Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
☐	☐	☐	☐	☒	☐
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

Library of the National
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
nationales du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

C
for us

TO THE HARDWARE TRADE.

WE present to you with our compliments, this, our first Illustrated Catalogue of General Hardware, and the first fully illustrated one ever published in Canada.

For the convenience of the retail trade, and for the purpose of doing away with the bulk of samples now carried by our travellers, we have at great expense and labor compiled this book, which we trust, will be well received and always referred to when ordering.

Our aim has been a well illustrated, fully descriptive, plainly printed volume, which could be referred to as well in selling as in buying, for in pricing up the different classes of goods, where Standard Lists are not in use, we have made figures at which the Retail Merchant could sell at and realize a fair margin of profit.

We carry in stock, unless otherwise stated, all goods contained herein, and request our customers to confine their orders as nearly as possible to articles embraced in this Catalogue, thereby insuring prompt shipments.

We trust our efforts in meeting the long expressed wishes of nearly all the retail trade for a Catalogue of this kind will be appreciated, and that we will be favored with a larger share of their trade than heretofore.

M. & L. Samuel, Benjamin & Co.

~~RISLEY & KERRIGAN.~~

We cannot assume any responsibility for goods "sent in" to be packed or shipped, though we will use our best efforts to have them disposed of as directed. Nor can we allow claims for deficiencies, when goods bought of us are ordered to be sent elsewhere to be packed or shipped.

Our customers will please use this book carefully. As the issue is limited, it will be impossible for us to furnish them with a duplicate copy.

INDEX.

Stearns' Patent Barn Door Hangers.

Are so constructed as to give the greatest strength for the weight of metal used, and owing to the fact that the bearings are chilled, and the wheels turned and finished perfectly true, they will run a door with perfect ease.

The small roll as shown in the illustration prevents any side friction.

Sliding Door Hangers.

WARNER'S PATENT.

No. 1. Warner's Patent, for Double Doors, ordinary.

per set, \$6 00

A Set includes 4 Hangers, 28 feet of Hardwood Track, Berlin Bronzed Plates, Flat or Astragal for Edge of Doors.

One set in a box.

The Richards Patent Sliding Door Hangers.

DIRECTIONS FOR PUTTING UP TRACK AND HANGING DOUBLE DOORS.

Cut the track twice the width of doors, and for backing for track use $6 \times \frac{3}{4}$ strips same length as track. Joint one edge for bottom, screw the track on *flush* with *jointed* edge, placing screws from 8 to 12 inches apart, and countersink for heads. The distance from top of rail to bottom of jamb should not exceed $2\frac{1}{2}$ inches. Iron pocket track should be fitted to wood track in centre of opening.

Let the strips into studding, or place the studding far enough apart to bring a uniform distance of 1 inch between track when in position; spike or screw the strips firmly to studding. A header should be nailed firmly between studding $4\frac{1}{2}$ inches from top of track, to prevent spreading or contracting. Cut the door $\frac{3}{4}$ inch less than height of opening. Plow groove in bottom $\frac{3}{4}$ inch wide by $\frac{1}{2}$ inch deep for guide, which should be screwed to floor flush with partition. Screw stops on *centre* of back edge of doors, and screw buffers on *studding* for stop to strike against. Place the plate on top of door, leaving end with hole for adjusting screw $\frac{1}{2}$ inch from edge. Mark out mortises, which should be $\frac{1}{2} \times 2\frac{1}{2}$ inches and $\frac{3}{4}$ inch deep, for lugs on yoke.

After mortise is finished, screw on plates. Place door in position, insert wheels, and yoke through pocket in track with lugs pointing toward each edge of door, slide lugs into slots in plates, insert the adjusting screw, place pocket pieces in position and raise doors until edges are plumb.

The above directions will apply to single doors, except that there should be a piece for door to shut against, which can be removed, allowing door to be drawn out 2 or 3 inches to get at back adjusting screw, and the iron pocket track should be fitted to the wood track on the side of opening against which the door strikes when closed. Buffers and stop not required on single door.

SCREWS REQUIRED FOR FULL SET OF HANGERS AND TRACK.

3 dozen 2 inch No. 12 for Track.

$\frac{1}{2}$ dozen 1 inch No. 10 for Pocket Piece.

2 dozen 3 inch No. 14 for Plates.

1 dozen 2 inch No. 12 for Stops.

$\frac{3}{4}$ dozen 1 inch No. 12 for Guides.

The following number of pieces compose one set: 4 pieces Wood Track 7 feet each, 4 Yokes, 4 Wheels, 4 Plates, 4 Set Screws, 2 Pockets, 2 Stops, 2 Floor Guides, 4 Buffers.

NOTE.—The foundation for the successful working of Door Hangers is in placing the track perfectly level and in a substantial manner.

Richards' Patent, for Double Doors, ordinary,

per set, \$8 00

Star Window Glass.

First Break, up to 25 inches,	-	-	-	-	per 50 feet \$
Second Break, 26 to 40 "	-	-	-	-	" 50 "
Third Break, 41 to 50 "	-	-	-	-	" 100 "
Fourth Break, 51 to 60 "	-	-	-	-	" 100 "
Fifth Break, 61 to 70 "	-	-	-	-	" 100 "
Sixth Break, 71 to 80 "	-	-	-	-	" 100 "

First and second breaks in 50 feet boxes—other breaks 100 feet.

To find the number of mated inches in a light of glass, add the length and breadth together. For example; 10x12 equals 21 inches, and is in the first break; 12x18 equals 30 inches, and is in the second break; 15x30 equals 45 inches, and is in the third break; 21x30 equals 54 inches, and is in the fourth break; 30x40 equals 70 inches, and is in the fifth break, and so on up.

We carry stock of all the leading sizes in "Star" single thick.

Knob Spindles.

$\frac{3}{16}$ inch, For Rim or Mortise Knobs, assorted,	-	-	-	per dozen,	\$0 75
--	---	---	---	------------	--------

We keep the Plain Spindle only in stock.

Climax Patent Door Knobs.

DESCRIPTION.

The Spindle is made of two thicknesses of Norway Iron. The ends that go into the stationary knobs are bent well back before being inserted in the neck, so that when the key is driven in between the spindles, the bent ends are spring into the dovetail in the neck, which ensures the spindles being held very rigid and right in their places.

The ends of the spindles that go into the free knob, have sharp teeth cut on their inner faces, and when the brass pin is driven in between the spindles the teeth cut into the pin, and the pin also acts as a key to force the sides of the spindles up tight to the sides of the neck, which acts in combination with the pin passing between the spindles to hold the knob firmly in place.

The riveting is done by means of a chisel-pointed punch, which is inserted into the neck, thus riveting the knob firmly on to the neck. Should it be required to remove a knob at any time, the brass pin can be punched out from the under side as the hole is drilled through the neck.

The brass pin driven between the spindles in the free knob springs them out and holds them firmly in the hub of the lock, thus avoiding any lost motion, as the instant the knob is turned it operates directly on the latch.

Extra Cast Steel Shingle Saws.

Tapered and Patent Ground.

Inches,	32	34	36	38	40	42	44	46
Each,	\$22 00	25 00	30 00	34 00	40 00	50 00	61 00	75 00

When ordering Shingle Saws give the following directions:
 Diameter of Saw in inches; Thickness or Gauge of Saw at centre; Thickness or Gauge of Saw at rim; full sketch or pattern of holes, and sample of screw by which to drill or countersink saw. If you have a flange send it to have holes drilled in saw to fit flange. State whose make of machine the Saw is to run upon, number of teeth you wish in the Saw, and be sure to give flat or countersink side and the direction in which the teeth run.

PRICES FOR REPAIRING SAWS.

Circular Saws.

BREAKAGE AT OWNER'S RISK.

4 to 26 inch, gumming and hammering.								7 cents per inch diameter.
4 " 26 " " hammering only.								5 " " "
27 " 36 " " gumming and hammering.								8 " " "
27 " 36 " " hammering only.								6 " " "

Per foot,	80 15	0 16	0 17	0 18	0 19	0 20	0 21	0 25	0 29	0 33	0 37	0 41 0 45

Suggestions for the Use of Band Saws.

Keep the correct pitch upon the tooth, so as to give a proper lead into the cut. This will take the friction entirely off the stay-pin. By the use of a round edge file the saw will be kept from galling. To save trouble and expense a proper pitch must be held for each kind of wood and work.

Straw Cutter Knives.

Nos.	1	2	3	4	5
Each,	80 75	0 85	1 00	1 25	1 50

48" Straw Knives made to order any pattern. 72

Gauge for Regulating Cleaning Teeth.

Showing the Gauge in position for filing the Cleaner Tooth.

Per dozen,	-	-	-	-	-	-	-	-	-	-	-	80 75
------------	---	---	---	---	---	---	---	---	---	---	---	-------

The cleaning teeth of all saws should be somewhat shorter than the cutting teeth, and although shorter should be of uniform length throughout. The inner edge of the Gauge rests on the points of the Cutting Teeth, the Cleaning Teeth projecting through the opening in centre of Gauge. Reduce the projecting points, by means of a File, until arrested by the edges of the Gauge, which is made of hardened steel. Thus tooth after tooth can be rapidly and correctly reduced to an even length by an unskilled operator.

Hand Panel and Rip Saws.

Steer's Patent Adjustable Iron Planes.

Heavy Cutting Iron, Adjustable Mouth.

EVERY PLANE FULLY WARRANTED.

Nos. 303 and 304.

Nos. 305, 306 and 307.

Cut showing the Composite Bottom.

No. 303, Smooth, 8 inches long, 1 $\frac{3}{4}$ inch Cutter,	-	-	-	each, \$3 00
No. 304, Smooth, 9 inches long, 2 inch Cutter,	-	-	-	" 3 25
No. 305, Jack, 14 inches long, 2 $\frac{1}{4}$ inch Cutter,	-	-	-	" 3 75
No. 306, Fore, 18 inches long, 2 $\frac{1}{4}$ inch Cutter,	-	-	-	" 4 75
No. 307, Jointer, 22 inches long, 2 $\frac{3}{4}$ inch Cutter,	-	-	-	" 5 50

The composite bottom is formed of strips of hardwood securely dovetailed into the iron in such a manner as to avoid wear. It effectually prevents the plane clinging to the work.

Stanley's Patent Iron Block Planes.

No. 101.

Nos. 102 and 103.

No. 101, Block, 3 $\frac{1}{2}$ inches long, 1 inch Cutter,	-	-	-	each, \$0 20
No. 102, Block, 5 $\frac{1}{2}$ inches long, 1 $\frac{1}{4}$ inch Cutter,	-	-	-	" 0 40
No. 103, Adjustable Block, 5 $\frac{1}{2}$ inches long, 1 $\frac{1}{4}$ inch Cutter,	-	-	-	" 0 60

One in a box.

Stanley's Patent Iron Block Planes.

Nos. 110 and 120.

No. 130.

No. 110, Block, 7½ inches long, 1¾ inch Cutter,	-	-	-	each, \$0 60
No. 120, Adjustable Block, 7½ inches long, 1¾ inch Cutter,	-	-	-	" 0 85
No. 130, Block, Double Ender, 8 inches long, 1¾ inch Cutter,	-	-	-	" 0 80

The No. 130 has two slots or cutter seats, and can be used as a block plane, or by reversing the position of the cutter and clamping wedge (see the dotted lines in the cut) it can be used to plane close up into corners, or places difficult to reach with any other plane.

Iron Block Planes.

Bailey's Patent.

Nos. 9½ and 15.

Nos. 9¾ and 15½.

No. 9½, Adjustable Block, 6 inches long, 1¾ inch Cutter,	-	-	-	each, \$1 50

Adjustable Iron Planes.

Circular.

No. 13.

No. 113.

No. 13, Adjustable Circular, $1\frac{3}{4}$ inch Cutter,No. 113, Improved Adjustable Circular, $1\frac{3}{4}$ inch Cutter,

each, \$4 00

" 4 00

No. 13 has a Flexible Steel Face, and by means of the thumb screws at each end of the stock, can be easily adapted to plane circular work—either concave or convex.

No. 113 has a Flexible Steel Face, which can be easily shaped to any required arc, either concave or convex, by turning the Knob on the front of the Plane. The Knob is attached to a double-acting screw, which moves two levers properly connected by gears, thus controlling accurately both ends of the flexible face. By the peculiar construction of the Plane, a smaller arc, either concave or convex, can be obtained by this Plane than by any other similar tool.

Veneer Scraper.

No. 12.

No. 12, Adjustable Veneer Scraper, 3 inch Cutter,

each, \$3 50

One in a box.

Miller's Patent Combined Plow, Filletster, and Matching Plane.

No. 41, Iron Stock and Fence, including Plow Bits, Tonguing and Grooving Tools, each, \$9 00

This tool embraces, in a most ingenious and successful combination, the common Carpenter's Plow, an adjustable Filletster and a perfect Matching Plane. The entire assortment can be kept in smaller space, or made more portable, than an ordinary Carpenters' Plow.

Each Plane is accompanied by a Tonguing tool ($\frac{1}{4}$ inch), a Filletster Cutter, and eight Plow Bits ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$ and $\frac{5}{8}$ inch).

Traut's Patent Adjustable Beading, Rabbet and Slitting Plane.

No. 45, Iron Stock and Fence, including Beading Tools, Bits, Slitting Tools, etc., each, \$8 00

This Plane embraces in a compact and practical form (1) Beading and Centre Beading Plane; (2) Rabbet and Filletster; (3) Dado; (4) Plow; (5) Matching Plane; and (6) a superior Slitting Plane.

Each Plane is accompanied by seven Beading Tools ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, and $\frac{1}{2}$ inch), nine Plow and Dado Bits ($\frac{1}{8}$, $\frac{3}{16}$, $\frac{1}{4}$, $\frac{5}{16}$, $\frac{3}{8}$, $\frac{7}{16}$, $\frac{1}{2}$, $\frac{5}{8}$ and $\frac{3}{4}$ inch), a Slitting Tool and a Tonguing Tool.

Traut's Patent Adjustable Dado, Filletster,
Plow, Etc.

No. 46, Iron Stock and Fence, including Plow Bits, Tonguing and Grooving Tools,

No. 47, Dado, Iron Stock and Fence, including Bits, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{5}{8}$, $\frac{7}{8}$, and $1\frac{1}{4}$, each, \$7 00

Board Rules.

No. 43.

- No. 43½, Stanley's Flat Board Rule, Hickory, Cast Brass Head and Tip, 3 Lines,
12 to 22 feet, 3 feet long, - - - per dozen, \$12 00

Style of No. 3, without Handle.

- No. 3, McGee's Handled Flat Board Rule, Extra Hickory, Steel Head and Tip,
3 Lines, 3 feet long, - - - per dozen, \$22 50
No. 3½, McGee's Handled Flat Board Rule, Extra Hickory, Steel Head and
Tip, 4 Lines, 3 feet long, - - - per dozen, 24 00
No. 48, Stanley's Octagon Walking Cane Board Rule, Hickory, Solid Cast Brass
Head and Tip, 8 Lines, 9 to 16 feet, 3 feet long, - - - per dozen, 12 00

We can supply any style of Board Rule on short notice.

In ordering please state for what length of Board you wish to use the Rules.

NOTE.—Nos. 43, 3, 3½ and 48 give the contents in Board Measure, of one inch Boards.

DIRECTIONS.—Place the stick across the flat surface of the Board, bringing the inside of the Cap snugly to the edge of the same; then follow with the eye the column of figures in which the length of the Board is given as the first figure under the Cap, and at the mark nearest the opposite edge of the Board will be found the contents of the Board in feet.

Log Rules.

No. 48½.

- No. 48½, Stanley's Octagon Walking Cane Log Rule (Doyle's Revised), Hickory,
Solid Cast Brass Head and Tip, 3 feet long, - - - per dozen, \$15 00
No. 1, McGee's Flat Log Rule, Extra Hickory, Diamond Head, Doyle's or
Scribner's, 4 Lines, - - - per dozen, 22 50
No. 2, McGee's Flat Log Rule, Extra Hickory, Diamond Head, Doyle's or
Scribner's, 3 Lines, - - - per dozen, 15 00

In ordering please state if Doyle's or Scribner's is required.

NOTE.—The Log Measure (No. 48½) has Doyle's Revised Tables, and gives the number of feet of one inch square edged boards, which can be sawed from a log of any size, from 12 to 36 inches in diameter, and of any length. The figures immediately under the head of the Cane are for the lengths of Logs in feet. Under these figures, on the same line at the mark nearest the diameter of the Log, will be found the number of feet the Log will make.

Description of the Patent Improved Adjustable Plumbs and Levels.

[SECTIONAL DRAWING.]

The Spirit-Glass (or bubble-tube), in the Level, is set in a Metallic Case, which is attached to the Brass Top Plate above it—at one end by a substantial hinge, and at the opposite end by an Adjustable Screw, which passes down through a flange on the Metallic Case. Between this flange and the Top Plate above is inserted a stiff spiral spring; and by driving or slackening the Adjusting Screw, should occasion require, the Spirit-Glass can be instantly adjusted to a position parallel with the base of the Level.

The Spirit-Glass in the Plumb is likewise set in a Metallic Case attached to the Brass Top Plate at its outer end. By the use of the Adjusting Screw at the lower end of the Top Plate, the Plumb-Glass can be as readily adjusted to a right angle with the base of the Level, if occasion requires, and by the same method as adopted for the Level-Glass.

The simplicity of this improved method of adjusting the Spirit-Glasses will commend itself to every Mechanic. But one screw is used in the operation, and the action of the Brass Spring is perfectly reliable under all circumstances.

Sizes, Weights, etc., of Sheet Tin.

Quality,	1C	1C	1C	1X	1X	1X	1XX	1XX	1XXX	1XXX	1C	1X	1XX	1XXX
Size,	10	14	12	14	20	10	14	20	10	14	14	20	12	14
No. of Sheets in a box,	225	225	112	225	225	112	225	112	225	112	100	100	100	160
Weight per box,	112	112	112	140	140	140	161	161	182	182	105	125	147	158 lbs.

A box of 225 sheets, 14 x 10, contains 214.84 sq. ft.; but, allowing for seams, it will cover but 150 sq. ft. of roof. To find area of a roof covered by any size sheet, deduct 2 in. from its width and 1 in. from its length.

A roof covered with tin or other metal should slope *not less* than 1 in. to a ft.

Tank Rivets.

NUMBER TO THE POUND.

Weight of Fish-Plate Bolts per 100.

$3\frac{3}{4} \times \frac{1}{2}$ with 1 Nut,	90 lbs.	$4 \times \frac{1}{2}$ with 1 Nut,	102 lbs.
$3\frac{3}{4} \times \frac{1}{2}$ with 2 Nuts,	131 lbs.	$4 \times \frac{1}{2}$ with 2 Nuts,	138 lbs.

The above size Bolts are in general use. Other sizes made if desired.

Street Rail Iron and Mine Rails.

KIND.	SIZE.	Weight per Yard
Improved Street,	$4\frac{1}{2}$ in. wide.	32 pounds.
Ordinary Street,	5 "	47 "

Other sizes and patterns to order.

T Rails for Saw Mills and Other Yards.

12, 14, 16, 18 pounds per yard.

Melting Point of Metals.

Copper,	2160 Degrees, Fahrenheit.	Bismuth, 507 degrees, Fahrenheit.
Antimony,	255 " "	Lead, 620 " "
Zinc,	740 " "	Tin, 475 " "

Expansion of Metals—(Faraday).

The Length of the Bar at 32°=1.

METALS.	At 212°.	Expan. per deg. Fah.
Brass	1.0019062	.0000106
Copper	1.001745	.0000097
Cast Iron	1.0011112	.0000062
Steel	1.0011899	.0000066
Wrought Iron	1.0012575	.000007
Tin	1.002	.0000111
Zinc	1.002942	.0000163

Almost all bodies expand in equal proportions for each degree between freezing and boiling. To ascertain the expansion of a body, multiply the dimension of the body by the number of degrees of increase of temperature and then by the expansion per degree.

EXAMPLE.—Required the expansion of a steel rail 30 feet long, with an increase of temperature of 100°. $30 \times 100 = 3000 \times .0000066 = .0198$ foot = $\frac{1}{50}$ inch.

Shrinkage of Castings.

Patternmakers' rule should be for

Cast Iron	$\frac{1}{8}$
Brass	$\frac{1}{16}$
Lead	$\frac{1}{8}$
Tin	$\frac{1}{12}$
Zinc	$\frac{1}{16}$

of an inch longer per lineal foot.

To find the Weight of Casting by the Weight of a Pine Pattern.

Multiply the Weight of Pattern by

12	for Cast Iron.
13	for Brass.
19	for Lead.
12.2	for Tin.
11.4	for Zinc.

Reduction for Round Core and Core Prints.

RULE.—Multiply the square of the diameter by the length of the core in inches, and the product by 0.017 is the weight of the pine core, to be deducted from the weight of the pattern.

Weight of Grindstones.

RULE.—Square the diameter (in inches); multiply by thickness (in inches); then by the decimal .06363; the product will be the weight of the stone in pounds.

General Rule for Determining the Weight of any Piece of Wrought Iron.

One cubic foot of Wrought Iron,		
One square foot, one inch thick,		= 480 lbs.
One square inch, one foot long,		= 40 "
One square inch, one yard long,		= 34 "
		= 10 "

Then to ascertain the weight of any piece of Wrought Iron, use the following:—

RULE.—Ten times the sectional area in square inches is equal to the weight in pounds per yard

To Find the Number of Square Feet in a Circle.

Square the diameter and multiply by decimal .7854.

To Restore Burnt Steel and Weld It.

4 lbs. white sand, pulverized fine, $\frac{1}{2}$ lb. sal ammoniac, $\frac{1}{4}$ lb. copperas, $\frac{1}{2}$ lb. resin, all pulverized and finely mixed, then use as borax.

Receipt for Welding Steel and Iron.

8 lbs. sand, 4 oz. salt, 2 oz. copperas, $\frac{1}{2}$ oz. sal ammoniac, pulverize, mix together, and use the same as any loam.

Case-Hardening.

Horn, hoof, bone dust, or shreds of leather, heated together with the article to be case-hardened, in an iron box, to a blood red heat, then immerse the article in cold water.

Some engineers cut up the shreds, etc., fine, and mix them with white wine vinegar and salt.

To Temper Springs, etc.

$\frac{1}{2}$ lb. alum, $\frac{1}{2}$ lb. borax, $\frac{1}{2}$ lb. prussiate potash, dissolved in one gallon of hot water, then add 5 gallons oil (linseed oil is best), $\frac{1}{2}$ gal. of sand, $\frac{1}{2}$ lb. pulverized charcoal, when well mixed heat and dry as usual.

Tempering Steel.

Color.	Purpose.	Temperature.	Alloy whose fusing point is of the same temp.	
		Fahrenheit.	Tin	Lead.
Light Straw.....	Turning tools for metal.....	450°	1	to 19
Dark Straw.....	Wood tools, taps and dies.....	470°	1	to 24
Brown yellow.....	Hatchets, chipping chisels.....	500°	1	to 43
Dark purple.....	Springs, etc.....	550°	1	to 12

To Mend Broken Iron.

Zinc dissolved in mercury; then take the mixture and stick the broken iron together and keep it pressed close till dry.

Valuable Postal Information.

POSTAGE RATES--LETTERS.

Letters addressed from or to places in
Canada and United States,

3 cents for each half oz. or fraction thereof.

Newfoundland and Great Britain,

5 cents for each half oz. or fraction thereof.

POST CARDS, for Correspondence between Canada and the United Kingdom, may be obtained at the Stamp Agencies at 2 cents each, as also cards for any postal union country. Cards with a prepaid reply form attached are also provided.

N.B.—One cent postal cards, with an extra cent stamp attached, cannot be used in place of two-cent postal cards, but go to Dead Letter Office, nor can anything be pasted or attached to a postal card.

NEWSPAPERS AND PERIODICALS

published regularly at intervals of not more than one calendar month, addressed to regular subscribers, or newsdealers, resident in Newfoundland, the United States, or Canada, except at the place of publication, are transmitted free of postage.

Transient Newspapers and Periodicals
addressed to places in Canada, New-
foundland and U. S.

On all newspapers and periodicals other than those from the office of publication, including all newspapers and periodicals published less frequently than once a month, the postage rate is one cent per four ounces, which must be prepaid by postage stamp.

Newspapers and periodicals weighing less than one ounce may be posted singly prepaid by postage stamp one half cent each to places outside the city.

Newspapers posted for city delivery must be prepaid by one cent stamp each.

Newspapers addressed to places in the United Kingdom must be prepaid by postage stamp one cent per 2 oz., or fraction of 2 oz.

BOOK PACKETS not exceeding 5 lbs. in weight can be sent to the United Kingdom.

The limit of weight for Book Packets passing in Canada is 5 lbs. The rate is one cent per 4 oz., also to Manitoba, North-West Territory and to Victoria, B.C.

LEGAL AND COMMERCIAL PAPERS.—Legal and Commercial Papers, posted for places in Canada, generally are subject to letter rate unless sent by parcel post; except deeds and insurance policies, which are allowed to go by Book Post. Postage rates on Legal and Commercial Papers, addressed to Postal Union countries, are as follows: viz., to countries where the letter rate is 5 cents per 3 oz., the rate of legal and commercial papers is 5 cents for the first 10 oz., and one cent for each additional 2 oz. or fraction; or to countries where the letter rate is 10 cents per 4 oz., the rate is 5 cents for the first 4 oz., and 1 cent for each additional 2 oz. or fraction.

PATTERN AND SAMPLE POST.

CANADA.—Patterns and samples of merchandise, not exceeding 24 ounces in weight, when posted in Canada for places within Canada or Newfoundland, must be prepaid by postage stamp at the rate of one cent per 4 ounces weight, and put up in such manner as to admit of inspection. Goods sent in execution of an order, however small the quantity may be, or articles sent by one private individual to another, not being actually trade patterns or samples, are not admissible as such.

UNITED STATES.—Patterns and samples of merchandise, posted for places in the United States, are subject to the special rate of 10 cents each, prepaid by postage stamp, and must not exceed 8 ounces in weight.

PARCEL POST.—Parcels cannot be transmitted by parcel post to any place beyond the limits of the Dominion of Canada, nor can any parcel be forwarded to British Columbia, via the United States, which exceeds in weight the limit of 2 lbs. 3 oz.

The weight of parcels must not exceed 5 lbs., nor the size 2 feet in length and 1 foot in breadth. The rate is 6 cts. per 4 oz. or fraction of 4 oz.

MONEY ORDER OFFICE.

In sending money by mail it is always best to transmit by Money Order if possible. If sent by letter, it should always be registered.

Money orders issued and paid from 9 a.m. to 4 p.m.

Commission on Money Orders.

On Money Orders drawn by any Money Order Office in Canada on any other Money Order Office in the Dominion, is as follows:—

If not exceeding \$4.	2c.	Over 40 not exceeding \$60.	30c.
Over \$4	10, 5c.	60	80, 40c.
" 10	20, 10c.	80	100, 50c.
" 20	40, 20c.		

No Single Money Order, payable in the Dominion of Canada, can be issued for more than \$100; but as many of \$100 each may be given as the remitter requires.

The other Countries and British Colonies upon which Money Orders are granted are distinguished by an *Asterisk* (*) in the subjoined table; the rates of commission in all cases being as follows:—

If not exceeding \$10.	10c.	Over \$30 not exceeding \$40.	40c.
Over \$10	20, 20c.	40	50, 50c.
" 20	30, 30c.		

USEFUL HINTS.

Register all valuable letters.

Make complaints and inquiries in writing.

Do not place a registration stamp and postage stamps in the same corner of the envelope.

Letters can be redirected without any new charge for postage to and from countries in the Postal Union.

Letters containing Gold or Silver Money, Jewels or precious articles or anything liable to Customs duties cannot be forwarded by post to any of the Postal Union countries except the United States.

N.B.—The public are cautioned against doing up book packets in Envelopes notched at the ends or corners. The contents of a book packet must be so tied or fastened up as to permit of their being withdrawn for inspection.

Letters bearing mutilated stamps, or stamps so soiled and defaced as to make it impossible for the sorting clerks to decide whether they have been used before or not, will be sent to the Postmaster General for his adjudication.

A letter once posted becomes the property of the person to whom it is addressed, and must be forwarded according to its direction. On no application, however urgent, can it be delivered back to the writer, or to any other person.
