## DISTRICT AND GENERAL

The Amherstburg fair grounds will be sold under mortgage.

The McLachlan clan picnic will be held on August 16 near Alvinston.

By-elections for members of the Ontario cabinet will be held Aug. 27.

Emancipation Day will be celebrated by a big gathering at Amherstburg on August 1st.

A little daughter of John Marshall, of Strathroy, had a finger cut off while using an axe.

Alvinston council is asked to contribute \$100 in order to secure a corn show for that village next February.

The marriage took place at Trinity church, St. Thomas, of Jacobus Booman, of Dutton, and Miss Mildred Lilley, of Middlemiss. The young couple will make their home in Dutton.

For throwing bottles filled with lime and water into the Thames at Ingersoll, causing explosions for the purpose of obtaining fish, Andrew Young and Lloyd Rockett were each fined \$30.

Struck in the forehead by a piece of metal, when an automobile tire exploded at Thamesford, Joseph Peters, of Toronto, had his skull fractured, and his condition is regarded as extremely grave.

The citizens of Blenheim have appointed a committee to get information as to the cost of establishing waterworks in that village for supplying water for domestic purposes and affording fire protection.

Vice-President Marshall of the United States is a candidate for E. W. Bok's \$100,000 prize for the most practicable method of preventing war. He suggests that a vote to determine whether war shall be waged shall be taken by the people who are to do the fighting and pay the bills.

The average cost of feeding a prisoner in Elgin county jail per day during the quarter just closed was 12 cents as against 11 cents during the January to March quarter. A total of 26 prisoners were in the jail during the last quarter, stopping a total of 411 days. There were 40 prisoners in the jail during the previous quarter, stopping 672 days.

Mrs. Ann Munroe, of Arkona, was honored on her 97th birthday celebrated at the home of Mrs. J. W. Stevens, Arkona, on Sunday, July 15th. Among the fifty descendants present from Royal Oak, Detroit, Kinde, Sarnia, Petrolia and Glencoe were her daughters, Mrs. M. Hagie, of Royal Oak, Mich.; Mrs. A. Fraser, of Petrolia, and Mrs. J. W. Stevens, of Arkona.

## FARM FOR SALE

About 22 acres, in the village of Glencoe, with good house, barn, large chicken coop, small fruit orchard, and good garden with small fruits; soil choice; plenty of good water. For further particulars and terms apply to Russell Newport, Glencoe.

## TO SUSPEND BROADENING OF THE HIGHWAYS

Suspension of all widening of highways under the provincial system is announced by Hon. George S. Henry, Minister of Public Works and Highways.

The extra width policy of the old Government was one of the severest points of criticism on the part of the victorious Conservatives, and now the Minister intends to make a thorough survey before continuing any of the widening projects.

"For the future," says the Minister, "the policy of the department will be one of co-operation with the various municipal bodies, so that all may feel a joint ownership and responsibility in the improvement of our highways."

"The work for the season," he said, is practically all under contract. It will be the duty of the department to have all work completed as expeditiously as possible with the minimum of inconvenience to the travelling public, as well as those resident on the highways."

## SUCCESSFUL NORMALITES

All the former students of Glencoe high school who attended London Normal School the past year were successful at the examinations. Those awarded interim second class certificates are Jessie Currie, Catharine Eddie, Elsie Letich, Helen McCutcheon, Jean McEachern, Helen Richards and Frances M. Sutherland.

## CHAUTAQUA NEWS

The rollicking comedy success, "The Bubble," the always popular Troubadour Male Quartette; Edward Burton MacDowell, well-known traveler; Arthur Walswyn Evans, noted Welsh orator; Pam Panga Players and Singers, native Filipinos; Lillian Johnston Company, premier entertainers; Herbert Leon Cope, humorist extraordinary—these are attractions which will appear here at the coming Four-day Dominion Redpath Chautauqua which opens Saturday, August 4th.

The exceptionally talented Troubadour Male Quartette, who, in addition to their musical ability, are entertainers of real worth, will launch the Chautauqua program with a grand concert on the first afternoon.

A concert by the same quartette on the first night will precede a notable address, "Our Uncrowned Kings," by Arthur Walswyn Evans, well-known Welsh orator.

The popular Lillian Johnston Company will give a diversified musical program on the afternoon of the second day.

Following a concert at night by the Lillian Johnston Company, Edward Burton MacDowell, noted traveler, writer and lecturer, will give an illustrated travogue, "A Trip Around the World." Motion pictures and colored slides will be shown.

William Matthew Holderby, dynamic inspirational speaker, will discuss, on the third afternoon, a vitally important subject, "The Family—the Nation's Greatest Asset."

On the third night comes the sparkling comedy success, "The Bubble," played by a cast of New York actors.

A unique musical organization, the Pam Panga Players and Singers, native Filipinos, will give a novelty concert on the fourth afternoon, in which music of the Philippines will be featured.

The fourth and last night of the Chautauqua will be known as Joy Night. On this night a concert by the Pam Panga Players and Singers and a scintillating, humorous entertainment by Herbert Leon Cope will be the closing attractions of the Chautauqua.

A delightful innovation of the Chautauqua will be the children's hour entertainments on the second, third and fourth mornings. These entertainments, under the supervision of an experienced juvenile entertainer, are decidedly popular with the youngsters, and many grown-ups as well.

## THE KAWARTHA LAKES

The Kawarttha Lakes—600 feet above the level of Lake Ontario and within 125 miles of Toronto—are among the most popular of Ontario's summer playgrounds. The Indian name of the district means "Bright Waters and Happy Lands."

Here the vacationist will find unlimited opportunities for sailing, canoeing, motor-boating, bathing and fishing, together with excellent hotel accommodation. The very air perfumed with pine and balsam is a tonic. The larger lakes of the district provide fine bass, muskonge and salmon trout fishing, while the smaller lakes abound with speckled trout.

Descriptive booklet with map of the district may be obtained free from any agent Canadian National Railways.

## Memorial Hall Opening

The opening of the Memorial Hall and unveiling of the Memorial Tablet will be held in Glencoe

**Friday, August Third**

The Program will commence at 3.30 p. m.

REV. T. J. CHARLTON, Rector of St. Matthew's church, London, will occupy the chair.

MAJOR CANON APPEYARD, M. C., will deliver an address. Also J. C. LETHBRIDGE, M. L. A., and others will speak.

EXCELLENT MUSICAL TALENT has been secured for the occasion.  
At the close of the program a reception will be held.  
All returned men and the public in general are cordially invited to attend.

## NEW MASONIC DISTRICT

In the redistribution of lodges and the reconstruction of districts made at the communication of the Grand Lodge A. F. & M. in Toronto last week, Lorne Lodge, No. 282, of Glencoe, was put in Chatham district which is now composed of the following 14 lodges: Wellington of Chatham, Thamesville, Dresden, Parthenon of Chatham, Blenheim, Glencoe, Wallaceburg, Wardsville, Highgate, Florence, Ridgetown, Bothwell, Merlin, and Victory of Chatham.

Angus Graham, of Thamesville, formerly of Glencoe, was elected deputy grand master for the district for the ensuing term.

## DONATIONS TO MEMORIAL HALL

Alf. Weekes, Bonlea, Alberta ..... 1.00  
Mrs. Cecil Baird, Brainerd, Alberta ..... 5.00  
Mrs. Sam Shaw ..... 5.00

## AID FOR NAVY LEAGUE

Capt. G. F. Morris, chaplain and representative of the Navy League of Canada, spent a few days in Glencoe last week in the interests of that organization. The Navy League is, according to the details given by Capt. Morris, doing a great deal of sailors' welfare work, is caring for widows and orphans of merchant sailors who lost their lives in the war, giving relief to seamen in distress, maintaining sailors' homes in various sea and land ports, and, in general, carrying on a splendid work on behalf of the men who kept the British flag flying on the high seas and the lakes. One of the activities of the league is concerned with the training of Canadian boys to man Canadian ships, and through the means of naval brigades a splendid work is being done in many places of Ontario. Capt. Morris was here seeking the interest and support of the citizens in carrying on this work, and interviewing those who have previously shown their sympathy for the cause.

## DOES SWATTING REALLY KILL?

An earnest entomologist, one of those erudite birds who devote their lives to the enlargement of the boundaries of scientific knowledge, has made a remarkable discovery about fly swatting. He says that when you swat the house fly (Musca domestica) you should watch to see where it falls and then stamp on it. Otherwise, declares the entomologist, Musca domestica is very likely to return to consciousness and live to crawl on your nose, tickle the back of your ear, bite you on the bald spot, go out for a load of typhoid bacilli and come home to drown himself in the cream pitcher.

In other words, this investigator asserts that 99 per cent. of the swatted flies are only stunned by the blows.

## MEMBERS OF TENNIS CLUB

Mixed doubles championship schedule to be drawn Friday, July 27. All entries must be in by the above date. Ladies will choose their partners and make entry as a pair. An entry fee of 25c will be charged each player.

## One Tired Listener

The clergyman was waxing eloquent on the subject of the "Future State of the Church." As his voice rose in volume he made the rafters ring with the question: "I ask you what shall be the future glory of the church?" A brief pause for breath, and he continued: "I repeat, what shall be the future glory of the church?" "You tell him, daddy, and let's go," exclaimed an entreating voice.

## PUBLIC SCHOOL PROMOTIONS

### Newbury School

III. to IV.—May Bayley 461, Percy Connelly 426, Borden Armstrong 406, Dorothy Armstrong 406, Jessie Bayley 402, Ethel Miller 388, Verna Blain 332, Fred Brennan 232 (passed by request of teacher).

II. to III.—Heien Farquharson 431, Lester Armstrong 413, Ona Jeffery 410, Lorna Miller 383, George Hurdie 385, David Parkes 362

Jr. II. to Sr. II.—Stanley Campbell, Robert Moore, Gar. McNaughton, Herb Armstrong, Glenn Stocking.

I. to Jr. II.—Rowina Haskell, Leo Degraw, Margaret Armstrong, Allan Edwards, Bertha Wastel, Ruth Robinson, Reta McNaughton, Harold McNaughton.

Jr. I. to Sr. I.—Grace Moore, Jane Bayley, Wesley Fennell, Pearl Haskell, Jack Woods.

Primer D. to Jr. I.—Gordon Wastel, C. to D.—Edward Bayley, Clayton Randall, Verdon Edwards, Leonard Armstrong.

B to C.—Glenn McCready, Frank Bayley, Eyrrie Woods, Dorothy Welch.

A to B.—Minnie Armstrong, Percy Miller, Isaac Haskell.

### S. S. No. 7, Mosa

II. to III.—\*Margaret Beales, Pearl West, Christina Winger, Ida Switzer.  
I. to II.—\*Clifford Hardy, \*Hazel West, \*Duncan Galbraith, \*David Smith, Helen Newbigging.  
Marjorie McLean, Teacher.  
(Continued on page 5)

**STORIES OF WELL-KNOWN PEOPLE**

**No Wasted Words.**

Dr. Abernethy, the famous surgeon, was a man of few words, but he once met his match—in a woman. She called at his surgery in Edinburgh and showed him a hand badly inflamed and swollen. The following dialogue, opened by the doctor, took place:

"Burn?"

"Bruise?"

"Poultice?"

The next day the woman called again, and the dialogue was as follows:

"Better?"

"Worse."

"More poultice?"

Two days later the woman made another call, and this conversation occurred:

"Better?"

"Well, Fee?"

"Nothing," exclaimed the doctor. "Most sensible woman I ever met."

**Famous Baldwins.**

Mr. Stanley Baldwin brings a new name to British politics. It is a remarkable fact that we have to go back more than eight hundred years to find a bearer of the name who rose to greatness.

The last Baldwin "boom" was in the twelfth century, an epoch when to live was to fight, when even priests wore armor beneath their vestments.

Such a man was Archbishop Baldwin, who stomped England with the wily Gironids, preaching the Crusades. It was he who crowned Coeur de Lion in 1189, and finally buckled on his own armor and himself set sail for the Holy Land.

No fewer than five Baldwins were Kings of Jerusalem between 1098 and 1185—an interesting reflection in view of the fact that the new Premier may be called upon to deal with the evacuation of British troops from Palestine!

History had no use for Baldwins for the next six centuries. Presumably they had been emigrating, for they next pop up across the Atlantic—this time in the role of statesmen.

Abraham Baldwin, born in 1754, was a leading figure in the American Senate early in the last century, and a few years later the name of Robert Baldwin was revered in Canada as that of a statesman who devoted himself to bringing about a better understanding between the English and French settlers.

Matthew Baldwin was an American inventor who made notable improvements in the locomotive steam-engine half a century ago; and today James Mark Baldwin is Professor of Philosophy at Toronto.

So far as the Old World is concerned, the new Prime Minister possesses a monopoly in fame.

**Pictureque India.**

India is a continent rather than a country, and its population is racially more diverse than that of Europe. The racial differences, says Mr. Harold Cox, are apparent at once to the least experienced eye. No one could confuse the sturdy little smiling Gurkha, whose head barely reaches to the shoulder of an English soldier, with the tall, thin Sikh or with the fierce Pathan, nor could he confuse the proud Rajput with the somewhat servile Bengali. These are a few of the more obvious racial types. There are many other distinct races, much farther removed from one another than the Englishman is from the Spaniard or than the Frenchman is from the German.

There are also distinctions of social habit. Take, for example, the matter of dress. Over the greater part of Europe as over the greater part of North America, you will find everyone, rich or poor, wearing the same general kind of clothing. In India you can seldom walk a few yards without meeting people whose dress is absolutely different from their neighbors'. You may meet, say, a dignified Mohammedan gentleman more than amply clad in voluminous garments; then a Bengali government clerk wearing a garment somewhat like a woman's skirt and called a dhoti; then a Parsi shopkeeper with his peculiar head-dress rather suggestive of that of the ancient Jews; and then a coolie wearing nothing at all from head to foot except a narrow Mon cloth. A few yards farther on you may meet a hold beggar; his long hair is hanging down his shoulders and is matted with time; his whole body is smeared with mud and he is holding out his begging bowl and asking for alms in the name of religion.

It is the same way with the women. Some wear skirts with a tiny bodice across the chest leaving the stomach quite bare; some wear trousers tight round the calves and baggy round the hips; some again wear a shingle garment about thirty yards long, which is ingeniously twisted between and round the legs so as to convey the impression of a pair of baggy knickerbockers and then is carried up across the shoulders and over the head and so arranged that it can be used as a veil.

Do you have a goal in sight, keep your eye on it, and make your assets, equipment and helpers assist you in reaching that goal?

Do you realize that the man who sat on the log and waited for sweat to preliminary work, was entirely outdistanced by the man who hustled after the job and got up sweat doing it?

**Canada's Great Wilderness Park**

**Jasper National Park Rapidly Becoming One of Foremost Holiday Resorts in Canadian Rockies.**

Jasper National Park is rapidly coming into its own as one of the foremost tourist resorts in the Canadian Rockies. Although it was set aside in 1907 and is the largest of the great playgrounds administered by the Government of Canada, the lack of adequate accommodation for visitors, until last year, has prevented its use on the part of the public in proportion to its importance. Since its reservation the National Parks' authorities have steadily carried on development work in the construction of roads and trails to the scenic points of greatest attraction and it now possesses 652 miles of roads and trails. Two years ago the Canadian National Railways erected the first hotel—Jasper Park Lodge—on the shores of beautiful Lac Beauvert. This is a bungalow camp composed of a central building surrounded by a group of rustic chalets which serve as sleeping quarters. The immense popularity of this accommodation last year resulted in extensions this season which will provide for 250 guests and plans are being made for similar chalets in Toquon valley and at Maligne Lake.

**Jasper Park's Great Expanse.**

Jasper Park, with its great area of 4,400 square miles, is situated in northern Alberta on the main line of the Canadian National Railways, about 200 miles west of Edmonton. The official headquarters of the park is situated in

Jasper, the quaint little mountain town on the shores of the Athabaska River. The Parks' authorities have designed a town plan for Jasper in order that its future growth may be kept in harmony with the beautiful environment, and this plan will form the basis of all future development.

A golf course is being laid out east of Lac Beauvert and adjacent to the Lodge by the Canadian National Parks Branch. The Mount Edith Cavell highway, which takes its name from the great peak, 11,033 feet high, named in memory of the gallant British nurse, has been completed to within five miles of its terminus. Striking and beautiful panoramas are afforded by vantage points scattered all along this new highway. An important new trail has been opened up from what is known as Sunwapa cabin on the Sunwapa branch of the Athabaska River over Pokoktan pass and down to Brazeau Lake. This stretch links up a series of trails covering a distance of over 300 miles, constituting probably the longest trail in any of the national parks.

The plans for the present season include the building of a new road along the Athabaska from Jasper to a point two miles east of the Snaring River. The project when completed will offer a delightful scenic drive from Jasper affording wonderful views of the wide Athabaska valley and the noble peaks on each side.

**UNREFRESHING SLEEP**

**If You Are Tired Out When You Arise in the Morning Read This.**

The woman who is tired out, who aches all over when she arises in the morning, who feels depressed most of the time, needs just the help that Dr. Williams' Pink Pills can give her—new blood and strong nerves.

The number of disorders that are caused by thin blood is amazing and most women are careless about the condition of their blood. Quickly the nerves are affected and the patient becomes irritable, worries over trifles, does not sleep as well as formerly and is not refreshed by rest. There may be stomach trouble and headache. This is a condition that calls for Dr. Williams' Pink Pills.

Give Dr. Williams' Pink Pills a fair trial and the first sign of new life will be noticed in your appetite. You will be hungry by meal time. As the blood becomes enriched it feeds and soothes the irritated nerves, sleep becomes sounder and more refreshing, your worries become less, your work lighter. These are some of the things that these tonic pills do. Try them for any trouble caused by thin blood.

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Beast!**

Mrs. Longwed: Does your husband allow you to have your own way in everything?

Mrs. Junebride: Yes; the mean thing! Never once have I had a chance to say "I told you so."

**MONEY ORDERS.**

Pay your out-of-town accounts by Dominion Express Money Order. Five Dollars costs three cents.

**Artificial Wood.**

A Norwegian inventor has, after many years of experiment, discovered a method of making artificial wood. A mixture consisting of sawdust, together with chalk and some chemicals, is subjected to heavy pressure, and the result is a substance possessing all the qualities of timber.

Its specific gravity is the same as that of genuine wood, its hardness the same as that of oak. It can be planed, sawed, bored, nailed, painted, stained, or polished, and submitted to every process of carpentry or manufacture to which real wood is subjected. It will not deteriorate in water, and on account of the chemicals it contains, is impervious to rot. Moreover, it only burns at a temperature very much higher than that at which real wood catches fire.

**Milard's Liniment**, for sale everywhere. Some milkmen cannot let well enough alone.

**Classified Advertisements.**

**WANTED—AMBITIOUS MAN OR WOMAN** to distribute samples and take orders for the clean, comfortable, and most economical proposition. Lucas Products Co., Dept. 7, Hamilton, Ont.

**SILVER FORKS—NOTES FROM MY DIARY** (Booklet). One copy experiences reaching 25 cents. Dr. Barnard, Toronto, Nova Scotia.

**WASHINGTON HAND PRESS.**

**WE HAVE AN INQUIRY FOR A WASHINGTON** Hand Press that will take 2 pages of 10-line type. Write to: Publishers Co., Ltd., 71 Adelaide St. W., Toronto.

**Risking Death for Flowers.**

"Fancy that plant being worth \$750!" exclaimed a visitor to the Chelsea Flower Show in London, as they paused to glance for a moment at the new orchid, Odontio Crispum Solem, with its stiff, snowy petals spotted with maroon. "Fancy paying all that money for it!"

But orchids are paid for with human lives as well as with gold. Of all occupations, orchid collecting has the highest death rate.

A few years ago, eight orchid hunters, working in Madagascar, died one evening at Tananarive. They arranged to have another reunion dinner the following year. When the appointed day arrived seven of them were dead. The eighth was in hospital. He stayed there for a year, and then sailed for Europe with permanently impaired health.

That was unusually bad luck, but every orchid collector knows of many such cases. A collector, a German, who feared at an idol in a Madagascar jungle village, was soaked in oil and burned to death.

You are always on the brink of the grave when you are orchid hunting, says an expert. Invariably one or two, bizarre, quaintly colored little blossoms lurk in the unexplored depths of the jungle, where fever, snakes, great cats, and ambushed savages with poisoned darts combine to wreck vengeance on the man who violates their privacy.

But orchid hunting is a man's game. We've all got to do one thing, and at all events, we see to it that we do live first. We are up against the real raw stuff of adventure, and we do not know the meaning of boredom. If today we have drawn blank, to-morrow we may find a rare Dendrobium growing in a moldering skull at a hill-trail's burying ground, or another treasure or two clustering like mistletoe in a cleft at the top of a 90-ft. tree.

**The Heart Blossom.**

An apple, big and red and round; No orchard monarch ever found Surpassed in beauty, taste or smell, This, that from perfect ripeness fell, Midway 'twixt stem and blossom end My blade I made all haste to send—I halved it. In that apple's heart I saw the blossom's counterpart.

A seed pod, where each petal fair Had been, lay spread before me there, A working model of the bloom. That once had lightened March's gloom, Through all the fortnights that had flown.

The while that fruitage fine had grown, The blossom's image had remained. To that great apple's heart enchanted.

Deep down within each human heart Lives our Creator's counterpart! The God-thought out of which we came Still lingers, ever more the same. —Stickland Gillilan.

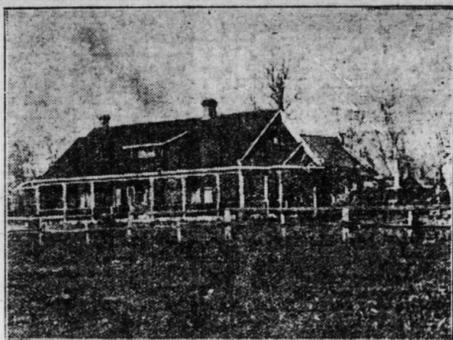

**The Story of Uncle Sam.**

Uncle Sam is the most popular nickname in the United States. We all know the jovial, lanky, bearded American with his peculiar top-hat, his voluminous coat, and striped trousers strapped under his boots. How did his name originate?

One account dates from the war of 1812, when there lived in Troy, New York, a man called Samuel Wilson, commonly referred to as Uncle Sam. His work was to inspect pork and beef bought for the Government. Elbert Anderson, a contractor, ordered several cases to be addressed to the United States, and signed with his own initials. An employee marked the packages "E.A.—U.S.," and when asked their meaning, replied, jokingly, that obviously they referred to Elbert Anderson and Uncle Sam.

The joke spread, until finally Uncle Sam was understood to stand for the United States.

**THE PRINCE OF WALES' CANADIAN HOME**

The ranch in Alberta, purchased by the Prince upon his first visit to the Dominion, and where he will spend a real holiday in the autumn. The ranch has been stocked with prize cattle from the Prince's English estates.

**CHOLERA INFANTUM**

Cholera Infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. They are an absolutely safe medicine, being guaranteed by a government analyst to contain no opiates or narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Singer and Shepherd.**

When Mae, Emma Calve, the great singer, is at home she lives in an ancient castle perched on a rocky mountain side in her native province of Avoyron, in the south of France. It is the castle of Cebieres, and it was built in the year 1050. A natural platform of rock juts out in front of it like the prow of a ship, and there the singer, who especially loves the ancient folk songs of her country, often stands answering the songs of the shepherds who watch their sheep on the distant uplands.

One day, however, she sang before a shepherd on the farther side of the mountain, a boy of sixteen who was guiding her with a party of guests from the chateau through the famous grotto of Dargilane, a labyrinthine succession of caverns.

We came at last, Madame Calve relates, in her recent autobiography, to a tremendous cave. Its vast, mysterious depth fascinated me. I began to sing. The boy started and turned toward me. "Oh!" he exclaimed. "How lovely! If the mistress could hear you, she would certainly give you a job. You could come every day and sing for the tourists. I am sure she would pay you much money for it."

"How much do you think she would pay me?" I asked.

"Well, now," he said judiciously, screwing up his brow and scratching his head, "it's hard to say. I think she might go as high as five francs a day. It would be good business."

"I'll think it over," I answered. "It's very kind of you to give me the tip. But don't you know me? I live over the way at Caherles."

"No, madame; I have never been so far as that. Our church is up there on the plateau, and that is as far as I have ever traveled."

A year later I was again visiting the grotto. The boy was still there. He recognized me and came toward me, twisting his cap in his hands. "Good morning, madame," he mumbled. "I guess you had a good laugh at me last year."

"What do you mean," I asked. "Why should I laugh at you?"

"It was told afterwards who you were," he answered. "A nice kind of fool you must have thought me with my five francs a day! They tell me that in the Americas you don't have to do more than yawn to earn eight pairs of oxen!"

**England to Plant Millions of Fish in North Sea.**

The Dogger Bank is to be re-wooded, announces the English press, including in its ancient and honorable weakness for punning. Since the famous North Sea fishing grounds were disturbed by the bombardments and mine explosions of the war, only half-sized catches have rewarded the efforts of trawlers. To remedy the shortage, eighty million plaice the most remarkable of fish, will be transported from continental fishing grounds, where the breed is best.

A system of crossed fishing grounds for the Dogger Bank, such as exist in all English rivers, also is promised, with "No Fishing" signs theoretically posted around a belt of water 500 miles long off the Dutch and Danish coasts. Steam trawlers and motor vessels of more than 50-horsepower will not be allowed within that area.

Cultivate cheerfulness. Think success; act success; look successful, and be successful.

**35-LB. GAIN MADE BY MRS. ROBERGE**

"I've gained thirty-five pounds by taking Tanlac, and just think it's the greatest medicine in the world," declared Mrs. Caroline Roberge, highly esteemed resident of 224 Prince Edward St., Quebec.

"For the past two years I suffered from a bad case of indigestion. I had no appetite at all, my stomach was always sour and I had a bad taste in my mouth all the time. Nothing I ate would agree with me, and I was so weak and dizzy all the time it seemed that I had no energy at all."

"Well, Tanlac was the first medicine that did me any good, and it surely has been wonderful for me. I am eating as much as anybody, everything digests perfectly, never suffer from sour stomach any more, and my strength and energy have come back so completely I just feel fine in every way. Tanlac is simply grand."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37-million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

**BEFORE MY BABY CAME**

I Was Greatly Benefited by Taking Lydia E. Pinkham's Vegetable Compound

Sydenham, Ont.—"I took your medicine before my baby was born, and it was a great help to me as I was very poorly until I had started to take it. I just felt as though I was tired out all the time and would have weak, faint spells. My nerves would bother me until I could get little rest, night or day. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to recommend this good medicine. I will lend that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will help others take it."—Mrs. HARVEY MULLIGAN, Sydenham, Ont.

It is remarkable how many cases have been reported similar to this one. Many women are poorly at such times and get into weakness, run-down condition, when it is essential to the mother, as well as the child, that her strength be kept up.

Lydia E. Pinkham's Vegetable Compound is an excellent tonic for the mother at this time. It is prepared from medicinal roots and herbs, and does not contain any harmful drugs. It may be taken in safety by the nursing mother.

**Mine Alarm**

Often a "creep" or a movement of the roof in a mine precedes a cave-in. An electric alarm which will give warning is the subject of a patent issued to an American inventor. A pair of pipes are arranged upon a tripod. The upper pipe is provided with forks at the top which are adjusted against the roof. This pipe slides into a second pipe and rests against a spring. Contracts are arranged in an ingenious way so as to close on the two wires of an electric circuit, and bells are rung if the roof moves after the device is set.

London has a population of 7,480,221.

### The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising—The Transcript covers a wide section of territory in Western Ontario and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

The best fly swatter—cleanliness.

Port Huron merchants now discount Canadian currency three per cent. The moral is for Canadians to trade at home and change the rate.

At London they are giving you the choice of taking your Sunday ablutions in the family bath tub or hiking to the devil's playground at the lake-side and sporting with the half-clad beach beauties.

Canada's wonderful resources are surprising the world. No country in the world excels Canada in its electrical development opportunities or in the potential wealth of its undeveloped water powers.

The post office department has announced that on and after September 1st the minimum size of post cards within Canada will be changed to 4 inches by 3 inches, the minimum size for international cards.

When Ontario has a Press that is both influential and efficient, huge advertising signboards are not only unsightly on the landscape—they are quite unnecessary, in the opinion of Magistrate Jelfs of Hamilton.

There is supposed to be a law making headlights non-glaring, but it does not seem to be much observed around these parts. The law is a good one and a few prosecutions for its non-observance might have a salutary effect.

Many of the Sunday School and other picnics are paying cash to children winning races. The claim is that the children would rather have the money. It was possibly expecting too much to ask boys to keep on running 100 yards for a cake of soap or a pocket comb, says an exchange.

The agricultural outlook in this section is particularly bright. Pastures are good and another good hay and fodder crop has been cut. Other crops are very promising. This district is hard to beat and as this becomes more evident every year farm property here should increase in value.

The effect of the Drury government's four years in power has resulted in some 2300 legislation, and some not so good, but it established the fact that there were many able men engaged in agricultural pursuits in this province who were well equipped for public service, observes the Renfrew Mercury.

—We are glad to have the letter of

"An Old Subscriber" in this issue. Farmers and others should use the columns of their local paper more than they do to express themselves on public questions. It is the opinions of the masses, not those of paid writers, that are having weight with the powers that be in these days.

In reply to the question, "What were lumber prices in Canada about 1850?" the Canadian Forestry Association says that white pine, the chief construction timber, was about \$13 a thousand feet, as against five or six times that at the present day. It is the accepted opinion that Canada and the United States will never again see an era of "cheap lumber," as the toll of forest fires, set mostly by human recklessness, has so reduced the stands that raw material must remain very high in market value.

### "SPEEDING UP" THE FARMER

To the Editor of The Transcript: An article in a recent issue of your paper ostensibly written for farmers to a renewal of energy in order to increase production and lower the cost of living, paying off the war mortgage, saving the country from drifting into bankruptcy, etc.

This appeal, coming as it does in a time when agricultural prices of farm production are much below a paying basis, is certainly inopportune. If there is one class in the community who are deserving of sympathy it is the farmers. Long hours, scarcity of farm labor—how are we to expect improvement in any direction? The pasture farms, numerous on every side in the best sections; homes broken up—gone to the cities or over the boarder. This is not pessimism; it is the actual facts.

It is all very well for high salaried government paid representatives and office holders to shout "sacrifice and economy to the farmer. Let them cut their salaries in two and sacrifice for the country they pretend is drifting in the wrong direction."

Something will happen some day. There are breakers ahead. We have immense resources; we have had them. But our debts have constantly increased. Our net debt in 1903 was \$361,506,939. In 1914, before the war, it had increased to \$338,996,830. In 1920, to \$2,248,868,624. Since then it has steadily gone on the same way.

So that is where we stand as a nation. It will be a difficult task to reduce the living conditions of intelligent rural yeomanry of Canada to that of the Russian peasantry.

Liberty and equality! The good old motto, "Equal rights to all and special privileges to none."

### THE FARM MOTHER

A few weeks ago we told the story of a farm mother who had been carrying water from the well for 50 years at half a cent a mile. That is, half a cent a mile would have paid for a force pump and some pipe and a tank upstairs. Many other women are carrying water at half a cent a mile. Many of them are wearing out their backs over a wash board.—Prairie Farmer.

A New Jersey scientist advises people to wink their eyes if they would save their sight. But it is prudent to wink them both at once.

### CAIRO

Mr. and Mrs. Weaver, of Turner returned home after spending a week with her uncle, Mr. Catton. Alfred Wehlann left on Sunday for Whittby, where he has secured a position.

Mark Randles, of New York; Will Randles and wife, of Wardsville, and Mrs. Mary VanEtter, of London, were guests at the home of their brother John during the week.

Miss M. Weaver, of Turnerville, has village, spent Sunday with the latter's brother, A. Catton.

Kelso Annett, of Hamilton, is spending his vacation at his former home here.

Mrs. John Randles spent a few days last week with her brother and sister at Aberfeldy.

### PARKDALE

Kathleen Fisher is visiting friends in Windsor.

Mrs. A. Bramer and Miss Pearl are holidaying at Niagara Falls.

R. Everitt has returned home much improved in health after several weeks' treatment in St. Joseph's Hospital, London.

D. Campbell and Miss F. Campbell motored from Lobo and spent Sunday with their sister, Mrs. W. B. Thompson. Edythe Thompson accompanied them home and will spend a week in that vicinity and in London.

Miss Maud Everitt spent last week in Detroit.

Jean Watterworth, of Glencoe, is holidaying with her grandparents here.

Mr. and Mrs. R. Martin and children, of Springfield, Ohio, are visiting her parents.

The stork visited Earl Blain's and left a baby boy—Albert Rankin.

Mr. and Mrs. Fred Haggitt and kiddies motored to Leamington and spent the week-end with friends.

### DAVISVILLE

Mr. and Mrs. Fred Watterworth and daughter, Madeline, of Woodgreen spent Sunday with her brother, Fred Armstrong.

The many friends of Daniel King will be glad to hear that he has returned home after spending a couple of weeks in a London hospital.

Mrs. Fred Armstrong has returned to her home after visiting friends in Detroit.

Mr. and Mrs. Lawrence Babcock and son and Mr. and Mrs. Fred Haggitt and family are spending a few days with friends in Detroit.

Miss Hazel Armstrong spent Sunday of last week with Mr. and Mrs. Percy Shred.

### SHIELDS

The Needle Club met at the home of Mrs. D. M. Mitchell on July 12th. There were 14 members and 4 visitors present. The special collection instead of the social was liberally responded to. It was unanimously agreed that the members give a waist measure collection along with the usual tea collection at the annual meeting at Mrs. Hugh R. McAlpine's on August 2nd. The tea collection was \$3.90.

### KILMARTIN

Miss Georgina McIntyre, of London, and Miss Eleanor McIntyre, of Glencoe, were visitors at George L. Munroe's last week.

Miss Beatrice Munroe, of Alvinston, is spending a few weeks at her uncle's, George L. Munroe's.

### MODEL CENTRE

Miss Elda Campbell is holidaying with friends at Longwood.

Fred McGill attended the funeral of his aunt in Detroit on Sunday.

Mr. and Mrs. Alex. McKellar and Mr. and Mrs. David Eddie, of Calgary, spent last week with friends in Detroit.

Will Eddie motored to Blain's Grove on Lake Huron Tuesday and brought home some boys who were camping there.

Misses Alma and Jennie Mawhinney, of London, are visitors at the home of D. F. Eddie.

Mr. and Mrs. Archie McAlpine and daughter, of Tail's Corners, spent a day last week at the home of his brother here.

Miss Helen Squire, of Tail's Corners, is holidaying at the home of George Woods.

The families of William, James, Robert and Neil Carruthers enjoyed an outing to Springbank Park on Friday last.

Mr. and Mrs. Alex. McDonald, of Ekfrid Station visited at Dan A. McCallum's Sunday.

Another way to avoid work is to organize a propaganda campaign of some kind and find a few rich people who wish to be useful.

You will search the book of etiquette in vain for advice concerning the graceful way to scratch a mosquito bite.

Cause of Asthma. No one can say with certainty exactly what causes the attacking of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy.

Uncertainty may exist as to cause, but there is no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

## Felt I Would Choke at Times

So says Mrs. Armstrong, who was overpowered by nausea after every meal. Dreco, by its toning and regulating properties, helped restore her to health and vigour.

Many women needlessly go along for years suffering the miseries of gastritis, nausea, pains in the back and other distressing symptoms of an ailing digestion. This was the case with Mrs. W. J. Armstrong, 89 Horton street, London, Ont., until she discovered Dreco. This famous herbal remedy speedily stimulated her sluggish liver, regulated the digestive processes of her stomach and bowels and helped restore them to their normal functions.

"No medicine I have ever taken gave such quick relief as Dreco," says Mrs. Armstrong. "I had been troubled by gas in the stomach after meals, causing heartburn and nausea so bad that I felt that I would choke at times. I often felt very dizzy and spots would float before my eyes. I was constipated and had pains in my back over my kidneys. Two bottles of Dreco have done wonders for me. Now I never feel dizzy, am free of heartburn and nausea and have a good appetite. My constipation has been relieved. Dreco gets my hearty approval."

You, too, can enjoy the same relief that Mrs. Armstrong found in Dreco.

It is a natural remedy and acts in a natural way, being compounded of herbs, roots, bark and leaves under the most careful supervision. Dreco has proved itself the greatest of all health-builders for thousands of men and women. Let its undoubted corrective properties help you. Dreco is pleasant to take and contains no mercury, potash or habit-forming drugs.

Dreco is being specially introduced in Glencoe by P. E. Lumley, and is sold by a good druggist everywhere.

### It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which announces ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

## Canada Faces the Future With Confidence

CANADIANS have always been noted for courage, optimism and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themselves to become croakers and grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest agricultural products.

Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made a good living and brought up their families. It meant hard work, but today they are independent.

### Money in Mixed Farming

In recent years, at different points on the prairies, oats fed to steers have brought from 70c to \$1.07 as against the Fort William price of 42c per bushel, while barley used for the same purpose has brought as high as 99c as against the Fort William price of 57c per bushel. Farmers marketing their coarse grains in this way lower marketing cost, have a sure market and make money on their grain, while at the same time they market their roughage, otherwise often wasted. The cattle embargo is now off. Steers are worth more money and certain to make good money for the Canadian farmer from now on.

### Money in Pigs

The Dominion Experimental Farms have proved by actual test that there is a profit in feeding pigs. Last year at the Central Farm, Ottawa, after paying for feed, labor, interest and depreciation, the net profit per pig was still \$4.63.

### Profits from Sheep

As money-makers, sheep are hard to beat. In every Province from Prince Edward Island to British Columbia are found many flocks returning generous profits to their owners.

### Poultry Pays

Poultry makes money for those who adopt modern methods, whether East or West. Little Prince Edward Island markets co-operatively in carlots, shipping annually upwards of one million dozen eggs. The British Columbia Co-operative Poultry Men's Exchange markets in the same way, thus saving ruinous glut in their local market.

There is a market for good Canadian horses, whether light or draught.

### Grow Seed

Canada's Northern grown seed possesses extra vitality. There is a large market for it to the south. Canada exports seed potatoes, but imports other seeds. She has the opportunity to grow seeds for herself and for export.

### The Future

Ten years from now the pessimists of today will have been forgotten. Britain has removed the embargo against our cattle. She wants our beef and bacon, our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this country.

Canada has the men, the climate, the land, the stock and the potential markets necessary for agricultural success. Let us farm with all the industry and science we can muster. Let's get to work and pay our debts. Canada is moving forward with confidence in its future. Let us keep going ahead.

## Have Faith in Canada

Authorized for publication by the  
Dominion Department of Agriculture  
W. E. MOTHERWELL, Minister. Dr. J. H. GRIDDALE, Deputy Minister.

Next Door to Bank of Montreal

shaken up but not hurt to any extent, although the car was badly damaged. They were taken care of at a nearby farm house until a telephone call brought G. A. Parrott, of Glencoe, to take the girls home. Mr. Cumming stayed with the car until four o'clock in the morning, when he went to the farmer's to get some sleep. Half an hour afterwards vandals passing along the highway stripped his car of the clock and all the tools.

Mrs. W. Whitlock, of London, has received a message from Bellis, Alberta, stating that her niece, Dorothy, the five-year-old daughter of John P. Currie, formerly of Glencoe, was the victim of a fatal accident on Dominion Day, when she was killed by a horse at a celebration. The little girl was a sister of Miss Jessie Currie, of Glencoe.

Stanley Merritt, while driving into town last Thursday with his auto, ran into Mrs. John Hick's car on the townline south of Glencoe, damaging one of the fenders and tearing off the bumper. Constable Henry took him in charge and afterwards let him go. Subsequently a charge was laid against Merritt under the Motor Vehicles Act for failing to stop after the collision occurred and ascertain the extent of damage done. The accused promised to make good all damages and expressed his regret and the charge was not pressed.

Friends of Geo. Scates, formerly of Appin, may be interested to know that his two daughters, Mrs. P. I. Froude and Mrs. A. T. Jones, his granddaughter, Laura B. Rogers, and her guest, Mrs. H. N. Duck, of Kansas City Mo., left on Thursday last week for Cleveland, making the trip via Detroit and Cleveland aeroplane "Nina." They report the passage as extremely novel, interesting and enjoyable, and would recommend anyone wishing a speedy and safe trip to travel via aeroplane as the distance covered was 150 miles in 90 minutes.

At a regular fortnightly meeting of the Glencoe Book Club held at the home of Mrs. Peter McArthur on Monday afternoon a visit was had from the Pleasant Hour Club of Strathroy, which was agreeable all round. The visitors gave a sample program of their regular meetings, consisting of a short address by the president, reading of minutes and selected poem, "Current Events" by two of the members, and a study and discussion of "Julius Caesar" by the club. Four autos conveyed the Strathroy visitors, who expressed their enjoyment of the trip as well as this little fraternization of the two clubs. Mr. McArthur spoke a few words in welcome and lunch was served by the hostess.

—Mr. and Mrs. R. M. Hansen, Mr. and Mrs. Martin Hansen and Miss Lillian King, motored from Detroit and spent a few days at W. C. King's.

—Mrs. Agnes Bell and son George and daughter Olive, of Weyburn, Sask., are on a visit at the home of Mr. and Mrs. Joseph Grant. Mrs. Bell is a cousin of Mr. Grant's.

—Robert McCallum, C. Fred. McRae, Lloyd Lucas, Scott Irwin and Clarence Eddie have returned from a pleasant eight days' outing at Lake Huron with a boys' camping party.

—C. B. Tomlinson and son Bert have returned to their home in Hamilton after spending their holidays with the former's parents, Mr. and Mrs. Wm. Tomlinson, sr., and other relatives.

—Miss Christina M. Sutherland, of Toronto, is spending a couple of weeks at her home here prior to leaving on an extended visit with her sister, Mrs. Harvey D. Anderson, at Spencer, Iowa.

—Mrs. George Walker and daughter Mary, of Winnipeg, paid a short visit to Mrs. Alex. Munroe and J. W. Munroe on Sunday and Monday. They were on their way to Mrs. Walker's former home at Chatham.

—Richard Dunlop and grandchildren, Campbell, Kenzie and Bobbie Miller, are spending two weeks holidays with Mr. Dunlop's daughter, Mrs. K. M. Byrnes, at her summer home near Cochester, on Lake Erie.

—Miss Kate Macdonald, of Springfield, Mass., is on a visit to relatives and old friends in Glencoe. Miss Macdonald is on her way to spend a year and probably make her home permanently in Los Angeles and will visit her brother in Missouri.

—Mrs. F. C. Inglis, of Toronto, is spending a few weeks in Glencoe with her sisters, Mrs. Wm. Gilbert and Mrs. Margaret Young. Some thirty years ago Mrs. Inglis taught in the Glencoe public school, and prior to that in the Wardsville public school.

—W. J. Stevenson, of Indian Head, Sask., was in Glencoe yesterday calling on old friends. He and his wife and youngest daughter, Billie, are on their way to Toronto and Mitchell. At Toronto they will make a visit to Mrs. Stevenson's mother and brother Edward, and at Mitchell will visit at Mrs. Stevenson's former home, where the town is holding an "old home" week. Mr. Stevenson is a Glencoe old boy who has made his mark in the West. For the last fifteen years he has followed the teaching profession at Indian Head with excellent success and was recently appointed inspector of schools for Southwestern Saskatchewan.

—Dan Treestain and family are holidaying at Port Stanley.

—Mrs. (Dr.) Freemie will not receive during July and August.

—Miss Ilda Smith, of Detroit, is holidaying at her regular meetings.

—Miss Betty Grant, spent the week-end with friends at Mount Elgin.

—J. H. Campbell and family, of Toronto, are visiting friends at Appin.

—Miss Mary Balmer, of Toronto, is visiting her cousin, Mrs. A. J. Wright.

—Mr. and Mrs. H. J. Jamieson spent the week-end in Windsor and Detroit.

—Miss Daisy Whitehall spent last week with Miss Marion Balmer, Thamesville.

—Misses Leila and Dorothy Colerick, of London, are guests of Miss Arlie Parrott.

—Misses Margaret and Jean Conlthard have left for a boat trip along the St. Lawrence River.

—Mrs. Anderson and Miss Martyn, of Alvinston, spent the week-end with their sister, Mrs. Lusham.

—Mrs. Smith and baby, of St. Thomas, are visiting at Wm. McCallum's for a couple of weeks.

—Justice David A. McDonald, of Vancouver, B. C., is on a visit to his mother and brothers at Appin.

—Mrs. Morton, of Detroit, and Mrs. Scratch, of Windsor, are visiting the latter's daughter, Mrs. C. O. Smith.

—Mrs. Arthur Woods, of Ottawa, and Mrs. Adams, of Leamington, were visitors at Isaac Walker's this week.

—Mr. and Mrs. John A. Rose and son Charlie, of London, spent the week-end at the home of F. W. Gubins.

—Mrs. Harold Raynor and son Eric, of St. Catharines, are visiting Mrs. Raynor's parents, Mr. and Mrs. L. Suttler.

—Miss Elizabeth Arnold and Ernie Chrysler, of Chatham, were the guests of Miss Marguerita Garner on Sunday.

—Rev. Andrew Leitch, wife and two children, of Bethany, West Virginia, are spending the holidays at A. M. Leitch's.

—Miss Agnes McEachren has returned home after spending two weeks holidaying in St. Thomas and Port Stanley.

—Mr. and Mrs. Chas. Jeffery and daughter Madeline, of Windsor, are spending a few days with friends and relatives here.

—Mrs. Young and two daughters have returned home after spending a few weeks with Mr. and Mrs. Ernest Young at West Lorne.

—Mr. York, principal of Glencoe high school, and family are leaving on Saturday to spend the holidays at Toronto, Kingston and points east.

—Miss Christina M. Sutherland, of Toronto, is spending a couple of weeks at her home here prior to leaving on an extended visit with her sister, Mrs. Harvey D. Anderson, at Spencer, Iowa.

—Mrs. George Walker and daughter Mary, of Winnipeg, paid a short visit to Mrs. Alex. Munroe and J. W. Munroe on Sunday and Monday. They were on their way to Mrs. Walker's former home at Chatham.

—Richard Dunlop and grandchildren, Campbell, Kenzie and Bobbie Miller, are spending two weeks holidays with Mr. Dunlop's daughter, Mrs. K. M. Byrnes, at her summer home near Cochester, on Lake Erie.

—Miss Kate Macdonald, of Springfield, Mass., is on a visit to relatives and old friends in Glencoe. Miss Macdonald is on her way to spend a year and probably make her home permanently in Los Angeles and will visit her brother in Missouri.

—Mrs. F. C. Inglis, of Toronto, is spending a few weeks in Glencoe with her sisters, Mrs. Wm. Gilbert and Mrs. Margaret Young. Some thirty years ago Mrs. Inglis taught in the Glencoe public school, and prior to that in the Wardsville public school.

—W. J. Stevenson, of Indian Head, Sask., was in Glencoe yesterday calling on old friends. He and his wife and youngest daughter, Billie, are on their way to Toronto and Mitchell. At Toronto they will make a visit to Mrs. Stevenson's mother and brother Edward, and at Mitchell will visit at Mrs. Stevenson's former home, where the town is holding an "old home" week. Mr. Stevenson is a Glencoe old boy who has made his mark in the West. For the last fifteen years he has followed the teaching profession at Indian Head with excellent success and was recently appointed inspector of schools for Southwestern Saskatchewan.

### SPECIAL NOTICES

Glencoe Chautauqua, Aug. 4-8. Bell organ for sale. Phone 603:22. Wedding cake boxes at The Transcript office.

21c trade, not on account, and 19c cash for eggs, at Mayhew's.

Get your binder twine and fertilizer at W. G. Squire's. Prices right.

House for sale. Apply Mrs. Wm. Ewing, Victoria St., south, Glencoe.

For sale—2 single-furrow foot-lift sulky plows, at your own price.—W. G. Squire.

Come and meet your friends at the Appin garden party, afternoon and evening, August 1st.

Call at Scott's shoe store and get quality shoes, quality rubbers at a moderate price for cash.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, first door north of Transcript office; phone 63.

Rope made from binder twine—draw rope, 3/4 cents per foot; 1/2-inch sling rope, 2 cents per foot; trip rope, 1 1/2 cents per foot.—Avery Gillett, R. R. 2, Glencoe.

Don't fail to see the baseball match, Appin vs. Iderton, at 4 o'clock, an soft ball match. The match will be at Glencoe high school, at 2 o'clock, also other sports, on afternoon of Appin's big garden party, Wednesday, August 1st, on Appin park grounds. Admission for afternoon, 25 cents.

### CHEERIO NOTES

Monday evening a crowd of spectators numbering about one hundred gathered on the spacious grounds of W. A. McCutcheon to witness the return baseball game between the Cheerio and Gore teams. The game was very interesting throughout, ending with a score of 21-8 in favor of the Cheerio girls. The Cheerio lineup was as follows:—Pitcher, J. Currie; catcher, J. McCutcheon; 1st base, V. Henderson; 2nd base, F. Gardiner; 3rd base, F. McCutcheon; 1st shortstop, D. Squire; 2nd shortstop, S. Gardiner; left field, H. McCutcheon; right field, V. Henderson. Umpire—M. Reycraft.

The Cheerio boys defeated a picked team of Glencoe boys in a game Friday evening, July 20, the score being 14-0. Umpire, J. Hayter.

At the recent annual meeting of the Cheerio club the following officers were elected:—President, Agnes McEachren; vice-president, C. Reycraft; secretary, S. Gardiner; treasurer, M. Reycraft; pianist, A. Henderson; assistant pianist, H. McCutcheon; manager of soft ball team, J. Currie; H. Gillies; J. D. Gillies, P. McEachren; V. Henderson; program committee, Henderson, B. Hartley, D. Squire, W. Walker, W. Brown.

### PUBLIC SCHOOL PROMOTIONS

(Continued from page 1)

S. S. No. 7, Ekfrid

Names are in alphabetical order:

Entrance.—Lillian Eddie, Ella Leitch.

Sr. IV.—George Berdan, Elizabeth Crawford, Sarah Crawford, Mack Leitch.

Jr. III to Sr. III.—Kenneth Eddie, Clarice Glasgow, Harley McDonald.

II to Jr. III.—A. D. Berdan, Ellen Berdan.

I to II.—Jean Crawford, Alice Pole, Sr. Primer.—Louisa Berdan, Dorothy McDonald.

Jr. Primer.—Duncan Crawford, Isabella McCullum, Margaret McDonald, Margaret McKellar.

Jessie I. McAlpine, Teacher.

S. S. No. 13, Ekfrid

II to III.—Required to pass, 300—Alice Galbraith 409, Marie Huston 378, Alex. McTaggart 340, Kathleen McColl 322, Kathleen Nevin 317, Lorne Galt 310, Kenneth Johnston 308, Olive Hughes 308, Erma Leith 306, Thelma Leith 300.

I to II.—Required to pass, 390—Douglas Sinclair 504, Beryl Payne 473, Anabel Macle 469, Edith Philpot 447, Emma Gough 431, Jack Howe 424, Vera Jeffery 423, Harold Howe 405, on approval—James Black 359, Evaline Cushman 350.

Primer to I.—Ruby Stevenson, Stewart Bardwell, Marjorie Galbraith, Esther Webster, John Hughes; on approval—George Webster, Norman Hughes, Helen Rankin, Katie Gough.

U. S. S. No. 23, Brooke & Moss

Entrance.—Archie McPhail.

Jr. IV. to Sr. IV.—Neil Campbell, III to IV.—Cassie Ferguson 87, Janet Hewett 72.

II to III.—Ira McPhail 76, Gordon Campbell 62, Norman Campbell 60.

I.—Wilfrid Ferguson, Alice Parleau.

Primer.—Bertha Parleau, Elizabeth Leitch, Teacher.

U. S. S. No. 14, Metcalfe

Names in order of merit:

Entrance.—George Price (honors), Lorne Towers.

Jr. IV. to Sr. IV.—Florence Moore, Archie Carruthers, Christopher Carruthers.

Sr. III to Jr. IV.—Orville Towers, Wilfred Peering, Charlie Towers.

Jr. III to Sr. III.—Dennis Giles, Martin Walker.

Sr. II to Jr. III.—Ernie Moore, Lloyd Munro, Bruce Moore.

I to II.—Phyllis Gilles, Neta Moore.

Primer.—Verna Moore, Elizabeth Carruthers, Olive Moore.

Mrs. Edna I. Moore, Teacher.

### AUCTION SALE

On south half lot 16, range 2 north of Longwoods Road, Moss, 3/4 of a mile north of Wardsville, on Tuesday, July 31, at 1 o'clock:

Pure Bred Pacing Stallion "Dillard Payne" (6164), reg., weight 1,300

Bay Mare rising 7, weight 1,400

Bay Mare rising 9, weight 1,300

Brown Mare in foal, due Aug. 30

Bay Gelding 7 years, weight 1,500

Bay Driver 8 years, weight 1,100

Brown Driver rising 8, weight 1,200

Reg. Holstein Bull, 16 months old.

"Pontiac Echo Boy" (54710)

Reg. Holstein Cow, bred May 17.

"Poly Orlanna" (43353)

Pure Bred Holstein Cow, 4 years, due Aug. 12

Roan milking Shorthorn Cow, 5 years, due Oct. 23

Heifer Calf, 3 months, Holstein, can be reg.

Calf 1 month old

Durham Cow, due time of sale

Durham Heifer, due time of sale

Reg. Berkshire Boar, "Woodburn Co-operator" (68498)

York Sow, bred June 25

4 Young Pigs 12 weeks old

4 Pure Bred Dark Cornish Cockerels

5 Pure Bred Dark Cornish Hens

5 Pure Bred White Orpingtons

30 Yearling Hens

100 Young Ducks

7 Old Ducks

Team Wagon

Forks, Shovels, other Tools, etc.

Beet Williams, proprietor; H. D. McNaughton, auctioneer.

Don't miss Lamont's final clearing sale of harness. See ad. for prices.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that besides being an effective vermifuge, they are tonical and health-giving in their effects.

## Acadians to Visit Grand Pre

THE "Land of Evangeline" will become the scene of another celebration on August 9th. At a meeting of the Grand Pre Memorial Committee recently held at Moncton, arrangements were made for an excursion to Grand Pre on that day. Special trains will carry people from all points in Nova Scotia to the little town from whence the long suffering Acadians were deported by the English in 1755, and it is anticipated that people will join the excursionists from all parts of the Dominion and the United States.

One of the features of the day's programme will be the unveiling, in the Memorial Chapel, of a statue of the Madonna, which will be erected in recognition of the noble work accomplished by the Acadian National Societe L'Assomption, the Madonna being the patron saint of this society. The statue, which is 7 1/2 feet high rests on a six foot base, has great beauty of design, and is claimed to be the finest of its kind on the American Continent.

As conditions are not as bright as they might be financially in Acadia the interior of the Memorial Chapel will not be completed this year but a committee has been formed to collect Acadian relics and souvenirs, and to obtain, if possible, further works of art that the interior of this institution be in keeping with the statue. While the exterior of the chapel is plain it is the intention of the Committee to have the interior as elaborate as possible. It will not be used for church purposes but as a museum and white and tinted marble with mosaic flooring will be used with artistic effect. Many will visit Grand Pre, not so much for their interest in Acadians, as because it is the setting of Longfellow's story of the deportation. Evangeline is honored in immortal stone and large numbers have journeyed, particularly from America, to lay their tributes on the statue which is a monument not only to the heroic Acadian maid, but to the great poet whose writings she once inspired.

**JELLIES AND JELLY MAKING.**  
Allow to drain overnight. In the morning measure a pint of sugar for each cup of fruit. Heat the sugar carefully in an earthen dish in the oven. Stir often to prevent burning. Boil the juice ten minutes, skim, add the hot sugar and then boil three to five minutes longer or until it thickens on a spoon when exposed to the air. Pour into glasses, seal with paraffin and store in a cool dark place.

and pour into a coarse muslin bag. Allow to drain overnight. In the morning measure a pint of sugar for each cup of fruit. Heat the sugar carefully in an earthen dish in the oven. Stir often to prevent burning. Boil the juice ten minutes, skim, add the hot sugar and then boil three to five minutes longer or until it thickens on a spoon when exposed to the air. Pour into glasses, seal with paraffin and store in a cool dark place.

When fruit is cheap and sugar expensive, jellies may be made to advantage with one-half as much sweetening as usual, that is, with one-half cupful of sugar to one cupful of juice. The yield of jelly will be less, for one cupful of good juice plus one cupful of sugar should make about one and one-half cupfuls of jelly, whereas one-half cupful of sugar plus one cupful of juice makes between one-half and three-fourths of a cupful of jelly.

One-half of the sweetening may be glucose syrup, light-colored corn syrup, honey, or sorghum syrup. If the other half is granulated sugar, there will be little noticeable difference in sweetness. The juice of grapes combined with glucose or corn syrup will make a good jelly even when no sugar is used.

Recipes which include a commercial pectin require more sugar than is used in the long boiling process of jelly making. When pectin is added, the "jelly" stage is reached with a much shorter period of cooking and the fruit juices are not boiled away.

Mint jelly—which is so nice to serve with meat—is made with apple juice, using a handful of fresh mint leaves and stalks to eight cupfuls of apple juice; add sugar and proceed as usual. When the jelly stage is reached, take out the mint leaves, add a very small quantity of green vegetable coloring, mix, then pour into glasses and seal with paraffin.

Jelly resembling that made of grapes can be made by using equal parts of blueberry juice and the juice of sour apples. Proceed as in making other jellies. The apple juice provides the necessary pectin and improves the flavor.

Wild cherry jelly has a delightful flavor. Use cherries not overripe. Wash and place in a preserving kettle with a little water, not enough to cover the fruit. Boil covered for twenty minutes or until the cherries will mash. Remove from fire, mash.

Pattern mailed to any address on receipt of 15c in silver or stamps, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

**SCARLATINA IS SCARLET FEVER.**

I want to point a moral by citing a case of "scarlatina" that has just been brought to my notice. The little chap did not seem to be very ill, and the parents were very much relieved when a "friendly" doctor said it was only scarlatina and would not amount to much. A week later the child had a very bad earache. After much suffering the ears began to give out a running discharge. The pain was somewhat better so they were satisfied to call the friendly doctor on the telephone and receive his assurance that no treatment was necessary and everything would be all right.

Everything was not all right. Six weeks later the ear discharge was still running. A little relative who visited at the house for a day went back to his home and developed a malignant form of scarlet fever. The doctor in charge, searching carefully for the origin, got word of this scarlatina case with the running ears and was easily able to connect his case with that. Then the parents awoke to the fact that the "friendly" doctor had done them a very unkind deed, indeed. They were still more positive of this when investigation by an ear specialist showed that the untreated discharge from their boy's ears had resulted in such destruction that he would always be very deaf, perhaps totally.

Never neglect an ear discharge. Do not attempt to treat it yourself as you are likely to do more harm than good, but get good treatment. An ear discharge that originated in scarlet fever is contagious long after all other signs of the illness have disappeared. There is no such separate disease as "scarlatina." Light forms of scarlet fever are sometimes given that name, but they should be called by their true name so that they will be given the quarantine and attention that such a dangerous disease always demands no matter how light may seem to be the attack.—Dr. C. H. Lerrigo.

CHAPTER X.—(Cont'd.)

"Enough, enough, David. As long as you say O.K. I ask no questions, my boy. Only the warning comes a night and day too late. The robbers came last night."

"Then the ruby is gone?"

"No, thanks to your uncle, we were prepared. He gave me no peace until we had the box of death in the house. Mr. Tung Yung advised that we advertise our possession of it, that no one then would molest us, but we overlooked this advice, which in any case would have been rather difficult to follow. Well, the thieves came, evidently two novices, for they were not proof against the box."

"It's so deadly as that?"

"Deadly! It's like a rattlesnake bite. The name's sufficient. Terrible death for the poor devils. I regret now I was so lax in not having at least endeavored to advertise what a death trap I meant."

"But you are sure, sir, you are safe from the thieves with even the box? Might they not have an antidote for its deadly action?"

"I am not sure. There is an antidote, but only four men in China know of its existence; a mandarin, who, being related to Paul, is proud to have owned the jewel in the kingdom, and I wouldn't have gone through with it this time but for Chess. Figuratively speaking, he stood behind me with a red-hot occult pitchfork. That uncle of yours, my lad, has more will power than Napoleon."

"They're a strange people," mused David.

"Strange and capable. If they weren't half buried in the past they could conquer the world."

"And you believe, then, you are fully protected when the news gets abroad?"

"So I am told," replied Culver. "It seems a religious significance is attached to the house that holds the magic box. The Chinese are very superstitious about it. They revere it as they do their ancestors, which is saying enough. And now, David, come in and have some breakfast. Irma will be glad to see you."

"I suppose Mrs. Culver is very much upset over the affair?"

"Yes, but she bears up wonderfully. It makes it doubly hard for her to-day, too. This is our baby's birthday. She would have been nineteen to-day had she lived."

"Your wife is a wonderful woman, Doctor."

Culver paused in the doorway, and laying a hand on David's shoulder, said earnestly: "Life is a thorny way at the best, but a good wife is an antidote for every ailment. May you be as fortunate as I have been, David."

"Thank you, sir."

Culver looked at him sharply. Was it fancy, he wondered, that detected a hopeless note in the voice?

A place was already laid for David at the breakfast table. A servant had evidently brought the news of his arrival, and Irma was there with her kindly welcome.

"I'm sorry your uncle isn't back yet, David," she said, giving him her hand. "I don't know what we would have done without his head and shoulders. They seem to banish difficulties like magic, don't they, Neil?"

"A true friend, a priceless wife, both I possess, David. Do you not envy me?"

"Indeed I do, sir."

"But, David, boy," warned Culver as he broke open a muffin, "do let envy lead you the wrong way. Keep your smile till you reach old England or America."

"What needless advice, Neil dear," laughed Irma, "hope you will like your coffee, David. I made it the American way."

David, seizing the opportunity to change the subject, gave forth a glowing eulogy on the beverage.

"By the way, David," continued Culver, in spite of his wife's anxious glances, "Mrs. Claymore has a Chinese protegee, I hear."

"She's a mandarin's niece," broke in Irma, casting a warning but useless look on her husband.

"Of course, my dear. I am not disparaging the girl, only I hope Mrs. Claymore will never break her heart by taking her to America."

"You think human transplanting unwise?" questioned David. He hoped he had succeeded in making his question appear casual.

"Well, David, as you know, Irma and I tried it. We believe that Providence has blessed our efforts on Paul's behalf. He is a wonderful lad, was a marvelous child, but somehow Irma and I, as much as we love him and as much as we are sure of Paul's love for us, have always felt that during all these years a tendril attached him to his native land. And now, you see, we wouldn't have it different, would we, dear?" turning to his wife.

"No," replied Irma quickly. "We adopted him for the sake of China, that he might come back some day and implant ideas and ideals of the New World."

"And God willing, he will," added Culver. "Paul's love for China is no small thing, and when he reappears among his own blood, his own people, he will still be one of them, but, thank heaven, with their superstitions and pagan worship swept away. My wife is that Paul be the seed, the beginning

of a new East. His genius, his simplicity, his firm belief in the brotherhood of man I believe qualify him for that evangelical post. But, David, to go back to your question of transplanting the East to the West, our experiment was with the bud. I would not care for the responsibility of experimenting with a young plant. No, I would as soon toss it into a river of ice. As the saying goes, the East and West cannot meet. The East to know and love the West must start at the converging point and vice versa. They can't cut across half way."

David's mind conformed all his host's statements, but his heart rebelled stubbornly. However, as he sat there doing fair justice to an appetizing breakfast, not even a connoisseur in human nature would have guessed the turbulence within. To be sure a shadow lent a seriousness to the grey eyes and lines of weariness were around the firm mouth, but a glance at the three short gold stripes on the khaki sleeve answered readily for these.

Irma Culver tried not to let her glance linger on the serious young face. Perhaps it was her own bitter past, the wound which had never healed, that made her woman's intuition, for she knew David was now in the throes of a bitter conflict, the conflict with self.

At ten o'clock Chesterton Reynolds returned with two Chinese officials, who were very polite, and very obsequious to the foreigners. They poked their heads with superstitious awe into the room where the tragedy had occurred. They made no notes, however, with regard to the two victims. Instead, they gave hurried instructions to their subordinates, who set to work to remove the bodies. Once they were compelled to enter the room, and as they passed the table where the ruby reposed in its deadly case they bowed to the floor, knocked their foreheads several times on the carpet, muttering all the while low, weird-sounding incantations.

As David watched them any misgivings he may have had of further designs on the jewel vanished. Superstition would in future protect the sacred ruby from the most avaricious as well as the most prejudiced.

The two officials took their departure with many apologies to the foreigners and assurances that no future unpleasantness would arise, as the other people implicated would be brought to justice immediately.

"I'm afraid, after all, their promises are only vapor," remarked Reynolds, as with Culver and David he watched the strange cortege moving down the hill. "Why their tongues wagged and declared otherwise, their sly glances and grins plainly indicated the nasty affair would be locked out of sight like a skeleton in a cupboard. But China will be denied her morsel of scandal any more than her foreigners. Look!"

The other two followed the direction of Culver's eyes. The hill was dotted with eager, chattering groups, gesticulating and evidently much awed and excited.

"Yes," replied Culver. "If advertising ensures the ruby's safety, we need have no further apprehensions."

CHAPTER XI.

As dusk fell, David and his servant turned homeward. The city was in festive attire. It was with considerable difficulty they made their way through the gay crowds. Banners were playing, and lanterns of all sizes and descriptions were strung along the streets.

"What is it all about?" enquired David, turning to the smiling Ma Tu.

"It is the festive of Niu Lang and Chih Nu."

"Indeed? I'm afraid, Ma Tu, I am no wiser now than yesterday."

"Master like know story?" queried the boy, with pleased eagerness that David should be interested.

"Indeed I should, Ma Tu. The stories of China are very delightful; a change of diet, as it were, for a practical Englishman."

"These two stars, Niu Lang and Chih Nu, are very delightful; the most important air," watch the seed-planter and the weaver, and they loved and married."

"Of course, the sensible outcome."

"Eh?" questioned the boy.

"Yes, Ma Tu, very interesting. Go on with your fairy tale."

Lifebuoy may be safely used on the tenderest skin.  
It is wonderfully cleansing for little hands, faces, and bodies.  
It leaves a delightful freshness and softness.  
Lifebuoy babies have beautiful healthy skins.

"Fairy tale? Funny word. What feery tale, Master Marsden?"  
"A fairy tale, Ma Tu, is something too beautiful to be true."  
"Ah well, true or no, Chinese like. Yes, these two loved and married, but after that they no work for others so much. Then they punished and separated by River of Heaven and they meet once in a year, which is now. But there was no boat for Chih Nu to cross River of Heaven, so magpies spread wings, many, many, and on them she reach her man. They see each other one day only. Again magpies spread wings and she go back, but Niu Lang and Chih Nu no want to part. They weep and weep—that why so much rain at this time."  
"A very beautiful legend, Ma Tu, and I know you would like to celebrate Niu Lang's and Chih Nu's one-time happiness like the rest, so go along and join the crowds. You've no time to lose. An hour of frolic has already sped by." Saying which David slipped some cash into the boy's hand and galloped down the street, but he smiled at the echo of a gleeful chuckle.  
(To be continued.)

**Why Cannibals Are Cannibals**

Beatrice Grimshaw, the English author and planter, whose vast plantation on the island of Sariba, at the tail end of New Guinea overlooking the China Straits, has furnished a setting for her new story, "Nobody's Island," is an intrepid explorer. Taking ten on a cannibal island is to her an interesting afternoon's entertainment. Writing to a friend, she tells of a cruise to rescue the bones of a missionary from a particularly notorious cannibal tribe.

"We called at Gobarbari. It is a island close to the mainland. Few white people have been there, and most of them were eaten; no one has ever stopped a night, and no white woman was ever there before myself. The Governor, a friend of his, the Colonel, two missionaries, Governor's secretary, myself and six armed police from Port Moresby (natives) were the landing party. The natives were extremely excited and nervous, and would say, but they received us quietly enough, and accepted presents of beads, etc. There was a canoe full of skulls in the river, and many skulls in the houses. We walked all through the village, saw a general family sleeping house, 190 yards long, divided into numberless compartments (the flat system, evidently), human bodies laid out in the branches of trees, which is their method of burial, and some strange images. Stayed all afternoon, and made our boys make afternoon tea for us in the middle of the village; nice china, silver and cakes. The cannibals crowded around in the wildest excitement. They were all unclothed, with a good deal of paint and feathers, and had bows and spears, and stone axes. They seemed frightened at the tea ceremonial, evidently thinking it was some piece of magic, which they believe in greatly.

When we were on shore, we asked them they cooked their cannibal food, and they said with native sag and showed us some, in rolls. Told by the Governor that the must give up these practices, they said it would be hard to do so, for human flesh tasted much better than pork or dog.

When we were on shore, we asked them they cooked their cannibal food, and they said with native sag and showed us some, in rolls. Told by the Governor that the must give up these practices, they said it would be hard to do so, for human flesh tasted much better than pork or dog.

**The Man Who is Ready for Emergency Wins Success.**

The partners in a firm were discussing the question as to which member of the staff should be promoted to a certain responsible position.

"Yes," said one, "X— would be all right— up to a certain point. But in an emergency—"

X— was not promoted. He had been quite dependable in fair weather, with the business boat running smoothly before the wind and the skipper at the helm.

But in a sudden squall, with the skipper absent, and a quick and responsible decision to make, X— would have failed. His thinking was good, if he was given time; but he had not the gift of summing-up a situation rapidly and taking control. He would have been afraid of assuming responsibility. Briefly, he was not the man for an emergency.

It was not so much that he would have lost his head, but that he would never have found it in time. He was the sort of man who, if he saw that a motor-car was going the way to smash into a baby carriage, would shout to the chauffeur instead of pulling the carriage out of danger. No good in an emergency. He was either too late in action or did the wrong thing.

X— is the type of many. They get so far on life's ladder, and there they stay. Useless in an emergency! If they saw a house on fire they would run to the nearest fire alarm right away, instead of thumping at the door of the house and rousing the inmates first.

The man who is quite reliable in an emergency is he who gets on. And how is the gift—a tremendous one—attained? By practicing in quick thinking, for a start. Then by training oneself in quick observation, so that the visible factors in an emergency can be summed up in a flash.

What the eye sees in one second the mind acts on the next. Practice makes perfect. It helps too, to imagine emergency situations, and to solve them rapidly.

For instance: you are a signalman. You control crossing-gates, visible from your box. They are closed against road traffic, but you see a heavy charabanc, evidently out of hand, rushing at them. What would you do?

Well—this is a real-life episode—the "emergency" man in the signal box pulled the lever that slipped the strong holding catches! Then the charabanc pushed the free gates before it and passed through. He was the right man.

**A Prayer for King George V. Emperor of India.**

Birthday, June 3rd.  
Now pray we for our Sovereign,  
God bless our Saviour King;  
Throughout his vast Dominions  
Glad acclamations ring.  
May he so wield the Sceptre  
That discord soon shall cease,  
Like his loved Sire advancing  
Our Liberty and Peace.  
—E. K. Kaye.

Fittest Name for Soldier.  
A party of ladies, on its being reported that a certain Captain Slik had arrived in the suburb, exclaimed, with one exception: "What a name for a soldier!"

"The fittest name in the world," replied a witty female; "for silk can never be worsted."

## A MATTER OF URGENCY IN LIVESTOCK PROMOTION.

Probably every farmer knows that a hog may be spoiled by wrong feeding. Yet somehow few producers or even men officially engaged in livestock promotion have given enough thought to the other side of the same truth—that proper feeding builds up not merely the hog but hog type, shown outwardly by conformation and balance of parts, and shown inwardly by balance of lean and fat and by appetizing quality. Choosing the right sort within the right breed is not enough; the right feeds in right order must be given at the right time.

In building up the frame of the export bacon hog—the "select" in our Canadian grades—special attention has to be given to the amount of lean meat and muscle tissue. This means that feeds in general should contain a high ratio of protein, which is the general name for foods containing nitrogenous compounds. In the same way there must be ample but not overmuch bone; this means minerals in the feeds. Corn has a low content of both these elements. But corn is rich in carbohydrates, that is, the nutrients used by the animal body for heat and for fat production. Hence excessive corn feeding is less desirable for lean hogs than for those in which heavy fat is required.

With, as an incentive, the steady cash returns which have come to Danish hog raisers through the general adoption of tested methods of feeding it is timely that the best information in the Dominion should be collected and put into convenient form for our farmers. To quote Mr. E. C. Fox, when speaking to the Yorkshire Breeders at Guelph: "There is a great deal of data on this subject but it is scattered and uncoordinated. I believe that here especially the industry needs the help of government, both Dominion and provincial. Too many hogs show signs of the wrong kind of feeding and there is immediate need for something to be done. Cannot the government officials disseminate what information they have? An improvement, even if not complete, is better than nothing."

Our store of information should be codified for two reasons. First that it may be accessible in handy form to the man for whom it was first intended and, secondly, that as soon as possible we should be able to get a recognized standard basis of feeding with peculiarly Canadian feeds.

## SHEEP

Sheep should have a frequent change of pasture during the summer season. Where pasture is grazed for any length of time it becomes what English flockowners term "sheep sick," or dry and woody. Sheep do better if changed from one pasture to another, thus allowing the pasture to rest and recruit a new growth of tender palatable feed.

Pastures grazed by sheep for months at a time are subject to parasitic infection which often causes loss to the flockowners. There is no method of ridding pasture when once infested; the only effective means of combating the evil is prevention. Where sheep are kept on the farm year after year every precaution

The second of these reasons is the more important in the cultivation of the export bacon field. Evenness of product, the certainty in the mind of an English bacon curer that he can always get similarity in his purchases, is apparently the main reason why Danish bacon no better than our own should always command a wholesale price of between ten to twenty shillings a hundredweight over Canadian. It is for the individual farmer to decide whether a uniform feed method will pay on his particular farm, but if the Danish standard of uniformity in bacon is to be attained—uniformity of quality and taste under the stern test of the frying pan—then uniformity in feeding must be a condition of production. In such work only tests made under the direction of the Department of Agriculture can carry confidence and it is in this point that the importance lies of prompt action by government officials. Experiments already made are on record and should be broadcast. They should also form the basis of further work. The work will take a long time and must be carried on over a series of years. In Denmark that work has been done for thirty years and is still being done patiently and doggedly. The farming Dane without reluctance makes changes in his methods where changes are found necessary. Danish ways will not necessarily be ours. For instance, there are many parts of Canada where milk, as the by-product of dairying, is not available as it is throughout Denmark and in such places any standard hog feed must differ radically from a standard where milk is the basis. We must work out our own rations. It will not do to take Danish, English or American practice in conditions different from our own and apply them, ignoring those differences, in the expectation that the result will be the same.

Uniformity is something that may seem new in the list of hog raising requirements. In reality it is as old as our export trade. Grading so far as shown that only one hog in eight on stockyards is a "select." Packers have reported that the number even among so-called "selects" yielding soft pork has for some time been unduly high. Now a soft side of bacon is an undesirable export as that from a heavy hog. When therefore the grading of bacon is suggested as a cure-all the fact is overlooked that the first step in large scale classification of bacon is uniform breeding and feeding of the hogs on farms.

should be exercised not to allow the flock to graze for long periods on the same pasture, but alternate frequently as the change is not only a preventive to pasture infection, but stimulates appetite and promotes the growth of grasses.

## Holds on Loads.

For tying on loads, rope cannot be beaten. I am thinking particularly of loads of baled hay. Any person who has had experience in drawing baled hay over rough roads knows how difficult it is to keep the top tier in place. A rope about fifty feet long, drawn tight around the top course of bales will hold them in one solid cluster. Each bale then helps to hold the other.—A. E. E.

## POULTRY

By far the most dangerous intestinal parasite is the tapeworm, which is coming to be more prevalent in chickens each year. The tapeworm may be found anywhere in the intestinal tract and may vary greatly in size, depending upon the age of the worm. The injury from the tapeworm is the fact that it absorbs much nutriment by burying its head in the intestinal wall. The tapeworms are segmented and each segment has the property of absorbing nutriment from the intestinal wall, independent of the balance of the worm. The tapeworms multiply very rapidly, although they are rarely found to exist in any fowl to the extent of more than three or four worms. In the handling of any worm infection the problem which we face is twofold: First, we must eliminate the worms from the intestinal tract of the infected bird; and secondly, we must clean up the yards, ranges and houses to prevent reinfection. While there has been no absolute method yet developed to rid the birds of worms, it is probable that the tobacco treatment will accomplish this most effectively. The treatment for worms is divided into two distinct parts: First, an emergency treatment which is designed to rid the birds of most of the active worms which are in their intestinal tracts. This consists of giving them a mash at ten o'clock in the morning, composed of ordinary dry mash mixed with tobacco tea to a crumbly consistency.

The tobacco tea is made by boiling one pound of tobacco stems in water for at least two hours. The birds should be given no feed whatsoever during the morning previous to the feeding of this wet mash. The feeding of this tobacco mash should be followed five hours later with a moist mash mixed with a solution of Epsom salts, dissolving one pound of Epsom salts in water for each 100 birds to be treated. They should be given no

other feed than here specified during the day that this emergency treatment is given. Then for about a month following this emergency treatment, it is well to put into your regular dry mash, which is kept before the birds all the time, tobacco dust at the rate of 2 per cent. of the mash mixture. When feeding these mashes be sure to spread them out over a good surface so that all the birds can get their share. Repeat the treatment once a week for three weeks. If the treatment is properly given the birds will show a decided improvement from the very beginning.

When it is thought that worms are present in the poultry yards or runs, it is the best plan to proceed as follows: First, apply a heavy application of air-slaked lime. Do not be afraid to put it on the rate of two or three tons to the acre. Plow the land carefully and rather deep, turning under the lime. After harrowing, re-lime the new soil with at least 1,000 pounds of lime to the acre and sow some quick-growing green crop, such as rape, buckwheat, cowpeas or soy beans, singly or in combination.

Much of the heavy infestation of intestinal parasites is in all probability due to the very intensive use of our poultry yards, which is coming to be the general practice in the East today. We must spread our birds out more, place our houses farther apart, run our birds in smaller units, give them more and cleaner land to run upon.

## Keeps Lice From Pigs.

Bury one-half of an old wagon tire in the ground. Wind a piece of rope about the other half, and then soak the rope thoroughly with old oil taken from the crank case of the car. This will give you a big oiler which will keep the lice thoroughly cleaned from the little pigs as well as from the larger hogs.—R. W.

## Home Education

"The Child's First School is the Family"—Froebel.

### The Business of Being a Child—"Red-Strapped Overalls."

BY JOSEPHINE WEYMAN.

A man who, by the general world, is accounted a successful man, once said to me: "I never had a chance to play." That statement was, in some way, the most appealing, the most pathetic remark that this man ever made in my hearing. Successful as he is in the business world, this man misses (and the pity of it!) knows that he misses) some of the joys of manhood, some of the joys of friendly co-operation, which sometimes taste the sugaring icing of the cake; for him, life is merely bread-stuff, substantial but rather tasteless. He misses the thrill of the unexpected nuts and raisins in the cake, the hearty slap on the shoulder, the easy joy of living which is the heritage of those who learned to play when they were children. Now that he is grown up, this man is too "grown-up" for a long, long time, and I am afraid now that he will never know the utter joy and relaxation to be found in playing.

But he knows—the man who "never had a chance to play"—he knows that the spirit of friendly co-operation, and something infinitely precious for I heard him say not long ago in speaking of his infant son:

"That kid is going to have a pair of red-strapped overalls, and I'm going to send him out every morning to get his hands dirty! If he doesn't find a mud-puddle or a sand-pile inside of five minutes I won't think him worth much!"

What an extraordinary remark, some people might think! Indeed! sending a child deliberately out to get his hands all dirtied up!

But the man's wife turned to me and said:

"You know my husband always said that when he was a child they kept him too dressed up to play; Lord Fauntleroy suits, and Buster Brown collars!"

The explanation was not necessary for me, for I had never forgotten that previous remark of his, "I never had a chance to play," and to me this man's sand pile and mud-puddle were

## Elevator Screenings Excellent for Sheep Food

Frequently, a long-heralded boom is not recognized when finally it makes an unexpected appearance. For years, those directing the affairs of Fort William has stressed the value of the city's location from an industrial viewpoint without realizing to the full one advantage peculiar to the head of the lakes.

The potential food value of elevator screenings, which are one of the by-products of the local terminals, has been common knowledge to those in the grain business, and many efforts have been made to convert these screenings into prepared stock food with the addition of molasses and other constituents. A method still more economical has successfully been proven during the last twelve months. Livestock have been shipped here under stop-off privileges, fatten on local food-stuffs and then rebelled to the Eastern markets for sale, with extremely gratifying results to the operator.

APPLIES TO CATTLE, TOO.

M. R. Mayes has introduced Western cattle into the district this year and has leased what is known as the "Parker dairy farm" for the present season, feeding there some 400 head of cattle. These cattle were fed over the winter to be shipped in a finished condition to the Toronto Exchange for sale. Mr. Mayes has studied the situation, and is so certain of the value of his ideas that he is in the market for permanent quarters.

The most widely advertised stock-feeding proposition has been that of R. C. Harvey's sheep, now in the second year of operation.

Mr. Harvey is an Alberta sheep rancher of considerable magnitude, handling three ranches with a combined acreage of seventy thousand. A little over a year ago, he brought to Fort William six thousand sheep from his ranches and kept them over winter in the grounds of the Algoma Agricultural Association. There the sheep were fed upon a diet consisting of a screenings mixture with a certain allowance of hay. After being fed for the winter months on this concentrated ration, the animals, which now showed a profitable increase, were

reloaded for Eastern markets. About half the output was sold in Toronto and the remainder were exported to Buffalo, Boston and New York, where they were snapped up by eager buyers.

MOVES TO BETTER QUARTERS.

This project received a great deal of publicity, and the local fair grounds with their slowly-moving masses of thousands of sheep was a centre of great attraction. In the meantime, Mr. Harvey has secured more permanent quarters of a larger nature on the "J. I. Case" property, adjoining the westerly limits of the city and in close proximity to a number of the larger producers of elevator screenings. This year's operations will be enlarged to ten thousand head.

The major portions of these blocks present to the public an interesting phase of R. C. Harvey's activities. After many years' experience in the raising of Western sheep, Mr. Harvey commenced the development of a distinct type of sheep suitable for prairie range conditions and also possessing superior wool and mutton qualities.

NEW TYPE OF SHEEP.

With a beginning some seven or eight years ago by crossing the Romney-March with the Rambouillet, he has produced what is known as the "Romnellet." It is understood that this breed has sufficiently developed as a distinct type to be shortly admitted to Canadian registry, as Mr. Harvey has produced a splendid type of animal with fixed characteristics by careful selective breeding. This will be a distinct advantage to local and Western ranchers. On account of the high quality of the mutton from the Romnellet sheep, it has commanded a premium of a cent a pound, which is indicative of its merit. These sheep have a medium staple wool which is of a quality to place the raiser in a fortunate position.

Mr. Harvey has secured a premium over the open market of as much as twenty cents a pound for his wool. Some idea as to the possibilities of the industry may be gleaned when it is known that Mr. Harvey's annual wool-clip alone totals one hundred and twenty thousand pounds.

## Useful Items.

When calves scour cut down the amount of milk one-half and give one ounce of castor-oil in milk. Follow this treatment with one tablespoonful of formalin solution, made by adding one ounce of formalin to fifteen and a half ounces of water, in each pint of milk fed. For mild cases of scours a teaspoonful of dried blood in the milk at each meal is all that is necessary.

Broodiness is an instinct which causes a hen to remain on the nest for the purpose of hatching eggs. By remaining on the nest, the lack of exercise, the loss of appetite, etc., cause the hen to re-absorb the eggs which are in the process of development, and use them as food. A broody hen not incubating eggs is a clear loss. The quicker the hen is broken from broodiness, the more feed she will eat, and the quicker she will begin laying eggs again.

Free range will not aid much in the development of chicks these warm days if the youngsters are confined to the colony houses in the morning and released only when the sun is high enough to drive them to the shade. Free range from daybreak to noon is worth more than all the rest of the day, in the feed and exercise afforded.

The green food available on the range during hot weather is apt to be dry and tough, so it will be a treat to give the fowls some tender lettuce or greens from the garden. It will be a greater treat if chopped or shredded and fed at noon, when the fowls are resting in the shade.

Doctored heaves: Mix in each feed of dampened crushed or whole oats and bran, one teaspoonful of a mixture of equal quantities by weight of chloride of ammonia and powdered stramonium leaves. This you can buy at a drug-store. In winter, feed oat straw and corn-stover, moistened with lime-water; in summer, let the mare live on grass. Carrots may be fed and are a good feed for "heavy" horses. Keep rock salt where the horses can help themselves. Keep the bowels active. Do not work immediately after a meal, and do not feed bulky roughage at noon when the beast has to work hard.

## Resetting Bolts in Concrete.

It probably has been necessary, at some time in the experience of every farmer, to reset bolts in concrete floors to fasten down a small mill, cream separator or gas engine. There are, of course, several ways in which this can be done, but the one which I have found most satisfactory in every respect is by melting ordinary sulphur, as it is bought at the drug store, in a small pan over a slow flame and pouring it around the bolt as it sets in its proper place in the hole in the concrete. As sulphur cools into a solid crystal almost instantly, it is necessary to have the bolt exactly in its proper place.

The advantages of using sulphur over lead, which is most commonly used, is that it is cheaper; the hole in the concrete need be only large enough to accommodate the head of the bolt, whereas the hole for the bolt when lead is used had best be conical in shape—that is, the bottom of the hole larger than the top. Sulphur in hardening does not shrink, lead does; and to offset its list of merits, a little water in the hole when sulphur is used makes no material difference.—H. D.

## A Silo for Chickens.

A supply of green feed for laying hens in winter is sometimes hard to get; but if winter eggs are to be expected, there must be a green ration fed along with other feeds.

For a number of years I gathered green material during the summer months, and dried it for winter use. This plan was very successful, but last winter I tried a different plan—a poultry silo in which I kept my green ration in its natural state. Old barrels were used for the silos.

First, I make an opening about four inches above the base of the barrel, to cut at the silage. The opening is then fitted with a flap that fits snugly, and can be closed after each feeding. A hole is then bored in the bottom of the barrel to drain off excess fluid. The silo is then ready for filling.

I used green feed of all descriptions, such as clover, grass from the lawn, beet-tops, cabbage leaves—in fact, almost anything that a chicken would eat. After the barrel was filled, a lid that could be removed readily was made to fit snugly on top and within the barrel. A weight was then placed on the cover to pack down the contents.

As the feed is taken out from below, the contents of the barrel will be pushed downward. It is not necessary that the barrel be filled all at one time. It can be partly filled, and more green stuff added as opportunity offers. A barrel of this feed will furnish enough green stuff for thirty or forty hens during the winter.

## Cover Drilled Grains.

In drilling corn or beans with a grain drill tie a horse-shoe at one end of a piece of rope and fasten the other so the shoe will follow in the drill mark.

Says the smart young man to the simple-minded girl: "Why does a black cow eat green grass and give white milk that makes yellow butter?" Says the simple-minded girl to the smart young man: "For the same reason that black raspberries are red when they are green."

## THE CHILDREN'S HOUR

### THE ELF AND THE DORMOUSE.

Under a toadstool crept a wee Elf, Out of the rain to shelter himself. Under a toadstool, sound asleep, Sat a big Dormouse all in a heap. Trembled the wee Elf, frightened and Fearing to fly away lest he get wet. To the next shelter—maybe a mile! Sudden the wee Elf smiled a wee smile. Tugged till the toadstool toppled in two, Holding it over him, gaily he flew. Soon he was safe home, dry as could be. Soon woke the Dormouse—"Good gracious me! 'Where is my toadstool?' loud he lamented, —And that's how umbrellas first were invented.

### BABIES.

Did you ever stop to think how many different kinds of babies there are in the world? There are human babies, first, of course, but babyhood does not stop there. There are baby birds, and baby kittens, and puppies, and chickens, ducks, calves, colts—oh, so many different kinds. And the funny part of it is, that they all act much the same. They whimper when they are cold, yell when they are hungry, sleep when they are comfy. They are fed and washed and scolded and caressed by their mothers; yes, and fought for. There is no animal so ferocious as a mother defending her young, and they will attack fearlessly a creature many times their size.

A friend told us of watching a mother mouse running along a beam in their summer cottage and carrying a baby mouse in her mouth. Our friend caught her, and took the baby from her, whereupon the wee mother glared viciously at her, a desperate expression in her beady eyes. Then the lady gently restored the baby to her, and let her go. She seized it with a wild grab, and darted along the beam to safety.

When the dark curtain of night drops down on the world, and the Sandman goes on his rounds, and the stars come out, did you ever stop to think of all the babies, in cribs, and nests and tables, and hollow trees, even jungle caves, where the savage beasts cuddle their cubs,—all the babies snuggled close to their mother's warm breasts, mothers that sleep with senses alert to the slightest sound, the light mother-sleep, always on guard.

So we must be very careful not to hurt the feelings of any creature that is a mother, for mothers are mothers, whether furred, feathered, or human, and they grieve over their lost babies, unless one is left to comfort. Never take even one baby bird from a nest, for birds are very lovely, useful things, and eat the insects that destroy the plants.

If we jump at conclusions, we are pretty apt to go sneaking back to the starting point.

## To Make Paint Stick on Galvanized Iron.

We used to think galvanized iron would not hold paint, due to the imperfect attempts of painting a shed constructed of corrugated galvanized iron. Within a few months after painting, the paint would peel and blister. A local builder of garages, however, says galvanized iron will hold paint, and has a large number of garages painted as proof. His method is to apply vinegar, covering the entire surface with a brush. This is left three days after application, before applying the paint. Paint of any color will stick to the metal after this treatment. Try this method and you will be greatly pleased.

Keep the bird bath filled. In many localities where there are no creeks or streams birds frequently suffer on account of lack of drinking and bathing facilities. Study the calls and cries of the young birds and make a note of when out songsters conclude their season of song.

## Here Is The Pump You Need SMART'S TANDEM DOUBLE ACTING PUMP

Dumps more easily, more gently and more efficiently than the Wing type model which it has definitely replaced. Repairs easily made with household tools. Can be drained to prevent freezing. Easily primed.

ASK ABOUT IT AT YOUR HARDWARE STORE. JAMES SMART PLANT BROOKVILLE, ONT.

## All About Horses

Get this book! You cannot afford to be without it. It costs you nothing if you know it, but it has a hundred dollars' worth of information in it. It tells you how to select a horse, how to train him, how to shoe him, how to feed him, how to care for him, and how to sell him. It is a complete guide to the horse, and is a must for every horse owner. It is a book that will save you a great deal of money and a great deal of trouble. It is a book that will make you a better horse owner. It is a book that will make you a better horseman. It is a book that will make you a better horse lover. It is a book that will make you a better horse friend. It is a book that will make you a better horse neighbor. It is a book that will make you a better horse citizen. It is a book that will make you a better horse man. It is a book that will make you a better horse boy. It is a book that will make you a better horse girl. It is a book that will make you a better horse child. It is a book that will make you a better horse parent. It is a book that will make you a better horse grandparent. It is a book that will make you a better horse great-grandparent. It is a book that will make you a better horse ancestor. It is a book that will make you a better horse descendant. ### NEWBURY

Miss Jean McRae, of Windsor has been visiting Miss Mamie Pennell. Miss Donna Stephenson, of Walkerville, is visiting her aunt, Miss Gay. Miss Anna Foster, of Detroit, is visiting at her grandfather's, James Patterson's. Miss Belle Gray, of Detroit, is spending two weeks with her mother. Allan Bayne spent the week-end at his home here.

Mrs. Will Woods and children arrived home from Welland on Monday, accompanied by her sister Mae and brother, Gordon Little. Miss Margaret McRae and mother motored from Windsor on Sunday and are guests of Mrs. H. D. McNaughton. Mrs. J. J. Whittaker, of Windsor, spent a few days with her sister, Mrs. L. Gay.

On Sunday afternoon Rev. C. D. Farquharson preached his farewell sermon as pastor of Knox church. The church was filled, many from a distance attending. On Monday evening the congregation met in the basement for a social time with the departing pastor and his wife, when Mr. Farquharson was presented with a purse of money. The Mission Band, of which Mrs. Farquharson was the organizer, presented her with a cut glass flower basket and a centerpiece of India crochets. Refreshments were served.

Homemade baking sale by Anglican Guild on Saturday afternoon, July 28, at Mrs. Margaret Crim's.

On Sunday a Children's Day service was held in Christ church. J. A. Armstrong, of Strathroy, assisted Rev. E. J. Murphy. The music by the children's choir was quite pleasing.

Richard Perkes, of Glencoe, spent Sunday with R. Adair Bayne. Miss Carrie Fletcher has returned home from Thedford and Grand Bend, where she had a pleasant visit.

Our baseball team went to Inwood Saturday afternoon and had a splendid game, winning with a score of 11-1. It was a friendly game, with a good supper served afterwards. The boys are arranging for a game to be played here Saturday with the Globe Casket Co., of London.

Dr. J. A. Patterson, son of J. Patterson, of Walkers, with his wife and baby called on Monday to say goodbye to his grandfather. They are leaving this week to reside in Los Angeles, Cal.

Mrs. Gowling and daughter, of Detroit, visited her sister, Mrs. Peter Hillman, last week. J. A. Armstrong, of Strathroy, is visiting in town. Mr. Jamieson is relieving manager at the Bank of Montreal owing to illness of R. E. Winters. Calvin Burr and wife, of Detroit, spent the week-end with his brother Thomas.

Fred Connelly returned to Toronto on Sunday. His sister, Annie E., and Miss B. Kake, of Detroit, accompanied him. The Newbury-Moss Women's Institute held their usual monthly meeting at the home of Mrs. Matt. Armstrong

on Thursday, July 19, when Mrs. Armstrong was elected president for the year. A pleasing ceremony was performed by Miss Ida Haggitt, the occasion being the presentation of a parting gift from the ladies of the institute to Mrs. (Rev.) Farquharson. The gift took the form of a beautiful biscuit bowl which Miss Haggitt presented with admirable grace, together with an eloquent address expressing the institute ladies' appreciation of Mrs. Farquharson's labors on behalf of the W. I., to which the recipient suitably replied. A pleasing program of instrumental music was given by Miss Alberta Armstrong, after which a dainty lunch was served by the hostess, who was given a hearty vote of thanks for the enjoyable time which had been provided.

**Rub it in for Lame Back**—A brisk rubbing with Dr. Thomas' Eucalyptic Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

### WARDSVILLE

Mrs. Blott is visiting friends in Hamilton.

Mr. and Mrs. C. Willis and family spent Sunday in Cairo.

Dr. Clare, of Toronto, spent the week-end with his family here. Rev. and Mrs. Bridgette and children left Thursday for a month's visit at Courtright.

Isabel and George McCracken, of London, are visiting relatives here. Mabel Sarna, of Florence, spent a few days last week with Mary McIntyre.

Mr. and Mrs. Anders and children, of Ypsilanti, are visiting Mr. and Mrs. Chas. Mimna.

Miss Hilda Blott is spending a week at her home here.

Joe Guest spent Sunday in London. Mr. and Mrs. J. H. McIntyre spent Sunday in Florence.

Mrs. McRae spent Saturday in Detroit.

Ted Taggie, of London, spent a few days with relatives here last week. Mrs. Schweitzer and children are visiting Mr. and Mrs. Geo. Cornelle.

Mrs. Evans, of Gull Lake, Sask., visited her sister, Mrs. J. McIntyre, last week.

The high school girls are busy thinning the fruit on the apple trees on the fruit farm of C. B. Sheppard, getting 20 cents per hour.

### PRATT'S SIDING

The regular monthly meeting of the Book Club was held on Thursday afternoon July 5, at the home of Mrs. Thos. Stinson, with an attendance of 19 members and 9 visitors. After the business part of the meeting, a short program was given, consisting of readings by Miss Jessie Currie, Mrs. Lorne Goff and Mrs. E. F. Roycraft, and an instrumental by Miss Brown.

Roll call was answered by giving a recipe. Collection, \$2.90. Dainty refreshments were served by the hostess and her assistants, and a hearty vote of thanks was tendered her for her kind hospitality. Miss Lottie Craig will entertain the ladies at her home on Wednesday, Aug. 8. Mrs. Thos. Gardner, Mrs. M. Macaulay and Mrs. Rich. Roycraft have charge of the program, the roll call to be answered by a Scripture verse.

### MELBOURNE

The Ladies' Aid of the Methodist church held a most successful garden party on the parsonage lawn. Rev. W. W. Shoop occupied the chair, and Rev. G. W. Oliver, pastor of the Presbyterian church, gave a splendid address. Miss Florence Deeg gave several readings and Dr. McDonald, of Appin, sang a solo, which were much appreciated by all. The Wright brothers, of Strathroy, were present and gave the greater part of the program. Proceeds, \$130.

Baseball is the topic of the day here at the present time. Two most interesting games have just been played, Melbourne vs. Delaware—the score being 7-13 in favor of Melbourne. The soft ball team which has just been organized played the Ekfrid team here, the result being 28-31 in favor of the home team. The Melbourne line-up:—Misses McNabb, Perry, McGugan, Carruthers, Fletcher, Laing, McGugan, McNabb and Seabourne.

Neil Campbell, who was taken suddenly ill a few days ago, is not showing much improvement. Miss Jennie Campbell is ill. Mrs. Robinson is slowly improving in health.

Mrs. McDonald, of Strathroy, is the guest of Mrs. Showers. The Ladies' Aid of the Presbyterian church held a cooking sale on Saturday.

Misses Esther and Carrie McLean, of Ekfrid, are visiting friends here. Lower school examinations, Melbourne continuation school, June, 1923:—Complete lower school standing—L. Beattie, R. Brown, J. Coombs, M. Huston, D. McIntyre, S. Long, M. Walker. Complete first year standing—K. Bamford, M. Campbell, H. Howe, C. Long, O. Marshman, A. McGugan, J. McIntyre, H. McRoberts, D. Murray, V. Nagle, D. Rae, M. Stevenson, G. Stevenson. Other students writing will complete their standing by writing on subjects as follows:—M. Bateman, history; K. Campbell, arithmetic; M. Johnston, arithmetic and Latin; B. Laing, arithmetic; J. Tanner, history; B. Warren, history, geography, arithmetic and Latin; E. Cornelle, history and geography; R. Lewis, history and art; W. Lockwood, history; F. McDonnell, history and botany; A. McDougall, history, art and botany.

### SHETLAND

The Treasure Seekers class of the Shetland Sunday School held a picnic on Friday at Government Park. All report a good time.

Mrs. Fred Jeffery returned home from Detroit on Saturday. Miss Verda Badgley entertained a number of friends from Harrow on Sunday.

Miss Mildred Bolton is holidaying at her home. Wm. Siddall spent Sunday with his parents at Strathburn.

Morley Laing, of Detroit, is visiting at Fred Jeffery's.

Miss Davies, of London, has returned home after spending her vacation with Miss Stella Johnston.

Jack Archer and M. McReady, of Newbury, spent Sunday at the former's home.

Miss Thelma Hessaal, of London, has returned home after visiting her friend, Miss Grace Bolton.

Sorry to hear that Mrs. Dixon is not improving in health very rapidly. Miss Laura Collier, of Melbourne, has been visiting her uncle, Fred Jeffery.

### SOUTH EKFRID

Mr. and Mrs. Philip Coad and family and Mrs. John L. Tait spent Sunday in London.

Mr. and Mrs. Will George, Dan K. McRae, Gilbert Duncan and Mary Belle Duncan spent a day last week at Port Stanley.

Misses Annabel and Mattie McRae, Ross McAlpine and Clarence Urgan have returned from a motor trip to Grimsby.

T. J. McDonnell spent a few days last week in Windsor.

Mrs. Nell McEachern, of Crinan, is visiting her sister, Mrs. D. A. Dobie.

Miss Annalena Lethbridge is spending her vacation at her home here. Glad to know that Mrs. Jas. Trestain, who underwent a serious operation in St. Joseph's Hospital, London, is doing nicely.

A meeting of the Tait's Corners U. F. W. O. was held at the home of the president, Mrs. John L. Tait, on July 19. On account of illness in the community the attendance was smaller than usual. After the business part of the meeting a short program was given, including instrumental selections by Miss Arnold and a paper entitled "What our organization stands for" by Mrs. James McRae. The next meeting will take the form of a picnic at Tyronnell the last Wednesday in August. After the close of the meeting lunch was served by the hostess. Collection, \$2.25.

### STRATHBURN

The last meeting of the Battle Hill U.F.W.O. club was held at the home of Mrs. D. Snyder on July 4th. A pleasant afternoon was spent in music and games, after which the hostess served lunch. The next meeting will be held on August 1st at the home of Mrs. James Gilbert.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

### APPIN

The Women's Institute have erected a permanent booth in the park, which will make quite an addition, besides being convenient for the big garden party on August 1st.

Henry Chisholm was taken to the hospital last week for an operation. We are glad to hear he is doing well. Earle Webster has been under the doctor's care for three weeks but is now improving in health.

Evan McMaster was home from Detroit for the week-end. Appin was well represented at the annual walk and celebration held this year at Chatham on the "Glorious Twelfth."

Allan Campbell had the misfortune to be severely burned when a kerosene can, with which he was feeding a brush fire in Dan Galbraith's woods, exploded.

The Y. P. S. will hold their next regular meeting in the Presbyterian church next Sunday evening at eight o'clock.

Mrs. Orville Hathaway has returned home after attending her daughter, Mrs. Gordon Harris, of Sarnia, bringing Mrs. Harris with her.

The Appin nine defeated Mount Brydges here Monday evening by a score of 10-12, in a closely contested game of ball. The attendance was large, showing the interest in the game. The next game will be played with Delaware.

Mr. and Mrs. George Howe and two children and Mr. and Mrs. Henry Howe and daughter, of Port Stanley, motored here on Sunday and are spending a few days with relatives.

Miss Zelta McMaster, of London, is spending three weeks' holidays at the home of her parents, Mr. and Mrs. John McMaster.

Earl Campbell, of Komoka, is spending his holidays with relatives here.

Lou Ramey and Fred Perry, of Stratford, spent Sunday at their homes here.

Lawn tennis and soft ball games are the order of the day at the park. Mrs. Grinner and Mrs. M. Rabel, of Detroit, are the guests of their sister, Mrs. Dep. Laughton.

Donald McMaster is holidaying in St. Thomas.

The Five Hundred club motored to Port Stanley last Wednesday and had a picnic. A pleasant time was spent in games.

### NORTH EKFRID

Mrs. McDaniel and family, of London, are the guests of Mr. and Mrs. Orey Ramey.

## Reflecting the Spirit of the Great Out-of-Doors

## Your Home Town

What causes the Scotsmen's eye to kindle when he hears the accent of a brither exile? It's the home-town feeling.

The voice tells its own story. It carries him back home. All the longings, be they for the purple hills, the green fields or the murky streets of a city, are quickened. The sympathy between speaker and listener becomes complete.

Remember, when your thoughts drift back to your home town and its people, that many old friends who would like to hear your voice are listed in the telephone directories.

Long Distance will take you back. Station-to-Station evening and night rates make it inexpensive.

Every Bell Telephone is a Long Distance Station
