Craig Amendment for Altering Boundary Commission Provisions is Defeated by 302 Votes to 60—Quiet Again in Belfast—Conditions on Ulster Border.

(Canadian Press Cable.)

London, Feb. 17.—The bill establishing the Irish Free State passed its second reading in the house of commons today after an amendment offered by Captain Charles Craig, leader of the Ulster Unionists, for altering the boundary commission provisions of the Anglo-Irish treaty had been defeated by a vote of 302 to 60.

THREE STUDENTS KILLED

Durham, B. C., Feb. 17.—Three students of the University of North Carolina were killed and three others injured, when an auto in which they were riding was struck by a southern railway passenger train at a crossing on the outskirts of Durham today.

As Hiram Sees It

"Hiram," said the Times reporter to Mr. Hiram Hornbeam, "how is the health of the Settlement this winter?" "Fine," said Hiram. "We ain't had no influenza to speak of, and I think we may know more about it if we keep them there kilowatts working regularly, was taken seriously ill a week ago, with a mysterious malady. Examination by X-rays disclosed that his intestines were full of shot and that lead poisoning had resulted. Physicians removed more than 200 of the shot, but 100 shot still in the digestive canal. Preparations were made for a second operation. He had swallowed the shot in eating wild fowl whose carcasses he had sprinkled with them.

BULLOCK IS
TAKEN AGAIN

Hamilton, Feb. 17.—Matthew Bullock, a negro who was held here for some weeks at the request of the Norfolk, N. C., authorities on a charge of inciting race riots, and who was released on order of the dominion immigration authorities, was re-arrested today. The order of the Canadian immigration authorities gave him permission to remain in Canada for three months.

NOTABLE UNION FOR
RELIGIOUS EDUCATION

Chicago, Feb. 17.—The Sunday School Association of Evangelical Denominations, representing the religious education interests of more than thirty Protestant denominations, and the International Sunday School Association, representing the United States and nine provinces of Canada, unanimously voted yesterday to merge their forces into one new organization to be known as the International Council of Religious Education.

Review of the Ross
Report About Hydro

Section I. (By Herbert Phillips.) The report on the light and power situation in Saint John, submitted by R. A. Ross, inasmuch as it discusses established facts, provides striking confirmation of the calculations of the N. B. Power Commission's engineer and of the conclusions which I have drawn from them.

BRITTON AND
SHADE TONIGHT

Veteran Against a Speedy Ring Youngster.

The N. S. Amateur Hockey
League May Not Finish—
U. N. B. and Mt. Allison—
Late News of Sport.

New York, Feb. 17.—Jack Britton, who was whipping first-rate pugilists before Dave Shade of California ever heard of a boxing glove, will defend his world's welterweight champion title against the youngster in a fifteen-round decision match here tonight. Shade has had marked success since he transferred his activities from the west coast to the east. His aggressiveness has carried him to victory in a majority of his bouts. Britton has not been very active in the last year, excepting in a series of bouts with lesser lights. They say he has not the punch nor the shiftness that marked his bouts of several years ago with Ted ("Kid") Lewis. Tonight's bout, in one respect, has been likened to the Stanislaus Zyzanski-Earl Caddock wrestling match of several weeks ago. Stanislaus, the champion, nearing the fifty mark in years, defended his title against Caddock, just turning twenty-eight. Caddock was good and aggressive, but Stanislaus still has the title.

TOWN OF SUSSEX WANTS HYDRO

Town Council Instructed to Employ Electrical Expert to Report on Matter, and to Proceed with the Necessary Legislation.

(Sussex Record.)

There was a large and representative gathering of ratepayers at the public meeting held in the Agricultural School Building, on Monday evening, which had been called in connection with hydro-electric matters. The principal object of the meeting was for the purpose of discussing the advisability of engaging the services of an expert and get advice on the probable cost of distribution of hydro-electric in the town of Sussex, and other information on the subject necessary before any definite plan could be placed before the public for its pleasure to act on.

Mayor McKenna occupied the chair. His Worship read the correspondence that had been carried on up to date between the town and the Hydro Commission, and also explained what had taken place at a meeting recently held here, when Chairman E. A. Smith and Engineer Fos of the Hydro Commission held an informal talk with the members of the town council.

He stated that the commission had agreed to supply the town of Sussex with hydro-electric power at a cost not to exceed three cents per thousand K. W. H. and possibly at a lower figure.

Alderman A. E. Pearson addressed the meeting and explained some of the reasons why expert opinion was needed.

On motion of C. E. Givan, seconded by W. E. McLeod, unanimously passed, the town council was instructed to secure the services of an expert to prepare an estimate on the cost, etc., of a plan for the distribution of hydro-electric in the town of Sussex, and to report result of same at a public meeting to be called for that purpose.

W. D. Turner moved, and H. W. Perkins seconded a resolution, which also passed unanimously, that the town council be authorized to have a bill prepared to embody the necessary items required by the town of Sussex, in order that it might be able to distribute hydro-electric, and to have this bill passed at the next session of the local legislature. This bill not to become law until it had first been endorsed by the ratepayers by the taking of a plebiscite.

As soon as the expert's report is received by the town council, another public meeting will be called, when the whole question of hydro-electric will be discussed and thoroughly gone into.

WIFE AND FAMILY.

CARD OF THANKS
Mrs. D. Monahan and family wish to thank their many friends for sympathy and kindness shown in their recent and bereavement.

ANOTHER ROW AMONG ACTORS

This is a Union Matter With a "Dish of Tea" an Incident.

New York, Feb. 17.—Threatened "labor trouble" because English actors now here refused to join the Actors' Equity Association, may be settled before tonight. Samuel Gompers, president of the American Federation of Labor, was expected to call and have tea with

Alfred Decourville, English producer, and there were prospects that the two would reach an agreement.
Mr. Decourville, whose London play is having a run in Manhattan, brought fifty-five English men and women here for the musical comedy a month ago. He complains that the first rehearsal brought members of the Equity Association to the stage with demands that the British players affiliate with their body. They refused, and, according to the producer, "drastic action" was threatened.
"I suppose," he said, "that Mr. Gompers' dish of tea with me today constitutes the drastic action."

Easy for U. N. B.
Fredericton, N. B., Feb. 17, 1922.—The U. N. B. basketball team played an exhibition game against the Normal school on Thursday afternoon. The score was 46 to 14, the Normal school team being outclassed.
Conditions in Mexico.
Mexico City, Feb. 17.—Mexico is tranquil, with the exception of a few places in the states of Michoacan and Jalisco, according to reports from postmasters to Secretary of the Treasury De La Huerta in answer to his request for authentic information regarding reported rebellions against the central government.

Cabinet Members and Departmental Officers Engaged with Question—Must Pick Immigrants.

(Special Despatch to Toronto Globe) Ottawa, Feb. 12.—The problems of immigration may form the subject of legislation at the coming session of the new Parliament and the Government is giving it intensive study. When the departmental estimates are presented to the House some outline of intended policy will probably be ready. Authorities are agreed that a development of immigration is essential to national expansion and it may be a large part of the solution of the National Railway problem. It is pointed out, however, that conditions are very different now from those of the rosy days, about 16 years ago, when the tide was at the flood. At that time land in plenty adjacent to the railways was available at nominal rates. Scarcely in the day left of Northern Ontario and Quebec, this generally speaking is not now the case, moreover, conditions are not so conducive to profitable farming as they were in the past. People nevertheless must be secured and the problem is largely as to where they will come from. Great volumes of British people are ready to come but recent statistics disclosed that only 8 per cent of the people of England are now engaged in systematic agriculture. The classes which would come, while desirable people, are mainly those who would head for the cities where already, the problem of unemployment is very great. What is wanted is a people who will go on the land. As regards Scandinavian, French, Belgian and Dutch immigrants, such classes would be more than willing, but all of these countries ban propaganda calculated to encourage emigration from their shores. When the next potential source of supply is turned to—the countries of Central Europe—the people are available and can be secured with little trouble, but the difficulty is the war-begotten prejudice at home. The soldiers and Ukrainians and others are regarded as splendid pioneers and industrious farmers of farm helpers, and the aptitude of these conditions has been demonstrated in the West. They are among the most peaceful citizens and the best producers. Owing to the difficulties mentioned in regard to British and also Continental immigration, and the further fact that the public Treasury is not in a position to assist the newcomers extensively, the situation in regard to Central Europe will be fully looked into. The door will not be opened without due inquiry and a survey of all the prospects, but there is considerable disposition to the view that immigration of the future should include selected classes from the countries likely to be as industrious and as productive as those already here. Need Pioneers Along C. N. R. Pioneers are needed along the now unprofitable lines of the Canadian National Railway, and apart from physical standards it is felt that too severe restrictions are not advisable. Any ultimate policy, however, will include British, Continental and American immigration. Many who give the question study see in live immigration the solution of the railway problem, the financial problem of the public debt and the material problem of commercial prosperity. Associated with immigration and vital to its success is the economic situation and the development of such a fiscal policy as will better the condition of the agricultural communities. The two problems will be grappled with together.

CUT PAY ON VESSELS IN THE C. G. M. M. SERVICE

Halifax, N. S., Feb. 17.—Wage cuts of \$10 to \$20 a month in salaries of officers and ten dollars a month for sailors and firemen became effective in the Canadian government merchant marine this week, so it is announced here. Sailors and firemen, under the new schedule, receive \$80 a month in addition to being "found" on board ship.

THREAT OF GREAT MINERS' STRIKE ON APRIL 1

Indianapolis, Feb. 17.—President Lewis of the United mine workers last night predicted speedy adoption by "an almost unanimous vote" of the scale committee report declaring against any wage reductions for soft coal miners and increases for anthracite workers, backed up by a threat of a nation-wide strike on April 1.

PERSONALS

Quite an improvement in his condition was the pleasing report about John Russell today.
Miss Flossie Titus and Miss Margery G. Simonds left this afternoon for Fredericton to attend the U. N. B. ball tonight.
Mayor Frank Kennedy, of St. Andrews, is in the city today on business. He reports prospects bright for a busy summer for his town, particularly in regard to the tourist traffic.
Captain E. E. Tedford of Montreal, marine superintendent of the Canadian Government Merchant Marine, Limited, is in the city today.
F. J. G. T. Jones, Thos. G. Jones, who was suddenly seized with illness yesterday morning, is somewhat improved today although he is still confined to his room at the Barker House. Mrs. White arrived last evening to be with her husband.
W. B. FAIRWEATHER, Sussex Recorder—Wesley B. Fairweather, for over thirty years a prominent business man of Digby, N. S., died Tuesday after a long illness, heart failure being the cause of death. He was born in Bloomfield, Kings County, seventy-five years ago and was a son of the late Hector and Elizabeth Fairweather. He leaves his wife, who was Mary Secord of Apohaqui, N. B., and also one daughter, Mrs. F. E. Mitchell of Schenectady, N. Y. He was a Baptist in religion and an ardent Oddfellow, having been a member of Granite Lodge No. 1 or Nashua, N. H., fifty years next day although he is still confined to his room at the Barker House. Mrs. White arrived last evening to be with her husband.
The funeral will take place on Thursday morning, and will be conducted by Rev. D. E. Hatt, pastor of the Baptist church, and by St. George Lodge I. O. O. F. The body will be brought to Sussex for interment, and will likely be accompanied by a small delegation from Digby.

GOVERNOR'S RESIDENCE

A Fredericton despatch says that His Honor the Lieut. Governor and Mrs. Fugley are expected here this evening to inspect Evelyn Grove, which has been leased as a gubernatorial residence. The residence will be opened next week in preparation for the session of the legislature.
Piano lessons, reasonable.—43 Horsfield street, right hand bell.

MCDONALD CASE TO NEXT SESSION

(Special to Times.) Fredericton, N. B., Feb. 17.—The appeal court met today, present were Chief Justice Hazen, Judge Berry and Judge Crockett.
In McLean et al vs Mullis, H. A. Powell, K.C., contended; J. B. M. Baxter, K.C., in reply. The court consisted of the three judges.
The divorce appeal of McDonald vs. McDonald, a St. John case, in which Dr. Baxter, K.C., was to support an appeal from the judgment of Judge Crockett, stands until next session.
In Carmichael vs. Boves et al, Dr. Baxter, K.C., for defendants, supported an appeal from the judgment of Mr. Justice Crockett and moved to enter verdict for the defendants, or for a new trial.
M. G. Teed, K.C., counsel for the plaintiff, asked that Jacob Dewitt of Quebec bar be heard with him in this case. Chief Justice Hazen said that the court would extend that courtesy to Mr. DeWitt.

WILL MR. LARKIN RECEIVE TITLE?

(Canadian Press Dispatch.)
London, Feb. 16.—Apostrophe of the speculation on the possibility of Peter C. Larkin, the new Canadian high commissioner, receiving a title, the Canadian Press learns from an authoritative source that there is no doubt such an honor would be readily extended if the Canadian government decided to recommend Mr. Larkin for such distinction. The initiative would rest with Canada. In the case the Canadian government fails to amend its stand on the question of titles, Mr. Larkin will be the only high commissioner in London without a title.

CUBA CHEATED IN STAMPS.

About \$10,000,000 in Revenue Stamps Printed by Some One From Old Dies
Havana, Feb. 17.—According to a report made by Chief Alfonso Pons of the Judicial Police of the Second Criminal Court, large quantities of internal stamps, which are in circulation and from which the government derived no income, were used by the Government for similar stamps and probably on the same press. Unofficial estimates put the amount of stamps involved at about \$10,000,000.

"WHEN WE CAN HEAR ANTS TALK"

West Orange, N. J., Feb. 17.—At present, Thomas Edison is working to improve his amplifier for the use of radio and telephonic communication. He volunteered—
"Oh, I'm busy on a lot of things. The time going to come when we can hear ants talk as they crawl about the floor at night!"

NIGHT COUGHS

Terribly wearing on the system is the cough that comes at night and prevents sleep.
The constant coughing keeps the lungs and bronchial tubes in such an irritated and inflamed condition that they get no chance to heal.
You will find in
DR. WOOD'S NORWAY PINE SYRUP
a remedy without an equal for soothing the lungs, loosening the phlegm, strengthening the breathing organs and fortifying them against serious pulmonary disease.

Mr. John McKerney, Lower Montague, P. T., writes:—"About three years ago I was taken with a severe cold and at night with the terrible annoying, hacking cough. I tried several remedies, but they did me no good. Finally I saw Dr. Wood's Norway Pine Syrup advertised and at once it gave me relief, and after using four more I had all gone. Now I always keep 'Dr. Wood's' in the house, and shall recommend your wonderful remedy to others."

prove his amplifier for the use of radio and telephonic communication. He volunteered—
"Oh, I'm busy on a lot of things. The time going to come when we can hear ants talk as they crawl about the floor at night!"

He said the radio is the greatest invention of the age, and indicated that the amplifier, which can "step" a sound up thousands of degrees and could be used in sending messages over the face of the earth, is the greatest possibility of the age to come.

THE EVENING TIMES AND STAR, ST. JOHN, N. B., FRIDAY, FEBRUARY 17, 1922

The Evening Times and Star

The St. John Evening Times is printed at 27 and 29 Canterbury Street, every evening (Sunday excepted) by The St. John Times Printing and Publishing Co., Ltd., a company incorporated under the Joint Stock Companies Act.

THE ROSS REPORT.

The man in the street is wondering why the Ross report should confuse the public mind by a discussion of the Musquash development. What has that to do with the case? The hydro-electric commission, behind which is the government of the province, is ready to contract for the delivery of a stated amount of power at a stated maximum price.

THE HYDRO QUESTION.

To permit the hydro question to develop into a mere controversy between engineers would exactly suit the purpose of the New Brunswick Power Company. Then no action would be taken, and when the power was available at the sub-station in Fairville except through the company's system.

IN IRELAND.

There is much speculation over the question of the effect of the changes in Ireland upon emigration from that country. If peace can be maintained one would expect the Irishmen to stay at home rather than seek homes elsewhere.

THE NEW BRUNSWICK FEDERATION OF LABOR.

The New Brunswick Federation of Labor declined to consider a resolution favoring the sale of liquors, light wines and beers for revenue purposes.

WINTER NIGHT.

The stars are setting in the frosty sky, Numerous as pebbles on a broad sea coast; While the vault the cloud-like galaxy Has marshalled its innumerable host.

LIGHTER VEIN.

"How did you get by at home, Casey?" inquired Mr. Duffy, as he met his companion of the night before.

A Good Guess.

"What is woman's sphere?" asked a lady who is a member of Parliament.

NOT SIR PETER LARKIN.

There is no need to adorn the new high commissioner to London with a title. A London cable says he will be the only high commissioner there without a title.

MARINE NOTES.

The steamer Cabotia sailed at six o'clock this morning for Glasgow via Portland.

POLAND AND THE POPE.

It is with great joy that Poland has learned of the election of Cardinal Ratti to be Supreme Pontiff of the Catholic Church.

GOOD THINGS COMING TO THE THEATRES OF ST. JOHN.

METEORIC CAREER OF A MILLINER.

From Carrying Hat Boxes to Ruling a Great Nation—What's More, It's True. It must be quite apparent to observing people that the tastes of the picture-loving public are becoming more discerning.

ALMANAC FOR ST. JOHN, FEB. 17. High Tide... 3.08 Low Tide... 10.19 P.M.

STAR THEATRE TONIGHT.

Usual Week-end Programme of Mixed Subjects.

HART AND SEMON AT THE UNIQUE.

The programme at the Unique this week-end is excellent. W. S. Hart is featured in The Whistle, a very powerful drama.

FORESTS AND RECREATION.

One of the things about forest conservation which has caused it to advance with rapidity is the fact that it injures no interest and benefits all.

OPPOSE PROPOSED CUT IN WAGES IN THE WEST.

Winnipeg, Feb. 17.—(Canadian Press)—Building trades will oppose the proposed wage reductions approximately 25 per cent. adopted by members of the western building and construction industries.

Clip Your Horses and Cows Get All Your Wool Crop. With a Stewart No. 1 Ball Bearing Clipping Machine. With a Stewart No. 9 Ball Bearing Shearing Machine.

Desolvo Pipe Cleaner. For removing obstructions in closets, washstands, sinks, drain and sewer pipes. It cleans them of accumulations of grease, rags, paper and vegetable matter.

The Discerning Eye and Keen Judgment of Milady. D. MAGEE'S SONS, Limited. Since 1859. St. John, N. B.

Pasteurization Makes Milk Safe. Is it worth your while to take chances when science has provided you with a safeguard and we employ that safeguard.

CANADA'S COAL OUTPUT. British Columbia Produced 20 Per Cent of Total of 13,727,044 Tons.

ST. JOHN REGISTRATION and EMPLOYMENT OFFICE. MEN: 235—Shoe repairer, 237—Fireman, 238—Chauffeur, 244—Office work, 251—Whewright, 257—Checker, 263—Steelworker, 268—Butcher, 276—Electrician, 284—Grocery clerk, 302—Nail cutter, 311—Cleaning and pressing.

MONTREAL FUR SALES. Montreal, Feb. 16.—Silver fox skins were the attraction at the sales of raw furs by the Canadian Fur Auction Sales Co., Ltd., here today and the turnover approximated \$300,000.

KILLED IN NEW GLASGOW. New Glasgow, N. S., Feb. 16.—Jonathan Ford, for thirty years an employe of the Nova Scotia Steel & Coal Company, died today as the result of injuries received through falling down stairs.

FORESIGHT always is better than hindsight. SCOTT'S EMULSION regularly exercise foresight that pays large dividends in robustness.

THE BLEND you have been waiting for. CEYLON & INDIA BLACK TEA. A High Grade Tea at a moderate price.

APPOINTED JUDGES. Ottawa, Feb. 17.—R. G. Fisher of London, Ont., has been appointed to the Supreme Court of Ontario in succession to the late Glenhoin Falconbridge and James A. Malignon of Sudbury.

ALSO MAKERS OF KI-MOIDS (Tablets or Granules) FOR INDIGESTION.

BEAN POT BEANS. For good rich baked beans use plenty of clear fat pork and always bake in the OLD FASHIONED BEAN POT made by THE FOLEY POTTERY, LTD., St. John, N. B.

REVIEW OF ROSS REPORT ON HYDRO

(Continued from page 1.)

Following two days and two nights' earnest discussion of this matter in Montreal, Mr. Ross came to Saint John and before commencing his investigation into the statistics of the case, spent several days more here in an atmosphere charged with propaganda, and in which some zealous "experts" were putting the finishing touches to a Bogy of their own contriving. As to who conceived this Water Bogy first, and why it should have been attempted to stampede the people of Saint John away from this accomplished enterprise at Musquash we are left to doubt, but Mr. Ross has shown of what frail smoke-wraths and brain-fogs the thing was made.

He says that before gauging stations were established on our water sheds the engineer reporting on a project, such as this would be compelled to hazard a guess as to its capacity based on the rainfall at the nearest recording station applied to the area of the water-shed. How unreliable this method was is demonstrated by the tables re-produced in the report. From table No. 5 can be seen that at two stations less than four miles apart, at Fredericton and at Fredericton Experimental Park, the record varies nearly 20 per cent in the mean and as much as 40 per cent some years, and when we consider the percentage of the rainfall discharged by the streams given in table 7 of the report still greater discrepancies are evident. Here is our Water Bogy then, shorn of its mystery. He is computed on the rainfall, and the rainfall is not known. The unknown rainfall is multiplied by the unknown run-off factor and the unknown product is again multiplied by the unknown factor and even this is not known exactly, and the result is Rumor, and Rumor, according to Mr. Ross, may be called Nine Million Kilowatts. If you like, and might be called just as much or just as little if our river drained fertile meadows or virgin forests in Ontario; or open fields in Rhodesia; or the torpid jungles of small islands of the rocky fire-swept wastes described by Mr. Smith in Section 3 of the report.

Leaving this phase of the matter now, and coming to consider the facts that are known, Mr. Ross proceeds:

"In this and the following tables it may be stated that all the figures of gaugings, etc." quoted have been obtained from the Water Power Branch of the Dominion Government and are authentic."

Table No. 1 describes the plant at Musquash and calculates the supply of power available. The method used by Mr. Ross for this purpose is quite cumbersome, especially for the layman to follow, and involves changing the discharge gaugings into inches of rain per square mile, and back again into discharge, when the figures could have been simply applied direct, but the result is about the same, or would have been just the same had the mean between ninety-five feet and 117 feet worked out correctly as 106 feet instead of as 102 feet as used in the report, and had the actual tested efficiency of the generators been used in the computation instead of that assumed. The nature of the probable load in Saint John has been considered by the engineer who designed the plant and high efficiency on a light load is secured by the installation of three units either or any of which may be cut out under light loads and the water stored as required.

The mathematical errors will, I have no doubt, be dealt with by the Commissions' engineers, and the correction will bring Mr. Ross' estimate of the power available in the driest season known equivalent to the twenty-one million k. w. h. claimed.

RECENT WEDDINGS

A quiet but pretty wedding was solemnized in the Cathedral of the Redeemer, Calgary, on February 6, when Rev. H. Robinson united in marriage Miss Jennie Reed Boden, formerly of this city, to Sebert Andrews, of Calgary. Mr. and Mrs. Andrews will reside at Lethbridge, where he is connected with the International Harvester Company.

Painful Sores On Her Ankle

Healed by Hood Preparations.

For two years I suffered greatly from blue veins on my leg. They started with a little sore that grew worse, larger, more painful till it extended around my whole ankle.

I decided to take Hood's Sarsaparilla to purify my blood, with Hood's Medical Soap to wash the sore, and Hood's Olive Ointment to help heal it. It was soon apparent I was on the right course, for as the result of faithfully taking the Sarsaparilla, the sore diminished and finally disappeared. I heartily recommend these remedies to all sufferers from similar troubles. Mrs. John Peterson, Detroit Harbor, Wis.

Week - End Sale

- OF ODDS AND ENDS LEFT FROM DOLLAR DAY AND WINTER CLEARANCE SALES
- We find we have some odd lots and broken sizes left in our stocks that we wish to clear out, and are offering them at great reductions for the week-end:
- Women's 10 Button Gaiters in colors, sizes 3, 4, 5.....\$1.38
 - Infants' Black and Brown Boots, sizes 2, 3, 4.....\$1.20
 - Women's Patent Leather Button Boots, small sizes.....\$1.95
 - Men's Brown Lace Boots, nearly all sizes.....\$4.65
 - Girls' Boots in Various Styles, sizes 11 to 2.....\$2.95
 - Women's Oxfords in Black Kid and Patent Leather.....\$4.85

These are all our usual high quality of goods, and at the prices quoted are real bargains.

HALIFAX HOUSING COMMISSION WORK

Many Buildings Erected in the City and Employment Given to Returned Men.

(Halifax Chronicle.)

Approximately 70 per cent of the dwellings erected in Halifax during the year past were built with the aid of the Housing Commission. The Commission have now under their control 186 houses erected at the cost of \$744,125. Of this number it is estimated that 90 per cent of the houses erected could not have been built without the aid of the Commission, as the owners were not in a position to apply to a loan company.

These facts were brought out when Thomas M. Hayes, secretary, presented his report before the Housing Commission which met at the Board of Trade yesterday afternoon. In his report Mr. Hayes said that during the year the city council approved of the borrowing by the commission of the sum of \$250,000. This and the balance from the year previous amounting to \$5,250, made a total of \$255,250. This amount was disposed of by 138 loans amounting to \$548,374, leaving a balance of \$8,770 unallotted.

Of the total number of houses, 186 now under the control of the commission, including those completed each year since the commission has been in existence, 123 are now completed and occupied; forty-seven are under construction and six are

Skin Eruptions

Are Usually Due to Constipation

When you are constipated, there is not enough lubricant produced by your system to keep the food waste soft. Doctors prescribe Nujol because its action is so close to this natural lubricant.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

For Constipation

Silks a Commanding Feature of the Early Spring Displays

The important place of Silks in the spring outfit seems more assured than for many seasons past. An unusual diversity of weaves and a very comprehensive color range make it possible for you to find just about anything you would want. Silks for outer and inner garments. Conspicuous among them are the following:

BARONETTES—Plain, figured and embossed. These are ideal for sports garments and entirely lovely for many other uses. Honeydew, lavender grey, canna and scarab are among the leading colors. Black and white are also showing. All 39 in wide.

CREPES—Just now there is a great demand for crepe weaves. Among the favorite kinds are: Moleskin Crepes in peacock, brown, tan and black; Crepe Meteor in such new shades as whirlpool, aurora, verdigris, Cuba, as well as black; Canton Crepes and Crepe-de-Chines in Paisley patterns; Georgettes in all popular colorings.

WASH SILKS—Suitable for Blouses, Skirts or Underwear of fine quality. Tricolette is in white, bobolink, whirlpool, paprika, jade and black. Satins are in white only and showing in two particularly nice qualities. Wash Satins are in flash shade and white. Crepe de Chines, Messaline and Habotais are in both light and dark colorings.

BLACK SILK—Bonnet's Silks—If you know this reliable make of silk you will probably insist upon having it. You may now choose a length from among taffetas, fleur deoise, peau de soie and duchess.

Above are mentioned only some of the beautiful silks now showing in our stocks. An inspection will reveal many more, equally attractive and authentic.

Blouses for Spring Costumes

Blouse styles for spring are as varied and delightful as the most exacting woman could wish for. Some new over-blouses and sashed models are very novel and decidedly moderate in price.

Beaded Georgettes, embroidered Crepe de Chines, semi-tailored Tricolettes and tasteful two-color combinations are altogether distinguished looking and may be relied upon to do credit to any occasion. Other jaunty creations are fashioned from plain georgette contrasted with soft waxed net.

Had some White Voiles trimmed with clusters of tucks, drawn work and lace edges are entirely made by hand and are exquisitely dainty, consequently in great demand.

We advise making selections for spring uses now.

(Second floor.)

TOMORROW

Your last opportunity to place orders for free hemming. Wise women will not let this chance go by without taking advantage of it. There are many special values being offered throughout the linen department for the final sale days. A look around will well repay you.

London House
F. W. DANIEL & CO. Head of King St.

Nearly 50 per cent were mechanics, the others being policemen, train car operators, postmen, barbers, clerks, etc. In his report of the expense of maintaining the work of the commission, Mr. Hayes said that the amount of \$3,200 was granted by the city council for the expense of the commission during the year. This amount would cover the year's expenses only by practicing strict economy and doing without needed equipment. He estimated by a rough calculation that the city would benefit to the extent of between \$15,000 and \$20,000 in increased taxation by the houses which were erected.

S. M. Brookfield, the chairman of the commission, expressed himself to 'The Morning Chronicle' as well pleased with the success which has attended the commission. He said he would not recommend the continuance of the commission or the borrowing of any further money, as he felt that their work was now completed.

cathartics— one of the chief causes of constipation?

The quotation is taken from an important paper on the treatment of constipation by a well-known physician

DID it ever occur to you that the cathartic you take to relieve constipation, is the cause of your trouble?

Yet when a number of doctors were discussing this almost universal complaint, one of them said: "Probably one of the most frequent causes of constipation is the indiscriminate use of cathartics." For years physicians have tried to persuade people to give up laxatives and to eat corrective foods instead.

It is now known that Fleischmann's Yeast is a food which makes the use of cathartics unnecessary. Because of its freshness it helps the intestines eliminate waste matter.

People who are adding Fleischmann's Yeast to their daily diet find that their body functions are kept normal and regular. Eat 2 or 3 cakes of Fleischmann's Yeast before or between meals every day. Place a standing order with your grocer. He will deliver Fleischmann's Yeast fresh daily.

THE EVENING TIMES AND STAR, ST. JOHN, N. B., FRIDAY, FEBRUARY 17, 1922

THE ROSS REPORT

C. O. Foss Makes Convincing Reply to Arguments of Montreal Engineer Regarding Musquash Power

Chief Engineer of N. B. Electric Power Commission Declares That Errors in Mr. Ross' Calculations Are Plain, and Says Engineer Did Not Even Go to Musquash or Examine the Water Shed-off Percentage—Shows That All Records Justify Belief That At Least 21,000,000 K. W. H. Available at Musquash.

To the Editor of The Times:
Sir—The "report" of R. A. Ross, of Montreal, purporting to estimate in section 1 the available power of the Musquash development of the New Brunswick Electric Power Commission, calls for some comments by the engineers of the commission. His deductions, based partly on authentic engineering records and largely on theoretical text book assumptions, differ so widely from the practical deductions of our own engineers, including the firm of C. H. & P. H. Mitchell, of Toronto, and Mr. Henry Holgate (a former partner of Mr. Ross), consulting engineer to the commission, that in justice to the general public and to these engineers we shall be glad if you will publish these comments.

It is unfortunate that the city of St. John should have gone to the expense of procuring this document which in so far as actual engineering data is concerned is a reproduction of published records by the water powers branch of the Department of the Interior, rainfall records of the Dominion meteorological office, and annual reports of the Hydro-Electric Power Commission of Ontario, all of which are available to anyone and all of which could have been had from this office for the asking. The calculations based on this data could have been made by any high school student to at least the degree of accuracy in the report.

Mr. Ross deals with three features of the Musquash development—the amount of power available, the question of a steam standby, and the cost of distributing electricity for lighting purposes in St. John. His conclusions under the first two headings reflect upon all the engineers connected with the works, his method of dealing with the third question—of distribution—is apparent to all who read. The value of his estimates may be gauged by the fact that an item of 50 per cent of \$200,000, or \$200,000, is put forth as a mere guess.

With this section of the report we are not directly concerned but shall confine our remarks to the two questions of available power and a steam standby.

Mr. Ross as an engineer estimates the power available at Musquash at 17,000,000 k.w.h. for the dry year on record in the past fifty-nine years. We estimate it at 21,000,000 k.w.h.

Mr. Ross as a theorist estimates the power for a like year at 4,000,000 k.w.h. Our engineers have confirmed their calculations to the realm of engineering.

As an engineer he takes the lowest run-off records as gauged by the Dominion water powers branch, makes an error in the amount of head, in the efficiency factor of the generating unit, and even here guessing at the area of the drainage area which neither he nor any one else knows, he computes the available power at 17,000,000 k.w.h. in the dry year on record.

In Table 1 of his report he states the static head on the east branch is 95 feet and on the west branch 117 feet, or an average of 106 feet. Our engineers compute the average between 95 and 117 to be 106. He goes on to state that with this head of 102 feet with a generator efficiency of 90 per cent and a wheel efficiency of 60 per cent, "which seems fair when considering the fact that on the St. John demands the load factor of the operating machines will be for many hours 93 per cent, or less, the number of cubic feet of water at the wheels necessary to generate one k.w.h. is 579 c.f. As a matter of fact at this assumed efficiency which is only 54 per cent over all it would require 708 c.f. per k.w.h. It might be pointed out that static head is the difference in elevation between tail water and head water and could not in any case be used directly to compute power. The actual working head is less than the static head by the amount of water lost in the racks, gates, pipes, etc. In this case, however, Mr. Ross has grossly underestimated the head supplied him by the commission and erroneously called it static. The generators have efficiencies guaranteed as follows: Full load 95 per cent, three-quarter load 94.2 per cent, one-half load 92.5 per cent. They have been tested before shipment, under the inspection of our engineers, and have exceeded their guarantee. We propose to operate no machine below three-quarter load except for brief periods and our overall efficiency would be 87 per cent of 94.2 per cent or about 82 per cent. We estimate our power on 90 per cent efficiency. The following shows how the engineers of the commission compute the available power:

The water powers branch of the department of the interior have gauged the water on the Lepreau, and have published complete daily reports of the flow of this stream covering the period from April, 1916, to September 30, 1920. They have supplied the commission with the results from October 1, 1920, to September 30, 1921. From the figures for Lepreau the run-off of the Musquash streams can be very accurately estimated in the same proportion as the respective drainage areas: estimated from existing maps at ninety square miles for the Lepreau and seventy square miles for each branch of the Musquash. So that if the mean rate of flow of Lepreau for one year is 360 cubic feet per second, the rate for each branch of the Musquash would be 280 cubic feet per second for that same period. For the climatic year, October 1, 1920, to September 30, 1921, the mean discharge for the Lepreau was found to be 247 cubic feet per second. For this same period a gauging station was maintained by the water powers branch on the west branch of the Musquash river and the actual mean run-off obtained was 190 cubic feet per second. Seven-ninths of the measured mean flow of the Lepreau for this period is 192 cubic feet per second, proving beyond doubt the reliability of the basis of comparison between the two streams.

On this basis the rate of run-off for each branch of the Musquash for three years is as follows:

Good Eyesight

is a bread-winner, good health, and keen mentality.

Without being aware of it we are being kidnapped by our eyes.

No one is secure in "thinking" that their eyes are 100 per cent efficient. It's safest and wisest to have an optometrist examine your eyes.

1917-1918—317 cubic feet per second.
1918-1919—232 cubic feet per second.
1919-1920—246 cubic feet per second,
or for the whole period a mean flow of 265 cubic feet per second for each branch, in estimating the available

power a rate of 180 cubic feet per second for each stream has been adopted.

The net working head at full load on the east branch after allowing for pipe line losses and tidal effect is 95 feet, and on the west branch 117 feet. Assuming 80 per cent efficiency of generation, the west branch will develop 1,914 continuous h. p., or the two combined will develop 3,464 h. p., throughout every second of the year, of at the rate of 2,988 kilowatts throughout the year. This equals over 22,850,000 k.w. hours per year at the generating station, from which it is estimated that 21,000,000 k.w. hours can be delivered at St. John after allowing for all transmission losses.

The apparent 20 per cent discrepancy between the estimate of our engineers and Mr. Ross is accounted for as follows:

Four per cent, due to error in averaging head.
Eighteen per cent, due to low efficiency factor used by Mr. Ross, evidently because he had not familiarized himself with the layout of the plant.

Two per cent, excessive estimate of transmission losses.

Not content as an engineer with condemning the whole project by mathematical errors and ultra conservative use of the engineering data to hand, Mr. Ross goes into the realm of theory and predicts the amount of power from precipitation records obtained miles from the site and from an estimate of the drainage area based on existing maps which may land surveyors in New Brunswick know do not truly represent the actual areas as surveyed.

Why does Mr. Ross say that the gauging records on Lepreau river are incredible? They were obtained by one branch of the Dominion service and the precipitation records at St. John by another. There is no reason to doubt that both are correct. After stating that the gauging records on Lepreau are incredibly high, he suggests an explanation

"there might possibly be a stop over at high river levels from the West Musquash to the Lepreau, possibly by an underground fissure or boulder and gravel bed leak." We have elevations on both streams. The Lepreau river is two miles from tide water is higher than the Musquash four miles from tide water and still further up the stream the greater becomes the comparative height of the Lepreau. If the water from the Musquash is leaked under ground into the Lepreau at a high elevation, overcoming gravity, it possesses peculiar qualities and will probably generate more power than engineers estimate.

But Mr. Ross is not familiar with the physical features of the district he did not even go to Musquash to see if there is a development there. He did not examine the water shed to see what conditions might affect run-off percentage as most engineers would have done before discrediting a project. He expects the same percentage of run-off as obtains in streams through drainage areas that have a different soil formation, different slopes, different vegetable growth, and under various conditions of humidity. He does not know the drainage area, and the nearest precipitation records are those of St. John over thirty miles from some points on the drainage area.

He reproduces a precipitation record, his table No. 5, as follows:

Rainfall records at certain places in New Brunswick for years ending Sept. 30. Depth in Inches.

RESOLUTIONS BY
LABOR CONFERENCE

At the closing session of the three days convention of the New Brunswick Federation of Labor yesterday in Moncton, it was decided that the next meeting would be held in Chatham at a date decided on by the executive. A resolution was passed urging that more protection be given laborers on staging and hoisting jobs. Another resolution urged that legislation be enacted to prevent the white girls from mingling in labor institutions with those of the yellow race. Another resolution urged that section 28 of the New Brunswick health act be enforced governing the storage of food-stuffs for sale. This resolution as others was unanimously carried. It is recommended that the per capita tax remain as in previous years. Compensation Act. The special committee relative to an amendment to the workmen's compensation act as applied to factories urged that the clause in the N. B. act be substituted by a clause in the Ontario act with the exception that the act remain under the compensation board, not under any minister of the crown. Another resolution protested against the exporting of Canadian goods through foreign ports. This resolution was urged to be enforced at once. Other resolutions urged that master plumbers be compelled to undergo examination in their particular line of work and it was also resolved that all journeymen plumbers be licensed and that they be compelled to undergo examination under a provincial sanitary engineer. To Meet Farmers. A resolution was adopted calling for a joint convention of the United Farmers of New Brunswick and organized labor to arrange, if possible, for a working agreement as to political action and to bring up as far as possible all misunderstandings, the incoming executive to arrange such meeting with the executive of the United Farmers. The convention went on record as being favorable to the continuation of the extension of the same to every industrial locality. It asked that the operation of private employment bureaus or agencies be prohibited by law. The following resolutions submitted by the Moncton Women's Council were endorsed: No. 23, to have established in the province a juvenile court; No. 24, that there be established in some part of the province of a home for mentally deficient children; No. 25, that there be placed upon the statute books of this province a "mother's pension act" by virtue of which widowed mothers may receive such support as may be necessary to enable them to provide for their children until such time as such said children may become self-supporting. Minimum Wage Act. The following resolutions were adopted: No. 2, referring to minimum wage act for women and children and a mother's pension act was concurred in with the recommendation of the committee that the matter of further action be left with the incoming executive and that they be empowered to have these bills introduced either as government or private bills, and that the executive get in touch with the provincial executive of the women's council. The resolution of St. John I. L. A., No. 273 in favor of liquor, light wines and beers being sold for revenue purposes in New Brunswick as is done in Quebec and British Columbia, failed to secure the approval of the resolutions committee and was withdrawn by its promoters.

HARDWARE CLERKS
AND CIVIC AFFAIRS

The annual meeting of the St. John Hardware Clerks' Association was held last night in the Orange Hall with H. D. Sullivan presiding. Resolutions were passed that the association would not support any candidate in the civic election who was opposed to municipal distribution of hydro developed current; that they were in favor of an amended

harbor commission act; that they should take an active part in civic affairs. Roy Willett read a report of the society's activities in regard to the hydro-electric question. The secretary's report and a letter from the Marlborough Lodge, Sons of England, were read. The election of officers resulted as follows: President, Roy A. Willett; vice-president, J. M. Fitzgerald. The retiring president, H. D. Sullivan, was elected honorary president. It was decided to hold a sporting event at Lily Lake in the near future.

The case against L. Allan Kirkpatrick, charged with non-support, was settled yesterday by his agreeing to pay \$4 a week toward his wife's living. W. M. Ryan appeared for Mrs. Kirkpatrick, and B. L. Gerow for the defence. The judgment in the case against Lee Shum, charged with keeping a disorderly house, was postponed until next week.

MORNING NEWS
OVER THE WIRES

Mrs. E. Atherton Smith, vice-president of the National Council of Women for New Brunswick, spoke to a large audience at the City Hall in Moncton last night and gave a graphic description of an interesting trip to California. The lecture was illustrated with lantern slides. During the evening a solo was rendered by Miss Price. At the close of the address a beautiful bouquet of roses was presented to Mrs. Smith by the audience. Cabot Strait from Cranberry Head to Newfoundland is blocked by a solid barrier of drift ice from Cape Breton to the Colony which is impassable by steamers not fitted especially for ice-breaking. The Norwegian steamer Sisto, from Cardiff to St. John's, Nfld., reported yesterday that she was caught in the ice off St. John's, with her bows damaged and her forepeak full of water. It is expected that about 100 Conservative members of parliament and defeated candidates of the last election will be present at a meeting called by Rt. Hon. Arthur Meighen for March 6 in Ottawa.

MONTREAL GIFT TO
DICKENS BRINGS

New York, Feb. 17.—A silver cup presented to Charles Dickens by British officers and friends in Montreal in 1842, was among the articles in a collection of Dickens' rareties sold at a recent auction here. It went for \$445. The collection was brought to New York by Dr. R. T. Jupp of London. A copy of Dickens' great humorous masterpieces, "The Posthumous Papers of the Pickwick Club," in the original parts brought \$3,500.

PUSSYFOOT BACK
FROM INDIA

Nearly Everybody Drinks Arrack, a Beverage They Give to Elephants When They Want Them to Fight Tigers.

Chicago, Feb. 17.—Picture a dignified man in an automobile garlanded with flowers, surrounded with naked dancers, a band of musicians, a bodyguard of sixty devil dancers, 200 flag-bearers, and 100 athletes turning handspins. Let them all move in solemn procession and put in the lead six elephants brilliantly caparisoned. Visualize that and you have a correct picture of William E. ("Pussyfoot") Johnson making his triumphant entry through the gates of Ceylon. He told about it on his arrival in Chicago from India, where he has been working in the interest of prohibition. "In addition to all that grandeur," he said, after describing the Oriental splendor in which he paraded, "they threw a gallon of perfume over me as I entered the city gates." "Pussyfoot" had a good time in the land of the Hindus. And they gave him a new name. The natives there call him Mahatma Pussyfoot Kija. Liquor is easy to get in India. Hooch grows on trees, babies rush the can, many of the revenue officers are crooks, lots of people have still in their backyards, and nearly everybody drinks arrack, a beverage they give to elephants when they want them to fight tigers. At least that is the report that Johnson gave here. "Liquor is easy to get. One only has to climb a coconut tree, tap the swelling buds and bring home a painful of toddy. This toddy isn't so bad when it is fresh, but it ferments after an hour and develops an eight per cent. kick. When distilled it is arrack."

ASK FIXED VALUATION.

Representatives of Canada Cottons, Ltd., of which the Cornwall and York Cotton Mills Company, Ltd., is a subsidiary, waited on the mayor and commissioners yesterday afternoon with a request that the local property be placed on a fixed valuation basis as regards taxation. The company representative named an amount they thought would be a fair assessment. It was said that, if a reasonable agreement was not reached, the company would remove at once, taking their employees with them, as they had an offer for the sale or lease of the mills. The general opinion of the council was that as the company had been exempt from taxation for a period of twenty-eight years they should be able to bear their fair share now. The matter will probably be brought up at the next meeting and when a decision is reached it will be communicated to the company.

E. D. SMITH'S JAMS

ORDER THREE AT A TIME
Discerning housewives now buy Three Jars at a time so many and varied are the occasions when these pure preserved fruits may be served. Try this combination:

E. D. Smith's Orange Marmalade—The juice of the finest Seville Oranges, the tender rind, and granulated sugar. Simply indispensable at the breakfast table.

E. D. Smith's Crab Apple Jelly—Light and dainty. Serve with Afternoon Tea; use for Layer Cakes, Jelly Roll, Tarts; spread on bread for the little children, and for the big children.

E. D. Smith's Strawberry Jam—Luscious, ripe berries preserved and sealed for you the very day they are picked. That is why they retain that natural flavor that reminds you of Mother's Jam.

In 1 lb. Glass Jars and convenient 4 lb. Tins.

WELDING AND CUTTING OF ALL kinds of metals. C. J. Morgan & Co., Ltd., 48 King Square.

CALLS FIREMEN TO AID PARENTS IN A BATTLE

Apparatus Clatters Up to Find Abie's Father and Mother in Fight With Landlord.

Hyman Locker and his wife got the worst of an argument over rent with Mrs. Moskowitz, in the Fifth District Municipal Court in Brooklyn a few days ago. Some days later as Locker and his wife emerged from their home in Brooklyn they encountered Mrs. Moskowitz and her husband, Morris. The Lockers didn't think the place was worth what the judge had decided they should pay, and said so in language none too carefully chosen. The Moskowitzs have a poor opinion of tenants of a good home. They expressed that opinion forcefully and all four went to the mat.

The women were evenly matched, but Locker is only 29 and Moskowitz, who is 40, thought a continued battle offered little prospect of success. So he told his 15-year-old son Abie to run for a policeman. Abie hiked through West 20th street as far as Mermad avenue without finding one. Something on the corner gave him an inspiration. Any man in a blue uniform ought to be able to save papa; so he pulled the fire alarm box. Police reserves arrived with the fire apparatus. They arrested Mr. and Mrs. Locker and Mr. and Mrs. Moskowitz.

FATALITIES REPORTED IN POWDER WORKS EXPLOSION

Newark, N. J., Feb. 17.—The Atlas Powder Works at Landis, N. J., have been wrecked by a severe explosion, according to a report received here. Several persons were reported killed.

CROWN MICA ROOFING

Is not a light weight roofing and price the only selling point. It is a good roofing built up on an extra heavy felt base—the back bone of roofing. The tough pliable asphalt saturated through this felt base gives it durability. That means service.

Send for samples and prices. PHONE MAIN 1893

The Christie Woodworking Co.

Limited
65 Erin Street.

THE SPIRIT OF LADY BOUNTIFUL STILL WITH US

Stories of Ladies Bountiful and Fairy Godmothers have from time to time conveyed to the world at large the fact that there are really people in existence who will grasp the opportunity of injecting a ray of sunshine into the lives of their fellow beings. And there is one such person living on the west side of the harbor who this morning demonstrated in a most striking, yet simple, fashion the beauty of the principle of the Golden Rule.

A crew of city workmen, under the direction of George L. Evans, west side superintendent of the public works department, were engaged in removing last night's precipitation of snow from the Golden Rule.

With the mercury down below the zero mark and a biting wind blowing out of the northwest, their occupation could hardly be termed a sinecure. Shielded from elements in a comfortable home in that vicinity, they daily observed the workmen swing their arms to excite themselves of the fact that the frost had not touched them, and otherwise indicate the nature of the weather. The "kindly thought" asserted itself. In half an hour she appeared at the door with a package of good, steaming coffee and a generous platter of tasty home-made cake, of which she invited the "shovellers" to partake.

None of the workmen knew the lady personally, yet they went away with a feeling that this old world is not such a bad place after all, and a thoughtful and generous heart is one of humanity's crowning achievements on the planet. Displayed towards his crew.

NEED MEN TO BACK SCOUTS

Editorial References to Great Movement.

High Commendation by New York Evening Post—Lord Byng's Interest—The St. John Numbers—Men are Needed Here.

The New York Evening Post says editorially—

"It seems impossible that the Boy Scouts of America are only twelve years old. The record of their achievements suggests a much longer life than that. They are celebrating their twelfth anniversary, however, and they ought to know. There is a question: Do the boys get more than they give, or give more than they get? Fortunately, it is quite unnecessary to find an answer to this question. So long as they either get or give, or both, they are doing their part of their great organization is more than justified. Older persons who remember their own youthful days may be tempted to feel sorry for boys who are apparently leading so serious a life as that of the Boy Scouts. They are credited, for instance, with playing an important part in the ten per cent reduction last year in juvenile delinquency. Any sympathy for them on this score would be wasted. If there is any boy who is a little more of a boy than other boys, it is a Boy Scout. He may reverse the traditional picture of a boy by doing good, but he has a very good time doing it.

"The difficulty is not to enrol boys, but to get hold of men to serve as scoutmasters and in other capacities. There are 400,000 Boy Scouts in the country and 120,000 men serving in connection with their work. In this city there are 4,000 men thus engaged, without compensation except the satisfaction which they receive. These men are small in comparison with the number for which they are needed. The management of the Boy Scouts is seizing the occasion of their twelfth anniversary to appeal not for money but for men. Any man of the required qualities of head and heart has an opportunity far greater than he may have imagined. There are many fraternities in this city, but none of them is worthier of support than the fraternity of big brothers of the Boy Scouts."

Lord Byng, Chief Scout.

Says the Ottawa Citizen—

"As chief scout of Canada, Lord Byng follows in the footsteps of his predecessors at Government House. But it would be a mistake to believe that the position is as unexciting as that of a member of the Boy Scouts."

Lord Byng, Chief Scout.

ALL ON BRANT COUNTY ARE FREE OF BLAME

Stranding of Vessel is Declared Due to Non-operation of Cap Buoy Range Light.

Captain Paterson and E. Pederson, the master and second officer of the steamer Brant County, which grounded in the harbor of St. John's on the night of December 1, and Pilot H. Lachance were commended in the findings issued yesterday.

The findings were concurred in by Captain A. J. Mulcahy and Captain John Hall, nautical assessors of the court. The case of the accident was described by the non-operation of the cap buoy range light. The following is the finding of the court:

"The court is satisfied, after weighing the evidence adduced, that the master and second officer of the steamer Brant County are free from any blame for the stranding of the vessel at Cap Buoy."

The court is under the impression that it is a mistake to point out that the meaning and intent of a notice to pilots, copy of which is on file, the master or owner to steer the ship, was not observed. The last paragraph of the notice states: "A pilot who has accepted such arrangement with a master or owner of a ship to act as 'whelman' must act in that capacity only."

In this instance Pilot Poult did not at any time take the vessel, but acted in a position of vantage on the bridge and giving orders, which were duly transmitted by Pilot Lachance to him. The master absolutely denies the charge that he allowed the vessel to be steered by Pilot Lachance. Read in the open court at St. John, N. B., this 17th day of February, 1922.

Dominion Judge Commissioner. Concurred in by A. J. MULCAHY, JOHN HALL.

Visiting Old Home.

Dr. Horace A. Polkins arrived recently in the east from Winnipeg, and has been residing at his former home, Pleasant Ridge, Kings county, where he has been the guest of his brother, David Polkins, and his wife, Mrs. Polkins, who is located in Winnipeg. Dr. Polkins practised his profession at Norton.

WOMEN'S STOCKINGS HAVE EFFECT ON TAILORS' PRICES

Toronto, Feb. 17.—Tailors are today saving twice the price they were in 1914 and are about as low as they should be if we want to retain a respectable standard of living," said Daniel Ross, a member of a local wholesale mercantile house, addressing the merchant tailors' association at its convention here, yesterday.

Mr. Ross mentioned that some of the causes of the higher prices were a shortage of fine wool and a more extensive wearing of long-worned garments by women. The consumption of yarn as a result of the popularity of long woolen stockings among women was said to be enormous.

Robert Gray.

Sussex Record: Friends in Kings county were much shocked at the news of the death of Robert Gray, which occurred at Campbellton on Sunday. The deceased was a native of Cedar Croft, Kings county, and was here only a few days ago attending the funeral of his wife, Sarah A. Gray, who passed away on February 1st, after a brief illness of pneumonia.

Returning to the West.

Eldon Colwell of Calgary, Alta., who has been spending some time at his home at Jemseg, is the guest of his sisters, Mrs. George Camp and Mrs. Bruce Springer, Fredericton, for a few days and will leave on Friday evening for Boston and New York, where he will spend a few weeks before returning to Calgary in March.

WATCH OUT.

Merchants report that some cents are in circulation camouflaged as ten cent pieces and quarters. They are coated over with some special preparation and when turned with the head up are passed off as coins of larger denomination.

A GOOD RECORD.

(Halifax Echo.)

The record of the Housing Commission in Halifax is one that should be interesting to the housing problems, a problem which is the most vexatious of modern health and morals. The fact that 188 houses have been erected, 90 per cent of which were in the poorest of the city, is proof enough of the value of the scheme through which the Federal loan has been made available.

The practice followed here of allowing the local housing committee to select the land, style of house and materials, subject only to the limitations prescribed by the Housing Act, has been already opened and largely built up, which has been a great gain to the city. While new suburbs and subdivisions bring in new taxable property, the advantage is offset by the great expense of extending water and sewer service. But where outside lots are built upon, all this expense is avoided.

Another matter of congratulation is that 60 per cent of the builders have been returned soldiers, for whose benefit the loan was primarily made, and 60 per cent of the remainder were mechanics, many of whom by working after regular hours on their own homes, were able to put up a better house than if all the labor had to be paid for. Among the other beneficiaries were policemen, policemen, tram car employees, barbers and clerks. There can be no doubt in the fact that the money made, and the Commission has tried to use the funds wisely and to extend aid only to those who needed it and had no right to profit from it. This was as it should be, for, after all, the problems of proper housing are not the problems of the man of moderate income, such as the clerk, the mechanic, the letter-carrier and the salaried man. They are the mass of the people of any community, and to house them well is to ensure better health and better morals for that community. All the need of the city has not by any means been met, and it is therefore, to be hoped that more building of this sort will mark the coming year.

Very Enjoyable.

"I love my love in the morning," "I don't blame you, if she gets up and starts the furnace."

"OLD BILL" TELLS HIS OWN STORY

Original of the Bainsfather Character Down on His Luck, Selling Postcard Pictures of Self in London.

London, Feb. 16.—(By Canadian Press.)—After tramping 2,000 miles through the south of England and the Midlands, and two trips across to France, carrying a living by selling picture postcards of himself and his history, "Old Bill," the original character in "The Bainsfather" and other famous war sketches, is down on his luck. He cut a tragic figure as he entered Fleet street recently.

Disabled and "Ruined for Life."

Similar notices hung from the side of his worn penumbulator, in which was a gramophone, a tin helmet, and other war relics. "Tucked comfortably into the folds of his back in a big square of cardboard inscribed in black letters: "After Years of Hell, "Disabled and Ruined for Life."

"I used to clip my pals' hair in the open, and one day I was threatened with a 'B'ish stick for displaying a poster showing the shaggy heads of the men before and their bald heads after."

"Captain Bainsfather was attached to the 1st Battalion of the Buffs, and was one of the units along my sector, and used to pick up his sketches when moving along the line."

"I suppose he hit me for his skits because at the time I was a bit of a character."

"After those thirty-five days and nights of grueling on the Somme, I was wounded near Mametz Wood, and on coming home was recommended for discharge, but was sent to the Balkans, where I was frozen in the saddle of a transport mule, and after being in hospital returned to England and discharged."

"I was given a disablement pension, and went to work at Woolwich Arsenal, and there until I had to leave through T. N. T. poisoning."

"Last Easter I was re-examined by a medical board, and recommended for treatment in a neurological institute. "Upon seeing the place at Epsom, I decided that I should be driven mad by the surroundings, and that I'd better accept the advice of the family doctor, and try Nature's cure by living an open-air life."

"This treatment has benefited me wonderfully, though I shall never be as fit as I was before the war."

"Because I refused to accept the treatment specified by the medical board, my pension was stopped, and I have to earn a living in the only way open to me."

LOCAL NEWS

TROUBLE CIRCULAR CANCELLED
The St. John Board of Trade has been advised by the minister of customs that the departmental circular requiring changes in renewal sales tax license numbers, to which objection had been taken by the board council, has been cancelled. The minister, in his letter, states: "I can assure you that it is not my desire that the business public should be put to any inconvenience or expense that can be avoided."

THAT FAIRVILLE CASE
The man who was sentenced by Magistrate Ailingham in Fairville to six months' jail for indecent conduct, off-peated, was able to escape, it is said, because he was not handcuffed. When arrested he was handcuffed, and, it is said, it took two men to get him under control. The provincial hospital authorities are asking why he was permitted to escape.

CUSTODY OF CHILD.
In the matter of habeas corpus applied for in Fredericton this week before the full court, and returnable this morning before Chief Justice McKeown, evidence was heard today. It has to do with the custody of a child born from the wedding of Percy H. Gosman in 1911. He secured a divorce from his wife, and since that time the child, Bessie May Gosman, has been taken care of by him and his people. The mother is now applying for the custody of the child. After some evidence was taken, adjournment was made until tomorrow. D. Mullin, K. C., appeared for the plaintiff, and Francis Kerr for the defendant.

POLICE COURT
Murray Ring pleaded not guilty today to a charge of not supporting his wife, K. J. MacTae appeared for the defendant. He asked that an attempt be made to have the matter settled out of court, and all went into the magistrate's office for a conference.

J. M. Logan did not appear to answer a charge of assault on a man named Jones, employed on one of the New Brunswick Power Company's Haymarket Square cars. It is alleged by the complainant that he entered the shop of Mr. Logan to speak to him about a matter of some snow he is alleged to have shoveled on to the car tracks. He received an insulting answer, and was pushed out of the store.

COAL CASES IN COURT.
Six young fellows, charged with theft of coal from the C. N. R. yard, were brought before Magistrate Ritchie for sentence this morning. Bushfan, Cook, Bree, De Veau and a juvenile pleaded guilty and were each sentenced to a suspended sentence. Doucett had pleaded not guilty, and brought a girl to court to swear that he had not been near the yard at the time he was accused of taking the coal. One of the officers and George Cook formerly testified that they saw him there. The magistrate said he must consider his case separately on account of this fact and on account of the fact that he had a suspended sentence already hanging over him. He was remanded for sentence. His Honor warned all the accused that they were liable to two years in Dorchester as a minimum sentence. It was a smelly day like this, he said, that led to the committing of greater crimes later in life, and he advised them to stay at home and help their families.

DETECTIVE TELLS OF ARREST

Wills in Court on Suspicion of Stealing Cloth— Companion in Sleigh Runs Away.

One witness was heard this morning in the preliminary hearing of a case against John Dell Allen Wills, who was arrested last night by C. P. R. Inspector W. J. Stevens, C. P. R. Constables Costello and Ritsen, and Detectives Biddiscombe and Donahue on suspicion of stealing cloth to the value of \$1200, the property of the C. P. R., between February 10 and 15 while it was in transit. H. McLean, J.P., appeared for the railway and J. A. Barry for the defendant.

Detective Biddiscombe testified that, acting on information received from Inspector Stevens, he went with Detective Donahue and constables Costello and Ritsen about eight o'clock last night to Princess street where they hid in two alleyways. About 8:15 o'clock a sleigh driven by the defendant and with another man in it appeared. He ran out and uppe. He took hold of the defendant and felt in the bottom of the sleigh where there was a quantity of cloth. The other man got out of the sleigh and ran away pursued by Detective Donahue. The witness and Policeman Costello drove with the accused to the station where they searched the sleigh and found five pieces of cloth, identified three in court. The horse and sleigh were called for by A. Kindred, who keeps a livery stable on the west side.

The case was postponed until Tuesday morning at 10:30 o'clock for further evidence.

BUSY SCENE IN ST. JOHN HARBOR

Eighteen Steamships Were in the Port Today.

The best evidence to counteract the report published in the Toronto Saturday Night recently to the effect that St. John harbor was blocked with ice, was the sight of the shipping at the berths and in the stream this morning. Fifteen steamers were tied up at the docks and three more are in the outer harbor awaiting the tide to tie up. As a matter of fact the port has a busier appearance than it had at any time during the present season and during the last few days several steamers have arrived and cleared. It is thought that the present rush of traffic is due to the fact that some steamers were delayed in arrival by heavy weather in the Atlantic.

The sugar trade in and out is accounting for considerable business this year. The raw sugar inward has been heavy and several steamers have taken on or loading cargoes of the refined product. The opening of a potato business for Havana, for which fifteen ships are scheduled for the winter, has also added to the trade, while the importation of United States coal has been fairly heavy. Five or six steamers have already brought coal cargoes from United States ports this season.

TEN BELOW HERE, ALL CANADA IN THE COLD WAVE

The cold spell which was predicted yesterday proved a reality this morning when the thermometer dropped to ten degrees below zero. A strong north-westerly wind blowing at a velocity of thirty miles an hour made the cold very penetrating. This is the coldest February day since 1920 when the mercury was officially recorded at sixteen points below. Last year February 1 was the coldest day in the month the mercury registering four point five degrees below.

Toronto, Feb. 17—Quebec city took the medals from White River, Ontario, today as the coldest spot heard from in Canada. The official mercury in the ancient capitol hit twenty-two below during the night and was still at twenty below at eight a.m. White River was only twice below at eight a.m., although it touched forty below during the night.

This morning's weather in Canada all the way from Calgary to St. John, N. B., was registered as very cold. Winnipeg only reported above zero at the zero hour of eight a.m. Bahner weather is expected tomorrow or Sunday.

ST. JOHN FOLK TO OLD COUNTRY

The Canadian Pacific Steamships, Ltd., liner Melita was scheduled to sail for Liverpool via Halifax between three and four o'clock this afternoon. She will take away approximately 250 cabin and 275 third class passengers. Among the cabin passengers will be: Dr. J. C. Meakins, a professor in the University of Edinburgh, Scotland; Louis Gravelle of Montreal, a famous singer; Mrs. W. R. McInnis of Montreal, wife of Vice-President MacInnis of the C. P. R.; Captain Edward Bouchard of Quebec; Messrs. Charles and Vivian Burrell of Three Rivers; Mr. and Mrs. Bruce Reid of Montreal; Rev. Charles Inglis of Charlottetown, P. E. I.; O. L. Davis of Sydney. A large number of passengers came through today in the second section of the Montreal train and were taken right to the wharf in Sand Point.

The C. P. S. Ltd. liner Scandinavian is due to sail tomorrow for Southampton, Antwerp and Havre with approximately ninety first and 125 third class passengers. In the latter seventy-five are British subjects and fifty continental.

BURIED TODAY.
The funeral of Walter J. Daley took place this morning from his late residence, 29 Millidge avenue, to St. Peter's church for high mass of requiem by Rev. G. Coffin, C. S. R. Interment was in the new Catholic cemetery. Relatives were pall-bearers. A large number of spiritual and floral offerings were received and the funeral was attended by many friends.

The funeral of City Ray Black was held this afternoon from his late residence, Edith avenue, East St. John, to Fernhill. Service was conducted by Rev. H. E. Thomas. Members of the Knights of Pythias attended the funeral.

GLENWOOD RANGES AT NEW LOW PRICES

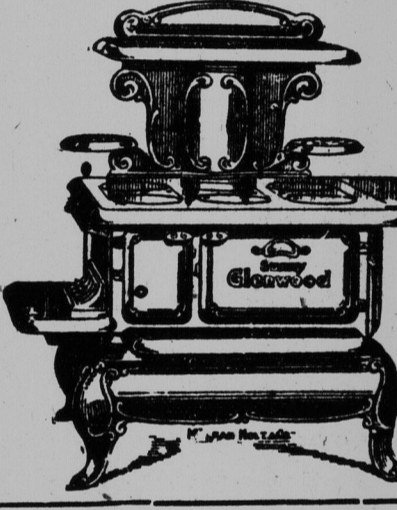

FURTHER REDUCTIONS in the price of Glenwood Ranges offers a substantial saving to prospective purchasers.

THE GLENWOOD RANGE was never at any time an expensive stove to buy when measured by the actual saving and comfort it brought to the home.

GLENWOOD RANGES, owing to their quality, durability and economy, are the best value of any cooking machine on the market today. Because the Glenwood Range is "made in St. John," it means a saving to the purchaser of the cost of crating which is necessary with all other ranges, the cost of freight, and extra charges. These facts are well worth considering when buying a new range.

SEE THE GLENWOOD before you buy—it will pay you.
