## Six Cups for One Cent

Each pound of Blue Ribbon Tea will make about 250 cups of the richest, finest flavored tea you ever drank, which is at the rate of six cups for a cent.

Not a very dear drink, is it? In fact the most Economical tea you could use is

## BlueRibbon

Besides, no other tea has the fine rich Flavor which has made Blue Ribbon Tea so popular all over the West.

People using it for the first time should remember that Blue Ribbon Tea is much Stronger and Richer than other teas, and should put less in the pot.

[^0]"The very best results in tea making are to be obtained first by purchasing good tea, and let me say to my readers that whatever bargain catalogucs may say to the contrary, it is not possible to buy good pure tea for less than 40 cents per pound retail, and it is much safer to pay 50 cents to a reliable dealer." ---Woman's Quiet Hour department, Western Home Monthly

## The <br> Naval <br> Scare

England has been for centuries the mistress of the seas enturies to come what the people of the tight little island say. That is what we in the greater empire af firm with equal confidence. There may be an anti-Brtish alliance but the and which stands for freedom will see that free man who accepts the shelter of the good old flag. man who accepts the shelter is lip loyalty, this of ours. We are not part of the Empire by compulsion, but from choice. We are not subjects of England's king, but of the King of Greater Britain. He belongs to Canada just as surely as to the mother land What price shall we pay because we are mem
bers of the greater family? We shall give our bers of the greater family? We shall give our love and devotion, all our means and talents. our ears, we shall gladly lay down our lives for the cause we stand for in this big world. It will not be the first time that we have joined hands with our mother Maybe it will not be the last. Of course, there is no rumor of war just now, but everybody knows what might happen if the Empire cease against possible encroachments. protect itself against possible encroachments.
What is Canada's dutv? That is the first question to answer. Shall she furnish a Dreadnought? Shall she say to the world that the Empire is one and must not be divided. Most certainly, she must take this stand. No wishywashy platitudes as to willingness to perform will take the place of bold, outstanding action.
The world must know that in reckoning with The world must know that in reckoning with England she must reckon with her greatest son. It were base ingratitude and rank disloyalty for sity - for surely it is necessary to give to the

## Making

Canadians
There is a second thing Canada must do and do speed-
ily, and that is to Canadianize ily, and that is to Canadianize
the foreign speaking peoples. the foreign speaking peoples.
We must have a care to our We must have a care to our
immigration. We must exclude immigration. We must exclude
the undesirables. We must make room only for those who are willing to become thorough Canadians. A
Frenchman or German or Pole, a Scandinavian or Russ or Italian on coming to our broad
or prairies must forget the past and become a loyal citizen in the land he has adopted as his ome and the home of his children. We tho not want
a single soul who is yearning for the affiliations a single soul who is yearning for the annations
of past years. Even if belonging to a national of past years. Even if belonging to a na of his
society makes one less loyal to the land of adoption, he must forego that pleasure.
The churches, the schools and the press must join in the effort to Canadianize all those who come to dwell amongst us. If we admit a soul within our borders we must extend to him all the privileges of citizenship,- this so soon as he
loyally accepts the standing of citizen, and so loyally accepts the standing of citizen, and so
soon as he can intelligently exercise the funcsoon as he can intelligently exercise the func-
tions which he must perform. As it is now, we are accepting too many who will never be good
Canadians, and we are extending to them citi-
zens' rights, while they are as yet enemies at eart to all that is Canadian.
Again let it be said that we do not compel people to seek a home here. If they come of their own accord it must be on the understanding that they are loyal to our ideals and out institutions. Affiliation with Britain is part of the game. If any man does not like the game he need not play it That is all.

## Compulsory <br> Education

The assimilation of the forign born population suggests must stand for the unification of all races, creeds and classes and ralty for Care all its pupils anadian laws. That these ends may be accom school. This at the present time is a national necessity.
It is held by some that the individual and the family have sacred rights and that these must that the state has rights which are just as this is that the state has rights which are just as sacred
as those of the family or the individual. One of these rights is that of protecting itself against ignorance, vice and crime; another right is that of insisting upon the elimination of everything that makes for national disintegration. It is not difficult for any one to see that these rights cannot be guaranteed without compulsory education. it is not right hat any section of the community should grow up apart from the rest of
the state, in isolation and with totally different the state, in isolation and with totally differen
ideals. Yet the immigation policy of Canada has been so mismanaged that this is the ver condition of things in the Canadian West. It is altogether unfair that the Dominion authorities should heap up trouble for the provinces fy hiving the nationalities. The problem of education is almost insuperable. Yet each province must face the problem with a determination to against the bunching of kindred people in large areas: and let the second be an insistence upon areas; and let the second be an insistence upon
compulsory education. It is absurd for any public man to boast of his patriotism if he neg lects to exercise the most potent means of making the citizens patriotic.

## You're <br> Another

 Talking of legislature leads us to reffect upon the conductof our public men in transacting the affairs of state. That passage of words between the leader of the government and a leading member of the opposition last month on the floor of the Commons was about as humiliating a pectacle as could be imagined. Surely we have had enough of partisan politics, and jockeying
for position. A member of the House has no right to make veiled insinuations against the right to make veiled insinuations against the
leader of the government. He has a nerfect right to make a definite charge and to dema 1 an investigation. And the government has no right to deny the right to investigate. On the other hand, a member of the government side,
whether it be the Prime Minister or one of his

## Public <br> Play <br> Grounds

It is well that play is no confined to young men. It is larly is it a necessity fartict dren. It is pleasing to no play an agounds is being put forth Winnipeg who have Mothers' Association o Winnipeg who have enlisted the sympathies : children now run wild on the streets, withou direction and without care. With a system public play grounds these would all be unde supervision, and they would be provided with al necessary tools and apparatus. In other word they would be educated to right habits, trained in good manners, and prevented from acquiring that knowledge' of sin and crime which is often
the possession of the street-trained urchin the possession of the street-trained urchin.
Why not have supervised play ground every city and town? It must be remembered that play is neither good nor bad. The method of plav determines its value. Supervision. is
everything. The best police officer have is a strong, clean supervisor of sports.

## Have a Common-Sense Kitchen

 for-of-the-house, do you half realize what toilsome drudgery it is for the women-folks to get the meals in your kitchen without a Chatham Kitchen Cabinet? It is about as up-to-date as if you cultivated your crops entirely with the hoe, instead of the cultivator; as if you mowed your grain with a scythe, instead of a self-binder ; as if you threshed with a flail, instead of a threshing-machine. You see to it that the farm work is done by modern methods, with labor-saving tools. Outfit your kitchen with this labor-saver-give the wife what rest and ease you can buy her,kitchen work is hard enough at its easiest. This greatest kitchen convenience makes it far, far easier.
## Look at it in The Picture

SHOW this advt. to your wife. Ask her what it would mean to have a cabinet that held everything used in cooking,-focussed the whole kitchen-battery in one spot, right in easy reach of a woman seated, instead of making that woman trot from pantry to cupboard, from cupboard to table, from pot-closet to range, back and forth a hundred times a day. The Chatham Cabinet saves, easily, five hundred steps a day in any kitchen ; and the kitchen is easier kept tidy, gets rid of endless clutter, and the foodstuffs are kept in far better shape and wasted less. Isn't it worth while to save the women-folk 150 miles of needless kitchen walking in a year? This cabinet does just that.

## The Mother of the Island.

By KATHERINE HOLLAND BROWN.

"'Me, I Hear Her Cry, and I Cobme Quick

HEER from the ice-
mailed lake below rose the Island, a white cliffe of soli-snow-piled, mounting steep on steep. No breath of wind
stirred the laden stirred the laden ivory forest; no lisp of surf nor mur-
mur of pines broke that enchanted peace. And yet, as we climbed the last wide, gleaming edge, beyond the old Fort hill, there lilted up through the crystalline air a fleeting call of
melody. A woman's voice, from the tiny, red-roofed cabin nested below the cliff, singing, in hushed content, soft, slow lullaby. Through the quaint, halting rhyme there echoed a plaintive Celtic pathos; yet past it
thrilled the higher, truer harmony of its mother-joy. I leaned at the brink to hear. And as the song loitered on, unknowingly twisted the tender alien words into our harsher speech:
"Rest, little Son of my heart! Rest little Love of my day. Quiet, my wood-pigeon, shut thy Hush, my willful one, still thy cries. Ah, little Son, thou must sleep,
must sleep!
Ah, little Son, do not stay!
"Dream, little Joy, on my breast. Dream, little Prince, of thy play. and cry, Soon comes the flight for thy eagle-

## Why Christie's Biscuits are the best

GOOD BISCUITS are made by more than one or two manufacturers, and can be baked from any one of a few excellent brands of flour, but the Christie way is different.

The best millers in Canada ship us samples of their flour twice a year, or oftener. We test the samples and select the best brands for our purpose.

We blend the brands which we have proved bestkeep on blending and testing by actual baking until we get a dough good enough to sustain, or better, the Christie reputation.

Every ounce of raw material is carefully analysed before it can pass into the mixing room.

The best sugar, pure, fresh creamery butter, new sweet milk and delicious cream-these pure ingredients mixed with our blend of flour, in the Christie scientific way, yields that delightful, appetising crispness and delicate flavor which has made

## Entertainment is the first requisite of hospitality

A guest either enjoys himself or is bored. The Edison Phonograph is an infallible ice-breaker. It brings people together, opens up conversation, paves the way to enjoyment, and in itself furnishes the entertainment for the evening.

Anyone can operate an Edison Phonograph. Anyone can buy one. The cost is small, and many dealers sell on the easy-payment plan. There is a long list of attractive selections from which to choose.

## Edison Amberol Records

Mr. Edison has perfected a new invention for the Edison Phonograph-Amberol Records. These are fourminute Records, playing twice as long as the regular Edison Records, and can be played on any Edison Phonograph (except the Gem) by means of an attachment which any dealer can supply and which will not interfere with playing the Records you now have.

Mr . Jenkins looked at the clock. Then his eyes went of pity to a woman sitting on glance of pity to a woman sitting on

over her chest. She had sunken cheeks and hollow eyes; her oheekFor two hours she had sat there; almost motionless. Three times she strained gaze upon Mr. Jenkins and asked: "D'yuh want to shet up yet?"
Each time, receiving an answer in the Each time, receiving ank back into the

window-panes. The wind howled window-panes. The wind howled
around corners, banged loose shutters, creaked swinging sign-boards to
and fro, and vexed the telephone wires to a shrill, continuous scream-
ing. Fierce gusts swept in when the door was opened.
Christmas shoppers came and went. The woman saw nothing inside the doors of a brightly-lighted saloon across the street.
It was a small, new "boom" town on every corner, and a brass band in every saloon. The "establishment", opposite was having its, "opening"
that night. "At home" cards in desirable patrons during the previous week. That day, during an hour's sunshine, a yellow chariot, drawn by six cream-colored horses with snowwhite manes and tails, had gone
slowly through the streets, bearing the members of the band clad in
white and gold. It was followed by three open carriages, gay with the actresses who were to dance and sing
that night on the stage in the rear of the saloon. All had yellow hair and were dressed in yellow with white
silk sashes, and white ostrich plumes
falling to their shoulders. It was, a
gorgeous procession gorgeous procession and it "drew."
The woman lived out in the Grand View addition. The addition consisted mainly of cabins built of "shakes"
and charred stumps. The grand view and charred stumps. The grand view
was to come ten or twenty years was to come ten or twenty years
later on, when the forests surrounding the addition had taken their departure. It was a full mile from the She had walked in with her husband, through the rain and slush,
after putting six small children to atter putting six small children to

they couldn't get credit for "two bits" they couldn't get credit
except at the saloons. A relative had sent the woman ten dollars for a Christmas gift. She had gone wild with joy. Ten dollars! It
was wealth. For once the childrén was wealth. For once the children
should have a real Christmas-a good should have a real Christmas a good
dinner, toys, and candy! Of all things, there should be a wax doll one every Christmas, and never even had one in her arms. Just for this one time they should be happy-like
other children; and she should be happy in their happiness-like other mothers. What did it matter that she had only two calico dresses and
one pair of shoes, half soled, at that, and capped across the toes?
Her husband had entered into her childish joy. He was kind and affec-
tionate-when he was sober. That was why she had never had the heart to leave him. He was one of those men who are always needing, plead-
ing for-and, alas! receiving-foring for-and, alas! receiving-for-
giveness; one of those men whom their women love passionately and cling to forever.
He promised
He promised her solemnly that he would not drink a drop that Christ-
mas-so solemnly that she believed him. He had helped her to wash the dishes and put the children to bed. And he had kissed her
Her face had been radiant when That poor, gray face, with ifs sunken cheeks and eyes! They bought a turkey-and with what anxious care she had selected it-testing its tenderness, balancing it on her bony

good-humoredly, with his hands in good-humoredly, with his hands in

## FENCE TALK No. 4

Before you buy any fence-even Page Fence-make it prove up its value. Then you'll know what you're getting. Test it two ways, thus;
Have the dealer cut for you, before your eyes, a piece of hori zontal wire from the roll of Page fence and any other fence Now for the fire-test. Heat both pieces cherry-red; cool them in cold water, and start to bend them.
The Page wire will have taken such a temper that after break"ing off a piece the fresh end will cut glass-because it is "high-carbon" steel that takes a temper. That proves its toughness, its hardness, its power to stretch farther, stay tighter, and sag never.
The other wire will bend like copper wire-because it is only hard drawn steel, that won't take a temper. That shows it up as soft, weak-breaks at 1,800 lbs. compared with Page wire that stands 2,400 lbs. tensile strain. Shows it up, too, as sure to
sag, hard to make tight, certain to give out sooner by far sag, hard to make tight, certain to give out sooner by far. And then the eye-test-look at the locks of the other fence Have the man give you one to cut apart. Study it where the wires cross; look for marred surface where the cross comesthat means weakness. Then look at the cut-apart Page lockpositive, cannot slip a little bit, shows no sign of squeezing or pinching.
Look, too, that the running wires are wavy enough to allow amply for expansion and contraction-as the Page does.
Last, the third test-the cost-test. A Page Fence stands up and stands tight on two posts to any other fence's three. Figure the fence-posts saved, digging labor saved, and the time saved in putting up the fence.
Apply every test-and you will choose Page Fence every time. Send now for valuable free book that teaches how to make sure of fence value before you buy. Write for it to the Page Wire Fence Co., Utd., Walkerville, Toronto, Montreal, St. John Vancouver, Victoria, and find out why.

Eastview, Sask., March 12, 1909. Editor.-I have been a very interested reader of your magazine for some
months past and although not a suj) months past and although not a suis-
scriber as yet, I must say I admire your paper very much. I I enjoy reaming your correspondence columns, and think
some of the young ladies write letters some of the young ladies write letters
that should inspire some of the bache-
lors of this lors of this glorious West to do some-
thing desperate. thing desperate. It is quite noticeable that the matri-
monial question seems to have prominent part and I suppose that
question question is foremost in the minds of
most young people. I have been amuse at what some of the young men wish their better half, shall I say, to be;
some want a young lady that can cook, some want a young lady that can cook
some want one that can do the chores
outside outside, and so on, until the end of the
chapter. Now, as a young man, $I$ do not think that these qualifications should be our first consideration; we
should place character above thes petty trifies, as it were. A goo sen-
sible lady will adapt herself to her surroundings
happy. Some of the bachelors, husa's life do not take very kindly to the school ma'ams. Well, I must say, that some about were members of that profession ing to learn, they should not make as good a helpmate as even the farmbelles, well, there are good and bad. I
must confess I, for one, would leave them severely alone; perhaps I may country lassies, well, the majority of them are, daisies. ing the question, who this time be askI am a young farmer, was just old
enough to vote a little over a year ago.
I am not big, nor yet am I small; just medium. As to looks, well, the young ladies that I have become intimate with say I am good looking. We will let
them be the judges. I have no bad habits, neither use tobacco in any form, nor drink, being a total abstainer. of myself. I would be very pleased if any young
lady between the ages of 18 and 24 would write to me for pastime and the
pleasure of it. $I$ would like you to write first, as I am very shy. My address is with the editor. If "School
Peggy," of the January number, would write I would deem it a pleasure to
answer. Hoping this will find space in answer. Hoping this will find space in
the column, I will now close, wishing the column, I will now cl.
your paper every success. A Ohance for "Che Preacher,"
London, Ont., March 11, 1990 Eaditor.-While glancing over your 1909. magazine I came across your paage of
correspondence. Well, I declare if sor of the letters. weren't too comical for
anything. I stood grinning for a long time, then the idea struck me that r'd like to write too. I like your magazine very much. I have al-
ways lived in Canada; I just love it. I Wive in such a pretty ilttle city, so clean and well looked arter. We have some-
thing like 50,000 inhabitants. Well, to come down to myself, I belong to the bookbindery tribe; am 17
years old and am not of the marrying kind. I love church, always sit in the music, corner." I am intensely fond of
worke, nature and church work. I am well built, 5 feet 5 inches
in height, rather stout, weigh $1251 /{ }^{2}$. pounds, merry blue eyes, weath of
dark brown hair, full face, end attogether not a bad looking creature when
all decked out. I am a genius at cooking; you can play croquet with my tea
blscuits (so hard); fine housekeep etc. I would like to correspond with
"The Preacher" or some young man who will describe the city In which he dwells and other things of
value. Hoping to see this letter in value. Hoping to see this letter
print and to hear from "The Preacher."

tenfed among the jolly ones) what the lonely bachelors think of me. As I see it is the rule to describe he's seli, and must follow the rule, eyes, jug nose (now don't laugh), am feet 7 inches in height, weight am some, all but my considered very hand-
face-am a beauty, of course, and 19 years old. Well what do you think of me? But I must aliso have lived both in the city and in the country so I have experience of both, an ride a horse or drive a team, even
if they are a little gay. Well, about cooking, I won't say muych, but I have not killed anyone yet. I am right in in all kinds of sports, very fond of
skating and dancing and in fact like to have a good time. Have a fairly good ducation. I am fond of letter writing so if any of the boys or girls would
care to write to me my address will be with the editor. I won't write first for am a little shy, but will answer al past so my only chance now is if some good looking young man between 19

Editor．－I have been an interested reader of your oharming paper for the
past ten years and will say that $I$ warmly admire the space you give
wherein to air our views on the matri－ wherein to air our views on the matri－
mony question．A great many men and mony question．A great many men and
women gaze fearfully into the abyss
with with the result that they arrive at the
ripe old age unmarried rather than ripe old age unmarried rather than
intermingle with the rival of their sex． Some women detest the thought of
staying on a homestead but if she is staying on a homestead but if she is
the right kind of a woman she would not hesitate an instant if she cared
anything for her partner in fife．The main thing is to cultivate a liking for
one another and do not be too hasty one another and do not be too hasty
in judging．Perhaps your wife has not in judging．Perhaps your wife has not
gained perfection yet；in that case，if
we gained perfection yet；in that case，if
we take a look into our own hearts
we may find faults we may find faults there also．The

house well in hand seldom passes a house well in hand seldom passes a
lonesome hour for time does not hang heavily on her shoulders．True virtue
and uprightness of thought and conduct and uprightness of thought and conduct
soon manifest themselves in the few possessed of such inestimable treasures． Give me the woman who admires the beautiful fields and flowers，the balmy
winds，the sunlit skies and the birds songs，bubbling up to heaven from the
summer woods，and not the gaily de－ summer woods，and not the gally de－
corated ball room and fashionalle soo
ciety ciety meetings．Nothing is gaine by all night．Nature will assert her claim
and rebel against any encroachment up－ and rebel against any encroachment up－
on her rights，which in time leads to disaster and disease
My ideal woman should be tall，fairly
stout and dark，with brown eyes．She stout and dark，with brown eyes．She
must also be musical，well educated and sensible，a good cook，fond of sport，
and willing to help in time of need． She must not be déceitful，or flirt，or
red－headed，but it would undoubtedly be hard to get one to correspond with
all those notions． all those notions．

> My Creed.

If any little word of mine
Can make one life the brighter； If any little song of mine God help me speak that little wor And take my bit of singing，
And drop it in some lonely vale， To set the echoes ringing

Can make little ofe mine Can make one life the sweeter； Thy little help may ease The burden of another， God give me love and care and strength
To help along each other．

Can make some workt of mine Can make some work the mine f any cheery smile of mine Can make its brightness longer When let me speak that thought today
With tender eyes a－glowing So God may grant some weary on
Shall reap from my glad sow

The Pralm of 工ife
Tell me not in mournful numbers， For the soul is dead that slumbers， and things are not what they seem
ife is real！Life is earnest！ And the grave is not its goal；
＂Dust thou art．to dust returnest，＂

Not enjoyment and not sorm
is our destined end or way； But to act，that each tomorrow
Finds us farther than today．

Art is long，and Time is fleetin Still，like murts though stout and brav Funeral marches to the gre beating

In the world＇s broad field of battle， Be not like dumb，driven cattle！ Be a hero in the strife！
Trust no puture，howe＇er pleasant！ Aet the dead Past bury Its dead！ Heart within，and God o＇erhead！
Lives of great men all remind us And，departing，our lives sublime
Footsteps behind us

Footsteps，that perhaps another，
Sailing o $o$＇er life＇s solemn main A forlorn and shipwrecked main，

Let us，then，be up and doing With a heart for any fate；
Still achieving，still pursuing Still achieving，still pursuing；
Learn to labor and to wait

It is pleasing to note that the mus- $~$ province. The Festival will conclude ical festival held under the auspices of the Winnipeg Oratorio Society at the Walker Theatre on April 19, 20
and 21 was an enormous success. Al six concerts were enjoyed by crowded houses and it was a matter of regret
that the Minneapolis Sympor that the Minneapolis Symphony Or-
chestra could not have made a longer stay. Quite possibly next year they will as doubtless it is Mr. Walker's intention to have annual visits from this gifted organization. "The Melt play, was the principal dramatic greates ing at the Walker last month, but there were a number of other good attractions, notably Marie Hall, the gifted English violinist who gave two
well-attended recitals on With the possible exception of Ku belik, she is undoubtedly the most talented violinist ever heard in West-
ern Canada. ern Canada.

The Saskatchewan Musical Festival Association was founded during the
summer of 1908 and was the outcome summer of 1908 and was the outcome
of a desire strongly expressed toward of a desire strongly expressed toward
the cultivation and improvement of music, and more particularly in chora
music and choir singing. This object it is felt, is best obtained by the meet ing together of those interested, in competition, as by the measuring of
one choir against another one choir against another one is best
enabled to perceive the proficiencies of each. Germany has long had its "Sängerfest"; France, its "Concours" Wales, its "Eistedfodd"; Scotland, it
"Mod"; England, its "Festival Com Fetitions," and by the incentive re cently given by His Excellency the present Governor General, Canada is now anxious and ready to follow the
example so bountifully set $T$ this end the above Association has set its hand to the institution of this Festival and it hopes that by the careful preartistic performance. Further and it is hoped that by the preparation o larger choral works each competing unit, coming as it may do from our couraged in the establishment of enchoral societies, a result that might take long years to materialize. Lastly, by combining these societies at the be given in our provinces of hearing be given in our provinces of hearing
the best choral works with a number of voices only to be attained otherwise in the very largest centres population. The festival will be held
this year on May 24 he this year on May $24,25,26$,

Florence Roberts appeared at the Opera House, Portage la Prairie, on Obermer's play, "The House of Bond age." The piece is of English authorship and locale, but hits a theme of throughout in brilliant dialogue and absorbing situations. The names of Thurlow Bergen, Hallet Bosworth, Harry Gibbs, Ann Warrington and Mary Bertrand appear on the support
ing cast. Under the direction of John Cort, the \%usual attractive Roberts production was furnished.
A highly successful concert wa given at Brandon on April 25 th when

## Greatest Eruption.

Will you state for me which was the greatest volcanic eruption ever rehistory. I have had a strong dispute on the subject, and would like it settled?-K. R. S., Selkirk, Man. Ans.-Perhaps the most remarkable
volcanic eruption known was that volcanic eruption known was that
which took place in August, 1883, at which took place in August, Stand of Krakatoa, in the Straits of Sunda. Streams of volcanic dust were thrown seventeen miles high, and
more than a cubic mile of material more than a cubic mile of materia
was expelled from the volcanic crater The air wayes started by the eruption Travelled around the earth seven times. The noise was heard at Macassa, 969
miles away; at Borneo, 1,116 miles miles away; at Borneo, 1,116 miles
distant; in West Australia, 1,700 miles away, and even at Rodagues, distant more than 2,900 miles. The dust and powdered pumice thrown out of the
crater made the entire circuit of the crater made the entire circuit of the

Compulsory wome of my readers
Education has to do with a quiet of the things that I Well it is one woman that reads this column to ponder on and to ponder deeply. A large end representative gathering of teachcrions in Winnipeg and has passed a strongly worded resolution in favor of immediate action along the line of the course of the arguments pro and the course of the arguments pro and
con, on this resolution many instances were brought to light in which the foreign children coming to this country were growing up absolutely withlanguage. I want every woman to consider what this means to her own ramily. Our foreign population is multipiying at a much higher rate than our lish speaking immigrants of a high type we have a larger percentage of those who are distinctly of lower standard of education if not of lower intelligence, when they arrive in our
country. The children of such people growing up, with all the political and civic privileges of native-born men,
are not in any sense being prepared are not in any sense being prepared
to make use of these privileges according to the highest standard ofcord-Anglo-Saxon race. In a few years they will wield an immense influence
in elections numerically and can we in elections numerically and can we wield a good influence. Almost the
first lesson which our own ardent party politician teaches our foreign immigrants. (and the shame of it is
that it is true) is that the vote which that it is true) is that the vote which,
he can exercise after a three years' residence in Canada is something
which he can sell. When the foreign which he can sell. When the foreign-
ers in numbers have votes are they ers in numbers have votes are they
likely, after such tutelage, to use them for the best interests of the country, or for the seeming best interests of
their own pockets? It will be natural to retort that such things being true education should begin with our poli-
ticians and they should be compelled ticians and they should be compelled
to learn better and more, honest
methods. That is quite true but coes not do away, with the need, the
crying need for compulsory education crying need for compulsory education
for the young. While many of our party politicians are corrupt our
unscrupulous there is always, thank God, a great leaven of righteous men who regard their vote as a sacred
trust and as far as our trust and as far as our own people
are concerned they are a safeguard to our laws, but they will be outnumbered in the coming wears if we continue to receive foreigners in the same ratio as we have been doing
in the past five years. It is not That the non-English speaking for (igner needs education in our public
schools butt the American foreigner needs it, almost, if not quite as bad-
ly, if he is ever to be moulded into
a loyal Canadian British subject, and if Americans then it would have been infinitely betcd them. Women will ask "What can we do? we have no votes for mem-
bers of parliament so that we cannot directly assist in putting men into
power who are in favor of sower who, are in favor of compul-
sotion?" That is quite true has that is should be so, but youn can
talk up the question in your district, you can help to vote for men as anool trustees who are in favor or
an act along these lines and who will
be ready and every scrap of authority to exercise
the matter of have in the matter of getting children of the

ter yourself, you can make a friend
of the teacher and find out how he
or she stands on this question. In 95 or she stands on this question. In 95
cases out of 100 you will find the teacher in favor of compulsory education, and if the teacher is not in
favor of it, then rest yourself assured favor of it, then rest yourself assured
there is something wrong with the there is something wrong with the
teacher. Above all things you can make a resolution, and live up to it, that so far as. it is humanly possible your own children shall attend school
and attend it regularly. and attend it regularly carried out without self sacrifice know that right well, but there are wo incentives to that sacrifice that hould help to lighten it, one is the
good of your own children and the good of your own children and
other is the good of your country. Once more I utter an invitation to write to this column on this or any ther matter that interests you, or
that is of public benefit. I notice con that is of public benefit. I notice con-
stantly that the weekly papers are literally deluged with letters from women on subjects they have at heart, tell your a little for example, let me ingle weekly paper in the is not a West that reaches anything like the number of homes that is reached once month, by the "Western Home papers come more frequently and yout do not have to wait so long to see your letter in print, but as a magazine s a less ephemeral form of literature

## Foley's <br> PREMIER SODAS

ODAS are made almost entirely of flour and lard. These are two of the principal and most valuable food-elements.

Now a perfect flour and a pure lard combined c iot be surpassed in nourishing value and you get this combination in its most satisfying and most delightful form in Foley's Sodas.

The flour used in them is specially ground and prepared for the one purpose-that of producing the lightest, creamiest, most delieious sodas that are sold in Canada. Extreme care is taken also in the purchase and inspection of all lard used. Every particle of lard that goes into Foley's Sodas is proved "choice" after rigid examination.
No material can ever be used i. Foley's Sodas unless it has been proved perfect and pure. Every housewife will know what this care means. She will know that Foley's Sodas have the very highest food value and that every Foley Soda is all good:
Thousands of homes already know this fact. Does yours? If not, buy a box of Foley's per-ectly-made, western-made sodas. Every grocer has them.

An association, the chief object of which is to help the Farmers of Canada make more money out of poultry

THERE is big money in poultry raising-Anyone wholl tell you thoutry right will tell you tha The Canadian Government ensus for 1901 proves that the Canadian hen produced eggs and table poultry, during that
Though there tre no.
Though there are no official figures for 1908, the following is F. C. Elford, of Macdonald College:-

If the Canadian hen laid the same average in 1908 that she aid in 1901 there would be for this year about 103 million dozen eggs, which at 25 cents would mean a gross revenue of $253 / 4$ million dollars
But a good, honest hen should lay more than seven dozen eggs in twelve months. No class of farm stock will respond so feadily to good treatment. Providing she gets this care and that one dozen more eggs per hen is the result, the increased revenue from the extra dozen eggs would amount to $31 / 2$ million dollars. Give the hen yet a little more selection and care so that the average yield would be 10 dozen, which is by no means large, and the increased revenue would be 11 million dollars, or a gross income from the poultry yards of Canada of $363 / 4$ million dollars.

In spite of this the demand has not been filled by the supply.
There are more eggs and poultry wanted than the farms of Canada are producing

The farmers of Canada are not raising enough poultry, nor are they making as much profit as they should out of the poultry they raise

Now, the Peerless Poultry-for-profit Club has been formed to help the farmers of Canada raise more poultry, and raise it more profitably,-

Help them with expert advice on every point in the production of the poultry, from the hatching of the chicks to the selling of them

This is practical advice given by men who are raising poultry and making money out of it-men who have made a study of the subject- men who have been up against all the difficulties of poultry raising and have overcome them

Membership in this Club, and all the advice and help that ores with it, is absolutely free to every user of a Peerless Incubator and Brooder

You see, we, who make the Peerless Incubators and Broorers are closely allied with the largest and most success ful poultry farm in the Dominion-the Poultry Yards of Canada, Limited.

In fact, it was raising poultry on this farm-looking for every more profitable, that induced us to produce the Peerless Incubator and Brooder.

We tested every incubato on the market-gave each one a thorough and careful trial.

Not one of them came up to standard which we were ooking for. The best United tates machines failed becaus hey were not built to suit Can ada's climate. The Canadian ncubators were mere copies of obsolete United States machines -built to sell, not to hatch chicks.

So we built the Peerless Incubators and brooders out of the knowledge and experience which actual poultry raising in Canada taught us.
We have published a booklet called "When Poultry Pays" which tells the whole story of how we came to build the Peerless ncubator-and why it must be the best machine for anyone in Eanada to use

Writing for a copy of this booklet is the first step towards joining the Peerless Poultry-for-profit Club-the first step on the road o sure profits from poultry
This booklet tells how poultry is being profitably raised now in Canada. It tells how you can work in with the most successful poultry farm in the country and make big profits under their guidance.
Join the Peerless Poultry-for-profit Club now and start in making money
This is not like a gold mine. In a mine you just guess or hope that the yellow metal is there-- 99 times out of a hundred it isn't. But in the poultry business the gold is there-that's sure and certain. Others are getting it. You can get it-if you go about it right.

Going about it right means joining the Peerless Poultry-for-proft Club and taking advantage of the knowledge and experience of those who are making poultry pay-who are ready to helpyou inevery way here isnofarmerinCanada whoismaking so much money that he can neglect to get thecertain profit that he can make out of raising poultry the Peerless way

It takes but little time and little work to clean up a tidy sum each year raising poultry-your wife or daughter can do all that is necessary, and do it well, under our advice and help.
You see, if you buy an ordinary incubator you have to struggle along by yourself. The maker's interest ends when the machine is paid for. But that's not the Peerless way
We want to see every Peerlesss Incubator make big money for its owner. You can't help but make money once you join the Peerless Poultry-for-profit Club. We won't let you fail.
Nors, while you are thinking of it, is the time to take the first step. Write us a post card now for our booklet-' When Poultry Pays." We'll mail it to you at once.

This department, an entirely new venture this spring, has aroused great interest in the buying public, and promises to be greatly appreciated by the Western farmers.

The same motive which induced us to handle binder twine a couple of years ago also applied in the case of agricultural goods. This motive was to show the farmers just what their supplies should cost them when only a fair rate of profit was charged.
ust how successful we were in the first instance many thousands of grain growers can gladly attest, and our second venture bids fair to outrival the first.

Our implements are all made by the most reliable manufacturers and our complete confidence in them is demonstrated by the fact that our very generous guarantee stands back of them as well as all the other goods we carry.

Full descriptions and illustrations of this class of goods will be found on pages 286 to 296 of our Spring and Summer catalogue.

inations. The camera gives us barren landscapes, highlands, and towns, marching columns, fighting troops, wounded and dead, but are these the proud, rejocing warfare which the poets have glorified for us? the dispatches are more paralyzing than the pictures. They
have nothing in common with the ro mance of art
Some years ago war was made beautift:1 for us. Literature gloried in soldier
life, and pourred over us a life, and poured over us a flood of ro
mances and sketches of war time mances and sketches of war time. In
France it was Zola and the Marguerite brothers, in England Kipling, in Russ a Tolstoi, who set forth war with all the technique of modern realism and psy chology. But despite their profuse writ drawn from the battlefield, and it is most instructive to inquire why.
In olden times war was a combat of e lorly sheaths, beautiful were a man to man. The warrior was in coat through the middle ages and later the

## HA! HA! HA!

"Well, I'm blest! So this is one of those so-called metal roofing guarantees I've read about," laughs the Wise Man of Metal Town.
"It certainly is a good joke, for it doesn't really guarantee anything to anybody, and isn't legally binding. Ask your own lawyer and you'll find I'm right."
"Stripped of all its exceptions and provisions I don't see how anyone could be serious about it."
"I go by what I know has been done, wot by what is promised. For instance, I know that 'Eastlake' Metallic shingles have been in use for twenty-five years right here in Toronto, where they're made, and that those same shingles are in perfect condition now."
"Just listen here a minute. I'm getting serious now. The Metallic Roofing Company began to make metallic shingles years before anyone else in Canada. They were made right when they were first made. The Metallic Roofing Company have been continually making new designs for ceilings and walls, fronts and cornices, but as for shingles they have never seen an improvement on the 'Eastlake' steel shingles which have been made, laid and proven for twenty-five• years."
"I've noticed that most metal shingle manufacturers change their pattern so frequently that I'm led to believe they, themselves, haven't much confidence in their own goods. Yes, they even change the name to cover up some weakness in a previous product."
" TWO OTHER PERSONS' SAY-SO'S"

"I'm prejudiced, you say? Of course I'm prejudiced, but it's a prejudice founded on years of active use of the metallic goods made by The Metallic Roofing Co. It's an old man's prejudice based on a long experience."
"Write for booklet which tells more about ' Eastlake' Metallic Shingles. They are sure proof against fire, lightning, rust or weather in all climates. They are the easiest and quickest to put in place and the most durable when laid. If you send the measurement of any roof an accurate estimate of cost will be sent free."

## Diamond Dyes

Haven't you sometimes had a few yards left over after making a dress ? Haven't you sometimes seen an unusual barg
that you could use if it was a color you liked?

That is a time to remember Diamond Dyes.
You can transform a remnant to almost any beautiful shade you may desire.
It is the same way with the remnants of ribbons or the old faded or spotted ribbons. Diamond Dyes will make them new again.

There is hardly a thing that you have used for clothes that can not be
位 made bright and new again with wonderful Diamond Dyes.

When thousands of women say that they have been cured of their ailments by a certain remedy, does this not prove the merit of that remedy?
Thousands of women have written the story of their suffering, and have told how they were freed from it by Lydia E. Pinkham's Vegetable Compound - for thirty years these reports have been published all over America

Without great merit this medicine could never have gained the largest sale of any remedy for woman's ills never could have become known and prized in nearly every country in the world.
Can any woman let prejudice stand between her and that which will restore her health? If you believe those who have tried it you know this medicine does cure

Read this letter from a grateful woman, then make up your mind to give Mrs. Pinkham's medicine a chance to cure you.

You see, I make Washing Machines-the " 1900 Gravity" Washer.
And, as I said to myself lots of people may think about my Washing Machines as I onght about the horse, and about the man who owned it.
But I 'd never know, because they wouldn't write and tell me. You see, I sell all my So, thought I, it's only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.
Now. I know what our "1900 Gravity" Washer will do. I know it will wash clothes, without wearing them. In less than haif the time they can be washed by

Can you think of anything more pleasant these days than the flowery to be found on every hand? There is a deep sense of satisfaction in this spring sunshine with its pruning of vines, its transplanting of bulbs, its
shaping of plots and beds and its shaping of plots and beds and its

\section*{How The Farmers Voted}

We recently offered a beautiful calendar to every farmer sending us his name and address
 and telling us how many cows he had and what make of cream separator he owned. We received many thousand replies. Every one of these farmers told us the name of his separator. It was just as though the farmers had voted to decide which cream separator is best.

Tubular supply cans are low, steady, easy to fill and need not be removed to take the machine apart: The driving gears, and the ball bearing from which the bowl hangs, are enclosed, dust proof, self oiling.

\section*{Almost Half Say Tubular}

More than 41 per cent.-almost one half-of all the separators owned by these many thousand farmers are Tubular separators. There are more than twice as many Tubulars as the three leading "bucket bowl" separators combined. This absolutely proves that farmers like Sharples Tubulars best.

This is the farmers verdict. Farmers are so thoroughly convinced that Tubulars are way ahead of the very best "bucket bowl" machines that they have bought over twice as many Tubulars as they have the three leading "bucket bowl" separators combined.

You will 'make no mistake in buying a Tubular. The manufacture of Tubulars is one of Canada's leading industries. 1908 sales way ahead of 1907 -out of sight of most, if not all, competitors combined. The fine features of Tubulars are making 1909 better yet. Write for catalog No. 248.

10. The Difference Between Poor and Good Cabinet Work

It is a fact not generally known that very few sewing machine manufacturers produce their own cabinet work. This is a distinct industry in itself.
I The Singer Company owns and operates the largest and best equipped factory in the world, exclusively devoted to the production of the highest grade sewing machine cabinet work.
I Only the finest woods procurable are used. To insure the proper selection of these woods, a corps of expert wood rangers is employed, whose duty it is to purchase individual trees, the grain and growth of which entitle them to use in Singer cabinet work.
IThis is why Singer cabinet work, besides being the most durable, is also the most beautiful,-the Singer process brings out all the richness and natural beauty of the wood.

\section*{Confinement of Fowls}

After long confinement, the system of the breeding fowl becomes an easy prey to disease, the outcome of the conditions The eggs though fertile have weak germs and nearly every disease in the category presents itself, often in flocks that have never known disease before. You cannot raise healthy chicks from unhealthy par-
ents. We can gradually breed out ents. We can gradually breed out
inherited weakness but this takes several seasons and is not always successful. To have healthy fowls we must breed them olose to nature. It is not natural to confine them in a kept in a natural state. Of course, during confinement we should give hem free range conditions-plenty of exercise with animal and vegetable food. If we raise chicks with little become moderate, place them in open coops after they leave the brooder and prevent their crowding and hud-
ding together. If we do this we do dling together. If we do this we do a great deal toward securing fowls that are free from disease, because way. After a breed of fowls has become acclimated, they can stand the rigors of almost any climate. They
should be protected by an open front house. Stock thus raised will be better able to resist disease.

\section*{Artificial Rearing.}

Artificial rearing becomes easier when the weather permits the brood-
ers to be located out of doors. Some sheltered spot is best. The outer section of the brooder in which the chicks are supposed to pass most of their time, should be well littered The little fellows should have access scattered in the litter will keep them busy. Have attached to the brooders little runs made of wire netting. We can generally tell about the ap-
pearance of the chicks whether they peare too cold or not. Keep the chicks busily employed and there is not much danger of their food not agreeing with them. On the farm I find that it is a good idea to distribute
the coops over the fields near the the coops over the fields near the
house. Of course, you should not scatter so that one will have to go far to care for the litters, but put them some distance apart. There are no chicks so fine and robust as those
raised on the farm with ample oppor tunity of ranging over the fields and finding a large portion of their own

A hen could not do it, and a machine cannot. Few people there are who
do not have to learn by hard experience that brooding the chicks is the greater science of the two. It must be mastered

The Use of Old Knitted Articles. Unravel the article, and wind the wall round two fingers to form a ball the size of a large nut; fasten the end of the wool through th fingers. Make as many balls as will cover a piece of canvas the size of doormat, and fasten firmly to canvas according to the color of the wools;
then cut all the loops, shake well and line.

For the Needlewoman
A good way to scallop flannel garments is to cut the edge of the gar-
ment in even scallops ment in even scallops, after which work round the scallops with double the edge. Silk, wool, or ingrain cot ton can be used, and the crochet hook should be rather fine and sharp. This method is not only
quicker than button-holing, but has quicker than button-holing, but has be firm and wear well.

A Hint for Portieres
Portieres often catch under the door if it is opened quickly. To pre-
vent this, screw a small ring such vent this, screw a small ring such as is used for picture frames into the
centre of the door frame the other ring into the centre of the doo at top. Measure enough blind cord to reach from first ring-in frame centre-to bottom of curtain, and blind cord to ring in cition. Fasten frame, thread through ring at top door and fasten to bottom of curtain As the door is opened the curtain
then rises. then rises.

\section*{Three Good Hints.}

Always bring in the clothes-line when the clothes are dry. and put if left out will last twice as long as sun and rain.

Woodwork painted white may be easily cleaned with ammonia water or whing and water. The latter is used injudiciously, and has a very good effect
In baking puddings, cakes or rolls, in which one of the ingredients is baking powder, the oven should be
very hot, though not sufficiently so very hot, though not sufficiently so
to burn the cakes, etc., before they have time to cook thoroughly.
Cleaning Fireirons

[^0]:    "Many people buy cheap tea under the impression that they are economizing by doing so. But cheap tea is about the most expensive luxury you can indulge in, for the poorer grades of tea are hardly ever pure or untreated by chemicals, and very much of the indigestion of the present day is due to the drinking of large quantities of trashy tea, that has been allowed to stand on the leaves until it is rank poison."
