## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers /  
Couverture de couleur
  - Covers damaged /  
Couverture endommagée
  - Covers restored and/or laminated /  
Couverture restaurée et/ou pelliculée
  - Cover title missing / Le titre de couverture manque
  - Coloured maps / Cartes géographiques en couleur
  - Coloured ink (i.e. other than blue or black) /  
Encre de couleur (i.e. autre que bleue ou noire)
  - Coloured plates and/or illustrations /  
Planches et/ou illustrations en couleur
  - Bound with other material /  
Relié avec d'autres documents
  - Only edition available /  
Seule édition disponible
  - Tight binding may cause shadows or distortion along  
interior margin / La reliure serrée peut causer de  
l'ombre ou de la distorsion le long de la marge  
intérieure.
  - Blank leaves added during restorations may appear  
within the text. Whenever possible, these have been  
omitted from filming / Il se peut que certaines pages  
blanches ajoutées lors d'une restauration  
apparaissent dans le texte, mais, lorsque cela était  
possible, ces pages n'ont pas été filmées.
  - Additional comments /  
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
  - Pages damaged / Pages endommagées
  - Pages restored and/or laminated /  
Pages restaurées et/ou pelliculées
  - Pages discoloured, stained or foxed /  
Pages décolorées, tachetées ou piquées
  - Pages detached / Pages détachées
  - Showthrough / Transparence
  - Quality of print varies /  
Qualité inégale de l'impression
  - Includes supplementary material /  
Comprend du matériel supplémentaire
  - Pages wholly or partially obscured by errata slips,  
tissues, etc., have been refilmed to ensure the best  
possible image / Les pages totalement ou  
partiellement obscurcies par un feuillet d'errata, une  
pelure, etc., ont été filmées à nouveau de façon à  
obtenir la meilleure image possible.
  - Opposing pages with varying colouration or  
discolourations are filmed twice to ensure the best  
possible image / Les pages s'opposant ayant des  
colorations variables ou des décolorations sont  
filmées deux fois afin d'obtenir la meilleure image  
possible.

This item is filmed at the reduction ratio checked below /  
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plié, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtront sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BULLETIN No. 246

CANNED TOMATOES

OTTAWA, December 30, 1912.

Wm. HIMSWORTH, Esq.,  
Acting Deputy Minister,  
Inland Revenue.

SIR,—I have the honour to report to you regarding 140 samples of canned tomatoes purchased throughout the Dominion of Canada in September and October of this year.

With a single exception, in which slight decomposition was found, the contents of the cans were in excellent condition.

The cans in which tomatoes are packed appear, so far as this inspection goes, to vary in capacity, and to fall into three groups, in the matter of size.

1. *Large Size*.—About 1,050 cubic centimetres or approximately 37 ounces. Of this size 111 samples are found in the present collection.

2. *Medium Size*.—About 875 cubic centimetres, or approximately 31 ounces. Of this size 24 samples were found.

3. *Small Size*.—About 650 cubic centimetres, or approximately 23 ounces. Of this size 5 samples were found.

*Large Size.*

16	samples	vary	from	1000	to	1025	cc.	36	oz.
63	"	"		1025	"	1050	"	37	"
27	"	"		1050	"	1075	"	38	"
5	"	"		1075	"	1100	"	39	"

111

34346-12

The total contents of cans of these sizes vary from 29 to 25.9 ounces; 14 samples being below 32 ounces and 19 samples being above 34 ounces. Thus 78 samples or 70% of the whole contain from 33 to 34 ounces.

The total solids of these contents vary from 11.2 to 24.3 ounces; or in greater detail, as below:

11 to 12 ounces in	3 samples.
13 " 14 "	7 "
15 " 16 "	21 "
17 " 18 "	21 "
19 " 20 "	32 "
Above 20 "	27 "

Thus 111 samples of canned tomatoes, packed in what we may call large sized tins, give the following averages:

Average capacity of the can....	37 ounces.
" total contents.....	34 "
" Solid " .....	18 "
" Water " .....	16 "

The capacity of the largest sized tin in which these vegetables are packed is fairly constant, the variation being about 1 oz. in either direction.

The total content of the can averages about 3 ounces less than the capacity of the can. This space being either vacuous or containing air.

The solid matter of these contents is of course, the true measure of the value of the article, equal quality being assumed. While the average amount of solids is 18 ounces this varies between very wide limits, viz., from 11.2 oz. to 24.3 oz; which means that some samples have fully twice the value of others. There is no doubt that some regulation is necessary here.

I think it would be reasonable to require a minimum of 20 oz. solids in cans of the size now being considered.

It may be well to say that the solids above referred to are not the dry solid matter of the tomato, but, the moist solids retained on cheese cloth. The weighed total content of the can is poured upon cheese cloth and allowed to drain as long as drops fall at intervals not longer than 5 seconds. The water which passes through is then weighed, and this weight subtracted from the weight of total contents. The remainder is the weight of the solid matter.

#### Medium Size.

6 samples vary from 855 cc. to 875 cc. or 31 ounces.

17 samples vary from 875 cc. to 900 cc. or 32 ounces.

1 sample is of 980 cc. or 36 ounces.

The last sample referred to may perhaps belong to the preceding group.

With three exceptions, the cans of this size were procured in British Columbia, and it may be that packers ship the smaller tins to distant points to reduce cost of freight. The solid matter in these samples varies in amount from 12.5 oz. to 20.8 oz. and averages 16.3 ounces. More in detail, as follows:

Below 13 ounces.....	2 samples.
" 14 "	2 "
" 15 "	3 "
" 16 "	2 "
" 17 "	8 "
" 18 "	2 "
Above 18 "	5

*Small Size.*

Five samples are contained in tins of about 650 cc. size (23 ozs.). The solids range from 9.5 to 14.4 ounces and average 11.7 ozs. The ratio of solid content to size of can (11.7: 23) is 0.5 being practically identical with that for the other sizes. It thus appears that the size of the package is a guide to the actual amount of tomato pulp contained therein, on a basis of average results as found in this inspection.

If I am justified in holding that 20 ounces of solids is a reasonable content for a 37 ounce tin, then a medium sized tin of 32 ounces should contain 17 ounces of solids, and a small tin of 23 ounces should contain 12.5 ounces.

On this basis 52 samples of the large size, or 47 per cent of the whole, contains less than normal quantity, and a considerable number of these are very far below the standard suggested. Of the medium size tins, 17 samples or 70% of the whole contains less than the standard requires.

Of the small size 3 samples or 60% of the number contain less than the standard requires.

The State of Ohio requires that standard tomatoes, should be packed to have a gross weight of 36 ounces of fruit, exclusive of juice. For a higher grade, the gross weight must be 38 ounces, with not less than 20 ounces of fruit.

In view of the great disparity of values shown in this widely used article of food, I am of the opinion that a standard should be legalized under the provisions of 6-7 Edward VII, Chapter 27, "THE MEAT AND CANNED FOODS ACT" and the amendment thereto, which Act is administered by the Department of Agriculture, and I hope that the results here placed on record will be found of service to the Department of Agriculture should it decide on establishing such a standard.

I beg to recommend the publication of this report as Bulletin No. 246.

I have the honour to be, Sir,  
Your obedient servant,

A. MCGILL,  
*Chief Analyst.*
