were considerable and those of the Chinese heavy.

Parts, Oct. 17.—The Figare says the Chinese force defeated at Chu was only a column of the left wing of the army invading Tonguin. It explains the slaughter of 3 00 Chinese by the fact that no quirter was given or taken and no prisoners taken. The Intransferant asserts that of 10,000 French sold eres in Tonguin, only 4000 are effective. It declares that the Chinese invasion, if not alrested, threatens to overwheim the French, and that it is necessary that not modely reinforcements, but a full arms, he font to their a sistance.

Three thousand of a reinforcement have left Toulon within a fortnight.

The legislative committee's report on being read, regretted to find the name of the Marquis of Lorne being cited in public print as an advocate of Chinese immigration to Canada, and asserted that his lordship knew as little of the merits of the question as he has known of Canada as a good field for the poor people to immigrate to. The report trusted the wage'earners of Canada had heard the last of his lordship's "opinions" respecting the labor market in this country—a question on which he spoke without personal anowledge or disfinite rested observation. It also advored to published statements as to the wretched treatment accorded employes engaged in the construction of the Rocksymountain and other sections of the Canadian Pacific railway, expressed belief in their truthfulness in the main, and condemned the proper time arrives. The report was adopted unanimously.

A match is to be played to-day at 3 o'clock

The World has always entertained a good deal of sympathy for Harry Gilmore in his expected encounter with Fulljames; but when he and his principal backer, McIntyre of Peterboro, offer the excuse that they were afraid of the Toronto police there is little short of cowardice to be ideducted from the statements. Prizeignts as a rule have been voted orutal institutions in all civilized countries, and should be regularly suppressed. Gilmore gave a large number of his sporting friends in this city to believe that he was not afraid to face Fulljames. They took stock in him and rallied in ample numbers. The city police offered little or no interference, and as far as the proceedings went everything was 0 K. The most unsympathetic part of Gilmore's story is that he never left the city at all, and consequently never looked for the grounds. The stakeholder yesterday paid over the \$500 to Fulljames. Fulljames and his wife left for Barrie last night to visit relatives. There is a vague rumer in certain circles that these two men will meet very privately and fight it out for at least \$500 a side.

For many years it has been the custom of the grain buyers at 8t. Lawrence market to stop the farmers at the corner of King and West Market streets. About 9 o'clock yesterday morning Deputy Ch of "tuait backed up by three po icemen appeared on the scene and ordered the buyers to move to the corner of Front and West Market streets and buy there. He said he was acting under orders. Each farmer as he drove up with his load was compelled to move to the place stated, and before long Front and West Market streets were so crowded with vehicles that a wagon could not pass. On seeing this, and also that the grain buyers did not move from their accustomed place, although the farmers did, the assistant deputy withdrew his order and buying once more went on at the old stand. The grain buyers say that there is no blockade on King street during business hours, and that there is not the slightest necessity for police interference.

THE TORONTO WORLD. SATURDAY MORNING, OCT. 18, 1884.

Mixed and Muddled. her the Globe is so mixed and muddle on the railway question that it has actually no on of its own to offer; or else it is delib rately seeking to darken counsel by words out knowledge, in order to confuse the public mind as much as possible, preparatory to some tricky "sharp turn" that it has in con-templation. Let those who can explain what templation. Let those who can explain what the Globe is driving at in the following paragraph, which appeared in yesterday's paper:

It is now asserted on behalf of the C. P. R. that the construction of an all Canadian route railway involved eitner monopoly or ruin. To sustain this it is asserted, that every railroad crossing the United States frontier, which touched the C. P. R., would take away its trade. This is to assert that the natural course for the trade of the Northwest is southward, and that we must fight nature, or that the C.P.R. can not convey the grain, beef, etc., intended for the European markets, to which the surplus of both countries go, as cheaply to the Atlantic seaboard as it would be taken by United States roads. To bolster it up, Mr. Blake's railway policy is misrepresented, and a policy is invented for Mr. Mackenzie. Mr. Mills, a member of Mr. Mackenzie's government, introduced a measure which would have greatly encouraged and promoted the construction of branch roads. But, even if Mr. Mackenzie had chosen to discountenance roads that might be considered competitors, there would be a wide uifference between monopoly in the hands of a government bound to consider first what the public interes's require, and a monopoly in the "hands of a company whose chief concern must be to earn large dividends. the Globe is driving at in the following para-

Does the Globe itself hold that the "natura" southward, by American lines? It has before now argued that roads should be built through the southern portion of the Canadian territory leading to the boundary line, which, if built could be nothing else than feeders to the Northern Pacific. The true "natural course," we contend, is straight to Thunder bay, thence by water and Canadian rail routes, without ever touching American soil at all. But, as this would be a carrying out of national policy would not suit the Globe.

Again, are we to understand that the Globe uld, under any circumstances, be in favor of a railway monopoly in the hands of the government? The reference to Mr. Mackenzie eems to imply that it might, but still we can not be sure. For, to take this ground would be to go back on free trade in railways, which the Globe has supported all along except in one instance—that of the Grand Trunk and Mic land amalgamation. The Globe is either mixed and muddled to distraction on the rall way question ; or else it is "pipe-laying" for big surprise game of "cheat the public."

Dr Daniel Wilson has ere this expresse very explicitly his views on co-education His remarks on the subject in his speech at Convocation yesterday will not, however interest, especially as co-education as far as University college is concerned, i now an accomplished fact. The president of University college, as was to be expected of a man of his calibre, takes a refreshingly broad view of this important problem. His appreciation of the beneficial influence upon the munity of highly educated women ments of Ruskin's "Sesame and Lilies," or Coleridge's lectures on "Romeo and Juliet." He looks upon them as a leisure class able to and he thinks that this devotion will enhance that influence. On the side of higher educa ion he throws his whole weight; from co education he dissents. Our own opinion is that the head of University college shrank some what from the responsibility of conducting an institution where youths of both sexes inte mingled. He speaks eloquently of the deter orating influence of this upon the girls. Was not behind this a dread that any evil consequences that might follow wou be laid on his shoulders? Of this, however, he need not be afraid. The Ontario government has decreed that women shall be admitted to lectures, and the phantasmal misfortunes that Dr. Wilson anticipates will, if they occur, be

laid to their charge. We have before argued that, till a separate institution is erected for women, they should be allowed the same advantages as the male competitors in the examinations which are open to both. This Dr. Wilson cannot in his heart of heartsaccept; but in his convocation speech he generously concealed this, welcomed the girl undergraduates, and promised for himself and his colleagues that the utmost should be done for their instruction, comfort and wel-

A Turn in the Cotton Trade. There are various indications that the wors of the depression in the cotton trade is over and that things have taken a decided turn fo the better. In St. John, N.B., the Parks factory resumed operationson the 6th inst., and the proprietors expect now to keep going right ahead. (ther reports to the contrary not with standing, it is a positive fact that the Valley-field mills, on the Beauharnois canal, have not closed down, but are now working as usual, on orders; this latter being a feature of the business which is likely to be more promi nent with Canadian cotton mills in future han it has been in the past. The Dundas nills have just started again with 250 hands. on three-quarters time; and full time will by sumed as soon as enough cotton put through the first process has accumulated to warrant it. The company has orders enough booked to keep going on for a long time. Anothe favorable circumstance is the final settlement (on the 14th inst.) of the troubles of Morrice & Co. of Montreal, who about a year ago became embarrassed through making advances to a number of mills. The firm settled with its creditors at 75 cents on the dollar, which has all been paid up, and the credit of the firm now stands fully as high as before, though there will be no more making of advances to keep mills running. The Montreal Gazette is of opinion that the completion of this impor tant settlement has cleared the air consider ably, and says: "The future of the cotton in dustry now promises better results than have been obtained for some months past Stocks are not excessive in retailers' hands, and it is computed by good authorities that six months will s. ffice to bring the supply back into close relation to the demand. When that time comes the trade will take on sharp activity. and that it cannot be long delayed is assure by the fact that the mills have diversified their productions, and are running on man new lines of goods for which the demand constant and abreast of the output." It does appear as if the turn of the tide had come a

With the general confidence that the public reposes in Lord Dufferin perhaps the fears of a Russian advance further towards Herat. thus threatening our Afghan frontier, wi subside when that diplomat undertakes the governor-generalship of India. Lord Dufferin is too astute a politician to be hoodwinked by the shallow pretexts of the Russian govern-ment in its attempts to explain away her invaion of central Asia. Neither is he so shor the most difficult questions in connection with Indian politics. Should he succeed in out-witting Russia and putting so decisive a veto upon any further encroachments on her he will have achieved a feat more bri perhaps than even those accomplished by him in Egypt and Constantinople, for certainly an open agreement with Russia whom this ques-tion is a matter of extreme importance although at present recognized as such only by a

I must say I never sold a medicine in my life that gave such universel satisfaction. In my own case, with a badly ulcerated throat, after a physician penciling it for several days to no effect, the Eclectric Oil cured it thoroughly in twenty-four hours, and in threatened croup in my children this winter, it never failed to relieve almost immediately.

To the Editor of The World. SIR: Some members of the property com pended on the island, and that is enough. But the taxes are paid by the cottagers, and how much thereof is expended for their benefit?

Almost nothing! The cottagers are only tenants, whose leases expire in a few years, and is it to be supposed they are to protect the shores of the island for the benefit of the en-

there is something for you there. After the city?
Look at the thousands who crowd the side walks during the summer season, and what are the few rent-payers in comparison to them? The tenants who, with their pretty cottages, improve the appearance of the island, which without them would be a bare common, do not get much for their rents and taxes.

The Globe and the Churches.

To the Editor of The World. SIR: Your correspondent, A Mechanic, appears to be greatly excited at the Globe peroffiting one of its reporters to visit the various hurches in the garb of a working man. Now it is a well known fact that all classes of people (not even excluding the mechanics) through sickness, misfortune and other causes, are often unable to appear in the style, eatness and respectability becoming a wor shiper attending the house of God, and their

shiper attending the house of God, and their self respect forbids them to go where their attire would attract attention and cause remark, just as a mechanic would working at the bench dressed as a dude.

District visitors will tell you that want of suitable clothes prevents hundreds from attending a place of worship. It is a falling with many professing christians, that they do not exercise that greatest of virtues, charity, which was one of the chief characteristics of Him who was the son of a mechanic.

I will pass over his remarks regarding the bribery trial, as he evidently does not know his own mind on the subject. But he apparently desires to vent an attempt (feeble) atsarzam on one who aspires to be chief magistrate of the city, and I think a very honorable ambition, and goes on to state that he is the nominee of the Globe. I would ask who gave your correspondent the right to make this assertion? One might as well say that because the Globe supports the democratic candidate for president of the United States that Cleveland is the Globe's nominee. Common SENSE.

The best way to repair strength and increase the bodily substance is to invigorate the stomach and improve the circulation with Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure. Simultaneously with he disappearance of indigestion it relieves that morbid despondency, and the nervousness which are as much the product of dyspepsia as the weakness of the stomach and loss of vigor and flesh which proceed from it; as a blood purifier it has no equal.

S. Chadwick of Arcadia, Wayne Co, writes: 'I have had severe attacks of asthma for several years. I commenced taking Dr. Thomas' Eclectic Oil. The first dose releved me in one hour. I continued taking it in caspoonful doses for a few days, and have not had an attack of it since, now nearly one year.'

The PRESIDENT then said: Gentlemen, it is customary before moving the adoption of our annual report, for the President to make a few remarks in further explanation of the year's business, and the hopes ation of the year's business, and the hopes your directors entertain in reference to that on which we have just entered. I trust you will find the statements now be fore you clear and satisfactory. As al ready stated, we have paid dividends amounting to 8 per cent, per annum, and added to our rest \$160,000, after amply providing for all bad and doubtful debts. Our rest now amounts to \$600,000 equal to 30 per cent, of our capital. In five. that on which we have just entered I trust you will find the statements now be fore you clear and satisfactory. As al ready stated, we have paid dividends amounting to 8 per cent, per annum, and added to our rest \$160,000, after amply providing for all had and doubtful debts. Our rest now amounts to \$600,000 equal to 30 per cent. of our capital. In tive years it has been increased by \$500,000—a good test of the salutary condition of the bank's business. This is a better result than at one time I anticipated; for during the first half of the year we met with some large losses as well as several smaller ones, for all of which we have provided. The last half has however, been free from losses, and our business having been active and fairly prefixable, enables your directors to show such a good statement to day. The farmers throughout the Dominion have secured an abundant barvest in prime condition, and are now bringing their grain, root group batter, market crops, batter, theese and cattle to market, thus creating an active demand for cur rency. Our circulation has lately gone up rapidly, a certain proof of increasing pros rapidly, a certain proof of increasing persperity and great activity in business. Profits are doubtless not so large as in former years, and I do not anticipate another boom such as then prevailed, yet I believe the worst has been passed, and every change will be for the better. It is too time that severe losses and great depression have been experienced by our merchant and manufacturers the past eighteen months, and some time will yet be required to overcome them. A prudent quired to overcome them. A prudent economy now pervades all classes, our foreign imports have decreased very considerably, and a general reduction of indebtedness is going on. These will soon produce better times and a more active confidence of the c

The future management of the bank will, I doubt not, be characterized by prudence and caution, and the directors to be elected to-day, will I hope, exercise a careful supervision over its affairs. I feel certain they will be ably assisted by the general manager, Mr. Thomas, and all the agents and officers under him. It is mainly to the ability and constant attention of those gentlemen that we are able to-day to place before you such a favorable balance sheet. I hope next year's will be at least as satisfactory. I now be g, gentlemen, to move the adoption of the report. If any of the stockholders wish to ask any questions we shall be very happy to answe them.

After some further discussion the ballot was taken, the scrutineers presenting the following report:

NO. 12,

CLOSING NOV. 7th.

The Biggest List of Rewards Yet Offered.

agents, the proprietor of TRUTH has decided to deal in future directly with the prople; The rest now stands at \$600 000 equiva-lent to 30 per cent, on the capital of the given to agents shall be dis ributed among his subscribers. In other words, he constitutes himself a big club agent on a large scale s nd directly to S. FRANK WILSON, Proprietor as far we see no reason to regret the change.

All the branches of the Bank, including the Montreal office, have been inspected once, and in many instances twice, since we last met you. Bible questions propounded by an eminent divine, without being greatly profited. Hundreds of our subscribers have testified to this during the past year, and many thousands of during the past year, and many thousends of dollars worth of costly rewards have been given away. Nearly every issue of TRUTH contains many acknowledgements of the receipt of such magnificent rewards as pianos, organs, sewing machines, gold and silver watches, silver tea services, etc., down to butter knives, elegantly-bound volumes of poetry, etc., etc.; and you have only to invest one dollar for six months' sub-cription to Truth and answer the Bible questions correctly, and if you do it promp ly when you first see this you are almost sure of one of the First Rewards. If you don't happen to see it on its first appearance, you still have a good opportunity in the Second on Middle Rewards; and, fin lly, there are the Consolation Rewards for the last ones received at Truth office. So you can compete even if you live almost on the other side of the world, for if your letter is postmarked where mailed on or before the closing day of this competition (that is, November 7th), you have a good opportunity of gaining something in these rewards, provided, of ceutise, your answers are correct. Try it how. Nothing whatever is made out of this plan, but fie looks for profit in your future patronage, as he is sure you will be so well pleased with Truth that you wil become a life subscriber. He e are the Bible questions:

1. Is INFANT spoken of in the Bible?

2. Are Boy's referred to in the Bible?

3. Where is Man first made mention of in the Bible?

(One answer to each question will suffice.)

A Successful Magazine. -TRUTH, the well-known literary magazine published at Toronto, is now one of the best known and most widely circulated journals of the kind in Canada, and the proprietor is sparing neither time nor money to give the sparing neither time nor money to give the paper a still wider circulation. No publisher in Canada—nor indeed elsewhere has made as liberal offers as has the proprietor of this will-known magazine and though the expenditure is very large, and the return in comparison small, the result looked for is a wider and permanent popularity. For months past it has been offering a number of very valuable prizes in connection with a series of biblical competitions, which have created no little interest, and, as will be seen by the advertise ment elsewhere he now announces another one, the most extensive and most expensive of the series, the money value of the prizes offered aggregating upwards of \$100,000. Our readers wil do well to read the announcement carefully,—Advt.

Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent, of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures still. Through an oversight on the part of some of the City Newspapers the report has been made that milk will be reduced in price to six cents per quart on Monday next. Such is not the fact. The present price of seven cents per quart will continue. Milk has not been less than seven cents per quart during the month of October for four years. First-class country milk cannot be sold less during the winter months. Milk was formerly sold at seven cents per quart, wine measure, which is equal to 8½ cents per quart imperial measure, now in use, so that consumers are getting more milk for seven cents than formerly.
