J. E. COLLINS..... EDITO IMPORTS AND EXPORTS.

[Mail.] "It is a striking fact that while the exports of lumber and agricultural produce have greatly increased during the past two years, the exports of manufact tured goods have considerably diminis ed. Those who contended that presen prosperity is due to the tariff are und obligation to show that its operation he put us in a better position to pay by o exports for our imports . - Globe

Aug. 18th. Our contemporary has not ye apologized for publishing fals figures of exports, as we prove by reference to the Blue-book, a recent issue. To poison the stream of public opinion is a offense the morning organ ha too often attempted to commit But the eyes of the people an open to tricks like that now, an deception is not so easy as used to be in old times. Mean time we have to observe that our contemporary will consu the last returns of trade an commerce it will find that th N. P. has just fulfilled the ver condition demanded, It will fine under the signature of Mr. John son, a table of statistics which shows that the value of the ex ports from the Dominion in 188 exceeded in value those of an other year since 1874, and th value was only exceeded in tw years, viz., 1873 and 1874, sinc the date of Confederation, also shows a result never show before in the Dominion statistics viz.: an excess of exports ove

imports, the amount of such excess being, over total imports \$1,421,711, and over value of goods entered for consumption \$16,129,109. The amount of import and export Customs du. ties collected. \$14,138,849.22 was exceeded in 1874 by \$283,-033.45, and in 1875 by \$1,222,-532.90.but in no other year since 1878. Table No. 3, aggregate trade of the Dominion, exhibits an increase in the trade with Great Britain, over that of 1879 of \$13,018,438, and a decrease in that with the United States of \$8,207,863. The trade with the British and foreign West Indies and South America during the last year amounted to\$7,562,678 and in 1879 to \$5,498,929, showing an increase in favour of las year of \$2,063,749. The trade with China and Japan shows an increase in the last year over 1879 of \$425.944, and a still larger amount over the two preceding years. These facts are official, indisputable and significant. They prove that our export trade is in a healthy state, and that our own foreign trade is not decreasing The figures will no doubt not be satisfactory to an organ tha makes a practice of publishing false statistics without any 're-

apology when corrected. A W CKED WHILER
