VOL. I.

SAINT JOHN, N. B., WEDNESDAY EVENING, JULY 3, 1872.

op. The section of the seam of coal was ar John Armstrong & Co. MANCHESTER HOUSE, 52 Prince William Street. Top Coal. (very good for roof) ... ARE NOW OFFERING THE 13 6 is may be considered a very valuable seam of coal. The quality of the coal is exceedingly It may be described as a bituminous coal, but of dense and strong structure. But 45 yards below the main seam we proved (by sinking a small shaft) another seam of ifect thick, of good workable coal, having the same dip and angle as the main seam. If probable deptn of 150 yards there appears to be a third seam of good coal, about 2 feet This has been partially worked, and proved to be very good, considering it was near the FAIRALL & SMITH CHEAPEST LOT OF HAVE JUST RECEIVED Six Cases AMERICAN FLOOR OIL CLOTH, bassit. The main seam of coal at Springhill will afford suitable fael for smelling the iron-not con-taining an excess of ash, and free from sulphur. The physical characteristics of the coal are, its cubical, clern fracture freedom from "bat" and dirt, often associated in the seam, and a density and streng h of structure which suits either for coking, or, we think, for use raw in the blast Canadian and Scotch IN VARIOUS WIDTHS AND PATTERNS, At Forty-Five Cents per Square Yard. Extracts from Report, in 1869, of the late Mr. Ed. Hartley, F. G. S., of the Canadian Geological Survey. FAIRALL & SMITH. **TWEEDS** may 22 STEAM SHOE FACTORY The samples of coal examined were taken from the main seam of the Springhill coal field. An examination of the external character of this coal shows it to be a bituminous coal of a moderately compact texture, and not inclined to f.ll to bicces, or slack. Four samples were taken for analysis. I. and II. were two averages of the whole box: III was a picked sample of the best (most compact) coal; and IV was a piccimen of the coal showing a shaly texture. The re-sults of proximate analysis in the laboratory were as follows:-For Men's and Boys's Suits,

 THEY HAVE EVER BEFORE SOLD IN THIS CITY. DN & RALSTON DOMINION The analysis shows this coal to belong to the class known as highly bituminous, or fat caking coals, in character very similar to those of the North of England, known as No.th Country or Newcastle Hartley Coal. The high rate of volatile to fixed combustible matter should render this coal, in ermnon with the Newcastle coals which it resembles, an admirable gas coal, while in the amount of sulphur it falls much below the average of Newcastle coals (which contain about nine-tenths'of one per cent, as determined by the Admiralty steam trials); therefore the gas oh tained from it should be very easily purified. The coke of this coal appears in every way adapted for iron smelting. (See Canadian Geological Survey Report, 1870. In forwarding Mr. Hirtley's analysis, Sir W. E. Logan writes, 9th June, 1869: "You will ob-serve that it is superior to any of this continent yer known. It is superior, too, to the average of Newcastle coals, and very nearly equal to the best." OTS & SH STEAM BRUSH FACTORY Also call special attention to their Stock of NOW MANUFACTURING SHAWLS. OKATKA PAINT, OKATKA WHITEWASH, PASTE, LEATHER HORSE, and all descrip tions of PAINT WHITEWASH, and SCRUB BRUSHES. THE SUBSCRIBERS HAVE REMOVED THEIR MANUFACTORY, WAREROOM, &c., AND FACTORY and OFFICE, Union corner Carmarthen Street, Extract from Report of John Rutherford, Esq., M. E., late Inspector of Mines, Nov JOHN MURPHY. ST, JOHN, N. B. june 5 PARASOLSI TO THE PROSPECTUS ' The 13 feet seam dips to the North west at an angle of 25 degrees. It is underlaid at a depth of about 350 feet by one of 11 feet three inches thick (the main seam), the quality of which is also of a high character. South of the crop of this last, crops of three others have been found, the posi-tion of which is conformable to the largest seams. Corner of Union and Carmarthen Streets, Where they would solicit a continuance of the patronage heretofore received by them The Best and Cheapest Goods in the Trade. ROBINSON & RALSTON. feb 6 6m OF THE Certificate from the Engineer of the Steamer " City of St. John," who burnt on that steamer one car load of the Coal, on 21st December, 1871. SPRING HILL MINING COMPANY, (ESTABLISHED 1819.) Marble and Marbleized Mantel 13- Inspection invited. Pieces and Register Grates. The Springhill coal burns with but little intumescence, and does not agglutinate. It allows a free passage to the air, and gives a brilliant fiame with a light smoke. It ignites easily and has but little tendency to soil, and does not crumble into powder when broken. Its clinker is friable. J. ARMSTRONG & CO. INCORPORATED UNDER LAWS OF NOVA SCOTIA, 1870, C. 72. HUTCHINSON,

	The Coal Field which we have carefully examined, and which is the subject of this Report, is situate in the county of Cumberland, in the province of Nova Scotia. It is generally described as the "Springhil' Coal Field, but in reality it is a part of the great Camberland Coal Field. The first or upper seam we found to be a bed of remarkably good coal, presenting a very	une 22 Vaughan's Building, Water Street.	Sr. John, N. After the close of the regular exercises the Bishop and Dr. Cochran made short

not seen each other for years, at a corner table, where they were renewing old friendships, toasting the College, the Professors and the nselves, and infusing, almost un consciously, fresh life into the venerable College. I may mention, in conclusion. that I was somewhat surprised at meeting very few St. John men at Windsor, the more so, as by the system in use there, the holders of nominations, which can easily be obtained by application to the President, pass through the whole course of study without paying nomination fees.

The Diocesan Church Society.

MEETING OF THE GENERAL COMMITTEE.

As is usually the case, a large amount time was consumed last evening in examining the certificates of lay delegates ; and the members of the clergy, whose love for polemics possibly overbalances their respect for technical observances, were loud in their complaints at the irrevocable loss of fleeting moments which might have been ably employed. The first meeting of the Committee is almost always dry and unin-

teresting, and we observed at least one slumbered in a style which might excite
