OUEBEC HARBOUR COMMISSIONERS' REPORT FOR THE YEAR 1888

(Under 88th Victoria, Chap. 55, Sec. 14.)

QUEBEC, 7th January, 1889.

To the Honorable Chas. H. TUPPER,
Minister of Marine and Fisheries,
&c., &c., &c.,

Ottawa.

Sir,

In compliance with the requirements of the 38th Victoria, Chapter 55, Section 14, I have the honor to report as follows on the doings of the Quebec Harbour Commissioners for the year 1888.

Chief Engineer's Report.

The enclosed report from the Chief Engineer, Mr Henry F. Perley, contains all the information with reference to the Harbour Works under his charge for last year.

Graving Dock.

Only two vessels have used the Dock during the year:

The first, S.S. "Alcides"..... 3,422 tons. gross, The other, S. S. "Bratsberg". 1,422 "

The "Alcides" was docked the 24th August and undocked the 29th same month, and the "Brateberg," came in the 15th September and left the 24th. The Dock has been kept in the most perfect condition and has given the greatest satisfaction to those who had charge of the two above named vessels.

The restoration of the warehouse, which was burned in 1886, has been completed and fitted so as to be used as a store and

dwelling house.

The Contractors for the Dock had filed a claim in settlement of their Contract with request that same, if not admitted by the Commissioners, be referred to arbitration. This question was the subject of a lengthy correspondence. Mutual concessions having been made a fair arrangement was finally agreed upon and the arbitration has been thus avoided. A balance of \$11,479.08 is still due on this agreement, upon which the Contractors are claiming interest.

It is satisfactory to declare that the Contractors all through have proved their willingness to meet the Commissioners' desire to avoid litigation in this case and have shown themselves most

liberal in their concessions.

Both the Dock Master, Captain J. E. Bernier, and the Engineer in charge of the Pumping Machinery, Mr. William McDougall, have given entire satisfaction to the Commissioners.

Under the authority of the Act of last session, 51 Victoria, Chapter 6, the Dock has become a public work and is under the control and administered by the Honorable the Minister of Public Works of Canada.

Dredging.

At the close of the working season the Contractors had, under their Contract of the 23rd May 1887, dredged the following quantities of material: 644,284 cubic yards at a depth of 26 feet below low water mark, 1880 cubic yards from 26 to 28 feet below low water mark and 5,508 cubic yards of bottoming in the Tidal

South-Wall, Harbour Works.

In spite of their exertions the Commissioners have not been able to fulfil their promise, conveyed in their last report, to have the South-Wall completed within the term of the contract. Uncontrolable circumstances, combined principally with the wet weather, which has prevailed during the season, have greatly retarded the progress of this work. There cannot exist any reason now to prevent its completion by the end of the next working season.

Louise Embankment.

The accommodation supplied for landing coals on the Louise Embankment has proved to be of the greatest service. The increase of this trade on the Embankment has been such as to necessitate an extension which has been added, in June, in order to meet the anticipated requirements. It is probable that the space reserved for that purpose may still be found too narrow, in as much as that business has a tendency to increase, and, if it becomes necessary to give further accommodation, it can easily be done.

Messrs Ph. Gingras Cie, one of the most important firms dealing in coals of this City, have secured on the north side of the west end of the Embankment a large space of ground where they have transferred their business. The whole space leased to them has been properly planked and fenced in and provided with a small building for an office, and also with a large Fairbank Scale. The lease is for a period of five years with the understanding that the Commissioners can, at any time, take possession of the ground by giving six months' notice to that effect previous to the 1st May each year.

The main railway track of the Embankment has been brought down to the Breakwater so as to afford the discharging

of the goods from the Mail Steamers directly into cars

At the request of mill owners, lumber merchants and others doing business on the line of the Lake St John Railway, the Commissioners have decided to place an additional siding accommodation on the north side of the Embankment in order to facilitate the unloading of deals and lumber from cars in bateaux and barges. This new accommodation will be ready for the traffic early next spring.

The question of erecting a Grain Elevator on the Embankment has been the subject of the most serious consideration. No definite action has been yet taken although the necessity of

such a building is admitted.

st

er

This question, involving a large expenditure, cannot be solved before the Harbour Works are completed.

Draw Bridge.

The Contract for the construction and erection in place of a Draw - Bridge across the entrance to Wet Dock, Harbour Works, has been awarded to the Dominion Bridge Company. The bridge is to be delivered complete by the 1st May, next. The Contract amounts to \$13,000.

Dredging of the Fly Bank Channel.

The dredging of the Fly Bank Channel has been comparatively small this year. This is due to the fact that this work is subordinated to the South-Wall Contract, that is to say that the dredging in question proceeds only when clay is required for the other work, the Contractors being allowed a certain extra remuneration for digging it in that channel according to special directions and supervision in order to obtain uniformity in depth and width.

The quantity of material so dredged, this			
year, amounts to		cubic	yards
	01,000		"

previously dredged, gives a total of.... 66,811

It is probable that the dredging of this channel will be completed by the end of the next working season.

Hydrographic Survey of the Lower St Laurence.

On being informed that Captain Maxwell, of the surveying ship "Gulnare" was on the eve of completing the hydrographic survey of the lower St Lawrence, the Commissioners have addressed you an application praying that his operations be extended as far as Cap Rouge, as such would be of great advantage.

The reply was that the matter would receive consideration. The Commissioners are in hope that their application will be favorably considered and that the Government will accede

Ice Bridge, Cap Rouge.

At one of their meetings, in March, the Commissioners had under consideration the question of the advisability of taking the means of removing by explosives, as it had been done in former years, the key of the ice bridge which was then existing at Cap Rouge. A surveying party was thereupon sent on the spot for the purpose of establishing the position, thickness and length of the bridge with instructions to take information as to the probable time the ice would move.

The report of the surveying party satisfied the Commissioners that it would not be necessary to use explosives, this year, for this purpose and their previsions have been realized.

Lease to the Quebec and Lake St John Ry Co and the Quebec, Montmorency and Charlevoix Ry Co.

A Lease, with reference to the crossing of the Commissioners' property, has been granted to the Quebec and Lake St John and the Quebec, Montmorency and Charlevoix Railway Companies.

be

at

n.

be

de

The Lease is for fifty years and contains all the necessary provisos as to the works which the Companies will have to execute, at their own expense, before taking possession of the premises.

Repairs to Property.

With the exception of the Pointe-à-Carcy and East India Wharves, which have already been reported as much in need of repairs, the remainder of the property under the control of the Commissioners has been frequently inspected and kept in a thorough state of order. The small Pointe-à-Carcy wharf, adjoining the Custom House, has been repaired and is now in a perfect condition.

A large Fairbank Scale has been placed on Pointe-à-Carcy Wharf for the use of the coal dealers doing business on that wharf

Nine hundred and ninety one (991) tons of filling material, consisting in ballast taken from ships, have been dumped, during the year, into Pointe-à-Carcy Wharf, and two hundred and forty (240) tons of iron dross have been overspread on its roadway.

Three hundred (300) tons of copper dross have been spread over Wellington Wharf and two hundred and ninety (290) tons over East India Whark

Two hundred and sixty (260) tons of stone ballast have been dumped into Atkinson Wharf and two hundred (200) tons into the Breakwater.

Ice Cutting.

Twenty six thousand three hundred and twenty five (26325) blocks of ice, all for local use, have been cut during the winter of 1887-88, a difference in less of 7490 in the harvest of the preceding year. According to the ice cutters this difference is due to the thickness and density of the ice last cut, the average weight having given an excess per block.

Before closing this report it is a duty to repair an oversight heretofore made in omitting to allude to the services rendered by the Engineers under whose direction the Harbour Works are constructed. The Commissioners cannot praise too much Mr Henry F. Perley for the great ability, skill and knowledge he has displayed in the exercise of his duties as Chief Engineer to the Harbour Works. The same compliment is due to the Resident Engineer, Mr St George Boswell, and his two assistants, Messrs Chas. McGreevy and La Force Langevin.

The usual statements conveying the information yearly furnished to your Department with reference to the Harbour, as also a complete statement of the Commissioners' accounts for the year, are all annexed to this report.

I have the honor to be,

Sir.

Your most obedient servant,

A. H. VERRET,

Secretary Treasurer.

HARBOUR ENGINEERS' OFFICE.

QUEBEC, 5th January, 1889.

Sir.

I have the honor to submit, for the information of the Commissioners, the following with reference to the Harbour Works, etc., under my charge.

The unfinished work of the Cross-Wall stood very well during the past winter, and work for its completion was commenced on the 7th May, and continued until the setting in of

winter.

During the season the sluce-valves were completed and set. The first stone of the entrance works was laid on the 24th May, and the last on the 20th August, at which date the pump was taken down, and the removal of the coffer-dam commenced, and, on the 25th September, all obstructions had disappeared.

As soon as an unobstructed passage was had through the "entrance" the sinking of the remaining foundation cribs was proceeded with, and the last was put in place on the 20th October; and, before the setting in of winter, a portion of the

masonry superstructure was proceeded with.

The gates, four in number, have been completed, and launched,

and are ready to be be placed in position in the spring.

Much dredging was done during the season in the inner or Wet Basin, principally in grading the bottom to an uniform depth of 15 feet below low water, spring tides. A further quantity still remains to be done to complete this depth over the area adapted for the Basin.

At the junction of the Louise Embankment and the "Ballast Wharf" in the tidal or outer basin it was found that, owing to the settlement of the latter, an opening had formed through which the sand filling of the Embankment escaped. A continuous row of heavy sheet piles has been driven and secured in front of this opening and the accumulated material removed by dredging, thus increasing the length of deep water frontage.

On the South-Wall, so called, work commenced on the 80th April and was steadily prosecuted until the close of the season. The portions between the end of the Custom House wharf and Dalhousie Street, and between the end of the "Cross-Wall" along Dalhousie Street to the junction, in Leadenhall Street, were

-

completed. A large amount of work was done, but the intention of the Contractors to complete the whole, last year, could not be carried out, the principal cause being the difficulty in obtaining labor on a work of such a description as that of the South-Wall, a work, the foundations of which could only be proceeded with during the intervals of low water in the harbour and the operations to be carried on being slow and laborious. Another cause of delay was the fact that railways were in the course of construction in the neighborhood of Quebec, on which labor could be continuous during the day, thus drawing off many men who would otherwise have sought employment on the harbour works. Again the working season was, owing to the prevalence of rain, not an advantageous one for the speedy or economic completion of work.

The harbour works, which have been built by the Commissioners, have stood exceedingly well and so far have not required any repairs. The wooden wharf, on the south side of the tidal basin, has failed at the junction with the cross-wall, a settlement having taken place, caused by the dredging necessary to obtain the depth required for the foundation cribs for the cross-wall. This failure has proved that the deepening of the tidal basin cannot be continued up to this wharf, and, if that side of the basin is to be made available for deep draught vessels, it will be necessary to widen the wharf by building out into the full

depth of the basin.

Although the Graving Dock has been transferred to the Department of Public Works of Canada, its management to the close of the year remained with the Commissioners. It is in good order and condition.

I am, Sir,

Your most obedient servant,

HENRY F. PERLEY,

Chief Engineer.

N. B.—Parties in England will bear in mind, the timber sold in the Raft subjects the purchaser to great expense in dressing, butting, and at times heavy low for culls—if sold in shipping order, the expense of shipping only to be added.

REMARKS.

ANNUAL CIRCULAR.

Quebec, 24th December, 1888.

1888.

We have again the pleasure of laying before the trade the usual statements of supply, export and stock wintering, together with prices current, tomage employed, &c. &c.

In Orean Steamhipt the teachy increase other alluded to in these Circulars has not been realized this year, while the decrease in sailing ship so greatly felt in this Port is alarming; and of schooners, colliers, &c., from the Gulf and Lower'St.
Lawrence the increase condines to be satisfactory, corrected in our trute, that an annicable adjustment has been arrived at the same trade, that an annicable adjustment has been arrived as between the Merchants of Quebec and the Ship Labourer's Society, by which rules detrimental to the trade nort onerous to ship-owners have been annualled. This barrier to vessels londing have, especially steamhips having been removed, great results may be anticipated for the benefit of the employee as well as the employer.

The statement of supply handled to as by the Supervisor of Culters, shows a slight increase in the quantity measured over the expectability, the most diminuitive winering stock only increase in the quantity experted, and in some woods White Pinc especially, the most diminuitive winering stock only increase in the quantity experted, and in some woods White Pinc especially different between experted, and only 5.01, 17.23 feet are winering in the Oreas and the year is 6.953.267 feet.

Prices generally opened at slightly advanced rates, which continued all season with a further marked increase towards the close.

the close. WHITE PINE.—The supply has been unusually small, although slightly above that of 1887, and it is a remarkable fact and worthy of record that the entire stock is held by shippers, and the manufacturers for once have sold out all their stock in this market, and it many instances their entire manufacture for delivery next year. Such a healthy state of things is unprecedented we believe, and while the production this winter will be on a larger scale than during the past two or three seasons, it will not be in any way creasive, and in our opinion is warranted by the beathy demand in Great Britains and as it is market. The enhanced value of Pine Timber Limits is very significant and a sure index of the scarcity of this great slaple of our trade.

great staple of our trade.

WANEY—Has been in better request than Square all season, and sales were readily effected as lots arrived, and in many instances were contacted for last spring or in early sammer. The supply the light, has been unusually good as to be a star for the stap of the star for the st

		Supply.	Export.	Stock.
1888	Square	1,791,113 } 2,029,043 }	6,020,000	2,580,591 Square. 1,226,900 Waney.
1887	Square Waney	1,168,547 2,060,083	5,127,080	4,294,851 Square. 2,449,403 Waney.

RED PINE.—This wood has been in good demand, especially for fresh parcels. The supply tho' small, has been sufficient and the stock very light, yet slightly in excess of last year. The Irish demand once so enormous, is at present very lightly and the stock with the stock of the

miteria inita cino n'oba doco not communa	the attention	it tormerly a	uq.	
	Supply.		Export.	Stock.
1886	582,305	*******	465,360	 464,691
1887	591,646		405,720	 484.124

OAK.—Good and choice lots have been in fair request all season. Prices have advanced, and the stock wintering though somewhat heavier than hast year, is under the average. From all reports the manufacture will be light this winter. There is little wintering at Garden Island or Collins Bay.

	Supply.	v.	Export.	Stock.
1888	1,139,252		1,178,920	 824,283
1887	748,243		1.012.160	740 070

ELM.—The supply of this wood has greatly fallen off, the export exceeding last year, and the quantity in stock fully one-half less. Standing Elm is difficult to procure in large quantities, and present prices leave little margin for profits to the manufacturer.

STAVES.—There is nothing encouraging in this branch of our trade which was once such an important and profitable item of shipment. Not only was the great domand for the British Isles a leading feature in the past, but Spain, Portugal and France formerly draw considerable supplies direct from this port.

		Supply.	Export.	Stock.
1888	Pipe Puncheon	79	 55	 53
110	Pine	886 44	 112 220	 118
1887	Puncheon	156	 306	 33

DEALS—PINE—Have been in fair demand all season, the 'the advance in freights and scarcity of tonings militated considerably against the export, which would otherwise have been much greater owing to the demand in Great Britain, especially towards the antime. Our figures show only a small porting of the Deal Trade of Canada, the bulk of the Other trade when the contract of the Cont

Do	-SPRUCE-Have been in good	request, and	both supply	and shipment	fully up to	the average.	Prices hav
advanced,	as will be seen by our quotations	at which rat	les contracts l	save been freely	entered int	o for next seas	on's deliver
		A Second Control of the Control of t		The state of the s		C41-	Logical Edition Co.

SAWN LUMBER—Has been in good request both for export and home consumption. The quantity of this lumber for shipment to the United States being greatly on the increase, and the lower grades formerly neglected being now in active demand. We quote Pine at \$15 to \$315 per 1600 feets h.m. and Sprace at \$16 to \$21, according to specification and quality.

Freights opened at 18s. to 20s. for Timber, and 42s. 6d. to 45s. Deals, and continued at about these rates up to July, en they advanced, and finally closed at 25s. to 30s. for Timber, and 80s. Deals, with tonuage very scarce.

To the Chairman and Commissioners Quebec Harbour Commission, Quebec.

Gentlemen,

We beg to report that we have audited the books and vouchers of the Commission for the year 1888, and we are pleased to state that we have found every thing in order.

We have to thank the Secretary and the Chief Clerk for having given us all facilities possible.

We have the honor to be,

Gentlemen,

Your most obedient servants,

(Signed)

A. GABOURY

QUEBEC HARBOUR COMMISSIONERS' REPORT

AS PILOTAGE AUTHORITY FOR THE YEAR 1888.

(Under 36 Victoria, Chapter 54)

QUEBEC 7th January, 1889

To the Honorable

CHAS H. THPPER.

Minister of Marine and Fisheries

Ottawa.

Sir.

In compliance with the requirements of "The Pilotage Act," 36 Victoria, Chapter 54, Section 4, I have the honor to submit the following report of the Quebec Harbour Commissioners, as Pilotage Authority, for the year 1888.

Service of the Pilot Stations.

The operations of the year opened on the 25th April by the departure of the Pilot Schooner No 1 with sixteen pilots. The 7th May the Pilot Schooner No 5 left with twenty-five pilots. The 11th same month twenty four pilots were dispatched vid the Intercolonial Railway. Fifteen were sent the 17th, eighteen, the 19th, and nine on the 26th by the same conveyance.

All the Pilot Stations have been, as usual, supplied with pilots, during the season, through the Intercolonial Railway and the Pilot Schooners, and the service has been performed to

the satisfaction of the Commissioners.

Old Pilots.

Under section 36 of "The Pilotage Act" all the old pilots, twenty six in number, who had attained the age of 65 and over, were summoned before the Pilotage Authority previous to the opening of navigation, in order to ascertain whether they could continue in the exercise of their duties for the ensuing year. Twenty three of them were found able to remain in active service and their Licenses were accordingly renewed for one year. The three others, Laurent Larochelle, Louis Fontaine and François

Godreau, were declared unable to fulfil their duties and therefore placed on the pension list.

th

Pilots superannuated.

Five old pilots, Thos Simard, George Sansterre, Jean Pouliot, Jean Baptiste Bernier and Jean Bte Talbot have been pensioned during the year at their own request. By adding the three above mentioned, Laurent Larochelle, Louis Fontaine and François Godreau, it gives a total of eight pilots superannuated during the year.

On being superannuated Simard had attained the age of 75 and had been 53 years in the active service, Sansterre had reached his 77th year and had exercised his duties for the space of 52 years, Pouliot and Bernier had both attained the age of 74 and had been 51 years in active service, Talbot was in his 71th year and had completed his 48th year of active service, Larochelle in his 76th year with 52 years of active service, Fontaine had reached the age of 68 and Godreau the age of 65 and had both exercised their duties during a period of 40 years.

Trials.

Only two pilots have been brought before the Pilotage Authority during the season of navigation: the first under 45 Victoria, Chapter 32, Section 4, and the other on a complaint lodged by the Muster of the vessel he had piloted.

One of the statements annexed to this report conveys all the particulars as to the nature of the complaint and the result of

the investigation in each case.

Licensing of Pilots.

Thirteen apprentices have been, this year, admitted to practise as pilots after having undergone the examination required by law.

With the exception of one, those apprentices, including the two mentioned in the last report, had not practically surveyed the north channel of the St Lawrence, although theoretically they knew it.

The Commissioners, being aware that, during the season of navigation, they would all apply to undergo their examination, anticipated that they would find themselves in presence of the same difficulty as already reported in relation to the two apprentices above alluded to. They therefore had to take means of overcoming the difficulty without eluding the law. An

An.

opportunity was afforded to do so through an application, laid before them the 4th April, from the apprentices praying to be permitted, at their own expense, to survey the channel in question, under the supervisal of experienced men, with the understanding that, on their return, they would be allowed to undergo their examination. The request was granted provided they would go, before the buoys would be placed, three times up and down the channel within the limits of the pilotage ground and were accompanied by one of the Directors of the Corporation of Pilots, and that, on presenting themselves to be examined, they would produce a Certificate from the Pilot Board establishing that they had complied with the conditions imposed by the Commissioners on granting the permission applied for.

The exploration took place under the command of the Director Godbout and each of the apprentices, on presenting himself for examination, was provided with the required Certificate.

The Commissioners were thus satisfied that the ends of the law had been met and that a most serious difficulty had consequently been overcome.

The pilot list accompanying the present report gives the date of the admission to practice of each of the apprentices.

Apprentice Pilots.

The list of apprentice pilots indentured under the old law has been virtually closed this year, the two remaining on it, George Dugal and Ernest Nolet, being absent, the first, since 1877 and, the other, since 1878. As those two apprentices have never been heard from it is very doubtful if they will ever return.

Those on the present list, seven in number, have been indentured under the authority of the 45 Victoria, Chapter 32, and they therefore cannot be admitted to pass their examination before the number of Pilots is reduced to 125, as provided for in the 8th section of that Statute.

Complaints against the pilotage service

During the year five complaints have been lodged against the pilotage service: the first by the Master ship "Bernadotte", the second by the Master Bark "George Linck", the third by the Master Bark "Lyna", the fourth by the Master S. S. "Boston City", and the fifth by the Master S. S. "Dominion".

Each of those complaints has been the subject of the most exhaustive inquiry and, in each case, it has been established that the pilotage service was free of blame.

A copy of the correspondence exchanged on the subject of

those complaints is annexed to the present report.

The result of the investigation in re S. S. "Katie" which had to be held in 1888, although the complaint had been lodged the previous year, forms also part of the annexures accompanying this report.

Deaths

Two pilots have died during the year: the first, Laurent Godbout, had attained his 72nd year and the other, Pierre Roy, his 73d year. They had both been in the active service for the space of forty-seven years.

Directors of the Corporation of Pilots

At their annual meeting, held the 10th December, the Pilots elected the following Directors to their Corporation for the ensuing year: Messrs Joseph Fortier, Adjutor Baillargeon, Laurent Godbout, Auguste Desprès, Jos. Phil. Couillard and Jean Baptiste Talbot, and, at a meeting of the newly elected Directors held on the following date, Mr Joseph Fortier was re-elected President.

The present report covers various statements, not therein alluded to, which contain all the information yearly conveyed to your Department by the Commissioners in their capacity of

Pilotage Authority.

COMPLAINT AGAINST THE PILOTAGE SERVICE

Re S. S. " Katie. "

MONTREAL BOARD OF TRADE

MONTREAL, January 4th, 1888.

A. H. VERRET, Esq., Sec.-Tres. Harbour Commissioners, Quebec.

Sir,

Referring to mine of the 3rd December regarding the delay to which the S.S. "Katie" was subjected in procuring a Pilot at Father Point, and to yours of 10th ultimo, in reply thereto, requesting to be furnished with the statement of the Captain of the S.S. "Katie" giving details of his complaint, I have procured and enclose herewith documents as follows:—

(A) Copy of letter from J. McWilliams, Pilot Agent at Father

Point, to Captain of S.S. "Katie."

(B) Copy of letter from Capt. M. P. Lund of S.S. "Katie" to Mr Anderson of Anderson, McKenzie & Co, the ship's Agents.

(C) Copy of written statement by Captain Lund of the S. S. "Katie" regarding the delay he experienced in obtaining a Pilot

at Father Point giving full particulars.

The Consignees of the cargo represent that such unnecessary delay will most certainly tend to the increase of marine insurance rates on vessels arriving towards the close of navigation, and that, in the Council's opinion, would be most unfortunate not so much because of the extra expense involved to importers as on account of the unfavorable manner in which such increase would affect the reputation of the St. Lawrence route.

I am, Sir,

Your obedient servant,

GEO. HADRILL,

Secretary

HARBOUR COMMISSIONERS' OFFICE.

bu op

GEO. HADRILL, Esquire, Secretary, Board of Trade, Montreal.

Sir,

I beg to acknowledge the receipt of your letter of the 4th ultimo, transmitting, in conformity with request, the documents asked for in relation to the complaint conveyed in your letter of the 3rd December last, in re delay to which the SS. "Katie" was subjected to in procuring a Pilot at Father Point, and to inform you, in reply, that the explanations given on the subject by the Directors of the Corporation of Pilots have satisfied the Commissioners that the Pilot Schooner No 4, according to the entries made in her log book, was on the Station at the time and that her Captain sailed towards the Steamer for the purpose of boarding her, but could not succeed in doing so.

The Captain of the "Katie," in his letter to Messrs Anderson, McKenzie & Co, admits, when distant about five miles from Father Point, having seen a Schooner, but could not tell whether it was a Coaster or Pilot Schooner. Why did he not, at a period so advanced of the season, take the trouble of ascertaining whether the sail in question was a Pilot Schooner? Had he done so he would have found what he was looking for.

The Pilot Board admits that no charge should have been made for landing the Pilot and, in consequence, the sum of seven dollars (\$7) is at the disposal of Messrs Anderson, McKenzie & Co, and will be paid to their order.

I remain,

Sir.

Your most obedient servant,

A. H. VERRET,

Sec.-Treas.

MONTREAL BOARD OF TRADE

MONTREAL, February 15th, 1888.

Your letter of 9th inst was communicated to Messrs Anderson, McKenzie & Co and, together with their reply, submitted at yesterday's meeting of the Council of the Board.

The Council ordered that Messrs Anderson, McKenzie & Co's letter be forwarded for consideration of your Board, and that I inform you that, in its opinion, the complaint of that firm deserves your serious consideration and that the explanation of the Pilotage Board of Directors is not sufficient.

I am, Sir,

Yours obediently,

GEO. HADRILL,

Secretary.

HARBOUR COMMISSIONERS' OFFICE

QUEBEC, 29th March, 1888

GEO. HADRILL, Esquire
Secretary,
Roard of Trade,
Montreal

Sir.

I have the honor to acknowledge the receipt of your letter of the 15th ultimo, re detention in Pilotage ground of S. S. "Katie," stating that your Board was not satisfied with Pilot Board's explanation.

Unavoidable circumstances have caused delay in replying but I will now give the reasons why the Commissioners are of opinion the Pilot service is not to blame in the matter of the delay complained of by Captain of the "Katie" and Messrs

Anderson, McKenzie & Co, Agents of the vessel.

What are the circumstances? The "Katie" entered Pilot ground from sea at almost an unprecedentedly late date; the chief danger signals had been removed for the season; the Captain, in apparent ignorance of the situation, runs past Bic, the usual Pilot Schooner Station, during the night, returns in the morning; the Pilot Schooner No 4, with her signal flying, is just off Bic, weather clear but not enough wind to do much; the Captain of the Pilot Schooner saw the "Katie" and expected her to approcach near enough to send her a Pilot; instead of which the Captain of the "Katie" proceeds to Father Point and bargains for a Pilot with result already known to you. The Pilot Board, had they been applied to would have been glad to furnish a Pilot to the Agents of the "Katie" and they could have had him waiting at Father Point for that Steamer's arrival, instead of which the Board had no chance of doing anything special in the matter. Their Schooner with Pilots was on the Station, and, although in good day light, her number painted in large figures on her hull, her signal flying, yet the Captain of the "Katie" steams past her at a distance of about three miles, in ignorance of her character.

The Agents of all the regular Atlantic Lines of Steamers have Pilots waiting at Father Point from the opening to the close of each season. The conditions of the navigation make such practice advisable. The Pilot Schooner service, however perfect for sailing vessels, cannot suit steamship wants, apparently Messrs Anderson, McKenzie & Co have yet to acquire

this knowledge

The reason why the Pilot Board refunded the seven dollars for landing Pilot at Father Point was that their Schooner had been sent to winter quarters, but they could not, under the circumstances, have been compelled to do so, as it was the duty of the Steamer to land her Pilot.

I have the honor to be,

COMPLAINT AGAINST THE PILOTAGE SERVICE

Re Ship " Bernadotte "

MARINE DEPARTMENT.

OTTAWA, 23th July, 1888.

Sir,

I enclose herewith copy of a letter received from the Master of the Norwegian Ship "Bernadotte" complaining that his vessel had been in great danger owing to not having secured a Pilot, and that the Corporation of Pilots had insisted that full Pilotage should be paid when no service had been rendered, and I have to request that you will be good enough to report in regard to this complaint as soon as possible for the information of the Minister.

I am, Sir,

Your most obedient servant,

A. H. VERRET, Esq.

WM. SMITH,

Secretary

Deputy Minister of Marine.

Harbour Commissioners,

Quebec.

QUEBEC, 21st July, 1888

To the Honorable
The Minister of Marine,
Ottawa.

Sir,

May I take the liberty of addressing you on the subject of Pilotage, in the River St. Lawrence. On the 12th July instant, at 7 o'clock A. M. hove ship back to leeward off Bic Island, for to

receive Pilot on board, then saw a Cutter under sail, but when he saw my vessel coming up under him he lowered his sail and went to anchor.

We were then about $\frac{1}{8}$ of a mile from each other, after having laid back about 4 of an hour, and pilots making no sign of

boarding my ship.

We then bore off for the next Pilot Station, wind was then fresh from the East North East, carried whole topsails, weather being rainy and land quite visible. On sailing up the river, the wind increased to a gale with fog and rain. Ship being then in great danger, having no pilot on board, and being a stranger, we came up to Green Island Reef, close up. Then clearing up a little. The Lighthouse Keeper, seeing ship, fired off signal guns for danger, kept Union Jack on foretop flying all the time, time then 11 o'clock A. M. same morning, then wind fell off to a dead calm, with a heavy cross sea in the tide way. Ship drove along the shore, close by Apple and Basque Islands, especially as to the latter, and owing to the currents and swell, vessel came near going ashore, and in our opinion, anchors and chains would be useless, under the circumstances, in case of anchoring as a last resort. Fortunately the weather cleared up and seeing a Tug Boat coming up, made signals for same and agreed to take ship in tow to Quebec and out of danger, and arrived here in Quebec without any Pilot whatever.

Will you now kindly reply if my vessel is bound to pay the full pilotage, which the Corporation of Pilots insist that I shall do. Thankful for your immediate reply and valuable decision on this very important point, for the shipping in general

in the River St Lawrence.

I am, etc.

WM SMITH, Esquire Deputy Minister of Marine etc, etc., etc. Ottawa.

Sir,

I beg to inform you that, agreeably with the request of the Honorable the Minister of your Department, conveyed in your letter of the 28th July last, the receipt of which has already been acknowledged, a special committee, composed of five members of the Board, have been appointed to investigate the subject of the complaint against the Pilotage service addressed to your Department by the Master of the Norwegian Ship "Bernadotte."

The Committee have spared neither pains or time to secure the necessary information and I am directed to report as follows

as the result of its proceedings :

Four witnesses, the Plaintiff and the Pilots Régis Ménard, Jean Gobeil and Jean Baptiste Talbot, have been examined in order to establish the state of the weather on the morning of the 12th July, at 7 o'clock, at which hour the Master of the "Bernadotte" reports that he "hove his ship back to leeward off Bic Island to receive a Pilot on board " etc., etc.

The evidence of the Captain has not been corroborated by the three other witnesses. On the contrary it has been proved that, on that date, at that hour, a gale was prevailing and that it would have been impossible for the boat of the Pilot Schooner,

then at the Bic Station, to board the "Bernadotte."

This evidence has been strengthened by the following documents laid before the Committee :

1. The Log Book of the Pilot Schooner No 5,

2. A written statement made by Captain Miller of S. S. " Wylo ",

3. A written statement made by Captain Barber, of S. S. " Topic," and

A deposition by the Pilot Joseph Plante.

The proof of the severity of the weather having been abundantly established the Committee were unanimous in coming to the conclusion that the Master of the "Bernadotte" was not

As regards the payment of the full pilotage exacted, although the vessel came up without a Pilot, it is not within the province of the Commissioners to interfere in this matter. The Pilotage being compulsory under 36 Victoria, Chapter 54, Sec. 57, it was the duty of the Master to wait and make signals for a Pilot as soon as the weather would permit him to do so.

I am,

Sir,

Your most obedient servant,

A. H. VERRET,

COMPLAINT AGAINST THE PILOTAGE SERVICE

Re S. S. " Boston City "

MONTREAL BOARD OF TRADE.

MONTREAL, October 25th, 1888.

A. H. VERRET,

Secretary Treasurer,

Quebec Harbour Commission.

Sir.

By direction of the Council of this Board I forward, for consideration of the Quebec Harbour Commissioners, copy of a letter received from Messrs. Anderson, McKenzie & Co, of this Port, complaining of defective pilotage service below Quebe:

I am, Sir,

Yours obediently,

GEO. HADRILL,

Secretary.

MESSRS ANDERSON, McKENZIE & CO.

AGENT FURNESS LINE OF STEAMERS.

MONTREAL, October 22nd, 1888.

GEO. HADRILL, Esq.,
Sect'y Board of Trade,
Montreal.

Dear Sir,

If you will recollect the case of the S. S. "Katie", last fall, coming up to Quebec without a sea Pilot, the circumstances of which were fully gone into by the Council.

We have to report that the S. S. "Boston City," on her voyage to Montreal this month, was subjected to the same inconvenience, having had to come up to Quebec without a sea

pilo nien puls perf this stea mak

I am instructed to acknowledge the receipt of your favor of the 25th instant, inclosing letter of Messrs Anderson, McKenzie & Co complaining that no pilot was available for the S. S. "Boston City" on her last voyage to St Lawrence, also stating that "there has been several instances, this season, of a similar character with both sailing vessels and steamers."

I am requested to inform you that the Harbour Commissioners are now investigating the charge made by the Captain of the "Boston City" and, when the case is closed, I will inform you of the result. In the meantime I beg you will at once communicate with Messrs Anderson, McKenzie & Co and request they will furnish you with the particulars of the general charge they make, as the Commissioners are very anxious to do all in their power towards assisting in maintaining the utmost efficiency of the Pilot service for and below the Harbour of Quebec.

I am, Sir,

Your most obedient servant,

A. H. VERRET,

Sec. Treas.

HARBOUR COMMISSIONERS' OFFICE

QUEBEC, 15 th Nov. 1888.

GEO. HADRILL, Esquire Secretary Board of Trade Montreal

Sir,

On the 29th ultime I wrote you stating that the Harbour Commissioners were then investigating the complaint of Captain Smith S. S. " Boston City " that he could not get a Pilot on the Station and requesting that Messrs Anderson, McKenzie & Co would immediately forward particulars of their general charge that "there had been several instances, this season, of a similar character with both sailing vessels and steamers." As a fortnight has since elapsed, and I have no response, I will dismiss that portion of Messrs Anderson, McKenzie & Co's complaint and proceed to inform you of the result of investigation into case of

Captain Smith of the "Boston City" states that he arrived off Bic 3.39 A. M. 11th ultimo, showed blue light, waited and proceeded, 4.30, hoping to get a Pilot off Green Island, his only excuse for so doing was his statement that he was "an entire

The Pilot Board have been able to prove that, at the hour named by Captain Smith, 8.30. A. M. and hours before and after that time, two of their Schooners were on their Station off Bic, showing flash light every five or six minutes; the shooners saw the light of the "Boston City," and her signals, but were unable to reach her before Captain Smith started off for Green Island, as

The Pilot of the S. S. "Lake Winnipeg," M. A. Larochelle, outward bound, reports that, when abreast of Bicquette Light. distant about two and one half miles, he saw the two Pilot Schooners, one to the W. N. W., distant about five miles, the other to the north, within about two miles, both showing flash light at intervals; at same time he saw a Steamer to the southward, two points on his starboard bow, burning blue light, which proved to be the "Boston City." The officer on the bridge with Pilot remarked to him "there is a steamer showing

a pri ling far t stane not s an o Scho wind Shoo

arran the c a Pil met d boun no lo repai

broth

to ha

exper provi neces City,'

steam receiv 1 case o could

on Ste

a private signal." "No," replied he, "that is a steamer signalling for a Pilot." "In that case," said the officer, "he has not far to go as there are the Pilot Schooners." Under such circumstances it is difficult to understand why the "Boston City" did not see the Schooners and obtain a Pilot when they saw her and an outward bound vessel, as already described, saw the two Schooners and the "Boston City;" weather was fine and clear, wind was light from north, but under no force of wind can a Shooner overtake a steamer. It was the duty of Captain Smith to have waited off Bic for his Pilot,—as his agents had not arranged to have Pilot at Father Point for him,—his ignorance of the custom is his excuse, but the lault of not being served with a Pilot was certainly his—no one else is to blame.

Curiously enough, when off Green Island Captain Smith met one of his Company's ships, viz: the "Ripon City" outward bound. It was 10 A. M., weather fine. Her Pilot services were no longer required for that vessel. Why did not Captain Smith repair his blunder of passing the Pilot Station by asking his

brother Captain to give him his Pilot?

The regular lines of steamers to the St Lawrence, with experienced Captains in command, consider it advisable to provide Pilots for their service at Father Point. How much more necessary is it, in the case of such a Steamer as the "Boston City," is proved by the foregoing facts.

Up to date, this season, the Pilot Schooners have served 156 steamships and 287 sailing vessels. Only complaints so far

received are three.

The Harbour Commissioners, Quebec.

Dear Sirs,

Enclosed I beg to hand you copy of letter from Capt. Cross which reflects very seriously on the Pilot Service.

In consequence of the action complained of the "Dominion"

was detained ten hours waiting on Pilot.

Yours truly,

WM. M. MACPHERSON.

ON BOARD THE S. S. "DOMINION"

AT QUEBEC, 13th Nov. 1888.

WM. M. MACPHERSON, Esquire Quebec.

Dear Sir.

After a stormy passage (via Cape Race) we arrived at Father Point—8.27 last night; but as our pilot could'nt get off on account of the rough weather I went on to Bic intending to get a pilot from a pilot boat.

When Bic bore S. W. by W. dist. about 5 miles, I exhibited a signal for a pilot which was answered by a boat bearing from us S. W. by S. so I steered for her (Boat No. 1) but instead of stopping for us she was run away and anchored inside of Bic—I saw her masthead light hauled down and an ordinary riding

light exhibited. I followed her in and, as we were rounding the Island, I burnt another blue light before she was anchored, and this was answered by another boat (No. 4 I think) which was anchored close to the south shore of the Is. When we were moderately close to No. 1, she being ahead of us, the other boat was nearly on our starboard beam, I burnt another blue light as I was in doubt as to which boat would send me a pilot; but no notice was taken of this signal by either of the boats; so I waited on the spot for half an hour, less than a quarter of a mile from No. 1; then seeing that no attempt was made by either boat to send me a pilot, and, as my signal was not answered, I turned the ship round and went back to Father Point, where I waited till I got my Pilot, at 6.35 A. M.

I should like to know why No. 1 boat was not stopped after showing the signal to the Eastward of Bic (she was in smooth water at the time) and why a Pilot was not sent before she was

anchored or afterwards.

I am, dear Sir,

Your obedient servant,

HARBOUR COMMISSIONERS' OFFICE

QUEBEC, oth Dec. 1882.

W. M. MACPHERSON, Esquire Agent Dominion Line of Steamers Quebec.

Sir.

I beg to acknowledge the receipt of your letter of the 15th ultimo, covering a complaint against the pilotage service addressed to you by the Master S. S. "Dominion" and submitted by you to the Commissioners with a request to forward, after investigation, the reply to same.

The investigation asked for has been held, during which the following named documents were laid before the Commis-

1. A Report on the complaint in question from the Directors Corporation of Pilots;

 A declaration by the Pilot Joseph Lachance, Master Pilot Schooner No 1;

3. A copy of the entries made in the log book of same Shooner, the 12th and 13th November last, covering the time the S. S. "Dominion" reached Father Point, went to Bic and returned to the former place; and

4. A copy of the entries made in the log book of Pilot

Schooner No 4 during the day of 12th same month.

The investigation has established to the satisfaction of the Commissioners that the Pilot Schooner No 1 saw the "Dominion" showing her blue lights and that she answered the Steamer, although, at the time, she was going inside Bic for shelter, as she could not stop any longer outside on account of the existing gale, the heavy seas, ice forming all over her deck and rigging and the loss of her boat although firmly lashed to davits, and that, had she stopped longer outside, she would have been further disabled She therefore ran into shelter, anchored in 10 fathom water and endeavored to signal her helpless condition to the complaining Steamer.

It has been also established that the Master of Shooner was desirous of going to the Steamer, but was unable to do so owing to her disabled condition. Had the Steamer however ran along side or near enough the Shooner to hail hershe could have learnt that the Shooner had lost her boat and Captain Cross could then have lowered his own boat and secured a Pilot or could have gone to No 4 Shooner and obtained one, as the latter schooner was not then aware of the disabled condition of No 1 Schooner, but Captain Cross left the Station without going near enough to

communicate.

COMPLAINT AGAINST THE PILOTAGE SERVICE

Re Barque " Lyna ".

Sir.

QUEBEC, 4th October, 1888.

Car

Sir,

sig

the

sub

Cap

sign

nev

I beg to draw your attention to the following circumstances:

I was with my vessel the barque "Lyna" in tow of the steamer "Dauntless" and passed Bic at one o'clock in the afternoon of the second instant and saw no pilot schooners anywhere around there. The day was beautiful, clear and hardly any wind. Another barque towed with us and neither of us got a pilot although we looked everywhere for them Being in tow we could not lay to and wait, but kept the flag at the foretop during the whole of that day and also the following, and only succeeded in securing a pilot last night, at St. Lawrence Point, after the steamer having gone at half speed and blown the whistle for a long while. I beg that you will examine into these circumstances as it may be dangerous coming up this long river without a pilot when the weather is bad, and I also claim that my owners shall be free from any charge for pilotage, except a moorage, in consequence of not attending better to veasels requiring pilot.

I remain, Sir,

Your obd't servant,

JOHAN WAHL,

Master Barque " Lyna ".

I have the honor to acknowledge the receipt of your letter of the 4th ultimo, complaining that no Pilot Schooner was in sight at entrance to Pilot ground and that, in consequence

thereof, you were unable to obtain a Pilot.

The Commissioners have held exhaustive inquiry on the subject of your complaint and have satisfied themselves of the fact of Schooner No 4 being on Station and the endeavour of her Captain to give you a Pilot, but the apparent intention of your Tug to avoid any delay made it impossible to board you; their signals do not appear to have been seen by you, but they were nevertheless made.

I have the honor to be.

Sir,

Your most obedient servant,

A. H. VERRET,

Sec.-Treas.

QUEBEC HARBOUR COMMISSION.

- MEMORANDUM regarding the opening and closing of navigation and the formation of the ice in the Harbour of Quebec for the year 1888.
- A Bateau, from St. Paul's Bay, arrived in Port the 8th April, at 4 P. M.
- The first Schooner of the season, "Marie Arthémise", arrived in Port the 11th April, at 6.30 P. M.
- The Mail Steamer "Vancouver," arrived at St. Patricks' Hole the 29th April, at 7 A. M., remained there part of the day and reached Indian Cove, at 1.30 P. M., after having come up as far as opposite the Custom House. Remained at Indian Cove till the 2d May, on account of the ice, and reached Quebec the same day, at 1. P. M.
- The Steamboat "Montreal," of the Richelieu and Ontario Company, arrived in Port, the 4th May, at 10.15 A. M.
- The first sailing vessel, Barque "Helga," arrived in Port between 6 and 7. A. M., the 8th May.
- The Tidal Basin was free of ice the 19th April and the Wet Dock the 25th same month.
- The navigation in the River St. Charles was opened the 4th May.
- The last sailing vessel, Barque "Yuba" left the Port the 14th November.
- The last vessel of the Richelieu and Ontario Company, "Montreal," left Port the 20th November.
 - The first floating ice on the river was seen on the morning of the 22nd November.

- The Allan S. S "Pomeranian," arrived from Montreal on the morning of the 27th November and left for Sea the 30th same month.
- The S. S. " Polino," arrived from Sydney, on the 28th Nov.
- The Steam Schooner "Lady Belleau" left, for the gulf, the 6th December, at noon.
- The ice formed, the 23rd November, in the River St. Charles and in the Tidal and Wet Docks, subsequently broke and finally formed the 7th December.
- The ice bridge between the Island of Orleans and the north shore formed the 21st December.
