The Missionaries.

bringeth glad tidings, &c. "Go ye into all the world and preach the Gospel to

As rains, descending on the parched grounds, Blighted and scathed by summer's scorehing

Shed forth, profusely, their enlivening sweets, Whilst hill and dale with life and pleasure teems: Diffusing far and wide their healthful smiles, And building hopes to pay the labourer's toils-

Charmed by the beauteous scene, Creation sings, And largely shares in the wide-spreading good Fruits, flowers and trees, drink in the crystal And laughing joy o'erspreads the lake and wood

Nature breaks forth in tones of grateful mirth, And bliss and gladness crown the vielding earth.

So lands long doomed to mental night and gloom, On which no ray divine has ever shone; Where superstition, ignorance and crime, And savage hate and oury claim their throne Where vice in all its wild untrammel'd sway, Is boldly worshipped mid the light of day.

Then gladly dawns the light of purer day, The voice of truth falls sweetly on the car : The wondering tribes now hear the soothing

Whose heavenly tones the weary-hearted cheer; They hail with joy the messengers of love,

As angels bending from their seats above. Chased by the sons of light and truth divine, The mists of darkness flee away with speed; Heaven's blessings fall like dews of evening mild And holy offerings to rude rites succeed: The Idol temples totter at their base, And falsehoods vile to Gospel truths give place

Far on the gale are borne the notes of praise, The voice of prayer and the wilds is heard: The wilderness's gloom is changed-and lo! The long expected morning has appeared: When solitary wastes and forests' glade, With peaceful tidings, joyful now are made

At your approach, ye choice and holy band, New wonders rise amid Creation's night; The scale of sensual dimness breaks away, And the long-darkened mind receives its sight Where base and grovelling appetites held sway.

The uncultured breast, mild reason's voice obeys Large toils ve suffer -- and privations sad. Agnid the deep'ning wilds of savage haunts,

But sounds of eadence wild and chilling tone. Hold concert with the winds' untiring mean.

FOR THE PROVINCIAL WESLEYAN. A Melancholy Scene.

It was a glorious summer day The air was warm and mild And robed in bright and living green The Earth looked forth and smiled.

Twas such an hour as lifts the heart, To purer things on high, And turns our thoughts from lower earth To realms beyond the sky.

Within a darkened room, Were fond and anxious watching hearts, Shrouded in sorrow's gloom.

Wild ravings fell upon the ear, With fearful, saddened anxious thoughts. That would not brook controul

Young, beautiful, and idolized, He in a fearful hour, Had tasted of the luscious wine-

With dim and rayless eve With scoreling brow, and parched lip,

Had lain him down to die The wild dark phrenzied ravings ceased A long and death-like pause, -Then sudden from that couch of pain

A gush of melody that bound, With wondering awe, the heart, Causing the memories of years With thrilling power to start

" The light of other days hath faded And all its glories past, For grief with heavy hand hath shaded The hopes too bright to last."

And as those old familiar words Rose on the evening air. So fraught with saddening memories, Recalling scenes so fair .-

The anguished tears fell thick and fast From those assembled there. And rose from many a trembling lip A half unconscious prayer. The light of other days" had faded,

Its brilliant lustre gone-The glorious loveliness had passed, The lofty mind had flown. Baltimore, Md.

The motion of the heart was afterwards attributed to the animal spirits, to the nervous fluid, tem, to the archea. Haller considers it as an effect of irritability. Lately, Legallois has endeavoured to prove, by experiments, that the principle, or cause, of the motion of

the heart has its seat in the spinal marrow. consideration, as each seems to approximate the true principle of circulation; but nei-

how would this indifference be melted into love! And when the soul makes similar the importance of understanding its office, discovery with regard to God, the frost of in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection, and of receiving it as one in this connection. indifference dissolves, and the heart surrenders itself at once, and altogether to his serders itself at once, and altogether to his serders itself at once, and altogether which is in a first surrenders in this connection, and or receiving it as one of our most valuable theraputic agents, we have seen the to the lot of any, in the humbler walks of most surprizing and happy results from the life, to share such unfinited confidence and use of this wonderful agent. Injuries, respect as what fell to the portion of the

made the seat of concentrated fire, or of some sudden explosion, or of animal spirits, of the principles of that fire, explosion, animal spirits, or nervous fluid.

The heart is not a self-operating organ, The child who asks his parent for some- joint heirs with Christ.—Rev. J. W. Can- any more than the eye, or even the hand. Nor is it possessed of inherent power, but, Memoir of Mrs. Ann Farquhar, shared with him the comforts of her like the force-pump, dependent upon another force for that it exercises. Like every other organ in the economy, it is supplied with nerves. These do not of themselves, impart strength, but become the medium of an element that is of itself strength. Their substance may remain, and to all appearance in a perfect state, in the most complete case of paralysis. The element adapted to them, and without which they are like the telegraphic wire without the battery, useless, may phic wire without the battery, useress, may be disturbed, and power be lost. The heart and whole circulatory system, as well as every other portion of the human mechanic every other portion of the h

the lungs, the explosion that there takes place. It constitutes the animal spirits, the nervous fluid, and the force through which the circulation and every other function is performed. This conclusion is well supported to the British Channel to the Continent, and returned to Annapolis with her husband, and the way of the Atlantic to England, the British Channel to the Continent, and returned to Annapolis with her husband, the British Channel to the Continent, and returned to Annapolis with her husband, the British Channel to the Continent, and returned to Annapolis with her husband, the British Channel to the Continent, and returned to Annapolis with her husband, the British Channel to the Continent, and returned to Annapolis with her husband, the British Channel to the Continent, and returned to Annapolis with her husband the properties and supplicating at the throne of grace—she was herself earnestly engaged in prayer, and afterwards called distinctly on God that He would—for Christ's sake, blot out all her sins. Not long after this,

it to be remarkably under its control. It electrical bath, or charged with electricity, by insulation, and a vein be opened while in Aithough the decrased lived many so charged. Again, if the circulation be feeble, and is so indicated by the pulse, or if the extremities be cold, and the blood-vessels upon the surface scarcely visible, as is always vous, the use of mechanical electricity will both give strength to the pulse, and at once render the blood-vessels prominent. And again, if there be a palpitation of the heart. as is often the case from either nervous debility or local weakness, the system may be at once suspended.

Currents of electricity properly passed through portions of the system where the surface is swollen, and the blood morbid and black, from recent injuries, will at once render the appearance of the blood healthy, and reduce the swelling. And even if the blood a welcome guest to the whole household. be taken from the vein and allowed to coagulate, an electrical current passed through it capacity, shewas ever employed lightening the for a short time will restore it to all the labours of the inmates, or ministering, by her brightness of an arterial fluid!

sulated. When placed in a dry atmosphere, herin all respects,-her "like may ne'er be it will be retained in either for many hours. seen again." shrunk up, and the heart, the lungs, and in- dom-and her unblameable deportment, in

The day of the principle of the principle of the word in the most numerous, powerful and active.

The day of the principle of the principle of the word in the most numerous, powerful and active.

The day of the most numerous of the ocea of this knowledge, would be only to say what would be readily admitted; but this is not the worst aspect of the matter, for the

that professional men who have retired from business, and devote their attention to farming, are almost always patterns for good management, that their farms are always better than those of their neighbours, and that from them they realize a greater profit

very different from those who have nothing but their farms and the appurtenances thereto, and were it not for this they would not be better farmers than others. It is true that this is often the fact, that they have extra money, but yet it is not universally so, for the cases are not rare, in which a you. liberally educated man, and sometimes men at their employment, choose farming for their calling, and so well succeed as utterly to surprise their neighbours.

Thus it is almost capable of demonstration that farmers should be men of intellisame duty .- Cor. New England Furmer.

Management of Mowing Lands, milked is worth two badly milked."

lands is one of the most important features per cent. of cream. of good farming. Any thing that will inwhich to enrich our soil; and whatever In Milking, be kind and soothing; the

HIS MEMORY AND SAGACITY.

An azed and venerable friend, residing in one of the cities on our Eastern seaboard, gentleman of character and worth, once elated to me the following anecdote of the horse; illustrating in a remarkable manner, the sagacity and memory of this animal.

At the close of the Revolutionary War, when everything was unsettled and in disorder, an acquaintance residing on the New York, lost a valuable horse, stolen from the stable in the night. Great search

had nearly faded from the mind. At this period, a gentleman from the East, in the course of business, was travelling on horse-back on this road, on his way to Philadelphia. When within four or five miles of a village on the road, the traveller was overtaken by a gentleman on horseback, a resident of the village, returning home from a short business ride. Riding along side by side, they soon engaged in a pleasant desultory conversation. The gentleman was immediately struck with the appearance of the traveller's horse, and every glance of the eye cast towards him, seemed to excite an interest and curiosity to look at him again, and to revive a recollection of some-again, and to review a recollection of some-again, and to review a recollection of some-again, and to review a recollection of some-again again thing he had seen before; and soon established in his mind the impression that for all the world he looked like the horse he proposed and made, the stranger receiving

"Yes," he replied, "an exceedingly hundred dollars.—American paper. valuable and excellent animal." What is his age, sir ?" "Well, I suppose him to be about ten or

"You did not raise him, then?" "No, I purchased him of a stranger, a traveller, pearly vix years since."

Do you reside in this part of the coun-No, I reside in the Bay State, and am on my way to Philadelphia on business. How far is it now to New York ?" "Well sir, I really regret to interrupt

On the other hand, our literature and The Rev. J. Murray, in his work on Mr. Edwin Gary, the Evangelical Home

language have passed entirely out of this Creation, tells the following story:— Missionary Society of Kensington, reports

Early Rising.

How sweet the little violet grew, Amid the thorny brake; How fragrant blew the ambient air, O'er beds of primroses so fair, Your pillow you'd forsake

Or the wan hue of pining grief, The cheek of sloth shall grow; Nor can cosmetic, wash, or ball, Nature's own favourite tints recall. If once you let them go.

A Dream Realized.

Some time during the past summer, a stranger stopped at one of the watering places on the mountains south of Waynes boro', Pa. After his arrival there he was taken sick, and for several days was apparently deranged. On his recovery he informed the proprietor of the house that, during his iliness, he had dreamed for three nights in succession that he had discovered, at a certain distance in the mountain, under Boston road, some thirry or forty miles from during his illness, he had dreamed for three from the stable in the night. Great search and enquiry were "made for him, but no tidings of him could be heard, and no trace of him could be discovered.

Almost six full years had now elapsed, and the recollection even, of the lost animal, had nearly faded from the mind. At this the worter that direction, when the dream to the recollection even, of the lost animal, had nearly faded from the mind. At this the worter that direction, when the dream to could be discovered.

Alterwards, however, they were walking the things in the breathing and chest, and this, after the presentations of kind and sorrowing friends and Nurses, have tailed to give the smallest relief to the Consumptive sufference.

together in that direction, when the dream

of the springs, of the inconvenience of carrying the silver, when an exchange was became so irrisistibly fixed in his mind, that he remarked to the traveller—" You have a fine horse, sir."

Discourse and made, the stranger receiving bankable paper for his silver. It was not long after his departure, however, that the proprietor made another discovery—his four hundred dollars were counterfeit, and he had thus been investigated to the stranger receiving. This dye may be applied to the hair over night, turning the lightest RED or GREY HAIR to a bight jet black. Any proprietor made another discovery—his four hundred dollars were counterfeit, and he had thus been investigated to the skin, self-nice sharing the light of the skin in the light of the
