BRUTAL MURDER OF YOUNG GIRL

Strangled to Death and Body Burned in Fireplace.

IN YOUNG MAN'S ROOM

Another Atrocious and Mysterious Crime Reported.
New York, N. Y., March 28.—Albert Wolter, the youth in the fireplace of whose room were found, yesterday, the remains of the burnt body of Ruth Wheeler, the young Kaeotographer who had been missing since last Thursday morning, was committed to the Tombs without bail yesterday charged with the girl's murder.

Strangled to Death.
Katie Miller, Kaeotchen Mueller, the girl with whom he lived, was arrested as she approached the house where the murder was committed. She was reading the details in a German newspaper she was reading and smiling as she read. During a long examination by the police, she held steadily to a consistent story that she knew nothing of the crime until she read of it in the newspaper.

She had not even known that Wolter had received a visitor, she said, until Paul Wheeler, the dead girl's older sister, had called on Friday morning to ask if Ruth had been there. Wolter had denied it, but the Mueller girl says she was uneasy after the interview and that she became jealous and convinced him of her husband's infidelity in the flat. Again he denied it. Friday morning she went to work again and that afternoon Wolter was arrested. The girl was committed to the house of detention as a mental witness.

FINISH FIGHT AT HAND
Asquith to Ask More Peers to Aid the Plan, and if Denied May Retire.

London, March 28.—The great struggle between the Lords and the Commons formally opens tomorrow, when Prime Minister Asquith will ask the Commons to ratify the Government's resolutions abolishing the Lords' financial veto and restricting the veto on general legislation.

Sure To Pass House.
The debate in the House of Commons will probably last three weeks. When passed, as it is certain to be, the resolutions will be submitted to the Lords, who are expected either to reject them or to defer them on the ground that they must first finish consideration of their scheme for self-reform.

United in Finish Fight.
Repeated conferences have been held on the subject during last week, and although no announcement has been made here as to the result the correspondence is in a position to state that such an agreement has been arrived at. The income tax, deducted from dividends, which is now being generally refunded, will be extremely difficult to re-collect, especially in cases where stocks and shares exchanged hands before the taxation is legalized.

LONDONER SECURED LOAN BUT HAD TO GIVE IT UP

Interesting Story of Alleged Misrepresentation in Sarnia.

[Special to The Advertiser.] Sarnia, March 28.—A rather exciting scene took place last Friday evening in the Tunnel Station at Sarnia, in which a young Londoner figured somewhat prominently. It appears that during the day he called on one of the clerks in a bank in Sarnia (also a former Londoner), and requested a loan of a few dollars. The request was declined for good reasons; he then proceeded to the picture show, where he met another old friend (also from London) to whom he confided the information that he had secured a position in one of the banks in Sarnia and asked for the loan of \$5, which was given. The bank clerk learned the loan shortly afterwards, and told the young man that he had secured a position in the bank was false, and they both proceeded to the tunnel to interview the borrower.

COFFEE COLD CURE

London, March 28.—Coffee as a preventive for influenza would not be fallible, is well worth trying, according to a medical authority.

The preventive qualities, declares the expert, "is not, however, in any antiseptic properties of the coffee, but chiefly in the fact that, taken hot and strong, a cup of coffee is a powerful general tonic to the system."

"Coffee, the important active principle, is a strong heart stimulant; the action of which, unlike that of alcohol, is not followed by later depression."

"The man who starts his day with a cup of coffee, hot and strong is physically much more alert than one who does coffee is tea, cocoa or hot milk."

"That drink in itself has any power to ward off the attacks of influenza is highly improbable. The Germans, who drink strong coffee several times a day, suffered much more than we did in the historic influenza epidemic of 1918."
