

The Weekly Monitor.

WEDNESDAY, FEB. 13, 1884.
YARMOUTH PREMIUMS.

We have been watching with some interest the progress of a discussion in the Yarmouth Herald concerning the Annapolis County correspondent, signing himself "Guillemus," and Mr. Thos. B. Crosby, secretary of the Yarmouth Co. Agricultural Society. The question at issue relates to the fairness or unfairness of the manner in which prizes are distributed at the annual Exhibition connected with this Society. As our own County is somewhat mixed up with the matter, we feel it to be our duty to express an opinion on the merits of the case.

The particulars of the case are in brief as follows: Last autumn Yarmouth opened its Exhibition to general public competition. Prize lists, very creditable in the main, were sent out pretty freely through the country. Some of them came to our County. One of our most enterprising manufacturers, seeing that prizes were given for certain articles in his line of work, decided to attend the Exhibition and compete for two premiums, one amounting to \$500, and the other \$500. The terms of entrance were distinctly set forth on the list, namely, that exhibitors, on payment of a fee of \$1.00, should be entitled to the premiums offered. These terms were complied with, and the Annapolis Co. manufacturer was awarded both prizes, thus becoming entitled to \$1,000. Judge of his surprise when he found that \$500 was allowed him by the Yarmouth Exhibition managers. The curiosity was explained by his attention being called to a by-law which, we venture to affirm, not one man in a thousand would understand without the aid of Mr. Thos. B. Crosby, or some other person in the same position. This by-law, however explained, is ridiculous, unfair, and dishonorable to the last degree. It reads thus: "No exhibitor shall draw in premiums more than five times his subscription or entrance fee; balance to revert to treasury. And this provision is in violation of the terms of entrance and awarding of premiums, but at the very tail end of a number of by-laws, in small print, as if of little importance.

Now this by-law will be seen really conflict with the premium list and the terms of entrance. For the list offers more than \$500 for several articles, according to this rule, unless by some sort of jugglery. But the secretary of the Exhibition makes it all plain. He states that this by-law really means that any exhibitor who subscribes any amount he pleases, and therefore may receive the highest premiums on the list, and as many as five times his subscription will allow. In other words, those who are in this little secret about rotating subscriptions, may compete for any number of prizes, and may receive full premiums for all the successful marks they make, by simply paying a good round subscription. But the unsuspecting competitor who acts upon the plain instructions in the prize list and pays an entrance fee of one dollar can receive no more than \$500 in premiums, though he may score No. 1 on a dozen articles of different kinds.

We think "Guillemus" has been exceedingly lenient in the terms by which he describes this kind of business. If it is not "sharp practice," what is it? One thing is certain, and that is, that worthy and enterprising men of Annapolis County have been "taken in" by the managers of the Yarmouth Exhibition, and a just retributive justice is being done. We feel it to be our duty to expose a system by which our people are likely to be victimized. If the managers of the Yarmouth Exhibition choose to adopt a double arrangement relative to the terms of the admission, they had a perfect right to do so. But they should have made the matter very plain, so that all competitors might enter upon an equal footing. As it is there is no such double arrangement indicated in the regulations of the society, and we claim that it is not only "sharp practice" but dishonorable and contemptible practice, to publish one plan and, at the same time, secretly act upon an entirely different one.

THE ANNOPIA CO. TEMPERANCE LEAGUE held a large and enthusiastic meeting in Whittman's Hall, Annapolis, last night. The members of the League expressed their determination to press forward with greater zeal than ever. A fund of \$500 was resolved to be raised at once to further the objects of the League, and in order that the delay in the Courts of Justice shall not retard the progress of the cause.

Stirring addresses were delivered at the public meeting in the evening, and it was decided to organize a Division of the Sons of Temperance in Annapolis Royal. The ladies show a considerable determination to further the cause of temperance by every means in their power.

The Carnival at the Bridgetown Skating Rink last Saturday evening, was very well attended, and a pleasant time was enjoyed. About 47 skaters appeared on the ice, and made a good appearance. We were unable to be present, but expected the managers would give us the names. They have not done so, however.

We learn that the social gathering at the Baptist parsonage of this town, on the evening of Thursday last, was a very large and enjoyable one. The total indebtedness of the Bridgetown meeting of the Rev. Mr. Warren's field of labor was promptly and cheerfully liquidated. Addresses, expressive of warm affection and appreciation towards the pastor and his family, were given by a number of persons present.

A handsome Teacher's Bible was presented to Mr. Thomas Shaw, Treasurer of the church, in recognition of his faithful and valuable services; and it was stated that a similar gift had been forwarded to Mrs. J. H. Harrington, formerly Miss Jessie Chipman, by her benevolent and remembrance of her constant and kindly labors in the past.

These pleasant features of the social gathering are not only worthy of record, but they should be imitated everywhere. With joy, this little improvement is being made in every minister's outfit apart from his regular salary.

Local and Other Matter.

Steamer "Cicopatra" last week made the run from Boston to Yarmouth in 24 hours.

PORT LOYNE.—Several casks of kerosene oil and some flour is reported to have been picked up on the shore near Port Loyne.

The total value of the exports from the port of Annapolis Royal last week were \$2,319.

A SAN RECON.—Sixteen Gloucester vessels and one hundred and ninety-six men have been lost since the middle of August, with 18 men lost from stores.

Rev. Dr. DeWolf, Baptist clergyman of Beaver River, Yr. Co., was thrown from his carriage on the 3rd inst., and seriously injured.

Williamston has a fine singing class, J. E. Sanford manager. It is held in the Temperance Hall. A concert is expected at the close.

Mrs. Wm. McLean has a large and choice lot of Valentinus, Victoria, and other fine goods, which she will call and inspect them.

The ladies of St. James' church will hold a Social, at the Victoria Hall on Thursday evening 21st inst. After supper, several songs and a farce will be rendered. A pleasant evening may be expected. Further particulars in our next.

Just received per last steamer, a choice lot of English Worsteds, which will be sold at extremely low prices, they having been brought direct from the manufacturers for cash. A. J. Morrison, merchant, York, Middlesex, 11.

Brig. A. B. Stronach, Capt. Chapman, and 3rd of Troop, of the 1st Regt. of Artillery, which sailed from New York Nov. 13, for Bilboa, and put into St. Thomas in distress, has been condemned. She was built at Margareville, N. S., in 1874, and was owned by Asaph B. Stronach, Wilnot, N. S.

The members of the Annapolis Brass Band intend to give an entertainment in Victoria Hall to-morrow evening. They played to a full house in Annapolis last week, and the Spectator gives the company a very favourable notice. Mr. J. P. Edwards, the founder of the band, is a conductor whose talent as a composer is well known to be exceptional for an amateur.

The St. John Sun understands that notice has been given to the Nova Scotia Steamship Company to terminate the present contract for the service between St. John, Digby and Annapolis, with the view of inviting tenders for increased mail accommodation on the route. This step, says the Sun, will be hailed with delight by the business men of the place, most particularly the merchants of St. John.

A correspondent sends us the following:—According to the statement of an uncle of the young lady whose name is all plain, her name was not Simpson, but Baker, her father being Martin L. Baker, formerly of Wilnot, Annapolis Co.

A basket social was held in the Centennial Methodist church, Margareville, on Wednesday evening 5th inst. A good crowd assembled, and the evening was stormy, and bidding on the baskets was quite lively. About forty baskets were sold, and the amount realized was \$33.50. Young and old seemed to participate in the enjoyment of the evening. The proceeds are to go to purchase a Sunday School library.

The house of Mr. Aaron Wile, on the Neaves' Road, Dalhousie, was totally consumed by fire on Monday, 28th ult. The fire was supposed to have been caused by a spark from the chimney falling in the shingles. Only Mrs. Wile and one or two small children were at home at the time, and no one did anything to stay the progress of the flames. Nothing was saved but furniture and two, and a few small articles. Mr. Wile is a poor man, and the loss is a heavy one to him. He lost in addition to his furniture, all his provisions, and between 100 and 175 bushels of potatoes.

Imperial Parliament was formally opened for the session of business on the 5th inst. Mr. Gladstone's speech stated that the regulation of the Newfound fisheries would be discussed, referred to treat complete, and under discussion with Portugal, Mexico, Turkey, Spain, Cairo, and at this time, the other two men were standing near by; but it does not appear that they made any serious objection to the door, as when one of those who came in to see what the disturbance was, attempted to close the door, Mitchell resisted him.

Some persons here interested on behalf of Mr. Greenleaf, and regular male caused. During which the large pane of glass was smashed out of the windows of the hotel. The three windows were finally got outside, and a little later four or five men entered the hotel, and went in pursuit of the former. Two of them were overhauled and punished.

That same night, or rather morning, between 12 and 2 o'clock, Greenleaf was arrested and lodged in jail, where he nearly suffocated by being packed in a self to death, together with causing an extensive conflagration. About 3 a. m. two constables went to the jail, and the prisoner was being, and on hearing the Session House heard a cry of "Fire," which they found to be a fire in the jail, which like a rat in a hole. Water was procured, and after some trouble the fire was discovered, when a hole was discovered in the floor about two feet in diameter. The prisoner was probably too much intoxicated to know what he was doing, and being cold, lighted the fire without thinking of the consequences. The jail is a disgrace to the town, and not fit to put a human being in cold weather, under any circumstances.

The next day both Greenleaf and Mitchell were arrested, and brought for examination before Justice Cox, who committed the whole case for trial at the June term of the Supreme Court. The outlook is a bad one for the prisoners, as Mr. Greenleaf is determined to push the case to the extremity of the law.

Greenleaf is a married man, and is a hard wood finisher at the furniture factory, and when not in liquor is a quiet, hard working man. Mitchell is a laborer, and is a very good and sober. Curran is a lumberman, and the same may be said of him. When in liquor, however, and being extremely powerful men they are great trouble-makers. Rum caused the whole trouble, and we would suggest to the authorities to find out from the prisoners, if possible, from whom the liquor was obtained, and punish the seller or sellers to the full extent of the law.

We would draw our readers attention to "Adela's" interesting "Notes from Geneva," with perhaps, this little improvement is being made in every minister's outfit apart from his regular salary.

The Trotting Match.

The long-talked-of horse race came off according to announcement on Thursday last. The day was by no means pleasant, nor was the travelling good, but notwithstanding, a large concourse of persons assembled from all parts of the County, and also from Kings Co. The following horses took part in the race: Napoleon, owned by J. Lewis Cox, of Canning.

Knapart, owned by C. R. Bill, of Blitworth.

Hart, owned by Daniel Feindel, Middleton.

Brigatowa Charley and Trotting Dick, owned by T. A. Foster, and J. Avari Morse respectively, of this town.

Several horses that were expected to take part in the race, failed to put in an appearance. The heats were generally enough contested, but were not sufficiently noticeable to be given separately.

The contest lay principally between Trotting Dick, the former holding third and fourth places respectively in the last heat, but did not run afterwards. Napoleon was a scrub horse, and his race as well has been ruled out after the first heat. He broke coming in, and in the last heat he was driven to the place. It was thought the Bridge town horse would break but did not, and came in some distance ahead, winner of the heat. In the 2nd heat Napoleon was second in crossing the line, but the judges gave second place to Trotting Dick, on account of his position for running. In the 4th heat Charley was set back to third place for the same reason, and Napoleon was second place. First money in the race was taken by Charley, 2nd by Napoleon, and 3rd by Trotting Dick.

The purse raised was not as large as anticipated, as entrance money was placed at \$5 instead of \$10, as was first intended. \$75 were only raised, divided into three parts, of \$40, \$25 and \$10.

Below we give a summary of the heats:

Brigatowa Charley, 1 1 3 3 1
Napoleon, 2 3 1 1 2
Charley, 3 2 2 2 3
Trotting Dick, 4 5 2 2 3
Hart, 4 5 2 2 3
Hart, 4 5 2 2 3

We must not omit to make mention of Knapart, the horse owned by Mr. Bill. The animal is one of the most beautifully proportioned beasts we have ever seen. It is a fine specimen of a race, and it will undoubtedly ensure him a good record in a few years time. A London correspondent purchased in Kentucky when but a year old, for \$2,300 we understand.

Charley was his last year, and was purchased in Kentucky when but a year old, for \$2,300 we understand.

To-morrow is St. Valentine's Day.

Cetewayidied of heart disease recently.

Steamer Notling Hill struck an iceberg and has been abandoned at sea.

At Calgary last week, a negro murdered a young New Brunswick carpenter by chopping off his head.

Darius Siroon, of Yarmouth, has been abandoned at sea. The crew and seven of the crew were washed overboard.

Bratling by a motion of the Imperial House has been called upon to resign his seat.

The North American Rubber Co., of Quebec, is to be shut down. The business will be transferred to the Canadian Rubber Co.

James B. Duffus, Esq., one of the most prominent business men of Halifax, died on the 10th inst. of inflammation of the kidney.

We learn that about \$35 was realized at the Tea and Sale last evening connected with the Baptist Sewing Club. The hall was crowded.

The Nova Scotia Sugar Refinery has declared its first dividend—five per cent. The institution is rapidly recovering from the bad management of the last couple of years. It is again profitable. The refinery shipped eleven cars of sugar to Ontario cities on Monday.

There is a boom in Scott Act business in Charlottetown, P. E. I. One man has been issued against him for non-payment of taxes, and another individual has had less than six served on him.

A BARGE OF ICE.—For some months past young men have been using only ice in a near Provincial town. Building a little at times and then relapsing into the same state of mind. The ice was considered thoroughly hopeless, and his friends were only anxious that he should receive the best medical attention. One of these young ladies, particularly interested, happened as it was generally understood, to be a young lady who works ago the invalid revived considerably and was able to be removed from the hotel where he had been lying, and a wedding ceremony, quietly performed, united them in a closer bond, which was followed by a brief period of continued devotion to the bride of which it need not be said that she has not been less attentive and tender to her husband, the young lady continued to be a devoted wife, and can be more appreciated from its reality. The incident is a touching one, and can be more appreciated from its reality. The incident is a touching one, and can be more appreciated from its reality.

The Devil's Bridge.

DANGERS OF THE SPOT—WHERE THE COLONIES STRUCK AND FOUNDED.

From Boston Herald

Martha's Vineyard is the largest island in England, Mount Desert being next in size. It is just about east of the tip of the main land, which is Woods Hole. The West Chop light-house, the most northerly extremity of Martha's Vineyard, is in N. lat. 42 deg. 28 min. 55 sec. and W. long. 70 deg. 36 min. 25 sec. The extreme length of the island from east to west is about 20 miles. At one point the island is only about 1/2 mile wide, and is 1/2 mile wide. The island is an irregular triangle in shape. Martha's Vineyard is known principally through its winter resorts, chief of which is Cottage City. It is a beautiful spot, and is a beautiful spot, and is a beautiful spot.

Miscellaneous.

Two or three years ago a handsome church that was being built in one of the smaller Belgian towns was fast approaching completion. One thing, however, was still lacking—the gilded roof that was to crown the summit of the tower. But owing to some mistake, the scaffolding was found not to have been carried high enough up to enable the workmen to fix this gilded roof. At this juncture two of the men came forward, and offered to get over the difficulty by the one of them standing on the broad shoulders of his companion. Brave fellows they must both have been, for their strong faith in God and in each other served them well. He had been to undertake such a perilous task, but his strong faith in God and in each other served them well. He had been to undertake such a perilous task, but his strong faith in God and in each other served them well.

The operation of fixing and soldering the weathercock only occupied a few minutes, but each minute seemed to be long hours to the spectators. At last the dangerous job was completed, and with a sigh of relief the assembled multitude breathed freely once more, and exclaimed aloud, "Thank God!" Impatient to congratulate his brave fellow-citizens, the people wondered why the broad-shouldered man tarried so long on his lofty perch, and why, when he at last began to descend, his usually elastic step was slow and tottering. Fearing something was amiss, he hastened to the foot of the scaffolding, just in time to see him sink powerless to the ground. The sad cause of his weakness was soon apparent, for his shoulders, arms, and breast were covered with burns. Little had the gilding covered the scaffolding, just in time to see him sink powerless to the ground. The sad cause of his weakness was soon apparent, for his shoulders, arms, and breast were covered with burns.

How Would You Like It? Young man? How would you like it if you had to stay in the house nine days in the week and hear nothing but discussions on shirt buttons and historical reminiscences about busted suspenders bulging? How would you like it if every time your wife saved a few dollars, she would come home at 10 o'clock in the morning with her back teeth afloat and pull every door bell in the neighborhood out by the roots? How would you like it if you met her on the street with her cocked hat on the back of her head, while she was doing her utmost to make sausage meat of every ash-barrel on the sidewalk? How would you like it if she stood on the street corners, or in front of theatres on sabbath days and winked at all the fellows as they came out? How would you like it if she chucked the handsome waiters under the chin and called them "Dogs"? How would you like it if she went out to the club every night and came home with her breath smelling like a decayed skunk? How would you like it if you had to have all the children of the household attend to all their wants, and then receive only looks blacker than a ton of coal for your pains? How would you like it if you had to live all your life with an amalgamated brute as yourself? Young man, do you ever stop and think that your wife has a tender, loving heart right under the left wing of her corset that must have been terrible tender and loving and brave to have said "Yes" when the minister asked the fatal question? Drop it, young man, or one of these days that tender, loving heart will break, and then you'll have to take the children and go live with your mother-in-law. Then God help you! We're safe. We have neither mother-in-law nor children. —A wise speaker at a recent meeting of Ohio teachers pointed out that mischief in a school-boy is not mean and misdirected energy; and that the teacher should be good-tempered and large-minded enough to direct judiciously. "Standards differ," he added, "as to what constitutes the best test for a good teacher. The only proper estimate of value in the school room is to develop true man and woman. Character is of more importance than scholarship."

—Phew! a blessing it is, says Pat, slightly modified, that night before comes in late in the day, when man is all tired out and he couldn't work more at all, at all, not even if it was morning.

Agricultural.

An interesting experiment on the saving of ensilage recently took place on the farm of Mr. George Bolster, Curshaw, a gentleman who conducts an extensive system of agriculture in this county. As we believe this is one of the first tests successfully carried out in the Province of Munster of the efficiency of the ensilage system, which is so calculated to assist the establishment of winter dairies in the South of Ireland, we have taken some pains to ascertain the details of Mr. Bolster's experiment. Ensilage it may be mentioned, for the information of the uninitiated, is green food, such as grass, etc., preserved in its succulent state for use in the winter and early spring, when it is no longer to be found growing in the field, and when, therefore, in its absence cattle must be provided with turnips, mangels, dry hay or beer and grains, etc., all of which are either expensive to the farmer, or, in the case of winter dairying, necessarily impart a more or less objectionable flavor to the butter produced. It will thus be seen that if natural food, such as grass, etc., can be provided in the winter season, when the price of butter is at its highest, and advantage of an unlimited nature is at once to be derived from its use. A silo is the pit or receptacle, made as air-tight as possible, in which the green food is stored for preservation. To turn to Mr. Bolster's case, the silo was a house 14 feet long by 8 feet wide, and 9 feet in height. On the 1st of July last he commenced to fill this chamber with grass cut from his lawn. The grass is stated to be well and rank, the lawn being rich and overabundant by trees. On the date mentioned Mr. Bolster got the grass out into two inch lengths, and put in a sufficient quantity to make a layer of four feet high. On this plan were laid and sufficient stones to weigh 100 lbs. to the square foot, which had the effect of compressing the mass to 18 inches in five or six days. The planks and stones were then taken off, and the same quantity of grass as before laid on. This was repeated four times, until the silo was partly filled. Mr. Bolster states that he only went to the silo on wet days when he could not carry on the ordinary hay-making operations, and that he invariably put in the layers of grass in a thoroughly wet state, and on the last layer being completed he doubled the weight at first laid on. Thus the silo and its contents remained until the 1st of Dec. At this date Mr. Bolster resolved to ascertain the result of his labors, and was rewarded by finding the mass in a very satisfactory state of preservation. The ensilage is of a light-brown colour, and so far as can be seen, retains all the nutritious characteristics as well as the weight of grass when originally stored. At first the cows put it sparingly, but, after a few days, took to it with a keen relish; their milk has increased since they have been fed upon the ensilage, and they look in excellent health. Mr. Bolster states that one acre of grass made into ensilage would provide more feeding than two acres made into hay; he says however, that there is always some danger of disappointment in case the construction of the silo is defective, and if it is not sufficiently weighted and suitable measures adopted for exclusion of the air. He remarks that the system might prove a boon to farmers, inasmuch as double the quantity of provender can be procured at the same cost as other food; also, that space can be economically and water obviated. Dairy farming may thus be conducted in a more profitable manner than heretofore, and winter food secured irrespective of wet weather. We have been afforded an opportunity of seeing a small quantity of butter from Mr. Bolster's dairy, produced by ensilage fed cattle, and we testify that it does not seem to possess any of the rank flavor apparently so inseparable from that derived from cows which are nourished with the usual classes of winter food feeding. It should be added that similar experiments have been adopted with success in the district by Mr. Bolster have also been conducted this year in the midland Irish counties and also in various parts of England and Scotland, and return demonstrate that where proper precautions have been adopted these experiments have met with much success.—Irish Exchange.

STRENGTH IN ROSS.—The Pittsburg Stockman, in a recent issue, says: "Some good horses are addicted to stumbling while walking or moving at a slow trot. A well-versed veterinary states that there are two causes that would tend to produce this faulty action; one, a general weakness in the muscular system, such as would be noticed in a tired horse; the other, a weakness of the exterior muscles of the leg, brought about by carrying too much weight on the toe. To effect a cure, he adds, lighten the weight of each front shoe about four ounces; have the toe of the shoe made of steel instead of iron, it will wear longer; have it rounded off about the same as it would be when one third worn out, in order to prevent tripping; allow one week's rest; have the legs showered for a few minutes at a time with cold water through a hose, in order to create a spray; then rub dry, briskly, from the chest down to the foot. Give walking exercise daily during this week for about four or five days. When you commence driving again on the slow jog, either walk or trot, do not go back away, but do not proceed for at least several weeks. By thus making the habit of stumbling from either of the above causes will be pretty well overcome."

A clergyman having received a public document which was ordered to be read in all churches, and which was particularly objectionable to the people told his hearers that, though he had positive orders to read the declaration, they had none to read it; they might therefore leave the church. They took the hint, and when man is all tired out and he couldn't work more at all, at all, not even if it was morning.

—Phew! a blessing it is, says Pat, slightly modified, that night before comes in late in the day, when man is all tired out and he couldn't work more at all, at all, not even if it was morning.

Turbot, Nov. 5, '83.

ADMINISTRATOR'S Notice. ALL persons having legal claims against the estate of Thomas J. Mangrove, late of Margareville, deceased, are requested to render the same, duly attested, to within three months from this date, and all persons indebted to said estate, are requested to make immediate payment to Mrs. LEVINTA MARGROVE, or ELIZABETH L. MARGROVE, Administratrix. Turbot, Nov. 5, '83.

PURE BRED ESSEX HOGS! THE subscriber imported in 1882, a number of Pure Bred Essex Hogs from the United States, and in crossing them with other breeds, have proved them superior. Read what is said of them by a large breeder in New York:—"They are the finest hoggers in the world."

ADMINISTRATOR'S Notice. For the Ladies.

Dainty Linens. MISS LINCOLN'S DEMONSTRATION OF ORNAMENTAL DISHES.

One doesn't expect to have diplomatic puddings and gâteaux every day for dessert, unless one has a French cook with a corps of assistants, but they do find their place on occasions on the table of every family who enjoy first the seeing and then the taste of something 'real good,' and unusually dainty. It is not that the preparation involves so much labor, but it does involve accuracy, care and time. Most ladies like to make such things, as they do them very much credit, and it is a nice thing to say, when the lovely dish appears. "I made that myself." The week's demonstration lesson at the Cook School was on "Cakes, Frosting and Desserts" and was illustrated by Miss Lincoln, who was assisted by her daughter, Miss Mary, and her son, Mr. John.
