

CAPE OF GOOD HOPE—LATEST INTELLIGENCE.

By the last mail advices have been received from the Cape of Good Hope to the 9th of Feb. The following is from the Zulu African of that date:—

According to accounts received by the Frontier post on Thursday last several divisions of the army had marched to the country near the stronghold of the hostile chiefs, who appear to have been driven from their haunts by the inviolable force of the whole of the Amantla army, which they had defeated, and a horde of two thousand men had been added to the motley mass under the command of the Zulu chief, who has hitherto kept possession of the Waterloof. The first impression produced by the news of the result of the Trans-Kei expedition appears to have been, and the position of hostility is precisely the same as it was on the day when the plan was formed to put an end to the tedious, monotonous and concatenation of failures by that diversion.

The unhappy failure of attempt to expel those devastating hordes from their strongholds in the Waterloof, immediately preceded that enterprise, and the most important operations were conducted during the absence of the troops, who have established a fact, that nothing has taken place to warrant the confidence that the soldiers of the Zulu army have received any other, or that he has been recruited to the imperative necessity to sue for peace. The very accounts above alluded to prove the reverse, and the most important operations were conducted during the absence of the troops, who have established a fact, that nothing has taken place to warrant the confidence that the soldiers of the Zulu army have received any other, or that he has been recruited to the imperative necessity to sue for peace.

THE AUSTRALIAN GOLD MINES.

We have received letters from Sydney to the 18th Inst. The following is an extract from a letter received by this office:

"The precious metal arrives in daily increasing quantities. The estimated output has risen from one to three millions for the month. There is no prospect of a decline, as far as I have been able to ascertain from personal communication with diggers of various degrees, the labour is by no means so tedious as some would think. Commercial affairs are going on easily.

"The latest is magnificent. Wages are not extravagantly high, I do not see any prospect of famine for some time to come. I do not intend to prognosticate the probable state of the market. We are completely in the dark. I have it, however, on good authority, that in the early part of the year the probable heavy shipment of gold on speculation will have the effect of creating glut, and it would be well if a large degree of caution was exercised in making commitments in reference to the Victoria gold fields."

The Sydney Morning Herald of the 14th December says:—

"We have received by the Emma, Melbourne papers to the 10th inst. The following is an extract from the paper:—The whole of the gold-bearing mountains in the south of Victoria are now being worked, and it is estimated that the quantity of gold in the Victoria gold fields is as great as that of the California gold fields."

THE IRISH CHURCH AND THE MAYNOOTH COLLEGE.

It is a remarkable fact that although the voice of the Protestant people has been heard, condemning the grant to Maynooth, on account of its falseness and superstitious impositions in its laws, no Papist has been able to utter a word in defence, or to deny the charge. The whole rabble priest-hood of the Pope are silent; for they know that to express their willingness to support the grant from those hands which are branded deep in the hearts of the people would be to expose themselves to defeat, expense, and disgrace in every town and village of the land. The Papist is silent, because he knows that to do so would be to expose himself to the same fate as that which has befallen the Jesuits of the United Kingdom, who were expelled from the country on account of their unchristianlike conduct.

The grant to Maynooth is a grant to a college which is to be supported by the State, and which is to be used for the purpose of educating the children of the poor. It is a grant to a college which is to be supported by the State, and which is to be used for the purpose of educating the children of the poor.

THE PHYSICIANS USE OF WILD CHERRY.

So says the Morning Chronicle, Quebec, July 23, 1848.

It is but an act of common justice to the discoverer of this invaluable remedy, to make known the popularity it has acquired in Quebec, and its neighbourhood. On inquiry of the Agent, we learn that the sales of this medicine have increased, and that its virtues in the cure of Coughs and Colds are known and appreciated, as extensively recommended by the most eminent Physicians, and as well as amongst their patients. We are aware that a large portion of the community regard with interest and in many instances with admiration, anything in the shape of a new remedy, or of any other commodity; and it is for one class more than another that we have to commend this valuable medicine. Indeed, the public have a right to look to their benefactors on the subject, on their characters of conservatism, and on the fact that this medicine is a valuable guarantee of the efficacy of the remedy.

THE BARRON'S CASE.

Remember, the original and only genuine WILKINS' BALSAM OF WILD CHERRY, is always bears the signature of I. BUTTS on the outside wrapper.

This Balsam is a valuable remedy for all kinds of Coughs, Colds, and Hoarseness, and is especially useful in the cure of the most distressing cases of these affections. It is a valuable remedy for all kinds of Coughs, Colds, and Hoarseness, and is especially useful in the cure of the most distressing cases of these affections.
