# TORONTO TRAVELERS | INDSAY W KILLED IN COLLISION

S. J. Hunt and R. A. Chapman Die in Their Berths When Rotary Snowplow Crashes Into Passenger Train at Macoun, Sask.

Two Toronto men, both commercial travelers, and very close friends, were killed in a wreck on the St. Paul & Sault Ste. Marie (Soo Line) Railroad at Macoun, Sask., early Saturday morning, when a rotary snow plow, motive, crashed into the rear of a standing passenger train. They were Samuel J. Hunt of 206 Grace-street, traveler for Saunders & Rowan, merchant tailors of West King-st., and Richard A. Chapman of 489 Ossingtonavenue, traveler for the Wampole Drug Co. of Perth, Ont.

They were the only persons killed. Mail Clerks Lewis Monahan and Greentally, and a porter named Coble were seriously injured, but will likely

Went Within a Mile of Exact Gang Had Ingenious Plan For One of the First Moves Will Be to Establish "Adelaide" Exchange -50,000 Feet of Floor Space.

The new five-storey building of the Bell Telephone Co., at 76 Adelaide-street west, will be opened on Monday. The business office staff moved to their new quarters Saturday afternoon, and about two months hence the long-distance operating staff, numbering about 200, will be transferred. The extension and exchange for nanamas down-town calls, to be known as the Adelaide Exchange, will follow the move. The present "main" and the construction force will remain in the Temperance-street building indefinitely.

The Adelaide St. building, which has just reached completion, was built at a cost of \$350,000, and is said to be one of the finest telephone buildings on the continent. It is of modern fireproof construction, and special attention has been paid to lighting and ventilation. It has a frontage of 100 feet on Adelaide-street and a depth of 150 feet.

The Temperance-street building has done service for nearly 20 years, during which time the number of subscribers has grown from 4000 to 20,000, and with Toronto's 20,000 increase in population per year, the old quarters have proved inadequate. The foor space in the new building is approximately 50,000 square feet, or three times the space they occupied before. Provision has been made so that the present five-storey edifice can be added to as the expansion of the company's business demands it.

Annual Prize Goes to Discovery of Cheap Process of Producing Aluminum.

NEW YORK, Jan. 21.—The Times says the American Society of Chemical Industry announces that the Perkin Medal, which is awarded annually for important discoveries in applied che istry, has been given this year to Chas.
M. Hall, who invented the process of producing aluminum at low cost. The medal was first given to Sir William Henry Perkin, who discovered the first coal tar dyes, on the occasion of his visit to this country in 1906.

#### EXPRESS RATES REDUCED

Only a Single Charge to Be Made on Packages Conveyed by Two Lines.

NEW YORK, Jan 21 .-- A reduction in express rates between all offices in Canada and the United States is to go into effect shortly. It is said that several of the Canadian companies have held back because customs regulations at the Canadian border necessitate so

at the Canadian border necessitate so much extra work that a reduction in existing lates would in many cases work a reat hardsmp.

All the important companies were represented, including the Adams, Canadian, American, National, Northein, southern, western, Pacific and United States Express companies, Wells-Fargo & Co., and the New York and Boston Despatch.

The announcement made follows in part: "instead of two companies which may handle an express package making a separate charge on each line, the charge will be the same as if one company had carried the package from snipping point to destination."

Mental Self-Culture. life in using up your mental energy. But I do suggest that you might, for a commencement, employ an hour and a-half every other evening in some important consecutive cultivation of the mind. You will still be left with three evenings to friends, bridge, tennis, domestic scenes, old reading, pipes, gardening, pottering and prize competitions. You will still have the terrific weulth of forty-four hours between 2 a. m. Saturday and 10 a. m. Monday. If you persevere you will soon want to pass gers. new English authors of high promise four evenings, and perhaps five, in blown into the writing line? No. You some sustained endeavor to be genuthink, but no name leaps out to that inely alive. And you will fall out of invitation. Perhaps the old favorites that habit of muttering to yourself at have nad ups and downs in the success 11.15 p. m.. "Time to be thinking about of their year's books, but even those going to bed." The man who begins surface changes have not been great. to go to bed forty minutes before he opens his bedroom door is bored: that literature, the setting of a fashion fresh is to say, he is not living. (Arnold in form if not in the ideas behind it? Bennett, in "How to Live on Twenty-Really all the good ideas have been four Hours a Day.")

Perspiration stains can be removed by rubbing with soap and laying the hope to do is to present one in a new by rubbing with soap and dress. No: there has not even been garment in the hot sun.

Origin in Germany.

May Be Trouble Here.

The heir to the throne of the Emperor of Austria, his nepnew, the Archicke Franz Ferdinand, who paid a flying visit to London for the funeral Rupert, and consequently a cousin of of King Edward, has a morganatic wife, who is now known as the Duchess of Hohenbeig. She has two sons—children of citat and six years—who, however, are barred from their father's rank and honors. There are people who say that this marriage may lead to trouble some of these fine days—meaning the rely that the Archduke, with the hatural partiality of a father, may take it into his h ad to a terpt to make one of these sons his full and legitimate heir. Perhaps so, perhaps not car please himself at last by giving the mater the constant one holds his consent then the constant one that it is never to the car please himself at last by giving the proved by M The expected rarely comes to pass, twelve months notice to the privy been proved by Mr. Louis Carpenter, There was once, long ago, a German prince, the Duke of Saxe-Meiningen, lish royalty marrying beneath his rank Saskatoon land office for a homestead. who fell so much in love with his bean- was in the case of the late Duke of Mr. Carpenter is strong, vigorous and tiful morganatic wife that he very bad- Cambridge, who married an actress, active, and he anxious to procure a by wanted to make her his full wife. by wanted to make her his full wife. who to k the name of Mrs. Fits-George. and her son the heir to the dukedom. # FATHER AND STEPMOTHER

Child Burned With Red Hot Spoon and Fingers Tied Till Blood Oozed Out.

"The step-mother appears to have taken a victous dislike to the child,"

"She punched the child arout the head and body, knocking her down; she burned her arms with a spoon specially heated for the purpose; she tiled her finger ends over until the blood oozed out, and she twisted her wrists until one of her arms was fractured. There were daily thrashings, and the child was seen with swollen eyes.

"She punched the child arout the head occasion, and there is no precent occasion, and the guided by. child was seen with swollen eyes.

On one occasion the step-mother caught her wrists and applied a hot iron to them, blistering the fiesh. On another, she heated a flat-iron and oranother, she heated a flat-from and or-dered her to put out her tongue. As the child would not open her mouth the woman heated a large spoon and forc-ed it between her lips, blistering her

"The twisting of the arms and wrists was repeated, causing the child excru-ciating pain, and she ran away, but he was taken home again, and the Illtreatment was resumed. The father struck her with a stick, and eventually she was found by the society in a shocking condition and removed to a

hospital."
The child herself described the treatment which she suffered.
"My mother hit me with a walkingstick on the bac kof the hand," she said. "Afterwards she used a copper stick and boxed my ears. She heated an fron on the gas stove and tuid me to put out my tongue. Then she burned my tongue with a spoon."

The shutting down of the whole plant and throwing out of work 1200 men is feared. The E. B. Eddy Company has shut down two pulp mills and a paper machine, throwing about thirty men out of work. The oftawa Electric and Ottawa and Hull Power Companies are also affected, and the former has to employ steam power as an auxiliary. If, as is feared, the water goes eith lower, 3000 will will lose their emerged force, and the whole of the mounted regiments now stationed in mounted regiments now stationed in England and Scotland will be requisitioned. By command of the Sailor King, about 3090 men of the royal navy will participate, and they will form the coverage of the royal procession. There will also be a large force of Royal Marines.

King George will wear the coronation robe of King Edward VII., and Queen Mary has decided to have her coronation dress made exclusively of liary. If, as is feared, the water goes still lower, 3000 will will lose their em-

OLD CITIZEN DIES Bakers, Succumbs in 86th Year.

Frank Middleton, 51 years a resident of Toronto, died at the home of his his 86th year.

Deceased will be widely remembered

in Toronto as being among the city's earliest bakers. He came from Staffordshire. England, in 1860, and in the following year opened a shop on the northeast corner of Queen and Chestnut-streets, whereon now stands the hordeen Hetal Later he conducted a Aberdeen Hotel. Later he conducted a bakery and confestionery store at 97 West Queen-st., until about 20 years

Deceased is survived by two sons, Edwin of Chicago, and Enoch of Toronto, and two daughters, Mrs. J. Taylor, 34 McCaul-st., and Mrs. Smith, 143 Dundas-st., with whom he has been living for the past ten years.

#### PROVINCIAL APPOINTMENTS.

Provincial appointments announced: Notary public, George Frank-land McFarland, Toronto, associate coroners, John P. Armour, Dr. William since the inception of the great mari-

Alex. W. Brodle of Aurora succeeds M. F. Boyle as clerk of the sixth dision court of York County. James A. Thompson of Port Hope succeeds the late Samuel Purser as clerk of the third division court of the United Counties of Northumberland and Durham.

#### HELPFUL HOUSEHOLD HINTS.

Do not use a brass kettle for cooking until it is thoroly cleaned with sait and vinegar.

To clean rusty and blackened knives, half a raw potate dipped in brick

When material is being dyed it should be stirred well. This allows the dy to penetrate to all parts alike, thus producing an even shade.

Never put meat directly on the ice, but always on a plate, as direct contact with the ice will destroy its flavor.

To take out dye stains from the hands, use cornment, pumice stone or fine sand; or a little chloride of lime in water. Many stains can be removed with vinegar or lemon juice.

Tumblers which have contained mlik should first be rinsed in cold water before washing in hot water.

for Christmas presents for his personal friends.

#### MAY BE THIRD THRONE FOR QUEEN ALEXANDRA

Queen Mother's Demand to Figure Prominently at Coronation Causes Friction.

of cruelty was told recently by an 11year-old girl named Mary Rankin, at
the southwestern police court, when
her father, James Rankin, a hairdresser, living at Woodland-road, Upper
Norwood, and her step-mother, were
accused of ill-treating her.

"The step-mother appears to have Alexandra and her daughter for the step-mother appears to have Alexandra and her daughter for the step-mother appears to have a living and her daughter for the step-mother appears to have Alexandra and her daughter for the step-mother appears to have a living and her daughter for the step-mother appears to have a living and her daughter for the step-mother appears to have a living and the step an LONDON, Jan. 21.-Altho no one in relations between the Queen Mother Alexandra and her daughter-in-law, Queen Mary, are not very friendly, to taken a vicious dislike to the child."
said Mr. Theharne, who prosecuted on behalf of the National Society for the Prevention of Cruelty to Children, "and to have subjected her to severe ill-treatment.

"She punched the child prout the head and body, knocking per down; she burned her arms with a spoon specially heated for the purpose; she tied her finger ends over until the blood oozed out, and she twisted her wrists until one of her arms was fractured.

Queen Alexandra, as the papers in variably call her now, because it has become known that she dislikes being called the queen mother, is a very broad-minded, liberal woman of the world, cosmopolitan in her tastes as was her late husband, hospitable and fond of pleasure. She heartly dislikes the stiff English court etiquette and likes to see herself surrounded by men and women of culture and artistic temperament.

Queen Mary, on the other side, is English to the core, heavy, like the at-mosphere of London, dislikes gayety and is inclined to be religious in the every form of pleasure, even of the in-nocent kind. In every way a practical, if rather prosaic woman, she is exceed, ingly fond of home life, devoid of all

A Mighty Spectacle. During the coronation celebrations London will rise to the full height of its imperial position as the centre of the empire. Within its borders will be drawn together the representatives of the King's dominions beyond the seas, the King's dominions beyond the seas, and it is a happy coincidence that the coronation year will witness the gathering of the imperial conference. A feature of the coronation pageant will be the presence of Indian native troops and detachments from forces in all parts of the empire. The Indian troops will be stationed at Hampton Court, and the other troops at Alexandra Palace. ace, as was the case when King Ed- Martin-Snead Case Concludes and

ously Hampers Big Lumber
and Power Companies.

OTTAWA, Jan. 21.—Unprecedentedly low water in the Ottawa River has seriously affected the big lumber and seriously affected the ser ward was crowned.

coronation dress made exclusively of British material.

London Will Surpass Itself. In the spectacular sense, London may be expected to surpass itself. # BAD YEAR FOR LLOYD'S

deen Liner Pericles, Valued With Cargo at \$3,250,000.

LONDON, Jan. 21.-The year 1910 will rank as one of the blackest in the history of Lloyds, blacker even than last year, which was one of the worst time-institution.

Dr. Rens Edyard Weston, Tilsonburg; Dr. Morris H. Kinney
the astonishing fact that the more prothe astonishing fact that the more prominent losses of the year alone account
for no less a sum than fifteen minion minent losses of the year alone account for no less a sum that, fifteen minion dollars. The minor causualties, however, make up in pumber what they lack in financial importance, with the result that they swell the total approximately to \$30,000,000.

The biggest loss of the year was undoubtedly the Aberdeen tiner Pericles, which sank after striking a sunken reef off the coast of Australia. The vessel carried a valuable cargo, which with the hull was valued at over \$3,-

Next in importance came the ilf-fated Lund liner Waratah, the claims on which, amounting to about \$1,500,000, were not settled until this year. The steamer Kurdistan, which foundered offe bound from Manchester to the Person Guif, also accounted for no less than \$1,500,000.

Father O'Malley's Tour. The Rev. Father O'Malley left Satur day morning for South Bend, Indiana, where he will deliver a series of lectures on Shaksperian play at Notre Dame University.

Recital by Captain Cockerill. A recital will be given next Thursday by Capt, Robert C. Cockerill and Miss Minnie L. Strachan. Capt. Cockerill, late of the India staff corps, is an experlenced singer. His singing is expressive and enunciation clear. Miss

Fish, lemons and cheese, or any J. P. Morgan bought 5000 \$1 eigurs strongly flavored food, should not be placed in the same compartment with milk and butter.

# TRADE PACT SETTLED

Negotiators Pledged To Secrecy

#### **ENVOYS COMING HOME** Evince Delight That Task Is Completed, and Hand Out Statement That Public Announcement Will Be Made

at Washington and Ottawa Next Thursday. WASHINGTON, Jan. 21.—With the simple announcement that an understanding had been reached, and that certain formalities probably. would be completed by Thursday, the commissioners representing Canada and the United States in the negotiation of a reciprocal trade agreement

adjourned to-day. At the conclusion of the meetings, the commissioners issued a joint statement. Further than this they positively refused to add a word on the subject, carrying out, it was said, a promise made in the meeting room, that the short statement, consisting of less than thaty words, would be all to be made public at this time. The official statement is as follows: "The negotiators have had an understanding, which, when

certain formalities are completed, will be made public at Washington and Ottawa. It is thought this may be done next Thursday. Asked if the statement that "certain formalities" would be completed

by next Thursday meant that Secretary Knox and the other American commissioners would go to Ottawa, the commissioners merely replied that to answer that question or any other would be a violation of confidence contained in the understanding agreed upon.

The fact was established that no more meetings would be held in

Washington. Hon. William Paterson, Canadian minister of customs, and Hon. W. S. Fielding, minister of finance, leave Washington to-day. The other Canadian representatives will depart to-day or to-morrow. The negotiations here began two weeks ago to-day. The undis-

guised delight of the commissioners when they adjourned, and the cordiality they exhibited toward one another, evidenced their satisfaction over

criminal intent, and had never coherent story about the death of her daughter to anybody. He told how Mrs. Martin had told that Ocey Snead had died of an overdose of morphine and had been given a cold bath in an vor to bring her to.

A Deliberate Crime. Prosecutor Mott said that as the investigation of the death of Ocey Snead had proceeded he had become more and more convinced that a deliberate crime had been committed-a crime in which all three sisters had played their little part. He said he had evidence show-ing that the sisters "hung over the body of Ocey like buzzards over a dying

Judge Teneyck said he saw no occasion for further delay in the case and would pronounce sentence on Monday next.

Railway Conductors' Ball.
The 26th annual ball of the Order of Railway Conductors, Divisions 17 and 345, held in the Temple Building Friday The dance program was generous, providing 24 turns, but the dinner was more so—without the turns. Among those present were James Oborne, general superintendent; V. A. Harshalle, superintendent district 2; J. K. McNeolie, superintendent district 2; J. J. J. Wilson W. Coulter, J. Walker, J. H. Wilson, Wm. Coulter, J. Troyer, G. E. Devenport, W. Hassard, H. C. Grout, J. Rafferty, Wm. Vandyke, A. E. Campbell, Charles Abbot and many others well known in railway

## HELYZE, COPPER KING IN PORCUPINE GOLD CAMP

Eminent Mining Authority May Take Interest in New Ontario Gold Fields.

PORCUPINE CITY, Jan. 19.—F. Augustus Heinze, Wall Street broker and
the world copper king, arrived at the
Shuniah Hotel this morning, making gent murror. Shuniah Hotel this morning, making gent purpose.

To think in a circle and make an open surrey with A. W, "Lucky" back and forth.

Scott of Los Angeles, Cal., and immediately retired.

To The World, Mr. Heinze said he was here to see how much gold Porcupine contained, and that he would first
look over the camp before making predictions.

the world, Mr. Telmos saw
or hitch your trousers—these things
are not industry.

Gents do these things, but gentlemen never.

And the difference between the gent The fact that men of the Heinze

standing in the commercial world are attracted to the gold camp, is considerered a factor, insomuch as at the least, present showings are alluring men with the money.

Mr. Helnze will be taken to the Dome, the Timmins, and Foster holdings to-morrow, where he will be given every opportunity of seeing the veins in the dykes, and showings made at the bottom of the shaft of all three of

these properties.

There is a feeling that Mr. Heinze, thru his friend and companion, "Lucky" Scott, may be considering the value of the Foster holdings and thereby be-

the Foster holdings and thereby become also a Porcupine operator.
Already his presence has stimulated
the backbone of the weak ones and
should the copper king become a bona
fide holder, it will mean volumes in
the development of the camp.

squised delight of the commissiones when they adjourned, and the cordinality they exhibited toward one another, evidenced their satisfaction over the outcome of their regolations.

In the proceedings in Washington, Canada has been represented by Hoff William S. Fielding, minister of finance: Hon. William Paterson, minister of customs; James A. Russell, tariff expert of the finance department, and John McDougald, deputy minister of customs of the Dominion. The United States representatives were: The Premier of the Cabinet, Philander, C. Knox, secretary of state: Chandler Anderson, counselor of the state department; Caralys M. Pepper of the bureau of rade relations, and Chief Montgomery of the bureau of customs.

#### Industry and Concentration

also is a physical action, a movement a vibration of the minute cells of the

Wandering, dreamy thought is just a bad habit, or, more properly, lack of good habit, for it leads nowhere.

To play the devil's tattoo on a chair, monkey with the forks and spoons at the table, adjust your necktie forty times a minute, stroke your moustache times a minute, stroke your moustache

and the gentleman is the difference between the man and the master-man. The master-man is simply a man who is master of one person—him-When you have mastered yourself you are then fit to take charge of

other people.

The master-man is a person who has evolved intelligent industry, concentra-tion, self-confidence, until these things have become the very habit of his

Industry in its highest sense means conscious, useful and intelligent effort. Carried to a certain point industry is healthful stimulation—it means circulation, good digestion, sound sleep.

The sensible man will ascertain his limitations and not carry his industry to the point of exhaustion.

Before he is tired out he will turn his attention to something else and find rest in change.

The ability to concentrate requires

so fluffy and funny! Have a care what kind of habits you are evolving soon you will be in their power; and they may eat you up. It is habit that chains

ject to the will of others. And it is habit that gives mastership of yourself and others

Industry is a habit. Men who go to bed any old time and get up when they feel like it are never industrious worse, they are never healthy.

Muldoon says that the man who has to get up at 6 o'clock in the morning never has insomnia

If you have to get up at 6 o'clock you'll go to bed at 10 o'clock, and this

means you'll get the habit of going to

If you acquire the habit of reading and studying good books from 7.80 to

Sale.

9.30 six evenings a week you'll so find it delightful habit. I know a great writer in England who writes every morning from 8 to 11, and he writes at no other time. He has acquired the habit. At 8 o'clock his brain begins to fire up, and he finds it easy and pleasurable—necessary—to concentrate on his work.

The habit of self-confidence is a result of the habits of industry and concentration. And I hope we have made it clear that concentration is the result

that for industry to be of the first quality the person must at times relax and find rest in change thru play-be a child—run, frolic, dig in the gar-

When you have reached a point where your work gives you a great, quiet joy, and thru this joy and interest you concentrate, then comes self-confidence. You are now well on the road to mastership.

Robert Louis Stevenson said. "I good work."
The recipe for self-confidence is: Do

good work.
"Courage," says Emerson, "comes, from having done the same thing be-A man who does good work does not have to talk, apologize or explain his work speaks. And even the there be no one to appreciate it the man feels it a great, quiet joy. He relaxes, turn smiles, rests, fully intent on taking up and his labors to-morrow and doing better

than ever.
The highest reward that God gives us for doing good work is the ability to do more work and better work. Rest means rust.

So we get the formula: Acquire and evolve physical and mental industry by doing certain things at certain hours, ceasing the effort before it be-

hours, ceasing the effort before it becomes wearisome.

In mental work keep in touch with people who are a little beyond you. The joy and satisfaction of successful effort—overcoming obstacles, gsting lessons, mastering details which we once thought difficult, evolves into a habit and gives concentration, Industry and concentration fixed in a character as habits means self-oon-fidence.

Industry, concentration and self-coufidence spell mastership.
So from the man we get the masterman. What lies beyond I do not know. shall know—one stage at a time is enough. If there isn't time in this life, perhaps then will be thereafter.—III-bert Hubbard.

The Upright Man. The man of life upright
Whose guiltless heart is free Or thought of vanity;

The man whose silent days In harmless joys are spent, Whose hopes cannot delude Nor sorrow discontent; That man needs neither tower Nor armor for defense, Nor secret vaults to fly From thunder's violence.

He only can behold With unaffrighted eyes The horrors of the deep And terrors of the skies. Thus scorning all the cares That fate or fortune brings,

He makes the heaven his book. His wisdom heavenly things; Good thoughts his only friends, His wealth a well-spent age, The earth his sober inn And quiet pligrimage.-Campion

-Another Man Injured.

PORCUPINE CITY, Jan. 21.—(Spe-made the under dog. cial.)—The first fatal accident charged up to mine work in the camp took place at 3 o'clock this afternoon, when Fred Carroll, single, of Sudbury, was badly injured, while Albert Burnett of St. Eugene, near Montreal, also single, was almost instantly killed.

The accident occurred on the Mornington claims, three miles down from the Tisdale line, in the Township of Doloro. The men were working in the bottom of a 15-foot shaft, when the plosion was terrific and Burnett was orribly mangled, death following. Carroll is badly burned on the left side of the face and may lose the left eye. The right leg is broken above the

## HOW TO GROW HAIR

BY A SPECIALIST.

Thousands of people suffer from baldness and falling hair who, having tried hair grower without results, have resigned themselves to baldness and its attendant discomfort. Yet their case is not bopeless; the following simple home prescription has made hair grow after years of baldness, and is also unequaled for restring gray hair to its original color, stopping haif from falling out, and destroying the dandruff germ. It will not make the hair greasy, and can be put up by any druggist; Bay rum, 6 ounces; Lavona de Composee, 2 ounces; Menthol Crystals, one-half drachm. If you wish it perfumed, add haif to one teaspoonful of To-Kalon Perfume, which unites perfectly with the other ingredients. This preparation is nighly recommended by physicians and specialists, and is absolutely harmless, as it contains none of the poiscneus wood alcohol so frequently found in hair tonics. Do not apply to the face or where hair is not desired.

The inspector was visiting one of the money to buy the books they so much Would it not be well for church. schools and just before he left the people's societies to take this matter room he wished to leave a drop of good up by getting into communication with and west? The older districts can well and women. Prompted by this good newer districts are supplied with the the missionary and people of to-day are, so will be the care enship of northern and western Canada twenty years from now. A nation need not perish for want of gold or of wheat or of pulpwood. It surely will go down because of ignorance and the want of ideas. The library of up-to-date books will prove people alike. Even a minister cannot make bricks without straw or good sermons without the helpful aid of good modern literature. SIGNIFICANT.

thorobreds of this province, and Brook-

Altho the winter has been cold here. There has been pienty of snow, and the exercising paddocks and helds have been in spiendid shape for the feet and legs of both old and young horses. With the thermometer legistering zero and snow a foot doen it looks rather. With the thermometer registering zero and snow a foot deep, it looks rather hard to see horses turned out, but when they return after an hour's racing and playing with nostrils extended you conclude that it beats the tresh air treatment at a sanitarium. It certainly is a healthler treatment than working horses on covered tracks, the plan adopted by some horsemen across the line. There is not a horse coughing in the stable, and they are all high in flesh.

No Plate Candidates This Year.

The stable will have no entry this year for the Plate. There was only one province-bred the required age, but not showing the necessary speed, as was sold to Mr. Sifton, and is expected was sold to Mr. Sifton, and is expected to the stable of the second stable of the stable of the second sta

was sold to Mr. Sitton, and is expected to make a show saddle-horse or jumper. Next year Johnny expects to be right there when the Plate is decided, as he is keeping five of his two-year-olds as entries. The Sain colt, Heresy, has all the appearances of being the best Plater ever entered from

cided, as he is keeping five of his twoyear-olds as entries. The Sain colt,
Heresy, has all the appearances of being the best Plater ever entered from
here.

Last Year's String.

Only four of last-year's racing string
are still here—Chief Kee, 4 years, by
Alloway—Decade: Solid Comfort, 3
years, by Voter—Content: Coal Shoot,
a years, by Sir Dixon—Meridian. Chief
Kee has wintered well and shows no
signs of the lameness that bothered
him last season. Ar. Dyment is not
very sure that the Chief's lamness is
permanently cured, as the veterinary
was not able to locate the ailment, and
he fears it may be in the fetlock and
might bother the horse again when the
strenuous training begins. By beating Mr. Seagram's Bouquet in Toronto.
and winning the Hamilton Derby, Chief
Kee showed his class last season, and
he will be given a careful preparation
this spring for his stake engagements.
The little Voter filly, Solid Comfort,
is not growing as well as could be expected, but she is filling out well. After
a bad attack of fever at the spring
meeting in Toronto, she showed her
mettle as a sprinter, and it is expected
it will take a good one to beat her in
the short races this year.

Splendid Two-Year-Oids.

Splendid Two-Year-Olds.

The two-year-olds are a fine lot. Marcoval. by Caesarian. out of the beautiful Hamburg mare. Lady Black, is a fine specimen of the thorobred, and his owner says he is as good as he looks. He showed more speed last fall than any of the lit, and will be raded this season. His sire is not a producer of distance horses, so Jack, appayently wisely, does not intend to take any chances training him for the Plate. He is a well-developed colt. With a world of speed, and should win brackets for himself this season.

The Sain colt, Heresy, out of another Hamburg mare, Hera, tho not showing the speed of Marcoval, has all the earmarks of a good one. He is of splendid conformation, and in his works last fall showed all the courage and bull-dog spirit of his famous relative, Jack Atkin. drill in the various resumed forthwith order has been ow on there must. The men are to until further notice. of the Progressive n Friday evening. ntario Assessment d under the leader-

Rush Order, a colt by Tongorder, out of Flying Bess, and Tropeoleum by Nasturtium—Fair Annette, are a siashing pair. They are big enough and well enough developed at present to follow the hounds. The stable boys are sweet on the Nasturtium colt as a Plate candidate. They say no distance is too far for him, and the way ne leads his mates thru the snow-covered fields has earned him the stable name of Moose.

fields has earned him the stable haine of Moose.

Sealed Order, a beautiful brown filly by Tongorder, out of Miss Morgan, is as fine a filly as the Brookdale Farm ever produced. This mare comes honestly by her good looks, as the St. Blaise mare, Miss Morgan, is as nice a turned mare as there is in the country, and Tongerder is a smooth horse. When you question Jockey Wilson about this mare's speed, he says he's sorry there will be no bookmakers at Toronto next spring, for he would rather get their money when this filly goes to the post than take it out of the parf-mutuels.

Another filly that should have speed, Morgan.
Marion L. (filly), Fort Hunter—Papinta.
Orion (filly), Star Shoot—Cold Wave.
Miniwaska (filly), Sir Dixon—Baroness Pepper.
Vearlings—

#### INTER-FACULTY SWIM HELD AT VARSITY GYM

Winners to Compete Against Mc Gill Next Saturday-Water Polo Game.

A few years ago if there were two or three yearlings at Brookdale Farm, genial Jack thought he was in luck.

hips and stiffes, clean hocks and plenty of bone. An English horseman visiting here a short time ago said he had seen fe woolts to equal him. He is by Tongorder, out of the successful brood mare, Grandma, by Riley. A stable that has turned out such champion province-breds and record-holders as Flying Bess, Jessamine Porter. Sapper and Wenlock naturally feels proud of what looks its best product. He was foaled Jan. 5, 1910. Nothing like getting them early.

Next in esteem to the Tongorder youngster is the Sain filly out of Elf. the dam of that great race-horse, Broomstick, and a colt by Planutess—Cold Wave.

The fillies are all named after the Russian dancers that recently appeared at Massey Hall. When you ask the stable boys to name them they just sheeze. What a time the bookmakers would have with that lot.

The Stallions.

The stallions, Red Fox, by the great Second team—Goal, Van Gunten; back, Rutherford; centre, Urquhart; forwards, Kendall and Corsen.

#### TENNIS CHAMPIONSHIPS IN OTTAWA THIS YEAR

Annual Meeting of Canadian Lawn Tennis Association Held Saturday at Queen's Hotel.

At the annual meeting of the Canadian Lawn Tennis Association, held in the Queen's Hotel on Saturday evening, some proposals were introduced for making the association more national in its scope. The most impartial recommendation was that of W. F. Summerhayes, who urged that representatives from every province in Canada should compete in the annual contests for the Dominion tennis champlenship. Hitherto the aspirants for Dominion honors have almost without exception been from Montreal, Toronto and Ottawa, none of the other provinces getting enthusiastic enough to send competitors. Mr. Summerhayes contended that every province should hold contests for the provincial championship as early as possible, and let the winners all compete in the grand finale for the Dominion laurels. With McGill—College Athletics.

KINGSTON, Jan. 21.—First-class instructor will be secured by Queen's Boxing and Wrestling Club for their workout in preparations for the tournament in Montreal next month.

Dobson will be with Queen's hockey team in its game with McGill in Montreal next Friday evening and the Presbyterians are hopeful of defeating McGill's seven in view of the beating Varsity gave the easterners on Toronto ice. Friday evening. Never yet have either British Columbia

Arranged to Play Off Tis.

The O. H. A: sub-committee Saturday arranged the play-off in Section A, Group No. 11, junior series, where there is a three-cornered tie, as follows:

Tuesday, Jan. 24—Midland v. Penetang, at Orillia.

Friday, Jan. 27—Winner to play Orillia on neutral ice, at Barrie, if Midland wins; at Midland, if Penetang wins.

The junior game, Berlin v. Galt, scheduel for Monday, has been postponed until the 3ist.

St. Paul's team, not having any chance to win their final game in the district, to win their final game in the district, arranged to Play Off Tis.

ATHENS, Jan. 21.—Newboro defeated Athens in the Leeds County Hockey League to-day at Newboro. Athens ran a special train, sending a good crowd. At half-time the score was 10-to 4 in favor of Newboro. The line-up:
A h ns 8—Goa, Sly; point, W. M. L. an; cover, DeWolfer rover, Rappelle; ceatre, Gifford: left wing, Scott: right wing; J. McLean.

Magdalen signifies "one from Mag-dala." Magdala was the Latin name for a Palestine village, which the Ho-brews called "Migdal," meaning "town er." The place is now known as El

ciation Directors.

#### Bowling Chat

Parkdales took the first series of the City League when they made it sure on Tuesday night by handing a whitewash dose to the College five. The Athenacums made it a close thing towards the finish of the race, after Parkdales had practically run away with the series early in the season.

The Business Men's League first series is closed as far as the first position is concerned, and Eatonias are the honored ones. The second and third posttions are yet to be decided, and should the Langmuir Paint crowd get a threegame decision over Emmett Shoes they will take the place morley.

The Rowing Club have jumped into the limelight with a vengeance. They have a Three-man League, a City Twoman team, and now it is rumored that they will be there with a Class A team, all of their own.

The Daily World don't seem to be satisfied in letting The Mail run, away with the second series of the morning section of the Printers' League. On Monday last they took three games from The Globe, and are now only one game behind the leaders. To-morrow afternoon will tell who is to hold the lead for another week at least, when the two rivals for the top position will hook up in a league game.

Billy McMillan boosted the Brunswick individual high total for tengames by 46 pins, when he put in 2002 for his string in the week just past. McMillan is sure hitting them in this competition now.

Three rollers were over the 600-mark during the week, as follows: Wells. Gladstones, 648; Leslië, Robins, 605, and Wilkes, MacLeans, 604.

A special meeting of the members of the Royal Canadian Bicycle Club will be held on Wednesday night to talk over the bowling situation. Several of the Royal bowlers think that something can and should be done in regards to bettering the championship holders, and that they should not be so far down in the standing.

Somerville Bowling League.

The finals of the Somerville Bowling League were rolled off Thursday night, the Spare Ribs and Swankers corralling two each from the Gazooks and Brancho Busters, respectively. Fred Somerville, the honorary president, had a busy half hour in presenting the following prizes:

West End Hapenings.

Friday afternoon saw the high school boys of West End hard at it, each team working hard in the struggle for supremacy, the card for the day being basketball. Fast games were in order, and a good brand of ball was delivered, as each team made it a point to have their best men out. This grade will furnish a squad in German horse work to represent them in the Boys' Club gymnasium display to be held in the gymnasium on Wednesday next.

At 7 p.m. the gym again rang with enthusiam when the junior employed boys took the floor an dstarted in pursuance of team honors, the events being two-lap walk, 60-yard potato race and fence vauit, the stars of the evening being Macdonald, Bridel and Garratt in their respective events. These boys will have two strong basketbaff teams to fepresent them on Wednesday next.

Toronto Horses for England.

Great preparations are already being made for the Coronation alorse Show at the Olympia this summer, and Canada will be well represented, as the English papers state that Lieutenant Sifton and Captain Douglas Young are bringing a strong team from Canada.

Sifton and Captain Douglas Young are bringing, a strong team from Canada while Hon. Adam Seck of London, Only, will be there with his hunters, and Messrs. Crow & Murray of Taronto will take some of their famous jumpers. Hon. Adam Beck has been appointed to act as judge for Canada. Hon, Clifford Sifton will show the following horses, obtained by him from Messrs. Crow & Murray: Allen, Hurst, Stayaway, Glenwood, Lath Post (bred by Col. Hendrie), and Gray Wasp.

The Cause of Their Pride.

"I met some Rhode Island people last summer who seemed to think they were a little better than folks who lived on the other side of their old State line. I don't see what they have

got to be proud of."
"Well, they have Providence on their

night?"

West End Hapenings.

the various race meets, has arrived in Indianapolis from Detroit, where he has been spending the holiday vacation at his home. He stated that two of the monster Buick model 100 cars which were the sensation of speed events last year, would be entered in the 500-mile International Sweepstakes race at the local speedway next May. The entries, local speedway next May. The entries, he sald, would be sent on from New York within the next week or ten days. "Wild Bob" Burman, and Arthur Chevrolet will be nominated to drive here and after that will go abroad to take part in the French Grand Prize race over the Sarthe circuit. Dr. Warren gave the information that Louis ren gave the information that Louis Chevrolet, who suffered severe injuries in the 1910 Vanderbilt Cup race,

busy haif hour in presenting the following prizes:
First—Gold lockets, won by Drumsticks. Second—Fobs, won by Spare Ribs. Highest total number of pins for season—Safety razor given by Fred Somerville, and won by A. Petnick. High single game—Safety razor, given by Lorne Somerville, and won by L. P. Cadieux. High individual game—Tie pins, given by Jack Somerville, and won by Spare Ribs. High team total pins for season—Jackknives, given by W. Keating, and won by Drumsticks. Booble—Won by the Cheese Nibblers. This only constitutes a few of the many valuable prizes given. After fefreshments were served (a la carte), a vote of thanks was tendered Messrs. Somerville, Limited, for their liberal support. Three rousing cheers wergiven as a signal for dispersing. team's cars. A Fish Story. "Don't you know that fishing is forbidden in this pond?"
"I'm not fishing; I'm just teaching my worms to swim.

#### SPORT NOTES

player underwent an operation at noon Saturday, and it is believed the leg can be saved, altho badly smashed. In a mixup with another player, O'Leary's skate caught in the board at the side of the rink, and he went down. The accident happened in a very simple manner.

juries in the 1910 Vanderbilt Cup race, is about recovered. The famous Franco-Swiss driver may return to the motor racing sport, if not in the capacity of a pilot at least as mechanical superintendent of the Buick racing team's cars.

"Denver" Ed. Martin of San Francisco was awarded the decision over Ed. Hagen, the former Seattle policeman, in the third round of a schedule four-round bout Friday night at Seattle, Wash., when Hagen was disqualified for butting.

E. V. Wilmern and Jefferson Living-stone left Cincinnati Friday night for San Francisco, whence they will sail in about a week for Australia. It is understood they expect to formulate their plans for a major baseball league in Australia before returning.

Bowlers from sixty-five cities and towns went on the alleys at the eleventh annual tournament of the American Bowling Congress at St. Louis last night, and which closes Feb. 6. The visiting teams will not begin bowling till Monday. The entry list shows 414 five-men teams will compete.

Boston, and a Boston team scored the first victory thus far in the tournament, G. R. Fearing and H. D. Scott defeating W. Stackpole and J. D. Douglas of New York in straight sets.

High Rolling in Winnipeg.

WINNIPEG, Jan. 21.—Records were smashed to smithereens in the City Bowling League at the Saratoga alleys, when the Thistles and Garrys were seen fighting every inch of ground, with the former taking two out of the three games. Harry Ericks, who has been the most consistent bowler of the season, was again the big noise, and he has never been seen in such good form, rolling in the three games a total of 680, which might have been even better with more luck. Harry started out High Rolling in Winnipeg. better with more luck. Harry started out with 266, and improved his record as he went along, getting 226 in the second game, and winding up with a capital 243. His total beat the previous best of 624, made by Purvis of the C. N. R. team, by 48 pins 46 pins.

The whole combination of the Thistles

was working well, for the team aggre-McDiarmid 561. That would take some beating on the St. Paul alleys.

The Garrys had hard luck in finding the Thistles in such good form, for they themselves collected a total of 2771 pins. Jake Roblin had 601, and Barkwell, Jenkins and McKean all climbed to the 550 mark or over.

Led by the Nose. 'Pa, what's a 'leading woman'?"

#### Sporting Gossip

Anyone inclined to doubt the fact that H. H. Chisholm, the young Lake-view skip, has accumulated a record so far this year well to be proud of should peruse the same below. Only his single-rink and Tankard games are given, in which he has scored 89 shots to 56 for his opponents. He is the only undercated skip in the city. Following is the record:
H. H. Chisholm. 19 R. J. Wray (P.).13 H. H. Chisholm. 18 S. Rennie (G.).10 H. H. Chisholm. 18 T. Rennie (G.).10 H. H. Chisholm. 15 T. Rennie (G.).13 H. H. Chisholm. 15 T. Rennie (G.).13 H. H. Chisholm. 19 F. Gilding (A.).10

Total ......... 89 Total ........... 56

Winnipeg Free Press: J. C. Harstone, principal of the new high school at Weston, Ont., who dropped dead, was well known to old-time Winnipeg curlers from his connection with the Lindsay club, where he acted as secretary for many years. He is a brother of the late Sam Harstone, the famous skip of the Granite club of the city, who gained renown throut Canada by his wonderful achievements on the ice. He is also a cousin of F. S. Harstone, the well-known coal dealer of the city. The late Mr. Harstone taught school in Lindsay for many years, and his son Ross gained fame as the skip of the famous "Kid" rink of that town a few years ago. He went to Windsor and from there took a situation at Weston, where he has resided for the last four years.

The Chicago Cubs will take a Japanese to the Chicago training grounds next spring. It seems, according to President Murphy, that Ito Sugimoto has asked permission to play with the Cubs when they go south next month. He is looking for a position on the team, saying that he knows baseball perfectly and merely wants a trial. Unless Johnny Evers is able to demonstrate that his ankle is everything it should be next spring, the Cubs may have a Japanese second baseman, as Sugimoto is said to be a sparkling infielder. President Murphy immediately forwarded the correspondence to Chance, at Glendora, Cal. Sugimoto is a small man, 21 years old, with considerable infield experience acquired in Honoolulu and on semi-professional clubs around San Francisco, where he is now living. President Murphy says he favors taking Ito to New Orleans for a tryout. If the deal goes thru, the Cubs cam claim the distinction of breaking in the first Japanese in the history of he major leagues.

It is a sort of mystery why the Boston Americans are anxious to trade Catcher Carrigan, says a New York writer. A fine backstop and thrower, a heavy batsman and a gingery hustler, Carrigan has won his way to a high place in the estimation of competent baseball judges. Yet President John I. Taylor says he is willing to let him go. Taylor said the same thing about Pitcher Jos Wood some time ago, and he went so far as to ask for waivers. But since then Wood has been taken back into the fold and has signed a contract. Perhaps, like Wood, Carrigan asked for too much salary and as soon as the star catcher realizes his mistake he will be received with open arms. But the odd part of it is that no other American League club has shown a desire to take Carrigan off President Taylor's hands.

At Indianapolis, Ind.

Thrown heavily on the back of his head in a wrestling bout at Denver, Col., Friday night, John Matthews, a Denver wrestler, lies at a hospital at the point of death from cerebral hemorrhage. His opponent, Ray Hardesty, is being held by the police. Hardesty went to Denver recently from Kansas City.

INDIANAPOLIS, Jan. 21.—Dr. Wadsworth Warren, manager of the Buick racing team, which has starred often at the Indianapolis Motor Speedway in the various race meets, has arrived the various race meets, has arrived by the police and the believed the left leg in an Ottawa City League hockey with the Indianapolis Motor Speedway in the various race meets, has arrived believed the leg can be substained a compound fracture of the left leg in an Ottawa City League hockey with the Indianapolis Motor Speedway in the various race meets, has arrived believed the leg can be substained a compound fracture of the left leg in an Ottawa City League hockey with it the handout privilege they'll have to raise my pay or get another leader. They don't leave me enough to pay my rent."

Messrs. Shannon and Collins, the Buffalo promoters who are trying to revive professional ball in Hamilton, have decided, after looking over the ground that Woodstock and St. Thomas could not be included in an Ontario league. They will therefore try to get teams from Toronto and Niagara Falls, says an exchange, which might have added that there is no harm in trying.

tion of dates. The Hurlingham Club, which challenged by cable about a fortinght ago, wants the match held during the last week in August, while the Americans requested that it be played in June. This week the matter of playing dates will be taken up by a committee of the National Polo Association, and upon this action will depend whether the international match will be played this year.

"Denver" Ed. Martin of San Francisco was awarded the decision over Ed. Hagen, the former Seattle policeman, it the third round of a schedule four-round bout Friday night at Seattle, Wash, when Hagen was disqualified for butting.

Stanley Robison, president of the St. Louis National League baseball team, announced Saturday as he departed for a five weeks' trip to Panama, that he had resigned from the rules committee of the National League meeting in New York.

The eastern championship skating races scheduled for Newburgh, N.Y., Saturday, winder the auspices of the Newburgh Wheelmen, were postponed indefinitely. The warm weather spoiled the ice.

E. V. Wilmern and Jefferson Livingstone left Cincinnati Friday night for San Francisco, whence they will sail in about a week for Australia. It is understood they expect to formulate their plans for returning.

#### Baseball Reminiscences

-By Hardie Richardson-

Volumes have been written about | trouble. Undue excitement was liable pitcher Charlie Radbourne. But why at any time to precipitate a collapse on the part of Joseph. His relatives pestaged the life out of him to have should that prevent me singing the praises of the gamest man who ever him retire. He was a valuable man that Radbourne was as great a little man as ever wore a uniform. I know, of his family. One day in the middle for I knew him perhaps better than anyone who ployed with him or against

Why, I recall a time when he set a record that has never been approached in one peek he pitched five games Finally Joe took a peep and burst out Twice he beat Detroit tho t took him twenty-eight innings to do. t. Just think of what that meant! Sixty-five touch innings or more than seven ordinary games for one pitcher in a week. Where could you find a pitcher to-day who would even warm up five times? But Radmourne

Boston against Brooklyn. It was one of Radbourne's few poor days and Brooklyn simply hit him here there and everywhere. They smothered Radourne's men of Galvin that argument was mild, the death of poor little Donaid Nicholson wave sweeping over the state at presont against Brooklyn. It was one but after a while the fish cookers got sen, the rider of Lord Exter, and Mr. wave sweeping over the state at presont against Brooklyn. It was one but after a while the fish cookers got sen, the rider of Lord Exter, and Mr. wave sweeping over the state at presont against Brooklyn. It was one but after a while the fish cookers got sen, the rider of Lord Exter, and Mr. excited Each wished to talk all the Basil Gray's mare Uarra. Frank Mc-ent, has been supplied with data, and daying everywhere. They smothered Radourne's property of the business men of a wave sweeping over the state at presonance of the cookers got sen, the rider of Lord Exter, and Mr. excited Each wished to talk all the Basil Gray's mare Uarra. Frank Mc-ent, has been supplied with data, and daying everywhere. They smothered Radourne's property of the business men of the cookers got sen, the rider of Lord Exter, and Mr. bourne by the disconcerting score of 27 to 6. It was one of the real slaughters of the season. But Radbourne never thought of quitting. His team mates asked him to retire, but Charlie stuck to his guns. The more and fork. Rowe saw him secreting his Charite stuck to his guns. The more they hit him the harder he gritted his teeth and the harder he tried. He took his medicine like a little gentleman, without a whimper. To the taunts of Brooklyn he would simply grunt to his team mates: 'Well, we'll get them yet, see if we don't.' The next day Radbourne declared that he was going to pitch again. His team mates laughed at him. When he weniout to warm up they thought him a fit subject for an insane asylum; the subject for an insane asylum; the manager even threatened to have him arrested. But there was no stopping

Radbourne. And he got his revenge on Brooklyn all right. He shut out the team that had massacred him the day before, allowing only one Brooklynite to reach first base.

of the game, Cincinnati was having a tough time of it, so tough, indeed, that

fallen athlete and three doctors work-

angry friends bellowed at him.
"Oh, nothing much," Gearhardt replied. "I just stopped the game be-cause I was rattled." That little delay got his club settled raelite, and we have a vivid recollection down and Cincinnati finally won out after all.

dayned on Galvin that argument was were the jockeys outside Nicholson who useless. So, jumping up, he grabbed were seriously injured. McGrade was Dolan by the nose and gave a strong pull. Then he beat it. Dolan thought that Galvin was waiting for him outside, so he armed bimself with a knife could be made up for his lost start, caus. useless. So jumping up, he grabbed Dolan by the nose and gave a strong poil. Then he beat it. Dolan thought that Galvin was waiting for him outside, so he armed himself with a knife

Toronto Kennel Club Show.

Brooklynite to reach first base.

You see, Radbourne's make-up was entirely foreign to that of Joe Gearhard, Joe played second base for Cincinnati in the 80's and was a mighty good player both in the field and at bat, the he was afflicted with heart lades. Admission free, Judge, F. Smith.

## Accidents on Race Courses

They Are Becoming More Common Owing to Reckless Riding and Bad Jockeyship—Short Stirrups Held to be Largely Responsible.

There is far more racing in Australia than in England, but the number of serious accidents which happen with us (says The Australasian) are altogether out of proportion to the racing if England be accepted as a standard of comparison as regards mishaps. A fat-al accident to a jookey in England is quite a rare thing. With us, unfortun-ately, they are rather common, and yet our courses are, from all accounts, better and safer than those in England. What the country courses are like we do not know, but all the leading tracks

proved correct. And even if they are frreed on to such a rall horses seldom come to grief. It is built high enough to prevent any chance of a horse going, over it, and, if strongly made, as it should be, no horse can break thru those that are not should not be licensed by the government. It is not the such a string of racing acidents as were reported recently in "The Argus." We are afraid faulty or reckless riding is at the bottom of many of the flat-racing mishaps.

An Awful Smash.

anyone who ployed with him or against him in the old days.

Really I do not believe anyone had better opportunity to penetrate the reserve of this aumassuming little fellow than myself. I spent one whole winter with him near Bloomington, Ill. We were together almost continually, hunting or knocking about the open country. But I soon realized that the more I was associated with him the less I knew him. But to return to Radbourne, the pitcher.

On the gaths, the midst of the xitough, indeed, that it looked as if the Reddegs would never retire the side. Showers of hits of all descriptions were piling up the runs by twos and threes. Cincinnati's the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made were standing around like wooden in the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly, made the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly or the least doubt as to how that awful smash was caused. The rider of a good horse, who got off badly or the least doubt as to be least or the least of the standard or the least of the standard or the least of the standard or the l Radbourne, the pitcher.

Radbourne was a man who never despaired of victory no matter how the tide of fortune flowed. He did not know the meaning of the word "quit."

Why I recall a time when "quit."

To stop it.

In the midst of the excitement Joe turn he forced his mount up on the forced his mount up on the forced his mount up on the force him along on the rails until time for the flowers. Some ran for there was only one horse in front of the meaning of the word "quit."

The recklass and would not pull out. The reckless rider would not wait. He pushed on and won all of them. Three of these and won all of them. Three of these were victories over Buffalo and in the were victories over Buffalo and in the war of the fallen leaders fell, in the wake of the fallen leaders fell, until 17 of the 41 starters were down. The "Turf Register" only accounts for 16 falls; but it does not include The Is-

Reckiess riding is undoubtedly one of the causes of the falls which occur. Perhaps stewards might do more than they do towards stopping the practice. but the stewards are hampered by the refusal of jockeys to give them any assistance in sheeting home a charge of foul or reckless riding. Jockeys may talk to irrespons ble persons about what has happened in the race, but in the hearing of a steward they are as dumb as oysters. They prefer, as they put it to "get even" in some other race-

do with it. All boys want to be Tod Swift-Col. Ashmeade betting coup. Sloans, but it is only a first-class horseman that can control a rough horse when perched on his withers. It all traners would do as James Scoble is said to have done before the Marlbyrnong Trial Stakes, race riding would not be so dangerous. We did not see not be so dangerous. We did not see The walls craze," which some of that race. Scoble had five two-year olds starting. The weights necessitaolds starting. The weights necessitated getting boys to ride, and when he want down to see his hastily-acquired jockeys mount, he found they proposed to ride a la Sloan. He at once made them let their leathers down a few holes, and give themselves a chance to control the green two wars rides they were riding. green two-year-olds they were riding.

Another Cause of Disaster.

The 'sails craze.' which some of the leading riders suffer from, is another cause of accidents. D. Maher and F. Wootton are said to be afflicted with this disease, and two feading jockeys in Australia have got it badly. Hales, the most brainy dockey we have ever had, always declared that the only races he lost which he should have won were lost thru trying for the rails when he might just as well have kept when he might just as well have kept out. "When the pace has been very tast," said Hales, you can go inside at the last turn if your horse has something left at him, but if the pace has been slow, avoid the rails as you would a pestilence. Something in front is sure to have enough go in him to stop you." Some leading jockeys, who have had the luck to avoid bad falls, will risk anything for the rails, and, because they are in the fashion, they think their less fortunate brothers should make way and give them any position they want.

answay."
That's a difficult question to anwer. replied ins wife's husband,
Because they are always pointed in
one direction and headed in another."

#### New Trotting Circuit WillOffer \$450,000

Great Central Includes a Number of Grand Circuit Cities and Will Begin at Indianapolis July 10.

What the country courses are like we do not know, but all the leading tracks in the different states look as safe as it is possible to make racing tracks. In the old days, when the course was marked by posts, it was a common thing for a jockey to be killed or badly hurt thru being "posted," as it was cailed.

In the Melbourne Cup of 1878 J. Morrison, the rider of Chester, was driven or to a post, and his leg was badly broken. After that the V. R. C. decided to rall the course. Some objected to the rail as being more dangerous than the posts. F. F. Dakin was one of the objectors. Fortunately the comfoilt that horses would keep off a broad rail, which they could see, has proved correct. And even if they are forced on to such a rail horses seldom

#### FIRST GUN IS FIRED IN ANTI-RACE CAMPAIGN

Florida Coast Hotelkeepers Want Anti-Betting Legislation Enforced at Once.

JACKSONVILLE, Fla., Jan. 21.-The find a pitcher to-day who would even warm up five times? But Radmourne thought nothing of it.

Two games in which 'Old Hoss' worked, I remember wells, it was in 1890, during the brotherhood days. In the first contest Radbourne pitched for both first contest Radbourne pitched for Badbourne's few poor days and of Radbourne's few poor days and first their conversation was mild, but after a while the fish cookers got sent the top of his voice.

During one of the eastern trips of purpling at the top of his voice.

The wender is that more damage was not done in this smash. It seems noth not done in this smash. It seems noth not done in this smash. It seems noth ingless than a miracle that, with all legislature two winters back, take efform element, which has a healthy the death of poor little Donald Nichol-but after a while the fish cookers got sen, the rider of Lord Exter, and Mr. ith all legislature two winters back, take ef-top of tect immediately. In addition, the re-contested for, they are also very much alive to the fact that the "association," Nichol-ad Mr. wave sweeping over the state at pres-philanthropists, and that while a vast

zeal to make up for his lost start, caus- presided over by Curley Brown, was ed all the trouble, is alive, but long the latest racing venture to bob upon since ceased to have any connection the horizon, and in view of the fact that with racing.

a great feat.

The panner meeting of this "association," was held last winter, and the promoters profited handsomely; some say \$500,000 found its way to the right side of the ledger. On the other hand the officials claim the amount distorted and point to the fact that the "association" only paid a 25 per cent. dividend. The horse owners too, made money, due primarily to the fact that the handbooks and poolrooms thruout the country and not the players at the track were larruped. The wise money was bet in Cincinnati. Chicago, New which is very pleasant for the poor was bet in Cincinnati. Chicago, New owner they may be riding for in that other race. But there is no doubt that did seem that every time a certain many of the accidents are caused by clique set in the kale, you could hear plucky little incompetents, with no control of the rank and the exclaim: "Well the trol over their horses, allowing them to "Dynamiters," pur another one over the run amuck; so to speak, and interfere plate." In fact, so strong was the "work," that a gigantic seandal The short leathers have something to out of the famous or infamous, Jane do with it. All boys want to be Tod Swift Col. Ashmeade betting coup.

to the statute of the state, the bills should become effective on the first of the year. According to legal opinion, every penciler at the track has been leaving himself liable to arrest. They are leaving themselves liable in this way. Should the books not be controlled. ed by the association, they are liable in a political way, had arranged to send a personal representative to the improvement of the breed of the pays for the purses and they also know who it was that contributed the gigantis sum credited as earnings-over and above the "huge amount hung up in purses and stakes." They know that the dear old public, overcharged, ma-ligned, and treated to things that would make Capt. Kidd's work pale ir to the infinitesimal, pay the fiddler. Will there be racing in Florida in 1911-1912? There will be if the "association" can buy the Florida state legislature and this is not probable.

## 2 News of the Fighters &

SAN FRANCISCO, Jan. 21 .- The serm of activity is manifesting itself again in heavyweight circles and unless all signs fall, there will be a contest for the championship during the present year. So much is easy enough to foretell. To say, however, where the ring will be pitched would require the gift of prophecy in a

The boxing industry has spilled itself all over the universe and for capable everywhere. The next tuesle of the heavyewight fighters may take place in this country. Then again the men may

Johnson, of course, is the key to the situation. He must of necessity be one of the combatants when the champion-slip question is being decided.

Who will be the other?
Barney Oldfield's recent attempt to justify Jeffries' claim of being drugged in Reno has caused a certain suspicion to arise. # Barney says that the Jeff of today can defeat Johnson and that the Oldrield money is ready for investment on

day can defeat Johnson and that the Oldrieid money is ready for investment on just such a basis.

Some people see in this an intimation of Jeff's desire to get a return match with Johnson. I don't regard it in this light. L'think the Reno affair is as a nightmare to Jeffries, and that he is leaving no stone unturned to bring the public to a way of thinking that his defeat was brought about by foul play. In my opinion Jeffries has not the remotest idea of fighting again.

my opinion Jeffries has not the remotest idea of fighting again.

The search for a "white man's hope" is certainly becoming worldwide. This country has several brand new candidates for the championship. England has a few: Australia has Bill Lang, and now word comes that Larry Foley. Nestor of the boxing situation in Australia for many years, has located a likely novice. The youngster's name is Colin Bell. He is raw boxed and tall, as most up-country. Australian youths are. He has been consigned to Foley's tender meroles by a rich land owner named Warbyl. Of Bell's home section, to wit, Moree, New South Wales. Foley thinks well of Bell, and-to have Foley's endorsement surely means something, for it was Larry who developled Peter Jackson, Slavin, Fitzsimmors, Jim Hall and a few others. Cyclone Johnny Thompson has offered himself as a trial horse for Bell, and when the last mail steamer left Australia it looked as tho a Bell-Thompson match would be arranged.

big enough to fight anything that walks upon two legs. If he carries with him into the heavyweight division the same endurance and pugnacity which marked his operations as a lightweight, he will prove a tough trial house at that.

Carl Morris of Sapulpa is the most promising hope this country has produced. So far, in fact, he is the only mashroom in a field of toadstools. His defeat of Marvin Hart was, of course, his most pretentious performance, but this much can be said of him: He has defeated everyone he has been sent against.

Morris, it is said, is ambitious to get a whack at Kaufman and from the way things are shaping themselves Kaufman

things are shaping themselves Kaufman will be compelled to harken to the Sa-pulpa man's challenge or else go deeply into explanation.

into explanation.

Tommy Burns is coming back into the lists again, the very latest being that he has accepted Hugh McIntosh's offer of \$2500 to box Bill Leng of Australia in London. We all thought that the injuries he received in lacrosse games and street accidents had put him permanently out of the ring, but Tommy's willingness to oblige McIntosh is the best proof that he still has faith in himself as a fighter. Lang is improving and his fight with Burns will be in the nature of an elimination bout. There will be one man less to hurl challenges at Jack Johnson.

While Lang and Burns are preparing to settle the question of superiority in England, why Cannot Carl Morris and Al Kaufman arrange a match in this country? If this were done the new "hopes" would be reduced to such an extent that it would not be hard to select the man who has the best right to challenge Johnson.

Johnson.

Sam Langford will, of course, complain that he is being left out in the cold. Maybe if Sam makes noise enough it will be no easy task to turn a deaf ear to his clamor. The public would like Langford to be worked into the new championship scheme somehow.

EDIABLISHED SVER 50 YEAR,

#### TUESDAY, JANUARY 24th Important Special Sale of

This will be the biggest sale of the seasons up to date, and a finer selection of all classes of horses cannot be offered for sale. Our best shippers are now busy sending in their carloads, containing plenty of horses switable for all different requirements. These include: HEAVY DRAUGHTS, GENERAL PURPOSE, EXPRESS AND DELIVERY HORSES, FARM BLOCKS, PONIES, DRIVERS AND SADDLE HORSES.

## PONIES

The representatives of the estate of the late MR. WM. HENDRIE of the Valley Farm, Hamilton, have instructed us to sell on Tuesday, Jan. 24, at 12 o'clock sharp, a consignment of Exmoor and Shetland

## These yearling ponies were all bred at the Valley Farm, and are the entire output of last year's breeding.

## 25 Contractor's Horses

#### Tuesday, January 24th

purpose of doing heavy teaming work. They are thoroughly good, reliable horses, and in capital condition. The owner has no present use for them, and has therefore decided to sell them under the hammer for the high dollar. This is a good chance for parties seeking seasoned workers.

## A Consignment of Good Light Drivers and Cobs

TUESDAY, January 24th

These are a choice lot, as Mr. Brownridge is an able judge of a good harness horse, and this shipment has nice quality.

January 27th 175 HORSES

THE BEST OF ALL CLASSES. Sale commencing at 11 a.m.

#### CITY HORSES

At each of our auctions we sell a large number of horses which are consigned by city firms and private individuals who have no further use for them. There is many a bargain to be had among these horses, for many of them were originally purchased at high prices. These sales of city horses offer the best opportunity for buyer and seller to meet and

#### Buy Your Carload in One Day

All horses sold under any warranty and not as represented are returnable any time before 12 o'clock noon of the day following sale, when the purchase price will be promptly refunded.

#### On FRIDAY, February 3rd

Imported Thoroughbred Hackney Mares

This firm handle some of the best Hackney Horses that come to this country, and their chief reason for seiling now is that they have a consignment on the way from England and want to make room for them. The Hackneys to be sold are all beautifully broken.

#### A HORSE DEPARTMENTAL STORE

We have everything a horse pulls or wears. We carry a full line of Horse Boots and Hopples.

Anyone wanting a first-class Sleigh or Cutter is sure to be suited in our showrooms. We have a fine stock of absolutely new and up-to-date Cutters and Sleighs, and the prices are reasonable, \$30 up.

We are Sole Canadian Agents for REDUCINE, the great absorbent and remedy; price, \$4.00 per tin, cash with order. Send for booklet.

# Origin of the Thorobred

An Address Recently Delivered by Major Foxhall A. Daingerfield Before the Kentucky College of Agriculture-Value and Certainty of Heredity.

master J. R. Keene's famous Castleton stud and probably the best posted authority in America on the thorobred:

Mr. president and young gentlemen of the State University of Kentucky: At the request of your professor of animal husbandry I have consented to make to you a few remarks upon the thorobred horse, his origin, breed-

My highest ambition in life has been the development to its highest type and greatest utility every domestic animal. The gamecock, foxhound, pointer, setter, shorthorn, saddle horse, trotter, etc.—and even men have at certain periods of my life interested me—but my environments in recent years have enforced the crystallization of my thought and energies upon the thoro-

of the English thorobred were the to time imported to England and gave more promise, as a progenitor, crossed on the speediest and best of from his first, than did our remote the native English mares, and their ancestor of same name from his.

Progeny by pure Eastern sires of one My studies and experience teach that progeny by pure Eastern sires of one registration as an English thorobred.

Early Importation. Of the importations to England from time to time of these eastern horses, all did not prove of equal merit as progenitors of speed and endurance (or and the descendants in tail male from Darley's Arabian, The Godolphin Arabian (or Barb), and The Byerly Purk came to be considered "The elect blood element nes" of the English thorobred.

Later the pre-eminence of certain which may control? race horses and sires, descended thru Yet, while close these and kindred channels, brought three horses into such prominence as equine aristocracy of England. These And in England and America, indeed in almost all countries where the thorobred is known, keep-ing these lines in due proportion in the garded a measure of safety.

The term "thorobred," when applied to horses; has become synonymous in ordinary usage with a horse entitled to registry, or registered in the English General Stud Book. This by reason of the establishment in England, from eastern infusions, the breed Origin of the Stud Book.

The American Stud Book compiled by the late S. Bruce, the first volume of which was published in 1878—only eight years after the close of the war between the States, in which Virginia (till then the premier state since colonial times in the production of race horses) was completely devasted by contending armies contains the names of horses satisfactory proven to Mr. Bruce to be thorobred, but not in all cases by evidence recognized by Weatherby as sufficient, yet which have proven their patrician ancestry and parity of blood by their deeds and

DAY

DA"

Story That They Incurred Displeasure of Royal Party During Recent

(From a Staff Correspondent.) LONDON, Jan. 20 .- With the return of the Duke and Duchess of Cannaught and Princess Patricia to London, there has been an outbreak of interesting gossip emanating from those who returned with the royal party.

Making all due allowances for the usual British "gush" where revalty is concerned, there is not the slightest doubt that the Duke made himsen enormously popular, and that the whole or South Africa would like to have had him remain there in the place of Lord Gladstone, who is unpopular with all

Nor were the Gladstones popular with their royal guests. The Duchess of Connaught suffers from a shyness, which amounts almost to a disease She is one long blush in public, and when people are presented to her she becomes incoherent; but in spite of this affliction she has a very exalted idea of her rank and is puntilious where etiquet is concerned.

When, therefore, the royal party were met at Capetown by the Glad-stones and were driven thru the decor-ated streets, the Duchess was extremeated streets, the Duchess was extremely annoyad when Lady Gladstone bowed right and left to the crowds and took the cheers for herself. Of course, Lady Gladstone should not have bowed at all. In consequence of this incident the Gladstones received a very strong hint not to proceed with the royal

#### Future is Clouded Avers Fr. Vaughan

Says English People Are Not Patriotic Enough and Points to Germany.

By Herbert Temple.

LONDON, Jan. 20 .- Father Vaughan the most famous Roman Catholic not patriotic enough, and this again concert, to be held in convocation hall, on Thursday evening next, promises to a greater body of Catholic priests to teach them and bring its people up in teach them and bring its people up in the convocation hall, on Thursday evening next, promises to excel all similar entertainments both in proficiency and attendance. Rehearing the convocation hall, on Thursday evening next, promises to excel all similar entertainments both in proficiency and attendance. Rehearing the convocation hall, on Thursday evening next, promises to excel all similar entertainments both in proficiency and attendance. Rehearing the convocation hall, on Thursday evening next, promises to excel all similar entertainments both in proficiency and attendance.

Germany, he said, is the most patriotic land in all Europe and its Cath- for seats being persistent. For nonolic population is the most patriotic subscribers, that is, those not heard

party in the empire. And if the great central party in Germany was the recognized patriotic party, in the best sense of the word, the reason of it, he continued, was not far to seek. Patriotism was the outcome of religion, and in the measure in which religion was cultivated true patriotism flourished.

When he heard of so-called Catholic countries falling away from religion he knew that the priesthood was shirking its duties. It was the house-tohouse going priest who made the church-going people. He had never known, at home or abroad, any local painstaking, apostolic-living clergy without a church-going and religious-practising congregation. When dryrot set in any church it began, not in the body of the church, but in the sanctuary itself.

He congratulated the Catholics in Germany on the way in which they had marshalled their forces and disciplined their party. It knew its mission, and fulfilled it, led by the clergy. England to-day, he continued, might do well to learn a lesson from Germany, What enormous sacrifices were made, what fabulous sums spent in maintaining forces by land and on sea in the interests of the Fatherland. He did not venture to prophesy what

was to be the immediate future of England, but he aid not hesitate to say that never did the heavens look more cloud.

I have a message of hope and good cheer, of encouragement and inspiration to every suffering woman. I have endured the torture due to female troubles and the consequent despondency and mental agony almost to the point of despair, and I have been restored from this condition to a state of vigorous health, and to the happy, exhilarating frame of mind which accompanies physical well being. This change has been brought about wholly by the use of ORANGE LiLY.

In addition I have had the privilege and pleasure of inducing multitudes of other suffering women to give ORANGE LiLY a trial, and have received thousands of enthusiastic acknowledgments of the blessings it has brought to them.

Truro, N. S., April 5, 1909.

knowledgments of the blessings it has brought to them. The following is a sample:

Truro, N. S., April 5, 1909.

Dear Mrs. Currah,—Your very kind letter was received yesterday. In reply to your question about my health, I am thankful to say that I am very well. As I have never given you a statement of my case you may be interested in it.

For several years I have suffered untold agons. This suffering was continuous, but I would have violent attacks every few weeks, each attack lasting several days. The first Sunday in November, I felt the pain increasing and so did not go to prayers. The rest of the family did go, and soon after the forcing down pains selzed me and I had to remain on the floor until their return. I was in great pain all night and was very sick for a whole week.

Then Mrs. L. came to see me and told me of your wonderful medicine. I got my husband to send for it right away, as I was too sick to write myself. (My doctor could do nothing for me.) I have used 5 boxes of ORANGE LILY, have had three months of good rest, and am now well, never better in my life. I have not had the old pains since. I often ask my husband if it is myself that is going around and doing my own work. I can scarcely believe it. It brings tears of joy to my eyes. I could shout it to all the world. I cannot speak enough in its praise.

Your friend, MRS. E. H. F.

Receiving, as I do. dozens of such reports each day. I feel impelled to make known to my suffering sisters the merits of ORANGE LILY. It differs from other so-called remedies in that it is not taken internally. It is a strictly local freatment, and is applied directly to the affected organs. Its curative elements freatment, and see applied directly to the affected organs. Its curative elements are absorbed into the congested tissues, expelling the stagnant foreign matter which has been irritating the membrane and oppressing the nerves, and a grow-which has been irritating the membrane and oppressing the heters, and a grow-which has perfected into the congested tissues

master, Don Pedro, desiring a double deal, consents to use his kindly and kingly offices, in his protege's behalf, both to the governor and to the girl.

The latter part of this embassy he accomplishes altogether too warmly;

In fact, unwittingly a contretemps for poor Claudio in the pursuit of his plans. The malicious Don John, the natural brother of Prince Pedro, poisons and depresses the young suitor, with the convictions, that his patron is not en-tirely unselfish, in his amprous attentions to Hero. All this seems amply evident, from his conduct toward her;

at the masquerade, given in honor of the visitors, by the governor. His distemper is, however, dissipated when Leonato actually consents to Hero's becoming Claudio's bride. Don John is not to be frustrated so simply, however, and he busies himself with mining and explosives much deeper and far deadlier than this harmless de-

not wisely but too well; it constitutes

Benedict and Beatrice are also at the ball. This arena proves an arsen-al of explosives to Benedict; it is entirely unauspicious to his prowess; in fact, he feels unfit to parry the fatal passes of his Amazonian adversary and resolves to withdraw. Their mutual friends, feeling that they are funda-mentally congenial, invent a ruse to arouse their latent possibilities. Benedict, an unconscious eavesdropper, is made to hear how much she esteems him, is consoled and cheered into renewing his amorous efforts. The innoses Beatrice's malady and easily informs her of his unrequitted love, by having her accidentally histen to Benedict's apparent protestations. Thus wantonly deceived they again encounter and experience a much milder in-terchange of epithets than their form-er frenzied fusikade. Now this double self-deception has been undeceived and their antagonism disarmed by the delightful designing duplicity of their

Don John has mined the fair progress in amities of Claudio and Hero. With consummate cunning and skill he manages, the night before the marriage, Leonies, Claudio is inexplicably de-ceived, and superficially satisfied, as to their guilt. The villainy is revealed, however, by a blundering guard, who accidentally hears Borachio boasting, of the invidious artifice. This primafacie evidence of Borachio, is brought before Leonato, who has little patience, with the incoherent prate, of this cad, and goes on with the arrangement for

BERLIN, Jan. 21.-News despatches

AIRSHIPS IN WAR. Ultimate Value.

Count Ernest Revention, the foremost German naval expert, has published the following respression of opinion on the use of airships and flying machines in maritime warfare:

sary to emphasize the enormous importance of aerial scouting at sea. The importance of this innovation is quite clear to every thoughtful man, scouraged man.
"What's the matter with me? I'm that the should receive news of the enemy's position by means of airship or flying machine, which even his fastest cruisers could not send to him ing to their more limited field of activity. Hitherto it appears that the airship, and especially the Zeppelin type of airship, is more suitable than the flying machine for scouting work at sea, provided that these airships be capable of remaining aloft under unfavorable weather conditions: Pro-vided this condition be fulfilled, the advantage of the airship would be that it can remain longer in the air than the flying machine, and perhaps that it can rise to a high elevation more rapidly to withdraw from the danger zone. On the other hand, the flying machine has a great speed, which will

never be attained by any airsnip. "In view of these different qualities we may assume that both airships and flying machines would be successful in naval warfare according to their respective values. Scouting by flying machine would; for instance, be of great advantage with Heligoland as a basis, because in a short time one or more flying machines could pase over a considerable part of that area of the North Sea which would have to be searched for hostile ships. The fun-damental difference between the work of the airship and the work of the flyig machine would be that the airship could follow the enemy, while its own communication with the basis ashore ould be maintained by one or more flying machines, acting as message

Vulnerability of Airships. Regarding the danger to which dirships and flying machines would be exposed. French experts believe that dying machines; in consequence of their small size and high speed, are almost invulnerable, the that appears to be exaggeration, and could only apply the hours of dusk or darkness. The pinion frequently expressed that both ying machines and airships are invulnerable so long as their position could for instance, penetrate one deck, is immediately above a ship, would but not two decks, so that the efficiency only hold good so long as there is only of the mutilated warship would probone ship in question. As soon as there more than one ship, the other one could always train her aerial guns ship beneath it. The flying machine is main at as great a distance as possible from the enamy, otherwise its plosives with them.

destruction will be rapid, but as the "Altogether we may say that it is ainship will generally catch sight of got a glimpse of the airship, the latter will be able to regulate its movements according to the necessities of the sit-

stances, its speed would not be con-siderably greater than that of a maritime warship. The flying machines because it will appear in large numers, and its success, will depend hiefly on the result of some quick,

Attack With Explosives.

"Regarding the prospects of droppi explosives out of the air, it must be admitted that the idea has something very attractive, and it is certainly quite possible that a large proportion of successful alms could be attained. It must be remembered, however, that an airship would not be able to drop heavy projectiles with great penetrating power, but the lightest possible explosives, which would not have great penetrating nor destructive power, but which would operate on striking theh target. Experience teaches us that such explosives could work great destruction in the immediate vicinity of the spot on which they fell. The ably remain undimished. The danger of the destruction of gun turrets or such an angle as to aim at the air- thicker armor plating without unduly protected primarily by its own speed, while the airship is protected by its pid change of altitude. As a generaliships and aeroplanes subsequently rule, the airship will be obliged to enabled them to carry really considerable quantitles of very destructive ex-

possible the aerial atack with explobattleships before the battleships sives must already be regarded as dangerous, but it is dangerous to pro-phesy, for this reason, the abolition of maritime navies and other farreaching conclusions. At present we "On the other hand, if the airship have not yet reached that point where the airship or aeroplane is entirely

doubtless be limited to scouting. Apart into the grater is, in case of war, lost from that duty, they will have to per- beyond all hope." form the very important and hither to unsolved problem of discovering the positions of submarine mines and also submarine warships. It is well known it is possible to see far beneath the surface. Submanine mines a few yards beneath the surface and also submar ine warships will probably be easily visible to airships and flying machines

under all conditions. "If airships and flying machines really succeed in communicating the position of hostile submarines to their ommanding officers, they will render services of extraordinary importance, and we should have in aerial vessels a most effective protection against mines, whose influence in future maritime wars will otherwise be very great. For the present, the attainment of reliable navigation qualities is the first essential for airships and flying machines. A flying machine which falls

#### DAVID RUSSELL SUES FUR BIG DAMAGES

Wants \$200,000 From Pinkertons -Says the "Badge Game" Was Tried on Him.

MONTREAL, Jan. 21.-As one development of the alleged plot against Mr. David Russell, writs were issued to-day at the instance of Mr. Russell. in 4 suit for \$200,000 damages against the heads of the Pinkerton Detective Agency and Mr. John W. MacNamara. the local manager of this agency.

The legal firm of Hickson & Campbell are acting for Mr. Russell, and the papers in the case were prepared with the co-operation of Mr. Donald Mac-Master and Mr. A. J. Brown. Tried "Badge Game."

Mr. Russell has been working since jast October on a case which had its inception early that month in an alteg-ed attempt to make him the victim of what is commonly known as the "bad-ger game." A woman, who was registered with a male companion at a leading hotel, endeavored to entice Mr.

Russell to her apartments.

In the course of his enquiry, which took him several times to New York and Pittsburg, Mr. Russell affirms that an attempt was made to have him sent surreptitiously to a sanitarium for the mentally unsound.

#### RECIPROCITY

By William H. Taylor.

The bald Yankee Eagle was perched on a tree, Where he blearly blinked at the Beaver's countree; He perceived that the Beaver was building a dam Of Imperial Preference near Uncle Sam.

Then the Eagle remarked, with a sardonic grin (Like the leer on the phiz of the Author of Sin): "By the bones of great Barnum, you give me a pain Like the colic I had when the Dons sank the Maine.

'Just forget, busy Beaver, the games that I won When my talons tore Maine and your own Oregon From your map, as a joke, on Ashburton & Co., Now, I'll deal with you square, by the soul of Monroe.

'Let me show you a Yankee darnation cute scheme, That will make us both rich as a militonaire's dream. Reciprocity treaties our Reynards will make, And this continent's trade we'll divide like a cake.

'For your natural products I'll swap you the goods Which you need, now your folks have escaped from the woods; Let your National Policy lie in the grave Of Macdonald, who dreamt that his country he'd save."

Then the Beaver replied: "You can biplane away, You'll not hypnotize me like you have Lorryhay; Build your Dingley-barbed-fences a mile or two higher; Fry your Devil-fish Trusts in mad Panic's blue fire.

When a Coxey's lean army again comes along, You can auction your Capitol off for a song; Their your millionaire kings to old Europe can go To play golf with the Devil and Laird of Skibo.

"Our own Empire's broad banner holds markets for me— We're a nation of nations—IT'S MY CENTURY! May our Globular hoboes who reach out for graft Wear this suit which was Taylored for big Billy Taft."

Steel Company of Welland, and will be only the one-act playlet "Bardwell vs. by the declared on the principal parts of the card to their worb "delay."

With a blank look upon his face he onuded the of the order of "Say, what is it?"

Tommy's eyes brightened, and with the promoted the order of employee will be increased from the promoted the one-act playlet "Bardwell vs. by the one-act playlet "Bardwell vs. by the facts that the camada Car and Foundry Company has absorbed the Ontario Iron and what is it?"

Tommy's eyes brightened, and with the promoted the principal parts of the card to the order of t demonstrated by the facts that the new equipment. It also is announced in Weiland that the Canada Automatic Transportation Co. have selected a site for the operation of their business, and

will proceed to getito work as soon as it is possible to do so. Both of these industries have come to Welland since the new year, and others are contemplating doing the same thing.

With manufacturers, the cost of production is, of course, one of the chief factors which they have to consider, and at no point in Canada can manufacturing be done so cheaply perhaps, as in Welland. This is the drawing card and nothing can stop the growth of this now prominent manufacturing town. One drawback to the town is the absence of sufficient house accommodation for the working men, which will be brought into the municipality. Measures, however, are being taken by loan companies and others to solve this, and real estate in Welland is attracting a large amount of interest both for speculators and investors on this account. 1

"What's Maude crying about?" asked the father home from work.
"She's crying over the play she say

#### WILEGATTING UNKNOWN UP IN THE PORCUPINE

Mines Are Occupied in Producing the Goods and Leaving Stock Jobbing Alone.

Our Man Up North.)-One of the very

level best to first produce the goods in paying quantities before extending the cordiale polite to get in quick. Conspicuously so is this fact relative to most companies now organized and working. Very few will place stock until their veins are fully opened and

So far the only campanies' stock is located in the good part of Tisdale, where the rich as Crossus veins have been bared to view.

One spot which is attracting much attention now is the Pearl Lake district, where the development work of

the fall substantiates fully the wisdo of the owners in offering a limited, number of shares to the public.

It is generally mentioned here that in none of former northern Ontario mining camps did the first stock of-ferings go at the prices the Timmins' stock is now selling at, a trifle below

Mining men generally say this augurs well for the camp.

BUILDING IS ACTIVE

Dwellings Are Going Up Rapidly at Porcupine Camp.

PORCUPINE CITY, Jan. 19 .- Some hing of the rapid growth of the three hamlets located on the lake may be gleaned from the following facts:

During December 75 teams carted lumber in to the extent of 5,000,000 feet. Since Jan. 1, 30 teams are drawing daily and another million feet have

Nearly all this material is used and only this week did the team-owners catch up with the demand. Probably a half-million feet are on hand now. Prices that would do justice to ex-reme boom times were paid, anything from \$40 to \$75 a thousand feet, which is considered low by all builders here they understand the costs of hauling

freight. Small buildings and shacks are going up on every available spot until men who want to buy or rent a good, warm place to live can be accommodated.
Office rooms are being finished in

two and three storey blocks and those looking forward to opening quarters for business will find ro difficulty, in getting a location in any of the town-A. J. Murphy, president of the Maidens Silver Mining Company of South

Lerrain, arrived here yesterday. He is a'ro a director and an offcer in the Miller Porcupine Gold Company of this

place, and also he has a large num-ber of teams engaged in freighting on the road from Kelso Mines.

Mr. Murphy is extremely enthusiastic over the future of Porcupine and considers the present work the merest

ber of specialists."-Life.

ago, 55. Minneapolls, 270, 209, 238.

Winnipeg Inspection.

417,000 442,000 Broomhall's Gable. LIVERPOOL, Jan. 21.-The market

opening was steady, with prices %d to ¼d lower. The weakness in America yesterday was offset by the comparatively steady tone in Winnipeg and firmness in Buenos Ayres at the close. Following the opening, and during the remainder of the morning, shorts were nervous, and with light offerings, prices advanced. The fact of light Argentiue shipments to the United Kingdom, continued good demand for Plata cargoes, firmness of Plata spot and a good continental demand for Australian cargoes on passage, made the cargo market steadler, with a better enquiry. At the close the market was firm and unchanged from yesterday. opening was steady, with prices 1/2d to 1/4d quiry. At the close the market was firm and unchanged from yesterday.

S. B. Clark of British Empire Grain Co., Winnipeg. says: Canada has probably Jan 22:00 22:00 22:00 20:10 20:10 20:10 export between now and next September, when new crop becomes availables The Canadian Northwest will again increase its acreage enormously—15 to 20 per cent.

values will be experienced.

High Returns By Better Class of Cobalts at Present Market Valuations.

World Office Public sentiment in relation to the higher priced and dividend paying cobalts has undergone a considerable change during the last few weeks. Responsible buying has superseded the former realizing disposition, and this has resulted in advances which have been carried from 10 to 60 points. Kerr Lake, La Rose, Nipissing, Conlagas and Crown Reserve, all these securities have had a part in the upward movement, and while in the case of Crown Reserve the appreciation in values has not been carried to the same extent as in the other issues, it has been noteworthy that the upward trend has been the dominating influigher priced stocks.

with the state of	a ser atte	1
The change in the		

The change in the market position of the better class of Cobalt shares has not been occasioned by any un-foreseen developments at the mines themsives, but has been rather owing to a feeling, which appears to be gaining ground in speculative circles, that these issues are cheap at prevailing market prices. In the case of Kerr Lake, which has made the most pronounced advance, for instance, the com-pany in 1910 paid 40 per cent. to its equivalent to better than 26 per cent. on a market valuation of \$7.50. Similarly Crown Reserve at \$2.43 yields 25 per cent; Niplssing at \$10.80 returns 17 per cent. and La Rose at \$4.65 brings in about 9 per cent. The large returns indicated on the shares at pre-

to close market followers The last report on the mine, made public toward the end of the past year, made such a palpably prosperous showing that a bonus was cleaply in order. As indicated in the statement of the president at that time the ore reserves showed an increase of some three million ounces, the production was in excess of the year previous, the cost of mining per ounce of silver had been decreased; and the company ad a much larger surplus on hand had its intervals of interrupted pros-perity, as for instance, when the div-idend was discontinued, but the com-pany seems to be on Easy-street just now, and should continue to make

one-half of the disbursement being a straight dividend and the other half a bonus. The distribution of profits has been long expected, and considering the robust condition of the prop from the South Lorrain field, and the large cash reserve held in the treasalmost conservative. It was stated semi-authoritatively some time agother there was actually in sight on the

#### Gould Shaft Down 121 Feet

A. P. Seymour, late engineer of Cobalt Lake Mining Co., says that the Gould shaft, now down 121 feet, need only be deepened another 50 feet to cross-cut for the valuable veins of Savage, Provincial or Nipissing, one or all of which no doubt extend across the Gould property. These big shippers located their veins at this depth. Three mining engineers have assured us that Gould is the best speculative purchase in the Cobalt camp.

Don't be stampeded into selling. In their opinion, it is better than most of the non-dividend paying Cobalt stocks selling at many times the price of Gould.

## PORCUPINE MAPS FREE

We have had prepared at considerable expense a thoroughly reliable map of PORCUPINE, 36 inches by 40 inches, showing the location of the claims in this rich gold district. We are distributing the maps FREE, and will mail them to applicants in any part of the work. The shipments for the week were 821.105 pounds, or 410 tons.

The shipments from Jan. 1 to Jan. 14 were 3,031,963 pounds, or 1515 tons.

In 1910 the shipments amounted to 34,420 tons: in 1909, they were 30,096 tons.valued at \$12,55,321; in 1908, 25,463 tons, valued at \$0,123,378; in 1907, 14,040 tons, valued at \$1,478,196; and in 1904, 153 tons, valued at \$3,900,000: in 1906, 2,144 tons; valued at \$1,478,196; and in 1904, 153 tons, valued at \$130,217.

A trial shipment from the M. J. O'Bri en, amounting to 4300 pounds, was shipped specialist in Mining Security. Write at once, as the supply is not unlimited.

#### UPWARD MOVEMENT IS SLOW BUT KEEPS THE MARKET ALIVE

Endeavor to Attract Bigger Public Interest.

the short side and naturally helped out the insiders. Any activity has transsteel and Readings The enormous dealings in these issues can lead only to the conclusion that the matching of greater extent then usual. The fact is that the market has to be kept alive for the purpose of creating interest and the burden of doing so devolves on the syndicates owing to the still small public participation in the dealings.

Topics" and other side assistants to the exchange by which the public lose their money has been sufficiently pessimisfic to lead to short selling, and few who have taken this side of the market have been able to cover without losses. The increase in idle freight cars, the suits against the various corporations, the relaxation in business, and declibing railway earnings have served as themes on which disastrous breaks in stock prices have been built. Outside traders have as a matter of fact taken sides against the financial interests with the unfalling result. Speculators who have followed the trend of the market have not made much, because of their impatience at the slow advances permitted by those who dictate quotations.

The day-to-day money rates show that there is an abundance of funds available for the market. Rates have ranged between 2½ and 3 per cent, and with the accumulation from the

5000 CLAIMS STAKED

Porcupine District is an Extensive One -Figures of Staking.

PORCUPINE CITY, Jan. 17 .- (From Our Man Up North.)—Some indication us to the magnitude of the mineralized belt that runs thru this district, and also of the very large amount of development work that has already been done, is obtained by a glimpse at the figures of the staking that is already done. A total of 4632 claims show up in the maps, while undoubtedly 500 more are staked which do not yet show.

The figures are: Whitney, 576 claims; Tisdale, 576; Shaw, 500; Delora, 500; Langmuir, 400; Carman, 330; Eldorado, 390; Mountjoy, 300; Thomas, 300; Ogden, 200; Godfrey, 300; Cripple Creek, 300; Adams, 75; Cody, 75; scattering, 300. Total, 4632. A claim contains 40 acres. Charles Fox

# TAMMAS INGLIS

#### How He Won the Game and Lost the Election---Specially Written for The Sunday World by Ian Campbell

Mid-winter in these undulating uplands is as a rule rich in charm. The keen north winds indeed ever blow interest in politics," said the agent.
"That's true eneuch," replied Andra. snell along the hillsides, and the snow drifts whyles lie deep and still in the Lowes. But there are days when the crisp air is filled with music and fer them or a's said."

chimes like distant fairy bells. The sun traces his course, a dull disk of vermillon in the reek of the sky, but ponents, and that'll finish us." the delicate tracery of the silver birks the delicate tracery of the silver birks and that it lims us.

I'm not just so sure," interjected sparkle with jewel points. Merry chilars a new voice. "It's quite true we'll no dren sall their mimic fleets down the brooks, spanned with crystal bridges, and the dry sedge grass rustles among all. helr feet. The men folk, too, feel an inwonted stirring of the blood and the good wives look a little askance when handles are looked out and the is the glamor of the great wizard of the north that touches them. Their ears itch to hear the shout echo from the silent hills and the roar of the curling stone as it breaks in undertones that rise and fall but never disappear. therever Scotsmen gather and cast their spell over men of many nations. pecause it brings with it the king of games the roaring game in more senses than one Curling—that warms hearts and nerves arms; that knits served—but not at all a pleasant adverpeer and peasant; master and man, rich and poor, old and young into one genial brotherhood. Once on the ice there is no other grade than that of skill and that cannot be bought. Thomas Inglis.

Among the crack players in the district none was better known than Thomas Inglis, dry stone dyker, a good on the moorlands. A blen man he was, with a good-sized croft and steading of his own. Locally he was always called "Auld Tam." hot so much on account of his actual years as because afternoon drew to a close it bore every the epithet fitted him. His appearance appearance of continuing. Altho the suggested well-preserved age, but relatively to many of the evergreen patriarchs who flourished in those latitudes, he was but a chicken. Perof sixty, a little round in the shoulders from his many seasons of dyke buildng and croftering, but alert and active

set, a typical head adorned with a pro-fusion of hair, tangled and gray—such was Tammas Inglis. Keen in every-thing he was—in affairs of church and George Carr—that's the laird's state as well as in curling. A dour mason"—this to the agent fighter who never lost heart and not planatory aside—"have won infrequently wore down his opponents by sheer tenacity and determination. Counted a pillar, too, of the little kirk, it to keep. They're baith in the final that lived on the tradition of the again and auld rivals. Tammas wad whose hard and inflexible creed encouraged and confirmed the natural bias of his mind. His detractors indeed attributed to him not a few of the characteristics satirically portrayed by Burns in his self revealed 'Holy Willie,' and hinted he was fully more than tolerant to the defects of the elect. But erant to the defects of the elect. But median inflexible creed encountry town and village has that it behooved him to see them to see that it behooved him to see them that it behooved him to see them that it behooved him to see them that it behooved him to see that it behooved him to see that it behooved him to see them that it behooved him to see them that it behooved him to see that it behooved him to see them that it behooved him to see them that it behooved him to see that i whose hard and inflexible creed enthan many, probably most, professing Christians of his day and generation. His chief stone of stumbling was one only too easily found in the place where he dwelt. He could not always ing and winking in a tumbler of steaming toddy, and once he got fairly started, was apt to take just a drop too much. Nor can it be denied that his morning reflections were more con-solatory than reproachful and that he was inclined to regard such lapses into original sin rather as gentle reminders of his mortality than as a fall from grace.

It was, too, the eve of a parlia-mentary election—a bye-election to be strictly accurate. Political feeling in deed was never entirely absent from the little social circles of the district. undercurrent of it was always sent, and even when personal liking to some extent modified party rancour it affected judgment. nantizans invariably attributed all the fallings, and demerits, real or imaginary, of their opponents, to the unfortunate color of the offenders'

Party feeling this time ran higher than usual. In former contests the preponderance of one side had been too marked. The efforts of the outs had been directed rather towards lessening hostile majority, than with any real idea of interrupting the long tradition of the constituency. But for various reasons some personal others general, the assailants entertained a they prudently expressed with some reserve, but set themselves resolutely to secure. The defenders to secure. The defenders, among whom Tammas Inglis was reckoned. all constituencies who, being without convictions-or perhaps incapable of felk will no go without him. forming them-generally take a long time and urgent pressure before they can make up, what they are pleased to call, their minds. Checking the Voters.

In the afternoon of the day preceeding the poll and in an upper room of chief village inn. a small company had foregathered. A few leading members of the district committee, along with the principal agent from the distant city, were going over the list voters and making final arrangements. As the reports were made the dare gang agin' his master." ngent ticked off the names with red. blue and black ink and listened, half smused, to the local gossip with which the proceedings were enlivened. After send Geordie and his rink owre in the sn unusually long digression of this prompin. Ye know how anxious he is nature, the agent, taking up his pen, to see his guid brither our member

"And what about Howfoot—that's the sure whether this is quite fair."

'A weel, I was just comin' to them." said Andrew Stanelaw, the village livee saddler. "Ye ken, they're gey pack corruption onyway.

Tammas." corrobotated James Dims-dale. "If we could get him laid by the lugs for eight and forty 'oors !t wad and get him to sen' Geordie owre -by

heartenin he gies.
"I understand they don't take much

"they dinna, and they're no just vera keen to gang either, but they'll do 't to please Tammas, for he's dune a lot fer them or a's said."

get them to vote fer us but there's "just a chance they might not vote at

stoutly built, heavy jowled, with a round, bald, bullet head and a general regarded by his antagonists as their he was an artful dodger and not easily ous to his friends and therefore well sary to those who crossed him.

His remark arrested instant atten-

tion and looked over interrogatively convey the idea of recognition and Mr. Fordyce looked meditatively out

of the window and unconsciously re-"If the frost hauds, I'll no say but it

ing a moment or two, said.

"Gles' your mind, Tom."
"Weel," resumed Mr. Fordyce, "Ye covenant and the killing time, and gie a' he's worth to hing it up on his

Mr. Fordyce's glance traveled round.

"Wad it be possible to get Geordie to play the morn and lose the game?" The suggestion caught on at once but the varied expressions curlously blended appreciation with scepticism. Andra stroked his beard, opened his mouth and regarded the speaker: "Geordie loss to Auld Tammas in the

played if he can help it-that's ma mind onyway.' The others nodded assent-such possibility as George Carr playing to

Keen lose the gold medal-it was inconceivdaile. "Geordie'll no gie in willingly-

"Then the laird maun get him to do't dwce and proceeded to explain to the agent that some years before the laird had presented this gold medal to the district club, stipulating that if by any chance the same rink ever won it three times it would become the have been played had the previous boasted indeed quite as loudly as be-fore, but were not quite unprepared for the skips had agreed to meet on the feat they did not for a moment anticipate, but none the less exerted following day. If George brought over themselves to the utmost to maintain his men Tammas would either have to their position. Both sides worked play or yield the game and medal to strenuously to secure the support of his opponent. If he played and won-that indeterminate section common to the schemer dryly remarked—"the poll will no see Tammas and the Howfort

> From the private reports before him the agent felt, assured the diection would be a close one—a few votes might mean much. He took off his spectacles, rubbed them thoughtfully, replaced them and remarked: "Well, I don't know anything about

> these matters, but if it's, feasible might be tried." "It canna' be done," said Dimedale, 'unless ye can get the laird to fa' in wi' the arrangement and gie Geordie

his instructions. "Weel, weel, the laird must be seen, said Mr. Fordyca, "and sir, ye'll have to see the laird yoursel' and tell him to mornin'. Ye know how anxious he is

"Why not?" expostulated Mr. For-"It's surely no bribery and wi Auld Tammas Inglis and nae doot doesna go to the poll it'll be his ain they'll a' gang wi him. We've nae fault, naebody will hinder him an he's chance there and I'm tellt he's gaun to planty o' time baith to play and vote tak them a' owre the morn efter they if he wants to—but, take my word, sir, get him to play and win and laave the "Ay, ay, he's a canny ane, is Auld rest to me, 'an be quite sure naething

Ye quite understand, sir."
The agent nodded, put away his pay-

lover of prosperity. He was the larg- friens, here's to oor candidate and est licensed grocer in the district and Auld Tammas may the morn see them carried on an extensive business large- baith winners, the ane fer the sake o' doon and tell him." stance to which cynical opposition. Shrewd, at all inwilling to see the representating the solution of the political complexion. Shrewd, at all inwilling to see the representating the solution of the soluti The shrewd plotter counted Noo, lads, what'll re hae, a wee drap ment?" on Tammas once more yielding to his oct o' Jeroboam?"

> as sailors say, embroidered with the stars. It passed into the gray mists of morning. As the light increased the course of the river that meandered thru the strath was easily traced by the long serpentine column of vapor that rose from its surface. Those of the illagers who were early astir stamped their feet and rubbed their hands while they greeted each other with a friendly "Cauld mornin'." Mr. Fordyce, as usu-al, was in his shop at the back of eight their places and to exchange the time day with the few forgetful customers who dropped in for breakfast requisi-tes. About 9 o'clock he was gratified by the arrival of a trap bringing George Carr and his players. As it drew up glistening as if it also had been lying

"Man, Geordie," he said, as he shook hands, "I'm gled to see ye. Hoo's a' wi' ye the day. Come awa' in fer a minute, the frost's keen, keen. Ye maun hae had a cauld drive?"

"It is cauld," replied George, "but it's a gran' mornin', hoo are ye yersel'?"
"Hae, man, tak care o' thae stanes. taken it upon himself to assist in Aft-

medal."

"It will be that," rejoined Andrew, "he's bad eneuch a'reauy, what'll he be then?" and the company smiled,—all but the agent, who being city bred, was not quite up to the inwardness of the company smiled,—all the agent, who being city bred, wirebuller stretched over his own particular preserve. It was unpretentious the conversation.

The walls limed with to the election of the community and, well, any tion of the still adorns tame to mas. How are to the still adorns tame to make the mas in less the stell thank ye," said Tambus in the soul that to the other. Mr. For one mas, hoo are ve this mornin."

the leaders opposed to Australian rule.

the, with the right of entree and the "Noo, Tammas," said the willy Mr. he canna' thole to-lose at the best and sift of the uptak, dropped in quite by Fordyce, "ye ken that's mae excuse, ye ken as weel as me what this game accident. Wonderful actors are these there's nothing to hinder ye gaun to

his own club successful. Honors Inglis at the Howfoot and tell him the canna be dune."

"Ba.ne." said George. "Ye're the unique with the medal of the win on his merits game accordin to arrangement, and win anyway and he would not here, come roun by Ballie Broon's, he's agreement was made in your presence a few drams in the hour of his the umpire isn't he, and warn him. I ask you, sir, what was the agree.

What would he do play a trifference of the compared with these.

So saying, he reached down the de- plied the Balle. "It was play the first and Tammas'll draw it-its his favor-

"Noo Tammas what do ye say, ye main see I that no option, seeing ye've lots sage being duly delivered. Tammas had the out with. "An' what's brocht him here the day." I'll play nae medal game, sae he can just gang hame again."

"O, weel." said Johnnie, "Te can please yersel. I've said what I was tell't and ken mae mair about it. He's doon the toon if ye want to see him. I'm gaun roon by Balife Broon's to warn him."

"Ay, is't," replied Johnnie. "They we be noot an' I heard Jims Dimsdale say it's in gran' order."

"Weel, weel," said Tammas.

"Noo Tammas what do ye say, ye main from all as George's stone came up thought of the guard a little more to the side and turning off itself left the winner open. "Now Tammas," shouted his third. "Te ken what to dae set on my cowe with the inturn and ye'll come tae't. "Man" said Tammas, his eyes gilstening and all his soul in his face. "It's and then what a wictory it would be if he won it—his candidate to beat the laird's guid brother a rand he himself to take home the laird's guid brother and he himself to take home the laird's prize—then he thought of the piace of it. Stan' it's in gran' order."

"Weel, weel," said Tammas.

"Noo Tammas what do ye say, ye main from all as George's stone came up the form all as George's stone came up the form all as George's stone came up the form all vites with just sufficient force to move the guard a little more to the side and turning off itself left the winner open. "Now Tammas," shouted his third. "Ye ken what to dae—set on my cowe with the inturn and ye'll come tae! "Man" said Tammas, his eyes gilstening and all his soul in his face. "It's an unco narrow port, but there's nae—thing else in't."

"G'wae hame Tammas, it wad left a hay stack thru. I've seen ye dae on the laird's prize—then he thought of the piace of it. Stan' by the soop, men, when I gie the word." I've weel, "said Tammas retired backward a bittle, in the inturn and ye'll come and he is the form all with the inturn and ye'll come the form all with the inturn and ye'll com

"If that's to be the wye o't, I'll play," "That's recht Tammas" came from

Mr. Fordyce, I'm ready," and so saying a ready that the medal game's to be they accompanied the latter into his played." without ye for alnoe." So the assembly dispersed with a general expression

Tam- would be a glorious finish to the elec-

wearisome, to detail the run of the game. George soon fell behind and did not show any of his usual fettle. His men gave him plenty of the rough heartening, which finds vent in phrases, handed down faithfully from generation to generation of curiers. But what this failed to do, the good humored chaff of auld Tammas at last fered from Tammas on the solid earth. His reserve and austerity vanished, and his enthusiasm broke into a running commentary on the progress of the game. At a very early stage he pro-duced a "sweetle" of Father uncertain color in honor of the first exceptionally good shot played on his own side it was then handed about the rink as it seemed to be deserved. As for George, who had no liking for his job, he felt unusually irritable and Tammas' racking was ill to thole. A n. m.n. Georgie's clean cot o't the day.' 'Gie him the sweetie, he's playin' oor game," "Tuts, tuts, he canna play for candy" c.c., etc., roused him to such an extent that he became oblivious to his instructions. Point by point Tammas' lead was wiped off until, at the second ast end, a rather lucky three made the

Mr. Fordyce who had made his appearance durin the afternoon after preparing for the presentation of the mecern. He recognized his blood was up manner to propose the Q and that he required careful handling. family, who were duly drawing up of an erewhile losing rink, for ye."

So the onlookers settled into their This was true enough, they had been places and awaited in almost unbroken silence the decisive end. George of course had the honor and

his lead played him such a stone as a skip loveth, straight howe and just in-side the first ring. "Weel curled, Dan-vit, that closed it," showed his fellow-players' appreciation. Tammas' lead drew past carefully and gave him a good side shot nearly tes high. George directed his man to lift his first stone a yard, which was neatly done-making it shot and guarded. A shout came from his own side. The crowd drew a long breath—some expressively india long breath—some expressively indi'Just ae curlin song, Tammas, and
cating it was all up. But there's many then we'll let ye go. We maun hae that

the fither airt na." Then remarking foot folk winna lowse, thi the dark-the stones for the first time. "Ye'll do nin. But here's the Ballie, he's the man placed—the inwicks failed to come off. and as I have to see the laird at any rate, I'll mention the proposal to him, Good day to you all."

George, with equal ingenuousness, modded and said. I buse to come, tor its the artangement to play the first modeled and said. I buse to come, tor its the artangement to play the first harden day are ken. I jalouse the ite county town, who had now returned the county town, who had now returned to this native place, there to spend the winning shot being at the time three youngles, with his first stone laid down a long guard to decide between ye."

Bailte Brown, once a magistrate of the list stone laid down a long guard in the long specific county town, who had now returned to this native place, there to spend the to his native place, there to spend the winning shot being at the time three is a rich. I make a pood currier for all that. As he approached with his accustomed self-in a lower, replied Dimsdale. "Ye'll have a sheet o' glass and bearing a owner, replied Dimsdale. "Ye'll him pass inside. Rubbing his hands, he greeted the rival skips.

"If Geordie comes and does as he's take a sheet o' glass and bearing a owner, replied Dimsdale. "Ye'll him pass inside. Rubbing his hands, he greeted the rival skips.

"If Geordie comes and does as he's take a grant game, Geordie, but matelyt, I'll lay may held it comes off."

"If she a sheet o' glass and bearing a owner, replied Dimsdale. "Ye'll him pass inside. Rubbing his hands, he greeted the rival skips.

"If geordie comes and does as he's take a grant game, Geordie, but matelyt, I'll lay may held it comes off."

"If she a sheet o' glass and bearing a owner, replied Dimsdale. "Ye'll him pass inside. Rubbing his hands. He winner—a difficult but not absolutely impossible shot. Amid cress of the first time country town, who had now returned to the time country town, who had now returned to the stone of the first time country town, who had now returned to the time country town, who had now returned to the "If Geordie comes and does as ne's had a pare," replied Dimsdale. "Ye'll had many held it comes off and the final fussion, here's to correct the sake of the comercy and the final fussion, here's to correct the sake of the comercy and the final fussion, here's to correct the sake of the comercy and the final fussion, here's to correct the sake of the comercy and the final fussion, here's to correct the sake of the comercy and the final fussion, here's nothing to play his last stone. As he passed he was touched by Mr. Fordyce, who tried to give his remarks a literary flavor, of the country and the tither fer the sake of t

There's no doubt about that," re-d the Baile. "It was play the first Jims Dimsdale here says it is, and I can will believe it. But if Tammas has ony doubt I'll inspect it."

On there's naie need o' that," said that third player yelled excibelly as the rest of the rink raised and more or less of the grog consumed as the thirst or manners of the individual prevailed.

Méantime Johnnie, nothing loath, proceeded on his errand, and found Tammas attending to some orra jobs in his back yard, attired in a garb which succeeded in indicating at once the unusual character of the day and the thirity habits of the wearer. The message being duly delivered. Tammas has no option, seeing ye've lots of the rink raised their cowes to sweet. The medal:

"If sae and ye're ready, ye have that his back yard, attired in a garb which succeeded in indicating at once the unusual character of the day and the thirity habits of the wearer. The message being duly delivered. Tammas has no option, seeing ye've lots of the rink raised their cowes to sweet. The medal:

"If sae and ye're ready, ye have that his eagerness he shouted, "he's takin and in the same and the row of the game and the game

> Tammas retired backward a bittie, keeping his eye on the port—came back again and altered the directing cowe a trifle—then skliffered smartly up the rink. Setting himself at the hack he carefully swept the howe ice in front and the sole of his stone adjusted his and the sole of his stone adjusted his sole of his stone adjusted his the sole of his stone adjusted his his the sole of his stone adjusted his sole of his stone adjusted his his sole of his cap and gave himself a hitch. "He means it," said a voice at the tee head. Cool as if it had been the first stone has done that it is all Tammas. "he and not the last, he fitted the ice, his didna leave muckle." "Dinna tell me keen eye never leaving the steady cowe that. It was a gey queer shot and him

ye'll just hae a wee drap o' my special. as I hae reason to ken." It's no every day ye hev the chance o' that." Tom made a show of hesitation and then tasted it. "Hoot, man, tak it up, it'll dae ye nae harm. Ten 'ear suld in sherry. There's no a 'ear sold in sherry. There's no a headach in a gallon o't." So Tammas finished it. Others were pressed upon him with that persistency which is, alas! too common on such occasions, and by the time they reached the club house the spirits were "reamin' in his noddle." He therefore fell in readily

the chairman's left. The room rapidly filled-a solid phalanx of Mr. Fordyce's friends hemming tam in completely. The decanters, bowls of sugar and kettles of hot water were set down and the tinkle of the glasses became faintly distinguisrable amid the babel of tongues. Bailie Brown was in his dal and the customary concomitants, element and when the pies had disapwas watching George with some conmanner to propose the Queen and royal He tried in vain to catch George's eye.
Whether by accident or design their glances never met and as the crowd moved in mass to the other end of greatest enthusiasm. Tammas replied the rink he had no opportunity to and made a move to retire, but Mr. speak. He hung therefore on the cutspeak. He hung therefore on the out skirts waiting his chance to give him skirts waiting his chance to give him arm. "Te mauna leave yet, Tammas. Ye must propose George's health, ye excitement was at its height. This ken, and then there's the chairman. excitement was at its negative and was a finish the real curier loves not yer umpire be maun bonor him." "But the runaway win foregone aimost from all hev to yote." said Tammas. "Hoots, the beginning but the even give and man, ye've plenty o' time and the the beginning but the even give and man, ye've plenty o' time and the take or better still, as here, the slow Howfoot folk are a' doon there ready

and were enjoying themselves and were in no hurry to leave. Tammas resumed his seat-another supply of hot water was ordered up-there was renewed brewing of toddy and by the time the last toast had been reached Tammas also had reached the dary line. His common sense told him he had better go, but yet he played with temptation. He made a halfhearted attempt to retire but it was more out of respect for his inward monitor than with any real resolution. slip on the loe.

## Dominion Forestry Convention

Among the more notable events of the past week were the sessions of the Dominion Forestry Convention, held in the City of Quebec, between and including Wednesday and Friday. Its importance was signalized by the appearance of the Premier of Canada in the chair and its formal opening by the governor-general. Many other prominent representatives of the Dominion and its provinces also participated and gave expression to their sympathy with the movement for conservation of Canadian resources and their readiness to co-operate in establishing it as a cardinal feature of national and provincial policy. Gratifying as this demonstration s of the wide and strong interest taken in conservation, it is none too marked when its bearing on the future of the country is considered. Wise men and wise statesmen look ahead, whether in the management of their business concerns or in the conduct of national affairs. They do not destroy valuable prospective assets in order to secure some slight or greater additional profit for the moment. That foolish question: Why should we care for posterity—what has posterity done for us? is all the more foolish on account of its superficial plausibility and the measure of truth it distorts. No man acts prudently who lives in needless penury and hoards his treasure for others to squander and dissipate—that nation would be fatuous which refused to take the fullest possible advantage of its agricultural, mineral and forest wealth. But there is a vast difference between careful and prodigal administration of personal or national property. One way leads to continuing prosperity without sacrificing present profit—the other sacrifices the future without corresponding advantage.

There is, of course, a plain distinction in the character of national resources. Land may be impoverished by reckless husbandry, forests may be ruined by wholesale destruction of every growing tree they contain, waterpowers and mines may be handed over for private profit, without protecting the public interest or requiring them to be utilized for the benefit of national industries. When these things are done, the nation that permits them has laid up for itself a vast heritage of trouble which it will have to pay dearly for when the gross evils they bring call clamantly for redress. Canadians have no excuse if they fall into the errors of policy in regard to their national resources which have created present-day conditions in the United States. Never in the history of the world have a people so misused their original stores of natural wealth. The huge forests of the Eastern and Central States are practically barren wastes, their coal is held by a huge railroad monopoly, their oil wells are mainly tributary to another great capitalistic combination that has trampled ruthlessly on public rights, their water powers are going the same road unless the awakened vision and the higher standards of their rising public men can prevail and compel the adoption of right principles of administration. As it is, the efforts to obtain redress, to regulate public service companies, to dissolve monopolistic combinations acting in restraint of trade and to preserve the national resources that are still under federal and state control have proved difficult of accomplishment, and in many cases the measures passed by congress and the state legislatures have been held unconstitutional by the supreme court. Canada will richly deserve to suffer if, in the light of all that has happened in the neighboring republic, they fail to profit by its experience.

Regarding the particular purpose of the convention, many excellent papers were read on the various branches of forest administration and regulawhich called for attention. Protection against fire is a pressing question, and one where to be penny wise is emphatically pound foolish It would be difficult to estimate the losses sustained thru forest fires this is certain that the provision made against them has been hitherto totally inadequate. Absolute security from outbreak is perhaps impossible, but that their destructiveness could be very considerably curtailed is in accordance with expert opinion. Constant observation by experienced rangers, the adoption of the precautionary measures which have proved valuable elsewhere, the provision of proper equipment and convenient means of communication are all practical measures Of equal importance are the regulations governing those who have occasion to pass thru the forests, particularly the railways, which cause many fires. In his contribution on "Forest Administration," Mr. R. H. Campbell, Dominion superintendent of forestry, stated that during the past season out of 1226 reported on Dominion lands, 186 were attributable to the railways. He recommended various methods of reducing the risk, but declared that a fire patrol is necessary and would be more effective under government supervision than by placing the responsibility on the railways, even tho enforced by heavier penalties But he urged that they should bear a fair share of the expense. Every one, except those influenced by railway company notions, will agree that "there is no sufficient reason why the railways should not be liable for damages, the same as a private person, or why penalties adequate to enforce care should not be provided."

Dealing with the query: "Shall Canadians Conserve or Destroy New Forests?" the Hon. E. R. Bronson, Ottawa, remarked that it is the accepted opinion among practical lumbermen that much more timber has been destroyed by fire than has been cut by the axe. Owing to the absence of conservative methods of management,, our best timber and probably the greater part of it, of whatever quality, has disappeared. That renders it all the more necessary to adopt better methods of regulation and administration, and to ensure that, all the land unavailable for agricultural purposes snall be maintained, where suitable, as the basis of a continuous timber supply. Forests can be perpetuated as well as harvested and their value is by no means confined to their lumber yields. They are of the utmost service as storage reservoirs of water powers, to use Mr. Bronson's expression, and under scientific methods can be made to fulfil all the ends which they subserve without in the least interfering with their use as timber producers. It is unsatisfactory that, at this time, so much hesitation should be visible in taking a broad and comprehensive view of the Canadian forest situation, and this on the part of the Dominion equally with the provincial authorities. Reforms are made in details, but no effort is made to treat the problem as a whole and to formulate a scheme that will cover in its scope all that is required to establish a system of forest administration worthy of the century and the place of Canada in the

#### A CLOSE FIT

#### Fate of Independents.

That was a strange tale that came from Ottawa last Monday. The story was that Arthur Gilbert, the newly elected Nationalist member of the house of commons for Drummond-Arthabaska, and his family narrowly escaped death from asphyxiation in a house occupied by them

Let us look into the details. house, it seems, is owned by government. A couple of employes of the department of public works were sent down to put the plumbing in order, and to light a fire to warm the new member. Being from the back country. Mr. Gilbert is not acquainted with furnaces, and the escaping fumes were not detected until almost too late to avert a tragedy.

What is the moral of this near fatality? Independent members of parliament should keep out of government-owned houses. We can imagine that if Mr. Gilbert had succumbed to the deadly fumes an unscrupulous opponent of Dr. Pugsley, head of the department of public works. might have suggested that he had conspired to get rid of a troublesome member, and had sent two of his minions down to the Gilbert home to slav the gentleman and all his household in cold blood. That sort of thing is not unknown. Way back in the fifteenth century King Richard invited young princes of the blood royal to be his guest in the tower, and while the little innocents were sleeping training to keep him below the limit. sire (whose stern paternal parent holds on their downy couches, unaware of

We would advise Mr. Gilbert to move out of government lodgings. As the fierce opponent of the naval policy of the government and a man who is aiming to destroy the power of the empire, it might be considered wise to stop him, and we know that when the defence of the empire is at stake the king can do no wrong. If Mr. Gilbert had been smothered in his Octawa home, as the young princes were smothered in the tower, there never would have been a shadow of an investigation by the coroner's jury.

The Tragedy of Harp and Hood & CRUSTS & CRUMBS By H. M. Mosdell

and the first rude breathings of on- lantic coming winter had thoroly chilled the air and set a thing coating of ice over The the more sheltered arms and inlets of with the sea. Day by day, as the cold grew hand. The light, wintry sun

Thew bird and beast and fish, obeying nature's unmistakeable warnings, moved off southward to latitudes where the seal of winter was not set on their supplies of food. Just beyond the edge of the freshly

formed ice a vast army of seals gamboled in the chilly water. Restlessly they moved to and fro, their black heads popping above the water for a short time and then bobbing quickly down as they dived with amazing rapidity after their food fish. At first glance it looked as if the flashing, hairy armies, each keeping strictly and exclusively to its own watery domain and roughly warning off interlopers with teeth and clawed flipper.

Closer inshore the water-sprites wer brown-coated and marked on the back with a number of dark spots which radiating from the shoulders towards the stilly night, the wirely hand ventures on a tour of investigation, upon being touched, this invention wriggles and squeaks like a live mouse. Trade reports say it is selling well and "is real cheap at two bits." The rumor that Bishop Du Moulin has ordered half a gross to be presented to the Anti-Suffraget League so far needs confirmation. and entending well up to his eyes a peculiar covering or bag which be in-flated with air for the protection of his tender nose in his numerous scrape with all and sundry who came his way. Big, quarrelsome, solitary and inde-pendent, the Hood seal in almost every characteristic was almost entirely the opposite of the lighter, more timid and gregarious Harp.

It was September month and the two great armies had met here on the coast of Northern Labrador in the first stage of their annual journey southward. Away to the north and east lay the ice-covered shores of Greenland, the summer habitat of the Hood. The Harp had migrated from the shores of the northern Mediterranean, Hudson Bay Rapidly and persistently they move on southward toward Newfoundland kepping well ahead of the fast-formding ice. Every bay, every flord was invaded in their progress and salmon, sea trout and codfish snatched there from as food. Finally the opening of the New Year found the two big armies at the end of their long journey on the Great Banks, the vast oceanic shoals, lying south and east of Newfoundland. The waters were warm and fish life abundant and Harp and Hood

But, after a couple of months of this high living a restlessness begins to show itself in the herd, and finally small detachments lead the way northward, followed very soon by the main body. The seal is obeying the call of nature and is forsaking his wild, free, roving life for the family cares and duties necessary to the preservation of kins of England. Here is a late one his kind. On the southern showing his ready wit. When a young Labrador coast he met his kind. On the southern part of the the great Arctic iceflee moving south and here he recognized the scene of his brief family life. The seal and his myriad fellows mounted the ice. Harp and Hood still holding aloof and maintaining their relative positions on the landward and seaward

portions of he floe. Marp seal being on that The portion of the ice which was farthest removed from the influence of the ocean billows found it somewhat difficult to get at the water from which he derived his food, but after much hard and patient labor, he succeeded in making his own "blow-hole" down thru the ice, near the spot which he and his mate had chosen. The Hood, however, occupying the more broken, seaward ice was not so bothered. It was easy for him at any time to slip

The brief arctic summer had ended dark bosom of the stormy North At- black shapes came up to the edge of lantic the young seals were born to the icefield late one evening, passed both Harps and Hoods. the loose pans of Hood ice on its outer the loose pans of Hood ice on its outer bounds and made fast to the firmer bounds and made fast to the firmer flow whereon the Harp families were youngsters and their dwelling. Then, as the doors of the dwelling. Then, as the doors of the bounds are their dwelling. Then, as the doors of the dwelling winter with the provided bounds are the former flow whereon the Harp families were dwelling. Then, as the doors of the dwelling winter with the consideration to discover whether the firmer flow where the flow where the firmer flow where the walling, child-like cries arose on every hand. The light, wintry sun shone gitteringly on the snow-covered ice and on the myriad young "whitecoat" Harps, whose yellow-white fur looked almost like splashes of gold on the snow-whose yellow-white fur looked almost like splashes of gold on the snow-state ward as far as the eye could reach stretched bobbing ice-pans, each bearling a Hood family, including the small left the defence of his family to his whose yellow-back" baby seal. zoological gardens Dr. Chalmers farm and engaged him to start a farm.

However, the farm was started on some bleak flat fields—eight or nine acres in all—fenced into separate paddocks and stocked with eighty In the course of a tour of the German the experienced manager of an ostrich ninety birds. The fields were sown with lucerne, on which the birds fed freely, and their diet was supplemented ith crushed bones, boiled maize, etc. In the centre is a big shed in which the birds feed and shelter, but the doors and windows remain open. This shed is carpeted with peat moss and is divided into small "cubicles."

A great incubator hatches the eggs, taking the place of the tropical sun. and the young birds run about on a miniature Sahara of sand.

"When we sawthe farm," said Dr Mitchell, 'there were forty or fifty birds, and all bred at Hamburg. There was a fine show of feathers, for which good prices could be obtained. The whole farm was a most eloquent sermon on the value of fresh air as op-

posed to mere heat."

Dr. Mitchell said he saw no reason why equally good results should not be possible in England.

"You must have an experience manager," he said, "a dry, sandy soil, in a spot preferably sheltered on the north and east, and then there is no reason why an ostrich farm should not be made to pay in England.

Uncle Hiram, on his annual visit to New York, stopped in front of a fashionable store on Broadway and read the announcement, "Ladier Trousseaux" "Great snakes, Samathy, he yelled, catching his old lady by the arm," do you see that? Ladies' trouswomen coming to?"

Albert Ernest Stafford

"blue-back" baby seal. The old Harp mate who was courageous enough, but very good resolutions associated with man, a boy or girl, of weak character man, a boy or gard, of weak cametime, may begin, and must begin sometime, shall teach the pre-existence of the soul and the strange opinion of its return to earth, let him be anathema!" pose by determining some small things and faithfully doing them. Nor does a broken resolve mean failure. Brown-and we are not so afraid of amathemas broken resolve mean failure. Browning was the magnificent laureate of those who struggle and fail and still struggle on—"Held we fail to rise, are baffled to fight better, sleep to wake." And we must begin with small things and modest achievements. If the resolver will make his resolution a sensible and an unselfish one he will find greater power in himself to carry it out than if he merely had in view his own interests. For we are all part of a unity of life, members of a great brotherhood, which, whether we recognice and we are not so afraid of anathemas now as we were then, and the "strange opinion" is becoming quite familiar again as it used to be. It is in the light of that "strange opinion" that the careful thinker will make his New Year resolutions. Even the most trivial of them may mean a great deal fifteen hundred years hence. One thing is important to know: it is of much more value to resolve to do something. The old idea of fighting one's sins or one's bad habits or one's a unity of life, members of a great brotherhood, which, whether we recognize it or not, is bound together in the bundle of lives. If we recognize the unity, and work for it, all of it will work for us. If we work only for ourselves the mass of the brotherhood will ignore us and we will have to depend on our own puny efforts. If we determine that whatever we do shall be done regardless of our own interest the whole world will join with us in our struggle. He that toseth his soul shall lose it. He that toseth his soul for the sake of the Great Life, shall gain it in all its fullness.

> weed of self." On the other hand he him, that men may see his good works may use tobacco to soothe his nerves and glorify that Father who is in the in order to emble him to do his work Kingdom of Henven within him. better. There are a few such cases on record, and if the smoker subordinates his smoke to the desire to be fit for his work he may strengthen his sense of duty. Or he may smoke as a disinfectant measure, in order to prevent the spread of contagion and to preserve the health of others, in which more benevolent character. If his re-solve is from a desire to have a purer, ened accordingly.

As a man may thus analoge his reasons for using or abandoning this use of tobacco, so he may of any other habit. If he thinks or studies himself, he will discover that his motives are much more complicated than he has suspected. For he dwells in a rather complicated organism which is the present result of his past actions in this and previous lives. The tendencies of all those actions are towards a state of balance, and his single

er your resolve is a genuine one by this policy, or whether you were only trying to hoodwink yourself. A great many men will tell you how hard they This principle is just as true of the most triffing intention or determination as it is of the most significant. We build up character, in other words, at the height at which we derive our inspiration. The law is absolutely just and fair in this respect, and develops exactly that aspect of character which we render positive by action. Take, for example, the use of tobacco. The average man uses it because it ministers to his sense of pleasure or comfort or luxury—because he enjoys it. average man uses it because it ministers to his sense of pleasure or comfort or luxury—because he enjoys it.
The result is to develop the desire
element in his character. If he persists in its use in spite of being awars
of causing inconvenience or discust to of causing inconvenience or disgust to men require an inner stimulus, and others he emphasizes the bendency to they can gain that by invoking their selfishness in his character. If he own higher nature which is one with buys tobacco the ill-able to afford it, and thereby deprives those dependent apon him of some necessary of life, he still further cultivates what is calline still further cultivates what is calline in oriental metaphysics "the glant that dight that dighteneth every man that cometh into the world, so shine in the content into the world.

petty New Year resolves to be duffed to that extent? Why not? not life the most wonderful thing there is? Is there any miracle like love? You can actually love your enemies, case his charitable tendencies may be strengthened. Or he may smoke with mies, and who would not speak to you the idea of narcotizing the muscular system and giving his brain a less disturbed opportunity for intellectual labor, and the result in character will incharacter will will be a supplied to the world, nor even look across the world with the wor depend on whether his work is selfish or altruistic, the his body will probably suffer. LOCKS HUBBY IN ROOM FLEES WITH REAL LOVE AFTER RIFLING SAFE

> Leaves Note Saying Her Love For Husband Twice Her Age Had Grown Cold.

> BERLIN, Jan. 21.-A well-to-do Berwho eloped under curious circumstances

The merchant, who is aged fifty-six, had been living in ideal happiness with his twenty-five-year-old wife since their marriage in 1908. He did not suspect her affection for the grave, attentive bookkeeper who recently entered his employ, and the young man was invited to join the family for some festivities one evening.

Just after the merchant had handed his faithful clerk a purse filled with self in his bedroom for a moment as she 'wanted to carry out a little surprise for him." He laughlingly complied, and he offered no objection when his wife cried merrily to him, "For safety's sake I am going to lock you

as the minutes grew into half an hour he became impatient and called to the servants to let him out. With the aid of a locksmith his release was effected, and then to his horror the merchant discovered that his wife and the bookkeeper were missing, together with \$300 from the safe, which had been thoroly rified. On the table the met-chant found a letter from his wife saying that here for a husband more than twice here own age had grown cold and that she had decided to flee with the real object of her af-

> > Wit Not Appreciated.

Stubbs was feeling his way to the kitchen stove in the dark, when he fell over the coal scuttle.

"Oh, John," called Mrs. Stubbs, sweetly, "I know what you need. You should get what they have on battle-

ships."
"What's that?" growled Stubbs, as he rubbed his shins.
"Why, a range finder."
And what Stubbs said about woman's wit was plenty.

THE FAMOUS COMPOSING ROOM SCENE IN THE GREAT NEWSPAPER PLAY, "THE FOURTH ESTATE," AT THE ROYAL ALEXANDRA THIS WEEK.

#### Pathfinders for Glidden Tour

Men Who Map Out Route Seem to Look for Worst Roads -and Find Them.

tachable demountable rims, we merely substituted already inflated, tires for substituted already inflated tires for the damaged ones, and got started again in a very few minutes. On roads I cannot dismiss a lurking suspicion I cannot dismiss a lurking suspicion

First Puncture.

On the first day's run from Cincin-rati we picked up a nail, suffered a puncture and went flat. This was our first tire trouble and was quickly reof the tour began and continued without interruption for three days over the tortuous by-paths of Tennessee the tortuous by-paths of Tennessee the tortuous by-paths of Tennessee the car and the farmer, in a recent mud holes, the depths of which could not be estimated until our Chalmers said he had made diligent inquiries as edied. The next day the real work a car escaped tire trouble. A dozen times we tugged the Pilot out of mud to the hubs, built tinde bridges over syamps and make frequent tire thanges. Every hanges the property of the hubs and make frequent tire thanges to the property hanges to the pro

Those Cotton Fields.

Leaving Tennessee, the tourists drove for cash. Leaving Tennessee, the tourists drove thru, immense cotton plantations, finally reaching the Mississippi river reprosite Helena, Ark. A serious additional tempting to board a steamboat before tars and most of it went to farmers. There were over four hundred items. gangplanks leading to the deck of the Every borrower was asked to state boat and was nearly across when one whether he owned an automobile. In plank slipped, letting the car thru into exactly three cases the broowers had

writer saved themselves by jumping, shop; the second was a farmer who but our baggage, spare raiment and had a good chance to buy a quarter everything movable were lost in the section of land that he had long covet-drink. It looked as if the Pilot car ed, and the third was a prosperous was down and out, but with the aid lumberman. The farmers who had bor-of 50 neerro plantation hands she was rowed from this company were using fished out of the water and dragged up the bank. Great was our surprise good land in Texas and Oklahoma. One moral of the example furnished by the Topeka company was that the and the only visible damage was to

the road improvements.

Those fellows who map out that little to Omaha was the longest of the trip, annual pleasure jaunt known as the Dai Lewis ordered the Pilot car out annual pleasure jaunt known as the at 2 a.m. in the pouring rain. A Glidden Tour seem to look for the man who "knew the roads" drove worst roads in the country—and they ahead and Joe Marson's car, are certainly successful in finding which had withdrawn from the contest to take the place of one of the official car, led the Pilot follow-Nearly three thousand rhiles of ruts ing the local car. After struggling and much occasionally seasoned with a stretch of comparatively good going stretch of comparatively good going seems more a test of man, tires and the Pilot punctured a tire running the pilot punctured at the pilot punctured a tire running the pilot punctured at the pil roads than of cars. The writer was over a board full of nails which would roads than of cars. The writer was over a board full of nails which would have made a mighty good harrew. While Joe held a lantern the tire was replaced, and again we had occasion ead mark the route with confetti; this particular car also took special defight in hunting out every deep hole, rough sticky gumbo. The official pilot car sticky gumbo. spot and swamp along the route, showing the others where not to go. Its tires had the provoking habit of "going tame" when farthest from shady spots. In previous tours this would have been the signal for all hands to pile out into the mud and wrestle with the case and the signal for all hands to pile out into the mud and wrestle with the case and tube, but with our Firestone quick-detachable demountable rims, we merely tachable rims, we merely tachable demountable rims, we merely tachable rims, and tachable rims, we merely tachable rims, and tachable rims, an

such as we traversed, tire troubles are that the Gildden tour officials meant that the Glidden tour officials meant the way to out this particular run for a good roads wit these time-destroyers is to provide for them in advance. At the end honor and information gained by the crusade. Whatever the benefits of honor and information gained by the of the tour Driver J. P. Aude publicly proclaimed that he owed much of his success in keeping the tour moving to the quickness of tire changes with his Pirestene rims.

#### Cars and Mortgages

not be estimated until our Chalmers said he had made difligent inquiries as Pilot, trusting to luck, toook the to cars having been purchased by far-plunge. Sharp stumps and stones were strewn over the entire course, and not

changes. Every here and there a stump of a falken tree Best the path of travel, for the new versoutherner prefers to drive around obstructions for twenty years rather than get busy and remove them.

At Nashville, Sheffield and Memphis over half the cars were late and and he wanted to keep it there until the price went up. He really made these controls, it was a noticeable fact that none of the seven cars having Pirestone rims had lost a moment on account of tire delays, all their fest time having been due to mechanical trouble, in fact, this was the usual expenses of the seven control of the seven was the usual expenses of the seven with the seven of the seven through the seven was the usual expenses of the seven was the usual expenses of the seven through the seven was the usual expenses of perence of these cars thrugut the en- made any sacrifice to buy a car. #### Higher Priced Cars But No More Autos

Manufacturer Says Tendency is Away From Low Value and Low Price Cars.

"Millions of dollars more will be invested in automobiles during 1911 than were invested during 1910, but the total number of cars sold will not be increased. The whole tendency of aut. obobile sales for the coming year will be away from cars of low value and low price, and toward cars of high value and better than average price."

So says Charles T. Jeffery, president of the Thomas B. Jeffery Company, who has gathered accurate information from hundreds of dealers in every nook and corner of the United States, and from thousands of owners and

prospective buyers. The head of the Rambler company has just concluded a conference with fifty representatives of the Rambler metropolitian distributing and service centres. From each of these was required a careful report of sales conditions in his territory. These men represent nearly every state in the Union, from Maine to California, and to the information they offered has been added that gathered from a thousand sources, with the result that the following statement has been made by Mr. Jeffery: by Mr. Jeffery:

"The volume of sales of cars above medium price will be larger than ever before, but the fotal unmber of cars sold will not be freater. Those who have previously purchased low priced cars have now been educated up to those of better quality. Taking the different sections of the country in order of their importance, conditions are as follows:
"The Middle West will take a larg

er volume of the output during 1911 than ever before, but while the sales of cheaper cars will be more numerous by far and the greater with the sales of the sale ous by far and the greater volume of sales will be made of those averaging above \$2,00 in price. This is because the farmer will be the biggest buyer and ne wants weight, capacity and power New England and the South, heretofore considered behind other sections of the country in automobile buying, will almost equal the Middle West this

"San Francisco and the Pacific Coast where the better class of cars have always sold easily, will buy more than ever, as present indications are that deliveries cannot be made fast enough. Middle West. The largest increase there will be in closed cars. Chicago has hitherto been somewhat behind New York in that respect. The Northwest, where the largest sales of medium priced cars have been made this year, will take about the same num-as last year. Texas will show a small increase, from present indications, while in the central states the bulk of the sales will be those of the better than medium priced cars and to replace those of lower price. Our sales for the last year have increased 40 per for the last year have increase has been shown in New England and the South.

Second Hand Cars

Many users of cars make their first acquaintance with the pastime by resorted to by concerns not thoroly established as stable manufacturers. Some of these things, of course, were warranted by the changing conditions.

Let be noted particularly, however, the hands of the dealer. If the gentle-It is to be noted particularly, however, that all these things taken at their worst, and including all of the various companies that had gotten into the business thru promotion schemes as a result of the alluring effects of the industry as it looked to the "castle-building" promoters when the lines of profit were at their hight and the supply far short of the demand, did not

#### Aviators' Misfortunes Have Automobiles Reached Rock-Bottom Prices? British aviation has had a troublous, not to say a disastrous, termination to

Has the price of the automobile reached rock bottom? Is the man who allows that "some day they'll be giving 'em away" destined to meet with bitter, not to say cruel, disappointment?

Inability on the part of manufacturers to sell cars at prices lower

than those already reached is declared to be based upon sound principles of business logic. The reasons are many and are contributory to the general result. It is pointed out that price cuts heretofore were made possible by continued discoveries in the matter of manufacturing cost reduction. Since the inception of the automobile industry, thousands of labor and time-saving devices have been added to the equipment of various factories. Also with the added years of experience in car building designers gradually have eliminated from their plans all of those things that made only for excess expense.

Then, too, a score or more of the army of pleasure car designers

now are turning their attention to the commercial vehicle. These men -or most of them at least-are satisfied that the problem of passenger car building has practically been solved. This, perhaps, is pest illustrated in a computation recently made, based on figures covering 1911 models, which shows that the average price of cars produced by licensed manufacturers will be only \$26 lower this year than last. The small reduction, when the important lowering of average horse power is considered, leads one engineer to deduce that the cars to be shown at the coming automobile exhibitions will display a better design and construction and be more efficient and economical than ever. He urges that the price could not be maintained unless the car of smaller power had proved to possess the quality and efficiency of the higher power machines which sold at the same price.

It is reasonable to suppose, therefore, that the man who attends the exhibitions will look upon the assembled exhibits from a viewpoint of efficiency of design rather than cheapness of price. A number of big manufacturers, it is true, have announced big slashes in price, but even they, it is insisted, are prepared for the general ascendancy predicted for the near future. That means, in all probability, there will be no further reductions.

Price tags attached to the cars indicate that some producers already have met the situation by an increase. For instance, one company which last year sold a roadster for \$1250 is now asking \$1500 for the same car, the design and equipment, of course, having been improved upon. Another auto, marked last year at \$2000 has been placed on the market at \$2250, while still another design has been increased in price from \$1100 to \$1325.

So it goes. But the men who have raised prices or who are planning to raise them are emphatic in the statement that the increase

EXHAUST

Study the Simplicity of the Knight Motor

ANY of the greatest inventions are simplest. So it is with the Knight

Where is the more or less complicated syst tem of poppet valves? It is gone. Instead of these valves with their springs, plungers, valve heads and valve seats, we find simply two sliding sleeves inside the cylinder working silently up and

They make no noise, for they strike nothing. They make no vibration. There are no springs to weaken and break. There are no valve seats to need grinding in. There is nothing to get out of order.

The Way It Works

When openings in the sleeves pass each other and the inlet pipe a charge of gas spurts into the cylinder chamber. When similar openings pass each other and the exhaust pipe the burned gas is allowed to escape.

There is no leakage of gas. There is no missing explosions. There is no choking of exhaust. The greatest wonder of all is that such a simple though perfect mechanism should not have been invented long ago.

Russell "26," With Knight Motor, Our Latest Model.

USSELL "26" is a younger brother to Russell "38." The same grade of workmanship. The same unstinted selection of material, only on a scale proportioned to a smaller, lighter car. Yet this car is roomy. The seats are wide. In the tonneau of the regular five-passenger touring body there is room for two extra seats when required. This car is ideal for the man who wants a quality car without extra size and weight.

## Julian Eltinge in

World's Greatest Female Imperson-

In "The Fascinating Widow," which is the attraction at the Princess Theatre, beginning the engagement on Monday night, January 23, Julian Eltinge who is famous for his feminine characterizations, submits to the severest test to which he could be putthat of appearing as a woman women, handsome of face and figure, and exquisitely gowned. Surrounding Eitinge in his new musical play are a dozen veritable show girls, whom Manager A. H. Woods has chosen for their comeliness and ability to wear beautiful gowns gracefully. Yet, it is said that the handsomest and most said that the handsomest and most graceful woman of them all is the man. Eltingenius been known for some little time as an extraordinary artist in his particular and unique specialty—not of canism, should appeal forcibly to the managing editor; Miss Selene Johnson particular and unique specialty—not of imitating, but of really impersonating—various types of femininity. It is said that he first discovered that he had the faculty of doing this when taking part in amateur theatricals in his colimplicating, but of really impersonating—various types of femininity. It is said that he first discovered that he had the faculty of doing this when taking part in amateur theatricals in his college days, but how or when he discovered it matters very little, since it is undoubled to-day that there has never until his time, been a real feminine may be a modern society woman he has been seen as the tathing girlls as a modern society woman he has been clad in elaborate evening gowns and has wom them as well or better than most women could; has has out-Salomed Salome; he has portrayed a dozen different types. And now his great tailent in this direction has been taken advantage of by Otto Hauerbach and Karl Hoschne, to

build a play with this talent as its build a play with this talent as its chief asset, and the result is a comedy rich in humorous situations, clever in dialogu containing surprise after surprise, and always with Elitinge as a central figure. In his new offering the clever character actor appears as both the boy and the girl. The story tells of the love of Hal Blake, a junior at K. College, for Margaret Leffingwell, a co-ed at the same institution. Blake's sult is not favored by Margaret's sult is not favored by Margaret's mother, who is pressing the claim of

"The Fourth Estate" embodies the story of Wheeler Brand, a young newspaper man, who believes unflinchingly that the press should reveal the truth to the public. Because of a story in which he has exposed certain corrupt. practices on the part of Judge Barteimy of the United States court and a man who has always been held in high re-pute by the public, he is discharged by the managing editor of The Advance. His dismissal having been brought about by friends of the judge who are large advertisers in the paper. The Advance, however, has just passed into the hands of a new owner. Michael Nolan, a rough diamond, who has come out of the west with plenty of money and a natural, sincere desire to be honest. Learning of the dismissal of Brand and the reason for same he re-instates him, promoting him to the position of managing editor with in-structions to continue his fight against corruption. Brand is engaged to the judge's daughter, but putting his love aside, he lures the judge into a trap by pretending to accept a bribe of \$10,000 offered in the office of the newspaper, where reporters take down the conversation over a specially arranged telephone, and an artfully contrived camera photographs the judge in the oyal Alexandra Will Have one act of paying over the money. The daughter pleads in vain with Brand to suppress the resultant story, but again he forsakes his love for the good of the common cause, and the final scene is laid in the composing-room where the curtain descends on the press Alexandra this week begins what in motion printing the story of bribery Alexandra this week begins what and wrong-doing on the part of the promises to be the most successful honorable member of the bench.

The company presenting 'The Fourth

In the appearance of Mr. Wright Lorimer in "The Shepherd King," at the Grand this week, Wm. A. Brady will again introduce a star in the dramatic firmament and a personality of uncommon interests and force. Mright Lorimer, who has so quickly won undeniable fame as an actor, author and producer, has made such a firm impression in the realm of the

dramatic art in this country by his had the opportunity of a small speak-ing part and his talents and energy herd King," and his own earnest and before long gained him the position of artistic portrayal of the part of David. "leading man." that he is already recognized as one Mr. Lorimer is the chief author of of the most sterling successes in the "The Shepherd King," a drama and

The Shepherd King

Mr. Lorimer is a young man, only thirty years old, and seems to have been destined to the high work he is carrying out in the impressive presentation of "The Shepherd King," which is literally the first strictly biblical play and play of modern times. Mr. Lorimer, from early years has been a profound scholar, altho of American birth, he took special studies at Oxford University. England. He could now be occupying an eminent position as pro-

production to which he gave an en-ormous amount of thought and reaccessories of a great dramatic ception of "Ben Hur" has ever been presented on the American stage, so immense and commanding in its mise-

by a company of one hundred players, and special music of a grand and elevating character is quite a feature of the production. All the leading events of David's life are portrayed with wonderful realism and effect, even to his single-handed battle with the giant, Gollath of Gath, in which Gollath is represented by a literal glant in statue. The camp of Saul in the Valley of Elah, with a running brook in the distance, the court yard of the king's palace, with David's triumphant entrance after his long exite, and the cave of the Witch of Ender, are arranged in the many court in the cave of the witch of Ender. Endor, are among the many great scenes in the play which have obtained universal wonderment and admiration. Mr. Lorimer has succeeded whenever "The Shepherd King" has been presented, not only enthralling the theatregoer with the impressiveness and magnitude of this great production. but by enlisting the wide attention and admiration of ministers of all denominations and their congregations. Pulpit eloquence has splendidly proclaimed the moral elevating qualities of "The Shepherd King," and this drama has already probably done more to bring together the church and the stage than any other production of this

generation. It takes nearly one hundred people to present this magnificent spectacle, among whom are some of the following well-known players: Brigham Royce,
J. Irving White. Daniel Gilfether,
Harold LaCoste, Frank Campbello,
Daniel Lawlor, Walter H. Brown, Axel
Bergstrom, Heien Singer, Frederica
Going, Alison Shipworth, Ruth Copley
and Miss Ivah Ferrier, will appear in
a series of Egyptian dances characteristic of the period.

## ... The Laying on of Hands ...

Sermon by Bishop Evans

our consideration, along religious lines especially, in order that we might find out that which God has put his signet of approval upon and be able to reject fables, and that the time will come that they will not endure sound doc-

tirely; some acknowledge it in part but deny the power that it commands and so they are more inconsistent than those who have discarded it entirely. ment as given in the Bible where-"Ye have a form of godliness but deny the power." We are told that the gospel is the power of God unto salvation, or in others words the great plan inaugurated by the Almighty so that by obedience to it the human family might be saved and a gospel without the power, a gospel stand the things of God, neither can that God promised to grant to who would obey his gospel, is a spurious gospel and should be abandoned. If ever there was a time in the and reveal to them the things of God, history of this world when God should and that plan is found to be a perfect set His signet of approval upon His confusion the conglomerated state of modern churchianity to-day is the rivers to the ends of the earth. If you had a coat with as many colors to-day as you have churches that conflict with each other, Forepaugh would have it as his chief attraction for the people in the Dominion telling you that it never was before under some new scheme of revivalism and at the same have had before were not in it. That is what I have been telling you for seven years and you are beginning to say amen to it now. Oh, my work has not been in vain. We have one of the greatest Methodist preachers in ronto papers, giving the cold shoulder to the very thing that others are telling. So the preachers that don't want any you is the last and best thought of doctrine don't want God, don't want God Almighty. Signet of God's Approval.

Now in this conglomerated state of confusion we ought to have something authoritative, something with the signet of God's approval upon it, and in doctrine or thru this doctrine of the laying on of hands comes the signet of God's approval, and thru His ordinance comes the authority of God very plain to you. I have been reading the Bible for a number of years and cannot in the face of my responsibility to God and to you, refrain from telling you that I have no evidence that any man ever was divinely commissioned to preach the gospel unless he was ordained by the laving on of forter, the gift of power, of the Holy Holy Ghost is to be given by which we said: "By the tradition of your eld-may know that Jesus is the Christ.
Thru this ordinance the spiritual gifts, God of none effect." Mark 7th 3-13.

Who authorized either the Catholic or

Matinee

tually discerned and to the carnal mind Therefore we cannot comprehend God that are crammed with book education doctrine of the laying on of live, and to demonstrate that scholas tic education cannot settle this re-ligious question I have only to make priests. Some of the best educated copalian clergymen; some of the best educated men in the world are Methodist preachers, are Presbyterian prea-chers, are Baptist preachers. And let me tell you that their education has taught them to differ as widely upon the ordinances of the Church of Christ and the doctrine of Jesus, as

the poles, so that education does not settle this question. a plan by which His Holy Spirit shall be given that will guide men into truth ated from the perfect God, which is called the gospel of Jesus Christ or the doctrine of Jesus Christ. Now one of the fundamental principles of the doctrine of Jesus Christ is the laying on of hands. You will read that in the 6th Hebrews, 1-3. I rehe said: "Oh. God. save us from doctgresseth and abideth not in the doc-trine of Christ hath not God." This is found in the Second Epistle of John 9-10 v. Again, "Take heed unto thy-

Now I am going to discuss the doctrine of the laying on of hands from First, the layfour different points. ing on of hands for the blessing of little children. If you go away back 48th chapter, 8-20 you find where God inspired His servants to lay hands upon the children and bless them and in prophecy futurity was opened to them away down thru the mists of unborn time. Coming down to the New Testament we find Jesus endorsing this in the 10th chapter of Mark and in the 19th of Matthew, where He took the children, laid His hands upon them and blest them, and you remember Jesus said: "The works that promised to give us the Abiding Com-forter, the gift of power, of the Holy "We don't bless babies by the laying Chost by which we may know the things of God only as it is given thru the laying on of hands. Under this ordinance God has ordained that the

You can't even get it to smoke fore you. I regret they were not in and finally you come down to me and ing of children, by one historic statement which I read for your consideration. Charcelieus is his Religious way, but we don't need that any more institute says "Baptizm of infants It strikes me you won't buy anot human clay to give us a single Bible that to one is given by the spirit wis-statement that proves infant baptizm. dom supernatural, to another super-It is a relic of the dark ages and is natural knowledge, to another the gift forbid them not, for of such is the him, for kingdom of heaven and their angels he shall

The Bible certainly teaches it, Numbers 27, 18, 23, Moses ordained Josbers 8, 10 and 11 show that the Levitical priests were ordained by the lay-ing on of hands. In John 15 and 16 me but I have chosen you and ordained you," speaking to the twelve apostles.
In Acts 6, 1-6, Seven deacons—some call them bishops—were ordained by the laying on of hands. Paul in 1st Timothy, 2-7, says he was ordained a preacher and an apostle and I will close this part of the discourse by quoting ish Corinthians, 7-17 where Paul tells us "that as God has called

ministers so he ordained them in all the churches. 8th chapter of the Acts of the Apostles and you read something like this: That Phillip went down there and preached the gospel and a number of people believed it, repented of their instand were baptized. There was a gliftgentleman came that way by the me of Simon and he asked for tism and it was granted. After bap-tism, Peter and John, two of the apostles, came down from Jersalem, laid their hands upon the people that had been baptized and they received the Holy Ghost, and now let me correct a common error. People say that Simon when he saw the wonderful power, of-Ghost. But that is a miserable mis-take: he never offered to pay one nickel for the Holy Chost. Simon was just in the same predicament as I have century. He was trying to buy what is called a living, he was trying to buy a position in the painistry. Listen to him, "And when Simon saw that thru the laying on of the apostles' hands the Holy Ginest was given he fiered them money saying, give me iso this power that on whomsoever lay hands he may receive the Holy host." Peter fastened his eyes upon him and said, 'Repent, for thou art still in the gall of bitterness and the bonds of iniquity. Thou hast thought that the gift of God could be purchased with money." There are thousands in that boat to-day. They think that they can purchase the gift of God with Simon wanted to buy the authority of priesthood, the right to lay his hands upon the people that they might receive the Holy Spirit as he had the apostles do it. Now in this quotation there are two points proven, I think, quite clearly. First that in the days of the apostles the Holy Ghost was given by the laying on of hands. Second, that that man tried to buy the priesthood, the right, the auprivilege of laying on hands as he saw the apostles do tt. I draw your attention to just one other avotation found in the 19 chapter of the Acts ing like this: Paul having parsed thru the upper coasts came to Finesu and finding certain disciples there are said into them. "Have you received the Holv Ghost since ve believed?" and they said. "We have not heard that there be any Holy Ghost." Paul said unto them. "Tinto what, then, were ye bartized?" and they ye baptized?" and uney "John verily haptized with the aptism of repentance, saying unto the people that they should believe on him which should come after him, that is, on Christ Jesus." The truth is they had

and the record eays they received the Holy Ghost. This is the Bible doc-Holy Ghost. This is the Bible doc-trine. Let me ask of you, brother mine, you have believed, you repented and tried to turn over a new leaf, you have been up to the penitent form once or twice and got warmed over. You have helped to contribute now and then to an extra \$35,000 to make a spread in revivalism. You have been baptized some of you by professed ministers of Christ. Now let me ask you why is it that this statement can go out to hundreds and thousands of people thru the publication of my sermon in The Sunday World, and not a single preacher fling back into my face a single passage of scripture to prove I am wrong in this regard? That should be an eye-opener.

Now right here let me digress for a more of the statement of the wind the question Paul propounded to those the Holy ghost as they received it? Do your parsons say to you as Paul said, "Now feet law that emanated from the perfect God, the same results will follow they wish to keep you ignorant." No, teiling you they are no longer needed. You have got the Holy Ghost they wish to keep you sproant from the subject. Last Sun-Now right here let me digress for a moment from the subject. Last Sunday night I made a statement here that I had the evidence from the books. Holy Ghost they say, but it don't act like it used to say high the statement here that I had the evidence from the books. Holy Ghost came eighteen hundred that I had the evidence from the books. Now right here let me digress for a moment from the subject. Last Sunday night I made a statement here that I had the evidence from the books and sermons of leading men such as years ago one spoke with bongues John Wesley of the Methodist Church, John Calvin, and the Church of England prayer book. The sermons of upon the sick and they were restored, wesley were all given chapter and such as was wrapped in visions till the church and not by the Almighty.

The last From its power of the Holy Ghost as an abiding comforter, and second that he has never received the gift and power of the Holy Ghost as an abiding comforter, and second that he has never been divinely commissioned to represent under its power, another laid hands upon the sick and they were restored, we shall receive that Jesus made the church and not by the Almighty.

The last From its power of the Holy Ghost as an abiding comforter, and second that he has never been divinely commissioned to represent under its power, another laid hands upon the sick and they were restored, another was wrapped in visions till the church and not by the Almighty.

The last From its power of the Holy Ghost times that Jesus made the Holy Ghost as an abiding comforter, and second that he has never received the gift and power of the Holy Ghost as an abiding comforter, and second that he has never received the gift and power of the Holy Ghost as an abiding comforter, and second that he has never been divinely commissioned to represent Jesus Christ, but that he has never been divinely commissioned to represent Jesus Christ, but that he has never been divinely commissioned to represent Jesus Christ, but that he has never received the gift and power of the Holy Ghost as an abiding comforter, and second that he has never received the gift and power of the Holy Ghost as an abiding comforter, and second that he has never received the Holy Ghost as an abiding comforter, and second that he has never received the Holy Ghost as an abiding comforter, and second that he has never receive John Wesley of the Methodist Church, under its power, another prophested under its power, another laid hands upon the slek and they were restored, another was wrapped in visions till the were born in sin, that the wrath of God is upon them and that they will be damned unless baptized. The re-

changes, is the same yesterday, to-day fore you. I regret they were not in and finally you come down to me and last Sunday's sermon but I cannot you say, "Say, what is the matter with help it. So I pass that by now. I want that coal I bought of you?" "Oh, it to just support my contention that is the finest anthracite coal," I answer. Infant baptizm is the work of man "Well, I can't get it to burn." "Oh, and has no right to take the place it won't burn, oh no, that old idea of of the laying on of hands for the blessing of children by one historic stateway, but we don't need that any more.' Institute says "Baptizm of infants in the first two centuries after Christ was altogether unknown but in the third and fourth centuries it was allowed by some few. In the fifth and following centuries it was generally received. In the former age no trace of it appears AND IT WAS INTRODUCED WITHOUT THE COMMAND-MENT OF CHRIST." Now all I wish to say on this question is that I have received. In the former age no trace of it appears AND IT WAS INTRO-DUCED WITHOUT THE COMMAND-MENT OF CHRIST." Now all I wish to say on this question is that I have shown you both from the Old and the shown you both from the Old and the Now. Testament the direct practice of colors and idolatry and idolatry and the most damnable deception ever pained off upon the credulity of the people to tell you with one breath that God is the same and His promises never fail; that the Holy Ghost is the same shown you both from the Old and the shown you both from the Old and the to-day as ever and that you may restament the direct practice of Jesus Christ in two cases where childand then with the next word and then with the next word when you go to read the wondands and hurl a defy for any face of derful promises contained in that Bible take olive off consecrated by grayer, anoint the head of the sick, lay their anoint the head of the sick, lay their anoint the head of the sick, lay their

kingdom of heaven and their angels do always behold the face of my Father which is in heaven." I leave that part of it with you.

Ordination.

I now introduce to you the scriptures in favor of the laying on of hands for the ordination of the min-hands for the ordination of the min-If ever there was a time in the history people first to believe in God and the of this world when we needed the gospel of Jesus Christ as He preached it in Judea and as the apostles preaching in for the remission of their sins ed it till they sealed their testimony and then be confirmed by with their blood, it is now. Now, on of hands for the receivement infidelity is growing in every Holy Spirit. That brings city, when the respectable higher new birth, makes them children of Go critic is the worst kind of an infidel, and entitles them to the promise of

> a church on every corner contradicten you have a thousand and thirteen I want to say as Latter Day Saints different denominations all in conflict we believe in the very principle of the gospel taught in the New Testament and one of the doctrines of Christ is with each other, I remark if ever there was a time in the history of the world that we needed the gospel just as Jesus preached it, that we needed the that of the laying on of hands for the blessing of children, for the ordination of the ministry, for the confirmano ounningly devised fable but that tion into the church that they might it is the power of God unto salvation, receive the Holy Ghost and for the healing of the sick. It is the great ordinance of God by which His power has been displayed. In the language is now. If it be a fact that the Holy Ghost does not produce those miracudescribed in the Bible, if these things of my text, I beg you do not fufil the are done away, then the God of your propecy. "Behold, ye despisers and wonder and perish for I (God) work Bible is a myth. The promises He made are false and the facts are there a work in your day, a work which ye never was a God that made them if they are not still true, but the world been badly fooled by the cunning ·Bishop R. C. Evans will speak in the craftiness of the priest. Let me give you one of the chief authorities of

> America on this question. I am quoting from Cardinal Gibbons. In his work called the "Faith of Our Fathers," page 322, when speaking of Miss Selene Johnson the miraculous gifts of the gospel tha made the church the wonder of the world eighteen hundred years ago, the poor fellow, the representative of an apostate church, that is without the Miss Selene Johnson has aspirations spirit and therefore as James the apostle said "dead," for "the body to become a journalist. Not a special without the spirit is dead." Cardinal writer on woman's subjects or to cov-Gibbons makes this statement: "It may be asked why don't these gifts the questions of the curious and love

> longer needed." That is absolutely false in all its parts. If ever the world the play "The Fourth Estate" the great newspaper play which comes to the the distinctive features and Royal Alexandra this week, and of wonderful blessings that were conferred upon the apostolic church that made !t different from every de-nomination in that age of the world, we need it now. We once heard of a conversation carried on by Robert G. Ingersoll, the noted agnostic, and a parson. He took up the Bible in conversation with the parson and they got talking about the 16th chapter of the Gospel of St. Mark where it says these signs shall follow them that believe. "In my name they shall cast out devils, they shall speak with new tongues, they shall take up serpents and if they drink any deadly thing shall hurt them. They shall lay hands

upon the sick and they shall recover, Ingersoll said: "That is a wonderful

promise, but I don't believe Jesus ever

yes, the blessed Lord had made it."
Ingersoll says: "Well, it is upto you,

if Jesus made that promise does your

church teach that now. Does your

church enjoy those blessings now?"
"Oh, no!" he said, "they were only for the dark ages, we do not need them

now." ingersoil says: "That won't do. you aren't a true believer or else these signs would follow you if Jesus

made that promise." And there is the

claim that the priesthood has been re-

not been baptized by proper authority. stored, that this gospel came not in the

But Miss Johnson objects to the flippant answer. She says that the casion when he was walking on position of the woman writer who has street with the tracedier. this department in charge is the most

responsible position on any newspaper.

The questions are asked seriously and by people who are in trouble and who expect a serious reply. There-fore having immibed the newspaper atmosphere and becoming interested in newspaper work, she has chosen this position for her special line of work. apply to some newspaper and accept a position of that kind. If it is all that I expect it is says Miss Johnson and I can do good to some poor souls by helping them in their troubles. I will resign from the theatrical profession and devote my time to news-paper work. As Miss Johnson is in receipt of a salary of \$300 a week, a renumeration she will hardly receive in her new line of work, her deter-Has a New Ambition mination to give up the stage need not be taken seriously."

## The Part of the

There were no women on the stage in Shakspere's day, nor before the Restoration; but there must have been accomplished impersonators of women in the poet's time, else how could the audience have had any real idea of the beautiful heroines he created—Viola, Rosalind—Juliet and the rest? Even after women had been introduced—they are salr to have come in with Mrs. Anne Marshall in 1660-there was a romantic admiration of Edward Kynaston. It was said of him that while he was one of the handsomest of men, he was still handsomer as a woman. Colley Cibber and the old gossipy chroniclers tell something of him, and the wonderful charm of his performance. He was charm of his performances. He was the pet of the feminine patrons of the playhouse, who were accustomed to take him out riding with them in their coaches.

their coaches.

Men who have successfully assumed the characters of women in the activities of real life are not unfamiliar in history; the most celebrated is the Chevalier L'Eon, a spy, who lived during the reign of Louis XV. A year ago a new portrait of him was discovered in London. Le'Eon in emergency would pass himself as his sle gency would pass himself as his sis-ter. Mile de Beamont.

It is much easier for women to

gency would pass himself as his sister. Mile de Beamont.

It is much easier for women to masquerade as men than for men to assume with true plausibility the character of women. The history of the stage is full of accounts of the cleverness of actresses like Neil Gwyn, Mrs. Woffington, and Mrs. Jordon in "breeches parts." Mrs. Woffington is said to have been wonderfully taith-

#### WHEN AGE COMES.

Now the solemn shadows lengthen, Life's long day is well-nigh done. Impulse fails and habits strengthen Pleasures vanish one by one. Feebly o'er the dark'ning dial. Parting rays their image fling, Times of triumph, times of trial, Lose their rapture, lose their sting.

How much now appears unreal In the past that stirred us so; Pining for the high ideal. Passion's dreams, ambition's flow; All life's aims grow dimmer, fainter. All life's aims grow dimmer, fainter, With a languid, calm decay, Fading as the mighty Painter Shades the scene with twilight grey.

Fancy dies. Illusions follow.
Love lasts best, but not its bloom:
And the gayest laugh sounds hollow,
Echoed from an op'ning tomb.
Soon the past holds all our treasure,
All that childish age loves best.
Young men still may five for pleasure,
Old men only ask for rest.
—William Lecky.

Omri and Ahab Lead Israel Into Greater Sin.—I. Kings xvi., 15-33.

Golden Text—Righteousness exalteth a nation, but sin is a reproach to any goople. Prov. xiv., 34.

(1) Verses 15-16—Who was Zimri, and whom did he succeed as King of Israel and by what method did he get to the throne?

(2) Did the fact that God had planned for the death of Elah, and for the destruction of his father's house, justify Zimri in being the instrument for doing struction of his father's house, justify Zimri in being the instrument for doing struction of his father's house, justify Zimri in being the instrument for doing struction of his father's house, justify Zimri in being the instrument for doing the struction of his father's house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the instrument for doing the struction of his father house, justify Zimri in being the struction of his father house, justify Zimri in being the succeed as King of Is
(4) Verses 17-16—Who was Zimri, and whom did he succeed as King of Is
(5) Is there any reason to believe that God ever brings about civil war when the wises to destroy a nation or to reform its abuses?

(6) What were Omri and his army engaged in when they heard that Zimri had slain Elah the king?

(7) Can you give any information as to his treason and the way Zimri cans.

had slain Elah the king?

(7) Can you give any information as to his treason and the way Zimri caused Israel to sin?

(8) Zimri practically committed suicide, did the circumstances justify it, or (8) Zimri practically confined to the suicide always wrong?

is suicide always wrong?

(9) Verses 21-24—After the death of Zimri. Israel was divided, one-half following Omri, and the other half made Tibni king and followed him; say what lowing Omri, and this division.

(10) How long did the strife or civil war between Omri and Tibni last? (Vs. (11) What is the invariable result when nations or individuals quarrel and fight among themselves?
(12) Verses 25-28—What particular form did the sin of Omri take? (See Micah vi., 16. I. Kings xiv., 719.)
(13) What were the influences do you consider which led Omri into such grieous sin?

ous sin?

(14) What is the root cause of all sin?

(15) Which is more prolific in leading people toto sin pride, i.e., wanting to (15) Which is more prolific in leading people toto sin pride, i.e., wanting to shine as well as or better than our neighbors, or the love of power which comes shine as well as or better than our neighbors, or the love of power which comes from money, position or ability, and why? (This question must be answered in writing by members of the club.)

(16) What did Omri and what do all like him get, who have bartered their (16) What did Omri and what do all like him get, who have bartered their (17) Verses 29-30—Which king is more likely to be a good man, one who comes to the throne by heredity or by the vote of the people?

(18) What are the chances for a son of a bad but popular father becoming a good man?

Draimin. in green charmense and sable; Miss Ray Jacobs, looking charming in a white satin frock; Miss Rose, looking charmi

Judah?

(6) Why was God so good to Jehoshaphat?

(7) If a man is true all round to God, does that alone guarantee his success?

(8) Verses 5-6—Which gives us the greater influence, and why, great ability or thoro goodness? (This question must be answered in writing by members of the club.)

(9) What are the qualities in us which tend most to make people love and he kind to m?

(9) What are the dual of the dual of the ways (10) Is it possible for everybody to have his heart "lifted up in the ways (10) Is it possible for everybody to have his heart "lifted up in the ways of the Lord," and what are its advantages?

(M) Will love and loyalty to God guarantee us against the seduction of (10) Will love and loyalty to God guarantee us against the seduction of (12) Verses 7-8—What is the chief guarantee of the permanent success of (12) Verses 7-8—What is the chief guarantee of the permanent success of (12) Verses 7-8—What is the chief guarantees of the chief guarantees of the chief guarantees are the three public institutions upon which we most depend for (13) What are the three public institutions upon which we most depend for

our true prosperity?

(14) What analogy is there between the methods of Jehoshaphat and that of our public schools and adult Bible classes?

(15) Verse 9—In view of the moral grandeur of the Bible, what can you say (15) Verse 9—In view of the moral grandeur of the Bible, what can you say (16) Why ought not all adults, whether professed Christians or not, attend and take part in some adult Bible class?

(17) Verses 10-11—Taking the world as it is, which is the stronger influence a great nation like this can exert among the nations and against invasion, a powerful mavy or loving righteousness?

(18) What had been the general relationship between the nations here mentioned and the former kings of Judah, and what had wrought the great change for the better?

for the better?
(19) Verses 12-13—What would have been the difference, in the success of Jehoshaphat, if he had possessed the same ability but was not a God-fearing ilton,) black satin; Miss L. Harris, (Hamilton,)maize satin with gold em-

man?
(20) What is the chief element of greatness in a nation?
(21) Why should an individual, like a nation, lay up store for the future?
(22) What is the influence of true Christianity upon business enterprise?
(23) May "mighty men of war" become equally distinguished in the arts of (Hamilton) black panne and satin; Miss Stein, (Cleveland,) pale blue; Miss Jessie Brown. (Detroit,) in pale pink ninon with violets. eace? Lesson for Sunday, Feb. 5, 1911: Elijah the Prophet Appears in Israel. I.

#### Extravagant Nonsense

That about fits the claims put forth in many quarters as to what can be done for an ailing scalp or weak, thin hair. Hair grown in a single night, and similar statements arouse only the derision of the intel-

More perfect wintry weather could not have been wished than that which prevailed on Friday night for the winter fete at Government House, when skating and tobogganing were the attractions. A bright moon shone above and two large bonfires were kept blazing in different parts of the grounds all evening, casting a vivid clare on the country around. The rink SUGGESTIVE QUESTIONS.

ON THE SUNDAY SCHOOL LESSON BY REV. DR. LINSCOTT FOR THE INTERNATIONAL PRESS BIBLE QUESTION CLUB.

(Copyrighted 1910 by Rev. T. S. Linscott, D.B.)

I have read the Suggestive Questions on the Sunday School Lesson, by Rev. Dr. Linscott, in this issue of The Toronto Sunday World.

Date. Jan. 22. 1911.

The CONTEST.

The most popular and the most practical plan for Bible study, together with a prize Bible contest, is running in The Sunday World.

In short, the Sunday School Lesson must be read each week for 52 weeks, also the "Suggestive Questions," and the coupon should be cut out each week and signed, certifying that this has been done. Then any five of the questions that are indicated to be answered in writing must also be answered the cyclerone was contented by the Grey. The Guards' specific land Marchiness of Salisbury, who are guests of Their Excellences, Lady sybil Grey, Lady Evelyn Grey, both week and signed, certifying that this has been done. Then any five of the questions that are indicated to be answered in writing must also be answered the exhibitanting sport. The Guards' spound of Chinese lenterns which also were suspended from various polytics about the grounds, the whole forming a most magnificent spectacle. Her Excellency, handsomely gowned in black velvet with sale trimmings, a sable toque trimmed with ermine and touches of purple, received the guests at the entrance to the rink, and Earl Percy, A. D. C's. His Excellency, handsomely gowned in black velvet with sale trimmings, a sable toque trimmed with minings, a sable toque trimmed w and was brilliantly lit up with myriads

# The Bona Fide Bargain Giving Character of Our Great \$1.00 a Day Diamond Sale

Is evidenced by the constantly increasing public interest taken in the event.

The daily increasing number of purchasers is creating a selling record in our Diamond Sales. No doubt you are familiar with our method of closing out the remainder of our Holiday Stock of Dia-

monds, but we will repeat it because we want you to keep it in mind and talk about it. On January 3rd we placed on sale in our Show Window our entire remaining Holiday Stock of Diamonds, which are plainly marked at our regular Factory Price, which saves you all middlemen's profits. During the month, we reduce the price of every ring 1.00 each day until sold. Consequently on Monday any ring that remains unsold may be purchased for 18.00 below the Factory price at which it is marked. This will enable you to buy a Diamond in many cases below what they can be cut for in Amsterdam. We are determined to carry this sale on till the end of the month, no matter what the loss.

Already it is the most sensational bargain giving sale in Diamonds in years, and now is the time to pick up the genuine bargains. DON'T WAIT TILL SOME ONE ELSE GETS THEM. DO IT NOW.

As a protection against dealers or jobbers, we reserve the right to sell but one Ring or Pin to .each person

cynic, mixed up and melted with wit and laughter and all as ridiculous as fitting a square peg into a round hole, for absolute honesty and exact truthfulness are a sad misfit in high-toned modern society. It all struck me as rather funny that I should leave Tohange. To have written about suffrage every week for the last two years, to have religiously kept myself and my readers posted on all the latest gining to be thresome. I felt that I was getting in a groove. I felt that I was getting to look on life with a bias my second night here I go to the theatre only to wealize that suffrage is not a bias strip inserted in to-day's ife, but inwoven in life itself, with no more chance of a separation than you could separate love and life or notherhood and life, or laughter and tears from life.

Political equality is the inevitable sult of the logic and reason upon which is built our wisest and best coms of self-government.

The pay-as-you-enter car as we have is a vastly different propostion from real, proper pay-as-you-enter car as the car on the outside of the railing from the inside of the railing and down a separate step or by the front door, which ever is convenient. In no case is Shaw had overdone things, but the white and green on it possible to jam into people getting which "votes for women," that slogan off the car while you are getting on. problem play will always have its of the Woman's Social and Political and that was where the terrible inconvenience occurred in Toronto.

We all seem familiar with at least ren, or special care and special training for defective children, but it sounds new and strange when we hear of schools for defective parents. The national Congress of Mothers was formed only a few years ago, but is now re-

The useful in the world is becoming the most commendable. Ignorance is no longer classed as a virtue along with innocence and parents are being taught that they have a very specific duty to perform to assist the state in With God above, beneath, beside,

Of life, and sure of getting there With motherhood at last awake
With power to do and light to see With power to do and it Women may now begin to The people we are meant to be. Patient with nature's long delay

Proud of our conscious upward swing
Not sorry for a single day
And not afraid of anything. The woman suffragists of New York State never let a single opportunity pass without doing something to keep the suffrage pot boiling. Not long since the Woman's Suffrage Party gave slant bounded by what progressive a luncheon to over three hundred. Mrs. catt presided and the leading officers received with her. The menu with a list of toasts was all printed on yellow paper. Yellow flags bearing the words 'Woman's Suffrage Party" stood on tall standards at each plate. The ices were served in yellow boxes bearing the words "votes for women." luncheon was a gracious courtesy those who have worked hard in the cause and each toast was given with cheers to the recipient, for something accomplished. And now great plans are going on to celebrate the birthday of Susan B. Anthony next month. Each year adds laurel wreaths to this illustrious name. The birthday function will take place at Hotel Astor Roof Garden and already all sorts of merchandise is pouring into headquarters for a sale the proceeds of which will be spent in legislative and organization work, the way in which Miss Anthony wished she should be memorialized. "If I have worked to any purpose carry on the work I have begun," were

her last words. month will give the cause that impetus in Toronto that is always needed to keep up the spirits of those doing spade work. We cannot all be brilliant speakers but we can all do something that will make it worth while for the brilliant speakers to arrive and enthuse us and convert others. soon there must be an official opening of our new Headquarters which will give those interested an opportunity of pledging support to this splendidly situated centre and to discuss ways and means for extending the local and national work.

More enthusiasm and more workers are needed and it only requires a little more effort on the part of those already pledged to secure both for dozens of men and women only need be urged into line when they will be glad of an opportunity to work. Clippings from several New York papers have been sent to me telling of the hit Sylvia Pankhurst has made

a cause, is indeed to have made that cause a very part of one, and to give life's best service to humanity mont has opened several more ability there is a force felt by all.

I may have said before that no a thorough brushing at night, taking woman is beautiful without fine ten minutes or more for the teeth and no woman can be plain toilet of the mouth if neceswho has them. But that is somesary, the child's life would thing one cannot say too often and have been spared. that I repeat, as the lawyers say, A second neglect of the "without fear of successful contraprinciple and habit of cleandiction. liness is in the habit of A good mother may well pray, candy eating. I care more "Give me the intelligence and inforfor the permanence of the mation to enable me to take good my teeth than for the brief, care of my baby's teeth." temporary satisfaction of

I have already said in a previous article that a careful mother can prevent a child's mouth becoming badly shaped by keeping him from sucking his thumb. Let the teeth have a fair start by letting the child's mouth grow into proper shape without any such hindrance. For the same reason, among many other reasons, watch the child's method of breathing. If the nostrils seem closed and the babe breathes through its mouth, it probably has adenoids, those growths at the back of the nostrils which make breathing difficult, which give the face a strained, tortured look, and which distort the shape of the mouth. These adenoids can be easily removed by a surgeon, and the little one immediately relieved.

Having taken all these precautions to make the mouth shapely, the teeth with their fair start should grow straight and strong, if the health of the little one is good. Don't fall into the common fault of thinking the first teeth are of little importance. As the first teeth are bent the second are inclined. Let the first teeth receive the same dillgent care and frequent examinations from a good dentist as the second

For the adult teeth the first word, as the last, is cleanliness. But what a world of difference in the methods of obtaining that result! Let me first tell you a story illustrating the wrong way. One of the Harlem hospitals has this record of a girl who died from a careless habit of picking her teeth with anything that happened to be convenient-a bit of broom straw, a ragged, soft wooden toothpick, or a pin. But this

is the record: "A ten-year-old girl was the next patient. There was in her neck a slight swelling that had been noticeable for ten days. She opened her mouth with difficulty, and the day after she was admitted to the hospital a fever developed. Her head ached, and she said every tooth in her head was sore. She was unable to swallow any solid food, and lived for a week on milk and soup. She died a few days later of lockiaw. The mouth was examined, as was every other part of the body, for some wound through which the germ of tetanus could have entered the body. Nothing was found save three decayed teeth. These were extracted and examined, and It was found that the tetanus bacillus had entered the body through wounds the girl had made in the gums by trying to clean the teeth with an infected instrument, possibly a soiled toothpick, or through the channel offered by this carious (decayed) tooth. The germ might have been introduced by a vegetable that harbored it. The radish, for instance, is a carrier of

So this child's life was the cost of her ignorance, or rather that of her

having a sweet upon my Therefore I never eat candy. Nor do I eat pastry, nor puddings. You have always heard that sweets are "bad for the teeth." But that general statement is not enough for the mind that desires to know. I shall explain to you why sweets are enemies of the teeth. I quote an ex-

pert dentist, who says:

"The sugar of commerce is nothing else but concentrated crystalllized acid, which is very dangerous to the general welfare. In former times sugar was so costly that only wealthy people could buy it. A century ago the cost of each pound of sugar was \$1.25. So few persons could afford to eat it that it counted but little in the sum of things. But now that the low cost of sugar has caused a general degeneration of health, it is time to insist upon general enlightenment.

"The centist observes the first nathological change caused by sugar in the mouth. Why does a person suffer great pain when sugar comes in contact with a tooth not protected by enamel, but otherwise healthy? The cause is the chemical process brought about by the sugar coming in contact with the saliva. This compound is an acid, which destroys the enamel of the teeth.

"In the mouths of sugar eaters, and especially keepers of candy shops, we find the awful effects of "Keep always in mind that clean sugar. Whenever there is the slightest defect in the enamel, the tooth becomes softened. The sugar, turned to acid in the mouth, destroys the lime of the teeth and decay follows."

And Above

teeth do not decay."

the acids. For instance:

behind it. May I quote for you an

The effect of dirt on a tooth is

other authority?

There is the explanation of why the eating of sweets is injurious to the teeth, and from an authority. The same authority has some strong words to say about the general ill effects of the 'ousumption of candy:

"Pay a visit of exploration to the East Side, and in every fifth house you will find a candy store. These are patronized by the children of laborers. We cannot have strong, capable labore s if children, instead of eating wholesome meat, have their digestions ruined by the acids of candy. How can a man get necessary strength by putting into his mouth the sweets that will produce acids in both mouth and stomach? How can a man who does mental labor create mental energy if, instead of being well nourished, he suffers from a weight of undigested acids in the stomach? What made It possible for the strong men of ancient times to wield so great a strength? Why was Samson able to hurl down the pillars of the temple? Because they ate simple and inexpensive foods. Sugar was for the Neros and Caligulas."

the same as of vinegar on an egg. If an egg were placed in vinegar Have I not through this dentist the acid would soon eat the lim proved that sugar is an enemy of the teeth? Eat sweets sparingly if from the shell, until the egg could, "Reep the brush fiself clean."

be passed through the neck of a

"When a break comes in a tooth, dirt and particles of food enter, and introduce the germs whose presence brings disease. When this matter reaches the pulp, 'the marrow of the tooth,' abscesses are formed. Keep always before your mind's eye that a clean tooth does not decay."
Give your mouth frequent baths

to destroy any lurking germs that have entered it. And keep your mouth closed to prevent the entrance of those germs, especially if you are in a district where there is danger of infection. These mouth washes are tonic and purifying: Table salt, I teaspoonful.

Warm water, 1 glassful.

#### The Use of Literature.

What is the use, the efficacy, the ultimate good, of such work as Maeterlinck gives us? This question—pertinent enough from his point of view—is sometimes asked by the practical man whose ears are either not trained to hear or incapable of hearing, the undertones and subtle harmonies which surround him.

He understands the utility of the great scientist—from such work he can perceive manifest gain in discoveries, inventions, appliances for the amelioration of human suffering, additions to the general sum of human happiness and welfare. He can appreciate the utility of the explorer-from this he sees new countries grow, new civilizations extend, new industries form, new rivalries come into being.

But from exponents of ideals, masters of the written word, he discerns no particular result, save that they may serve to charm away an idle hour. To argue with such a man, worthy fellow tho he may be, is disheartening and usually unprofitable; it is as the one should endeavor to explain to an unmusical person the mysteries of Bach's giant fugue, or the consummate beauty of Chopin's nocturns.

Occasionally, however, he may be brought to realize that there are experiences of the soul in quiet hours which transcend the joys of physical action or the pleasures of the money market. "The ground of a man's true life, for which he consents to live, may lie altogether in man's ture life, for which he consents to live, may lie altogeether in the field of fancy"—a statement absolutely and perfectly accurate. 'It is in the mind that the elements and conditions of truth and beauy, elsewhere dispersed and sown abroad, are brought together and blended into harmony.

Truly, again, does Professor Caird remark, in his notable essay on Goethe, that "poetic truth does not lie on the surface any more than scientific truth; the poet ignores or endeavors to get beyond the external mechanism of the world. The poet, like the philosopher, is, in search of a deeper truth in things than that which is the object of science." The difficulty, of course, is to expound this to those who live in a different world and speak in a different tongue.—From "Maeterlinck and His Art," in The Academy

## Three Thousand Miles Of Canadian Scenery

New Travel Book by Frank Yeigh - Panoramic View Of the Dominion From Coast to Coast.

We have had already too many descriptive books on Canada by persons who know nothing about it, by the globe-trotters who fly by fast express from east to west and see many things and conditions which do not exist. We turn with relief to an authoritative work like "Thru the Heart of Canada," by Frank Yeigh. There is probably no Canadian, and certainly no one not a Canadian, who is better qualified to undertake a work of this kind. Mr. undertake a work of this kind. Mr. Yeigh has done more than any other person to reveal to Canadian themselves, as well as to the people of other lands, the beauties of Canadian scenery and the abundance of her resources. For many years he has been spreading the knowledge of the Dominion far and wide from the lecture platform in his popular travel talks, and his illustrated articles on travel are a prominent feature in the journalistic world. Maritime Provinces.

In our trip "Thru the Heart of Canada" we begin down Nova Scotla way and not only do we see the orchards of the Annapolis Valley, the smooth red roads, the hay-ricks in the sea-meadows, but within the compass as the poet described it, "distant, se-cluded and still." Mr. Yeigh is a most charmingly instructive guide and knows how to spread his pictorial canvas and then put the reader "en rapport" with the surroundings.
From Nova Scotia thru the marshes

A complete American edition of kill off pests, and how to cultivate the Canadian poet, Roberts, lies the Maurice Maeterlinck's works in thirteen volumes will be published in the spring. derfully prodigious names (here are cook, Kennebecasis, Passama quoddy and many others of their like) While viewing the wonderful harbor of St. John, we recall some of the early encounters of French and English for possession of these lands.

New Brunswick is a great land for the hunter and fisherman. East of has already been required has already been required. Canada's smallest province Prince Edward Island, "a peaceful, placid land, with a rich soil that makes farmgets health and long life." The island province of only 2,133 square miles produces from its farms and fisheries, ten million dollars a year and thus proves its title of "garden of the gulf."

Fishing-Farm of Canada. The Magdalen Island in the Gulf the press of Canada, of St. Lawrence are described as 'a and the United States. kingdom of fish." The cod forms the staple harvest, but herring, mackerel, lobster are also valuable. The history of this island settlement with its 6000 inhabitants is full of incidents of romantic interest. Quebec is " a repro duction of old Brittany in the Britain of the New World." On the way up the river, we see the islands, the rivermouths, and listen to tales of the early Indians, the missions, habitant life Th City of Quebec has a chapter to itself, because of its wide historic interest Then on to Montneal, recalling its rise from the days of Maissoneuve, and then getting a view of it as it stands to-day and endeavoring to grasp the extent of its commerce, which is no small item-the bank clearings in 1909, reaching \$1.866.649.000

Ontario, Old and New. Thru Old Ontario, with a peep in in agination at its pioneer cabines, a brief visit to some of its chief cities, and a glimpse of the farm life of to-day. Then comes New Ontario, with its rugged scenery, its mines, its forests, its playgrounds for the sportsman, and its in creasing number of new homesteads. "Across Canada's Thousand Farm," is the next run we are asked to take. From Winnipeg to Calgary this extends, and from the U. S. boundary line to the northern borders of Manitoba, Saskatchewan, and Alberta -171,000,000 acres of grain-growing lands and only about five per cent yet Sanchia is, to a certain extent, a law touch with nature in her most alluring under cultivation, and only three per cent in actual wheat tillage. The pine

> city. The work of homesteading is here The Foreigner In Canada. Perhaps the most interesting view we get from the human standpoint, is that of the foreigner in Canada. His assimulation is, indeed, one of our big-gest problems. "No less than 58 different nationalities are now annually represented in the total immigration into the Dominion." Doukhobors, Scandinavians, Icelanders Mennonites, Orientals, and Icelanders, brief but illuminating glimpses we get

of them in their Canadian homes. The most unique force in the world is that which patrols the western haif of Canada, the Royal Northwest Mounted Police. The extent of their tion, their duties, instances of heroic "The story of Peter," the author deeds of duty, all are reviewed in one

Back in the good old days, farther back than our grandmothers would care to remember, when "seeing ghosts" re-lieved the drag of time, and took the place of the moving-pictures of to-day; when vaudeville acts were woes un-heard of, and society had its matinees and realistic drams in the form of witch-burnings, it was quite the prop-er thing to believe in ghosts and hauntel houses. Then man had firm faith hear anything about that, sir.

MacTurk: Sure. I know ye don't, in supernatural evil agencies, and, to yer honor—why should ye? Me wife do him justice, he attacked those mysz to me—
Judge (emphatically): Never mind strength of his manhood, to the full measure of his light and might. Our modern ghost is the tuberculosis germ, and its habitat, the haunted house, is too often your own home, Mr. Average-

Some twenty years ago, as the writer remembers, in a certain mid-western town, three members of a family living in a sufficiently picturesque cottage. were stricken with consumption in rap-id succession, and died. Nothing unusual about that! Nothing. But wait. The remnant of that family moved out, while another family, containing five children, moved in and within six months three members of this second family "went into a decline," as the mother stated, and ultimately died. A Haunted House.

The neighbors were sufficiently observant to gossip over the similarity of death in the two families, and the wiser ones attributed the deaths to dampness, while the more superstitious openly hinted that the house was haunted. Time went on, and the house was sold. The purchaser, with a family, moved in, and in less than a year the old story of the haunted house re-peated itself. One girl died. "Con-sumption," the doctor said. Two others of the family, young adults, were advised to change climate, and went to Colorado, with what result is unknown, This sadly decimated family, in its turn, moved away, and from then on, for some little time, the house remained vacant, a source of mystery to those inclined to superstition; a warning against "dampness" to others. Again the house was put on sale, this for a mere song, but no one wanted the white sepulchre. Laying the Ghost.

Then something happened. A young physician, new to the town, was making a professional call one day in the neighborhood. Before he left, his patient, a rather garrulous old Irishtold him the story haunted house, with elaboration sufficient to make an interesting magazine story in itself. The doctor listened eagerly, and then made a careful investigation for himself. He found no signs of dampness; found nothing. fact: to explain the sequence of deaths. He then traced back for twelve years the different families who had occupled the house during that period. Finally he got back to the original owner and occupant, an old bachelor. who had died of lung trouble! story was becoming interesting. Tracing down the various deaths from this beginning, our medical Sherlock Hol-mes found no less than twenty-five deaths from "lung trouble"—tuberculosis-occurring in the successive fainilies who had occupied the house up to the time of his investigation. Not one family that did not give up its quota to this horrible, intangible Juggernaut! His investigation completed satisfactorily to himself, the doctor bought

It was a House of Death, and he knew it; but he knew also that his science could broak the evil spell and turn it into a House of Life. Invisible Death Germs. The average man will flee the wrath

of one tarantula, or else attempt to destroy it, yet ten thousand tarantulas in every room of that evil dwelling would have been less dangerous to health and life than the malignant germs which, unseen by the naked eye, nevertheless literally covered the walls and floor, particularly the latter. That abode of evil required just one thing to make it peffectly sanitary and safe ly habitable,-disinfection. And so it was fumigated and disinfected, 28 never a house was before. That was a number of years ago, when the neighbors marvelled at the doctor's madness. To-day, they wonder at his wisdom, and the healthfulness of his

family, who still occupy the house. The above is a story, a true story, of conditions that exist to-day thruout the civilized world; only, the stories of the ninety-nine in a hundred do not have such happy endings. In your own neighborhood, Mr. Average-Citizen. especially if you life in a large city, are innumerable Houses of Death! And are you sure, after all, that you are not occupying one of them? Have you just moved into a house or flat? Who occupied it last? You don't know. Are you sure it wasn't some one afflicted with tuberculosis? If you're not sure, let us see what your chances are. Why Run the Risk?

take that chance? Certainly not,

We average Americans are a moving Before Re-Occupation.

First thought sees no connection between haunted houses and the great white plague says Dr. F. C. Walsh, in The Technical World Magazine. But second thought knows there is some connection to the connection race, particularly in the large cities. Considering the semi-annual changes

to run the risk of contracting that

The reason for failure is plain. Takhe must call it home—at night,—to what? To a room, be it ever so cosy or humble, that may have been rented a dozen times to as many consumptives during the past twelvemonth! The dusty carpet on the stairs; the conventional rugs in the rooms fairly reeking with malignant germ life; clean sheets, maybe; but blankets on the beds that may have been coughed into for a decade by an nnocent victim of the disease, innocently passes it on in turn to an-

other helpless viotim.
Germ Spectres Attack Children. Imagine a child living under any of the conditions mentioned: inhaling su atmosphere laden with disease; crawling on all fours midst unseen filth and death. Its lungs may be attacked, death. Its lungs may be attacked, or its spinal-column, causing "hunch-back" later, if it lives; or it develops into hip-joint disease, making then and there a life-long cripple. The shame of it! And then we prattle and babble about heredity! No child was ever born with tuberculosis. The disease is always developed after birth, and it always due to exposure to a tuberculalways due to exposure to a tuberou

cisis-laden atmosphere, and thet atmosphere too often its own frome.

Let credit be given where credit is due. Sunshine, living in the open air, sleeping with open windows, ail are good. But sunshine, fresh air, antispitting ordinances, individual drinking cups, campaigns and funds for tub-erculosis hospitals, all, thus far, will make for nothing, until one thing, the one vital thing, is done.

Prevention is Easy.

Then there is a silver lining to the cloud? Most assuredly. The beginning and the end of tuberculosis lies in what I have called the House of Death. "Ah," say you, Mr. Average-Citizen, "I see what you are coming to. would have every room and house that has ever been tenanted by a consumufumigated." You have guessed half the remedy. The other half is to fumigate and disinfect every habitation, ever occupied by anybody, as soon as vacated, whether the occupant was consumptive or not. There is no use mincing matters. When we are constantly menaced with so serious a disase, we can only be safe in considering

every one guilty until proved innocent. Prevention, radical prevention, is our ne salvation. Of what avail are expensive tuberculosis hospitals, while we are breeding victims in the house of death faster than those same victims can die in the hospitals, to make room for a new army of stricken recruits. Let every nation, and every state, city and village, pass statutes and ordinances, causing every landlord to have and to show a clean bill of health for every room in his house. whether there has been illness therein or not. Then, before renting a house or room, every renter can demand to be shown a copy of such sanitary certificate, properly signed and dated. When this shall be done, you will then know, so far as enforcement of law can go, that when you retire to your couch at night, if you and those in your safe-keeping will breathe and live in an atmosphere of health and purity.

Systematic Inspection. A central bureau, established for the purpose mentioned, should have charge of disinfection and issuance of certificates, all of which will be an additiona' public expense in one way, but will in the long run save millions of dollars to the people, for the House of Death is an expensive one, as all disease is equally a problem of economics and

In days gone by, it was sadly difficult for humanity to give up its belief in ghosts and haunted houses; today it is almost as difficult to get the people to believe in the facts of modern science. But letathe propaganda of the general, welfare be properly started, and soon every dweller House of Death, from Los Angeles to Buda-Pesth, from Archangel to El Paso, will break the spell, thru systematic disinfection, of that ghost of evil that pest of pests, the germ of tuber-

The Author: "So you've read my new novel. Did you like it?"
Miss Flighty: "Oh, yes. I liked the end. I was so pleased when I came to the end."

#### Have You Read A Good Book?

It doesn't matter how old it is, or how new it is. Tell us about it. What was it about? Who wrote it? What was there in it that impressed you—in brief put a big interrogation mark up against the book and give us the result of your answer-boiled down to 500 words or less. We will print one of these "Reader's Reviews" each week and give a handsome book to the writer of the review. Address all manuworld, Toronto. ta: Literary Editor, Sunday

Busoni, the great Italian pianist, has

Busoni, the great Italian pianist, has once again taken, New York by storm. A writer in "Musical America" gives the following interesting description of the artist's rendering of the Liszt numbers on his program:

In regard to the musical quality and worth of the Liszt numbers performed there will doubtless be found those ready to hold forth objections, for it is the fashion among certain individuals to belittle everything that this master ever set everything that this master ever set down. All the more tribute, there-fore, to Mr. Busoni for having pursued the course he did. Such pieces as the St. Francis Legends are superb masterpieces. They belong to the greater Liszt and their day is still to come, most planists as yet lacking either the courage or the good sense to give them their rightful due. They are stupen-dously difficult from a technical standpoint and there was something positively uncanny in the supreme ease with which the Italian planist surmounted the great obstacles. The first of the two, "St. Francis of Assisi's Sermon to the Birds," is a conception of strange and compolling beauty. The saint's sermon is strikingly suggested in an eloquent recitative in the middle and lower register of the piano, while constantly intertwining with it like a delicate arabesque are fanciful series of ethereal trills and lacelike floriture embroideries, now louder, now softer, illustrative of the twittering of birds. Over it all hangs a quaint, mystical atmosphere. Busoni's playing of this was the quintessence of grace and poetic delicacy and delighted the audience immeasurably. No less admirable was his rendering of the "St. Francis Walking on the Waves" with its splendid chorale polsed above, surging, heaving scale passages that were positively awe-in-spiring in Mr. Buson's hands

#### Strauss and Humperdinck.

#### "American Music Does Not Exist"

Puccini, in London, Expresses Views Which Will be Unpopular Across the Border-Yankie Singers Poor.

LONDON, Jan. 20.—Giacomo Puccini, the composer, arrived in London re-cently on his way to Milan and was interviewed in regard to the New York reception of his opera, "The Girl of the Golden West." To The Evening Mail reporter he said:

"The Girl of the Golden West' has delighted the American aritics as a

"The Girl of the Golden West' has delighted the American critics as a whole, but here and there are complaints that there is not anough American music in the score. There is no such thing as 'American music.' What they have is negro music, which is almost savagery of sound."

In a further discussion of the subject Signor Puccini was quoted as follows: "Americans commented upon the fact that there were no American singers taking the chief roles in an opera based on a purely American theme, but although the chief roles in an opera deals with cowboys and outlaws in the far west, there are no American singers quite able to take the American singers quite able to take the leading roles. They have some excel-lent singers over there, of course, Geraldine Farrar, I think, is America's foremost singer, but she is neither powerful noe-dramatic enough to take the role played by Emmy Destinn."

#### English Music Complex.

Not only is much of the music of the vounger English school devoid of what s commonly called "tune," but in nine cases out of ten there seems to be no melodic outline. Chaotic design, harsh meaningless harmonies, an almost overwhelming complexity, together with a brilliant score, seem to form the watchword of much of the present-day work. And it is this brilliant orchestration, combined with an apparent want of melodic invention, warmth and real charm, that is so astounding a feature. Complexity is not necessarily a sign of great strength; on the contrary, it often denotes weakness.—Etude.

#### CROTCHETS OUAVERS A WEEKLY COLUMN OF MUSIC GOSSIP CONDUCTED BY FRAULEIN VAN

The vice-regal party have announced their intention of being present at the whole series of Mepdelssohn Choir concerts and will arrive in town on Monday, Feb. 6. From all the leading American and Canadian cities people are coming by the hundreds, and this cycle of concerts promises to be the most important art festival on record in Canada. Many of the great American papers have already applied for accommodation for their critics, which still further attests to the high esteem in which our choir is held across the border.

Miss Smart, when the beautiful house with its superb collection of pictures furnished ideal surroundings for the sister art. Miss Smith, who is a pupil of the great Carreno, furnished the program and displayed great virtuosity and felicity in Chopin's ballade in Ab, some charming old world pleces, and Jansen's Marmelude duftchen, finishing with the brilliant and effective moto perpetuo by Weber. Mrs. Parker also gave an afternoon and evening musicale for Mr. Hungerford, who was later the planist at a private morning concert at Government House,

Mrs. Allan Dymond, who has been in England since July last, will open a studio for theory next week in the new Heintzman building. Besides meeting many notable musicians during her stay abroad, Mrs. Dymond enjoyed an almost continuous feast of musical good things, the most important of which was the Gloucester Festival, which marked the 187th meeting of the Triennial Choirs of Gloucester, Worcester and Hereford. One of the unique features of this festival was the performance of the Interesting news, somewhat festival was the performance of the Interesting news, somewhat the Interest of the Interest of Interesting news, somewhat festival was the performance of the Interest of Interesting news, somewhat in Interest in festival was the performance of the Lamous Eroica Symphony in the Gloucester Cathedral, the conductor being Dr. 4. Herbert Brewer, the organist. Dr. Lloyd's motet for double choir, "The Righteous Live for Evermore" was also conducted by the Evermore" was also conducted by the composer, as were new works by Sir Edward Elgar and Dr. Perry. Shortly before leaving London Mrs. Dymond heard the dazzlingly brilliant Tetrazzini in the "Barber of Seville," when the great coloratura surpassed all her former triumphs and created an unprecedented furore.

The Political Widower: Elphina, if you can't keep little Eustace quiet, bring him down here and I'll sing to him.

The Tweenie-Nurse-Cook: It's no good, sir; I've threatened 'lm with that twice already.—London Sketch.

Ouida's novel, "Wanda," has furnished the Horetto for the opera composed by a young Italian named Arturo Pavenelli.

London Musical News voices the opinion that Light's "genius" for which will enable the living to communicate with the dead. This invention which will enable the living to communicate with the dead. This invention which will bridge the Styx, and its success will be due to mechanical genius, she says.

"It will be something like a telephone," said Mrs. Fixen. "As soon as we get it each of us can talk directly with loved ones gone before. Can any thought be more beautiful?"

Her auditors signified they could think of nothing so closely approaching the seraphic.

CIRCUMSTANCES ALTER MEN.

Change a man's circumstances and the betting odds are ten to one that there is a corresponding change in his opinions on various matters and things, There is a story of a Massachusetts man who cherished wild-eyed theories on sociological matters. To express it mildly, he was a pronounced radical and had all the makings of a firstclass agitator, which to the minds of many would signify that he was some-

thing of a dangerous citizen. One day he learned in an accidental sort of way that he was a lineal descendant of one of the original Mayflower immigrants, and the sudden knowledge caused an immediate and astonishing flop in his personal character. From that date he was a Conlittle left finger, used Noblesse Oblige as his motto and talked most of the time about family traditions and the sanctity of the constitution.

Let a rich man become suddenly poor and a poor man suddenly rich, and there will be two new men, in all but exceptional cases. Change the point of view and there will be new views. It is safe to say that the socialism of almost any socialist can be obliterated by giving him a comfortable share of this world's goods and making him a director in several sound in-stitutions. This does not-seem to account for the socialists who are already wealthy, but undoubtedly their socialistic ideas would as promptly evapo-rate if they were to lose their wealth. They would then have to get so busy earning an honest living that they would have no time for theories.

A Rude Person. "That young man Pufferly is the

Boston Herald.

rudest person I ever saw," said one

pair seems likely to be followed by a decree of permanent divorce!

And, truly, this seems to me to be a pity, for, although there is piquancy in the short coat, there was exceeding elegance in its deposed predecessor, and this latter is a characteristic more to be desired than perhaps any other.

However, the fact and the fashion must needs be accepted, for all the advance Spring costume models which are being shown and sold for the benefit of sojourners in the Sunmy South are distinguished by the most abbreviated of coats, many of them, indeed, only just reaching to the hips. Their straightness of out-line is, however, practically un-changed, and this is continued and accentuated in the narrow short skirts, while as regards the place of tastening, there seems an almost equal division of favor between three or four buttons placed in the exact centre of the single-breasted coat, and perhaps just two loops of bar-rel buttons, whose position low down at the left side is repeated in a skirt trimming. And as most of you are probably by this time reconciled to the loss of the long coat, you will admit that very attractive, as well as practical, are these new models; for, in addition to their trim simplicity of style the material still most favored for their making is very dark and fine navy coating serge, with touches of black satin and military and Russian braids for trim ming. Some broken check tweeds are also very effective and well-wearing, and I note in almost all the new patterns an introduction of the bright canary yellow to which Paris is just now showing such signal favor and which, used with distinct discretion—but on y then!—has certainly much to recommend it. Many of these oat and skirt costumes are destined to be completed by a separate skirt or blouse, and, to obviate any difficulty about waistbands, a certain number of the skirts are

model, whose first and outward aspect is of extreme simplicity, though when the coat is opened details of daintiness

> Blending Cerise and and Blue Lucile

Brilliant

are revealed which make the costume quite suitable and smart for luncheon wear. That is, indeed, a point which I would wish to emphasize in connection with all tailor-mades, whose essential simplicity must never be allowed to verge on the severity of the masculine attire, from which their original inspiration has possibly been taken. And so, however plain my tailor-made models may be, I always insist on the introduction of some little entirely feminine and fascinating touch -there being piquancy, too, in the contrast and in the unexpected revelation of dainty detail (as, for instance, in the aforementioned model about which I want to tell you). For this, as regards the skirt and the very short straight coat, is made in a reddish-brown tweed with just some loops of self-colored silk and acornlike buttons, which blend the two materials - absolutely nothing to look out of place or get damaged, even on a long and dusty railway journey or a tramp in the rain; for, of course, the skirt is of the very short variety But, then, you must know that the corsage, to which the skirt is permanenly united by means

of a high band of the tweed, is of brown ninon, also soft and supple, prown ninon, also soft and supple, and over the shoulders semi-transparent, too; for there its only lining is a flesh-pink chiffon, and so you get a glimpse of inner ribbons of delicate rose hue threaded through the lace which edges the lower and silken lining. silken lining. And, outwardly, too, there is a kind of bois de rose in the way of a piping of velvet, while in a funny little tie bow of one of these Indiar fabrics in which I always take delight there were brought together many shades of dead gold and green and bronze and blue and rose. Finally I have added a little turnover collar embroidered with porcelain beads, this being more in harmony with the bizarre and beau-tiful material than anything lacy or

Now, how do you like this idea? I originated it, to begin with, for the benefit of a woman who was going on a somewhat lengthy trip without her maid, and who, consequently, wanted a costur in which there was nothing not even on the bodice part-to soil quickly or get out of order, and as this desired object was most successfully achieved in her case it may also, I hope, be of service to some of you, my readers, under similar cir-

Fortunately for this

same traveller, the

small size of the most modish hats of the moment permitted her to discard, without the least pang of regret, the hat-box, which was of dress-trunk proportions, and to take insted a smaller square-shaped affair into which fitted one of the separate "cages" of latticed webbing, to which hat linings can be so casily securely pinned, this arrangement further insuring every half-inch of space being utilized to the best advantage. But the special point of advantage of this new-box was its provision of a place of uncrushing shelter for veils, where these easily damaged affairs could be kept safely and flatly, however long the journeyings and however rough the treat-ment which the box had to undergo. For at the very bottom a flap lifts up to disclose a shallow cavity, this flap fasten-ing with a catch and being further kept in po-sition by the "cage."

New "Harem"

Skirt

And I expect you are all and already provided with one of those handbags or satchels, which, their holding capacity being as considerable as their smartness, render us for once not only equal to but actually superior to the "mere man," whose many pockets have hitherto made our entirely pocketless condition seem specially sad.

Of the more elaborate and muchbroidered bags, which are designed and made to suit and complete all

and made to suit and complete all restaurant and evening gowns, I have already told you; and also I have given you a hint of the chic effect which may be secured by the sling-ing of other bags of soft suede over the left shoulder by means of long In the matter of hairdressing, too,

In the matter of nairdressing, too,
I have a message for you this week,
and it is to conjure you to preserve
the shapely contour of your head by
means of closely banded ribbons or
twists or plaits of hair rather than
to overburden it with top-heavy looking masses of curls. A battle is being waged at present between these two distinctly different coffure styles, but I have no doubt whatever as to the ultimate result, and would wish you to be numbered among those on the winning side. Enormously wide and closely en-circling bands of velvet ribbon are in

many cases being worn to secure and accentuate the "small head" ef-fect, whose virtues I have always proclaimed. The only hair shown beyond the velvet band and bandage

other festivities which are proverb-ially and pleasantly associated with

First, then, the photograph perpetuates the detail of a "picture" frock of soft mauve shot taffetas, with a gathering of silver-meshed lace to hold in its folds about the feet, and hold in its folds about the feet, and a festooned silver fringe to make a background for trails of wee silken flowers. Pale pink and blue and mauve and yellow are these tiny blossoms, and they are repeated, you see, on the corsage, where they are massed together in prim little bouquets on the fichu folds of filmy net and silver lace and fringe, and the brief transparency of the sleeves, while then, as the waist is folded, some soft blue chiffon, whose short ends are finished off with a silver fringe.

Next, as something entirely new and striking, let me introduce to you that blending of pale and plain blue charmeuse, and a waist which is patterned with irregularly sized spots of silvery white. The whole effect of this dress is secured by its cut and draping, for there is not a touch of trimming anywhere. Just one big and beautiful rose of palest pink being set high up on the cor-sage for—apparent—fastening and actual finish.

And, finally, the other gown brings together cerise, charmeuse and ni-non, and Oriental broderies in green and blue and purple, a golden girdle, with shining tassels also figuring the scheme, and the absence of any actual and orthodox sleeves being made up for by the addition of jewelled ornaments and chains, which blend the brilliant colorings of the gown and soften them by means of loops of shim-

mering pearls.
So, the "little girl" type—the langorously lovely and artistic woman—and the dark brilliant beauty may each find her most becoming form of attire in these respective and different creations.

"It Could Only Happen in Paris"—The Actress So Beautiful! The Horse So Fascinated! The Maid So Projected! The Hat So Crushed! And the Cabman So Projected! The Hat So Crushed! And the Cabman So Gallant

(From Le Figaro.)

LLE. YVONNE DE BRAY, that charming and wonderful light of the Varities, bestowed her radiance upon the stern environment of a retreat of justice inflexible Thursday when Henri Sinot, a cochere, was accused of stopping her carriage in menace of the public welfare, of causing to be destroyed a beautiful new hat, causing her to be late at the theatre and addressing insults to her.

When Mile. de Bray /entered the Court of the Tenth Arrondissement, 'he audience applauded vigorously and the Judge, Maitre Lamotte, arose and congratulated her upon her appearance after so devastating an experience. Mlle. de Bray, much moved, ex-

pressed her thanks to Judge and audience.

The accused Sinot was brought in and the charges were read. It would appear that Mile. de Bray, already late for her appearance at the theatre, was driving quickly down the Boulevard Haussmann. At her side was her maid, carrying on her lap a costume of mademoiselle; on top of that a paper box

containing mademoiselle's marvellous new hat. At the Rue Clichy their coachman was stoppedeso suddenly that the maid was precipi tated on the box containing the hat, and although of not great weight so violent was the encounter with the box containing the hat that the hat was crushed irrevocably.

This sudden stoppage was due to the accused Linot's driving in front of the carriage of Mile. de Bray, refusing thereafter to move and so causing such delay that Mademoiselle was forced to be still later for her performance, so desolating many who waited for her. And besides, was addressed with insults by

Mile. de Bray during the reading could not contain herself, and frequently interjected, "Yes, that is so." "Intolerable." "Shameful," and expressed her anger with stamping of foot and emphatic nodding of head. Murmurs of indignation arose from the courtroom and many angry looks and gestures were directed toward the accused.

The hat was produced. It was indeed crushed out of recognition. Mademoiselle could hardly restrain her tears. The indigna-

The many of the state of the st

tion again became intense and the accused

Most damaging was the story of the maid as to the intensity of the shock.
"Mon Dieu!" she said. "It was all peace.
And then—chaos. I felt myself shot from the seat with force prodigious. A thousand times rather would I have reached the floor of the cab first. But it could not be. I plunged into the box containing Mademoi-selle's hat. It's position was such that it reached the floor first. Imagine then the shock of encounter! Imagine the destruc-

Here Sinot betrayed a desire to speak Amid cries of anger he took the stand. The Judge gazed upon him menacingly. "Not for a thousand lives would I have

had this happen," he said. There were cries of "Bon;" "He confesses," from the audience. "Behold!" he continued, "I was driving slowly. At once my horse accelerates his pace. At once he stops as though frozen. There are cries. lamentations. I cannot see in the carriage, as you must know," he said, turning to the courtroom. There were cries of, "Yes, it is true. He could not see inside "I call upon my horse," continued Sinot.

"He will not move. I address him harshly—yes, in the terms you have heard. But it was to my horse they were addressed, not to whom might have been in the carriage. He is inflexible. He will not move. I jump down and peer into the carriage from which proceed the cries.

"Then all at once I understand! He has seen Mile de Bray and has been fascinated by her beauty He has looked into her so lovely eyes! He is in a dream! He will not

As Sinot closed the audience shouted plaudits. Mile. de Bray, smiling tossed him a rose.
"He is forgiven," she said to the Judge.
"Ah, Mademoiselle, who can say that chivalry is not still alive in all France?" answered

Maitre Lamotte.

Surrounded now by scores of cheering friends Sinot bowed his way out to freedom

We echo Maître Lamotte, "Ah, who, indeed, can say chivalry is not still alive in France?"

# THE WORLD AT LARGE AND SPORT IN GENERAL #CONDUCTED BY

#### Affairs of the Day

said, that a bank of extra good standing lost five million dollars in a transaction similiar to that of the Farmers' Bank and the Keeley mine surely there is opportunity for another investigation and perhaps other prosecutions. It is no excuse for improper proceedings that the bank is strong enough to stand it. On the contrary if the strong and influential were they do now, that the law was no respecter of persons. In the meantime such occurrences as we have recently had are a sad reflection upon our much boasted and much-vaunred bank ing system. Still it may be that the system is right enough but that its carrying out is sadly at fault. More rigid public inspection of bank matters is certainly needed and yet with every possible safeguard bank managers and directors will go wrong. Most of us have some recollection of the big Glasgow Bank affair and what agers and directors will go whole of the fertile plain, Most of us have some recollection of the big Glasgow Bank affair and what the big Glasgow Bank affair and what the directors. Most of manhood, happened to the directors. Most of us also have a recollection of the rarmers' Loan matter and how an opportune expenditure of a large sum of money stifled the inquiry that should have been pursued to the bitter end no matter who was hit. By the same token, Farmers' financial testitations empear to be a bit unfortinstitutions appear to be a bit unfortunate. And so do farmers' papers—witness The Empire, which, like the Farmers' Bank, had a large number of small shareholders in the rural

Do we want a coyal duke as governor-general? Wouldn't a plain com-moner do equally as well? Aren't we in danger of paying to much homage to rank, birth and title? I do not fear the establishment of a court as some people do, for we had H. R. H. Princ-Louise here without disturbing democratic ways, but we were pooand rougher then. We have now fairly large moneyed class, who while still being parvenues, are de-cidedly anxious to become aristo-cratics. The encouragement of their cratics. The encouragement of their anxiety and ambition is not a healthy sign. It will end in class division neither consistent with democratic principles nor with a free country. It will also foster a class of absentees and help to subject this country to greater imperial dominance. If there was not a title in the land nobody would be a bit the worse, while some score or two of people would be a some score or two score or two of people would be prived of an opportunity to display prompous vanity and gingerbread gloss. Canadians have no sympathy, nor ever can have, with that silly couplet written or spoken by the late the late of God and His glory, Herald of Christ, His son, Lord John Manners, scion of the ducal

house of Rutland:
Let wealth and learning, arts and But God preserve our old nobility.

A coroner's jury usually inspects the body of the victim before rendering it's verdict. Wouldn't it have teen quite as well if the jury of farmers on the street railway case had been required to experience a little of the over-crowding that takes place on the street-cars at certain times of the day? There's nothing like getting to the hard-rock facts and there is no better way to reach that desirable point than by experience. We frepoint than by experience. We frequently see things thru an altogether different light when we have our-selves been up against them. But why should farmers be specially summoned to decide the fate of cities?

The Ontario Agricultural College is to be heartily congratulated upon its in judging contests. It has several times scored in formidable competition at the Chicago live stock show and now it has tailled at Boston, Mass. A short time ago it was decided to send a team to the Boston Poultry Show, which is to the poultry industry what the Chicago show is to the live stock industry of the United States. Ontario had never been represented in the competition before, but it was felt by the president of the college and the provincial minister paid to poultry thruout Ontario at the present time justified sending representatives. This view has been amply borne out by the success achieved. of agriculture that the attention being borne out by the success acmeved. The Ontario Agricultural College men won first prize in judging utility poul-try, second prize in judging fancy poultry, and first and second prize for the exhibit of dressed poultry,

which they took with them. M. C. Herner, Mannheim, Waterleo county, Ont., and F. N. Marcellus, North Winchester, Dundas county, ont. Winchester, Dundas county, ont.

at Ottawa has brought a hornet's nest about its head. It had far better have left tinkering with the tariff strictly alone. It is evidently impossible to satisfy all sections of the country. To come down the historic road of satisfy all sections of the country. One wants this and one wants another, the British Turf," is surely certain evi-Board of Trade with a drastic resoat all except in an upward way. This ability. Such a man was Tregonnick present movement has received, coming as it does from Ontario's outlying port and the practical gateway for the lake shipping interests to the North-west. Before negotiations were undertaken at all extensive inquity should have taken place as to the requirements and wishes of the country. Then the government would have been States, but on the whole it rather looks as if the government would have been well advised had it left well enough alone. We were doing nicely, developing internal trade, and the country generally grantified finely. Farmers are proverbial grumpers, one wants that they could travel thousands of marked that they could travel thousands of miles from their homes to the capital and dissipated life, such as is attribution of how much she would bring if offered at auction before a crowd in which was nobody who knew the mark and the for had any suspicion what animal she capital and dissipated life, such as is attribution of how much she would bring if offered at auction before a crowd in which was nobody who knew the mark and the for had any suspicion what animal she capital and dissipated life, such as is attribution of how much she would bring if offered at auction before a crowd in which was nobody who knew the mark and the for had any suspicion what animal she capital and dissipated life, such as is attribution of how much she would bring if offered at auction before a crowd in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in which was nobody who knew the mark all the world knows, resulted in the knew the proposition for had any suspicion what animal she was.

It was finally decided to take her to a certain place and put her up at public sale. One of the party was to ach as a suctions even third place. New regulations of the Bureau of Animal Industry at Washington affect-ing the importation of live stock for breeding purposes are causing much concern among horsemen as well as among the owners of dogs, says The New York Herald. Prior to January 1, 1911, the regulations of the bureau gave to the custodians of all recognized American stud books and herd books authority to issue certificates which when presented at the custom house would pass in registered animals free of duty. Without warning and with-out cause, so far as most of the stud books were concerned, the Washington of authorities suddenly revoked these regsuing customs certificates to importers of live stock and withdrawing all Under the regulations now in force registration in foreign books is the sole adoption of your suggestion. It would test of pure breeding for purposes of mprove the health of the men and add importation, and in some cases it is manifestly a poor one. In the last pub-lished volume of the English Hackney Stud Book, for example, there is duly brown stallion Smite, by Sir Horace, dam The Mighty Atom, pedigree un-known. This is one of the class of quite numerous cases in which stallions breeding are full registered in England and will therefore pass muster under the no stud book in the United States or Canada would admit such a horse, to registration, and if brought over prior to January 1 the importer would

> Horsemen regard it as singularly in consistent and unjust, continues The Herald, that under the operation of a tariff law presumably framed to pro-tect American breeders short bred horses of this character can be brought in and certified by the government as "pure bred," to be sold under the magic of the word "imported" in competi-Hackney Horse Society has directed the attention of the Bureau of Animal Industry to the mater and it is hoped that action will be taken to meet the

Reciprocal relations between the valueless for turf, or even for breeding United States and Canada in the matter of importing and exporting registered live stock have been severely strainned by the new regulations of Bureau Animal Industry at Washington, The Herald further says. These regula-tions provide that no animal registered in any Canadian stud book shall be in all crosses to animals registered in the country in which the breed originbooks for many breeds of live stock were established there before there were any stud books in the country of the origin of the breeds, hence many to effect injuriously the very great of the origin of the breeds, hence many prestige and reputation for power and animals recorded in the Canadian books were imported and recorded in Canada at a time when there were no fore, be hoped that the three stewards, stud books in which to record them in or triumvirate constituting the execu- the country from which they came. YOUNST HELP
YOURSELF
TO SUCCESS

Copyright, 1911,

ERY conspicuously successful man—the statesman, the banker, the writer, the painter—is steadily bombarded with appeals for belp—not alone financial help, but for the help t'at unsuccessful beginners fancy they need in order to put them on the right road.

"I am sure I can write plays," wrote a young woman to a well-known playwright. "You yourself were a struggling tyro once, and I think you can appreciate how I feel. Perhaps some more successful man helped you with advice and suggestions, introduced you to a manager and spoke a good word for your talent. All that I ask is that you do the same for me, for without help I feel that my ability will never prove of any use to me or to the world."

The playwright replied: "Dear Madam—You are wrong. I helped myself. Unless you are able to do the same thing you haven't any ability."

It was a harsh letter, but it was really far more helpful than thousands of words of technical advice, which would have proved more confusing and discouraging than inspiring to the seeker after aid.

As Mrs. Wilcox has wisely written, the world "has troubles enough of its own." Sometimes a busy man will take the time and trouble to help another along; but usually the kindness is a mistaken one.

The experience gained from fighting your own battles is worth many times the sum of all the advice and assistance you can receive. In short, it is not until a man must fight not only for himself, but for others—must not only pay his own way through a world that trusts nobody, but that of his wife and children, that he becomes really self-reliant. And be sure that no one else will rely on a man who does not rely on himself.

No organization in which favoritism prevails can endure. Not only are deserving men denied their due, but the favorites that are exalted are made worthless by the very help that they receive. In the old monarchies men, for no reason save that they had rendered the king some foolish and fantastic service, were given great grants of public lands, crowned with titles and allowed to fatten on the public revenues. The result was a nobility about as useful to the nation as so many tin soldiers.

The few members of the English nobility that have won distinction have done so despite their titles. Indeed, in these modern days most of the able men upon whom titles have been conferred helped themselves to distinction, and by the very force of their success compelled recognition from the Government.

Russia, governed by a collection of worthless, dissipated Grand Dukes, all helped to place and power by an idiotic form of government, is notoriously the worst governed of al. European nations.

There are many able, intelligent Russian men who, if allowed a part in the conduct of their country's affairs, would speedily abolish the outrages that are perpetrated against the Russian people.

But because they are men who know how to do things for themselves they are kept out of public life and the good for-nothing brothers and uncles and cousins of the reigning Czar—men who never have known the necessity of any form of work—are continued in power.

Very cautiously, very gradually, the people of Russia are profiting by the teachings of such men as Tolstoi; and there will come a day when the Czar and his precious kinsmen will be invited to retire to some distant little island and allow Russia to come into its own.

Whoever has seen the hangers-on about the political headquarters of a party in power in the United States can well understand the evil of dependence and favoritism there.

The form of politics that seems to be popular in the large cities rewards men not for what they do or can do for the people, but for what they can do and have done for the party.

Thousands of weaklings who, thrown on their own resources, could barely make a living, are "taken care of" at the orders of the boss, given places with whose duties they are not in the least familiar, and paid salaries which it is little better than larceny to take.

Their talk is all of the boss and how they are going to keep "solid" with him. They offer him a degree of adulation which would sicken the Sultan of Turkey. They whisper his name with almost religious reverence; but when it is suggested to them that there might be ways by which they could increase the efficiency of the offices they hold or really earn the salaries they are paid, they gape in blank amazement. Pitiful, helpless dependents that they are, they cannot understand that every day of subservience to another man makes

The World May Owe You
a Living, but Unless You
Go Out and Collect It
You Might as Well Consider It a Bad Debt.

them more worthless, that every day they do not help themselves—unless it be to the public treasury—makes them more incapable of doing anything for themselves when that shall be necessary.

Two men of wealth and power were talking of the future of their respective sons.

Said one: "I thank Heaven that I have it in my power to shield my boy from the hard knocks I had to bear. No brutal section boss is going to use him the way I was used when I began work with a pick and shovel on the railroad. He is not going to have to fight and struggle and work eighteen hours a day to get enough money to branch out on his own account the way I did. I have given him a good education; I have equipped him for business, and he will begin work as secretary of the railroad that I used to work on as a section hand. He is bound to succeed."

Said the other: "You're a railroad president and a successful man, yet you began as a section hand. When you were working your way up by way of a roundhouse job to a superintendency there was a young man, the son of a vice-president, made division superintendent. Do you remember him?"

"Yes," said the other. "He lasted just one week."

"He lasted just one week because he got the same kind of a start that you are going to give your son. He got a college education—an excellent thing—but not a schooling in the railroad business, and then he was set to work to learn his trade at the wrong end. The men he gave orders to knew more in a minute about the details of the work than he could learn in a year. He failed because he had never done anything for himself, and you are going to give your own boy a splendid chance to make the same kind of a failure. Maybe, if he is a phenomenon, he will succeed, but the chances are all against it. My boy is wearing overalls and wiring cars as an electrician's helper in the shop. I think he will have a pretty fair chance of success, for nobody is going to help him, and what he knows he has got to learn."

The world may owe you and every other man a living, but the world has a habit of never paying any debts that it can get out of paying. To ask or to accept help from others is a confession that you have ceased to rely on yourself. To continue to accept help from others is to make of yourself a worthless dependent.

The most seasoned veteran in any trade or profession can give no better advice to the beginner than that given by the playwright we have quoted:

"I helped myself. Unless you are able to do the same you haven't any ability."

For ability, as the very word implies, means being able to do things, and to do things for yourself.

The son of the very rich man has a chance in life that is about equal to that of the son of the very poor man. The first is denied the opportunity to do things for himself; the second is denied the opportunity to get a start in youth, to begin life with good health and a good education.

Many men who have had to work day and night to get a start in life imagine that by saving their sons from the same necessities they are doing them a signal service. They fancy that their sons will never be able to accomplish what their fathers accomplished unaided; yet year after year many continue to succeed, despite the handicap of poverty or the necessity to do hard muscle-wearing

In youth boys and girls are entitled to help; their early years are years when they ought to be dependents. They are entitled to begin their work with trained bodies and trained minds, the advantage of good associations and the best counsels that can be given them

But when they once start out for themselves, if they have not the brains or the energy to find their own road, they may be sure that no one will find it for them.

Human nature is 99 per cent selfish, and, being selfish, is going to busy itself with its own affairs and to waste as little time as possible in holding out helping hands or assisting others over the wall of success. And the sooner the youth who has his way to make learns that he must be his own helper, the sooner will he win
