VIDEIDININID. A Home in the Celestial City.

MINNEAPOLIS, MINN., Dec. 18, 1878. H. R. Stevens, Boston:

About nine and a half years ago I had a fever; the doctor gave me some poisonous medicine, drove the disease into my leg, and it broke out, and has been from two to ten running sores ever since. I could not sleep a fourth of a night once in six months, and a great many nights was compelled to get up and take opium—a piece as large as a peato deaden the pain. I have tried everything I could hear of, in fact, I have paid out hundreds of dollars, and found no relief until I commenced taking Vegetine, and now I can go to bed at eight o'clock at night and sleep until seven o'clock in the morning, and no occasion to waken from pain. I was used up, perfectly dead inwardly, and treagently.

CHINE BROOK A COEN PARIS LETTER.

Paris, July 18th 1879. By a small majority the Brench Senate

(Regular Correspondence.) has passed the Bill for the return of the Legislature to Paris. The debate on this question is one which foreigners are especially unfitted to understand. We may read the history to understand. We may read the history of France, yet not be able to understand the feelings of Frenchmen. It is clear the feelings of Frenchmen. It is clear J. Ritchie; the mercantile community holders are women, the great majority that Paris is, to a Frenchman of susceptible soul and vivid emotions, something that London, Berlin, Vienna, or Madrid prominent than all were the clergy, to the extent of \$53,700. The Church can never be to the Englishman, German, whose stalwart appearance the lec-turer made pleasing reference in his Temporalities Board for \$17.50, James Austrian, or Spanjard. Paris has features of urban life that no provincial city can approach, and social character. D. D., and we also noticed Rev. 1 (20), and the Presbyterian Character (10), and we also noticed Rev. 1 (20), and the Presbyterian Character (10), and we also noticed Rev. 1 (20), and the Presbyterian Character (10), and we also noticed Rev. 1 (20), and the Presbyterian Character (10), and we also noticed Rev. 1 (20), and the Presbyterian Character (10), and the Presbyteria istics to which none can attain. It is the head and heart of French politics, Chappell, Carey, Thomas, Hickson, Wilcox and Weddall. The andience brokers and, in consequence, the price paid has been advanced to 80 and 85 unmade. Beyond these substantial considerations there is all the romance and city placed him on good terms with fervor which Republicans, poetical or political, have heaped up around an ideal into his subject. We do not pro Paris. Victor Hugo considers it a kind to even ontline the secture. The main who have sought success in the comTracer was next called on. If you want to save your potato reach New Brunswick, and that even if it did, our winters' frost would kill it. Now they find this a mistaken idea; the bug is in our midst. How did it come here? Why he just simply travelled along the line of Railroads; wasn't particular whether in a Pullman car or a freight van. Now war must be waged, and every energy bent upon his extermination. Some ask, what is the potato bug?

What is he like? And how is he to be got rid of? The Colorado beetle is a peculiar insect, and few seem to fully understand him. A gentleman who has studied him up somewhat gives this information: "The popular idea is that it is the beetle itself that does all the eating and destruction to vegetation. This is a mistake. It is its larva, or grub, which spoils our potato fields, the beetle being comparatively harmless Let me exlain how this is: In the fall the full grown beetle goes down into the ground, and there remains torpid all winter. In the spring, say about the latter part of May or first of June, it appears over ground, and commences the work of procreation. The female selects any vegetation, but preferably potato tops, on which to deposit her eggs. Each female insect lays from ten to thirty yellowish eggs, which she deposits on the under side of the leaf. If potatoes are up the eggs are deposited near the top of the stalk, where the leaves are young and tender. If the weather is warm, these eggs are hatched in from eight to ten days. The product is a very small grub or slug, which immediately attacks the leaf upon which it is hatched—the baby start. ing immediately after birth to eat the ing immediately after birth to eat the bed on which it was born. w that the long evenings are approaching it is advisable that the children should be provided with useful recreation. The following Games are both instructive and amusing, and are very fascinating.

The first two are quite an assistance to the School course, the first exercising the young in the correct spelling of words, and the second teaching them to count quickly and correctly. CHAS. R. ADAMS, the world-renowned enor. says: "They have no superior in America." H. MAPLESON, the world-renowned concert and operatic manager, says: "Madame Roze and the other artists of my company are delighted with the Miller Piano." GEO. A. CONLY, world-renowned basso of the Strakosch Opera Company, says: " I cannot but praise very highly your very ex-cellent instruments."

MRS. E. ALINE OSGOOD, one of the most popular American Artists in Europe, says: "I consider the Miller Plano superior to all others," This Game is easily learned being accom-panied with concise directions, and in a short time not only the young folks, but also the old folks are equally interested in it. THE HENRY F. MILLER PIANOS have exclusively received the most flattering notices in the musical criticisms of the Bos-ton Press.

BOSTON JOURNAL: "Distinguished for purity and firmness of tone, and at same time for delicacy of touch and nicety."

Ayer's Cherry Pectoral

The reputation it has attained, in con the marvellous cures it has produced during the last half century, is a sufficient assurance to the public that it will continue to realize the happiess sults that can be desired. In almost every ction of country there are persons, put nown, who have been restored from alarming even desperate diseases of the lungs, by its use All who have tried it, acknowledge its superiority; and where its virtues are known, no one hesit as to what medicine to employ to relieve the distress and suffering peculiar to pulmonary affections. CHERRY PECTORAL always affords instant relief, and performs rapid cures of the milder varieties of bronchial disorder, as well as

As a safeguard to children, amid the distres ing diseases which beset the Throat and Chest of fhildhood, it is invaluable; for, by its timely use, ultitudes are rescued and restored to health This medicine gains friends at every trial, as the cures it is constantly producing are too remarkable to be forgotten.
