TORONTO, JUNE, 1901

No. 4

### Postage Stamps of Canada

On the 6th April, 1851, was affected the transfer of the Post Office in Canada from the control of the Royal to the Colonial Government. Soon after the transfer, the Hon. J. Morriss, the first Post master General entered into a contract with Rawdon, Wright, Hatch and Edson, of New York, for the manufacture of postage stamps to correspond with the reduced rates of postage. Three values were prepared and issued June 1st, 1851:

Issue of 1851, thin laid paper, unperforated.
3 pence red
6 pence violet

o pence violet 12 pence black

Three additional values were issued in June, 1852, the ten pence replacing the twelve pence, which was withdrawn from circulation. The twelve (12) pence is now unatainable, only eight hundred and twenty copies being issued.

Issue 1852, thick wove paper, unperforated, ½ penny rose

7½ pence green.
10 pence blue.

The three pence and six pence, in various shades, also exist on thick wove paper. In 1857 the three lower values appeared perforated. Issue of 1857, thick wove paper, perforated.

½ penny pink. 3 pence red. 6 pence violet.

About this time appeared stamps, surcharged in black 1d. and 8d., which were spurious, no such stamps ever being issued by the Canadian Government.

In 1859 the Canadian currency was changed from pence to cents, and a new set of postals was prepared by the American Bank Note Company.

Issue of 1859, thick wove paper perforated.

Icent red.

I cent rose pink.

5 cents vermillion.

5 cents brown red.

10 cents red lilac.

12½ cents green.

12½ cents blue green.

5 cents vermillion.

Issue of 1864, thick wove paper, perforated, 5cents pink.

By Her Majesty's proclamation, issued in 1867, the Provinces of Canada, Nova Scotia, New Brunswick, Prince Edward Island and British Columbia wereto form one Dominion which took effect July 1st, 1867. A new stamp series was prepared by the British American Bank Note Company, and issued April 1st, 1868.

Issue of 1868, stout wove paper, perforated.

½ cent black.

1 cent brown red.

2 cents green.

6 cents brown.

121/2 cents blue.

15 cents lilac.

In the latter part of 1868, the one, two, three and six cents were reduced in size to correspond with the half cent stamp.

Issue of 1869, small size, perforated.

I cent orange.

2 cent green.

3 cents rose.

6 cents brown.

Issue of 1874, small sure, perforated.

10 cent rose pink.

Issue of 1875, large size, perforated.

5 cent olive green.

The die of the large 5c was prepared in 1868, but not being needed was laid aside until brought into temporary use by the change in the postal rates. It was replaced by the small size five cents in the latter part of 1875.

Issue of 1875, small size, perforated. 5 cent olive green.

Issue of 1880, large size, perforated.

15 cent steel blue.

On the first of June, 1882 a new halfcent stamp was issued. The general arrangement of the former design is adhered to, but the ornamentation is much simpler, and the stamp itself smaller.

Issue of 1882, very small, perforated % cent black.

Shortly after this the tints of the 1869 small size issue, and 15 cents, 1880 issue, were changed to the following:

2 cents yellow green. 3 cents orange. 6 cents rich brown. 10 cents carmine red. 15 cents blue grey.

An 8, a 20 and a 50 cent stamp was introduced in 1892, the first for registration

and the two latter for parcel and book post purposes.

Issue of 1892.

The 8 came in two tints.

8 cents slate.

8 cents lilac grey

20 cents vermillion.

50 cents deep blue.

Towards the latter part of 1896 the 8c. was changed to a decided purple tint,

On June 19th, 1897, a series of stampa to commemorate Queen Victoria's Diamond Jubilee was prepared by the American Bank Note Company., at Ottawa, having the following denominations:—

JUBILEE ISSUE.

%c. black.
15 cent steel blue.
1c. orange.
20c. vermillion.
2c. green.
50c. ultramarine

Ioc. brown violet.

3c. bright rose. \$1.00 red. 5c. deep blue. \$2.00 dark blue.

6c. rich brown. \$3.00 yellow brown 8c. violet. \$4.00 purple

\$5.00 olive

Early in 1898 the Jubilees were replaced by the so called Maple Leaf issue, comprising the following stamps:

MAPLE LEAF ISSUE.

%c. black.

1c. blue green.

2c. purple.

3c. carmine red.

5c. dark blue

6c. chocolate.

2c. light purple. 8c. orange

Ioc. brown violet.

Owing to dissatisfaction on the part of the public, the Maple Leaves were superseded in 1899 by the present Numeral series, as follows:

NUMERAL ISSUES

½c. black/3c. carmine1c. green.5c. blue

2c. dark purple.6c.brown.2c. light purple.8c. light orange,2c. red.10c. deep violet

In 1901 another value was added:

20c. sap green.

The remainders of the 3c. Maple Leaf and Numeral issues were surcharged 2c. in black in 1899.

The change of postal rates from 3c. to 2c. on letters brought out the Mulock Imperial Map 2c. stamp at Christmas, 1898, which remained in useabout twelvemonths.

#### REGISTRATION STAMPS.

Stamps for registered letters appeared in 1876, and were engraved by the British American Bank Note Company. The eight cent value was withdrawn from circulation in 1880.

Registration Stamp Issue of 1876.

2 cents orange.

2 cents vermilion.

2 cents scarlet.

5 cents green.

8 cents blue.

### Printing Stamps.

"No visitor is permitted inside the building without one of the guides especially detailed for this service, while the work of each of the hundreds of employees is so carefully checked and recorded that even the most significant error is readily traceable. Ink, paper, the engravers' dies, the printers' plates, are all given out on properly signed receipts, and until all are accounted for, even to the tiniest scrap of paper, the employees who have handled them are not permitted to leave the building; so that only by a wide-

spread plot could all these safeguards be successfully eluded.

"The little party was now shown into a very long room of which was ranged a row of compartments like sentry boxes.

In each of these sat a silent engraver, bent over the small square of steel upon which he was cutting some part of the design for paper money or stamps. The plates from which the stamps were formerly printed are the property of the Government, so that the old designs, with a slight modification consists of a trefoil mark placed in the upper corner of the newstamps, which will serve to distinguish them from the old issues printed by the American Bank Note Company. The work of the Engravers is necessarily so painstaking and slow that the original dies are considered too expensive to use in the printing presses. Thus after the engraver has completed a die, it is subjected to a hardening process, and the design multiplied indefinitely upon soft steel plates by what is known as the transfer-press.

The visitors were shown a long row of these presses, as well as the great vaults where all the designs, dies, and plates are locked up after the day's work.

From the silence of the engravers' department they were led into the din and clatter of the press-room below.

Here they found the new steam presses as well as old-fashioned hand presses in operation and were able to see every detail of the actual printing of stamps.

"The hand presses are worked by a plate printer and one assistant the printer first inking and polishing the engraved plate over a series of small gas jets, after

which it is placed on the press. His assistant now lays a dampened sheet of paper upon the plate, the printer gives the press a turn, and a sheet of bright new stamps is drawn out at the other side.

The work is done quickly and accurately, but it is a very slow process compared that of the steam presses, which turn out sheets of 400 stamps each at the rate of 100,000 stamps an hour. The steam presses carry four plates on an endless chain around the sides of a large square in the circuit of which the plates are automatically heated on a proper temperature, inked, wiped off, and printed. . The blank paper is laid on the plates by one assistant, while a second helpertakes out the printed sheet. The printer in charge of the press has the most difficult part of the work, which consists in polishing the plate with his bare palms after it has been mechanically inked. This must be done so delicately as to leave neither too much nor too little ink upon the plate, but only just enough to give a clean, fine impression."

#### Paragraphs.

The coins of the Shahs of Persia have their origin with Isma'l (1502.) They are struck in the three metals, and are remarkable for the elegance of their inscriptions, sometimes in flowing Arabic sometimes in the still more flexous native character. The inscriptions are at first Arabic; after a religious formulæ are in this language and the royal legend in Persian, usually as a poetical distich. The Persian series is also remarkable for the Autonomous issues of its cities in

copper, the obverse bearing some type, usually an animal. The coins of the Afgans form a class resembling in inscriptions those of the Persians and equally using Persian distichs. They commence with Ahmad Shah Durni.

A rare find in the shape of a moa's egg has been made in New Zealand. There was a fall of earth in a dredging claim, and presently the huge egg was seen floating uninjured in the water. The discovery is the most interesting from the fact that it is the second perfect moa's egg that has ever been found. The only other perfect specimen was unearthed by a man while digging in the alluvial soil at the Kaikoura mountains in the early 60's. This egg which was nine inches in length and seven in breadth, was taken to England and sold for \$500. Some idea of the size of these eggs may be gleaned that a man's hat makes an excellent egg cup for them.

Probably the oldest book for home lessons in arithmetic was recently unearthed in Egypt.

The papyrus, which was in excellent condition, dates from about 1700 B. C.—that is about 100 years before the time of Moses. It proves that the Egyptians had a thorough knowledge of elementary mathematics almost to the extent of our own. The papyrus has a long heading.

"Direction How to Attain the Knowledge of All Dark Things," etc. Numerous examples show that their principle operations with entire units and fractions were made by the means of addition and multiplication. Subtraction and division

were not known in their present form but correct results were obtained, nevertheless. Equations were also found in the papyrus.

The standard Chinese dictionary, which was complied by one Pa-out-she who lived about 1100 B. C. is the first dictionary recorded in literary history. It contains some 40,000 characters, each standing for a word 11 should be borne in mind that this was used quite 400 years before Europeans employed writing.

A rubber tree four feet in diameter yields twenty gallons of sap, making forty pounds of dried rubber.

A point of importance to collectors is-the knowledge of the different kinds of paper used. There are many varieties wove, laid, silk thread, batonne, manilla, quadrille, pelure, etc., but of these the first two are the most important. Wove paper is the kind used by most newspapers, the texture being -practically uniform throughout. Laid paper is the kind used for most writing papers. In this the pulp passes over a frame composed of parallel wires, which produce alternate dark and light lines plainly visible when the paper is held so that light passes through it. Silk thread paper is that used in the English one shilling and the tenpence stamp 1847-48. It was also used by Bavaria, Switzerland, Wurtemberg, etc., in the fifties. Manila is a coarse paper made of hemp, used for wrappers, etc. Pelure is a very thin paper not much used. The New Zealand stamps of 1862, for instance, are found on this paper. The materials used in the manufacture of paper and the processes employed make the same kind

of paper in different shades. For instance, the United States stamps previous to 1870 are on a white wove paper of a creamish hue. The 1875 reprints of these issues (rare and valuable) are on a snow white wove paper.

The designs for the proposed new issue of British stamps, with portrait of King Edward has been approved.

A catalogue of Canadian revenues (third edition, 1901) has been issued by Wm. R. Adams, Toronto, Can. Price, 10 cents.

A set of seven stamps, in two colors, has been issued by the Federated Malay States. The design is a tiger in the act of springing.

### The Finish Mourning Stamp.

The inhabitants of Finland have hitherto enjoyed the privileges of home rule under the restricting influence of the Russian Government, and have, nnder this system, issued stamps of their own design and in their own currency. Latterly this arrangement has been superseded by the Government of the Czar, and an attempt to force the use of ordinary Russian stamps upon the people has been made. Symbolic of their ancient and constitutional freedom, the Finns viewed with alarm the withdrawal of the stamps which bore the coat of arms of the Grand-Dutchy, and made moving appeals to the Autocrat of the Russians without effect.

Then was issued by some of the patriots a mourning label to commemorate the passing away of their last vestige of independence and this label was used side-

by-side with the Russian posage stamp, but, of course, not franking the letter.

The word SUOMI is the ancient name of Finland, and beloved by the people—many of whom are seeking relief in emigration from the enforced Russianizing now in progress.

One concession to the native susceptibllities was eventually made by the Russian Government, in allowing the new etamps to bear face values in Finnis currency of pennia and marka. The penni is equal to the centime or centesimi and 100 pennia-1 mark. This concession was altogether inadequate as a set-off in the loss sustained and the mourning stamp, as illustrated, was printed and affixed to letters posted by the patriots, while a post card embodying a large representation of the stamp was also issued. Both of these were immediately suppressed by the Russian officials, and their use could better be suppressed in hours than in days.

They have been extensively exported, and both stamp and post card can be obtained in England, although, of course, neither is a potal issue in any sense of the word—being merely an interesting couvenir of a great change.

The ANGLO-RUSSIAN says, that when the measure of repression was promulgated the Finns issued a black stamp bearing the words "SUOMI-FINLAND" and the national coat of arms. This stamp they affixed to the top right corner of the envelope as a sign of mourning, whilst affixing the Russian stamp on another part of the envelope.

The Imperial Government interdicted this practice and then the Finns began to use transparent envelopes, putting the black stamp inside so that it could be seen from the outside.

The Governor-General declared this ruse to be illegal too, and forbade it; but the people still would not give in, and the very latest information to the effect that the Finns use an india rubber stamp made in the form of a square bearing the words "Grand Dutchy of Finland," and in the centre a space just large enough to take the hated Russian stamp. Of course this also will be stopped.
