

GENERAL BUSINESS. NEW GOODS! NEW GOODS! ELECTRO-PLATED WARE, Ever shown in Miramichi, which I have personally selected from one of the best Houses in New York. The Stock consists of Tea Sets, Ice Pitchers, Dinner and Breakfast Casters, Pickle and Fruit Stands, Butter Colors, Card Holders, Spoon, Forks, etc.

1878. NEW SPRING GOODS! GREAT REALIZING SALE! I now offer my ENTIRE STOCK of Staple and Fancy Dry Goods, along with a beautiful assortment of the following SPRING GOODS, which will be sold at a Wholesale Price.

Save Money on Bales and Shoes. Extraordinary Value now Offered. G. I. WILSON. VICTORIA HOUSE. AMONG THE MANY NOVELTIES TO BE SEEN AT THE COMMERCIAL HOUSE, CHATHAM, WILL BE FOUND THE NEW CARPET EXHIBITOR AND MULTIPLYING SHOW CASE.

COMMERCIAL HOUSE, CHATHAM. NEW CARPET EXHIBITOR. MULTIPLYING SHOW CASE. CARPETS AND OIL CLOTHS. FURNITURE WAREHOUSES. CHARLOTTE ST., ST. JOHN.

WALNUT BEDROOM SETS. GEORGE WOODS & CO. CHICAGO, ILL. CAMBRIDGEPORT, MASS. NEWCASTLE DRUG STORE. THE GREAT FEMALE REMEDY.

GEORGE WOODS & CO. CHICAGO, ILL. CAMBRIDGEPORT, MASS. NEWCASTLE DRUG STORE. THE GREAT FEMALE REMEDY.

TEACHERS' INSTITUTE. DEMERARA RUM. 25 King Square, ST JOHN.

CUSTOM TAILORING. Tailoring Establishment. WINTER & SPRING. W. S. MORRIS. P. J. QUINN.

SPECIAL NOTICE.

We have determined to publish the MIRAMICHI ADVANCE hereafter at \$1.00 a year, subscriptions to be prepaid in all cases.

Special Prizes. A SPECIAL PRIZE OF \$5 will be given to the person who furnishes, within two months from date, the largest list of New Subscribers to the ADVANCE.

Miramichi Advance. CHATHAM, THURSDAY, SEPTEMBER 19, 1878. VICTORY! It is with no ordinary pleasure that we congratulate the County of Northumberland on the victory won by her people on Tuesday last.

Explanatory. We ask our readers to excuse the lack of variety in our columns to-day as the force at our disposal was largely engaged on extra work this week.

Some Choice Extracts. The Advance issued an extra on Saturday, as we are credibly informed, Sunday last, for the purpose of electing Mr. Mitchell.

More Signing of other People's Names. It appears that when a Newcastle correspondent was referred to in the Advance as an "uninfluential Pettifogger"

creditable work of 1874. While Newcastle - Mr. Mitchell's supposed stronghold - has reduced his majority from 186 in 1874 to only 77 in 1878. All the other parishes have given Mr. Snowball an increased vote and if they could not make it a majority they deserve none the less of credit, for all worked well and the County's united effort has secured a glorious victory.

A Bad Move by Local Government Men. It was the just least of Mr. Tilley and Mr. King that the members of the Local Government in politics.

The Southern Scourge. The following explains itself and the situation at Vickburg: "Henry Hunt, Chairman of the Chamber of Commerce, New York."

General News. THE ENGLISH PARLIAMENT has prorogued to the 30th November. THE AUSTRALIAN CRICKETERS were to sail from Liverpool to-day for New York.

Accident at Dorchester Penitentiary. Last week two carpenters named McDougall and Penny were seriously injured at the Dorchester Penitentiary, by the falling of the stage on which they stood, caused by a load of plank in the act of being lowered by a steam derrick, striking it.

Killed on the Intercolonial. On the 14th inst. three men while walking the track near Gilbert's Island in the vicinity of St. John, found the body of a man lying on the track with the head crushed almost to a jelly and the limbs mutilated. The body was conveyed to the depot and was identified as that of Thos. Farley of Halifax.

Lord Dufferin's Departure. His Excellency the Governor-General expects to sail from Quebec on either the 12th or 19th October, - most probably the latter date. A short interregnum will thus occur between the day of His Excellency's departure from Canada and that of the arrival of his successor.

Enjoy Life. What a beautiful world we live in! Nature gives us grander opportunities, glens and oceans, and thousands of means for enjoyment. We can desire no better when in perfect health; but how often do the majority of people feel like giving it up!

SMOKERS. MYRTLE NAVY TOBACCO. CAUTION. EACH PLUG IS STAMPED. IN GILT LETTERS, NONE OTHER IS GENUINE.

Travelers' Column.

Just Received. SOYTHES, MACKEREL LINES, HOOKS AND JIGS.

Prime Smoked HAMS & BACON. FLOUR, MEAL AND PORK. COMMERCIAL COLLEGE.

Government House, Ottawa. HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL.

Notice to Contractors. SEARLE TENDERS addressed to the Secretary of Public Works, Ottawa, will be received at the office of the Secretary of Public Works, Ottawa, on TUESDAY, the 25th DAY OF OCTOBER next, for the construction of a Railway from the Port of Hawkesbury to the Port of Ottawa.

Notice to Contractors. SEARLE TENDERS addressed to the Secretary of Public Works, Ottawa, will be received at the office of the Secretary of Public Works, Ottawa, on TUESDAY, the 25th DAY OF OCTOBER next, for the construction of a Railway from the Port of Hawkesbury to the Port of Ottawa.

Canadian Pacific Railway. To Capitalists and Contractors. THE Government of Canada will receive proposals for constructing and working a Railway extending from the Province of Ontario to the Gulf of St. Lawrence.

Bozsa to be Crushed. - A recent Vienna despatch says it is clearly intended to crush the resistance in Bosnia by overwhelming masses. It is rumored that one half of the Austrian army will be employed.

ROUND THE MOON.

CHAPTER III.

THEIR PLACE OF RESIDENCE.

This curious but certainly correct information was given, the three friends returned to their slumbers. Could they have found a calmer or more peaceful spot to sleep in? On the earth, houses, lawns, cottages, and country feel every shock given to the exterior of the globe.

On sea, the vessels rocked by the waves are still in motion; in the air, the balloon oscillates incessantly on the dead strata of divers densities. This projectile alone floating in perfect space, in the midst of perfect silence, offered perfect repose.

Thus the sleep of our adventurous travelers might have been indefinitely prolonged, if an unexpected noise had not awakened them at about 7 o'clock in the morning of the 2nd of December, eight hours after their departure.

This noise was a very natural barking. "The dog! It is the dog!" exclaimed Michel Ardan, rising at once.

"They are hungry," exclaimed Nicholl.

"By Jove!" replied Michel, "we have forgotten them."

"Where are they?" asked Barbicane.

"They looked, and found one of the animals crouched under the divan, terrified and shaken by the initial shock, it had remained in the corner till its voice returned with the pangs of hunger. It was the amiable Diana, still very confused, who crept out of her retreat, though not without much hesitation, Michel Ardan encouraging her with encouraging words.

"Come, Diana," said he, "come, my girl! thou whose destiny will be marked in the cyclopaedia; thou whom the pagans would have given as a companion to the god Anubis, and Christians as friends to St. Roch; thou who art running into interplanetary space, and wilt perhaps be the Eve of all Salenite dogs! come, Diana, come here."

Diana, flattered or not, advanced by degrees, uttering plaintive cries.

"Good," said Barbicane, "I see Eve but where is Adam?"

"Adam!" replied Michel, "Adam can not be far off; he is there some where; we must call him. Satellite! here, Satellite!"

But Satellite did not appear. Diana would not leave off howling. They found, however, that she was not bruised, and they gave her a pie, which allayed her complaints. As to Satellite, he seemed quite lost. They had to hunt a long time before finding him in one of the upper compartments of the projectile, without some unaccountable shock must have violently hurled him. The poor beast, much hurt, was in a piteous state.

"The devil!" said Michel.

They thought the unfortunate dog down with great care. Its skull had been broken against the roof, and it seemed unlikely that he could recover from such a shock. Meanwhile, he was stretched comfortably on a cushion. Once there, he heaved a sigh.

"We will take care of you," said Michel; "we are responsible for your existence. I would rather lose an arm than a paw of my poor Satellite."

Saying which, he offered some water to the wounded dog, who swallowed it with avidity.

This attention paid, the travelers watched the earth and the moon attentively. The earth was now only distant in a crescent, rather more contracted than of the previous evening; but its expanse was still enormous, compared with that of the moon, which was approaching nearer and nearer to a perfect circle.

"By Jove!" said Michel Ardan, "I am really sorry that we did not start when the earth was full, that is to say, when our globe was in opposition to the sun."

"Why?" asked Nicholl.

"Because we should have seen our continents and seas in a new light—the first refulgent under the solar rays, the latter cloudy as represented on some maps of the world. I should like to have seen those poles of the earth on which the eye of man has never rested."

"I dare say," replied Barbicane; "but if the earth had been full, the moon would have been new; that is to say, invisible, because of the rays of the sun. It is better for us to see the destination we wish to reach, than the point of departure."

"You are right, Barbicane," replied Captain Nicholl; "and, besides, when we have reached the moon, we shall have time during the lunar night to consider at our leisure the globe on which our likensness swarm."

"Our likensness!" exclaimed Michel Ardan; "they are no more our likensness than the Selenites are! We inhabit a new world, peopled by ourselves—the projectile! I am Barbicane's likensness, and Barbicane is Nicholl's. Beyond us, around us, human nature is at an end, and we are the only population of this microcosm until we become pure Selenites."

"In about eighty-eight hours," replied the captain.

"Which means to say?" asked Michel Ardan.

"That it is half-past eight," replied Nicholl.

"Very well," retorted Michel; "then it is impossible for me to find even the shadow of a reason why we should not go to breakfast."

Indeed the inhabitants of the new star could not live without eating, and their stomachs were suffering from the imperious laws of hunger. Michel Ardan, as a Frenchman, was declared chief cook, an important function, which raised no rival. The gas gave sufficient heat for the culinary apparatus, and the provision-box furnished the elements for this first feast.

The breakfast began with three bowls of excellent soup, thanks to the liquefaction in hot water of those precious cakes of Liebig, prepared from the best parts of the remnants of the Pampas. To the soup succeeded some beefsteaks, compressed by an hydraulic press, as tender and succulent as if brought straight from the kitchen of an England eating-house. Michel who was imaginative, maintained that they were even "red."

Preserved vegetables ("fresher than

nature," said the amiable Michel) succeeded the dish of meat; and was followed by some cups of tea with bread and butter, after the American fashion.

The beverage was declared exquisite, and was due to the infusion of the choicest leaves, of which the Emperor of Russia had given some chests for the benefit of the travelers.

And lastly, to crown the repast, Ardan brought out a fine bottle of Nuits which was found "by chance" in the provision-box. The three friends drank to the union of the earth and her satellite.

And, as if he had not already done enough for the generous wine which he had distilled on the slopes of Burgundy the sun chose to be of the party. At this moment the projectile emerged from the conical shadow cast by the terrestrial globe, and the rays of the radiant orb struck the lower disc of the projectile direct, occasioned by the angle which the moon's orbit makes with that of the earth.

"The sun!" exclaimed Michel Ardan.

"No doubt," replied Barbicane; "I expected it."

"But," said Michel, "in the space shadow which the earth leaves in space extends beyond the moon?"

"Far beyond it, if the atmospheric refraction is not taken into consideration," said Barbicane. "But when the moon is enveloped in this shadow, it is because the centers of the three stars, the sun, the earth, and the moon are all in one and the same straight line. Then the nodes coincide with the planes of the moon, and there is an eclipse. If we had started when there was an eclipse of the moon, all our passage would have been in the shadow, which would have been a pity."

"Why?"

"Because, though we are floating in space, our projectile, bathed in the solar rays, will receive their light and heat. It economizes the gas, which is in every respect a good economy."

Indeed, under these rays which no atmosphere can temper, either in temperature or brilliancy, the project grew warm and bright, as if it had passed suddenly from Winter to Summer. The moon above, the sun beneath, were inundating it with their fire.

"It is pleasant here," said Nicholl.

"I should think so," said Michel Ardan. "With a little earth spread on our aluminum planet we should have green peas in twenty-four hours. I have but one fear, which is that the walls of the projectile might melt."

"Calm yourself, my worthy friend," replied Barbicane; "the projectile withstood a very much higher temperature than this, as it slid through the strata of the atmosphere. I should not be surprised if it did not look like a meteor on fire to the eyes of the spectators in Florida."

"But then Joseph T. Maston will think we are roasted!"

"What astonishes me," said Barbicane, "is that we have not been. That was a danger we had not provided for."

"I feared it," said Nicholl simply.

"And you never mentioned it, my sublime captain," clasping his friend's hand.

Barbicane now began to settle himself in the projectile as if he was never to leave it. One must remember that this aerial car has a base with a superficies of fifty-four square feet. Its height to the roof was twelve feet. Carefully laid out in the inside, and little encumbered by instruments and travelling utensils which each had their particular place, it left the three travelers a certain freedom of movement.

The thick window inserted in the bottom could bear any amount of weight, and Barbicane and his companions walked upon it as if it were solid plank; but the sun striking it directly with its rays lit the interior of the projectile from beneath, thus producing singular effect of light.

They began by investigating the state of their store of water and provisions, neither of which had suffered, thanks to the care taken to deaden the shock. Their provisions were abundant, and plentiful enough to last the travelers for more than a year. Barbicane wished to be cautious, in case the projectile should land on a part of the moon which was utterly barren. As to water, the reserve of brandy, which consisted of fifty gallons, there was only enough for two months; but according to the last observations of astronomers, the moon had, at least in the deep valleys, and there springs and streams could not fail. Thus, during their settlement on the lunar continent, these adventurous explorers would suffer neither hunger nor thirst.

Now about the air in the projectile. There, too, they were secure. Reiset and Regnault's apparatus, intended for the production of oxygen, was supplied with chlorate of potash for two months. They necessarily consumed certain quantity of gas, for they were obliged to keep the producing substance at a temperature of about 400°. But there again they were safe. The apparatus only wanted a little care. But it was not enough to renew the oxygen; they must absorb the carbonic acid produced by expiration. During the last twelve hours the atmosphere of the projectile had become charged with this deleterious gas. Nicholl discovered the state of the air by observing Diana panting painfully. The carbonic acid, by a phenomenon similar to that produced in the famous Grotto del Cane, had collected at the bottom of the projectile owing to its weight. Poor Diana, with her head low, would suffer before her masters from the presence of this gas. But Captain Nicholl hastened to remedy this state of things, by placing on the floor several receivers containing caustic potash which he shook about for a time, and this substance, greedily of carbonic acid, soon completely absorbed it, thus purifying the air.

An inventory of instruments was taken. The thermometers and barometers had resisted, all but one minimum thermometer, the glass of which was broken. An excellent barometer was drawn from the washed box which contained it and hung on the wall. Of course it was only affected by the pressure of the air inside the projectile, but it also showed the quantity of moisture which it contained. At that moment its needle oscillated between 25 and 25.08.

(TO BE CONTINUED.)
