THE WORLD'S FAIR.

Only a short time remains in which to visit the world's fair. It has been a far greater success financially than had been anticipated in the early summer. So far as the show itself is concerned, all visitors agree in describing it are marvellous; and when the valve yourne and significance are considered, even this term seems inalequate. When one pauses to think that but a few years ago the very site of the city of Chicago was a wilderness, and that to-day there are gothered within her borders the representatives and the products of the skill of all nations of the earth, a conception of the rate at which the world is progressing dawns upon and almost bevilders the mind. There have been many provincial visitors at the fair, and many more will register there before its close. The city of Chicago is in itself a wonder world to the visitor, in its vastness and variety. In a careful study of its people and the climatic effects, nothing is more noticeable then the prevalence of catarrh. It is a speculiarity resulting from the climate, and is noted by the medical authorities. Unfortunately this annoying and debilitating disease is not confined to Chicago. There are numerous cases of catarrh in these lo wer provinces. It is therefore of the greatest importance that a remedy which has proved its ability to cure the most obstinate cases should be brought into general use. This remedy is Hawker's Catarrh Cure, the nost effective in curative power of any before the public to day. As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the esult. Starved nerves, like starved muscles, become strong when the disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present, node of living and labor impress upon the right kind of food is supplied; and a thousand weaknesses and ailments the wear our present mode of living and labor imposes upon the nerves.

SUDDEN Death .- Thomas Myler, native of Halifax, N. S., who was the caretaker of Mr. Pottinger's private car on the Intercolonial Railway, dropped dead at a late hour on Monday night on the Levis ferryboat. He was a married man and 38 years of age. He had crossed over to Quebec, but feeling unwell was returning to Point Levis, when he was suddenly stricken. The body was taken to the morgue, where an inquest will be held at 9 a.m. to-day .- Quebec Chronic
