only absolutely pure baking powder.

Governor Hill, of New York (anys a reporter of the JN. X. Tribune), says: "I have been astoniahed lately at the extent of the adulteration of food. It would seem that every thing we eat is adul-terated." \* This, adultantion of groceries is becoming a na-tional evil—one that we shall have to adopt severe means to check."

The machinery of the law cannot be put at work too speedily or too vigorously against this wholesale adulteration of the things we eat. Both the health and the pockets of the people demand protection.

• There is no article of food in genoral use more wickedly adul-ternated than baking powder. The New York State Board of Health has analyzed 84 different brands purchased in the State, and found most of them to contain alum or lime, many to such an extent as to

The sale of adulterated baking powders has been prohibited by statute in several States. It will be in the interests of the public

health when their sale is made a misdemeanor everywhere, and the

penalties of the law are rigidly enforced. . The only baking powder yet found by chemical analysis to be entirely free from lime and absolutely pure is the "Royal." This perfect purity results from the exclusive use of cream of tastar

specially refined and prepared by patent processes, which totally remove from it the tartrate of lime and other impurities. The cost

of this chemically pure cream of tartar is much greater than any other. The high grade of the Royal Baking Powder has been fully established by official chemists,

Prof. Lovs, who made the analyses of baking powders for the

Prof. H. A. Morr, late Government chemist, says : "It is a scientific fact that the Royal Baking Powder is absolutely pure." Dr. E. H. Basrnar, chemist of the Brooklyn Department of

Health, says (April 24, 1885): "I have recently analyzed samples

of the Royal Baking Powder, purchased by myself in the stores

of this city, and find it free from lime in any form." Prof. McMusrans, chief chemist U. S. Department of Agri-

culture, Washington, D. C., says: "The chemical tests to which I

have submitted the Royal Baking Powder prove it perfectly healthful, and free from every deleterious substance."

Bread, cake, biscuits, etc., repared with Royal Baking Powder will be lighten, sweeter, and more wholesome than if made with
