L Proceedings of the Education Department.

1. NORMAL SCHOOL TEACHERS' EXAMINATIONS.

Copy of an Order in Council approved by His Honour the Lieutenant-Governor, the 5th day of June, A.D. 1876.

Upon consideration of the annexed Report of the Hon. the Min-ter of Education, dated the 30th day of May, 1876, the Commitof Council advise that your Honour do approve of the accompanying Regulations respecting the procedure at the examination of Normal School Students, as supplementary to the Regulations of the Department approved of by your Honour in Council on the Seth day of April, 1876.

Certified. (Signed) J. G. Scorr, Clerk Executive Council.

The Honourable The Minister of Education. 6th June, 1876.

The undersigned respectfully submits and recommends for the proval of His Honour the Lieutenant-Governor in Council the companying Regulations respecting the procedure of the examination of Normal School Students, as supplementary to the Regula-tions of the Department approved by His Honour the Lieutenant-Governor in Council on the 26th April, 1876.

ADAM CROOKS, Minister of Education. (Signed)

Education Department, May 30th, 1876.

Regulations of the Education Department, respecting the procedure in the Examination of Normal School Students, for Teachers' Certificates.

1. The duties of Presiding Examiner shall be discharged by one the members of the Central Committee, to be named by the Minis-

2. The Examiner shall conduct the examinations according to the General Regulations of the Department, so far as the same are ap-plicable, and report the result thereof to the Minister.

3. None but those holding the Principal's certificate, as required by the Regulations approved 26th April, 1876, shall be allowed to present themselves as candidates at the examination.

4. During the examination and previous week of preparation, all the Rules and Regulations of the Normal School remain in full force, and any infringement thereof shall be summarily dealt with by the Principal.

5. During the time in each day while the examination is actually proceeding, the Examiner shall have control and be responsible for maintaining discipline in the Examination Hall amongst the candidates, and at all other times and occasions during each day of the examination the Principal's authority shall be in full force and effect.

> (Signed) ADAM CROOKS. Minister of Education.

Education Department, May 23rd, 1876.

2. PUBLIC SCHOOL TEACHERS' EXAMINATIONS.

COPY of an Order in Council approved by His Honour the Lieuten-ant-Governor, the 5th day of June, A.D. 1876.

Upon consideration of the annexed Report of the Hon. the Minister of Education, dated 30th of May, 1876, the Committee of Council advise that your Honour approve of the accompanying Re-gulations in further supplement to the general regulations for the examination for Teachers' Certificates approved of by your Honour in Council on the 26th day of April, 1876,

> Certified. (Signed) J. G. SCOTT, Clerk Executive Council.

The Honourable The Minister of Education. 6th June, 1876.

Further Regulations respecting the Examination for Teachers' Certificates, and supplementary to the Regulations approved by Order in Council, 26th April, 1876.

1. Each Candidate who presents himself for examination shall satisfy the Presiding Examiner as to his personal identity before the commencement of the second day's examination, and the Pre-siding Examiner shall, with his report and return of the questions and answers to this Department, also certify that he has been satisfied as to the personal identity of each Candidate upon proper grounds.

2. Each Candidate is required to conduct himself in strict accordance with the regulations, and should he receive any aid, or extraneous assistance of any kind in answering the examination questions, he will be liable not only to the loss of the whole examination, but to the forfeiture or withdrawal of his certificate at any time after-ward when the discovery is made of such aid or assistance having been given or maintained.

> ADAM CROOKS. (Signed) Minister of Education.

Education Department, May 30th, 1876.

3. PUBLIC SCHOOL TEACHERS' EXAMINATION, JULY, 1876.

EXTRACTS FROM THE OFFICIAL REGULATIONS.

Time and Place of each Examination.—The yearly examination of candidates for Certificates shall be held in each County Town in such building as may be appointed by the Inspector, who shall give at least three weeks' public notice thereof, in such manner as he shall deem expedient. None are eligible as candidates for First Class Certificates, who do not already possess Second Class Provincial Certificates; nor is any person eligible to be a candidate for a Second Class Certificate, unless he shall have previously obtained a Third Class Certificate under the present system of examination, or a First or Second Class Certificate under the former system.

Proceedings at each Examination.—The Inspector shall preside at the opening of each examination; and at the hour specified on the first day, and in the presence of such of his colleagues as may be there, and of the candidates, he shall break the seal of the package of examination papers received for that examination from the Education Department. He shall also break open the seal of each additional packet of examination papers as required, in the presence of a co-examiner and of the candidates. He shall further see that at least one examiner is present during the whole time of the examination, in each room occupied by the candidates. He shall, if desirable, appoint one or more of his co-examiners (1) to preside at the examination in any of the subjects named in the programme; (2) to read and report upon the answers as they are received.

Norz. — Examiners will make their own arrangements regarding time for Reading Writing. (See Regulations.)

4. APPORTIONMENT OF THE LEGISLATIVE SCHOOL GRANT TO PUBLIC SCHOOLS IN ONTARIO FOR 1876.

The following is the apportionment for the current year of the Legislative School Grant to each City, Town, Village, and Township in Ontario.

The basis of apportionment to the several Municipalities for this year is the population as enumerated in the census of 1871. The total amount available for apportionment is the same as that of last year, and those Townships in which there are feeble Schools and a sparse population have been specially considered in an additional apportionment from the Poor School Grant. Such additional Grants appear in a separate list, and under the Regulations of the Department a municipal equivalent is required for them.

Where Roman Catholic Separate Schools exist, the sum apportioned to the Municipality has been divided between the Public and Separate Schools therein, according to the average attendance of pupils of both classes of Schools during last year, as reported and certified by the Trustees.

The Grants are, by law, payable on the 1st of July, by the Treasury Department, on the certificate of the Hon. Minister of Education. These certificates will be issued on or before 30th June, in favour of those Municipalities which have sent in duly audited school accounts and Inspectors' reports to the Education Department.

II. Proceedings of Teachers' Institutes.

1. OXFORD TEACHERS' CONVENTION.

The Annual Convention of the County of Oxford Teachers' Association was held in the East End School here, on Thursday, Friday, and Saturday of last week, the President of the Association, Mr. G. J. Fraser, of the Woodstock High School, presiding. A number of subjects were taken up and discussed pretty thoroughly: the essays by Miss Ross on "Composition," and by Mr. Kennedy on "Cultivating a Good Spirit among the Children," were particularly noticeable. Mr. Kennedy strongly advocated the abolition of corporal punishment in schools, and after a little discussion, a resolution proposed by the Inspector, supporting the ideas advanced in his essay, was carried with but three dissenting voices, out of nearly a hundred teachers present. The proceedings were enlivened by recitations and music. A resolution was passed favouring a system of competitive examinations for promotion, questions to be prepared by a committee, and no pupil to pass from one class into a higher except he passed at one of these half-yearly examinations. The teachers in one township are to examine the pupils of another, so that every suspicion of collusion will be removed. The examinations to be on the same day all over the county, and all the schools of one township to be examined at the same place.

Mr. Carlyle was then elected President of the Association for the next year; W. H. Landon, 1st Vice-President; Miss Maggie Ross, 2nd Vice-President; and Messrs. Brown and Izard, Secretaries, with a member of the Executive in each township. The Hon. Adam Crooks, Minister of Education, was present on

Friday and Saturday. His presence added much to the interest and success of the meeting. He received a hearty welcome from

the teachers of Oxford, and was presented on Friday afternoon with the following Address :

"To the Hon. Adam Crooks, M.P.P.,

Minister of Education for the Province of Ontario:

"SIR, —We, the members of the Oxford Teachers' Association, avail ourselves of the opportunity presented by your kindly consenting to meet us on this occasion, of conveying to you our congratulations on your elevation to the exalted position of Minister of Education.

"When the Provincial Government had determined to make itself responsible for the management and control of the educational interests of the country, we were pleased to know that he who was to be our first appointed Minister of Education was a Canadian, and a graduate of one of our Canadian Universities, and consequently in sympathy with the struggles and aspirations of Canadian youths and more or less conversant with the educational needs experienced and the appliances available in carrying on in our beloved Province a system of education that has already attained the growth of years, and is the result of wise and judicious legislation and management.

"Occupied as we are with the other school authorities in graving practical expression to school legislation, and being thus placed position to feel sensibly all changes that are made, you will sympthize with us when we say that the change from a Chief Supwith tendency to a Ministry of Education has been watched by us with intense interest and no little solicitude, and we are pleased to have integrity and uprightness of character, your assiduous application to the public duties, and your steady resistance of all changes that necessarily reforms, gives us ground for believing that the good and has been accomplished will be held with a firm grasp, and these advances in school legislation will be free from traces of under haste and eager readiness to gratify clamorous and importunate

though unwise solicitation. "We trust, sir, you will experience, during your incumbency in "We trust, sir, you will experience, during your distinguished atoffice, a congenial sphere for the exercise of your distinguished attainments, and that in the discharge of duties to be exceedingly onerous, you will enjoy that exalted satisfaction that arises from a Public recognition of great abilities worthily employed for the pub-lic good. While engaged as a Minister of Education, we beg to assure You that you may rely implicitly on the teachers of Oxford for the most hearty co-operation in devotion to your schemes for the further development and perfection of one of the noblest systems of education possessed by the civilized world. "Signed on behalf of the Oxford Teachers' Association,

"GEO. J. FRASER, President."

Mr. Crooks made a suitable reply, thanking the teachers heartily for their cordial reception.

By the unanimous vote of the Association, the following resolution was passed, and the Secretary was instructed to transmit a copy of the same to Dr. Ryerson, viz. :

"Resolved.-That this Association avails itself of the first opportanity afforded it by a general meeting of its members, since the retirement of the Rev. Dr. Ryerson from the office of Chief Superintendent of Education, to give expression to the high sense it has in common, it believes, with the Canadian public at large) of the Very eminent services which have been rendered by that venerable and reverend gentleman to the cause of education in his native Province, of the wisdom and ability in devising, and the indomitable perseverance and steady devotion with which he has met op-position, allayed animosities and overcome difficulties, and by which he has succeeded in one short life-time in laying broad and deep the foundation of a national system of education excellent in it-elf, the envy of many, and the admiration of all; and that the respect, the gratitude and the affection of this Association shall follow him to his honourable retirement; and we implore upon him in his last days the choicest blessings of Heaven."

A number of other important resolutions were passed by the Con-Vention ; but on account of Mr. Huntsman, the official reporter, having lost his manuscript, we are unable to publish them. Alto-Sether, the Convention was the most interesting and successful yet held in the county.

HON. MR. CROOK'S ADDRESS.

On Friday evening, Mr. Crooks delivered an address upon edu-cation, in the Town Hall. The hon. gentleman began by defining his own position, and stating that while responsible to the whole found is a stating that while responsible to the whole country for his official acts, he was more directly and peculiarly re-Ponsible to Oxford County, one of whose ridings he had the honour o represent. The change was a great one, from having the administration of affairs entrusted to a bureau, not responsible to the people, to the appointment of a Minister directly responsible for every t. He hoped there would be no cause to regret the change, Athough Dr. Ryerson's success and his peculiar faculties for the Work left his successor a difficult task. The tendency of our goveramental system was to local self-government, and this held good in intellectual as well as in political affairs. While men would no doubt differ on and discuss educational affairs, as they did other bubjects within the arena of politics, these discussions were not to be deprecated, as it is only by discussion that we can arrive at the truth. He hoped, however, that political necessities would never make education a mere football of party politics. We had already settled the difficulty which was causing so much excitement in Ingland. Our controversy regarding the denominational differences was settled, and by the British North America Act made a part of the constitution of the country. By our system of local taxa-tion, imposed by trustee boards, township and county councils, and the Ontario Legislature successively, a thoroughly scientific system was attained, with a division of authority probably more nearly perset than any other plan at present in practice. The central authority was not a dictatorship. It only prevented the abuse of local power, as in engaging unqualified teachers. For fifty years a system had been on the statute book, by which there need be no stop to the mental growth, but the High School boy of ability was to be en-blad abled, by means of bursaries, established by the counties, to go on through the University. He regretted that this feature of the law had not been more generally taken advantage of, and that few or no counties had established bursaries. In our educational system the poor had established bursaries. In our current of the teachers two the principal bias to the people, and the object of training is to bring out all the qualities of the mind and body in the best to bring out all the qualities of the mind and body in the best to train the moral, intellectual and physical faculties, in order to Produce a sound mind in a sound body, which is, after all, the House of Parliament last month. But it is not alone in the pri-Breat end of education. It was evident that educators required mary branches we need education, and provision should be made

a careful education. He was glad that the Bible could be admitted into any school in the land. It was the best of books, and the best specimen of our Anglo-Saxon tongue. The objection was sometimes made that our teaching was not religious, but he considered it was We had in 1874, 3,500 Sunday-schools, with 20,000 teachers and 80,000 scholars; so it is evident that Canadian youths are predis-posed to be Christian. The physical education of the children was too much overlooked. A few schools were all that was to be desired in this respect, but most had very inadequate ventilation, and many had made no provision for the admission of fresh air. He next spoke of the qualification of teachers. At the present time there were only 215 first-class teachers engaged in the whole Pro-vince, and 910 second-class. Third-class teachers should be considered as only on probation, and should be under the direction of a first or at least second-class teacher. The third-class teachers must, to some extent, be considered an inferior article, and as a system of promotion by merit was open, any one might look forward to a second, a first, a County Inspectorship, or even the posi-tion which he himself held, which would, no doubt, in time be filled by some teacher from the ranks. Mr. Carlyle moved, and Mr. McMullen seconded, a vote of

thanks to the Minister for his able and instructive speech; and in seconding the motion, Mr. McMullen expressed the hope that the responsibility of excluding the Bible should be placed upon the trustees rather than that of admitting it. He wished to see it placed on the same basis as the third or fourth books. He also expressed the hope that High School expenses would be better equalized. Last year the County of Oxford paid \$300 and the Town of Woodstock \$2,000, while the number of pupils was about equal from each.

Mr. Crooks was repeatedly cheered during his speech, and all seemed to be pleased at having had the opportunity of hearing him. - Woodstock Sentinel.

2. MIDDLESEX TEACHERS' ASSOCIATION.

Under the auspices of the East Middlesex Teachers' Association, there was held in the City Hall last evening a meeting which was attended by about three hundred persons, mainly teachers, although there were several representatives of both City and County Councils and other citizens. The chair was assumed by Mayor Macdonald, while upon the platform were Hon. Adam Crooks, Bishop Hell-muth, Rev. Father Northgraves, Chairman Separate School Board, and others

Mayor Macdonald, in opening the meeting, spoke for a few minutes on the subject of education, and briefly referred to the great advantage it will be to the western section when it shall have a Normal

shool. He then introduced The Hon. Adam Crooks, Minister of Education, who, after a few introductory remarks, referred to the experiments of the past few years, and the lessons in education we had derived from the Continent of Europe and the United States. But of late years we had a good deal of experience, and the system of making the head of the Education Department amenable to the people has been followed. The speaker then proceeded to treat of the educational system of Ontario, which, while entirely undenominational, is fully capable of being carried out, while still inculcating the broad views of our national Christianity. The three great essential character-istics of our present education are its universality, its efficiency, and its economy. The advantage of education as a means of and his economy. The advantage of education as a means of raising a better feeling was next spoken of, the speaker believing that the country school house offers a greater antidote to crime than all our gaols and houses of refuge. The birthright of our children should be free entry into our school-houses. The general advantages of schools were next referred to, and the objects of schooling in general alluded to. At this point Mr. Crooks read a number of figures, showing the increase of money paid to support the schools to have been nearly doubled in ten years. An increase had also been observable in every line, and it is probable that expenditures in every department have been well spent, and the system is quite in accordance with progress. Understanding the principles upon which this progress was based, it is probable the expenditure will never be reduced. The question of compulsory attendance was next referred to, and this Mr. Crooks believed should not be adopted till all other means have failed. In this connection he quoted figures which went to show the attendance at school in England and Scotland under the different systems which prevail there, and remarked that the school attendance of Ontario is not so satisfactory as he could wish, and he thought well of the plan of making attendance for a specified number of days compulsory, as pro-vided for in Viscount Sandon's Bill, introduced into the British

for the higher education of those who desire it, and one to be the instruction of the youth of the country. The foundation of this was begun by our predecessors in the old country, who set apart large tracts of land for the support of the schools. He saw no better means of furthering the best interests of the people than the acquisition of higher education. The Scottish he took as a high standard of education, but even in this there is a possibility of great improvement, and in such large counties as Middlesex he questioned if Township Boards would not be an improvement upon the present system of School Sections. This is being tried in the County of Huron, and the results have so far been most satisfactory. This is, however, one of those propositions that require to be dis-cussed, and the trial of it has not yet been complete. The speaker next touched upon the qualifications of teachers, which he hoped would increase year by year, although the great bulk of this is sure to be thrown on the general Government. But higher education will involve the payment of higher salaries, but only nominally so. If men are worth money, they will obtain it in any business. Upon the head of raising the standard of teachers much remains to be done, in which connection the speaker read a number of statistics to show that there has been no appreciable progress made in the granting of first-class certificates, while in the second-class there has been a large decrease, this being made up by an increase in the third-class. This he thought should be remedied, and the third-class made a period of probation, whereas now we find a great many of them be-ing removed from town to town. Trustees should not be satisfied with this. There are now rewards for the teachers, and it only requires perseverance and ability in order to reach them. In conclusion, he thanked the audience for the kind attention given him. and said we should endeavour to make our educational system as universal as possible, for no system can be complete if the people

do not comprehend the benefits to be derived from it. (Applause.) Mr. G. W. Ross, M.P. for West Middlesex, was the next speaker. After referring complimentarily to the speech of the previous orator, he spoke of the large percentage who attend school in Canada—larger than anywhere else—there being one in about every three who are under instruction. In regard to the drawbacks to education, he said the greatest was the irregularity of attendance. The next was the unsuitability of teachers, and if we could "reconstruct" one-half of them we would have more efficient schools. He spoke this in no spirit of disparagement to the teachers, but they do not always realize the importance of their position. Scholars sometimes form habits which are injurious, and they would be more benefited if school did not keep at all. If we want our schools to be a benefit, we must put teachers in them whose authority will The teacher is put there to rule the scholars, and if he be felt. will cultivate the habit of unremitting attention among his pupils when they bear his control, the foundation will be laid, and Canada will produce such men in her public schools as she need never be ashamed of. He next criticised the habit some teachers have of doing problems instead of allowing pupils to do them. right—scholars should be left to their own resources. This is not Cultivate the natural abilities of pupils, and they will soon be able to take care of themselves. Cultivate independence of thought, for the progress of the world is more due to this than any other cause. Sir Isaac Newton and all the past astronomers have been men of independent thought, and this is necessary to greatness. Mr. Ross next referred to the pleasing lack of immorality in the class of teachers, paying a high compliment to the profession generally. He alluded to the necessity for more training, and advocated the building of another Normal School in Ontario. In this connection he cited some of the United States, where there are a great many more Nor-mal Schools than in Ontario; and why should we not spend \$100,000 in a Normal School? (Loud applause.) The speaker said he did not lay all stress upon the fact of a man holding a certain certificate-he should have his mind stored with the information to be gathered in all well-ordered libraries. Let every teacher feel that the great aim is the development of perfect man and womanhood, and if a teacher fully realizes his position he will labour with this object in view. In conclusion, he eloquently referred to the high mission of the teacher, and hoped all would so conduct themselves as to raise Canada in the eyes of the nations. (Applause.) Mr. B. Cronyn then read and moved the following resolution,

seconded by Mr. A Black : "*Resolved*—That in the opinion of this large and influential meeting (representing as it does a large number of those most deeply interested in the subject of education, both from the city and surrounding country) there is immediate necessity for increased Normal School accommodation to meet the urgent demand by securing trained teachers for our schools."

The mover spoke of the deep need of the Normal School, and

Schools, there being now a number of persons from West Middle who are attending the school at Ottawa. The speaker here read the speech of the Hon. Alexander Mackenzie as to a Normal School, he having said he was betraying no State secret in saying schools were to be erected at Ottawa, Kingston and London. (Loud ap-plause.) The speaker would say nothing as to the location, be-lieving the Government would do justice, merely laying before the Cabinet that London is a railway centre, fully believing they would carry out the views of Hon. Mr. Mackenzie, the present Premier. (Applause.) speech of the Hon. Alexander Mackenzie as to a Normal School,

(Applause.) Mr. Black, the seconder of the resolution, instanced the fact that there are few Normal School graduates in this vicinity, and the majority of these have come from the neighbourhood of Toronto. This, he thought, demonstrated that other Normal Schools are necessary, and he thought we deserved one in the western part of the Province as well as the eastern or central part. He believed the Government is disposed to give us our just dues. He was not advocating any particular locality, but speaking in a general sense as to the necessity of the school, although he did not think that with a search warrant a better location than London could be procured. (Laughter and applause,) He gave a number of statistic to show how far behind Ontario is in the matter of Normal Schools, it being shown that this Province has less Normal Schools than any other country. He believed the western part of Ontario will compare very favourably, either in wealth or intelligence, with either the central or eastern part, and he did not see that anything better could be done for the cause of education than the establishment of

a Normal School in the city of London. (Loud applause.) After a few remarks from the Hon. Mr. Crooks, as to why he was

Mr. B. Boyle moved a vote of thanks to the speakers, in the doing of which he spoke of the low remuneration given to teachers. Seconded by Rev. Father Northgraves, and unanimously carried.

Messrs. Crooks and Ross briefly replied, when, on motion of Mr. Dearness, seconded by Mr. Watterworth, a vote of thanks was given to the Mayor for his conduct of the meeting. This closed the very interesting meeting. -London Advertiser.

3. SCHOOL TEACHERS' CONVENTIONS.

The Association of Public School Teachers for East Middlese held on Friday and Saturday last, in this city, a meeting which was an unusually interesting one. The presence of the Minister of Education, the Hon. Adam Crooks, gave an eclat to the affair, and brought together a larger and more varied assemblage than what we are accustomed to witness on such occasions. The fact, too, that he was to address the meeting upon subjects connected with the teachers' profession, and with the general question of education is the Province, was another powerful source of attraction. The Associations, whether fully developed institutes, or still in an embryotic state, are becoming very common throughout the Province Few counties have not made such an attempt, and in a great many the a very satisfactory measure of success has been achieved. small amount of subscription payable by the teachers is never felt, and when judiciously managed serves to form the nucleus of and teachers' library, which goes on increasing in extent and useful-ness year by year. The books selected are, as a general thing, such as treat upon the uncontained of the data of the selected are. as treat upon the profession of teaching, handle professional subjects, or discuss subjects closely allied with the duties and pursuits of the teachers of the teachers.

That these periodic meetings of teachers are deemed impor-tant, and calculated to advance, directly or indirectly, the cause of education among us, is quite evident from the encourage ment given to such efforts both here and in the United States. the latter they have had a more lengthened existence, a wider his perience, a more thorough organization, and, consequently, are able to effect and have effected more important results than could reasonably be looked for in Ontario up to the present time. Among the enterprising people on our south are been been to be the present time. the enterprising people on our southern border these institutes have taken deep root, and may now be looked upon as a part, and a inconsiderable part, of the machinery which keeps the system of national education in a state of national education in a state of uniformly accelerated motion. These meetings stop not with a town, a city or a county, but at stated times delegates from the County Associations throughout the whole State will meet and discuss the state of the state o the whole State will meet and discuss such questions as may have appeared of the greatest importance and interest to some or all of the County Conventions. But to give a wider range still, and to concentrate and turn to account a more varied experience, these meetings assume occasionally a patient in the second states of the second states and the second states and the second states are the second states and the second states are second states are second states and states are second st meetings assume occasionally a national character, and on such or casions courteous invitational character, and on such in casions courteous invitations have been extended to, and in a few in-stances seconted by account of the stances seconted stances accepted by, some of the leading educationalists of Ontario was glad the Minister of Education had shown from his own re-marks that increased accommodation is necessary in the Normal principally of those engaged in the practical work of instruction in the United States, have done much to improve the tone of education⁹ to bring the system established in each State nearer and nearer to perfection both in theory and practice, elevate socially the dignity of the profession of teaching, secure a more complete recognition of the value of their services to the country, obtain a more liberal remuneration for their services, and render themselves, as the members of this profession—one of the highest in point of responsibility in the world—more and more worthy of the favour of a discerning and not ungrateful people.

In Ontario, too, the Government have in the past shown that they look upon Teachers' Institutes as capable of being made the intruments of much good to the country, and of advancing this cause which the people of Ontario have so much at heart. The very fact that the Minister of Education-who candidly admits that he has had to devote much time and study to mastering the complicated duties of an office to which he has been so recently appointed, and which were almost entirely new to him, and who cannot yet have become familiar with the affairs of so extensive a Department—has aready, on several occasions, left his departmental duties, attendthese meetings, delivered addresses to the assembled teachers, and showed a deep interest in all their proceedings. The Legislathere, too, have shown that they appreciate the value of such instithis to the cause of education in the Province, and have taken the only course in their power, without rendering their establishment obligatory and the attendance of the teachers compulsory, to encourage the formation and support of such associations. In the 130th clause of the Act of 1874, provision is made for the substantial encouragement of these organizations. This clause provides in the Words following for this purpose :-

"Out of certain grants authorized from time to time in aid of chools, and not otherwise expressly appropriated by law, the Lieutenant-Governor in Council may authorize the expenditure anually of such sums as may from time to time be voted by the Legislature for the purposes following."

Then we find under the sixth head of these "purposes," or parsculars for which this expenditure is authorized—

"For the encouragement of Teachers' Institutes." It is therefore plain, that the Legislature in their wisdom deemed it prudent, patriotic, and no doubt economic, too, that a part of the public funds should be devoted to encourage and help sustain such institutions as those we have been discussing.

Rhough has been said already to show that great improvement in the theory and practice of teaching may be expected to flow from well-organized Teachers' Institutes judiciously handled and enthusistically supported by the teachers themselves. There is no one hat ever covered all the wisdom in the world, and no one individual, ever even in pursuits much less diversified and complicated than that of the profession of teaching, has ever possessed all the knowledge, mastered all the details, made all possible improvements, and exbausted the entire field relating to any one branch of business or by single profession; and, therefore, in this special profession every member may be a worker, may examine with the greatest analyze with precision, reconstruct with skill, and contribute his discoveries and improvements to the general stock, and never auscoveries and improvements to the general stock, and nove exhaust the subject. By coming together face to face, new ideas upon important parts of the general question may be propagated, and these ideas may be used in further progress. Crude notions may have been been appreciated to the refining process of have these ideas may be used in further progress. Oruce notices have be presented, and these, submitted to the refining process of the philosophical criticism by the assembled teachers, may be takened out polished stones, fit for an honourable place in the struc-take they are engaged in building. Different methods of doing the takened work of accomplishing the same object will be confronted; work or of accomplishing the same object will be confronted ; the work or of accomplishing the same object will be control of a shore strong and weak points will be, by this means, subjected to a wore intense light, and, as a necessary result, the best parts of each will be retained and the less useful and efficient rejected. A closer approach the second second similarity of views will cerapproach to uniformity of method and similarity of views will cer-timily follow from these encounters and this comparing of notes, and a similarity follow from these encounters and this comparing of notes, as perfection is one and indivisible, we may safely assume that progress in this direction is being made. The better informed binds and the more skilful teachers will exercise a powerful influand the more skilful teachers will exercise a point of the second and the more skilful teachers will exercise a point of the second and the s d even without immediate design, they help to elevate their co-labourers, they are insensibly but surely improving themselves at the interest the corps of the body will be improved by this thereourse, and a most healthy and wholesome emulation will be traited and sustained; and thus, while the individual and the protestion are gradually but surely raised, the country which has so these on are gradually but surely raised, the country which has so these Total devoted a portion of its wealth to support and encourage Teachers' Institutes, will, as is only right, eventually reap or nearly all the benefit.—London Free Press.

III. Education Department at the Centennial.

1. ONTARIO EDUCATIONAL SYSTEM AT THE CENTEN-NIAL EXHIBITION.

Meritorious as the Pennsylvania educational display is, it falls far short of our own in some respects, while in general effect it has only the advantages derivable from greater extent and a better opportunity for arranging articles in an artistic fashion. The exhibition of apparatus of every kind from Ontario is far ahead of any exhibit from any other country, and will almost equal the whole of them together. Of specimens of pupils' work, on the other hand, we make a comparatively poor show, the exhibiting institutions being comparatively few. The principal part of the display in the Canadian Department is made by Ontario, the other Provinces doing very little. The chief feature of the Quebec portion is a collection of models of educational institutions on a very small scale, each being surrounded by grounds ornamented with trees like the ori-ginals. As works of art they are not bad, but are so diminutive as to appear out of place in an exhibition of our school systems, unless intended to be shown as specimens of pupils' work. A characteristic feature in all the exhibits is the multitude of models intended to illustrate the various kinds of school-house architecture and furniture now in vogue. Some of these models are large, wellproportioned and very expensive ; others are trashy enough. One of the best is to be found in the Ontario collection ; it is a model of a typical Collegiate Institute, and must have cost several hundreds of dollars. There are a few good ones to be found in the exhibits of the various States, but hardly any on so large and elaborate a scale. By special permission of the Director-General of the Exhibition, a wall has been erected for the purpose of giving a better opportunity to display the Ontario Educational Exhibit. This is a decided improvement to the whole Canadian Department, as it helps to relieve the dead sea of uniformity caused by the monotonous rows of rectangular cases prescribed by the Commissioners. The educational wall runs parallel with the principal nave, and cuts off the geological display from the rest of the Canadian show. It is 110ft. long and 30ft. high in the centre, where there is a large archway, through which the petroleum exhibit is visible in the background. The wall is surmounted by the Royal arms, the largest to be found in the whole Exhibition, while immediately over the archway are placed a scroll label with the Dominion and Ontario arms on shields and the arms The heavy cornice and all the ornaof the Department in relief. ments of the wall, together with the great majority of the articles on exhibition, including maps and apparatus, were made in To-ronto. Two smaller archways occur at some distance on either side of the main one. The wall is hung on the right with raised maps illustrative of physical geography, and on the left with ordinary school-room maps. On one side of the main archway a space has been set apart for specimens of pupils' work, for a collection of the seals of the English sovereigns from William the Conqueror to Victoria, and for philosophical apparatus; and on the other side for articles exhibited in connection with the Institute for the Blind, and additional apparatus. Near the archway is a revolving stand containing the photographs of school-houses throughout the Province, and another with pictures of colleges, universities, and other public buildings devoted to educational purposes. In front of the wall there are a number of glass cases filled with articles for exhibition, including a selection of library and prize books; apparatus illustrative of electricity, thermo-electricity, galvanism, light, heat, steam, pneumatics, hydrostatics and hydraulics; astronomical instruments ; a series of models for object lessons in Botany, Zoology, Mineralogy, Crystalography, &c. ; educational reports, drawing models, geometrical instruments, and chemical apparatus. The work of arrangement has been performed in a skilful manner by Dr. May, of the Educational Depository, and the Ontario Edu-cation Court as a whole, as well as in its details, may fairly be regarded as one of the most interesting displays in the whole build-ing. The amount of attention it receives from the general concourse of people who are travelling up and down the aisles, as well as from those interested in education on this side, is the best proof of its merits.-Globe.

In walking down the centre transept, when you come to a certain point, the attention is attracted by nothing so much as by the top

I have been longing all this time to come to the Education contrasts. In the Pennsylvania education building there is a representation of a school of the olden time. What a contrast this rickety old school to the schools of to-day ! Pennsylvania takes great pride in its schools, and the exhibition of models, maps, etc., is most creditable, as are those from the other States. I am happy to say, however, that the Canadian exhibit in the educational way takes the shine out of them all.

of an immense wall of ornamental design, surmounted by a handsome cornice, and pierced by three openings or arches. Over the centre arch is the English coat of arms, of large size-gilt-the smaller ones being crowned by an emblematic lamp of learning and pen-and-ink stand of "Brobdignagian proportions," to use the felicitous language of one of the officers. This wall or arch is 110 feet long and 30 feet high, and for it exceptional permission was given by the Director-General. It has on the middle inscribed "Educational Department, Ontario," beneath the Departmental coat of arms. On the left is the Dominion arms, and on the right those of Ontario, while at each extremity are busts of the Queen and the late Prince Albert. Will it be believed that all this is hidden away as much as it can be? "If," said an enthusiastic educationalist to me, "it has not been so costly as certain other triumphal arches at Paris, Milan, and elsewhere, it is really an arch of triumph more pleasant to contemplate, and giving birth to more pleasant associations." The idea of building this arch was a happy one, and is due to Dr. May. It is the only thing which in the least breaks the monotony of the cases sent from Lower Canada, and gives the means of exhibiting an immense quantity of educational appliances. It is completely covered with plane and raised maps made in Toronto, specimens and illustrations of botany, object lessons and natural history, drawing and writing copies, specimens and illustrations of the physical sciences, zoology, astronomy, &c., manufacture and natural productions, maps, and specimens of writing and drawing executed by pupils, the surface being multiplied immensely by hinged frames, screens and other contrivances.

In front are nine large glass cases, probably each 500 feet square, surmounted by busts and globes, one of which is thirty inches in diameter, made in Toronto. These cases are full of scientific apparatus of the latest and most varied character, a description of which would in itself fill a large volume, and for single specimens of the greater part of which we searched in vain throughout the building. In one are library and prize books, books for the education of teachers, text books for public and high schools, also a case devoted to the educational appliances for teaching the deaf and blind; another for object teaching, embracing ethnology, the va-rious classes of zoology, botany, mineralogy, geology, and crystallography ; another for the Kindergarten system ; others for optics, astronomy, electricity in all its various branches, chemistry, magnetism, galvanism, anatomical models, pneumatics, mechanics, hydraulics, meteorology, acoustics, &c. There are also stands on which are models, made to scale, of various public and collegiate school buildings in Ontario; large working models of stationary and locomotive engines ; school furniture, comprising desks, seats, &с. There are rotary stands seven feet high, each having twenty or thirty hinged frames for showing large-size photographs and drawings of school buildings in Ontario. Not less than ten thousand objects are exposed and rendered easy to examine. This depart-ment of the Canadian portion of the Exhibition has been arranged by and is under the superintendence of Dr. S. P. May, of the Educational Department, Toronto, who, with his assistants, has been busy at this work for the past three weeks.—Mail Correspondent.

The Mail correspondent at the Exhibition further writes :---"Sir Charles Reid visited the Educational Department, and showed the greatest interest. He remained for two hours. He said after his visit two years ago he expected a good educational exhibit from Ontario, but that the exhibit transcended all his expectations; and he took particulars of several articles to order for London schools. So impressed was one of the judges in the section of Instruments of Precision and Research with some of those in the Educational Department, that he wished to have them made a special exhibit. "Mr. Whiting, an English correspondent at Philadelphia, and a

"Mr. Whiting, an English correspondent at Philadelphia, and a writer of considerable repute, thus expressed himself with regard to the Canadian Department, in conversation with the Mail's special, a day or two ago :— 'Canada astonished me. She makes a great show. In every department she is represented, and well represented, and in the machinery department '—be it remembered Mr. Whiting was educated as an engineer— 'her display is perfectly wonderful. The tinest fire engine by a long way is sent from Canada. Her school exhibit is not only better than that from any State of this country, but it is the only thing which redeems the British school exhibit; and I have written this home.'"

2. THE CANADIAN SYSTEM OF PUBLIC INSTRUCTION.

On the Northern side of the Main Building there is an exhibit which is well deserving of the closest scrutiny, and the careful thought of every public-spirited citizen and visitor. It embodies the workings of the Educational Department of Ontario, and shows in a thorough manner the admirable system of training the young idea in vogue "across the border." It may not be generally understood that Canada is composed of two distinct provinces, one

Quebec, the other Ontario, the latter being formerly known as Up per Canada or Canada West. It has an Educational Court similar in its functions to the Department of Public Instruction in France and other countries, which being a branch of the Government pay the fullest attention to the tuition of the young. Being identified, therefore, with the best interests of the community this section of official work receives excellent handling, and as a result its school is equal to, if it does not exceed in quality that of any on the con-Philadelphia has splendid school-houses, but the methods tinent. of instruction practised in them are not, it must be confessed, com-parable to those adopted by the Canadian authorities. The exhibit made of this subject is arranged with commendable taste, and the effective manner with which it has been prepared, is due to the ex-ertions of Dr. S. P. May, of the Educational Department of To Eleven large cases are situated in the hall, and space is proronto. vided for special features upon a wall 30 feet high and 110 feet long The Educational court is represented by specimens of philosophical instruments, maps, charts, diagrams, text books, which are kept in the department for the purpose of supplying the public and high schools with material for the instruction of their pupils. By a special arrangement made by the Government of Ontario these articles are furnished to all those schools receiving government aid, at half their cost. This is one of the manifold advantages of the system, which works Da Maria which works, Dr. May says, to a charm. As an illustration of the cheapness with which the schools are supplied, English publication which are sold at one shilling sterling are provided to the schools at nine cents, Canadian Currency. The best arrangements are made both in Europe and this country with publishers, and then the Government discouse of them at 50 million in the discussion of the schools are stored at the schools are schools are stored at the schools are stored at the schools are schools are schools at the school at the the Government disposes of them at 50 per cent. of their original cost. For instance, a book which, in the retail trade here, bring \$1, is sold to the pupils for 35 cents. This plan encourages the prize system which it is contended is greatly superior to the library method, especially in the rural districts. It not only inspires emu lation among the children, but makes them ambitious, assists the book trade and creates a taste for reading. Prize books are much is esteemed, the youth struggles for them, and a healthy rivalry is formed, which leads to the best results. They are enabled to col-lect a good class of literature; the mental condition is improved, and, through government assistance, they are carried into spheres of usefulness which, otherwise, they would never reach. Samples of standard volumes, in bright, ornamental covers, are shown, in-cluding Chambers' Encyclopedia, bound in calf, and furnished at the rate of \$1 50 per copy, Hugh Miller's works for 35 cents do., and resplendent gilt back, half-calf books for 60 cents are colume. and resplendent gilt back, half-calf books for 60 cents per volume. The good work is attested in the Journal of Education and Ontario Education Reports, full sets of which are on hand, giving a history of the plans pursued from their inception to the present time.

From the Northern wall are suspended maps of the Hemispheres, Quebec, the United States and the general divisions of the earth, together with relief or raised maps, showing the physical features of the country, and charts and diagrams illustrating every branch of natural science, all of which were made in Ontario.

Two cases are devoted to the display of articles used in object teaching one of which is employed in the higher grades of school and including a collection of and including a collection of mammalia, birds, reptiles and finder, all Canadian and American in character. For ethnological instru-tion, there are burts of collected tion, there are busts of celebrated men representing every country, which are constantly before the pupils while they are studying, for help to serve to make firm impressions upon the memories. botanical tuition, models of flowers and plants are used in compo-tion with Gray's book of botany, an excellent American work teaching Zoology, Mineralogy and Conchology, small cabinets used, shewing specimens of the principal minerals and shells have their applications to the arts and sciences. In the schools where natural history is taught, cabinets containing two hundred spe mens of useful substances of food, medicine and clothing are en ployed and for the characteristic sector. ployed, and for the chemical departments another cabinet is used, provided with apparatus for performing two hundred experiments As an indication of their cheapness, it may be said that the former are disposed of to the schools for the scho are disposed of to the schools for \$5, while they would cost for brings. England : and the latter for the school for \$5, while they would cost for the school for \$5, while they would cost for the school for the schoo England; and the latter for the same price, while they would brief \$40 at retail here. Furthermore the \$40 at retail here. Furthermore, they are of the greatest utility and commend themselves to tutors everywhere. The kinder ten system is illustrated by diminutive models of bridges, rairoan and mining operations, which are beautiful in themselves, must be highly attractive to the youthful eye. Electricity, netism, galvanism and light, are created by interview. netism, galvanism and light, are created by instruments display in another case and adjacent to it is one containing preumate apparatus, embracing an air pump in which the cylinders are constructed of glass, the movement of the piston thereby being visible, also objects to show the employment of best and steam, are freely employed and a full line of these are displayed, as is aware that the time was extended in Arithmetic for a considerable also, a new instrument devoted to instruction in the latter branch of science, entitled the Helioconcentric Expositor of Terrestrial Motion, which is esteemed as an admirable addition to the improvements which are being made with such rapidity in educational pursuits.

Over the principal archway or entrafice to this section, is the British royal coat of arms, handsomely embellished and the largest in the building, and on either side of it is the shield of the Dominion arms and that of Ontario, while beneath the latter is displayed the coat of arms of the Education Department of the Government. All kinds of instruction for the conduct of school meetings and the regulations of instruction rooms prepared by the Deputy Minister of Education, are shown, and last of all, but perhaps most interesting, are samples of work done by pupils of the public schools, onsisting of pen and ink sketches, maps, drawings and writing which indicate the value attached to the modes of instruction if delphia Herald.

IV. Borthwick Ottawa Havestigation.

(Continued from page 73.)

John McMillan was sworn and examined by Mr. McDowall, Complainant :

Q -You are one of the Board of Examiners ? A. -Yes.

Q.—How long have you been an examiner? A.—Since the or-ganization of the Board in 1871.

Q-I would call your attention to the July examination, 1874. Were you aware that the time allowed for candidates to write on papers was extended at any time? A.—I think that in one case Mr. Parlow, who came in, I think, a little late, was allowed some two or three minutes after the usual time. That is all I know.

Q.—That was a first-class paper ? A.--Yes.

By Dr. Hodgins, Chairman :

Q. Do you remember what the regulation on that point is ? A.-Yes.

Q.-State it. A.-It is substantially that when a candidate is late he must take the consequences.

Q -Do you know the examiners have no power to extend the time ? A.-Yes.

Q—Were the examiners unanimous in extending it? –In our first-class examinations the Inspector has entire control.

Q-You were not present ? A.-Yes. We were examining seond-class papers.

9-You were not aware of it ? A.-I think Mr. Borthwick asked my opinion.

And what did you say? A.—I said we had either to cut have a low out of writing altogether, or allow him the option of

having the extended time. We knew very well it was contrary to the letter of instructions we had received.

Were broken in that point? A.—So far as I know, the only one.

Q-What were your reasons for it? A.—The case was a pecuhar one. We knew he would not be late without good reason. The reason given was a family one, and we had no option but to extend the time or cancel all his papers and send him out of the

He had passed other examinations? A.-Yes.

By Mr. McDowall, Complainant :

- Q. Are you aware that the time Mr. Parlow was late was fully hour on that occasion ? A.—No, he could not have been any thing like an hour.
- Q. Could you say half an hour ? A.-I would say it must have been less than half an hour. My impression is distinct that it was only two or three minutes.

He should have been there at nine ? A.-I don't remember the should have been there at this : A. I took the special hour that morning, but I am satisfied the extension was

only a few minutes at noon.

-Did you go home to your lunch ? A.-Yes.

Q-You left Mr. Parlow there? A.-Yes.

Then you don't know how long he remained ? A.-Mr. O Well and Mr. Borthwick were there.

Q. You don't know of your own personal knowledge? A. how the time agreed on was the requisite time tomake up the time $h_{0,k}$ he had lost.

Q - But personally you don't know that was enforced ? Λ_{-} No

time? A.-I am not.

By Dr. Hodgins, Chairman:

Q.-You were not in the room ? A.-I was.

By Mr. McDowall, Complainant :

Q.-Were in the room with Mr. Borthwick? A.-We had two rooms, and I might have been in one while Mr. Borthwick was in the other.

Q.-Did you go home to lunch when the Arithmetic examination was taking place ? A.-I generally went home for lunch.

Q.-Then, candidates could have remained while you were away ? -Yes, such a thing could occur.

By Mr. Hodgins :

Q.-Did the Arithmetic examination extend beyond the proper time? A.-Not that I am aware of.

Q.-In point of fact you know nothing about it ? A.-I could not say of my own knowledge.

examining the papers.

By Mr. McDowall, Complainant :

Q.-Do you remember Mr. Borthwick coming in to you and finding out what candidates had passed in Grammar during the examination for second-class certificates in July, 1874? A.-Mr. Borthwick has often done that during all the examinations.

Q.-Do you remember him asking how such a one was doing ? A.—No.

By Dr. Hodgins, Chairman:

Q.-You gave him no specific information on the subject? A. I am sure if Mr. Borthwick had asked for the information I would have given it. By Mr. McDowall, Complainant:

Q.-I suppose Mr. Borthwick could have found out from the papers how candidates stood ? A. -- Of course he had access to all the papers.

The Commission rose for recess.

Mr. Joseph Martin re-called, and examined by Mr. McDowall, Complainant :

Q.-Do you recollect going up with Mr. Small to dinner during the examination, and calling his attention to the answers written on the black-board ? A.- I spoke to him about it afterwards.

Q.-Were you in the room when you called his attention to it ? A.-I cannot say.

Q.-You told him afterwards that it was done? A.-I did not need to tell it him ; he was there to see.

Q.—But you talked the question over { A.—Yes. Q.—Who introduced it { A.—I cannot say. I know the discussion took place in the room in which the Natural Philosophy examinations were conducted.

Q.-Did it appear distinctly that he knew these answers were answers to the examination problems ? A .- Yes.

JOSEPH MARTIN.

Signed in presence of

J. GEO. HODGINS,

Commissioner.

Miss Belinda Gilmour sworn, and examined by Mr. McDowall, Complainant :

Q.-You were a candidate in 1874 for a second-class certificate ? -Yes. A

Q.-You are aware that the answers in Philosophy were on the black-board ? A.-Yes.

Q.---Who wrote them ? A.--I do not know.

 \tilde{Q} .—You did not see any one go up to the board and write them ? A.-I did not.

Q.-Were they there when you commenced your papers? A.do not know.

Q.-Did you take any notice to the writing ? A.-No, I did not

Q.-You would not be able to say whose it was ? A.-No, I could not say.

By Dr. Hodgins, Chairman :

Q.-Can you tell what the writing was answers to ? A.-To the problems in Natural Philosophy then under consideration.

By Mr. McDowall, Complainant:

Q.-About what time were these answers put upon the board ? -I do not remember. A.-

Q.-When did you notice them first? Have you no knowledge when you first saw them ? A.-I do not remember the time at all.

-You compared the answers with your own? A.-Yes.

Q.-Had you any of them worked when you saw the writing Q-In the same examination for second-class certificates, are you upon the board ? A.-I do not remember how many.

91

Q.-Are you aware that slips of paper were passed round to some of the candidates during the examination ? A.-Yes.

Q.—Did you get one ? A.—Yes. Q.—What was upon it ? A.—The answers to the questions in Arithmetic.

By Dr. Hodgins, Chairman: Q.—Have you the paper? A.—No. Q.—And I suppose you cannot produce it? A.—No. By Mr. McDowall, Complainant:

Q.—Who gave the paper to you ? A.—Mr. Borthwick. Q.—Did he take it back again ? A.—Yes. Q.—You copied the answers, I suppose ? A.—I did.

By Dr. Hodgins, Chairman :

Q.-When was this paper given ? A.-Near the close of the examination.

Q.—Before you handed in your papers? A.—Yes. By Mr. McDowall, Complainant:

Q.-Do you remember being in company with some ladies-Mr. Borthwick being present—and one of them wondering what would be the subject next day ? A.—Yes. Q.—Do you know who it was expressed the wish ? A.—No.

Q.—Have you any recollection of his answer? A.—Yes. Q.—What was it? A.—Something about counting our teeth.

-Was there anything else ? A.-I do not remember.

-Was there any other examiner present? A.-No.

Q.-You are certain this reply was made by Mr. Borthwick? A. -1 am.

Q.-The day the slips were passed round, have you any recollection of some of the candidates remaining in the room after the time ? A .--- I left before the time was up, having finished my questions.

Q.-Where did you go for luncheon ? A.-To one of the rooms up-stairs in the Central School West.

Q.-When did yeu return ? A.-I do not remember.

Q.-Do you remember approaching the examination room ? A. I do not.

Q.-Were you down in the lower flat at all ? A.-I was not.

Q.—Do you know if the doors of the examination rooms were locked ? A.—I think they were. They were generally kept locked.

Q.-Have you any distinct recollection on the day the piece of paper was given of returning with Mr. and Miss Rathwell? A.did not go home with them.

Q.—Do you say you did not go home with them at any time ? A.—I do not think I did.

By Mr. Gibb (Counsel for Mr. Borthwick) :

Q.-When these slips of paper were handed round, you had done some of your questions ? A.-Yes.

Q.—Then you had them on two pieces of paper. Had you made the calculations yourself ? A.—Yes. the calculations yourself ?

Q.-And compared them with the answers on the slip? A. —Yes.

BELINDA GILMOUR.

Signed in presence of P. LE SUEUR,

Commissioner.

The Commission took recess.

The Commission resumed the investigation at 7.30 P.M.

Dr. Hodgins-Is it necessary, Mr. Borthwick, to go further on

the 3rd, 4th, 5th and 6th charges ? Mr. Borthwick—I think so. I have not called any witnesses on my side.

 M_r . A. Smirle was called, and on being handed the Bible to be sworn, said: In the first place, before I take the oath, I would ask if I am obliged to come up here and give evidence ?

Dr. Hodgins-You can be obliged to come here and give any evidence the Chief Superintendent requires. I think you can be compelled to give evidence affecting the "interests or character" of your school, as required by the ninety-second section of the Act.

Mr. Smirle was then sworn, and examined by Mr. McDowall, **Complainant** :

Q.-Were you in the city during the July examinations ? A.-I was in occasionally.

Q.-Were you about the building during that time A.-Yes.

Q.-Did you go there in company with anybody at any time ? I cannot answer that positively.

A.-Q.-During the second-class examination did you? A.-I remember going with Mr. Martin, but I do not remember whether it was first or second class.

Q.-Did Mr. Martin and you board together at that time ? We did during the first, I cannot say whether we did during the second, but to the best of my recollection we did.

Q.—Did you go near the examination more than once ? A Oh_2 yes; I was there daily during the first class examination Q.—Were you there during the second class? A.—Occasionally. Q.—Could you say you were there more than four or five times?

A.—I could not say positively. By Dr. Hodgins, Chairman:

Q.-Did you go there as a candidate or merely to witness the examination ? A.-Merely to witness the examination.

By Mr. McDowall, Complainant : Q.-Were you in the second-class department while the candidates were writing? A .-- I passed through while they

writing. Q.—Did you notice any figuring on the black-board ? A.—Yes. Q.—Did you observe it ? A.—Not closely.

Q.-What was the nature of it ? A.-There was a row of figures, perpendicular down the board.

Q.-Was it numbered ? A.-I could not say.

Q.—How many rows were there ? A.—I could not say.

Q.-Could you say there were more than three ? A.-I could not swear to it.

Q.-Could you swear there was not as many as five ? A.could not swear as to the number.

Q.-Did you observe the writing ? A.-Not critically.

Q.—Did you observe it so much as to know whose handwriting it was ? A.-Perhaps if I had examined it more closely I could, but I could not swear to it.

By Mr. Le Sueur, Commissioner:

Q.-Did you take it to be any one person's writing ? A.-Not at the time. I may state my attention was called to the writing on the board.

Q.-By whom? A.-I could not say.

By Dr. Hodgins, Chairman :

Q.—By one of the candidates ? A.—Yes. Q.—How could you have come in contact with the candidates ? Q.—Who gave that permission ? The presiding examiner. Q.—Did he ask you the nature of your communication ? A.—I

cannot swear positively that he did or did not.

Dr. Hodgins-I can hardly imagine the Inspector allowing outsider to communicate with a candidate without knowing the nature of his communication.

By Mr. Le Sueur, Commissioner :

Q.—Don't you remember what you said ? A.—I had nothing more specially than to ask how the candidates were getting onwas interested in their examination. I did not consider there

Q.—From whom did you receive permission ? A.—From the presiding Inspector.

Q-Your attention having been called to the writing on black-board, what was its nature? A.—The answers to one of the

papers, either Mathematics or mixed Mathematics. Q.—How could you distinguish between the ordinary answer of school exercises and the questions then being worked ? A-

took the word of the person who called my attention to it. Q.—Did you examine it to see the character of the writing ?

Q.—Was it a lady you spoke to? A.—I cannot swear positively. By Mr. McDowall, Complainant:

Q.-Don't you know as a matter of fact that Mr. Martin was the

only gentleman among the candidates? A.-I could not sweet there was not another.

Q.-You don't think it was Mr. Martin called your attention I it? A.-1 might have said at the beginning it was a lady could give an opinion, and a very decided opinion, that it was a lady

but I could not swear positively.

By Dr. Hodgins, Chairman :

Q.-Did you know the party? A.-Yes, I knew all that were writing on the front seats.

Q.—Can you tell us what was written on the board ? A could not.

Q.-You could not tell us whether it was a demonstration it has an on simply the average of the second secon tenso or simply the answer to a question ? A.-I could say it has no appearance of a demonstration bet T no appearance of a demonstration, but I could not say it was the answers, because I did not arguing it answers, because I did not examine it.

By Mr. McDowall, Complainant: Q.—That person that called your attention to the writing on the board—did that person hand you a paper and ask "Is that worked right?" A.—No.

Q.—You have no recollection of that ? A.—I cannot remember. By Dr. Hodgins, Chairman :

Q.—Have you any recollection, distinct or otherwise ? A.—I don't recollect anything of that kind being done.

By Mr. McDowall, Complainant :

Q.—Do you not remember looking over it, and saying, "I think so," and the candidate saying, "Well, it is wrong," and you say-ing, "How do you know?" and the candidate referring you to the black-board ? A.—I have a recollection of a candidate referring to

the board. That was what brought it to my notice. Q.—And you recollect nothing else ? A.—It did not occur in that way.

By Dr. Hodgins, Chairman:

Q-Could you give any information on that point? A.-I could. I recollect asking a candidate how he or she was getting on. Q.-What was the reply ? A.-I could not give you a distinct answer. A reply was given which led me to say that I thought the answer was right. I was then referred to the black-board, but

I cannot say whether it was to prove that it was right or not. By Mr. McDowall, Complainant :

Q.-Your attention was called to it in that way?

A.—Yes. 9.—This was while the examination was going on ? A.—Yes.

Q.-Can you say whether it was an Arithmetic or a Natural

Philosophy question you were asked about ? A.-I cannot. Q .- Don't you think the time you were asked that question and the time your attention was called to the black-board were different times ? A.-I could not swear whether it was the same time or

different times.

By Dr. Hodgins, Chairman: Q.—You could not tell what was on the black-board? A.— You could not tell what was on the black-board? A. could not. I have a very indistinct recollection of it, and would have noticed it at all if my attention had not been called to it. I did not look through the question the candidate showed me, and did hot give an opinion that it was right or wrong.

0 What was the answer she gave you to what you said ?-A.-I could not state that.

Q-You know she made an answer? A.-I did not know whether the candidate answered directly or not.

 \mathbf{Q} —You must have looked at the black-board when your attention was called to it. Can you give us no evidence as to what it was that you saw there? Were they answers? A.—The candidate told me so.

Q-But you did not look at them sufficiently to know they were ? A. Not sufficiently to be positive. Possibly I could immediately after, but I cannot recollect at the present moment.

By Mr. Slack, Commissioner:

Q. —Didn't you compare one answer of the question with the other on the board ? A. —I did not. I did not examine the question with a view to ascertaining anything as to its correctness at 41.

By Mr. McDowall, Complainant :

Q -Didn't you and Mr. Martin have a conversation out in the as to the irregularity of these answers written on the board? didates speaking about it afterwards. I cannot remember having had a conversation of that description.

Q.-Had you no conversation with him on the subject that day? 4.--I could not swear.

Q. —Did not swear. the had failed entirely? A.—She stated that she had not been auccessful.

Q.—Who was it? A.—Miss Eliza Living. I have no recollec-tion who it was called my attention to the board, but I have a dis-tination who it was called my attention to the board being unable tinct recollection of Miss Living speaking to me about being unable to succeed in Arithmetic.

 $Q \rightarrow W$ as that during the examination ? A.—I would not swear that it was.

Q - That same day have you any recollection of going into the toom and seeing candidates writing during the noon hour? A.-

bave a recollection of candidates writing after twelve, but as to the time I could not swear.

Q. Was it between twelve and one? A. —Yes, nearer twelve than one.

Had you been to lunch with Mr. Martin and returned ? A. I could not say.

Have you no recollection of seeing the candidates writing ster dinner A.-No.

-You did after twelve ? A.-Yes.

Q. How long was it after twelve ; half an hour ? A. -- I think Pot.

Q.-Did Mr. Martin not call your attention to the clock ? A. I could not swear that he did.

Q. Have you no recollection of having a conversation in the hall with him at that time ? A.-I have not. I have a general Boollection of speaking to him on the subject.

Q.—Have you no recollection of talking with him that day or the distinct about candidates having their time extended ? A.—I have no distinct recollection.

By Dr. Hodgins, Chairman:

Q.-You saw persons writing after twelve o'clock ? A.-Yes, a short time after twelve by the ordinary time, but I cannot say whether it was the correct time.

Q.-What do you call a short time ? A.-I should call between five and ten minutes.

Q.-Had you any reason for going in ? A.-I had been in. I spoke frequently with the examiners during the examination. By Mr. McDowall, Complainant:

Q.—Then you appeared in the school-house somewhere in the neighbourhood of twelve o'clock ? A.—Yes.

Q.-Where did you come from? A.-I had been there the greater part of the forenoon.

Q.-And you have no distinct recollection when you went home ? A.-I have not.

Q.-Did you and Mr. Martin go home to lunch together ? A.-I could not swear we did.

Q .-- You know that the time was extended during the Arithmetic examination, but you cannot state how long? A.-I know it was extended, but I cannot say how long.

Q.-Do you not remember that after going home to dinner with Mr. Martin and coming back about fifteen minutes to one, you saw candidates writing ? A.-I have no recollection of seeing candidates writing after dinner.

Q. You have no recollection of having gone back after dinner ? A.-I have not. I went so often I could not be positive as to this occasion.

Q.-Have you any recollection one evening, as the candidates were leaving the room, Mr. Martin, Mr. Borthwick and some ladies being present, of one of the ladies expressing a desire to know what would be on the Physiology paper the next day, and Mr. Borthwick making an answer? A.-I have a recollection of the candidates in a jesting way saying to some one, I cannot say who, "What will we have to-morrow?" as they frequently do, without expecting to get information.

Q.—Was the reference not made to the Physiology paper ? A.—I cannot swear positively that I heard any of the candidates say what would be on the Physiology paper.

Q.—Do you remember the Inspector answering any of these ques-tions ? A.—I have no distinct recollection of Mr. Borthwick an-

swering any of those questions. Q.—Have you no recollection of his using the expression, "Count your teeth ?" A.—I have no recollection of Mr. Borthwick using A .-- I have no recollection of Mr. Borthwick using those words.

Q.—Did you hear anything about counting your teeth? Α.. Yes, but I cannot swear about what time or what person said it.

Q. -And you don't know who said it ? A.-I have no recollection that it was given as information. I recollect some of the can-

By Dr. Hodgins, Chairman:

Q.-Was there any other examiner present? A.-I could not say who was present. I think it was in the hall, but I cannot swear that Mr. Borthwick was there.

By. Mr. McDowall, Complainant:

Q.—Have you any distinct recollection of seeing Mr. Rathwell in the room when you saw the answers in Natural Philosophy on the board? A.—I don't swear that it was Natural Philosophy.

Q.-Well, when you saw the answers on the board, whatever they were, was Mr. Rathwell in the room ? A.-He may have been in the room.

Q.—Have you no distinct recollection of seeing him in the room ? -He may have passed through the room. By Dr. Hodgins, Chairman: A.-

Q.-Did you see him pass through the room ? A.-I cannot say

positively. I merely passed through the room ryself. By Mr. Gibb (Counsel for Mr. Borthwick): Q.—The word "extend" was used. I suppose you have no knowledge whether the time was extended on that occasion or not? A.-I have not.

Q.-Do you know of your own knowledge whether any arrangement was made that they should have a longer time ? A.-I have

no personal knowledge. Q.—Do you know whether the persons you saw there were work-ing or not? A.—I do not. I did not look to see that they were

working. Q.—Your testimony just amounts to this, that after twelve o'clock you saw some candidates in the room, but you do not know what they were doing ? A.-It amounts to that.

By Dr. Hodgins, Chairman :

 $\widetilde{\mathbf{Q}}$.-Were they writing? A.-I do not know. They were in their seats.

By Mr. Le Sueur, Commissioner -Q.—Did they look like people working ? A.—Yes. If I used

A. SMIRLE.

o'clock.

By Dr. Hodgins, Chairman :

Q.-What time should the examination have closed ? A.-At twelve o'clock.

Q.-You found those persons there after twelve ? A.-Yes, by my time-piece.

By Mr. Le Sueur, Commissioner :

Q.-I suppose your time-piece is correct? A.-I did not look at it, but I know it was after twelve o'clock.

Q.-There is a clock there. A.-I don't remember looking at it.

Q. -- I think you said you exchanged some remarks with some-body about writing on the black-board. I want to know whether the remarks were commendatory of the writing on the board or not? A.--I have no recollection of making any remarks in reference to the writing, either signifying my approval or disapproval. Q.-Was it a thing to be expected to see the writing ? A.-Not

if it were answers to the problems.

Signed in presence of .

J. GEORGE HODGINS,

Commissioner.

V. Extracts from Leriodicals and Lapers.

1. THE TRUE MACBETH.

Mr. Irving's original representation of the character of Macbeth, in which he broke loose entirely from its traditional interpretation, has excited a good deal of criticism of the play itself. Mr. Edward R. Russell, who is editor of the Liverpool *Post*, has published a paper which he read recently before the Literary and Philosophical Society of Liverpool, on the subject of "The True Macbeth." This we have now before us, and it contains about the best interpretation of the moral meaning of Macbeth that we remember ever to We cannot do better than reproduce for the benefit of have seen. our readers the gist of this gentleman's criticism. After touching upon the misinterpretation of Macbeth which arose from a mistaken analogy between that play and the Agamemnon of Æschylus, Mr. Russell says :--

Schlegel's Macbeth is "an ambitious but noble hero, yielding to a deep-laid hellish temptation." All the subsequent crimes to which the usurper is driven by necessity "cannot altogether eradicate the stamp of native heroism." His wife instigates him to commit the deed which the witches have suggested, " urging him on with fiery eloquence, which has at command all those sophisms that serve to throw a false splendour over crime." "Little more than the mere execution of it falls to the share of Macbeth ; he is driven into it in a tumult of fascination." "Repentance immediately follows, nay, even precedes the deed, and the sting of conscience leave him rest neither night nor day. But he is now fairly entangled in the snares of hell," and this-not any native characteristic of the man-makes him "cling with growing anxiety to his earthly existence the more miserable it becomes, and pitilessly remove out of the way whatever to his dark suspicious mind seems to threaten danger.

I read such an account of the play with a sensation of amazement, confusion, and absence of recognition, which I should think resembles incipient paralysis. I feel as Lady Teazle must have felt when dumbfounded Mrs. Surface gave Sir Peter that wonderful explanation of her being caught behind the screen in his library. The play does not support a single line of Schlegel's imaginative description of its motive. "Not one word, Sir Peter." The whole description of its motive. of it must be traversed.

To begin : Macbeth had conceived the murder before he met the This is proved by the language of his wife when Duncan witches. was in the house :-

What beast was't then That made you break this enterprise to me? Nor time nor place Did they adhere, but yet you would make both. They have made themselves, and that their fitness now Does unmake you.

Lady Macbeth did not quite understand her husband, but she understood him a great deal better than modern critics who take him for a hero. So strong-nerved and determined a woman, who would have scorned to contemplate a villany she dared not commit, could not be deceived in the signs of cowardice which her husband so plentifully exhibited. She knew him to be brave in the field—as many a moral coward has been before and since. She was even persuaded—wrongly—that if he were once crowned, he would be able to "keep his state" with a sufficient outward show of callous ma-

the word "extend," I merely meant that the time was after twelve instigation, was her function, and the necessity of it lay in the in herent baseness of Macbeth, who could neither be an honest man of valour, nor a valorous man of sin.

At first Lady Macbeth took a too favourable view of her lord's weakness. Some husbands show their wives only the best sides of their vices, as others show them the worst sides of their virtues, and it is a proverb, that many a spouse thinks well of her partner long after every one else has given him up. Such facts are quite beneath the notice of critics who cannot descend from the fixed stars of perpetual sublimity; but Shakespeare had a keen eye for them. When Macbeth had already confided to his consort his heroic idea of murdering the king—which, as he then proposed to make the opportunity, was the first and last heroic idea we know him to have had—and when she had thereafter received a letter from him talling the story of the witches the there the ital from him telling the story of the witches, she thus charitably apos trophised him

Glamis thou art, and Cawdor, and shalt be What thou art promised : yet do I fear thy nature ; It is too full o' the milk of human kindness To catch the nearest way : thou wouldst be great ; To catch the nearest way: thou wouldst be great; Art not without ambition, but without The illness should attend it: what thou wouldst highly That wouldst thou holily; wouldst not play false And yet wouldst wrongly win; thou'dst have, great Glamis, That which crise "Thus thou must do if thou have it;" And that which thou dost rather fear to do Than wishest should be undone.

So far as this is a picture of Macbeth's infirmity of will, it is a true one ; so far as it attributes that infirmity of will to generosity of nature, it is unsupported by anything else in the play, and in-deed will be found on close examination to break down in the very passage itself. Yet it is often quoted as a proof that Macbeth's wa a noble nature until spoiled by the witches and by his wife. prefer the theory that Lady Macbeth, who loved her husband strongly as she was determined to make him great, although she knew his weakness, held a too favourable view of its origin, and that what she took for the milk of human kindness was really the white The very discrepancy between the man's undoubted feather. and quite comprehensible weakness as presently revealed, and her complimentary way of explaining it, is full of significance most destructive to the amiable and heroic theory of his character.

If Shakespeare had intended Macbeth to be a noble and generous man led astray, nothing could have been easier to him, and the picture would have been a fine one. But that which he has given us, if less imposing, is not less interesting as a moral study. Take the speech at the beginning of the seventh scene. Surely at that moment a hero, and a well-disposed man, with his aged king under his noet the speech state of the seventh scene. his roof-tree, would have felt compunctions other than selfish ; and there is a passing reference to the circumstance that Duncan as guest was there in double trust. But the mean villain is not seriously He is troubled by other matters. The probaimpressed by this. bility that one murder will not suffice frets him. He says, if one murder would serve, he would not mind risking the life to come. But, unfortunately, retribution comes in this life. A cruel man in high place finds his example come home to him to plague the in ventor. Besides, King Duncan has been so amiable and exemplary that every one will bewail his loss and execrate his taking-off. the whole, therefore, the willing murderer does not like the look of things. This noble hero finds his project so likely to make him un popular, that he really wishes he had something besides ambition to urge him on. If Duncan had only insulted one now, or even been ungrateful, instead of loading one with honours, how comfort ably one could murder him ! But it was a bad world for Macbetha in those days, as it was for William Sikeses in this. Nothing went right. The king this (minibal the Sikeses in this. Nothing went right. The king this "misled but virtuous hero" particularly need ed to be rid of was so respectable and kindly that it could not but be a disgrace to kill him. Such are the sentiments of this speech, and they are argin and in the sentiments of this speech, and they are again and again exemplified. When Macbeth has had Banquo assassinated, he gives himself the airs of an injured man because the ghost appears at the support table. "Blood hath been shed ere now," he says querulously, "and when the brains were out the man would die, and there an end; but now they rise again and much us from our other. "Blood hath been and push us from our stools. This is more strange than such murder." That ideas of this sort are expressed in glorious poetry does not alter them. They are base, cowardly, paltry, as they are heartless and devid of all cover of the source of th heartless and devoid of all sense of true repulsion from evil.

Ugly as the business looked, when Duncan had arrived at the castle, Macbeth did not care to drop it, and he well knew his wife would not allow it to be abandoned. Accordingly, he gave her the cue for such stimulating arguments as model with the case cue for such stimulating arguments as would best meet the hu by proposing that they should proceed no farther. Duncan has honoured him. He had bought golden opinions from all sorts of people and these should be jesty. But she recognised the weak place in him, and saw that she people, and these should be worn in their newest gloss, not can an any away so scient. A very proper reflection, though not quite in the

14.144

「お果」のない

tone of a good man shrinking from a detestable action. Lady Macbeth answers him — answers him powerfully — answers him unanswerably. But how ? Schlegel tells us she uses the sophisms that throw a false splendour over crime. Nothing could be more untrue. She uses no sophisms at all-either here or in other Passages. I beg you, for we are now at the heart of the matter, to give your most attentive hearing to the argumentative part of Lady Macbeth's share in this conversation. "Was the hope drunk," 'she says-

Was the hope drunk Wherein you dressed yourself? hath it slept since? And wakes it now, to look so green and pale At what it did so freely ?

An admirable metaphor this : bold, realistic, and to the purpose ; appropriate to the moment and the scene, while the coarse revels of half-barbaric castle during a royal visit were actually ardible, as these two debated the miserable issue on which hung the life which of all others in the world they should have held sacred. "From this time," says Lady Macbeth, knowing her power over her hus-"From band, and probably seeing that her apt, rough simile has seized opon his quick imagination-

Such I account thy love. Art thou afeard To be the same in thine own act and valour As thou art in desire ? Wouldst thou have that Which thou esteem'st the ornament of life, And live a coward in thine own esteem, Letting "I dare not" wait upon "I would," Like the poor cat i' the adage !

If this plain speech needs a paraphrase, and perhaps it may, for Dr. Johnson said it contained no argument, it should run some-is back, and no cowardice ! Duncan has been just as good to you Vesterday. If there were any sound reason of policy why you should to not. You merely lack courage to do what you desire. Surely You are not so poor a creature as to prize the esteem of men with out deserving it ! Surely it is better that men should hate you in a Proud position, resolutely won, than that you should despise your-telf in a lower position, in which you remain, not from virtue, but trom cowardice. If you were a good man, and had religious scruples if you were a humane man, as I used to think you, and shrank from cruelty—I could understand you objecting. But this mere Paking, without any principle in it, is beneath contempt."

When you durst do it, then you were a man; And, to be more than what you were, you would

Be so much more the man.

Then Lady Macbeth-her mind fixed solely on her one principle, that if you are not prevented from perpetrating evil by scruples, it is contemptible to be hindered by mere fear or irresolution— bn contemptible to be ninuerou by more tone of a seriles how renonselessly she would have slaughtered her babe if she had sworn to to it. This produces a very slight effect on her husband. When she This produces a very sugne encount of her her back and him whether he was content to live like the poor cat i' the dage, she threw out one of those obvious light outworks of mowhich are prompt enough in most extempore defences against mptation—a line and a half which Dr. Johnson said must make area do more than becomes a man is none. But this is soon for-sources do more than becomes a man is none. But this is soon forsotten. While his wife has been talking of dashing her infant's while his wile has been being of the practical. they should fail." And then comes the most significant incident of As yet Macbeth has not the dream he needs. His wife's bold theory does not stimulate or assimilate with his mean intheory does not stimulate or assimilate mathematical to the stickingthe world's esteem as ever. He is not screwed to the sticking-the World's esteem as ever. He is not screwed to the sticking-the What happens? Lady Macbeth hints at the plan of putting What happens? Lady MacDeth muts at the press. I have a second proble character, whom The number of the drunken officers of the sing sources. Source the husband—this highly moral and noble character, whom only supernatural soliciting and a bad wife can bring within sight of an entropy of the source of the so of an evil project—is all agog.

Bring forth men-children only; Northy undaunted mettle should compose

Nothing but males.

With wonderful quickness he improves on his wife's dastardly aggestion :-

Will it not be received, When we have marked with blood those sleepy two Of his own chamber, and used their very daggers, That they have done't? LADY MACBETH.

Who dares receive it other, As we shall make our griefs and clamour roar Upon his death?

He is almost as comfortable as a man can be who is bent on a desperate enterprise, with hardly "virtue enough to be faithful to his own villany." "I am settled," he cries,

And bend up

Each corporal agent to this terrible feat. Away and mock the time with fairest show :

False face must hide what the false heart doth know.

After this, I must say that it seems to me too bad that it should be levelled at any actor as a reproach, that he makes Macbeth craven and abject. What is the man else ? What greatness has he except in the field—in vivid eloquence—and in a desperate death at bay ? It is no weakness indeed to shrink from crime. To recoil from a misdeed which promises wealth or power is to many a nature a task requiring vast strength of moral principle. No one would call Macbeth a coward for being horrified at the thought of murder. To break into the human temple and steal the life of the building must always be indescribably horrible. There is no image that any of us can conjure up that more thrills our moral sensations, though we may be barely able to conceive the feelings of a homicide. But Macbeth was meanly wicked, because his mind did not revolt from the deed, but only from its accompaniments and consequences.

At the same time, it must be confessed that in these two scenes, in which the character of Macbeth is fixed, the representation of Mr. Irving-which has been severely censured as too craven-does not exactly bring out the idea of the text. I hesitate to take objection lightly to anything in that wonderful performance, because it is superior, with all its faults, to any other that I have seen, and because I shrink from seeming to be among the crowd of empty depreciators by whom the steps of original greatness are always dogged. But in order to distinctly mark the true Macbeth, the new Macbeth must be rigidly as well as sympathetically scrutinized.

Now, it seems to me that while Irving has most truly and firmly caught the character of Macbeth, he has not quite so successfully apprehended Shakespeare's method of displaying that character. Shakespeare depends more on light and shade. Irving relies too much on a prevailing dun colour. His first scene is faultless. When the dim rocks of the witch-prelude have vanished, and the heath is revealed, upon which the returning generals meet the imperfect speakers who prophesy their fortunes, Macbeth enters on a rising ground, and the striking profile of the actor is seen clear-cut against the murky sky, as he gazes with the keenness a great general never quite lays aside across the gloomy country. He turns to the audience, and in a single gaze, as in "Hamlet," fixes the character of the whole performance. Is this right ? It would not be if Mac. beth were, according to the received notions, the amiable tool of a wicked woman and an irresistible destiny. But it is right, because the dramatist has given the actor the means of knowing beforehand the restless, acquisitive moral nature that lives within Macbeth's warlike exterior. As he stands there in clear outline against the lurid sky, no one could fancy him an ordinary successful gen-eral on his way home from victory to honour. There is more in him, and the overplus is high-reaching, gloomy, and mischievous. Such a disposition, insatiably ambitious, fretful over the need to do ill deeds in order to satisfy unbounded desires, but never genuinely turning away from temptation that promises advantage, is tinder for the sparks of the witches' promptings to fall on. At the first contact the glimmering tracery of evil suggestion flits and flutters through Macbeth's being. Honest Banquo-too little regarded by lovers of the play, one of the finest examples in poetry of unsmirched and unsmirchable humour in a mind quick to comprehend inducements to evil and to note the yieldings of others to brilliant temptation-honest Banquo sees almost everything that is passing through his colleague's mind. There is very little secret about it. Before he meets the witches, Macbeth has thought of murder. From the moment when they call him king he dwells on murder. From the instant when, being greeted Thane of Cawdor by the king's messenger, he has earnest of the fulfilment of their weird prophecy, he means murder.

2. THE ENGLISH EDUCATION BILL OF 1876.

On May 19th Lord Sandon explained the elaborate and somewhat complex provisions of the Ministerial Education Bill in a lucid and admirably arranged speech, which repeatedly elicited expressions of cordial approval from both sides of the House. It was quite understood that there can be no serious criticism of the Bill until it comes up for its second reading ; but the following are its main provisions. He said that although there was school accommodation for three millions and a quarter children, and a school population of 2,300,000, there were only 1,850,000 under instruction, so that 450,000 had to be accounted for. These were not to be found in the private adventure schools, and, in fact, he These happy thoughts are quite sufficient for the virtuous Macbeth. I country desired to give, however, was ready; there were the

1876.]

schools and there were the teachers; everything, in short except the children who ought to take advantage of it. To secure their the children who ought to take advantage of it. attendance at school, the present law was defective and inade-quate, and wanting both in simplicity and uniformity. Consequently some legislation was really needed on the subject. The proposal, then, which he had to make on behalf of the Government would, when it came to maturity in 1881, for it would be introduced gradually, present the following features :-- The country would still be free to establish School Boards with all their existing powers; but the Agricultural Children's Act would be repealed, and Town Councils and Boards of Guardians would be empowered, on the requisition of the ratepayers, to pass bye-laws, the same as School Boards were now, for enforcing school attendance for full or half time; but they would have no authority to establish schools. Again, no person would be allowed to employ a child under ten years of age, nor from ten to fourteen years of age, without a certificate of efficiency in reading, writing, arithmetic, or of having attended school two hundred and fifty times in each of the five previous years in not more than two elementary schools. By this arrangeyears in not more than two elementary solutions. I ment a child between ten and fourteen might be employed, pro-Councils and Boards of Guardians would enforce their authority through the action of school attendance committees; but they would not be permitted to interfere with regulated industries, such as workshops and mines. In the event of the local authorities not carrying out the provisions of the Act, power would be taken by the Government to appoint an officer to see that the Act was enforced for two years, at the expiration of which time the responsibility would recur to the local authority. With regard to "wastrels," children neglected and left to wander, it would be the duty of the local authority first to warn the parent, if there were no reasonable or just excuse for keeping the child from school. In case the warning was unheeded, he would then be brought before a court of summary jurisdiction, when he might be fined 5s., and in further default the child might be committed to a School of Industry. The object was, therefore, to put the whole responsibility for the children in the hands of the local authorities, who would have to carry out the measure and the Industrial Schools Act. Referring next to the case of poor districts, Lord Sandon defined these as districts in which a threepenny rate produced less than 6s. per child; and in such cases he proposed that the parliamentary grant might extend to double the school fees, rates, and subscriptions. The Bill would also deal with the subject of bye-elections to School Boards, and, following the precedent of the Seatch Act following the precedent of the Scotch Act, would empower the School Board itself to fill up an occasional vacancy. After describing other subsidiary proposals Lord Sandon commended his mea-sure to the approval of the House, as being at once cautious and bold, comprehensive and straightforward; and expressed a fervent hope that it would be successful in putting the coping-stone on the great work of national elementary education.

3. COMPULSORY EDUCATION IN ENGLAND.

England has 3,250,000 children that should be at school. these but 1,850,000 are under instruction, leaving 1,400,000 to be otherwise accounted for. This state of affairs in the educational world there is to be deplored, and was sufficient to justify the Government in bringing down a compulsory measure, intended to remedy the evil. Whether the details of the Bill will be sound in their principle and effective in their working remains to be seen, but they will doubtless provoke great discussion in the country as well as in Parliament. If the State has one duty more than another incumbent upon it, it is that of educating its people; and if it cannot be ac-complished by moral suasion being brought to bear on the refrac-tory parents and children, it should be by a little of the good old doctrine of compulsion. In England, as Lord Sandon said upon introducing the Bill, they have the schools and the teachers, but the children are wanting. It was proposed to supply them, by enforced attendance, by a system which will gradually come into effect until 1881, when it will be complete. Great powers are to be en-Great powers are to be entrusted to the local authorities, who, by by-laws, may compel the resident children to go to school either upon full or half time. No person would be permitted to employ a child between ten and fourteen years of age, unless it could produce a certificate of efficiency in reading, writing and arithmetic, or of having attended some ele-mentary school 250 times per annum in the five preceding years of its life. Where the local authorities are careless in the discharge of, or oblivious to their duties, a Government inspector is to be em-ployed for two years in strictly enforcing the Act, when the power is to revert to the local Boards. The Bill has many details, of no reat importance in this country, but, before dropping the subject, it may be well to remark that some of its best features are borrowed from the Scotch laws.-Hamilton Times.

VI. Departmental Notices.

1. MIDSUMMER VACATION IN PUBLIC SCHOOLS.

In view of the examination of candidates for Teachers' cer tificates occurring this year on the 10th July, and following days, and for other considerations, the Hon. the Minister of Education has decided to authorize the closing of the Public Schools for vacation on Friday, 7th July, instead of on the 15th.

3. EXAMINATION OF CANDIDATES FOR CERTIFI-CATES AS PUBLIC SCHOOL TEACHERS.

Under the regulations for the examinations, Monday, the 10th day of July, has been appointed by the Minister of Education for the commencement of the examinations of teachers for the current year, for certificates of the first, second and third class

VII. Advertisements.

St. Catharines' Collegiate Institute.

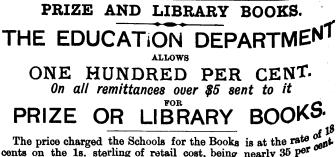

HEAD MASTER.-John Seath, B. A., Queen's, Ireland.

- TEACHING STAFF.—The Staff consists of eight experienced masters, four of whom are University Graduates, and the others hold the higher Grades of Certificates. Three are Medallists in their respective Departments.
- BUILDING. —The accommodation has recently been increased and greatly im-proved, and each Class-room is supplied with every educational re-quisite. The School contains a large Laboratory furnished with the best appliances for the study of Practical Science.
- Courses of STUDY. Pupils obtain a thorough English, Commercial, or Classical Education, and are prepared for University Matriculation Examinations, for the Preliminary Examinations of the Law Society and Medical Council, and for Teachers' Certificates of the 1st. 2nd Class.
- After the Summer vacation new classes will be organized in all the subjects required for Teachers' Certificates. A special class will be formed for young men who wish to begin Classics, and to advance more rapidly in their studies than they would in the Lower School. FEES.- School free to these who have passed the "Intermediate." Fee for other \$3 a term
- others \$3. a term.
- BOARD.-Board may be obtained at \$2.75 and \$3 a week in private families and in boarding-houses connected with the Institute. For Prospection address the Head-master.
- June 21st, 1876, St. Catharines.

free Zublic School Library Card.

A prepared by the Education Department, for the Public School Library card has just been prepared by the Education Department, for the Public School Libraries of the Province. It is 22 inches by 14 inches, is printed in gold and colours and presents two pleasing views of school life, viz: the distribution of Library books to the scholars, and the meeting of the children outside the School-House door after the distribution is over. Too often in our school-rooms the Library case stands with no distinguishing mark. One of these cards placed over the case gives the library attractive appearance.

Supplied at the People's Depository, at 55c. each when taken with library books, or 65c. each by post, postage paid.

cents on the 1s. sterling of retail cost, being nearly 35 per cent lower than the current retail prices of these Books.

Catalogues sent on application.

*** If Library and Prize Books be ordered, in addition to Maps and Apparatus, it will BE NECESSARY FOR THE TRUST TO SEND NOT LESS THAN five dollars additional for each class of books, &c., with the many for the second se books, &c., with the proper forms of application for each class

PRINTED FOR THE EDUCATION DEPARTMENT BY HUNTER, ROSE & CO.
