Volume 51.—No. 14

GLENCOE, ONTARIO, CANADA, THURSDAY, APRIL 6, 1922

READ THE ADS.

This issue contains many bargain offerings. Don't miss them.

Whole No. 2617

TO RENT
Pasture land, 80 acres more or less; north half lot 18, con. 5, Ekfrid. Apply to Effie G. Campbell.

NOTICE TO DITCHERS
I will offer for sale by public auction at John T. Lethbridge's on Friday, April 14th, at 3 o'clock p.m., the job of constructing the Lethbridge tile drain in the township of Mosa. Plans and specifications can be seen at my residence or at time of sale.—F. J. James, Commissioner.

HOUSE FOR SALE
Village of Newbury. First-class repair; eight commodious rooms; basement cellar; cement cistern and cement walks; few rods from post office and depot; quarter-acre, great garden soil, and splendid well. Quick sale, \$900. Apply to Mrs. Abe Haggart, Newbury, Ont.

FOR RENT
Fifty acres of pasture or hay land. The south half of the south half of lot number sixteen in the second range north of the Longwoods Road, Ekfrid township. Apply Miss Harriet Young, Emerson, Manitoba.

TO RENT
Fifty acres of pasture land, being composed of the east half of the south half of lot number ten in the second concession of Mosa. Apply to Elliott & Moss, Solicitors, Glencoe, or John A. Campbell, 3261 Fifth St., Detroit.

TO RENT
Pasture farm, 100 acres; lot 27, con. 7, township of Brooke. Apply Blanche I. Munroe, Newbury, care of Neil McVicar.

NORTH NEWBURY WAREHOUSE
The C. E. Nourse Company have taken over the warehouse and flour and feed business at North Newbury and are prepared to give satisfactory service to the wants of the community in all kinds of flour and feed. The business will be conducted on a strictly cash basis. They are also prepared to buy all kinds of grain, paying the best market prices.
JACK MORAN, Manager.

FARM FOR SALE
Lots 17 and 18, concession A, township of Aldborough, county of Elgin, 120 acres, on the Thames river, three miles from Wardsville. A splendid pasture farm. Good dwelling and barn. Formerly owned by Mr. Sam Haining. Must be sold to wind up an estate. Apply Fred H. Brisco, 161 King St., Chatham, Ont.; phone 397 (Office open evenings.)

BUSINESS BLOCK FOR SALE
Village of Highgate; at present occupied by Abrey Bros. as garage; formerly owned by Mr. Sam Haining. This property must be sold at once to close up the estate. For further particulars apply Fred H. Brisco, Trustee, Chatham.

FOR SALE
Registered oats, O.A.C. 72, first in field crop competition, 1921; O.A.C. 23 seed barley, and building 16 x 25, nearly new.—A. B. McDonald, Glencoe.

FLOUR AND FEED
The C. E. Nourse Company wish to announce that they have purchased the flour and feed and other business connected therewith from Bruce McAlpine, and are prepared to give their best attention to the wants of the community in their line. The business will be conducted on a strictly cash basis. They are also prepared to buy all kinds of grain, paying the best market prices.
J. D. McKELLAR, Manager.

PEARLIE J. GEORGE, L.L.C.M.
(Gold Medalist of London Conservatory of Music)
PIANO INSTRUCTION
Glencoe Studio—Symes Street.
Newbury Studio—Mrs. Peter Galbraith's, Wednesdays.
Phone 109, Glencoe.

INSURANCE
The Great-West Life Assurance Co., sick and accident insurance, and The Ontario Farmers' Weather Insurance Co., Grand Valley.—Mac. M. McAlpine, Agent, Glencoe. Box 41.

ELMA J. KING
Organist and Choir Director of Glencoe Presbyterian Church
INSTRUCTION
Voice Culture and Piano Studio—Lecture room of the church. Class on Saturdays.

CREAM AND EGGS WANTED
Cream received, tested and paid for daily at the Glencoe Butter Factory. Phone 73 if you want our delivery truck to call.

INTERNATIONAL CREAMERY CO.
Alex. McNeil, Local Manager.

GLENCOE LODGE, No. 128,
meets every Tuesday evening at eight o'clock sharp in the lodge room, opposite Royal Bank building, Main street. All brethren of the Order cordially invited to attend.—B. F. Clarke, N.G.; W. A. Currie, Jr., R.S.

Muscular Rheumatism Subdued.
When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

Tanlac is the result of years of study, experimentation and research by some of the world's greatest chemists. Hence its merit.—P. E. Lumley.

DISTRICT AND GENERAL

Edmonton daily papers have gone up to \$8 a year.

Fire almost totally destroyed the Butler woollen mills at Strathroy.

Chicago city council has designated this as Canadian week to celebrate one hundred years of peace and uninterrupted social and business intercourse.

The annual report of the Odd-fellows shows that there are 403 lodges in the province with a membership of 62,625, a gain of 792 members during the past year.

Dutton Advance:—There has been a large flow of sap the past few days, resulting in a reduction in the price of syrup, which is now quoted at \$2 to \$2.50 a gallon. The sap is exceptionally sweet this spring.

The habit of carrying "strike anywhere" matches loose in the pocket results in many serious fires. In taking something out of the pocket a match drops out on the floor of barn or other place, is stepped on and results in a fire.

When a negro bandit entered a store at Homestead, Pa., the proprietor invited him to help himself. The man rifled the cash drawer, but was so intent on watching the storekeeper and his wife that he did not notice that all he was stuffing his pockets with was soap coupons.

An aged man from West Lorne applied at London police station for a night's free lodgings. As is usual with men of the type, he was searched before being allowed to sleep in the building, and he produced a roll of \$2,000 in cash. Under the guardianship of an officer he was registered at a local hotel for a room and bath.

Daylight saving is apparently to be the bone of contention in the present session of Parliament. Fred Kay, Liberal for Mississauga, has given notice of a resolution that in the opinion of the house it is desirable that legislation be introduced during the present session to prohibit the adoption of daylight saving time in any part of Canada.

Pensions paid to veterans of the Fenian Raid of 1866 now number only three, according to the annual report of the Board of Pensions Commissioners. To men who suffered disabilities in the Riel Rebellion of 1885, 80 pensions are still paid and 13 dependents also draw an allowance. Under the Pensions Act of 1901, in connection with the South African War, 450 men who served received pensions during the last fiscal year, and some 25 dependents.

The venture of the United Farmers of New Brunswick into the business of running co-operative stores has not been successful, and a re-organization with a change of policy is now being affected. Owing apparently to an unwarranted ambition for expansion of their activities, the head office of the organization will require about \$90,000 to straighten out its affairs, while over half of the 32 branch stores will have to raise additional capital in order to carry on.

"Quo Vadis"
The mightiest motion picture spectacle of the century, revealing the religious significance of the wonderful drama of "Quo Vadis," adapted from the world famed romance of Henryk Sienkiewicz's novel, tells a most thrilling, sensational and dramatic story.

The various scenes of pagan pomp to Christian simplicity make the picture story a most appealing one. Added to this is a most powerful love story, interwoven throughout—the love of a pagan for a Christian girl.

Among the thrilling scenes is that of Ursus, in the Arena at Rome, twisting a gigantic bull by the horns until its neck is broken. The hero, after killing the animal, releases a beautiful maiden—the Christian girl—who has been bound to the animal's back and begs the Roman audience to grant her life.

SATURDAY, APRIL 8th.

Great Damage by Storm

Damage which will run into millions of dollars, the extent of which it is impossible to estimate, was caused by a two-day sleet storm, which was general over the whole of Western Ontario Thursday and Friday. Dozens of cities, towns and villages were isolated, and the majority of these were in darkness for two days on account of the damage to electrical service, while in some the service has not yet been restored.

The power services, telephone and telegraph companies suffered the heaviest losses. Miles upon miles of wire and hundreds of poles are down throughout this part of the province, and it will require months of work to put the various services on their pre-storm footing.

Many roads throughout the country districts were rendered practically impassable on account of the entanglement of trees and wire.

The fruit orchards were damaged to a considerable extent by breakage, due to the weight of ice. It is said that the buds were not far enough advanced to cause any considerable loss through freezing. In Glencoe and surrounding country the chief damage done was to the hydro and telephone lines. While the hydro lines in Glencoe did not suffer to the extent they did in most towns, the service has only been restored in part. At Alvington, where the storm was accompanied by considerable wind, the hydro lines, just completed, were almost totally wrecked. Thamesville and Watford also suffered severely in this respect.

Between Glencoe and Strathburn nearly one-half of the Bell Telephone poles and wires are down, and similar conditions are reported on the Longwoods Road both east and west of Strathburn. The streets were littered with brush and limbs broken off shade trees, and the work of cleaning this away, which is now going on, will take days to accomplish.

The high tension wires of the hydro electric service were restored by Sunday evening, and it is expected that in Glencoe at least the system will be in full operation again by the end of the week.

Russian Famine Far Worse Than War

War, famine, pestilence are associate evils which have reduced the people of Russia to a condition bordering on despair. The war, horrible as it was, accounted for the loss of two million lives; the after-math of famine and pestilence threatens the existence of more than thirty-three millions of people.

Christian nations, however charitably disposed, will never accomplish the complete relief of so great a number. Millions must die, and many more must suffer pangs infinitely worse than death. Our appeal is for the children, that they who are innocent of any of the responsibility for the present chaotic condition of the country may survive.

Many Canadians have been touched by the events that are transpiring in Russia. They have responded nobly to the appeal for aid. But what of the others, who have not yet heard the moans of the dying?

It is a sad commentary on our boasted civilization that we have corn and grain a-plenty in the bins while 33,000,000 people in Europe are dying for want of something to eat. Is this right?

A generous donation of money will start some of our idle grain in the form of flour, flowing into the empty bins of Central Europe. Send your contributions to Sir George Burn, Treasurer of the Save the Children Fund, Elgin Building, Ottawa, or if you prefer to do so, send it through your church or other local organization or bank. The Transcript Office is also receiving and forwarding subscriptions, which will be acknowledged in these columns.

Oratorical Contest

On Friday afternoon the preliminaries of the first annual oratorical contest of the Glencoe High School were held.

Ten contestants took part, and of these six were to be selected by the judges, to compete in a final contest to be held in the Town Hall on April 12. The judges, Miss Evelyn McLachlan, Miss Fern Graham and C. George, finally selected the following students:—Ella McLean, Catherine Lawrence, Jessie Currie, Gladys Bechill, Marion Campbell and J. D. Gillies. Besides these, Harry McLachlan, who was unable to compete on Friday, will also speak.

Just Among Ourselves

The first of April had it on most of us more than once when from force of habit we turned the switch for hydro juice.

We cannot recall how March came in this year, but we'll never forget how it went out.

Some say the trees were weeping over the sins of the people.

There are some things Glencoe needs worse than a—well, we mustn't say what; but take a look at that Main street sidewalk for a short way south of the track after a heavy shower, for instance.

Now that we have gotten the business section out of the mud, the problem of combating the dust nuisance confronts us more than ever.

The sleet storm has suggested a law to compel the topping of all shade trees.

Glencoe is about equally divided as to whether to raise chickens or cultivate flower beds. A bad division. Why not all agree to alternate say every five years with chickens and flowers?

Someone makes quite an innocent and meaningless remark about somebody else. Then the mean, meddlesome cuss of the village comes along and twists things about and rubs it in till the best of friends are sworn enemies. And the smaller the town, the greater the cussedness.

We have no quarrel with the U. F. O., but we would like to know what business they have to cell honey. Isn't that a job for the bees?

They say there is good fishing in the Thames. Will the sure thing promoters, the embezzlers and the gold brick artists please take notice and give the land suckers a rest?

Glencoe has its faults, but it has not yet gone in for amateur dramatics.

In the hurry to get to press last week the printer's d—go the types mixed a bit, and the preparations for Easter music and the horrors of housecleaning were made to appear synonymous. Apologies to the choirs.

Yes, there are compensations in life. Just as the miners were going out on strike, nature was preparing a lot of timber for fuel.

Wheat Not Damaged

At the office of District Agricultural Representative R. A. Finn it is stated that the sleetstorm has not done any damage to the wheat so far as can be learned. The heaviest damage in the district appears to have been done to fruit trees. Many of these have been so badly broken that they are almost totally destroyed. This damage will run into thousands of dollars. The greatest loss has occurred, it is stated, in orchards that were not pruned during the winter.

Pre-war conditions have arrived along Main street. You can get a good-sized crowd to block the sidewalk for every dog fight these days. Two teaspoonful of Tanlac in a little water taken three times a day just before meals will make you eat better, feel better, sleep better and work better.—P. E. Lumley.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto.

The Hatching of Turkeys.

The turkey hen begins seeking a location for her nest some time before she is ready to lay, and if nests are provided for her in suitable places about the farm buildings and yards she will usually accept them.

I secure good-sized dry goods boxes and large barrels, such as salt barrels, and place them along the fence and in the corners of the turkey yards. These are covered partially with brush or cornstalks to hide them and make them look attractive. A deep nest of hay or straw is made inside and a nest egg is provided. I also make nests inside, in each corner of the turkey sheds, leaning up boards to hide them. It is not unusual to have each of the four corners occupied by a setting turkey at the same time.

Eggs should be gathered every day and placed in a cool, well aired room, (never in a cellar), and turned occasionally if kept very long. Eggs can be kept three weeks and hatch well. As I sell for breeding stock and want early hatching birds, I use only the first laying of eggs from each turkey hen. There are always more eggs than the turkeys can cover and some of them are placed under good reliable chicken hens but when they hatch they are given to the turkey hen to brood as she is the natural and best mother.

I manage to have them all hatch at about the same time (within two weeks if possible) as they develop better and are more easily cared for if they are all about the same age. However, if one has a large range and time to give special attention to those of different ages, a larger flock can be raised from the same number of birds. If the first hens laying are

not allowed to set they will usually lay again in a very short time. The first eggs can be placed under chicken hens and before they are ready to hatch there are likely to be other turkey hens wanting to set. After "trying these out" on some nest eggs for a few days, to prove their worthiness, give them the eggs incubated by the chicken's pen. Even though she has been setting for a few days, she is ready to welcome the little poult when they hatch.

By hatching all remaining eggs in the same way, giving the poult to the last hens setting, one can usually manage to have turkey mothers for all. If each mother is given a large roomy house to shelter her brood she can nicely cover and care for sixteen to eighteen little ones.

I usually place about fifteen eggs under a turkey hen and nine under a chicken hen, depending, of course, on size of eggs and hens, but it is best not to have the nest too crowded at hatching time.

Incubators are sometimes successfully used in hatching turkey eggs but they require different methods of handling from chicken's eggs. As a rule the turkey hen will take proper care of herself while setting but occasionally there is one, especially among the pullets, that will take the matter too seriously, not being willing to leave the nest for food and exercise. These should be taken off and shut out from the nest twice a week and for at least twenty minutes each time. They will eat quantities of grass, dandelions, etc., but do not seem to require much food. Give soft food or small grain (never corn) and see that they have access to fresh water.

should be followed in crate feeding. Medium-sized birds belonging to the general purpose breeds give the best results in the crate. Leghorns make good broilers, but poor roasters, and are too nervous for crate feeding. Experiments have shown that Banded Plymouth Rocks do infinitely better. Birds of the general purpose breeds do best if they are put into the crate weighing less than five pounds or before they are five months old. Strong constitution is essential. A lively bird generally answers this requirement. Scanty feeding is advisable at first. Cleanliness is a necessity, so too is milk, and all feed should be ground, no whole grain being given. The appetite of the birds should be considered. Fine ground oats, corn and buckwheat are all good. Shorts and middlings are all right as a small part of the ration. Bran is too laxative. Beef tallow is sometimes fed during the last four or five days, but its virtue is doubtful. Cooked foods as a rule should not be fed.

Variations of Live Stock Market.

The Live Stock Branch at Ottawa advises of an unusual rush of calves to the markets in Canada as detailed in the weekly reports. The unavoidable result has been a decline in prices. The Toronto market report for March 9 notes a dollar drop on the first day of the week, and the Montreal report in recording heavy offerings says, "It is yet early in the calf season, and if drovers and farmers persist in marketing quantities of common, unfinished veal, prices are likely to sink to a very low level." Montreal is a veal-canning city but a better quality is demanded. From January 1 to March 2 there was received at Toronto 8,623 calves against 5,443 in the same period last year and at Montreal 6,627 against 5,475. Last year the prices on March 9 were in Toronto \$16 and in Montreal \$13. This year on the same date they were \$14 and \$9 respectively. It is worthy to note that hogs are invariably higher in Montreal than in Toronto, the difference usually ranging from 50c to \$1.25. Cattle, calves and sheep all range higher in Toronto. On March 9 cattle at Toronto were quoted at \$9 and at Montreal at \$8. Sheep were at \$14.50 and \$11 respectively. Cattle were down compared with the same date last year, but sheep were slightly higher in Toronto but down in Montreal.

It is often better to get acquainted with the man whom you do not understand than it is to hit him. He is a wise dairyman who sets a trap to catch the first well-informed cow-tester that comes his way.

Fertilizing Strawberries.

To get real results on a small-fruit crop, fertilizing must not be delayed too long. Nitrate of soda in mild solution may be applied with profit to strawberries as late as when they are blooming; but I wish to suggest a much simpler treatment, which I have found to give wonderfully fine results.

Since top-growth on strawberries is not desirable, fertilizers rich in ammonia should not be used. What the strawberry wants chiefly, is potash. The best and cheapest form of potash that we have is wood-ashes. This natural fertilizer, if applied properly and at the right time, is truly a wonder-worker. Those who care to have the foliage of their plants a rich dark green may add to the ashes a little plain soot. In applying the ashes I use the following plan:

In late March or early April, when the last of the winter rains and snows are beginning to leech into the slowly warming earth, I scatter over the mulched rows of berries wood-ashes that have been sifted to remove impurities and bulky matter. I am careful not to let the ashes fall in handfuls over the crowns of plants. But in avoiding smothering of the crowns, I am not miserly in the application. On a garden patch 15x40 feet I have used with astonishing results four bushels of wood-ashes at a time.

About a month later, when it is time to get the mulch off, I lift it carefully aside; then, as soon as the soil is workable, I rake in a second but lighter application of ashes, trying without disturbing the roots of the plants, to get it in as close to them as possible. Then the mulch is returned to the rows and about the plants, but, of course, not over them.

This fertilizing in the early spring is the very best insurance I have been able to discover for a phenomenal yield of strawberries in the home garden.

Examine Your Chimney.

No other fire hazard touches the home and the family more closely than the defective chimney. A great many old chimneys and too many new ones have a thickness of only one brick and are easily cracked by shrinking or settling; and chimneys that are supported on wood construction, brackets or an insufficient masonry foundation are very likely to settle. A space may be too small to be noticed and yet be big enough to let a spark through. It is a good plan to test a chimney by building a smudge fire in the bottom of the flue and, when the smoke is drawing up freely, to close the flue at the top. Smoke that escapes through the chimney walls will indicate openings that need attention.

The Joyous Season.

While Easter bells are ringing And Easter anthems singing And Easter lilies blooming sweet and fair, All Nature now awaking, The chill and sloth forsaking For Spring and Life and Beauty everywhere. Let me tell you what I'm thinking, While the wine of spring I'm drinking: What matter though the Easter Time departs; What though Year and Life grow older, And the later winds blow colder, If we hold the Easter Season in our hearts!

If for no other reason, a dairyman should feed his cows alfalfa and other legume hay to provide the animals with plenty of lime for bone making. Calves from cows so fed are strong. Otherwise cows are emaciated because they have been obliged to use bone materials from their own bodies to rear their calves.

Agricultural Statistics.

The Dominion Statistician, Ottawa, has sent out a special appeal to farmers to make returns to him of the extent of the areas sown to the principal field crops and the number of farm live stock by means of card-board schedules which are being distributed, or will be supplied on application. It is explained that these statistics are required only for official compilation to make national returns, will be regarded as confidential, and will in no way be used for purposes of taxation. The reasons for the returns are: That reliable and accurate total statistics may be at the disposal of farmers, who will thus be enabled to regulate their crops and live stock and also to quote their crop prospects when applying for credits. Not only do governments require accurate knowledge of the country's general resources in order to hold the balance fairly between all classes; but Canada being the third largest wheat growing and second largest wheat exporting country in the world, needs to be in a position to make accurate reports of production in return for similar reports from other countries. Other reasons are that those who market the country's productions may be informed of exact conditions so as to be able to sell to the best advantage for the producers; that those seeking profitable openings for enterprise may know local conditions; and to sum up, so that agricultural statistics may be furnished on the highest trustworthy authority and the mischief caused by inaccurate statements issued from interested motives may be checked.

"Not Worth His Salt."

With salt numbered among the cheapest articles of food, to say that a man is "not worth his salt" sounds like a very radical expression of worthlessness.

It should be remembered, however, that there was a time when salt was a highly-prized commodity. An examination of the word "salary" will prove in what esteem salt was held. For the Latin salarium was the allowance made to the Roman soldier in order that he might provide himself with salt.

Moreover, the ceremonial importance of salt is shown in the salt-stand which appeared on the Saxon table. Its position marked the upper and lower board, separating the lord of the house and those who shared his salt as honored guests from those who earned their salt.

Safety Lunches.

When animals like cows, sheep, or deer go through the performance of "chewing the cud" they are carrying out a function which their ancestors discovered was a means of aiding them to escape from their enemies.

These animals of long ago were at times in danger of attack, so they got into the habit of eating as much grass and hay as they could in a short time, and then retiring to a place of safety.

The grass was stored in a special chamber, and once got out of harm's way, the animals proceeded to re-chew the food and swallow it again.

Greatest Waves.

The greatest waves known are said to be those of the Cape of Good Hope, where under the influence of a north-west gale they will sometimes reach a height of 40 feet.

Life is too serious to take it too seriously.

Bind the ends of your quilts with a strip of cloth. These are easier to wash than the quilts. A little lace on the ends of the strips will make them more attractive.

Recipes for Easter Cakes

Easter would not be Easter without its dainty and delicious Easter cake and any of the following recipes will make one fit to charm the palate of the most exacting.

Easter Cake.
Put one-half cup of cocoa and one cup of sugar into a bowl and add one-half cup of water. Beat the yolks of two eggs, add these to the cocoa, with one teaspoon of baking-powder sifted with one-half cup of flour. Season with vanilla, fold in the stiffly beaten whites of the eggs. Line two jelly tins with paper, pour in the mixture and bake twenty minutes. Dampen a cloth in cold water and lay over kitchen table, set cake tins on this three minutes before removing cake. Dust top of cake very liberally with confectioner's sugar and lay second cake on it. Frost top, sprinkle liberally with coconut and decorate with small colored candies put on in the shape of narcissus blossoms or an Easter bell.

Snow Cake.
Beat the whites of five eggs until dry, then beat in three-fourths cup of granulated sugar. Sift together one-fourth teaspoon soda, one-half teaspoon baking-powder, and one-half cup flour. Add any fruit seasoning or vanilla, but do not beat after sugar is beaten into egg. Pour half the mixture in gem pans and over the top lay very thin shreds of citron and an Easter bell.

Lily Layer Cake.
Cream together three-fourths cup of shortening and one cup sugar. Beat the yolks and whites of two eggs separately and add to the sugar, stir in one-fourth cup milk and one and one-half cups flour sifted with one round-teaspoon of baking-powder. Line two jelly tins with paper, put in the cake dough and bake. Frost with white icing.

Fruit Squares.
Cream together one-half cup shortening and one cup of sugar. Add two beaten eggs and four teaspoons of milk. Put two tablespoons of preserved cherries, two of chopped candied peel and two of chopped figs through meat grinder. Stir these into the cake with sufficient flour to make a stiff batter, sifted with two teaspoons baking-powder. Spread on floured board and pat down until about three-fourths inch in thickness. Cut in squares, bake in moderate oven and frost with the following: One cup of brown sugar put in saucepan and cooked until melted, adding a little sweet milk to prevent burning when first put over fire. Cook until it spins a thread. Beat the white of an egg into the mixture, and spread on the baked squares.

Dicky's Comfort.
When Easter Day came for the second time in Fluff's life he seemed as much excited about it as a fuzzy yellow toy chicken can be. He remembered last Easter Day, when he had stood as Dicky's place on the breakfast table. Would there be another chicken this time; he wondered. He dreaded the coming of a new pet—a Fluff with none of his fuzz worn off, looking all neat and spick and span.

If Fluff had known what was coming, he would have flapped right off the nursery mantelpiece, to the floor. But he did not know, and so he stood in his place and waited for Dicky to take him down for their morning game together.

Presently, while Fluff waited on the mantelpiece and Dicky sat on the floor and gazed at his Easter cards, Uncle Richard came striding in with a box under his arm.

Uncle Richard had not been long home from overseas, and he still wore his uniform. Yet in spite of his buttons and his straps he sat down, "clickety-click," on the floor beside Dicky.

He held out a box. "There, old man," he said. "That's your Easter gift, all the way from Switzerland!" Dicky grasped the box and tore off the wrappings while Fluff stared from his perch on the mantelpiece. The box pulled off the lid. "Why, it's a peacock!" he cried.

Thin slices of candied cherry. Over these pour the remainder of the mixture. Fast top with pulverized sugar and bake.

Cream together three-fourths cup of shortening and one cup sugar. Beat the yolks and whites of two eggs separately and add to the sugar, stir in one-fourth cup milk and one and one-half cups flour sifted with one round-teaspoon of baking-powder. Line two jelly tins with paper, put in the cake dough and bake. Frost with white icing.

Cream together one-half cup shortening and one cup of sugar. Add two beaten eggs and four teaspoons of milk. Put two tablespoons of preserved cherries, two of chopped candied peel and two of chopped figs through meat grinder. Stir these into the cake with sufficient flour to make a stiff batter, sifted with two teaspoons baking-powder. Spread on floured board and pat down until about three-fourths inch in thickness. Cut in squares, bake in moderate oven and frost with the following: One cup of brown sugar put in saucepan and cooked until melted, adding a little sweet milk to prevent burning when first put over fire. Cook until it spins a thread. Beat the white of an egg into the mixture, and spread on the baked squares.

When Uncle Richard glanced at the clock. "Who's going to walk to church with me?" he asked. Dicky jumped up and put his new pet carefully on one end of the mantelpiece. "I'll look at you again when I come back from Aunt Mary's this afternoon," he said.

All that long day the toy peacock stared proudly at Fluff, and Fluff blinked timidly at the peacock. At last when evening came a tired little boy dragged himself into the nursery.

"I did want to look at you some more," Dicky said, "but I'm so sleepy!" The words ended in a long yawn.

Five minutes later Dicky was in bed. "Never mind," his mother whispered; "you'll wake bright and early and play with your beautiful peacock."

On the high mantelpiece the peacock smiled proudly at Fluff, and Fluff looked meekly and admiringly at the peacock.

Then they heard the dreamy voice again. "All right," it said, "I'll play with the peacock to-morrow, but please hand me my Fluff chicken now!"

Then Fluff smiled proudly at the peacock; he could not help it. And the next minute he was in the bed beside his master—YOUTH'S COMPANION.

The Easter Lily.
The lily rests for many a month Within the bulb contombed In dust and darkness, where it once So radiantly bloomed, Until upon its sepulchre God's shining finger lies— His sunshine, reaching through the gloom And bidding it arise.

EASTER MESSAGES IN FAIRYLAND.

Down under the brown earth, in gardens where the cold never penetrates, live the fairies. Yes, there they live and are happy as the days are long. Yesterday, as they all lay curled up in the hearts of the flowers, a shrill whistle sounded and, like so many jack-in-the-boxes, out popped heads from every flower.

No wonder! Right on the heels of that whistle skipped the fairy postman, the dearest sort of a little fellow, all dressed in brown, with shimmering blue wings. Over his shoulder hung a huge bell like a flower, just overflowing with dainty pink, blue and green letters. Most delightful letters, girls and boys, written with dew on flower petals and cunningly sealed with honey. The next time you see a crumpled flower leaf you'll know it's a fairy letter and perhaps—oh, a very perhaps!—you may read it.

The postman waited till the fairies had settled down cozily to read their mail, then the little rascal blew such a sharp blast on his silver whistle that the whole company nearly tumbled from their flowers. "Listen!" cried the mischievous sprite when they had in a measure recovered, "there is a great, big, stiff letter lying against the post office 'cause it's too big to go inside. I don't know whom it's for and I don't know whom it's from, but who will help me carry it to the queen?"

"!! !! !!!" cried all the fairies together. Mercies! What curious creatures these fairies are! "Come on, then!" cried the postman. And, half skipping and half flying, the whole company trooped after him. When they reached the post office—a giant jack-in-the-pulpit—there stood the monster letter. Truly an enormous letter, just about the size you or I might write. But think how tiny fairies are!

"Come," laughed the postman, "let's carry it to the queen!" With a great fluttering of wings the little gentlemen fairies seized the edges of the letter, first inviting some of the little lady fairies to ride. Then away they flew gaily to the great fragrant rose, where the queen lay napping. But the fluttering of wings awakened her, and when she saw the giant letter she was as curious as the rest.

"Open it! Open it!" she cried, rasy with excitement. And an obnoxious young woodpecker, who had heard the queen's request, flew down and slit it open with his long bill. Then with great difficulty the letter was dragged from the envelope and two fairy guards stationed upon the edges to keep it from blowing away.

"Read it! Read it!" cried the whole company, hopping up and down with excitement. The court scribe stepped forward and peered knowingly at the writing. "Ahem," began the scribe in some embarrassment, "er—really, your majesty, I can make nothing of it! And, really, boys and girls, I don't see how he could, for this writing was so fearfully large! Why, one letter alone was as big as a fairy!"

"The wise men! How about the wise men?" called one of the court ladies, and a dozen ran off to fetch them straightaway or some way. The wise men were studying the skies through a monster telescope for signs of fairies on Mars and were not pleased at the interruption, so they came grumbling and growling, and one not wishing to lose any time brought the telescope along, pausing every few minutes to squint through it at the sky. The queen was provoked by their slowness in obeying her commands.

"Here!" she cried imperiously to the old fellow logging behind, "read this letter at once or you shall be stung by the fiercest bumble-bee in the kingdom!" This so startled the old wise man that the telescope turned a complete somersault. He caught it nervously and without noticing that it was upside down pointed it tremblingly at the huge letter. Then to the amazement of every one he read in a deep though shaky voice:

"The Easter Bunny wishes all of the fairies a very happy Easter, and has left some surprises in the secret tree hollow known to the queen!" "Oh, oh!" cried the fairies, "isn't it lovely?" "Let's go for the surprises!" laughed the queen, and gave the old wise man a little hug—she was so pleased. And he, the foxey old dear, pretended that he knew all along that squinting through the wrong end of a telescope was the proper way to read a giant letter, and he explained to the other wise men that if looking through one end made objects large, looking through the other end would make them small.

Well, well! I don't know about that!

Easter.
Thou wilt not leave us in the dust, Thou madest man, he knows not why; He thinks he was not made to die, And Thou hast made him; Thou art just. —Tennyson.

Says Sam: The fellow who makes good at farming has got to keep his mind and his body moving at the same time, and in the same direction.

Poultry

Colony houses are so useful that they are worthy of a trial on more farms. I find an eight-by-ten house to be ideal for a stove brooder which protects from two to three hundred chicks. The houses I have used have been ten feet wide and eight feet deep but the new ones will be eight feet wide and ten feet deep. This additional depth makes it possible to put the brooder quite a distance back from the window. When colony houses of that depth are used for brooding quarters during the summer, it is best to have an opening in the back for ventilation.

When colony houses are used for brooding there is much less risk than when the brooders are placed in larger buildings. Colony houses can be moved if new soil is needed for the growing stock. They can be placed near the farm home early in the spring when the brooders need attention. Later they can be hauled into the fields or orchards where the growing poultry will have fine range conditions. Portable roosting sections of two-by-two pieces can be made to fit into each other as soon as the chicks are weaned and ready to roost.

Colony houses are easy to move when built on skids. These skids can be made of eight-by-two planks. Nail two planks together and bevel the edges. That makes a good skid for one side of the house. Then make the other and use the two skids connected by two-by-fours as the foundation for the floor boards.

The best colony houses have a glass window in front and a smaller opening above the window for ventilation. When the curtain is down on rainy days the window furnishes enough light for the chicks.

Fitting Poultry for Sale.

No poultry intended for the table should be marketed without being fished. The easiest way to do this is by crate feeding. Cockerels especially should be crate fed before marketing. Pullets and hens are also improved by eating by the same process. Two weeks crating will do for them but another week or two of such dieting will benefit cockerels. Before putting the birds in the crate, dry sulphur or some kind of lice powder should be thoroughly sifted into the feathers, and repeated once or twice during the feeding, to prevent or control lice. The Dominion Poultry Husbandman in his Bulletin No. 88 "Preparing Poultry Produce for Market," obtainable at the Publications Branch of the Department of Agriculture, Ottawa, describes minutely the methods that

It is often better to get acquainted with the man whom you do not understand than it is to hit him. He is a wise dairyman who sets a trap to catch the first well-informed cow-tester that comes his way.

PROGRESS IN WESTERN CANADA

A total of 1,057 cars of grain were inspected at Calgary during the month of February, according to the official returns of the Government Grain Inspector. These consisted of 712 cars of wheat, 259 cars of oats, 80 cars of barley and 6 cars of rye.

Contract for the development of the Pakowski Bird Reserve, consisting of approximately 1,900 acres, located in Southern Alberta, near the United States boundary, has been completed between the Canadian Government and P. Chester Thompson, managing director of the Thompson Oil Syndicate. The development will be for oil and gas, and active work, it is stated, will be commenced by June first this year.

Diamond drilling at the White Lake coal mine near Pentticon, B.C., has revealed a six-foot seam at 250 feet and a three-foot seam at 400 feet, with intermediary series of lesser dimensions. An analysis of the coal runs 75% mixed carbon; it is low in sulphur and moisture, and is not badly crushed. The property is believed to be a valuable one and the promoters hope to induce the government to put down a 2,000-foot drill.

Recent investigations have disclosed the presence of many minerals in close proximity to Vancouver. The mountains on the north side of the city have been found to be rich in molybdenite, lead, iron and copper. Capelan, Lepur and Superior show fine mineral outcroppings.

The annual value of goat products in British Columbia exceeds that of sheep, and goat raising is now regarded as an important industry of the province. The milk yield during the past year increased forty per cent, over 1929, and still the supply is inadequate to meet the steady demand for this product.

From the first to the fourth of July next will be celebrated by Vancouver as a Regatta Festival, to which the people from the States of California, Oregon and Washington, British Columbia's rivals in the production of gorgeous blooms, will be invited to be the special guests of the city.

Among the minerals found in the Wapawaka Lake district by the exploration party sent into the far northern part of the province of Saskatchewan by the provincial government are ochres, unbeset, plain clays, bog iron ore, carbonaceous sandstones, shales, fire clay, glass sands and coal. Commenting upon the ochres and unbesets found in the mineral waters of the lake, the ceramic engineer of the University of Saskatchewan and geologist of the party, is reported to say that the samples have proven very satisfactory, particularly the ochres.

When Elephants Race.

Despite its great bulk and lumbering gait, the elephant has been known to exceed fifteen miles an hour and to have kept up a rate of ten miles an hour for a long run.

It is said that an elephant does not reach proper maturity until it is forty years old, and that it may live for over a century. Darwin calculated that after a period of seven hundred and fifty years, if breeding were not interfered with, there would be nineteen million elephants alive, descended from a single pair.

The tusks, which are the weapons of the males in their furious combats, are used by both sexes in everyday life for digging up roots for food.

Good Advice.

Colds are contagious; avoid them like measles. The best place for your cold is in bed.

Regular meal hours spell healthy children. Invest 10 cents in a pair of shoe trees and save dollars in prolonged life of your footwear.

Gran'ma says: "Don't judge grouchy folk too harshly. Probably it isn't so much disposition as dyspepsia."

Beware serving raisins and nuts as delicacies for the end of a heavy meal; both are high in food value. The care of the child is an index of civilization, and infant mortality is the most sensitive sign we possess of social welfare.

Shift Your Lymph.

"Shift Your Lymph," urges a London physician and so gives a new catch phrase to health seekers. Lymph derived from the blood permeates every part of our bodies and acts both as nourishment to the organs and as a flush for the waste products. It is not controlled by the action of the heart and consequently is easily retarded or hastened in its flow. For the pressure of an active muscle may urge it on, or the constriction to a tight belt or collar may hold it back. "Shift your lymph" is therefore the latest way of saying, "Get out and get some exercise."

The Origin of Soap.

Soap is first mentioned by Pliny, who states that it was prepared from goat's tallow and beech-tree ashes, and was employed for giving brilliance to the hair.

Grain harvests may be a complete failure one year and be compensated for the next year, but the destruction of a forest area by fire cannot be made good in half a century. Hence no efforts ought to be spared to keep the fire out of the forest.

A GOOD MEDICINE FOR THE SPRINGTIME

Do Not Use Harsh Purgatives—A Tonic is All You Need.

Not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite feeble, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives grip through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood and build up the nerves. Dr. Williams' Pink Pills do this speedily, safely and surely. Every dose of this medicine helps to enrich the blood, which clears the skin, strengthens the appetite, and makes tired, depressed men, women and children bright, active and strong. Miss S. L. McEachron, Nain P.O., N.B., says: "I have been in the habit of taking Dr. Williams' Pink Pills in the spring and they keep me in the best of health. I think it is entirely due to the use of these pills that I always have such good health."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Every man is a fool at least ten minutes a day. Don't exceed the limit.

Minard's Liniment prevents Spanish Flu

Surnames and Their Origin

LIPPINCOTT
Racial Origin—Anglo-Saxon.
Source—A locality.

Lippincott is a family name that is peculiar in that it has many more past than present forms.

It is not mere surmise that it came from the name of a place in Devonshire. The old records prove it to be derived from that place, which is now called Luffincott.

To begin at the beginning, "Leaf" was a given name among the Anglo-Saxons. It meant "beloved," and came in fact the same word root as our modern word "love" and its German equivalent "lieb." The following variations of the name, some of which suggest more strongly the modern words, were in common use: "Leaf," "Lefa," "Lief," "Lib," "Lip," "Lob," "Lub" and "Luf."

Though it disappeared later, the first Teutonic invaders of England had tribal systems and tribal names. The latter were formed by the addition of "ing" or "inga" to the given name of the chief. Thus the followers of "Leaf" were the "Leafings." This period of invasion and colonization, the period when the tribal names were in more general use than later, was the period in which the Teutonic settlers gave their names to the places they occupied. Thus "Leafingcote" became a place name.

The old documents show that at various periods the name of this same place, from which the family name has come, was spelled in no less than the following number of ways: "Log," "lyncote," "Loffyncote," "Logyabetot," "Lighncot," "Loffyncote," "Loughwyn."

Good Advice.

Colds are contagious; avoid them like measles. The best place for your cold is in bed.

Regular meal hours spell healthy children. Invest 10 cents in a pair of shoe trees and save dollars in prolonged life of your footwear.

Grain harvests may be a complete failure one year and be compensated for the next year, but the destruction of a forest area by fire cannot be made good in half a century. Hence no efforts ought to be spared to keep the fire out of the forest.

BITS OF HUMOR FROM HERE & THERE

Did He Take It as a Compliment?

Reggie Liteweight—"Can you truly tell me that you've never loved before?"

Helen—"Truly, Reggie, I can. I've often admired men for their strength, good looks, courage, or intellectuality, or something like that; but for you, Reggie, dearest, it's all love—nothing else."

A Canny Answer.

While making a visit to town a Scotchman was knocked down in the street by a motor.

"Are you hurt, my friend?" kindly asked a gentleman who was first among the rescuers, as he helped the stranger to his feet, and brushed the mud and dust from his clothes.

"Well," came the cautious reply, "it ain't done me no good."

Another Matter.

A minister, on the occasion of a marriage, was at a loss in trying to discover the bridegroom among the company of young men present.

Fixing on a young man with a large flower in his buttonhole, he asked him, quietly: "Are you the happy man?"

"That remains to be seen," was the solemn answer.

"But are you the man who is to be married?"

"Oh, that's another matter."

Forcing Baby's Education.

Yells from the nursery brought mother, who found the baby gleefully pulling small Billy's curls.

"Never mind, darling," she comforted. "Baby doesn't know how it hurts."

Half an hour later wild shrieks from

the baby made her run again to the nursery.

"Why, Billy," she cried, "what is the matter with baby?"

"Nothing, muzzer," said Billy calmly; "only now he knows."

The Image.

The children were suffering their periodical written examination, and all the morning their pens spluttered and scratched.

"Bring me your papers when you have finished," said the teacher.

Little Mary came first and handed in her work with a bright smile.

And teacher smiled, too, when she read: "An image is an idle maid with hands!"

His Better Half.

As Tompkins was on his way home after nightfall he collided with Jenkins, who was running as fast as his bulks would allow him.

"Why this hurry, Jenkins?" he inquired.

"I'm going—for—the—police," said Jenkins, between pants. "We've got a burglar in our house."

"But, surely, you haven't left your wife alone?"

"Oh, no! She's holding the burglar!"

SPRING WEATHER HARD ON BABY

The Canadian spring weather—one day mild and bright; the next raw and blustering, is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired.

He is confined to the house which is so often overheated and badly ventilated. He catches cold; his little stomach and bowels become disordered and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or banishing colds, simple fevers, colic or any other of the many minor ailments of childhood. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Have an Ordered Brain.
An eminent gentleman, who in addition to his regular business engagements was also distinguished as an essayist and a speaker, when asked the secret of his accomplishing so much work gave an interesting leaf out of his early experience. He said that as a lad he was very careless about the order of his room and in his belongings generally. But when he began to study, his teacher observing the habit into which he was falling, said to him: "If you want facts and ideas arranged in your head so as to find them, put your hat, shoes, and books in some sort of order around you." Thus early he learned that orderly habits cultivate orderly brains. And to that one thing he attributed much of his success.

Fairy Orchid.

In Java there is an orchid, the grammatophyllum, all the flowers of which open at once, as if by the stroke of a fairy wand, and they all wither together.

Every man throws a rock now and then that he would like to have back in his hand.

It is claimed that workers in the radium mines of Colorado enjoy extraordinary health, thanks to drinking water charged with radium. The workers, it is said, are immune to influenza and laugh at rheumatism, gout and neuritis.

MISS DESAUTELS IS LIKE A NEW WOMAN

POPULAR YOUNG WOMAN SAYS TANLAC WAS A WONDERFUL BLESSING TO HER.

"Tanlac has been a wonderful blessing to me and I will praise it the long, long day I live," said Miss Aline Desautels, St. Laurent, Que.

"My only regret about Tanlac is that I didn't learn about it sooner, as I know I would have been saved many hours of misery and suffering. This grand medicine has brought me the wonderful blessing of health and I feel that I am simply doing my duty in helping to let people know that no matter how much they may suffer from stomach trouble, there is hope for them if they take Tanlac."

"I am no more like the same person now that I was before I took this grand medicine than day is like night."

Tanlac is sold by all good druggists. —Adv.

Bank of England's "Great Balance."

The "great balance" stands in the bullion room of the Bank of England. It is a machine that was constructed, primarily, for testing light gold coins.

Standing approximately seven feet high and weighing nearly two tons, this wonderful piece of mechanism can weigh a piece of thistle-down or a 400 pound gold bar with equal accuracy.

Before it can be used it must always be carefully dusted, for otherwise the dust that has settled upon it, even in the course of a few minutes, would be invisible to the naked eye, would cause it to register inaccurately. So responsive is the machinery that a postage stamp placed on one of the two weighing-ports moves the index six inches.

When the new English currency notes were issued the grand balance was kept busy virtually day and night weighing the gold coinage that was called in and replaced by notes. It has now been found that the total loss of gold, owing to the abrasion of the coins as they passed from hand to hand in the course of circulation, amounts to nearly \$5,000,000.

That, however, is not quite so alarming as it sounds, for the loss is spread over a period of twenty-five years. Twenty-five years is reckoned in England to be the legal "life" of a sovereign at its full face weight.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificate being marked "Rupture." Why? Because the unfortunate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call it? At best, the truss is only a makeshift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—oxygen.

But science has found a way, and every truss sufferer in the land is invited to make a test right in the privacy of their own home. The PLAPAO method is unquestionably the most scientific, logical and successful self-treatment for ruptures the world has ever known.

The PLAPAO PAD when adhering closely to the body cannot possibly slip or shift out of place, therefore cannot chafe or pinch. Soft as velvet—easy to apply—inexpensive. To be used whilst you work and whilst you sleep. No straps, buckles or springs attached.

Learn how to close the hernial opening as nature intended so the rupture CAN'T come down. Send your name and ten cents, coin or stamps, to-day, to PLAPAO CO., 765 Stuart Bldg., St. Louis, Mo., for FREE trial Plapao and the information necessary.

To the Victors Belong the Slides.

During the Allied occupation of Germany, an amusing encounter took place between a British soldier and a German baroness.

The baroness, writes Miss Violet R. Markham in Watching on the Rhine, told a British officer that one of his men insulted her. Indeed, she declared, she had never been so insulted in her life. The officer at once began inquiries and finally learned that the lady had found two British soldiers whistling and sliding down the banisters of her back stairs. She had told them sharply that whistling and sliding on the banisters were forbidden. Whereupon Thomas Atkins, genial and undefeated, had turned to her and remarked pleasantly, "Aye, missus, but yer should have won the war, and then yer could have come and slid down our back stairs and whistled."

A Tree for a Tree.

When a forest administrator says that he hopes to see the time when a tree will be planted for every tree cut down on non-agricultural land he does not mean this literally. What he means is that when an acre of forest land is cut over that acre should be planted or soded at once to bring on another crop. If this is done by planting it will mean that five or six times as many trees will be planted as are cut down. Because to induce high-growth forest trees are planted much closer together than the mature trees stand when cut down. The trees that do not reach maturity are either thinned out and used for rails or fuel, or die off because the trees that have forged ahead have shut off their supply of sunlight.

The Advantages of Thrift.

"If a man had put a hundred dollars in a savings bank twenty years ago," said the statistician after dinner, "it would amount to over two hundred dollars now, and he could buy almost as much for it now as he could have got for the original hundred at the time he began to save."

"He who hates is an assassin"—and he is also a suicide.

Keep Your Health TO-NIGHT TRY Minard's Liniment

QUEER FEELINGS AT MIDDLE AGE

Women Should Know How Lydia E. Pinkham's Vegetable Compound Helps at This Trying Period

Sheboygan, Wisconsin—"I was run down, tired and nervous. I could not even do my own housework, could not sleep at night and all kinds of queer thoughts would come to me. Finally I gave up going to the doctor and a friend told me of Lydia E. Pinkham's Vegetable Compound. After the first bottle I could sleep better and I have kept on improving ever since. I have taken seven bottles now and am so happy that I am all over these bad feelings."—Mrs. B. LANSER, 1639 N. 3rd St., Sheboygan, Wisconsin.

For the woman entering middle age Lydia E. Pinkham's Vegetable Compound can be of much benefit. During this time of life certain changes take place which sometimes develop into serious trouble.

Melancholia, nervousness, irritability, headache and dizziness are some of the symptoms. Lydia E. Pinkham's Vegetable Compound is a natural restorative, especially adapted to assist nature in carrying you safely past this time. Why not give it a fair trial?

William found a pocketbook But the string jerked it back

It looked like a happy discovery as it lay there on the sidewalk—until the discoverer reached to pick it up. Then the hidden string jerked it away. All William got was disappointment.

That's the way a good many people have found it to be with the comfort and cheer they thought they had secured in tea and coffee. When they came to depend on it—there was a hidden string, and nothing left but disappointment.

The drug, caffeine, in tea and coffee, is a nerve stimulant. Constant stimulation of the nerves often produces rebellion that takes the form of sleeplessness, headaches, irritability, high blood pressure. That's the string to tea and coffee.

Postum, that wholesome and delightful cereal beverage, is completely satisfying and there's no harmful quality whatsoever, to jerk away the comfort which you find in this splendid table drink. Any member of the family may enjoy Postum with any meal—and there will be no after-regrets.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by grocers.

Postum for Health—"There's a Reason"

Made by Canadian Postum Cereal Co., Limited, Windsor, Ont.

GLENCOE COUNCIL

The regular meeting of the Glencoe council was held in the council chamber on Monday, April 3, with all members present. The minutes of the last meeting were read and adopted. The engineer's report on the McPherson drain was then read and discussed. On motion of Messrs. Lumley and Davidson the report was accepted.

On motion of Messrs. Parrott and McCracken the council accepted the petition of W. D. Moss and others for a granolithic sidewalk on the east side of Main street from the Grand Trunk Railway to the Presbyterian church lands.

On motion of Messrs. Lumley and Parrott the clerk's salary was increased \$50 a year.

On motion of McCracken and Davidson the following accounts were ordered paid: Jas. Wright & Son, supplies for town hall, \$3.35; A. B. McDonald, insurance premium, \$30; E. T. Huston, first quarter's salary, \$30; four months' sale of tax tickets, \$33; telephone re debentures, \$1.90; postage and war tax stamps, \$2.42; Jas. M. McGregor, survey, plan, profile and report on McPherson drain, \$25; McPherson & Clarke, coal and lumber for town hall, \$43.72; Don H. Love, 100 check loops for seats for town hall, \$3.75; Nell Munroe, hauling grader to Glencoe, \$2.50; Wm. Gurd & Co., 50 dog tags, \$2.75; C. E. Nourse Co., 3 cords wood for town hall, \$15; C. George, first quarter's salary, \$56.25; express on assessment roll, 40c; postage, \$2.02; Wm. McRae, cleaning streets, hauling gravel and snow plowing, \$4.50; Frank Smith and Roy Smith, cleaning streets, \$2.40; J. B. Henry, salary for March, \$96; express, 90c; freight, 25c.

On motion of Messrs. Davidson and McCracken the clerk was instructed to prepare a by-law for the McPherson drain.

Charles George, Clerk.

"Tanlac did what everything else failed to do." Thousands have said it. So will you.—P. E. Lumley. One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

WOOD—SHORTREED

At Chalmers church, Guelph, on Wednesday, March 29, at 3.30 p.m., there was solemnized the marriage of Margaret Isabel, eldest daughter of Mr. and Mrs. Robert Shortreed, 45 Paisley street, Guelph, and Lieut. Col. James H. Wood, D.S.O., Croix de Guerre, M.B., of 1962 Dovercourt road, Toronto. The bridemaid was Miss Elizabeth Shortreed, of the Ortopedic Hospital, Toronto, and Maj. Edward O. Jeffrey, M.C. (with bar), M. B., acted as groomsmen. The bride wore a navy blue suit with black hat, and corsage bouquet of orchids and lilies of the valley, and also wore the groom's gift, a platinum pendant with diamonds set in onyx. The ceremony was performed by Rev. George Little, pastor of the church, and during the signing of the register, Miss Shortreed sang "Calm as the Night," with organ accompaniment by Miss Edna Laking and violin obligato by Wm. Thain. After the ceremony a reception was held at the bride's home where a buffet luncheon was served, the toast to the bride being proposed by Rev. Frank Harper, of Hillsburg. The bride is a graduate of Western Hospital, Toronto, where she has been a valued member of the staff. Wood did good service during the war, having reached Boulogne, France, in November, 1914, and serving continuously until he returned from the Rhine at the signing of the armistice. Dr. and Mrs. Wood returned to Toronto en route to St. John, from whence they will sail for Great Britain and the continent.

SHOULD STIMULATE BASEBALL

Announcement made in this issue of the Transcript should prove a stimulus to baseball in Middlesex county during the coming summer. Cups are being offered for competition in the various ridings by their respective representatives in both the Dominion and Provincial parliaments, and a meeting of representatives of all ball teams in the county is called for April 15th at London to arrange schedules.

WINDOW AND VERANDAH

Brightened With Flower Boxes and Hanging Baskets.

The Boxes Must Be Strong and Durable—The Soil Should Be Kept Rich and Well Watered—Hints on Arrangement of Plants.

(Contributed by Ontario Department of Agriculture, Toronto.)

Window boxes should be made strong and durable. Each box should be nine or ten inches wide at top and bottom, seven or eight inches deep inside measurements, of a suitable length to fit the window, not over four feet in length, made of one-inch dressed lumber, and when finished, painted a dull green color. Half-inch holes should be bored about six inches apart through the bottom of the box for drainage purposes. Verandah boxes should be about the same measurements. A large iron screw eye, or iron staple, should be put at each top, outside (front) corner of the window boxes. A strong piece of wire should be attached to these long enough to attach to another screw eye or staple placed in the window frame about a foot higher up than top of box, so that the box can be fastened securely in position. Boxes and barrels may be made more artistic and rustic looking by nailing moss and fungi covered bark, of native trees, on the outside. This not only adds to their attractiveness but also helps to keep the plants moist and cool at the roots in summer time. The bark from Basswood, Elm, Cedar or Birch trees will be found suitable. By the exercise of a little taste and originality, very pretty boxes can be made at slight cost. Verandah boxes and rustic stands can be made in something the same way. One of the prettiest rustic stands I have ever seen was made from the lower half of a sugar barrel, reinforced by a thickness of half-inch board nailed on the bottom of the barrel outside to strengthen it, with three-quarter inch holes bored through for drainage purposes.

Hanging Baskets.

Wire hanging baskets lined with green moss or sphagnum moss are very effective, especially for a sunny position. The clay baskets dry out very quickly and are better suited for a shady position than a sunny one.

The soil for window boxes must be rich in fertilizers if the best results are to be obtained. It is a good plan to put an inch in depth of well rotted barnyard manure, or dry cow manure, near the bottom of each box, before filling it up with the prepared soil. About an inch in depth of soil may be placed in the bottom of the box first, and the fertilizers named spread over it, or about half a pound of bone meal may be used as a substitute for the first named fertilizers. These fertilizers will help sustain plant growth late in the season when the soil has become exhausted. One part sand, one part leaf mould (black soil from the back of a plow) and eight parts of light loamy soil well mixed, with two parts of either of the fertilizers named added, will make a good soil for window boxes, rustic stands, etc.

The best time to fill window boxes is when they are to be placed in position toward the end of May or early in June. The boxes may be set in position and well secured, before they are filled with soil or plants, as they are heavy and difficult to set in position when filled.

Arrangement of Plants.

Tall growing plants should be placed at the back of the box nearest the window. Dwarf plants and trailing plants should then be put around the front and ends of the box. Any space between these in the centre of the box should be filled with medium height plants. It is a good plan to first fill the box nearly level full with soil, then stand the plants on the surface where they are to be planted finally. By doing this the plants can be changed about and rearranged, and a good idea of the arrangement and effect desired can be obtained before finally planting them. For color effect, for instance, too much of any one color, especially the heavier colors, should not be placed in any one part of the box, whether of dwarf or tall plants, as there would not then be a proper balance of color, something that would detract from the effect considerably. By standing the plants on the surface of the soil before planting as mentioned, any change required can be easily made. Use bright colored plants mainly whether of foliage or flowers, and if possible, make use of good sized plants. Boxes filled as described at the time of setting out, will do much better than boxes filled indoors early in the season. Boxes filled very early indoors, often get shabby as soon as they are set out, and sometimes become positively unsightly before the summer season is half over.

Care of Boxes.

Window boxes, etc., require copious and frequent waterings every day, or at least every second day, especially during hot weather. The soil should be well soaked with water when watering the boxes. Toward the end of the season, in July and August, some liquid fertilizer may be given the plants.—The late Wm. Hunt, O. A. College, Guelph.

E. G. Bennett, of Missouri, says: "When you water your window boxes, the fertility of your soil; when you sell 'butter-fat' you retail water, feed, and sunshine."

Comparison is the Fairest Test

BIG-SIX
\$2475

f. o. b. Walkerville, Ont.

Set it side by side with any car, irrespective of price and judge. That's the way to buy a car. See what each has to offer at its price, before you make up your mind. It's the only way to be sure you're getting just what you want—and it surely is the only way to appreciate how much you get in this seven-passenger Studebaker at its price of \$2475.

And it's a test that Studebaker is eager to have you make. For when you stand this new BIG-SIX side by

side with other cars, you'll find it gives you all, in quality of material and workmanship, that you can get in any car regardless of price—and infinitely more than you can get in any car at the same price.

On every hand the thousands of BIG-SIX owners have found in this car everything they considered essential to complete motoring satisfaction. This is another reason why Studebaker is the world's largest builder of six cylinder cars.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

The old car was lasting the winter out pretty well until the automobile show came along.—Indianapolis News.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

Card of Thanks
The family of the late Mrs. John Mullins wish to express their thanks and appreciation to their friends and neighbors for their sympathy and kindness in their recent bereavement.

TOWN AND VICINITY

Maple syrup was delivered in town by farmers last week at \$3 a gallon. Ekfrid township council has contributed \$25 to the Children's Hospital at London.

Gordon Waterworth, who has been confined to his bed with inflammation, is improving.

Glencoe Presbyterian Sunday School has introduced violin music to assist in the song service.

The piano pupils of Miss Pearl George gave a recital at her home on Symes street on Saturday afternoon.

Get your income tax papers at the post office. They are about the only article that may be had today for the asking.

Owing to the failure of hydro power, due to the sleet storm, the St. Thomas Times-Journal had to cancel its Friday and Saturday editions.

Dr. W. E. Weekes, a former Glencoe boy, has been placed in charge of the medical and sanitary work in connection with the T. & N. O. extension north of Cochrane.

Service was held in St. John's church at four o'clock Sunday afternoon, taking the place of the usual evening service, which was withdrawn owing to failure of the electric light service.

Mr. Hewitt, manager of the Canada Business College, Stratford, gave a very interesting and instructive address at the Presbyterian Guild held on Monday evening. A solo by Lewis Suttler was much appreciated.

Miss H. M. Sutherland, teller at the Royal Bank, resigned from the service on the 31st of March. Upon the occasion of her retirement, Miss Sutherland was presented with a silk parasol by the bank staff and Mrs. Reeves.

The death occurred at his home in Mosa township on Monday, April 3, of Isaac J. Simpson, in his 64th year. Funeral services were held at the family residence, lot 1, second range south, yesterday, and interment was made in Oakland cemetery.

Charles Taylor, a well-known resident of Howard township, died suddenly on Monday last week. Mr. Taylor was born in Metcalfe township 76 years ago, but had been a resident of Howard for the past 40 years. He was a carpenter by trade.

The death occurred in Ekfrid on March 28th of Margaret McBean, widow of the late Angus McTaggart, in her 87th year. A funeral service was held on Thursday afternoon in the Baptist church at Mayfair and interment was made in Mayfair cemetery.

In addition to an avocation, every man should have a hobby. Some have made a hobby of the cultivation of flowers and have found that a great deal of pleasure and profit may be derived therefrom. Join the horticultural society and try it the coming season.

A London paper says:—That the crown attorney's office has been referred to J. C. Elliott by the Ontario Government is generally reported. It is understood, however, that Mr. Elliott would not care to give up his large private practice for an office which will soon be reorganized.

The play put on in the opera house on Friday evening by the Young People's dramatic club of Newbury Presbyterian church attracted a large audience notwithstanding decidedly unfavorable weather. Although greatly handicapped in many ways, particularly in the failure of the electric light service, the Newbury young people showed themselves to be possessed of much ability in the theatrical line. Several of the characters were impersonated in a manner that would have done credit to professionals. Solos by Miss Elma King and selections by the young people's orchestra were much appreciated. The proceeds of the evening netted nearly \$50.

Last Monday evening a splendid crowd was out to hear the musical program in the Methodist church which had been prepared by the first vice-president, Miss Muriel Precious. It was "An Evening with Beethoven." Miss Ella Samson read an extremely well-written paper, telling of the life of the greatest musician known, Ludwig Van Beethoven. A sonata of his

was beautifully interpreted by Miss Pearl George, and Mrs. J. N. Currie read the story of "The Moonlight Sonata." Beethoven is now more than a name to those who were fortunate enough to have been at League that evening. Next Monday is missionary night, under the leadership of Miss Pearl George. Come and bring your friends.

From recent copies of the Manila, P. I. Daily Bulletin, we learn that our old-time friend and citizen, Jas. F. Macleod, is tip-top among the prominent residents of that city. He retired recently from active business, but still retains a leadership in Manila social circles. In February, on the occasion of a visit of the British cruiser "Hawkins" in Manila Bay, a great deal of entertaining was done, and among other social functions in honor of the occasion, Mr. Macleod gave a very large tiffin party at the Manila Club, among the guests being Admiral Sir Alexander L. Duff and his daughter, and a number of officers of the cruiser and their wives. Other guests included the British Counsel-General, Mr. John T. Macleod, Miss Chuchi Macleod and Neil and John N. Macleod.

SPECIAL NOTICES

For sale—1920 seed barley.—D. J. McKellar, Appin Road.

Lost—a Waterman's fountain pen. Reward at Transcript office, \$5.00. 25c cash and 27c trade (not on account) for eggs, at Mayhew's.

For sale—14 good big shoots.—Edward Ayres, Route 3, Glencoe.

Two young Bronze gobblers for sale.—A. F. Squire, Route 1, Glencoe.

Pure bred white Leghorn eggs for hatching; \$1 per setting.—H. J. Jamieson.

Pure bred Black Minorca eggs for sale; \$3 per setting.—B. F. Clarke, Glencoe.

Wanted—girl for general housework.—Mrs. Nell Gillies, Route 2, Glencoe.

See Wright about your fence requirements. Get our prices before you buy.

A quantity of alsike seed for sale. Apply to Alex. Dewar, Mosa; phone G-622 r 3.

Baker wanted for one-man bakery. Good job. Wages or shares. Apply Bamford, Muncy.

Chopping Tuesday, Thursday and Saturday after April 15th.—R. E. Laughlin, Glencoe.

We are unloading a 3,000-rd. car of Frost fence today. Get our prices.—Wright's Hardware.

For sale—two brood sows, coming in in April; or two sows with pigs.—Joseph Moore, lot 22, Metcalfe.

For sale—registered O. A. C. No. 3040; also field to rent for pasture.—Wm. A. McCutcheon, Glencoe.

Wanted—wicker or reed baby buggy in good condition, priced right.—W. A. Edwards, Newbury.

Have your spring plowing done early with a tractor; \$2.50 per acre.—Jas. Moore, Route 2, Wardsville.

O. A. C. 21 seed barley mixed with early oats and peas, \$2.25 per 100 lbs.—Lewis Watterworth, Wardsville.

Decide on Frost fence NOW! Frost prices are down to meet your income. See Frost Fence at Wright's Hardware.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—D. Brown, second floor Graham's garage.

For sale—S. C. white Leghorn eggs for hatching; \$1 per setting, \$5 per hundred.—W. A. Coulthard; phone 609 r 11.

Wanted—a second-hand Massey-Harris field cultivator, for repairs. Write what you have to Box 218, Transcript office.

The test of time.—Frost fence and uprights, its rust-proof extra heavy galvanizing and its famous permanent lock, outlast every other fence. See it at Wright's Hardware.

"Adeline" a most fetching dress in very fine quality, good weight, heavy serge; advanced strictly with a new all-over design of silk beading; narrow band circle of self material with streamer ends; new flare sleeve; dress done up in 15 minutes... \$14.50

FENCING!

YES, WIRE FENCING. It will pay you to get our prices on Wire Fencing before buying, as they are rock-bottom and will surprise you. We have Peerless, also some Frost. We guarantee to give you the best galvanizing—the galvanizing that never fell down—also a plump No. 9 gauge wire—we don't mean a No. 9 wire drawn to the last decimal point. Call and see us before you buy.

ROOFING.—We are in the game, with the best that can be bought. It is Bird & Son—"the old reliable," that Father Time has proven there is none better and few its equal. We are sole agents for "Art Craft," the pattern roofing. Here are a few of our lines:

- The wide Art Craft Roofing with pattern.
- 18-inch Art Craft Roofing with pattern.
- Ordinary 18-inch Red or Green Slate.
- Paroid, the kind that made Bird & Son famous.
- The large or small Slate Shingle.
- Wall Board with the grained finish.

All the pattern Roofing you see through the country is Bird & Son's make. This store is sole agent for it. Mr. Chas. Willey is our only representative. See him or call and see us before roofing. We will sell it and you can put it on or we will put it on. When buying, it pays to buy quality. Experiments are often costly. If you buy Bird & Son's you take no chance as it is Quality Roofing.

CALL AND SEE US.

Adam had one advantage. The first robin didn't fool him into taking 'em off.—Buffalo News.

THE PLACE OF THE BANKS IN CANADIAN HISTORY

By W. S. Wallace, M.A., Department of History, University of Toronto.

It may be interesting to recall that it is just one hundred years since chartered banking in Canada began. It was in 1821 that the Bank of Upper Canada—the first chartered bank in Upper Canada—received its charter; and it was in 1822 that the Bank of Montreal, the Bank of Canada, and the Quebec Bank were chartered in Lower Canada. Several of these banks had already been in existence for a short time as private banks—the Bank of Montreal, for instance, began business in 1817. But 1822 was the year in which chartered banking in Canada really began.

It may occur to you to wonder how people in Canada got along without banks during the two centuries and more which elapsed between the first settlement of the country and 1822. The answer to that conundrum lies in the fact that, before banks were established, the functions of banking were to some extent performed by other agencies. The functions of banking may, I suppose, be summed up under three heads—deposit, discount, and issue. Banks exchange money for the right to demand money; they exchange the right to demand money for money itself; and they exchange the right to demand money for other rights to demand it. Before the institution of banks, all these functions were performed in Canada by other agencies—though not so completely or so satisfactorily as they are performed to-day.

Take the case of deposits. If some fortunate person, in the early days in Canada, had more gold and silver than he required for his immediate needs, and did not wish to place it out on loan, he could do one of two things with it: he could put it in the old-fashioned stocking (and there was a good deal of hoarding of this sort at certain periods), or he could take it to a merchant and get him to place it in his strong-box. Every merchant of importance in the early days had a strong-box—a great iron-bound chest, as a rule, studded with nails, and securely locked and padlocked. Of course, the merchants did not allow interest on the money placed with them (it was only in 1835 that even the banks began to allow interest on deposits), but the gold and silver in these formidable-looking strong-boxes of another day were reasonably safe, and the arrangement answered most requirements.

As a matter of fact, there were comparatively few people in Canada in the early days who were looking for places to deposit money. There was little gold and silver in the country, for—like all new countries—Canada had an adverse trade balance, and money, especially good money, tended constantly to escape from the colony. Trade was local, and was carried on to a surprising extent by barter or by a system of merchant's credits like that in use in some parts of rural Canada even to-day. The necessity of saving banks of deposit was not therefore nearly so urgent then as it is now; and the stocking of the housewife and the strong-box of the merchant answered the purpose fairly well.

Just as deposits were accepted by the merchants, so discounts were usually made by them. Especially after Jay's treaty in 1794, when Canada was first permitted to trade direct with the United States, some of the merchants made a very handsome

profit by trading in commercial paper. Bills of exchange on London were frequently at a premium in New York when they were plentiful in Canada; and the Canadian merchants were often able to sell their bills of exchange on London in the American market at an almost immoral profit. This was one of the ways in which Enos Collins of Halifax, the founder of the Halifax Banking Company, and the first great Canadian banker, laid the foundation of his great fortune. Collins, who was actually—what was rare at that time—a millionaire, had holdings in the United States that were even greater than his resources in Nova Scotia, and he was thus able to make money out of exchange both coming and going. He was, in fact, a past master in the gentle art of playing both ends against the middle. During the war of 1812 he outfitted privateers in both American and British ports; and while some of his ships were bringing back into Halifax harbor American prizes of war, others of his ships were bringing British prizes of war into the harbors of Boston and New York. In those days banking and piracy went hand in hand.

But the function of banking which, in these pre-banking days, was most imperfectly performed, was that of note-issue. During the greater part of the French period there was no paper currency in Canada at all. In the eighteenth century, however, the French authorities in New France resorted to the expedient, in order to overcome the scarcity of coinage, of issuing what was known as card money—playing cards cut in four pieces, marked good for various amounts, and countersigned by the intendant. At first this card money was a real promise to pay later in gold or silver, and it circulated freely as its face value; but ultimately it became inconvertible—mere fiat money—and of course it fell to a fraction of its face value, like the Continental dollars of the American Congress.

After the British conquest, the Government of Nova Scotia issued for a time treasury notes—familiarly known as "shinplasters"—but these were convertible, and performed a useful service. During the first half-century of British rule, it became also the practice of a number of merchants to issue notes or I.O.U.'s—known as "bons," from the fact that they were marked good (bon) for a certain amount of money. So long as the merchant who issued these notes was in good standing, they gained a considerable currency, and made up to some extent for the scarcity of gold and silver. They were also, it may be noted, a source of occasional profit to the merchants, for there were usually some of them that were never presented for payment—that were either lost or destroyed. There were cases known, actually, where the Indians used them as wadding for their flintlocks. Finally, during the war of 1812, still another variety of paper money made its appearance. The military authorities, in order to facilitate their war purchases in the colony, issued what were known as Army bills—notes redeemable at the Army Bill Office in Quebec in Government bills of exchange on London. These bills passed current as readily as money, and without doubt they did much to familiarize the people of Canada with the advantages of a redeemable paper currency such as banks might, if established, be expected to provide.

(Continued next week.)

AMERICA LEADS AS WHEAT PRODUCERS

Russia Replaced by Canada, United States and the Argentine.

A despatch from London says:—That the Russian grain trade has permanently passed never to return, is the claim, interesting to Canadian wheat growers, made by the Morning Post on Friday. The Post points out that even after Russia's production of grain is once more raised to the level of her internal consumption, cereals will be needed for the restoration and upkeep of her livestock. "With this further and indefinite postponement of a net margin for sales abroad, the passing of the Russian grain trade is

in the opinion of Mark Lane, an accomplished fact," says the Post. It goes on to say that Canada, Argentina and the United States have replaced Russia as wheat producers and that the Argentine and Canada furnish the low grade white oats formerly obtained from the Czar's Empire.

Doubling Our Wheat Yield.

By the use of fertilizers and scientific methods England grows 32.5 bushels of wheat to the acre as against Canada's 15.5. The Council of Scientific Research is trying to perfect methods of providing cheap fertilizers for Canadian farmers from raw material now wasted in Canada. At 32.5 bushels per acre our last wheat crop would have been increased roughly \$388,000,000.

MAP OF STATES AFFECTED BY WATERWAY PROJECT
The eighteen heavily shaded states have, by act of their Legislatures or by declaration of their Governors, organized and voted funds to promote the great St. Lawrence Deep Waterway project in which Canada is also vitally interested. An idea of the vast area of country this scheme affects may be gained from this diagram.

SINN FEIN SOLDIERS IN DUBLIN SWEAR ALLEGIANCE TO IRISH REPUBLIC

Murders and Reprisals for Murders Still Continue in Belfast—Pitched Battle Between Republicans and Police in County Tyrone.

Dublin, April 2.—A parade of rebel troops of the I.R.A. took place in Dublin this afternoon, in open defiance of orders of I.R.A. headquarters. About 3,000 men, representing five battalions, assembled at Smithfield Market to participate in the demonstration. The flags of the five battalions were escorted by men armed with rifles. The demonstrators wore civilian clothes, but many of them carried revolvers.

The parade was a sequel to the notice issued by the rebels that the Dublin brigade was to be mobilized on Sunday to take a "new oath of allegiance with new implications."

Belfast, April 2.—Four men were shot and killed and three children were wounded last night in the Sinn Fein area near the old Lodge Road district. The ages of the men ranged from 40 to 63. The children are two and seven and 13 years old.

It was another grim week-end for Belfast. The shooting of the men is believed to have been in reprisal for the killing on Saturday of Constable George Turner, who had been a regular policeman for 14 years. The assassin fired at Turner from a vacant house and made his escape.

Finding a Cure for Diabetes.

It is reported that a group of doctors, working in the medical laboratories of the University of Toronto, have discovered at least a palliative, and perhaps a cure, for diabetes. These doctors, like all typical university men, are quite reserved when interrogated about their work and do not wish to raise any false hopes in the minds of the public. But the very fact that they are working on this problem and that they have made some progress is very encouraging and is another proof of the great value of scientific research. It is only when some great discovery is announced that people realize that, in a modern institution of higher learning like Ontario's provincial university, research is continually going on, and that the results of these investigations are always of advantage to the people of the province and of the Dominion. Should a cure

for diabetes be made available to the medical profession the resultant saving of life cannot be computed in dollars and cents but will be worth many times more than the amount expended in research at the university. The actual discoverers will not benefit financially, but the general public will.

Walsh, who lived in Alton Street, was lying in bed with the two younger children, and the bullet which killed him wounded them. Two-year-old Bridget was shot through the head and killed, and a relative of the Walsh family this morning a bullet passed through the arm of a neighbor holding a baby and pierced its stomach, wounding it fatally.

The body of a young man was found in the road at midnight last night, three miles from Newry. There were two bullet wounds in his head, and a bicycle lay beside the body. Papers in the man's pockets bore the name Garvey.

Britain Issues Millions of War Medals

Nearly 10,000,000 war medals have been issued by the British and 1,500,000 more are to be issued, according to an announcement by Sir Laming Worthington Evans, Secretary of State for War, in the House of Commons. The war medals and victory medals are about equal in number, being slightly over 3,500,000 each. There have been 350,500 of 1914 star medals issued and 1,500,000 star medals for the first two years of service.

GOVERNMENT OF IRELAND NOW IN THE HANDS OF HER OWN PEOPLE

A despatch from London says:—Royal assent was given Friday afternoon to the bill ratifying the Irish Treaty, and a new chapter of Irish history was begun. The Irish Free State has now a legal existence, and its Provisional Government, under Arthur Griffith and Michael Collins, is endowed with full powers to administer the country until the general election. Britain has given up the right to intervene in Ireland's internal concerns, and on the Provisional Government alone now rests the responsibility of restoring order and of preparing for a permanent regime. The new State, however, came into being under the shadow of a speech of exceeding gravity by Winston Churchill in the House of Commons on Friday.

He paid a warm tribute to the statesmanlike courage and earnest good-will at this most critical juncture of Sir James Craig and his colleagues. "He saw hope in the new co-operation of the Northern and Southern States for a peaceful future of the country, but he missed no words in defining the imminent present danger which besets the infant Free State. A long, weary period of anxiety and uncertainty lay before it, and he preferred to face the facts brutally and acknowledge that the Free State was 'exposed to deadly foes who would not hesitate to use any means, however cruel or treacherous or murderous, to destroy it.'"

The attitude of the followers of Eamon de Valera gives the greatest cause for anxiety.

DEATH CALLS PRESIDENT OF THE T. EATON COMPANY, TORONTO

A despatch from Toronto says:—Sir John Craig Eaton, president of the T. Eaton Company, Limited, passed away at his residence, "Ardvold," Davenport Road, Toronto, at 9.40 Thursday. Death came after a lingering illness of seven weeks' duration. Although only forty-six years of age, Sir John Eaton was one of the outstanding figures of Canadian industry and commerce. For fifteen years he had been at the head of the largest retailing establishment in the British Empire. As president, he guided the fortunes of the T. Eaton Company, Limited, through the period of that immense concern's most rapid expansion. His name was known from coast to coast, wherever, in fact, the mails carried their daily load of merchandise sent out by the Eaton distributing centres scattered over the Dominion from Saskatoon to Moncton.

The heir of great wealth, Sir John's innate generosity of character and his broad and democratic human sympathies had gained for him the liking, respect and admiration of all those with whom he came in contact. The instigator of reforms in working conditions and hours of labor, affecting twenty thousand employees, his position in the industrial sphere was unique. Known as Canada's largest employer of labor, a philanthropist whose benefactions mounted into the millions, and a sportsman who took a keen delight in the outdoor life of his country, Sir John was equally well known for his abhorrence of anything approaching the snobbish. A merchant prince he was a prince among them.

Prince George Trains in British Navy

A despatch from London says:—The Agamemnon, the latest of the British pre-dreadnought fleet in the navy list, will be commissioned at Portsmouth for a series of experiments in gunnery and bombs of a highly confidential nature. The vessel will be steered and controlled by radio, which will not be put out of action by the heavy concussions.

Not the least important of Sir John's services to his country was the share that he himself took in diverting the resources of the Eaton organization towards the prosecution of Canada's part in the great war. Shortly after the outbreak of hostilities, he offered \$100,000 to the Government for the purchase and equipment of a battery of Vickers' quick-firing machine guns, mounted on armored cars. This offer was accepted, and the Eaton Machine Gun Battery was sent overseas at Sir John's expense. Not satisfied with this, Canada's merchant prince gave the Government the free use of his steam yacht the "Florence" and of his Marconi station at Toronto. During the war the "Florence" was used for patrol duty off the Labrador coast.

Of generous proportions were Sir John's donations to the many auxiliary funds necessary to carry on the war. The Patriotic Fund, the Victory Loan campaign, the Navy League, the Red Cross Fund and numerous others reaped the benefit of his munificence. Fitting recognition of this and many other features of his war work came, when on June 3, 1915, he was created a Knight Bachelor.

Sir John is survived by his widow, Lady Eaton, his mother, Mrs. Timothy Eaton, four sons, Timothy Craig, John David, Edgar Allison, Gilbert McCrea; one daughter, Florence Mary; one brother, Major W. F. Eaton of Oakville; and two sisters, Mrs. J. M. Burnside, and Mrs. C. E. Burden, both of Toronto.

Weekly Market Report

Manitoba wheat—No. 1 Northern, \$1.50 1/2.	Manitoba oats—No. 2 CW, 56 1/2c; extra No. 1 feed, 53 1/2c; No. 1 feed, 53 1/2c.	Manitoba barley—Nominal.	All the above track, Bay ports. E. A. MAYHEW & CO.

MELBOURNE

Many thousands of dollars' damage was done in this community by the storm. The weight of ice has ruined many shade trees and telephone lines are nearly all out of order. In some places the large poles are lying on the road for a distance of one and a half miles, and in other sections the poles are bent over the road, the wires with in a few feet of the ground. Many fences are down, the staples being drawn from the posts by the weight of ice on the wires. Great damage has been done to the orchards. Apple, cherry, peach and plum trees have all suffered.

It is stated that an ice storm such as we had last week is an indication of a good crop of fruit.

The day before the recent storm, seven sea gulls were seen flying over the village. Some people predicted an unusual storm, as gulls are not often seen so far inland.

KNAPDALE

Buzz bees are the order of the day here. There is evidence that the maple syrup season is about over.

Mr. and Mrs. Alexander Stuart and daughters, Nora and Ruby, spent Sunday at the home of Mr. and Mrs. Will Telfer, Parkdale.

STRATHBURN

A gloom has been cast over this neighborhood by the passing of Christopher McRae, who was a general favorite with everyone. The bereaved family have the heartfelt sympathy of the whole neighborhood in their great loss.

Campbell McRae was taken to the hospital and underwent an operation for mastoid. He is progressing favorably.

The storm made great havoc with the telephones. Only about a dozen poles remain standing between Battle Hill and Strathburn.

EKFRID STATION

Miss Marion Campbell visited in Glencoe last week. Services will be held in S. S. No. 4 Sunday evening, April 9th, at 7.30.

OBITUARY

In the death on March 28 of Margaret McTaggart, relict of the late Angus McTaggart, of Ekfrid, we record the passing of another of the last of Ekfrid's pioneer women.

Mrs. McTaggart, whose maiden name was Margaret McBean, was born at Stoney Creek, near Hamilton, in 1836, and along with her parents and some older members of the family moved to Western Ontario a few years later, settling near Strathburn. In 1855 she became the wife of her late husband, who died nine years ago. She was a woman of sterling qualities, a loving wife and mother, a true neighbor and friend, and was well known for that hospitality, patience and industry that characterized the women of pioneer life. For nearly fifty years she was a devoted member of the Primitive Baptist church at Mayfair.

She leaves to mourn their loss two sisters, Mrs. Jane Tallamy and Mrs. Elizabeth McBean, of Glencoe, and ten children—Mrs. C. K. Campbell, Chatham; Mrs. Jessie Gillies, London; Mrs. Cassie Stevenson, Melbourne; Mrs. John Carswell, Iona; Mrs. Albert Willey, Ekfrid; Donald, William and Cyrus, Ekfrid; John, London, and Angus, Pittsburg, Pa. Her young daughter, Bella May, died some years ago.

SCHOOL REPORTS

S. S. No. 2, Mosa
Report for February and March.
Sr. IV.—Willie Campbell 78, Jean Sherwood 70, Mary Hurdle 70.

III.—Katharine Gillies 87, Jack Bukak 72, Norman Sherwood 57, Jean Bain 55, Jack Reycraft (absent).

II.—Mamie Logan 68, Willie Logan 28.
I.—Ross Little 88, Doris Reyecraft (absent).

Primer.—Lorna Sherwood 70, Margaret C. Brown, Teacher.

S. S. No. 3, Ekfrid

Sr. II.—Dorothy Campbell 83, Bert Corneille 81, Melvin Huston 76.
I.—Harold Corneille 75, Clare Huston 72.

Primer.—James Tanner, Mrs. Keith Black, Teacher.

An Owl (Judge)

An Englishman and his American friend were walking down the street of an American town one night. An owl set up his ancient: "Who-who-o!"

The Englishman asked: "What is that?"
"It's an owl," answered the American casually.

"It's an owl, then, is it?" said the Englishman, disdainfully.
"Yes," replied the American, "an owl."

"Well," stormed the insulted Englishman, "I know it's an owl. But what the hell is it that's 'owling'!"

The Transcript office sells blank counter check books. Handy for those not using large quantity.

Send the Transcript to your friends. We have them ready-wrapped for mailing.

WARDSVILLE

The W. H. S. pupils held their annual "At Home," on Saturday evening, April 1st, in the music hall. Although the roads were bad and a large number ill with the flu, there was a good attendance. In the early part of the evening a program was given, consisting of chairman's address, J. Kearns; selections by the Newbury orchestra; a wand drill; reading, Miss Helen Atchison; recitation, Miss Rhea McRae; piano solo, Miss Mary Hutton; dialogue, "A Courtship Under Difficulties," Miss Ava Weir, Allan McLean and Walter Whitfield; addresses by Peter O'Malley and Frank Henderson; stumpy speeches by Jack Douglas, John McLean and Adair Bayne. The remainder of the evening was spent in a promenade, after which lunch was served by some of the students. The hall gave a very festive appearance in the school colors of purple and gold and the school shields.

Another of Wardsville's old residents passed away on Tuesday morning of last week in the person of Mrs. James Humphrey. She has been an invalid for some time. She leaves three daughters and three sons, her husband having predeceased her last fall. The funeral was held on Thursday afternoon, Rev. Mr. Farquharson officiating. Jim Humphrey and son Earl, of Kingsville, and Ernie Humphrey, of Toronto, attended the funeral.

Charles Moore and Charles Miller left on Tuesday for the West.

Mr. McRae and Jean spent Friday in London with Mrs. McRae, who is recuperating after an operation.

Owing to last week's storm Wardsville was in darkness for four days, but the power is on again now.

Miss Agnes O'Malley spent the week-end at her home here.

Jack Heath was in town over Sunday.

NEWBURY

"Sin" was the subject of a very interesting sermon given by Rev. Mr. Farquharson in Knox church Sunday afternoon. At the close of the service a collection for the Russian children was taken up, amounting to \$100.

Jack Kane visited friends in town over the week-end.

The Newbury stores are commencing their Wednesday half-holiday for the summer on April 12.

Harry and Milton Babcock are visiting friends in Louisville this week. The young people presented their play, "Don't Marry for Money," in Glencoe last Friday and expect to give it in Appin this Friday.

Mrs. J. A. Robinson, who had been ill with pneumonia for over a week, passed away Friday morning. The funeral was held Monday afternoon from her late residence and interment made in Oakland cemetery.

The regular meeting of the W. M. S. of Knox church was held on Friday, March 30, at the home of Mrs. Pennell, with the president in the chair. On account of the bad weather and roads, only eight members were present. The topic was "Hobnan," taken by Mrs. Donald Fletcher, while Mrs. W. Bayne gave a splendid paper on Shantung Christian College—its place in our missions. Dainty refreshments were served by the hostess.

FOR PEOPLE WHO CARE

To keep up their appearance, SEVEN SUTHERLAND SISTERS COLORATOR will transform their hair to any shade desired. Treatment. Harmless, inexpensive, durable. Ask to see card showing eight different shades.

H. I. JOHNSTON
DRUGGIST - GLENCOE
Dora Sutherland, 193 Spadina Ave., Toronto

APPIN

The recent sleet storm did considerable damage to the local telephone system, as many as 25 poles being broken down in some places at a stretch. Many trees are split and broken.

The sacrament of the Lord's Supper will be dispensed in the Presbyterian church on Sunday, April 16th, at 11 a.m.

Remember the date of the play, "Don't Marry for Money," Friday, April 7th. Come out and help the Presbyterian Sunday school and incidentally have a good time.

The funeral of Mrs. Louisa Mullins, relict of the late John Mullins, was held on Tuesday, March 21st, at Appin. Mrs. Mullins had been residing with her daughter, Mrs. James Campbell, Toronto, for the past few months and passed away on March 18. She had reached the advanced age of 89 years and had enjoyed comparatively good health until recently. Mrs. Mullins, whose maiden name was Riddle, was born in Scarborough, later moving to Ekfrid, where she married John Mullins, who for many years kept the Royal Hotel here. Her remains were interred in the Appin cemetery beside those of her husband, who died a little more than a year ago. Mrs. Mullins was for many years a member of the Presbyterian church, and a very impressive service was held in the church over her remains. Rev. Mr. Parr officiating in the absence of Rev. Mr. McCulloch, who was prevented by sickness. Mrs. Mullins is survived by three daughters, and three sons. They are: Mrs. James McMaster and Mrs. H. Rankin, of Appin; Mrs. James Campbell, of Toronto; William, of Buffalo, N. Y.; Albert, of Grand Rapids, Mich., and George, of Powler, Mich. The floral tributes were very beautiful.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

DAVISVILLE

Mr. and Mrs. Morton Tomlinson have returned to their home in Port Huron after spending a week with her parents.

Mrs. Shoemaker, of Cobourg, is visiting her son, Richard, at the home of Mr. and Mrs. Thos. Durfey.

Mr. and Mrs. Wesley Babcock and family have moved from Detroit and intend to start farming again. Sorry to hear of the death of Mrs. John Robinson, Newbury.

CAIRO

Mr. and Mrs. F. A. Newkirk visited their aunt and uncle, Mr. and Mrs. J. F. Burgess, on Sunday.

Mr. and Mrs. D. L. McEugan spent Sunday with their daughter, Mrs. J. A. Armstrong.

Miss Rhea Walker called on her friends, Mr. and Mrs. Robert Huffman, on Sunday.

Mr. and Mrs. John Cross were visitors at G. W. Young's on Sunday.

We are pleased to hear that Mrs. Hanley Moorhouse is improving nicely after her severe illness. Mrs. Alice Wade, who has been ill at the home of her sister, Mrs. Osborne Gage, is able to be up again.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

WARDSVILLE Cash Store

WALL PAPER FROM 12 1-2c A ROLL
DRESS GINGHAMS FROM 15c TO 35c

W. H. Parnall
Successor to J. A. Mulligan

WOODGREEN

Mrs. Atkinson, who has been seriously ill at her home, is recovering.

Mr. and Mrs. E. Lumley and family attended the funeral of Mrs. Lumley's mother, the late Mrs. Humphrey, on Thursday last. Interment was made at Simpson cemetery.

A number from here attended the "At Home" given by the Wardsville high school pupils on Saturday evening. All report a good time.

Miss Myrtle Perlin, who suffered a relapse when recovering from pneumonia, is some better.

The provincial highway and the Graham road were scraped and are in much better shape.

KILMARTIN

The sacrament of the Lord's Supper will be dispensed in Burns' church, Mosa, Easter Sunday. The usual preparatory services will be held Friday morning and evening.

Miss Johanna Munroe has returned home after spending several months in Walkerville and Detroit.

Dan McAlpine left last week for Detroit.

James McAlpine has returned after visiting in Detroit.

Neil Munroe visited recently at Windsor and was accompanied home by his granddaughter, Mary Ellen.

Land For Sale

The Soldier Settlement Board of Canada offers for sale by Public Tender: 65 Acres—North Part Lot 17, Range 2 North L. R., Mosa Township, Middlesex County.

The terms of sale are 20% of purchase price in cash on acceptance of tender, the balance in not more than nine equal annual instalments, with interest at 6% per annum.

Each tender must be accompanied by an accepted cheque for 10% of the tender offered. This amount will be applied on the 20% if the tender is accepted.

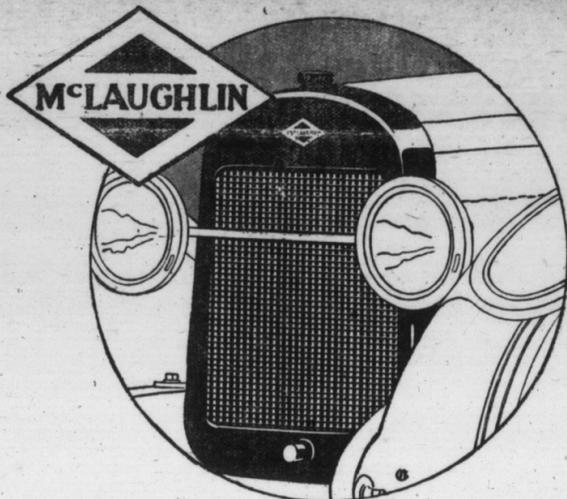

In the event of a tender of a returned soldier being accepted, no advances will be granted him for Stock and Equipment or Permanent Improvements under The Soldier Settlement Act, 1919.

Tenders will be opened April 28th, 1922.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive tenders to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of Lot 17, Range 2, Mosa Township," and addressed to: The District Superintendent, Soldier Settlement Board, Toronto.

Dated at Toronto this 25th day of March, 1922.

The McLaughlin-Buick Radiator
—Rugged, Efficient Typifies the Car

The McLaughlin-Buick Radiator is typically McLaughlin-Buick, strong—and ample in its cooling capacity to meet every condition. Should an accident happen to the McLaughlin-Buick radiator core the damaged section can be removed and quickly replaced with a new section. You don't have to buy a complete new core. Come in to-day and see the new McLaughlin-Buick models.

MCLAUGHLIN-BUICK

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

A FEW THINGS ABOUT Massey-Harris Engines

Easy to start. Easy on fuel. No packed joints or gaskets to leak. Four-ring piston gives good compression. Extra heavy crank-shaft and fly-wheels. Large water space around cylinder and valves. Valves set in easy removable valve cage. Storage tank in cast-iron base. No pumps to get out of order. All engines supplied with magnetos. Call and see one before buying.

NOTICE TO CREDITORS

Notice is hereby given, pursuant to The Trustee Act, Chap. 121, R. S. O. 1914, that all persons having claims against the estate of John Stinson, late of the Township of Mosa, in the County of Middlesex, farmer, deceased, who died on December 2nd, 1921, are to send post paid or deliver to Messrs. Fraser & Moore, London, Ont., Solicitors for the executors of the said deceased, on or before the 25th day of April, 1922, full particulars of their claims and of the securities, if any, held by them; and that after the said 25th day of April, 1922, the executors will proceed to distribute the assets of the estate among the parties entitled thereto, having regard only to the claims of which they shall then have received notice; and that the executors will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received by them at the time of such distribution. Dated at London, Ont., March 24, 1922.

FREDERICK JAMES STINSON, DANIEL TRESTAIN, Executors. By FRASER & MOORE, their Solicitors.
