SELECTIONS for the FAMILY CIRCLE. GOVERNMENTAL OBSERVANCE

ARTIPICIAL CHICKEN HATCHING.--We notice in the English papers, that quite an improvement on the old plan of chicken hatching has been made by a Mr. Carlo Minasi, requiring much less attention to the machine during the process of incubation than formerly. This was the great ob-jection to all previously constructed hatch-ing machines. It may now go three days without attention; formerly it could be scarcely left three hours. This new incubator is a very simple contaivance, and gan, consequently, be constructed at about one-fourth of the expense formetly required. The practical results are equally satis-factory, for he states that the average number of birds produced is eighty out of every one hundred eggs. The necessary heat is obtained from a napths lamp, without a wick, which is so arranged that it may be left to itself for two or three days together, and yet the process of hatching goes on with due regularity and certainty. The eggs are placed on a series of tubes, through which a stream of hot water is, by means of the naptha lamp kept constantly flowing; and when the chicken comes, out of the shell, it is placed beneats the same tubes, which now perform the second duty of the artificial parent. After being kept OF THE SABBATH. The following copy of a Bill was sent to us by a member of the Canada Legislative Assembly, on which is the endorsement that it passed the second reading on the An Act to protect the Employers of the Government of this Province [Canada] in certain Departments of the Public Service, from being compelled to labour on the Lord's day. Whereas, It is the right of all men to re-frain from ordinary labour on Sunday, and experience hath shown that the habitual

experience hath shown that the habitual prosecution of such Sunday labour is in-jurious to the physical and moral well-being of man; and whereas, the denial of this right to a large class of meritorious persons in the employment of the Government, is unjust to those, persons and their families; And whereas, the habitual despatching and running of boats and stages with the public mails, and the opening of the locks on the canals, and the transaction of business at all the post effices throughout the country, on Sunday, is not only unjust to the ser-vants of Government, but has a tendency to lower the public morality, and to encou-rage the open disregard of an observance which it is alike the duty and the interest of all carefully to uphold; Be it therefore enacted, &c., as follows; 1. No post office in this Province shall

enacted, &c., as follows ; 1. No post office in this Province shall for be opened for the transaction of business on Sunday; nor shall any letter, paper, packet, or other mailed matter, be delivered for from any office on Sunday.

II. No mail shall be made up at or des-

11. No mail shall be made up at or despatched from any post office on Sunday. III. Any mail despatched from any point on Saturday, but which shall not have reached its destination by Sunday, shall be stopped and held over until Monday morning, at the first of the following places which it shall reach on Sunday, namely: Chatham, London, Hamilton, Toronto, Kingston, Montreal, Quebec, and River du Loup en bas.

IV. The locks on all the canals in this Province shall be closed from Saturday at midnight, until Sunday at midnight.

Mark THAT TRXT.—" Mark that text," said Richard Adkins, to his grandson Able, who was reading to him the 32d Pealm. "Mark that text, 'He that trusteth in the Lord, mercy shall compas him about.' I read it in my youth, and believed; and now I read it in my old age, thank God, I know it to be true. O, it is a blessed thing, in the midst of the sorrows of the world, Able, to trust in the Lord!"

to trust in the Lord!" CARDINAL WISEMAN ON LONGFELLOW.-

CARDINAL WISEMAN ON LONGFELLOW.— Cardinal Wiseman recoccently delivered a lecture in Lordon, on the "Home Educa-tion of the Poor," in the course of which he spoke as follows of our post Longiellow: "There is no greater lack," said the Car-dinal, "in English literature, than that of a poet of the people—of one who shall be to the labouring classes of England what Goethe is to the peasant of Germany. He was a true philosopher who said, 'Let me make the songs of a nation, and I care not who makes its laws.' There is one writer who approaches nearer than any other to

brother's death. It was a fine medicine, and if it couldn't cure him, nothing earthly could."—Neal's Eeight Years in Syris. Airtiricia. Cancers Harcmine.—We notice in the English papers, that quite an improvement on the old plan of chicken hatching has been made by a Mr. Carlos and batteries and armed them with ships' guns, but the range of the allies' artillery is sourcely left three hours. This was the great of ign nachines. It may now go three days without attention; formerly ft could be scarcely left three hours. This new incubator is a very simple conteristed hatch-ing machines. It may now go three days without attention; formerly ft could be scarcely left three hours. This new incubator is a very simple conteristed that a bout and ear, consequently be constructed at about an effort of the separes formerly required. The practical results are equally satis-factory, for he states that the average number of birds produced is eighty out of every one hundred eggs. The necessary heat is obtained from a naptha lamp, without a wick, which a stream of hot witer is, through which a stream of hot witer is, throug of the shell, it is placed beneath the same tubes, which now perform the second duty of the artificial parent. After being kept there the proper time, it is removed to a compartment, more suited to its increasing strength, and is ultimately placed in a pen in the open air. Mr. Carlo Minasi has not confined his operations to mere barndoor fowls, but has taken a flight into the regions of what may be termed scientific natural history, and displays, with satisfication, as a proof of his skill, a very healthy specimen of the barnacle goose, which is to be an addition to the Ornithological Society's collection in the Regent's Park. The en-thusiastic pursuit of his art does not allow Mr. Carlo Minasi to stop here, for his suc-cess has excited his ambition even to the incubation of the eggs of an estrich, which by a contrasticul. For the same of numeri-ty we must hope, that the defence will not be prolonged to desperation. Sebastopol is a town which contained before the war about 80,000 souls, including soldiers, sea-men, and dockyard workmen. A large portion of the town is built of wood, and, if the allies, are compelled to bombard it to extremity, it is possible that the whole place may be destroyed in a vast conflagration. Such a catastrophe, however just as a punishment upon the guilty authors of these terrible events, would involve such an enormous mass of human beings in destruc-tion, that we sincerely hope it may be pre-vented by a timely surrender. At present we know but little of the means of defence on which Prince Menschikoff may rely, but one of his expedients is of so tunusual and cuestionship of themeants of the subon which Prince Menschikoff may rely, but one of his expadients is of so unusual and questionable a character that it deserves notice. The French and English Admirals have reported to their respective Govern-ments, that on or before the 23rd of Sept. and immediately after the Battle of the Alma, the Russians took the singular deter-mination of sinking five "line-of-battle ships and two frights in eight or ten fathoms of water at the mouth of the harbour, so as to block up the passage. These vessels were sunk with all their guns and stores on board, and their rigging standing, insomuch that their topmatts were still visible above the water, and large quantities of ornament-tal woodwork and other light articles floated out of them, and have been picked up out-side. Considering that Prince Menschikoff is an Admiral and the Imperial Minister of Marine, that is a very unseamanilies use to make of his fleet; for not only has he sacri-fleed one-half of the Russian navy in the Black Sei, solely to provent our ships from entering the harbour, under the batteries, but by the same measure he has wholly precluded the rest of the fleet from going out, and the whole are thus doomed to in-glorious destruction. Admiral Dundas has allowed 1,000 Märines to land in order to join the operations of the army. There can be no reason now that the whole force Mr. Carlo Minasi to stop here, for his suc-cess has excited his ambition even to the incubation of the eggs of an ostrich, which he feels quite confident he could accomplish. Should it prove so, it would be advisable, before the time arrived to welcome the little long-legged stranger, to remaind the establishment of the old maxim, and the occasion on which it was used, of "Every one for himself," as the donkey said when he danced among the chickens—to prevent serious doings in that miniature poultry yard. The eggs are half embedded in sand, which is placed over the tubes, charged with hot water, so that it is an under heat which performs the hatching. Mr. Minasi informed us, that from being thus embedded, the same heat only as that of the hen is required; whereas, in incubators in which the eggs are not so embedded, the heat is obliged to be greater, from which the chickens suffer in strength. The naptha consumed during the three weeks of one of his expedients is of so unusual and

Marine, that is a vory unserimentike use to make of his fleet; for not only has he sacri-ficed one-half of the Russian navy in the Black Sei, solely to prevent our ships from entering the hargiour, under the batteries, but by the same measure he has wholly precluded the rest of the fleet from going out, and the whole are thus doomed to in-glorious destruction. Admiral Dundas has allowed 1,000 Märines to land in order to join the operations of the army. There can be no reason now that the whole force amounting to 2,500 men, should not do the same; for, by closing the entrance of the harbour and sinking half their ships the Russians have shown, that an engagement at sea is is imposible. It would seem from the present disposition of the allied forces consumed during the three weeks of incubation is about a gallon, which may be purchased for 3s. 6d.—*Poultry Chronice*. of NEWS BY THE ENGLISHMAIL. The Steamer Lady Lemarchant, arrived on Thursday evening, the brings the following: ma, in which the Russians were comletely routed, Allies lost 2000, Russians 4000. Private despatches have reached Vienna by telegraph, stating that the bombardment of Sebastopol commenced at daybreak on the 4th. The shower of shot and shell was terrific. It is said the Poles who form a portion of the garrison had revolted. Other despatches state upwards of a hun-dred heavy guns, and a quantity of siego material, were landed at Bala Clava on Cape Chersonese topol is not invested, and that the whole of the country morth of Sebastopol is now oracuated by the allied forces which lately passed through it. This inference is con-firmed by a remarkable, though somewhat obscire placed on the heights overlooking the town on the south side of the harbour of Sebastopol. The singe works were top greesing rapidly, and when completed would command the whole of the energy's posi-tions. town on the south side of the harbour of Sabastopol. The side works were pro-gressing rapidly, and when completed would command the whole of the enemy's posi-tions. Despatches from Constantinople state that whon the 3d, the batteries intended for the attack upon Schastopol were almost completed, and that the trenches had been advanced within fifteen hundred yards from the attack of the fortifications. The allied army had cut off the sources from which the town of Schustopol derived its supplies of water. The Russians, it was said, were prepared to sink the nine reseals of the line which set ramined to them. The allies expected to tarry the phace in a very short space of time? d'Longfellow.", STRIAM: Normens de Manical Stritt.-A dettes is thought mothing of hore umleus he resorts to violent remedies. Sebastopol, near a large firm, described on the maps as "Khuter Teazde-otar," The third division is slightly in the rear to the left, and the second and first divisions lean towards. Bala Clave, where head-quarters are established. The French are encamped in and about the latter place, but will, in time, take up their position on the extreme right. This day a Russian column issued from the town and the fourth division, under Sit Geo. Cathcart, advanced to meet it. The Russian then withdrew, with an evident view to entice the English under the range of their heavy cannons. The atteart retired on the ensury is laving doclined to accept battle. In consequence of this step of the Russians, the three other British divisions were ordered to advance, and they are still under arms. A great quantity of stores were burned this afternoon by the ensury. From the whole town is mall, and apparently deserted by the greater part of its inhubitants. It has a dreary appearance, unrelieved by the greater part of its inhubitants. It has a dreary appearance, unrelieved by which the forts and houses are constructed. Figures can be distinguished by the naked cy co at the outer forts. The landing of the singe trains at Bala Clava commenced yesterday, and will be

The landing of the siege trains at Bala Clava commenced yesterday, and will be energetically pursued. Before they can be brought to bear, at least four days will pass, Sebastopol will fall, it is expected in the highest quarters, before twelve days have elansed

highest quarters, before twelve days have elapsed. The generalship displayed by the allied commanders in storming the town was admirable. Every effort had been directed by the Russians to render the land. forts on the north side impregnable. So demoralized was the enemy after the defeat at Alma that not the slightest resistance was effored to the advance of the allies, although most favourable positions for harassing their march continually offered themselves. The rivers Belbek, Katcha and Cherneva ware undefended.

THE FLEETS IN THE BALTIC.

THE PLEETS IN THE BALFUC. No news of any interest has been receiv-ed from the Baltic during the last few days. The mail steamer Bulldog, which arrived at Dantzic on the Sth. reported that the greater portion of the fleet (all steamers), under the orders of Sir Charles Napier and Admiral Martin, were at anchor sear Revel. A part was cruising in the Gulf of Bothnia, and a number of ships were to sail to Indi-sund. No attack had been made; but the ships of the fleet on the way to England were under orders to wait at Kiel, &c., for further instructions.

THE NUMBERS ACTUALLY ENGAGED.

who approaches nearer than any other to this standard, and he has already gained such a hold on our hearts that it is almost unnecessary for me to mention his name. Our hemisphere cannot claim the honour of having brought him forth-but still he be-longs to us, for his works have become as household words wherever the English lanhousehold words wherever the English lan-guage is apoken. Asid, whether we are charmed by his imageay, or southed by his melodious versification, or elevated by the high moral teachings of his pure muse, or follow, with sympathizing hearts the wasderings of Exangeline, I am sure that all who hear, my voice will join with me in the tribute I desire to pay to the genius of Longfellow.

IPORTANT NEWS.

A Battle has been foughton the River Al-ma, in which the Russians were comletely routed, Allies lost 2000, Russians 4000.

AUSTRIA AND PRUSSIA

The Berlin Correspondents states that the Austrian note compels the Prussian Govern-ment to declare its intention, as to the mainment to declare its intention as to the main-tenance of the offensive and defensive alli-ance with Austria. The propositions of M. V. Manteuffel, intended to preserve a good understanding, not having been favourably received, he tendered his resignation, and left town on Friday last. He was re-call-ed, and returned yesterday evening. The King arrived this morning and presided at a council. All that has transpired respect-ing the delibertary King arrived this worming and presided at a council. All that has transpired respect-ing the deliberations is, that M. V. Man-touffel withdrew his resignation; that conci-liatory declarations are to be addressed to the Cabinet of Vienna; and that eventually Prhasis is to adopt a policy perfectly in ac-cordance, with that of Austria. Our pages to day record a series of military exploits by the English and French forces in the Crimes which will stand the test of comparison with the noblest and mestbuilling fests of which history make mention. Although more that a gammiton has passed away, since the British sol-

with the make mention. Although generation has passed away, since the disr, was engaged in a European long interval has not unnerred his me ned his provers. VARIETIES.

ABURDANCE or WHEAT.—The Richmond (Vir-ginia) Pointy Post speaks of the imminase amount of wheat new in the various railroad depois of that eity. One of them is, literally groating un-der the weight of its contents, and the writer thinks had saw enough to field the Rassian and allied troops for a twelvemonth." There are eight large mills in operation in that city, and two of themagring at least nices handred barrols each per day. It is mostly shipped, however, for the South American markets, where it is a favorite over all others. The climate does not sour it, and the secret is said to consist in packign it while it is hot. ABUNDANCE OF WHEAT .-- The Richmond (Vir

it while it is hot. It is suspected, says wit, that theCza rin-tends to make a collection of foreign beau-ties from far distant, regions. Already he is in possession of Bess Arabia, and holds Moll Davis by the skirt as a material guar-antee, then Moll is struggling hard to be re-leased. He, is, stretching his arm over Behring towards the fair Polly Nesia. At the same time there can be no doubt he wish-es to take. Mary Mortuum under his protec-tion. The Emperor is, in fact, a general tion. The Emperor is in fact, a general lover, and is ardently at tached to Polly Gamy. What says the empress to all this ?

A GREEK BLOCK FOR THE MONUMENT.— The government of Greece has forwarded to Washington a block of marble, taken from the Partlienon, in order "that it may serve to adorn, however humbly, the monu-ment destined to perpetuate the remem-brance of the great foundar of American independence." King Otho wrote to his minister as follows:—"As a proof of the gratitude of the nation towards the United States we order that this atone, with the gratitude of the nation towards the United States, we order that this stone, with the advice of the Superintendent of the Antiqui-ties, be taken from the ancient ruins of the Parthenon, and that on it be engraved a suitable inscription, which the Faculty of the University shall propose."

Who was Richard just before he was himself again ?"

The man who took the will for the dee discovers he made a poor exchange,

"What a pity, mamma, that papa wore his best coat to day!" Why, my dear?" "Why, because that ill-natured Mr. Crab-stock did nothing but pick holes in it."

Whatever might be said of , women's right to vode and legislate, their right to bear arms is pronounced to be unquestionable.

AN EXTRAORDINARY AND RAPID CURE OF ERTSIPELAS IN THE LEG, AFTER

MEDICAL AID HAD FAILED.

DREADFULLY DISEASED ANCLE CURED AFTER BEING GIVEN UP BY THE FACULTY, AT MALTA AND PORTSMOUTH HOSPITALS

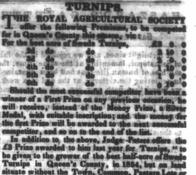

AT MALTA AND FORTSMOUTH HOSPITALS. The following important communication has been for-warded to Professor Holloway for publication, by, Mr. B. Dizon, Chemist, Kinger, et., Norwich. Copy of a Letter from Captain Smith, of Great Karmoulk, dated January 19th, 1868. To Mr. DIZON, Dear Sir,—I send you, the particulars of a cure effected by Professor. Holloway's invaluable medi-cines.—Mr. John Walton, late in Her Majesty's Ser-vice, in the British Fleet at Malta, had a very had alcorated anole, and after having been in the Malta Hospital for six months, was sent to England as an invalid to Partsmouth Hospital, where he remained an inmate four months, there, as at Malta, refusing to have the limb amputated, he was turned out incar-able. He then came to Yarmouth, and was under a medical gentleman. for about three months, but his angle became so much worse that all hope wes.lost. At this period, by any advice, the tried Holloway's Omment and Film, which, by anremitted application, healed, all the ulcers, and restered him is perfect health and atrength.

aalth and strength. I remain, Dear Sir, yours very truly, (Signed) JOHN SMITH. Albert Hotel, Great Yarmonth.

SURPRISING CURE OF A BAD BREAST, NER-VOUS DEBILITY, AND GENERAL ILL

BEALTH. Copy of a Letter from Mr. T. F. Eer, Chemist, &c., Lower Moss-lane, Manchester, dated February 12th, 1898.

\$c., Lower Moss-lene, Manchester, data Pebruary 12th, 1858.
For Professor HOLLOWAY,
Dear Sir,—T have geest pleasure in forwarding to, you the particulars of a very extraordinary cure of a bid breast, effected solely by the use of your celes, beted Ontiment and Pills. Mr Martha Bell, of Pitt-street, in this town, had been for a considerable time inboring under nervous debility, loss of apputite, and general 'lif health, occursioned by ulcerated wounds in the breast. She had had much experience in the ine of all the known remedies for the care of ulcers, but withenia any beeneficial result; in fact whe hid nearly less all faith and hops of a cure being effected. In this distribution of a provide the sole of body and mind, she was persunded to have recourse to your invaluable Ointmeat and Pills, which also immediately did, and a the gourse of a very short time the effect produced was most antenishing; her apputies was speedily improved, and the seres and ulcers in the breast gradually healed, and the nervous excitament of her system was wholly removed. Transin dear Sir, yours faithfully, (Kingso) T. FORSTER, KER.

Turnips in General County, in 1864, but on Jane situate without the Town, Common, Peature Lote or Royalty of Charlotterows; the person gaining the Prize not to be provented from compasing for and toceiving any other Prize offered for Sweds Thranips by the Society. TAMITILLE THILDEV, THERE has long existed a public domain for an effective purgetry pill which could be relied on as use and perfectly active in its operation. This has been propared to meet that domaind, and an exten-sive trial of its writtens has conclusively shown with which success it accommissions the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills-one which should have one of the objections, but all these advantages, of very other. This has been attempted here, and with what encours would respectively shown to the public decision. It has been unfortunate for the public decision. This been unfortunate for the public decision. This been unfortunate for the public decision and irritation to the low-edit, this is not. Many of them produce so much gripping pith and triables on a irritation is pinn-maless. It arise from a previously expecting parti-them. These pills produce as irritation is pinn-uless, it arise from a previously expecting output the action for a previously expected more than comber taking the the triation is pinn-them. These pills produce as irritations are pinn-them. These pills produce the interviewed of the ac-particles in both and and the produce so much grantity, but it is before that any mediations should be taken pindisonaly. Minute directions the arise and the ascent discussion to which they are an op-pinchiag are given on the both. Among the com-plicable are given on the both.
