The copy filmed here has been reproduced thanks to the generosity of:

D. B. Weldon Library
University of Western Ontario
(Regional History Room)

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library
University of Western Ontario
(Regional History Room)

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

THE LITTLE WONDER

This Hot Water Boiler

TAKES THE ABOVE
NAME FOR THE
FOLLOWING
REASONS.

1st. It is the smallest Hot Water Boiler in the market, of equal capacity.

2nd. It is the wonder of all who see it that such a small boiler, using such a small quantity of fuel, should heat such a large space, and get up heat so quickly.

3rd. All practical observers wonder at such an efficient, neat, and durable hot water heating system being supplied at such small cost.

This small folder does not admit of many illustrations, nor of particular descriptions, but a pamphlet fully illustrated will be supplied on application.

Gentlemen,—Your Hot Water Heater put into our Waiting-room and Offices by your agent, Mr. McEwen of this city, has given good satisfaction and has performed all you claimed for it. Our Waiting-room and Offices have been very comfortable even in the most severe weather, and the consumption of coal has been very moderate in consideration of the space heated. We consider it a very economical, safe, easy to manage and an efficient mode of heating.

Yours truly,

A. J. NELLES,
Manager of the H. G. & B. Elec. Ry.

The Little Wonder boiler you put in my green house last fall kept the house warm all winter and I like it very much. The boiler was very easily attended to.

Please find enclosed cheque for \$125 in payment in full of your boiler and connections. The heater (Little Wonder) has given me greater heat than I expected, the fact is the return pipes seem to give as much heat as the feed, and must say I am more than pleased with the heating of my store; have fully 50 per cent. more heat than I had before with two coal stoves and also two gas stoves. Send any one you choose for reference.

Yours respectfully,

A. BOLLARD

The McEachren Heating and Ventilating Co.

Gentlemen,—Your No. 2 Heater gave entire satisfaction last winter, being easily managed, free from dust, very economical in fuel, and, above all, free from that unpleasant dry atmosphere usually found where heating by hot air furnaces is in use. In fact, we never had a comfortable house all through before.

Yours respectfully,

JOHN J. COWAN,
202 Crawford St.

Rochester, N.Y., May 11th, 1897.

The McEachren Heating and Ventilating Co.

Dear Sirs,—Yours of May 8th received. Our "Little Wonder" No. 3 has proved itself a very efficient and complete heater, fulfilling our expectations. The fire is still burning. One of its excellent qualities is its ability to hold a low fire, just taking the chill and dampness from the rooms. We have burned less than $6\frac{1}{2}$ tons of coal heating a twelve room house. There has been considerable enquiry about the heater here.

Respectfully yours,
GEO. A. BENTON.

The hot water boiler (Little Wonder) you put in my house last fall has given me entire satisfaction. It is very simple and easily seen to. My boy or girl of eleven and twelve years of age can see to it. If time and space would permit I could fill a dozen letters about the good qualities of your heating system.

I remain, yours respectfully,
ISAAC BULGER,
29 Henry St., Toronto.
