Should Join the Colors

One-eyed men may be accepted for overseas service in the present war, according to the latest orders that have been issued to the recruiting officers in Canada. The above modification to the recruiting orders previously issued is only one of the many that have been made recently by the military authorities.

The latest orders set forth that any man who has lost one eye, or sight thereof but whose vision, without a glass, in remaining eye is normal, providing the normal eye is the "shooting" eye, may be accepted for overseas service. They also state that the loss of one foot or leg by invalided soldiers who can wear or use an artificial limb will not constitute unfitness for home service in special work, nor will the loss of any toe or toes, except the great toe, prevent any man from being accepted for overseas service. These men, however, will be used for clerical positions or other suitable duty. The loss of one or two fingers on either hand, excepting the thumb or forefinger, providing such loss does not interfere with his ability to do such work as required of him, will not debar any man from having his services accepted.

A squint or any morbid condition of the eyes or of either eye liable to the risk of aggravation or recurrence will cause the rejection of any candidate but any man whose vision may be brought up to normal in both eyes by the aid of glasses will be accepted and glasses provided free at the expense of the government.

GRAND FALLS LOCALS

Mr. Durepo of Limestone was in town Sunday.

Mrs. Connors of Caribou was a recent visitor in town.

Mrs. P. Martin visited friends in Van Buren this week.

H. Rideout was in Woodstock the first of the week by auto.

Red Glass Milk Bottles Best

It is not at all improbable, says an exchange, that milk will soon be delivered in red bottles, for it has been discovered that while ordinary light hastens the "spoiling" of milk, the red rays prevent it. The violet rays, on the contrary, cause the milk to turn.

Back Was Lame and Ached; Could Do Very Little Work

Suffered Much From Kidney Disease for Years, but Cure Came With the Use of Dr. Chase's Kidney-Liver Pills.

Doctors had tried to cure this man but failed to get at the cause of trouble, probably because they relied on medicines which act on the kidneys only. The strong feature about Dr. Chase's Kidney-Liver Pills is their combined action on liver, kidneys and bowels. In many of these cases the disease is so complicated that ordinary medicines fail to be of much benefit. Under such conditions Dr. Chase's Kidney-Liver Pills usually touch the spot and effect a cure.

Had they been only moderately successful Dr. Chase would never have selected them for world-wide distribution. As it was, the demand for these pills resulted naturally from their superior merit, and there was nothing else to do but supply them in large quantities.

Mr. Simeon Shieloff, Birchbrook

Orchards, Birchbank, B.C., writes: "For several years I suffered greatly from kidney disease. I was weak and could do very little work. My back was lame and ached and I suffered much from headaches. Tried doctors and obtained no relief. Dr. Chase's Kidney-Liver Pills were recommended by a friend, and after taking four boxes I think I can say that I am cured, for I feel as well as I ever did."

This statement is endorsed by Mr. Harry Anderson, J. P., who writes: "This is to certify that I am personally acquainted with Mr. Simeon Shieloff and believe his statement in regard to Dr. Chase's Kidney-Liver Pills to be true and correct."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Company, Limited, Toronto.

Intemperance a Thing of the Past

Judging by the way in which the sale for our non-intoxicating beverages is increasing intemperance in this part of the country will soon be a thing of the past.

A man who substitutes READY'S PILSENER, WEISS or PORTERINE for the heavily charged alcoholic drinks is not only increasing his physical and mental efficiency, but he becomes a better husband, father and citizen.

These temperance beverages are absolutely harmless and are deliciously refreshing and healthful.

Sold by the case for home use. If your dealer cannot supply you, write us for prices.
