# STRATAGEM TO WIN WIFE

Richard Edward Blackwell, Moving Picture Singer, Estranged From Young Wife in St. Thomas, Places Pistol to His Head and Pulls Trigger-Police Court Sequel.

St. Thomas, Aug. 3.—Theatrically sensational was the attempt which Richard Edward Blackwell, a former Londoner, made today to win back the affections of his young wife, formerly Miss Stein, of this city.

Blackwell is a singer in a moving picture show and since coming to St. Blackwell is a singer in a moving picture show, and since coming to St.

Thomas has been estranged from his wife and they have been living apart.

Blackwell declares he loves his wife dearly and wants to be reconciled to her. With this end in view he went to the house where she was living today and

Would not have her and wanted to have her come back and live with him. Mrs. Blackwell would have none of him, and finally seeing that his pleading was in vain, Blackwell declared that if she did not come back he was going to end it all by shooting himself. He proceeded to make good by hauling a big revolver out of his pocket.

Mrs. Blackwell servenmed but Blackwell slowly raised it to his head and Mrs. Blackwell screamed, but Blackwell slowly raised it to his head and

There was a deafening report, but instead of seeing a dead man stretched on the floor, the terrified woman saw her husband standing before her. The cartridge in the revolver was a blank.

Mrs. Blackwell quickly called the police and had her husband arrested. In court today he said he wasted to live with his wife and was ready for a

# Great Outclearing of Children's Wash Dresses and Underwear Tuesday

Soiled or Mussed, Half Price--- Many Less Than Half Gingham and Print Dresses, White Dresses, Skirts, Drawers, Pinafores, Gowns and Infants' Barrows and Slips

Room must be made for new fall stocks. Our buyers have returned from Europe, and we have already advice of heavy importations on the way. Some are already here. Summer stocks must go, and assortments in some lines are fuller than is usually the case, owing to the continued cool weather, which works out more in your favor when the time comes to clear the tables. Last week we advertised the final clearing of Ladies' Whitewear, the biggest sale of the kind we ever listed, which to our surprise were practically all cleared in the forenoon.

Tomorrow the same reductions will be applied to the Children's Wear. Half price and less for hundreds and hundreds of garments which you will find a complete list of below, the reductions on which bring the cost below the price you would in most cases pay for the bare material in the garments, say nothing of the trimmings and cost of making. If you have girls to dress don't miss this sale tomorrow. Come early and make sure of getting sizes for all. Mostly all are soiled or mussed from handling, but all are fast washing colors.

LONDON, MONDAY, AUG. 5. CIVIC HOLIDAY.

In the city of London there must be some peculiarly corporate spirit, as here the Old Boys' movement had its beginning, and the idea of a civic holiday was born a good many years ago. London was a small place then to conceive so great an idea.

Though Civic Holiday is ordinarily taken as just a holiday, it should have a considerable significance. Perhaps in these days it would not be a bad thing if there were some municipal function to keep the significance in view. As it is, the day is a rather colorless affair, compared with the great religious and patriotic festivals or with

The commemoration of the entity of the municipal corporation is well worth while. The town has always been the stronghold of liberties, of culture, of the early Christian model of heaven, that city which St. John and later Bunyan saw in ecstasy. Rome built and legislated and remodelled municipal institutions. Florence and Venice are the glory of mediaeval and renaissance Italy. The German village transplanted to England became the source of modern British liberties; from local self-government the Anglothe national parliament. And the ent trades unions, who have been as-Saxons advanced to the conception of growth of great national states has not diminished the importance of the town. In these times we begin to have municipal ownership, municipal co-operation, municipal trading, the municipal local corporate activity.

Oxford was the citadel of the Cavaliers, Paris has always been, in many respects, as Danton called it, the centre of light. From Babylon to Rome, the city has been the cynosure of next two years, in which it will be men's regards.

Today when it grows in population and force, there is more need than ever its last vestige of terror. for good citizenship, the right understanding of the meaning and limits of civic function. On a day like this it Writing of the naval situation in Britain and Germany, Mr. T. P. O'Conmight seem to be appropriate to bring home to citizens' minds in some way or other, by games, pageant or ceremonial, lecture or debate, their responsi- great nations being apparently dragged bilities, duties and opportunities. But as things are, Civic Holiday is merely a joyous day off, marked by many mately makes war possible on the mainly for exit from the city to which they belong.

### THE PANIC OF 1909.

The economists in the British House of Commons, who contend that Mr. Churchill's recent addition to the naval program is unwarranted, point to the panic of 1909 as a rebuke and a warning. In that year the then First Lord of the Admiralty, Mr. McKenna, threw the whole Empire into alarm by asserting that the German naval program had been accelerated to such an extent that Germany would have 17 Dreadnoughts in commission in the year 1912. Mr. Balfour, feeling in duty bound to go the Government "one better." made elaborate calculations to show that Germany would have 21 Dreadnoughts in 1912, possibly 25.

The year 1912 has arrived and Germany will not have 13 Dreadnoughts until the end of next year, Mr. Mc-Kenna's 17 will not materialize until 1915. These figures are now admitted; the former First Lord is excused on the ground that he was misled by his officials.

It was in 1909, immediately following this scare, that the navy project was mooted in the Canadian parliament. The resolution calling for the speedy creation of a Canadian navy was moved by Sir Wilfrid Laurier, and seconded by Mr. Borden. Both leaders felicitated the country upon the united front presented by the two parties in the presence of a supposed challenge to British supremacy on the ses. An emergency existed on the statement of the First Lord of the Admiraity himself; but Mr. Borden did not press for an emergency concribution then. He intends to press for it now, if his speeches mean anything and if the whole Fritish press tas not misinterpreted them. The naval emergency is past; the predictions of three years ago have been falsified; the German plans are best way to improve conditions among known; the superiority of Britain's the poor. At that time Sir Horace was naval strength is assured; and the not exactly a finished speaker. present First Lord of the Admiralty tells his countrymen that there is "no need for panic or alarm." Where then is the emergency calling for an emergency contribution from Canada? It is not in the North Sea but in this ountry; it is not naval but political.

Mr. Borden, angling for the Nationalist vote last year, promised solemnly that he would submit to the people any naval policy framed by a Conservative Government. He cannot postpene the issue till the natural term of parliament expires, and he prefers not to face an election in the near future. A contribution on the pretext of an emergency-i.e. the German bugaboo--would furnish him with a pretext also for postponing an appeal to the country. He could plead that he needed time to frame a permanent policy, to be one of the planks of his platform in the general election three or four years hence. By that time Canada could have made a substantial beginning in the creation of a navy if the Laurier program had been uninterrupted. A year has been wasted through playing a partisan game with an issue that should have been kept out of party politics; and it looks as though three or four more years will be wasted. In the meantime, unless all the evidence is misleading, millions of Canadian money are to be spent in the Dreadnought craze, and uselessly spent, since every ship over and above the program laid down by Mr. Churchill is superfluous, by his own admission.

#### THE TROUBLES IN BELFAST.

The English newspapers contain details of the disorders in Belfast to which Mr. T. P. O'Connor, M. P., has referred in his dispatches. The London Daily News and Leader says English readers will be deceived if they imagine that the scandal arises out of religious bigotry alone. It is only one of the motives; violence is offered both Protestant and Catholic workmen who have taught the world. FUZZY FACES ARE PEAUTIFUL—IN SPAIN.

THE FIRST WORD: You can accomplish anything if you go about it right and keep at it long enough. In my mail I find the following

"Dear Miss Burke: "I read with interest all of your talks in The Advertiser, and I think you give help and comfort to every girl excepting the one troubled with superfluous hair on the face. Have you anything helpful to say for her? For out of a heart

"Very truly yours, "SORROWFUL BELLE." Hair on the fair face of a girl is, indeed, a tragedy, because it is sup-posed to be one of the attributes of masculinity only, and notwithstanding most girls have been known at one time or another to wish they were boys, yet being girls, they only want to be the girliest kind.

Sometimes a girl is unduly sensitive in this regard. A light, downy fuzz on one's face is not ugly, provided there are no coarse hairs. In Spain it is considered a mark of beauty. If this fuzz is dark it can be lightened by using at least once a day a solution of one part of ammonia to nine parts of hydrogen dioxide. First wash your face with soap and hot water, to remove all the oils; then dab it with the solution, taking care not to get it on the eye-brows or hair, as it will BLEACH and ruin any kind of hair in time.

If you keep this up for months you will see that the roots of the fuzz are being killed, and it is growing thinner and less noticeable. I know a girl who removed the hair upon her upper lip by this method. She pulled out with tweezers all coarse hair and then she used the solution. It took two years to

Would you advise me how I could join some portioned and have good health. Would you advise me how I could join some athletic club or baseball team, and would that pay?

A.—Most colors. Nile, green, pale blue, pale pink, and perhaps a faint lavender will be suitable. Probably you cannot wear red. 2. That must depend on the way which suits you best. If your face is long and narrow, it will probably suit you to it will probably suit you to the hair in the middle and draw

But, to resume, I honestly think most of us enjoy the bustle and changing crowds that are part and parcel of a busy railway centre. HYNES WON ANOTHER GAME. It was Mr. Matt Hynes who humbled the Bees Saturday. Matt went into the box out of his turn so as to accommodate Mr. Wild Bill Donovan, not the Brantford pitcher of that name, but the former Detroit Tiger heaver, who is scouting for Navin and Jennings at present. Mr. Donovan was present in the stand, and he came to verify all the nice things he had heard about the 57-variety dispenser. Matt was in good form, and he held the heavy-hitting Deneau aggregation to seven hits and three runs. The big Palmerston boy was working nice all through the contest, and although he got off to a bad start, more because his team-mates wobbled slightly, he finished strong, and after the sixth inning held the Bees hitless.

Mr. Deneau put his prize heaver on the mound in the person of Willie Bradshaw, the 18-year-old Chicago youngster, who deserves the title of the infant of the Canadian League. This same kid is some heaver, and he struck out ten of the home help during the fracas. He started as though he was going to let the Indians down as light as possible, and in the first two innings had struck out five of the nine men who faced him. He had one bad session, however, and this proved his undoing. After that he was a trifle nervous, and although only one hit was pried from his assortment, he uncovered a couple of wild pitches and hit a couple of men, all of which helped to lose the game dove after it with his gloved paw and

Linneburn Some Base-Runner.

One of the scintillating bits of the afternoon was the work of Mr. Linneburn, who second bases for the home tribe. Mr. Linneburn was a sensation of deck, and he rammed a high right on deck, and he rammed a high right of the science of the second bases for the home and the second bases for the second bases for the home and the second bases for the second bases f tion at bat. The first three times up he gleaned three nice bingles from Bradshaw, stretching one of the punches into a double. In all he was up at bat five times, and with the exception of the second time he never stopped until he had reached second base. Twice he got there on errors by Orcult who threw wild once he a right on deck, and he railmed a high one to right which was just too far in for Deneau to reach in time and too far out for Miller to get. Linneburn got to second by a brilliant bit of base-running before the pellet was continued in the season of 1912 brought out a large crowd to the Fort Erie out a large crowd to the large out a large crowd to the Erie out a large c Orcutt, who threw wild, once by a double, and once by a pretty steal on the throw-in after he had singled to centre. fifth when he speared a fast liner with his gloved hand. In the eighth Cocash pulled off a nice catch when he gathered in Matteson's short fly after a hard run toward second base. Nickells, although built on the lines of a truck horse, covered a heap of territory in centre field, and the way he travelled and got under some hard hit balls was amazing. Gilhooley and Hessberger featured with some nice catches of high hit balls, Hessberger getting Powell's for fly in the third after a hard run. and Gilhooley grabbing Hessberger's fly after a hard run out to left field,

Sammy Smith and Catcher George

Neither Smith Nor Wilson Have | Ing is due to his condition, rather than his ability.

"Sil" will likely catch on with one of the other clubs in the league. He may go with Berlin or Brantford, or he might even sign up with Peterboro. He has not left the city yet, but will remain here for a couple of days.

Amby Kane and his red-stockinged Wilson have not yet reported to the London team, and it is not known just the league that local fans would rather when these two will enrice. They were when these two will arrive. They were see at the park than the Red Sox, and expected in Saturday evening, but it is expected that the largest holiday failed to show up. It was then thought crowd of the season will turn out. As what has become of this valuable pair, a result of Ottawa's defeat on Satur-It was thought that one of them or day and London's win, the Indians perhaps both of them would have been have moved up a few points nearer given a chance in today's games. If hey arrive early today they will turn ing up against Hamilton today for a out in uniform at the park this after-double-header, it is not likely they will do any more than break even. If the Pitcher Thomas Silcox, who has been with the London team for the striking distance of the Cookies, while past two seasons, was given his re-lease Saturday by the London man-and the locals win two, there would agement. Silcox has been going back be little difference in the standing of lately, and he has been batted out of the two teams. There is also the posthe box in several recent games. It is sibility of London dropping two and some time since he won a game, and Ottawa winning a couple, but why look as one of the pitchers had to go, and on the gloomy side? It looks as the others are showing good form at though the Senators are due for a big. present, it was decided to give "Sil" slump, while the Indians are about his release. It is also claimed that due for another winning streak. Let's Silcox has not been taking care of him-self lately, and that his slump in pitch-them overtake the leaders.

Twenty-Round Bout Witnessed by Many Women Spectators,

Sydney, N. S. W., Aug. 3,-Sam Langford, of Boston, won a 20-round fight here tonight from Sam McVey of California, on points. The contest went the full distance. Neither scored a knock-down, but at the end McVey had re-ceived the greater punishment. Langford's superiority on points was so pal-pable that the referce's decision was loudly cheered.

Throughout Langford was the aggres-

sor, showing a strong preference for in-fighting and punching in the clinches. Again, in the fourth, when the men were ordered to their corners, Langford was cautioned. After that, while always on the aggres-

sive, the Boston heavyweight showed more restraint, breaking in the clinches at the call of the referee. McVey displayed cleverness and fought cleanly, but his science was unavailing against Lang-ford's fierce attacks and superior strength and stamina. In the eleventh round he was in distress, but his skill enabled him to avoid a knockout.

The betting was 5 to 2 on Langford.

Athletics Whack Four Brown Pitchers and Win Out Easily by Score of 8 to 3-Other Results.

[Special to The Advertiser.] Detroit, Aug. 4. — The Tigers' and the Highlanders played like champions for seven innings today, then both jumped the track. The Tigers got back on and grabbed the game 4 to 1. For five innings the tally showed one hit for each team, Bush and Paddock having poled the pill to centre the time up. In the sixth Cobb whacked to left for three bases and finished on an infield bunt. He tripled again in the seventh, but this time Lake and Bush were on, and the wallop was more disastrous to the Broadway squad. Gisastrous to the Blodway

The sec ond will leave Montreal Aug. 16, and the remaining four from Toronto Aug. 20. 23, 28 and 30, respectively.

The latest report received by the freight department in Montreal from Mr. C. E. Dewey, general freight agent of the G. T. P., states that, with the recent rains in the west the crops might be expedited by warmer weather but that in other respects the general outlook is favorable. The reports of train agents in the several districts

are as follows: Regina Branch-Weather cloudy and cool; crops in fine condition. Third District-Several heavy rains over the whole district have furnished plenty of moisture. Crops have done well so far, but warm, dry weather is now needed. Wheat is beginning to head in some localities. Fourth District-We have had several showers on the fourth district every day of this period. Weather now cooler. Present conditions are as favorable to the crop as could be possible. Sixth District-The crop conditions

are excellent and far superior to this time last year. There has been erough rain. What is required is a stretch of warm weather, as the wheat is heading out fast.

A Splendid Train. A special train consisting of five Pullman coaches and two dining cars has been found necessary to accommodate the party of Ontario politic ians who have now started out on a trip over the Grand Trunk and Tem-iskaming and Northern Ontario Railways, while another Pullman is to be added at North Bay for the accommodation of representatives from the Temiskaming district, Mr. Rowell is travelling in the private car "Temagami."

The first two steam trawlers of the British Columbia Fisheries Company of Skidegate and Prince Rupert have left Grimsby headed for the last-named port. It is estimated that about 100 days will be necessary for

States railways have only 1,485 miles of track in the Dominion, the States have been invaded by Canadian roads to the extent of 7,197 miles, divided as follows: Canadian Pacific Railway. 5,391 miles; Grand Trunk System, 1,656 miles; Canadian Northern, 170

The writer goes on to add: "The Grand Trunk had a big fight to obtain admission into New England, but its efforts were successful. The main purpose of extending that road into the rich traffic territory of New England is, according to the Grand Trunk's own contentions, to balance their business between the Eastern and Western States. The Grand Trunk's double track main line lies across Canada like an arm, the elows at Montreal, the forearm across Ontario, the hand upon five fertile and productive states, with Chicago, great traffic centre, in its palm. fingers of this hand are the Reeders, which will bring through this American gateway the traffic of the west, the northwest and the south-

The trend of this traffic eliminating the Grand Trunk is to the Atlantic seaboard. With the system, the trafc organization and friendly connec tions at Chicago the Grand Trunk gathers a great volume of this trade and carries it eastward across Canada. When they do this they contribute not only to the earnings of the Grand frunk but to the prosperity of

The Lord Mayor of Bristol, who has arrived in this country to present the Bristol Memorial to the city of Hali-Bristol Memorial to the city of Halifax on Aug. 15, will visit Ottawa, Toronto and Niagara Falls before going east, and will travel on the Grand Trunk Railway. The lord mayor is accompanied by the lady mayoress. Miss Wills, Mr. and Mrs. G. Palliser Martin, and Mr. Henry Riseley.

A Difficult Problem. Discussing the recent order of the Dominion railway commission placing discriminatory charges on all trunks in excess of a certain size, Mr. J. E. Quick, general baggage agent of the Grand Trunk Railway, said in an interview the other day. "The problem of the increased size of baggage resentagles has been made acute for the of the increased size of baggage receptacles has been made acute for the railway companies by the fact that the width of baggage cars cannot be increased. They run, as a rule, from 102 to 104 inches, and baggage is stowed away in two rows so as to stowed away in two rows so as to leave an aisle down the centre of the car When the length of trunks is excessive this cannot be done.

"The cars cannot accommodate nearly so many trunks of increased length, and so the number of baggage cars per train would have to be made greater. It is planned by the rail-way companies to allot only one bagway companies to allot only one bag-gage car per passenger train, and when two have to be employed it in-creases the expense of haulage, and the weight of the train as well as diminishing its speed, all of which are important factors in these modern days of high speed and fine estimates

of the cost of operation.
The carriers consider that it would be unnecessarily harsh to prohibit altogether large trunks, but that the imposition of a moderate penalty will tend to discourage their use in fu-ture. When the passengers become used to the new regulations the com-

An official circular has just been issued by Mr. W. G. Brownlee, general transportation manager, announce ing the appointment of Mr. E. #### RETURNED PICTURE WAS NOT MONA LISA

Admirably-Executed Fac-similie of Stolen Masterplece Was Brought Back, [Canadian Press.]

Parks, Aug. 3.-The director of the Louvre Museum, Pujalet, quickly extinguished today the hopes of lovers of the famous picture "Mona Lisa." the masterpiece of Leonardo Da Vinct, which disappeared mysteriously from the museum last August. These had been raised Thursday by the appearance of an unknown man at the Eritish embassy n Paris with a picture which he declared he had been charged by a person in London to restore to the Louvre by means of the British ambassador. The British ambassador retained the picture and communicated with the French Minister of the Interior, who sent experts to examine it.

As a result, M. Pujalet said today: "It is not the 'Mona Lisa,' although it certainly is an admirable copy."

The picture was painted on an old wooden panel, and to all outward appearance resembled the Da Vinci masterpiece. The man who delivered it at the embassy was arrested.

three-story factory building. I was met at the door by a young man who took my suitcase. At a desk in the reception room I saw a man who held a telephone receiver to his ear by one hand and wrote with the other. In a corner a girl was working at a filing case.

I asked to see the president. I was ushered into the office by the young man who took my suitcase. I introduced myself to J. P. Prescott, who in turn presented me to William T. Carnes, manager of the plant.

Carnes was sharpening a pencil. Prescott passed cigars. He held a match for

Then for the first time I noticed a gray glove. I looked at Carnes and saw another glove. I made inquiries, and learned that everyone I had seen in the building was wearing either one or two artificial arms.

"We have nine other employees who are crippled to the extent of one or both arms. ome are cut off above the elbow, some below. This is an artificial arm factory, explained Prescott.

"Our crippled employees are thoroughly competent. The boy who carried your suitcase was run over by a freight car. One arm was taken off two inches above the elbow, and the other two inches be-low. He operates a typewriter, writes with pen and ink, rides a wheel to and from work, and is general handy man around the office." This strange factory was started two

Years ago. Ten years ago Carnes, then a machinist, was working in a shop at Pittsburg. His right arm was caught in a cogwheel and later amputated above the elbow. When he left the hospital he looked in vain for an arm that was serviceable, so he started to make one himself. He studied anatomy of the arm and fingers, and combined their natural principles in an arrangement of steel levers, ratchet gearing and crank that they would readily respond to the muscle force and nerve impulses of the stump.

He developed an arm that could be flexed or straightened, and fingers that could be opened and closed at will. Carnes made a meagre living for eight years building arms for other people. His orders were few, and he never got enough filing clerk. Below, M. J. Shearer, secretary.

### MEXICAN REBILS ARE **DESTROYING RAILWAY**

#### Madero Is Now Charged With Having Squandered Country's Financial Resources.

[Special to The Advertiser.] Juarez, Mexico, Aug. 4.-Two advancing federal armies have railed to dissuade Gen. Pascual Orozco, head of the revolutionary forces, to evacuate this city.

He declared today that he would not leave this town until the last moment, so that it should not remain unprotected. The rebels announced that dispatches from Gen. Salazar, who is at Casas Grandes with 1,000 revolutionists, said that quiet had been restored in that district. Salazar today began the destruction of the Mexico Northwestern Railway, between Casas Grandes and Madera, where the federal army under Gen. Rabago is mo-

Trainload of Dead. By orders of Orozco, the Mexican rebel leader, a trainload of the dead and dying of the army of Salazar has been sent to Juarez to further embarrass the Madero Government. It will now be the duty of the Madero Government to take care of this human wreck or to leave it to the charity of the American people. Agents of the Orozco party in Washington assert that the revolution will go on regardless of the occasional defeats of the rebel army. Sener Juan P. Didapp, representative here of the revolutionary party, says it has plenty of money, and will continue the fight for years, until the United States recognizes the right

of the Orozco faction.

Charge Against Madero.

President Madero, who has failed in his efforts to float a loan of \$50,000,000 or more in Europe or the United States, asserts Senor Didapp finally, has sent his brother Gustavo to Japan, evidently to see if they can get money there. Officially, Gustavo has gone to thank the Japanese Government for participating in the recent celebration of the centenary of Mexican independence, but it is felt that there is something behind his trip.

Senor Didapp accuses Madero of failures to keep the promises he had made, excepting a few which benefited his own amily. He declares that Madero already had spent all, or practically all of the \$62,000,000 in the national treasury when he government was turned over to him by temporary President Delabarra. Not even the \$15,000,000 voted for the settlement of claims by foreigners had been used for that purpose, charges the Orozco

### A Hermit for Five Years

WHAT would make the greatest impression on a man who had been shut away from human intercourse and denied the use of newspapers for five years-what would most forcibly attract his attention-on regaining the society of his fellowmen?

"Well," you say, "he is fairly certain to be interested in learning whether there's been a change of Government."

True, and probably he will show mild excitement if you can tell him there's been a big war in Europe. But it won't be until you get down to a recital of things that come closer to him, personally, that you'll bring him to his feet with eager questioning.

Tell him a mighty empire has fallen, and—so long as it isn't his empire—a drop curtain of highly embroidered indifference will mask his face.

But tell him the automobile has been so simplified that he can now buy one for the price of a horse and buggy, and he'll promptly bombard you with questions.

A revolution in China may be a world event, but it wouldn't mean as much to him as the perfecting of a shaving apparatus that would do away with the necessity of purchasing new blades or honing old ones.

If you had been a hermit for the past five years, the news of an earthquake in San Francisco wouldn't really mean so much to you as the information that you can now hear any famous opera singer in your own home at a cost of a few cents per hour.

Which is only another way of saying that the phonograph is of more personal interest than an earthquake.

You see how it is: Newspapers carry a "news of merchandise" that is just as interesting, just as vital, as the "news of events" which the editors gather for us.

And, since this "news of merchandise" finds its only expression in the form of Advertising, must we not admit that the Advertising columns are quite as worthy of our serious attention as the scariest "scare head" or the most ponderous editorial?

Shut your eyes to Advertising—and you shut out the news of commercial progress and development—the news of things that make life worth the living.

> Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lumsden Bldg., Toronto. Enquiry involves no obligation on your part—so write if interested.

to Providence to provide some way of escape for the army he leaves behind. And what were the original designs of Napoleon in the expedition to Egypt? Perhaps the answer is to be Egypt? Perhaps the answer is to be found in his words to his secretary, Bourvienne: "Bourvienne, I do not wish to remain here in France. There is nothing to do. Everything wears out here. My glory has already disappeared. This little Europe does not supply enough of it. I must seek it in the east, the fountain of glory." called Europe a "mole hill," clared that there had "never been any great empires in the east, where there

Likely enough, then, the man intended making his Egyptian ex-pedition the first step in the establishpedition the first step in the establishment of an empire that should include the entire Orient. But not yet is the thought completed, for Guigot was probably correct when he wrote of the "Man of Destiny" that "in his secret thoughts he nursed the hope of pushing forward to Constantinople, seizing that city and making himself master of Europe by attacking it from the east. ### VITAL FACTORS IN **ADVANCE IN STOCKS**

Government Crop Report and Woodrow Wilson's Speech May Cause Rise.

### THE GRAIN PRODUCTION

Is Expected to Leave Large Amount for Export-Cotton Crop Rather Uncertain.

[Special to The Advertiser.]

New York, Aug. 4 .- Conservative bankers and large investment firms are unanimous in the belief that a continuation of the upwarti movement in stock values now depends to a great degree upon two important matters scheduled for this week, the Government crop report to be ren-dered on Friday next and Governor Wilson's speech of acceptauce which is to be delivered Wed-

The Government crop report to be published Aug. 9, will give the conditions of spring wheat, corn, oats, bar-ley, potatoes and flax. It will also give the yield of winter wheat and ell as the area of buckwheat and hay. In regard to wheat the outlook is for a combined crop of winter and spring wheat of \$75,000,000 bushels. This, together with a visible supply of 18,000,000 bushels. would make a total supply of 693,-

An authority estimates that this country consumes 550,000,000 bushels a year for food and seeding, so that with a total supply of 693,000,000 bushels there would be 143,000,000 bushels of both kinds of wheat left for export and surplus next year for the ten years ended 1910, 1911.

The average crop of winter and spring wheat in this country totalled 676,830,000 bushels, so that this year's 676,830,000 bushels, so that this year's winter and spring wheat yield will compare favorably with the ten-year average. The yield of spring wheat may be somewhat larger than now estimated, for it is said to be a record-breaker. This is mirrored in the strength and activity of Northern Pacific and Great Northern.

White many well-informed people figure the corn crop at three billion

figure the corn crop at three billion bushels as equally well posted authorities say the probable yield conservatively be placed at 2,825,000,-000 bushels. This compares with a production of 2,555,229,000 bushels last year.

Although oats is conservatively figured at one billion bushels the esti-mates now current call for 1,101,717ooe bushels. Cotton Disappointing.

The Government report on cotton was somewhat disappointing, but the plant has experienced decided improvement since July 25, the date on which the Government figures

Rains have ceased in the east, while showers have occurred in Texas. In-stead of deterioration in August, the prespects are that the crop will probably show improvement so that there still good chances that the final yield will be up to the bumper crops of previous years, excluding 1911.

Reports recently regarding the cotton crop have been very gloomy, but it should be kept in mind that they were also very gloomy at this time last year, and that the considerably in excess of the Govern-

ment's estimate.

From what Wall Street has heard, and the financial district has in recent years demonstrated, that its sense of hearing in connection with Presidential speeches is abnormally de-

Governor Woodrow Wilson's speech of acceptance on Wednesday will be along conservative lines. If so a continuation of the upward movement is expected, provided the Government crop report comes up to expectations.

A Vital Factor.

One of the largest bankers in this city in discussing politics says that for the first time in many years the Presidential election is one of personalities and not vital issues.

Stock market movements have a more solid foundation than personalitles, so that holders of stocks have nothing to fear from this source, It is true that all parties want tariff revision, but as this banker says the prospect of reduced tariff rates has been in our midst for twenty years.

A distinct betterment in trade has been reported the past week. Merchants are replenishing their empty shelves. Advances the past week in steel, iron and wire prices reflect the healthy condition in that trade. In connection with the steel business it can be stated that one of the iness it can be stated that one rethat up to the first day August its steel tonnage for the first six months was larger than it was

for any previous year. Any stiffening of money rates can enly be temporary, and the money when returned will be considerably larger. The banks know that they have to supply money for moving crops every year, and always make preparations in that direction. The future of the stock market at the low figures some time ago, was the scarcity of seiling orders.

Conditions have now been reversed and still stocks fail to come out. This taken to mean that the holders are optimistic, and are determined to hold their securities.

The theme was divided into parts, the first of which is "Administration of God's kingdom on earth left in the hands of man." This explains Christ's stress of earthly duties and develop-ment of abilities. The Bible gives the command, "Labor not for the meat that perishes." Christ laid the emphasis on the fact that the effort of our being is not to be relaxed neither here nor hereafter, and Revelations teaches us that in heaven the saints of God serve him day and night in the temple. Abilities enlarge as man passes from apprenticeship into ownership, as heaven is an eternity of effort, not an eternity of sluggishness. Heaven means more than the popular idea of rest, as the strong man would prefer to die at once and return to the dust than to endure idleness. Therefore Christ pictures life as an eternity of effort. The good servant is rewarded, and heaven's reward is prometion into still is rewarded,

higher service. Part two deals with the idea heaven develops one's abilities and lives that are unfinished here, are not vasted but are perfected hereafter. The third division refers to verse, "In my Father's house are many mansions." That means schools of effort, not harbors of rest. For an example, Christ places before us men of three kinds of character, known as the five talent, two talent and one talent, and bids us to be careful of work intrusted to our care.

The Taft delegates were admittedly elected by a bolting majority, yet they were seated, on the claim that "The Terrel election law of Texas, which fixed the basis of representation, was unfair," and the bolting minority fixed a basis of representation for them-

In Washington there were 668 delegates to the state convention, of which 263 uncontested were for Roosevelt, and 97 uncontested for Taft. Three hundred Insisted on Talking in Church to get a majority the Taft men had to get at least 238 of these contested dele-

They did this by 121 legally elected Roosevelt delegates from King's County alone, and putting in 121 Taft men proved by a sub-committee which had been declared out of existence, King's County getting tickets of admiss'n to the convention hall only to the delegates for Taft. Roosevelt delegates whose credentials ad been previously approved by the pro-Taft state committee were denied admission, as well as those whose seats were contested. The Roosevelt delegates, being in the majority, held a convention at Aberdeen and elected delegates to the national convention, headed by Senator Miles Poindexter.

At the Roosevelt convention 561 men were in attendance, while only 401 attended the Taft convention, yet in the national convention the Taft delegates were the ones counted. Fraudulent Temporary Call.

In Arizona the state committee made up a fraudulent temporary call by seating Taft delegates from two counties where Roosevelt men had been elected, and thus controlling the convention. The Roosevelt delegates refused to recognize this, and the result was two conventions held simultaneously in the same hall, each one of which selected six delegates at large to the national convention.

The seating of the Taft delegates by the state committee was contrary to the practice of the party, and on merits the Roosevelt delegations clearly were elected, as well as on tachnicalities. In county conventions, notably Cohoise and Maricopa, Roosevelt delegates were elected legally and above board.

The Taft men did not attempt to deny this, but in the face of it the state committee usurped the power of making up a preliminary roll, and threw out the Roosevelt delegates who had been regularly elected to these two counties, subsuccessful. The girls are aged 15 and stituting therefor Taft delegates who had not a shadow of title to their seats.

### COAL SHORTAGE IS ALARMING TORONTO

Many Manufacturers Are Very Anxious Regarding Cars Held Up by Embargo.

[Special to The Advertiser.]

Toronto, Aug. 4 .- Manufacturing Toronto is still anxious over the coal shortage, but some relief has been received. Twenty-four trains of coal were brought into the city last night by the Grand Trunk Railway, so it was learned upon inquiring of the night foreman of the Mimico yards. These trains, said that official, would average about 60 cars each, giving an aggregate of 1,040 cars. This spurt on the part of the Grand Trunk is likely due to the embargo which the American railwars placed upon the company in refusing to forward further orders of coal to Toronto until the Grand Trunk had relieved the congestion of cars at Black Rock and Buffalo. They must realize that the present system embodied two perfectly separate and distinct principles—(1) the taxa-tion of men according to their ability to pay, and (2) the levying of contri-butions from the value created by the community in order to minister to the needs of the community. Following the one they asked, "How much have you?" ollowing the other they asked "Where did you get it?" They must keep stead-ily in mind that land ought to be reated differently from other commodities simplyp because it was different from other commodities. (Cheers.) Mr. Ure discussed the details of land reform, saying that they would have to face the problem of giving to small cultivators all the advantages of ownership, without any of its disadvantages, and all the advantages of tendership, without the Algadvantages. without its disadvantages.

skilled independent tribunal would need to be set up to choose suitable men to cultivate the land, and they would then need to provide sufficient money from the central purse of the nation to help poor agricultural laborers who were eager to cultivate land to equip their little farms on easy terms.
