

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers /
Couverture de couleur
- Covers damaged /
Couverture endommagée
- Covers restored and/or laminated /
Couverture restaurée et/ou pelliculée
- Cover title missing /
Le titre de couverture manque
- Coloured maps /
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) /
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations /
Planches et/ou illustrations en couleur
- Bound with other material /
Relié avec d'autres documents
- Only edition available /
Seule édition disponible
- Tight binding may cause shadows or distortion
along interior margin / La reliure serrée peut
causer de l'ombre ou de la distorsion le long de la
marge intérieure.
- Blank leaves added during restorations may
appear within the text. Whenever possible, these
have been omitted from filming / Il se peut que
certaines pages blanches ajoutées lors d'une
restauration apparaissent dans le texte, mais,
lorsque cela était possible, ces pages n'ont pas
été filmées.
- Additional comments /
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated /
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- Pages detached / pages détachées
- Showthrough / Transarence
- Quality of print varies /
Qualité inégale de l'impression
- Includes supplementary materials
Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips,
tissues, etc., have been refilmed to ensure the
best possible image / Les pages totalement ou
partiellement obscurcies par un feuillet d'errata,
une pelure, etc., ont été filmées à nouveau de
façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or
discolourations are filmed twice to ensure the best
possible image / Les pages s'opposant ayant des
colorations variables ou des décolorations sont
filmées deux fois afin d'obtenir la meilleure image
possible.

In Sessional papers No. 9, pages 112a-112k in Part II Statistical report 1866 are inserted between pages 112 & 113.

Includes some text in French.

Sessional papers Nos. 10, 15, 17 & part of 18 not printed.

In Sessional papers No. 12 Returns from the several chartered banks page 203 is incorrectly numbered page 303.

- No. 103... **BLACK RIVER:**—Statement shewing the amount paid by the Government of the old Province of Canada, and by the Government of the Dominion, if any, since the 1st July, 1866, for works connected with the descent of timber on Black River, in the County of Pontiac, in the Province of Quebec, &c. [*Not printed.*]
- No. 104... **TRINITY HOUSE, QUEBEC:**—Copy of the answer made to the Report of the Trinity House of Quebec, which was asked by an Address of this House, on the 6th instant, and of the documents accompanying said answer. [*Not printed.*]
- No. 105... **CANSO, STRAIT OF:**—Return of all Petitions and Correspondence, from any parties in the Province of Nova Scotia, including the Report of A. Woodgate, Esq., late Postmaster General, to the Government of the Dominion of Canada, relative to the carrying of Her Majesty's Mails across the Strait of Canso, in that Province. [*Not printed.*]

ANNUAL REPORT

OF THE

NORMAL, MODEL, GRAMMAR

AND

COMMON SCHOOLS

IN UPPER CANADA,

FOR THE YEAR 1866,

WITH APPENDICES

BY THE CHIEF SUPERINTENDENT OF EDUCATION.

Printed by order of the Legislature.

Ottawa :

DEPARTMENT OF PUBLIC INSTRUCTION FOR UPPER CANADA.

EDUCATION OFFICE,

TORONTO, 30th June, 1867.

SIR,—I have the honour to transmit herewith, to be laid before His Excellency the Governor General, my Report of the Normal, Model, Grammar and Common Schools of Upper Canada during the year 1866, including a Statistical Statement of other Educational Institutions, as far as I have been able to obtain information respecting them. To my Report I have added an Appendix, which contains copious extracts from local reports, and various documents and papers illustrative of the means which have been employed to promote the improvement and extension of the Grammar and Common Schools throughout Upper Canada.

I have the honour to be, Sir,

Your obedient servant,

(Signed,) E. RYERSON.

To the Honourable WILLIAM McDougall, M.P.P.,

Secretary of the Province,

Ottawa.

E R R A T A .

On page 31, line 9, for " were beginners," read " mere beginners."

" 31, line 34, for " up another " read " up another page."

" 36, 6th line, for " 5 to 12" read " 3 to 5."

" 37, line 23, for " pasture of the boys " read " pastures of the boys."

GENERAL REPORT.

1866.

ANNUAL REPORT

OF THE

Normal, Model, Grammar and Common Schools

OF UPPER CANADA,

FOR THE YEAR 1866.

PART 1.—GENERAL REPORT.

To His Excellency the Right Honourable Viscount MONCK, Governor General, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY :

In presenting my Report on the condition of the Normal, Model, Grammar, and Common Schools of Upper Canada, for the year 1866, I am happy to be able to remark, that there has been a large increase on any preceding year, in both the receipts and expenditures of school moneys, the attendance of pupils, and the time of keeping open the schools.

THE COMMON SCHOOLS.

I. TABLE A.—RECEIPTS AND EXPENDITURES OF COMMON SCHOOL MONEYS.

Receipts.

1. The amount apportioned from the Legislative Grant for the salaries of teachers in 1866, was \$169,490—increase, \$3,518.

2. The amount apportioned and paid from the Legislative Grant for the purchase of maps, apparatus, prize books, and libraries, was \$14,016—increase, \$3,974.

3. The Legislative Grant is apportioned and paid to each Municipality, upon the condition that such Municipality provide, at least, an equal sum by local assessment; but such Municipality is empowered to provide as large an additional sum as it may think proper, for the education of the youth within its jurisdiction. The amount provided by Municipal assessment was \$319,154—increase, \$11,061; and by voluntary act, in excess of the Legislative Grant, \$149,864.

4. *Trustees' Rates on Property.*—Each Township is divided, by the Municipal Council, into School Sections of from two to four miles square each. Three Trustees are elected by the rate-payers of each School Section.

The Trustees hold office for three years—one going out of office, and his successor elected annually. The Trustees of each School Section have the same discretionary powers as each Township or County Council, to provide, by rate on property, for school purposes. The amount thus provided by Trustees, by rate on property, for 1866, was the large sum of \$760,366 (in addition to the Municipal assessment of \$319,154)—increase, \$49,169. The increase of the preceding year, under the same head, was, \$51,816. The increase of the two years under this head was, therefore, \$100,985.

5. *Trustees' Rate-bills on Pupils.*—Whether a school shall be wholly supported by

rate on property, and therefore *free* to residents from 5 to 21 years of age without *fee* from any pupil, or whether the school shall be partly supported by fees or rate-bills, is determined by the rate-payers at the annual meeting, or at a special meeting called for that purpose.

In cities, towns, and incorporated villages, the elected Board of Trustees determines whether the schools shall be free or not. In no case can a rate-bill be imposed exceeding twenty-five cents per month for each pupil, and may be as much less as the rate-payers or Boards of Trustees decide.

The amount of rate-bills collected from pupils in 1866, was, \$53,482—being a decrease of \$7,214—showing an increase of the Free School system.

6. The amount received from the Clergy Reserve Fund and other sources, was, \$102,339—increase, \$12,208. The Clergy Reserve Fund is at the discretionary disposal of the Municipalities; and many of them have nobly applied it to school purposes.

7. The amount available from balances of 1865 (moneys not paid at the end of the year), \$189,121—decrease, \$9,748.

8. Total amount of moneys provided for Common School purposes for 1866, was, \$1,607,971—being an increase of \$62,970—the largest increase, by \$2,157, of any one year since the establishment of the School System.

Expenditures.

1. For salaries of teachers, \$1,066,880—being an increase of \$25,827.
2. For maps, apparatus, prizes and libraries, \$29,752—increase, \$7,181.
3. For sites and building school-houses, \$111,371—decrease, \$16,300.
4. For rents and repairs of school-houses, 41,789—increase, \$251.
5. For school-books, stationery, and other expenses, \$137,439—increase, \$14,390.
6. Total expenditures for all Common School purposes, \$1,387,233—increase, \$31,353.
7. Balance of school moneys not expended at the end of the year, \$220,738—
increase, \$31,616.

II. TABLE B.—SCHOOL POPULATION, PUPILS ATTENDING COMMON SCHOOLS, DIFFERENT BRANCHES OF INSTRUCTION.

An old statute still requires the returns of school population to include children between the ages of 5 and 16 years; but the school law confers the equal right of attending the schools upon all persons between 5 and 21 years of age.

1. *School Population* (including only children between the ages of 5 and 16), was, 431,812—increase, 5,055.

2. *The number of pupils between 5 and 16 years of age attending the schools* was, 369,768—increase, 8,151.

The number of pupils of other ages was, 21,127—decrease, 908. The whole number attending the schools was, 390,895—increase, 7,243.

3. The number of *boys* attending the schools, 208,589—increase, 4,269. The number of *girls* attending the school was, 182,306—increase, 2,974. The number of *indigent* pupils reported, was, 3,932—decrease, 477.

4. The table is referred to for the reported periods of attendance of pupils, and the number in each of the several branches taught in the schools—showing a gratifying increase in most of the higher branches.

5. The number of children reported as not attending any school whatever, was, 40,336—a decrease of 1,805; yet a matter of deep regret and solicitude to every friend of the country, and which demands increased exertion on the part of every christian patriot.

III. TABLE C.—RELIGIOUS DENOMINATIONS, CERTIFICATES, ANNUAL SALARIES OF TEACHERS.

1. *Number of Teachers, Male and Female.*—In the 4,379 schools reported, there were 4,789 teachers employed,—increase, 68; of whom 2,925 were *male* teachers,—increase, 5; and 1,864 were *female* teachers,—increase, 73. This indicates a general increase in absolute and relative number of female teachers of Common Schools—a pro-

gression in the right direction, as I entirely agree in the general opinion of educationists that female teachers are best adapted to teach small children, having, as a general rule, most heart, most tender feelings, most assiduity, and, in the order of Providence, the qualities best adapted for the care, instruction and government of infancy and childhood. About eighth-tenths of the teachers employed in the Common Schools of the neighbouring States are female teachers; and many Superintendents there argue in favour of employing female teachers altogether in the Common Schools, and even in higher public schools. In England, the relative proportion of female to male teachers is rapidly increasing. But care should be taken that the female teachers employed should be, at least, as well *qualified* as corresponding male teachers. Then, with equal service rendered, equal remuneration would be equitable.

2. *Religious Persuasions of Teachers.*—But little change is observable in the relative proportion of the several religious persuasions of teachers. The teachers are reported to be of the following religious persuasions: Church of England, 844—increase, 16; Church of Rome, 529—decrease, 5; Presbyterians, 1,486—increase, 70; Methodists, 1,339—increase, 31; Baptists, 272—increase, 1; Congregationalists, 87—increase, 10; Lutheran, 17—decrease, 2; Quakers, 18—decrease, 7; Christians and Disciples, 49—increase, 5; reported as Protestants, 81—decrease, 9; Unitarian, 1—decrease, 3; other persuasions, 37—decrease, 3; not reported, 29—decrease, 36.

3. *Certificates.*—Total number holding certificates, 4,662—increase, 87; Normal School Teachers, 1st class, 242; increase, 29; 2nd class, 375—increase 24; Teachers holding County Board Certificates, 1st class, 1,638—increase, 155; 2nd class, 1,987—decrease, 53; 3rd class, 420—decrease, 68. It is to be hoped that this third class of certificates will soon disappear, or the standard be raised to be equal to the present second class certificates. Certificates not classified, 125—decrease, 20; certificates annulled, 22—increase, 8; number who have attended the Normal School without obtaining certificates, 98—increase 10.

4. Number of schools in which the teachers were changed during the year, 769—decrease, 17. There was an increase of 97 in the number of teachers changed in 1865; but a decrease of 17 in 1866—an improvement.

5. The number of schools having more than one teacher was 208—decrease, 40.

6. *Annual Salaries of Teachers.*—The highest salary paid a teacher in a county was \$600; the lowest, \$93: the highest salary in a city, \$1,350; the lowest, \$100: the highest in a town, \$800; the lowest, \$162: the highest in an incorporated village, \$900; the lowest, \$260. The average salaries of male teachers in counties, without board, was \$253; of female teachers, \$189: in cities, of male teachers, \$529; of female teachers, \$247: in towns, of male teachers, \$460; of female teachers, 241: in incorporated villages, of male teachers, \$409; of female teachers, \$192. In some instances, a slight advance on the average of the preceding year, of \$8 for male teachers and \$3 for female teachers.

IV. TABLE D.—SCHOOL SECTIONS, SCHOOLS, SCHOOL-HOUSES, SCHOOL VISITS, SCHOOL LECTURES, SCHOOL EXAMINATIONS AND RECITATIONS, TIME OF KEEPING OPEN THE SCHOOLS, SCHOOL PRIZES AND MERIT CARDS.

1. The whole number of School Sections reported for 1866 was 4,457—increase, 72. The whole number of schools reported was 4,379—increase 76. Number of schools closed or not reported, 78—decrease, 4.

2. The number of *free* schools reported was 3,741—increase, 146. The number of schools partly free, or with a rate-bill of 25 cents per month, or less, was 638—decrease, 70. Whether the school shall be entirely free, or partly supported by a rate-bill of not more than 25 cents per month, or less, is left to the annual decision of the rate-payers at their annual meeting in each school section. In cities, towns, and incorporated villages, the decision is with the Boards of Trustees, and with the rate-payers in the election of such Boards. Thus, out of 4,379 schools reported, all except 638 are entirely free—wholly supported by rate on property, with no rate-bills or fees required of pupils. Such is the result, not of any Act of Parliament, but of the discussions, trials, experience and voluntary action of the rate-payers in the several school divisions. Every person having children between the ages of 5 and 21 years has a right to send his children to school, as long as

their conduct accords with the school regulations; and every person having property is required to contribute to the support of the school according to the assessed value of his property, protected and improved in the country, whether he has children or sends children to the school or not. Education of the youth of the land being a public good, and ignorance a public evil, the property of the country is made liable for the education of the youth of the country, and the taxes for this purpose are much less than those required to defray the expenses incurred by prisons, &c., in order to punish crimes which result from ignorance and its attendant vices, besides the loss and other evils inflicted upon the community by the creation and conduct of every vicious person.

3. *School-houses.*—The whole number of school-houses reported was 4,599—increase, 60; of which 642 are brick—increase, 48; stone, 372—increase, 15; frame, 1751—increase, 32; log, 1604—decrease, 41; not reported, 30—increase, 6. The whole number of school-houses built during the year was 101; of which 34 were brick, 7 stone, 41 frame and 19 log. Estimated value of school-houses and premises, \$2,097,922.

4. *School Visits.*—By Local Superintendents, 10,783—increase, 413, and considerably more than an average of two visits to each School; by Clergymen, 7,445—decrease, 185; by Municipal Councillors, 1,830—increase, 94; by Magistrates, 2,350—decrease, 216; by Judges and Members of Parliament, 440—increase, 32; by Trustees, 19,056—decrease, 348; by other persons, 33,540—increase, 1,570. Total number of visits to the schools, 75,444—increase, 1,360.

5. *Public School Examinations.*—Their number was 7,728—increase, 19; an average of less than two for each School, though the law directs that there should be *quarterly* Examinations in each School, of which the teacher should give notice to the Trustees, Parents, and Pupils, and to the School Visitors resident in the School Section.

6. *School Lectures.*—The number of school lectures delivered by Local Superintendents reported was 3,017—increase, 130; by other persons, 340—decrease 48. The whole number of lectures delivered was 3,357—increase, 82; not quite one for each school, though the law directs that each Local Superintendent should deliver at least one lecture during the year in each School Section under his charge. There is a gratifying increase of 130 lectures delivered by Local Superintendents; but the whole number of lectures delivered by them is less than three-fourths the number of schools.

7. *Recitations.*—The number of schools in which public recitations of prose and poetry by the pupils are practised were 2,047—increase, 166, a gratifying increase. This is a very useful exercise; it promotes the habit of accurate learning by heart, improvement in reading and speaking, and is an agreeable and often an amusing diversion. It ought to be practised in every school.

8. *Time of keeping the Schools open.*—The legal holidays and vacations include only about one month of the year—certainly too small a portion—less than what nearly every person in most pursuits in life takes for purposes of recreation, travelling and visiting. A longer vacation during hay and wheat harvest is often demanded, and would, I think, be a convenience to the greater part of the country and no detriment to the schools, as the attendance at school during that period is generally small and irregular. The average time of keeping open the schools, including holidays and vacations, was eleven months and four days—decrease, four days. The *actual average* time of teaching or keeping open the schools was, therefore, ten months—nearly three months longer than the reported average time of keeping open the schools in the States of Massachusetts and New York.

9. *School Prizes and Merit Cards.*—The number of schools in which prize books, &c., are reported as having been given for the reward and encouragement of meritorious pupils is 1,541—showing the large and gratifying increase of 220 schools, in which this stimulus to good conduct and diligence is employed by the intelligence and enterprise of Trustees and Teachers. On this subject I need but repeat my remarks of last year:—The importance of this comparatively new feature of the School System can hardly be over-estimated. A comprehensive catalogue of carefully-selected and beautiful prize books has been prepared and furnished by the Department to Trustees and Municipalities applying for them; and, besides furnishing the books at cost price, the Department adds one hundred per cent. to whatever amounts may be provided by Trustees and Municipal Councils to procure these prize books for the encouragement of children in their schools. A series of merit cards, with appropriate illustrations and mottoes, has been prepared by the

Department, and is supplied to Trustees and Teachers at a very small charge—half the cost—and these merit cards are to be awarded daily, or more generally weekly, to pupils meriting them. One class of cards is for *punctuality*; another for *good conduct*; a third for *diligence*; a fourth for *perfect recitations*. There are generally three or four prizes under each of these heads; and the pupil or pupils who get the largest number of merit cards under each head, will, at the end of the quarter or half year, be entitled to the prize books awarded. Thus an influence is exerted upon every part of a pupil's conduct, and during every day of his school career. If he cannot learn as fast as another pupil, he can be as *punctual*, as *diligent*, and maintain as *good conduct*; and to acquire distinction, and an entertaining and beautiful book, for *punctuality*, *diligence*, *good conduct*, or *perfect recitations*, or exercises, must be a just ground of satisfaction, not only to the pupil, but also to his or her parents and friends. There are two peculiarities of this system of merit cards worthy of special notice. The one is, that it does not rest upon the comparative success of single examinations at the end of the term or half year, or year, but on the daily conduct and diligence of each pupil during the whole period, and that irrespective of what may be done or not done by any other pupil. The ill-feeling by rivalryship at a single examination is avoided, and each pupil is judged and rewarded according to his merits, as exhibited in his every day school life. The second peculiarity is, that the standard of merit is founded on the *Holy Scriptures*, as the mottoes on each card are all taken from the sacred volume, and the illustrations on each card consist of a portrait of a character illustrative of the principal of the motto, and as worthy of imitation. The prize-book system, and especially in connection with that of *merit-cards*, has a most salutary influence upon the school discipline, upon both teachers and pupils, besides diffusing a large amount of entertaining and useful reading.

V. TABLE E.—TEXT-BOOKS, MAPS, APPARATUS USED IN THE SCHOOLS.

1. *General Remarks.*—The question of uniformity of text-books is now so settled by the common consent in this country, that I need not adduce the arguments and authorities of educationists in other countries, as I have done in my last and previous annual reports, to evince the importance of but one series of text-books for our Public Schools, and to show the losses and evils arising from admitting a diversity of text-books in the schools.

I may, however, remark, that as some complaints were made in regard to the National Series of Readers being "behind the times," and as a very strong and general desire has been expressed, to have an improved and strictly Canadian series of text-books for the schools, the Council of Public Instruction took steps last year to accomplish this important object; and I have every reason to believe, that it will be satisfactorily completed, before the close of the current year. I trust we shall be able to commence the year 1868 with a new and uniform series of Canadian Readers, and such a revision and improvement of the whole authorized series of text-books, as will meet the wants of the schools, and satisfy the expectations of the public, in this Province of our New Dominion. But I think one year should be allowed to use up the old and universally adopted series, which have rendered such invaluable service to our schools, before the use of the new series be rendered imperative.

We have thus far succeeded beyond any country or state, with which I am acquainted, in America or Europe, in establishing what the educationists of all countries consider to be of the utmost importance—uniformity of text-books in the Public Schools; and it now remains for us to render them as perfect in matter and method, as good in quality and as moderate in price, as possible.

2. *Readers.*—Of the 4,379 schools reported, only 54 are reported in which the National Readers are not used. The Readers used in 90 schools are not reported; and the *Irish National Readers* are reported as used in 4,235 schools. I trust the new series of Canadian Readers, in course of preparation and publication, will possess all the excellencies of the old series, without their defects, and with such modifications and additions, as the progress of the schools and the state of the country require.

3. *Spelling Books.*—There still lingers in 65 schools the use of *Mavor's Spelling Book*, and in 285 schools the use of the *Canada Spelling Book*—decrease, 82; and the

use of various spelling books in 302 schools—decrease, 90 schools; while Sullivan's (National) Spelling Book Superseded was used in 3,268—increase, 169 schools. This spelling book is as much superior to any of the other spelling books used as the number of schools in which it is used is greater. But it is proposed by the Text-book Committee of the Council of Public Instruction to prepare, as a companion to the new series of Readers, a spelling book containing the more difficult words in those Readers, and embracing the excellencies of Sullivan's Spelling Book Superseded and Vasey's.

4. *Arithmetics*.—Various Arithmetics were used in 33 schools—decrease, 16; the Irish National Arithmetics were still used in 624 schools—decrease, 182. Sangster's Arithmetics, based on the Irish National, but improved and adapted to Canadian currency, statistics, and commerce, were used in 3,552 schools—increase, 115.

5. *Grammars*.—Sullivan's or National Grammar was used in 420 schools—decrease, 99; Kirkham's in 213 schools—decrease, 47; Lennie's in 2,654 schools—increase, 15; Bullion's and other Grammars in 865 schools—increase, 114. It is proposed that a Grammar be compiled under the direction of the Council of Public Instruction, possessing the excellencies of the other Grammars in use, adapted to the schools, and published upon the same principle as the Readers.

6. *Geographies*.—Since the withdrawal of permission of the Council of Public Instruction for the use of Morse's American Geography, its use has rapidly declined, and it is now nearly discontinued in the schools, without inflicting any penalty authorized by law for using it. That and other unauthorized Geographies were only used last year in 194 schools—decrease, 323. Sullivan's National Geography, sanctioned many years since, in the absence of any Canadian Geography, though very defective in respect to Canada, was used in 468 schools—decrease, 218; while Lovell's Canadian Geography was used in 3,464 schools—increase, 601; a striking illustration of the endorsement by the public of the recommendation of this excellent Geography by the Council of Public Instruction.

7. *Histories*.—History of England is reported as having been taught in 1,965 schools—increase, 408 schools; the History of Canada in 1,160 schools—increase, 328 schools; General History taught from the Irish National Readers, 585 schools—decrease, 94; taught from various books, 40—decrease, 61. Carefully compiled Histories, national, ancient and modern adapted to the schools, are required.

8. *Book-keeping* was taught from the Irish National Books in 921 schools—decrease 107; from other books, in 689 schools—increase 60.

9. *Mensuration* was taught in 884 schools—decrease, 31.

10. *Algebra*.—Colenso's Algebra was used in 772 schools—decrease, 101; Sangster's Algebra, designed to supersede Colenso's, was used in 527 schools—increase, 311; other Algebras in 279—decrease, 152.

11. *Geometry* was taught from the Irish National Series in 157 schools—decrease, 92; Euclid, 1,157—increase 53.

12. *Maps, Globes, Apparatus, &c.*—Whole number of Maps supplied by the Department to the schools was 25,148—increase, 731. Whole number of schools using Maps, 3,298—increase, 33. Whole number of schools using Globes, 1,140—increase, 4. Whole number of schools using Blackboards, 3,979—increase, 15. Whole number of schools using sets of Apparatus, 396—increase, 112; using Tablet Lessons, 1,085—increase, 46; using Magic Lanterns, 57—decrease, 7; having School Museum of Natural History, 60—increase, 30.

13. *Schools opened and closed with Prayer, and in which the Bible is used*.—The number of schools in which the Bible or Testament is reported to have been used was 2,992—decrease, 44; the number of schools in which the daily exercises were opened and closed with Prayer was 2,952—increase, 63. No child can be compelled to be present at any religious reading, instruction or exercise, against the wish expressed in writing by his parents or guardians. The religious reading, instruction and exercises are, like religion itself, a voluntary matter with trustees and teachers of schools. The Council of Public Instruction provides facilities and makes recommendations on the subject, but does not assume the authority of enforcing or compelling compliance with these provisions or recommendations. In some of the schools, the reading and prayers are according to the Roman Catholic Church; but in the great majority of cases, the exercises are Protestant. The

fact that religious exercises of some kind are practised in three-fourths of the Public Schools indicates the prevalent religious principles and feelings of the country.

VI. TABLE F.—ROMAN CATHOLIC SEPARATE SCHOOLS.

1. *General Remarks.*—The Public Schools of this Province are non-denominational. Equal protection is secured to Roman Catholics with every other religious persuasion. No child is permitted to be compelled to receive any religious instruction, or attend any religious exercise, or the reading of any religious work, against the wish of his parents or guardians. Three hundred and twenty-two Roman Catholic teachers are employed in the Public Schools (besides two hundred and seven in the Separate Schools); upwards of forty-five thousand Roman Catholic children, out of the sixty odd thousand Roman Catholic school-going children, are taught in the Public Schools. Yet, notwithstanding these facts, the Legislature has made provision for the establishment, under certain conditions, of both Roman Catholic and Protestant Separate Schools for those who desire them. In 1863, the Legislature of United Canada passed a Separate School Act, which was accepted by the authorities and representatives of the Roman Catholic Church as a final settlement of the question, as far as it related to Upper Canada; and that Act has been made, by the British Parliamentary Act of Confederation, the basis of settling the rights and relations of Protestants and Roman Catholics in Lower Canada, now the Province of Quebec.

2. The number of Roman Catholic Separate Schools reported for 1866 is 157—*increase, 5.*

3. *Receipts.*—The amount apportioned and paid from the Legislative Grant to Separate Schools, according to average attendance of pupils, as compared with that of the Public Schools in the same municipalities, was \$9,818—*increase, \$453.* The amount apportioned and paid for the purchase of maps, apparatus, prize books and libraries, upon the usual condition of an equal sum being provided from local sources, was \$263—the same as the previous year. The amount provided by *school rates* on the property of supporters of Separate Schools was \$25,108—*increase, \$1,320.* The amount *subscribed* and paid by supporters of Separate Schools, and from fees and other sources, \$9,847—*decrease, \$2,954.* The whole amount provided from all sources for the support of Separate Schools was \$45,039—*decrease \$1,180.*

4. *Expenditure.*—For the payment of teachers, \$32,745—*decrease, \$1,207;* for the purchase of maps, prize books, and apparatus and libraries, \$787—*increase, \$65;* for other purposes, \$11,506—*decrease, \$38.*

5. *Pupils.*—The number of pupils reported as attending the Separate Schools was 18,575—*increase, 474.*

6. The average time of keeping open the Separate Schools, including legal vacations and holidays, was eleven months.

7. The whole number of teachers employed in the Separate Schools was 207—*increase,*

7. Of these, 70 were males—*decrease, 11;* and 137 were females—*increase, 18:* 66 were of religious orders; 21 males—*decrease, 1;* and 45 females—*increase, 1.*

8. The same table shews the exercises and the subjects taught in the Separate Schools, and exhibits a large increase in the higher subjects of a Common School education, as also in the use of maps, black-boards, &c., used in the schools. Vocal music appears to be taught to the same proportion of pupils in the Separate Schools as in the Public Schools.

GRAMMAR SCHOOLS.

VII. TABLE G.—RECEIPTS, EXPENDITURES, PUPILS.

1. *General Remarks.*—This, 1866, is the first year of the operation of the Grammar School Improvement Act, passed in 1865. By the provisions of that Act, among other things, the distinctions between Senior and Junior Grammar Schools in Counties, and the apportionment to Counties according to population, and the special apportionment of \$400 to each Senior or County-town Grammar School, were abolished; all Grammar Schools were placed upon the same footing, and the apportionment to each was to be made accord-

ing to the average attendance of pupils in the prescribed course of studies, and upon the condition that at least a sum equal to half the sum apportioned from the Grammar School Fund, should be raised from local sources, for the payment of Teachers' salaries. The final entrance examination of pupils was to be conducted and decided upon by the Inspector of Grammar Schools. It may easily be conceived, that while these provisions of the law, and the regulations required to give them effect, placed each Grammar School upon the just and right foundation of receiving public aid according to its works in the prescribed courses of study, they caused a great reduction in the apportionment to some Senior Grammar Schools, which had heretofore received \$400 per annum irrespective of attendance of pupils, and which, in some instances, had received the whole, or nearly the whole apportionment made to their county according to population, in which there were but one or two Grammar Schools, while in other cases the apportionment to schools is largely increased. The operation of the law, just in principle, can only be judged by general results, though the changes it involves may at first be attended with individual cases of hardship. The great want of Grammar Schools has been means for their efficient support. More than one hundred Grammar Schools had been established in various towns and villages of the country, without means to support half that number; and the counties, towns and villages where these schools were established, and which were anxious to retain them, were unwilling to provide for their efficient support. Each County Council had authority to establish additional Grammar Schools within its jurisdiction, with the single restriction that the apportionment to such county was sufficient to allow \$200 to such additional Grammar School, after paying a like sum to each Grammar School already established in the county. The result was that nearly every village sought to get a Grammar School established within its limits, not because there were a sufficient number of pupils requiring a classical education to support a Grammar School, but to add to its prestige and get \$200 per annum without the obligation of providing a like sum; whereas the interests of sound education would have been much better consulted in many such cases, if all parties had united in establishing and supporting a good Common School. But in this way many existing Grammar Schools were weakened and impoverished by having a large part of their slender means of support abstracted to make allowances to newly established Grammar Schools in the same county.

With the view of providing additional aid for the better support of Grammar Schools, a further Parliamentary grant of \$17,000 per annum was made in 1863; but the Grammar School Improvement Bill, intended to accompany this increase of the Fund, did not become an Act until the year 1865, and I omitted, near the close of the Session, when the Supplies were granted, to suggest the corresponding provision that this additional aid should be distributed among Grammar Schools already established. The effect was that the moment it was known that the apportionment to counties was larger than it had been, County Councils were pressed to establish additional Grammar Schools in certain villages, and the addition to the Grammar School Fund resulted in increasing the number of feeble Grammar Schools instead of increasing the efficiency of those already established.

The Grammar School Improvement Act of 1865 has, however, prevented the increase of this evil, by providing that no additional Grammar School shall be established in any county, unless it can be done without diminishing the apportionment to existing Grammar Schools, and unless there is a sufficient surplus to allow an apportionment of \$300 per annum to such additional Grammar School, and unless a sum equal at least to half that sum be provided from local sources for the salaries of teachers, exclusive of fees of pupils, and besides providing suitable accommodations for such additional Grammar School.

The first year's operation of the Grammar School Improvement Act, has resulted not only in an improvement in the thoroughness and daily life of the Grammar Schools, but in an increase of the essential means of their efficiency to the amount of \$22,614.

2. The number of schools reported was 104.

3. *The amount of Legislative Grant and Fund for the salaries of Head Masters and Teachers* was \$51,816—decrease, \$1,389. This small diminution in the amount paid was in consequence of the municipalities and authorities of several schools not having complied with the requirements of the law.

4. *The amount paid for the purchase of Maps, Apparatus, Prize-books and Libraries,* upon the usual condition of an equal sum being provided from local sources, was \$1,145—*increase, \$87.*

5. Amount provided by Municipalities, \$33,908—increase, \$18,945, evincing the practical and beneficial operation of the new Grammar School Act. Amount received from fees of pupils, \$15,871—decrease, \$2,671. Amount received from other sources, including the balance of the preceding year, \$12,939. Total receipts for Grammar Schools, \$123,268—increase, \$22,614. An increase of more than one hundred per cent. on any previous year.

6. *Expenditures*.—For Head Masters' and Teachers' Salaries, \$87,055—increase, \$5,493. For building, rent and repairs, \$17,653—increase, \$12,401. For maps, apparatus, prize-books and libraries, \$2,750—increase, \$520. For fuel, books and contingencies, \$6,428—increase, \$1,230. Total expenditure for Grammar School purposes, \$113,887—increase, \$19,647. Balance unexpended at the end of the year, \$9,380—increase, \$2,967.

7. *Pupils*.—Whole number of pupils attending the schools during the year, 5,179—decrease, 575. Number of pupils whose parents reside in the cities, towns or villages where the Grammar Schools are situated, 3,751—decrease, 477. Number of pupils whose parents reside out of the city, town or village of the Grammar School, but within the county, 1,174—decrease, 55. Number of pupils whose parents reside in other counties than that of the Grammar School, 266—decrease, 31. Number of pupils admitted on examination by the Inspector, 3,275—the first year of this regulation. Number of pupils in the subjects of the classical course, 4,619. Number enrolled for the non-classical or English course, 220—the first year of this regulation. Number of new pupils admitted during the year, 1,989—decrease, 271. Number of Common School boys admitted free by scholarship, 163—increase, 39. Fourteen of these scholarships were established by County Councils; seven by the City Council of Toronto; eight by the Town Council of St. Catharines; fourteen by Trustees, and four by a Head Master.

VIII.—TABLE H.—NUMBER OF PUPILS IN THE VARIOUS BRANCHES OF INSTRUCTION.

This table shows both all the subjects taught in the Grammar Schools and the number of pupils in each. I refer to the table for minute details in regard to each school. Total in *English*, 5,137—decrease, 529 under the new regulations; in English Grammar, 5,016—decrease, 435; in spelling and dictation, 4,355—decrease, 535; in reading, 4,476—decrease, 458; in composition, 3,556—decrease, 238. Total in *Latin*, 4,444—increase, 775; in Arnold's 1st Latin Book, 3,018—increase, 996; in Arnold's 2nd Latin Book, 740—increase, 186; in Latin Grammar, 3,591—increase, 833; in Latin Exercises and Prose Composition, 2,097—increase, 234; in Prosody, 449—decrease, 175; in Cæsar, 649—increase, 173; in Virgil, 471—increase, 53; in Livy, 108—increase, 42; in Ovid, 62—decrease, 18; in Cicero, 185—decrease, 39; in Horace, 172—decrease, 41; in Verse Composition, 126—increase, 7; average attendance of boys in Latin for the School year, 1,577. Total in *Greek*, 737—increase, 2; in Harkness' Arnold, 456; in Greek Grammar, 586—decrease, 38; in written exercises, 393—decrease, 51; in Lucian, 150—increase, 41; in the *Anabasis*, 176—decrease, 83; in the *Iliad*, 118—decrease, 24; in the *Odyssey*, 30—decrease, 14. Total in *French*, 1,974—increase, 241; in French Grammar, 1,700—increase, 242; in written exercises and composition, 1,396—increase, 105; in dictation and conversation, 569—increase, 194; in Voltaire's Charles XII., 493—increase, 78; in Corneille, 94—increase, 48. Total in *Arithmetic*, 5,077—decrease, 414; in the first four rules and reduction, 1,107—decrease, 354; in the higher rules, 3,970—decrease, 60. Total in *Algebra*, 2,503—increase, 35; in the first four rules, 1,010—decrease, 155; in the higher rules, 1,493—increase, 190. Total in *Euclid*, 1,727—decrease, 130; in Books I. and II., 1,015—decrease, 136; in Books III. and IV., 714—increase, 6. In *Plane Trigonometry*, 101, in *Logarithms*, 303. In *Mensuration and Surveying*, 423. (These last three subjects have not before been separately reported.) Total in *Geography*, 4,839—decrease, 442; in Ancient Geography, 1,113—decrease, 108; in Modern Geography, 4,579—decrease, 417; in Canadian Geography, 2,818—decrease, 744. Total in *History*, 4,159—decrease, 373; in Greek and Roman History and Antiquities, 1,092—decrease, 117; in other Ancient History, 615—decrease, 241; in British History, 3,406—decrease, 233; in British American History, 1,394—decrease, 302. Total in *Physical Science*, 1,934—decrease, 495; in the Elements of Natural Philosophy, 1,533—decrease, 318; in the Elements of Natural History, 701—decrease, 230; in the Elements of Philosophy and Chemistry, 613

—decrease, 285. In *Book-keeping and Commercial Transactions*, 1,226—decrease, 39. For further details as to Writing, Drawing, Vocal Music, Gymnastics, Military Drill, &c., see the table.

It is observable that there is a decrease in the attendance in most of the subjects, except those on which the distribution of the Grammar School Fund depends.

IX. TABLE J.—GRAMMAR SCHOOL MASTERS—MISCELLANEOUS INFORMATION.

This table contains a return of the name, college, degree, salary of each Head Master, and the date of his appointment; the number of teachers employed in each school; the kind of school-house, title, value of school property; the number of schools in which the Bible is read and prayers daily offered; number of schools united with Common Schools; number of months each school is kept open; number of schools furnished with maps, globes, black-boards, and complete sets of apparatus; estimated value of library-books, apparatus and furniture; number of schools in which gymnastics and military drill are practised; number of pupils in each school who have obtained prizes at examinations during the year, or who have matriculated at a University, and what University, and with what honors, or who have been admitted into the Law Society. The table is referred to for such information any one may desire on all these subjects in regard to each Grammar School in Upper Canada.

X. TABLE K.—METEOROLOGICAL OBSERVATIONS.

The Consolidated Grammar School Act provided that the Head Master of each Senior County Grammar School in Upper Canada should take certain observations in accordance with prescribed instructions, and that the County Council should defray the cost of the necessary instruments. Abstracts of the observations were to be forwarded by the observer, monthly, to the Chief Superintendent of Education at Toronto. The Senior Schools (*i. e.* those situated in the county town of each county) had, under a previous enactment, been especially privileged by a preference over the Junior Schools in the distribution of the Grammar School Fund. As the law did not connect the increased grant with the performance of the duty of recording observations, and as many of the County Councils neglected to make any appropriation for the purchase of instruments, although, in all cases, half the cost was paid by the Department, the result ensued that several of the Senior Schools were never provided with the apparatus, and many of those stations for which the instruments were provided, made the returns in a desultory and unsatisfactory manner, which rendered the publication of a connected series impossible. There were, however, observers, to whom this remark does not apply, and who continued to send valuable abstracts, which were preserved in the Education Office.

In 1865, the Grammar School Improvement Act, for the passage of which efforts had been annually made, was at length passed, and contained the following section:—

“11. Each of the Grammar Schools Meteorological Stations, at which the daily observations are made, as required by law, shall be entitled to an additional apportionment out of the Grammar School Fund, at a rate not exceeding fifteen dollars per month for each consecutive month during which such duty is performed, and satisfactory monthly abstracts thereof are furnished to the Chief Superintendent, according to the form and regulations provided by the Department of Public Instruction; but the number and locality of such Meteorological Stations shall be designated by the Council of Public Instruction with the approval of the Governor in Council.”

Under this provision, His Excellency the Governor in Council on the recommendation of the Council of Public Instruction for Upper Canada, has authorized the establishment of Meteorological Stations at the following Grammar Schools:—Windsor, Goderich, Stratford, Simcoe, Hamilton, Barrie, Peterborough, Belleville, Cornwall and Pembroke.

Of these, all have applied for and obtained the required instruments, and are in working order. The whole ten stations are now sending generally accurate monthly and weekly returns of their observations, and it affords me much pleasure to state, that the observers are discharging their important and arduous duties, with much faithfulness and zeal.

Of late years, the practical value of the science of Meteorology has been recognized by all civilized governments, and systems of simultaneous observations have been widely estab-

lished, the results of which must tend to elucidate the laws which control the atmospheric phenomena. The late Rear-Admiral Fitzroy,* the head of the Meteorological Office in England, thus refers to the importance of returns of temperature, and the especial need of observations in British America:—"Tables of the mean temperature of the air in the year, and in the different months and seasons of the year, at above one thousand stations on the globe, have recently been computed by Professor Dove, and published under the auspices of the Royal Academy of Sciences at Berlin. This work, which is a true model of the method in which a great body of Meteorological facts, collected by different observers and at different times, should be brought together and co-ordinated, has conducted, as is well known, to conclusions of very considerable importance in their bearing on climatology, and on the general laws of the distribution of heat on the surface of the globe." "In regard to *land stations*, Professor Dove's tables have shewn that data are still pressingly required from the British North American Possessions intermediate between the stations of the Arctic expeditions and those of the United States; and that the deficiency extends across the whole North American continent in those latitudes, from the Atlantic to the Pacific." In furtherance of this desirable object, an eleventh station has been established, under the management of Dr. Schultz, at Fort Garry, who obtained the instruments at the Depository here. No returns have yet been received from this observer.

The Smithsonian Institution, at Washington, which collects and publishes a vast quantity of valuable meteorological records, forwarded to this department a copy of its annual report and of the large volumes of meteorological results, as a gift to each of the Grammar School Stations in Upper Canada. These books (which are being sent to the stations as opportunity offers) will, no doubt, be examined by each observer, with great pleasure and attention, and it is hoped that a new encouragement will be felt in performing a work which is shown to be so important, and which is now being energetically carried on by great numbers of scientific men in all parts of the world. The following instruments are used at each station:—

One Barometer,† one Maximum and one Minimum Thermometer,† Wet and Dry Bulb Thermometers,† one Rain Gauge and Measure, one Wind Vane.

As the stations are not yet supplied with proper Anemometers, the velocity of the wind is estimated as described in Table K.

Observations are taken at 7 a.m., and at 1 and 9 p.m., daily, except on Sundays. The self-registering thermometers are read at 9 p.m. The rain is measured at 1 p.m.

Full abstracts of the daily records are sent to the Education Office monthly, in addition to a weekly report of certain observations, which is prepared for publication in any local newspaper the observer may select. Abstracts of the results for each month are regularly published in the *Journal of Education*, and the observers' reports, after a strict examination, are arranged and preserved for further investigations.

It has, however, taken the entire year, 1866, to bring the whole chain of stations into operation, and the following is a statement of the returns received during that period:—*Barrie, Belleville, Hamilton and Stratford*, reported for every month; *Simcoe*, for March, April, May, June, September, October, November, December; *Peterborough*, for the last nine months; *Pembroke*, for the last eight months; *Windsor*, for the last seven months; *Cornwall*, for March, April, May, June, October, November; and *Godrich*, for December. Abstracts of these returns will be found in Table K. I give below some of the Annual Results for 1866, of the four stations which sent complete reports for the twelve months; in my next report the number will be considerably increased. In addition to the report forms hitherto used, another has recently been prepared, which is intended to show the curves of barometric pressure, and of the temperature at each station,—a mode of record which presents the results to the eye in a clearer manner than can be done by mere figures.

*I observe that the Rev. J. Fraser, of the Schools Inquiry Commission, also recognizes the value of this feature of our Grammar School law.

†These instruments were supplied by Messrs. Negretti & Zambra, and Casella, London, and the index errors have been ascertained by comparisons at the Kew Observatory in England, and at the Toronto Observatory. They are obtained by the stations, together with Registers and forms for Abstracts, from the Educational Depository, Toronto.

TABLE of certain results of Meteorological Observations at four Grammar School Stations, for the year 1866.

XI. TABLE L.—OPERATIONS OF THE NORMAL AND MODEL SCHOOLS.—THE LATE HEAD MASTER.

This table presents a condensed statistical view of the operations of these important institutions since their establishment in 1847. They were not designed to educate young men and women, but to *train teachers*, both theoretically and practically, for the general work of conducting the schools of the country. They are not constituted, as are most of the Normal schools in Europe, and many in America, to impart the preliminary education requisite for teaching as well as for other transactions of business. That previous preparatory education is supposed to have been attained in the many public or private schools. The entrance examination to the Normal School requires this. The object of the Normal and Model Schools, therefore, is to do for the teacher what an apprenticeship does for the mechanic,

the artist, the physician, the lawyer—to teach him, theoretically and practically, how to do the work of his profession. No inducements are presented to any one to apply for admission to the Normal School except those who wish to qualify themselves for the profession of teaching, nor any one admitted except those who declare in writing their intention to pursue the profession of teaching, and that their object in coming to the Normal School is better to qualify themselves for their profession—a declaration similar to that which is required for admission to Normal Schools in other countries. Nor is any candidate admitted without passing an entrance examination equal to what is required for an ordinary second class teacher's certificate by a county board. The majority of candidates are those who have been teachers, and who possess county board certificates of qualification—many of them first-class certificates. It will be seen by the table, that of the 4,881 students who have been admitted to the Normal School since its establishment, 2,474 had been teachers. The number admitted during the two sessions of 1866 was 287, of whom 118 were males and 169 females. Of these, 72 males and 113 females obtained Provincial certificates.

The Model Schools (one for boys and the other for girls, each limited to 150 pupils, each pupil paying a dollar per month, while the Common Schools of the city are free) are appendages to the Normal School. The teachers in training in the Normal School, divided into classes, spend some time each week in the Model Schools, where they first observe how a *model* school, teaching Common School subjects, is organized and managed; how the several subjects are taught; and they at length teach themselves, as assistants, under the observation and instruction of the regularly trained teachers of the school, who also report from day to day the attention and aptitude of each teacher in training for teaching, governing pupils, commanding their attention, &c.

The late Head Master.—It becomes my painful duty to record the first death which has occurred among the teachers of the Normal School during the twenty years of its operation. I refer to the lamented decease of Thomas Jaffray Robertson, Esquire, M.A., who was Head Master of the Normal School from its establishment in 1847, until his death, which took place on the 29th September, 1866. Mr. Robertson, after completing his studies in Trinity College, Dublin, established a private classical school of high reputation in that city. He was at length appointed Inspector of the National Schools in Ireland, by the National Board, which, when it subsequently appointed three Head Inspectors, promoted Mr. Robertson to be the Senior Head Inspector of the three. He was thus in a position to become one of the Secretaries of the Board, with a salary of £800 sterling per annum. A vacancy of that kind has actually occurred, and is now filled by a junior Inspector to Mr. Robertson. When it was determined, in 1846, to establish a Normal School for the training of teachers in Upper Canada, application was made to the National Board of Education, in Dublin, to select and recommend a competent person for that office, in order to introduce the Irish National methods of teaching here, as the Irish National Text-books had been adopted as the authorized series of Text-books for the schools in Upper Canada. The Irish National Board selected and recommended Mr. Robertson, bearing testimony to his character, faithfulness, ability, and high qualifications for the high office of introducing improved methods of school teaching and discipline into Upper Canada. Mr. Robertson amply justified the recommendations under which he came to this country. He may be justly regarded as the founder of our present methods of school discipline and instruction, which are practised by teachers trained in the Normal School during the last twenty years, and which have been largely adopted by other teachers, to the great improvement of the schools, and to the great advantage of the country. No words of mine can add to the weight of the following testimony to Mr. Robertson's character and labours by the Council of Public Instruction, in the following minute:—

Minute of the Council of Public Instruction adopted the 4th of October, 1866.

“ This Council records the expression of its deep regret at the decease, after a protracted illness, of T. J. Robertson, Esq., A.M., who has for nineteen years been the faithful and able Head Master of the Normal School for Upper Canada. During that period Mr. Robertson, by his exemplary private life, affectionate assiduity and skill in teaching, and lectures and counsels to upwards of four thousand students who have been trained in the Normal School as teachers, has largely contributed to improve and elevate the methods and character of school-teaching and government throughout Upper Canada.”

XII. TABLE M.—OTHER EDUCATIONAL INSTITUTIONS IN UPPER CANADA.

As the Common and Grammar Schools are only a part of our educational agencies, the Private Schools, Academies and Colleges must be considered in order to form a correct idea of the state and progress of education in the country. Table M. contains an abstract of the information collected respecting these institutions. As information is obtained and given voluntarily, it is imperfect, and can only be considered an approximation to accuracy. In regard to some of the items no information has been obtained between the years 1863 and 1866. In such cases the increase covers a period of three years. According to the last information obtained, the number of Colleges was 16; number of students, 1,931—increase, 111; annual income or legislative aid, \$159,000—increase, \$9,000; amount received from fees, \$53,000—increase, \$9,000; number of Academies and Private Schools, 298—increase 38; number of pupils, 6,462—increase, 496; number of teachers, 399—decrease, 11; amount received from fees, \$78,482—increase, \$27,583. Total Colleges, Academies and Private Schools, 314—increase, 38; total students and pupils, 8,393—increase, 607; total amount received from the Legislature and from fees, \$290,482—increase, \$45,583.

XIII. TABLE N.—FREE PUBLIC LIBRARIES, PRIZE-BOOKS, &C.

1. These libraries are managed by the local Municipal Councils and School Trustees, under general regulations, established, according to law, by the Council of Public Instruction. The books are procured by the Educational Department, from publishers both in Europe and America, at as low prices as possible: and a carefully prepared classified catalogue of about four thousand works (which, after examination, have been approved by the Council of Public Instruction), is sent to the Trustees of each school section and the Council of each municipality. From this select and comprehensive catalogue, the Municipal or School authorities desirous of establishing or increasing a library, select such books as they think proper and receive from the Department not only the books at cost prices, but an apportionment of one hundred per cent. upon the amount which they provide for the purchase of such books. None of these books are provided by the Department for any private parties, except Teachers and Local Superintendents for their professional use.

2. The extension of the *library* branch of the system is very gradual. The amount expended for free libraries during the year 1866—the one half appropriated from the Legislative grant, and the other half provided from local sources—was \$1,375—increase, \$1,974. The amount thus provided and expended for libraries in former years, \$115,273. The whole amount expended for libraries, \$119,649—increase, \$4,375.

3. The number of volumes sent out during the year, 6,856; the number sent out in former years, 208,755; the whole number of volumes in the public free libraries, 215,611. These volumes are on the following subjects: History, 38,071 volumes; Zoology and Physiology, 14,506; Botany, 2,673; Phenomena, 5,780; Physical Science, 4,501; Geology, 1,948; Natural Philosophy and Manufactures, 12,414; Chemistry, 1,475; Agricultural Chemistry, 775; Practical Agriculture, 9,021; Literature, 21,328; Voyages, 17,716; Biography, 25,099; Tales and Sketches of Practical Life, 61,192; Teachers' Library, 2,722. Total, 219,221, not including 8,340 volumes sent to Mechanics' Institutes.

4. *Prize-books*.—In this new and important branch of instruction, designed to encourage emulation, reward meritorious pupils and diffuse useful knowledge, 58,871 Prize-books were sent out during the year 1866, making a total of 269,319 Prize-books sent out to schools. Total of Library and Prize Books sent out, 496,264 volumes.

The accompanying map will exhibit the results which have been so far accomplished by the Library system.

XIV. TABLE O.—MAPS, APPARATUS, PRIZE-BOOKS SUPPLIED BY THE DEPARTMENT.

The amount expended in supplying Maps, Apparatus and Prize-books for the Schools—one-half provided from local sources—was \$27,113—increase, \$6,890. Catalogues are gratuitously furnished to the municipal and school authorities; but in every case the articles are supplied on the voluntary application of the local authorities, who provide and

transmit one-half the amount required for the purchase of the maps, apparatus and prize-books.

I may here repeat the explanatory observations which I have heretofore given of this branch of the Department :—

“The maps, globes, and various articles of school apparatus sent out by the Department, apportioning one hundred per cent. upon whatever sum or sums are provided from local sources, are nearly all manufactured in Canada, and are better executed, and at lower prices, than imported articles of the same kind. The globes and maps manufactured (even in the material) in Canada, contain the latest discoveries of voyagers and travellers, and are executed in the best manner, as are tellurians, mechanical powers, numeral frames, geometrical forms, &c. All this has been done by employing competitive private skill and enterprise. The Department has furnished the manufacturers with the copies and models, purchasing certain quantities of the articles when manufactured, at stipulated prices, then permitting and encouraging them to manufacture and dispose of these articles themselves, to any private parties desiring them, as the Department supplies them only to municipal and school authorities. In this way new domestic manufactures are introduced, and mechanical and artistical skill and enterprise are encouraged, and many aids to schools and domestic instruction, heretofore unknown among us, or only attainable in particular cases with difficulty, and at great expense, are now easily and cheaply accessible to private families, as well as to municipal and school authorities all over the country. It is also worthy of remark that this important branch of the Educational Department is self-supporting. All the expenses of it are reckoned in the cost of the articles and books procured, so that it does not cost either the public revenue or school fund a penny beyond what is apportioned to the Municipalities and School Sections providing a like sum or sums for the purchase of books, maps, globes, and various articles of school apparatus. I know of no other instance, in either the United States or in Europe, of a branch of a Public Department of this kind, conferring so great a benefit upon the public, and without adding to public expense.”

The operations of this branch of the Department during the year 1866, have been largely in advance of those of any preceding year. The following maps, &c., were sent out to the schools during the year :—Maps of the World, 147—increase, 42 ; of Europe, 207—increase, 43 ; of Asia, 182—increase, 42 ; of Africa, 171—increase, 40 ; of America, 186—increase, 37 ; of British North America, 229—increase, 76 ; of Great Britain and Ireland, 217—increase, 72 ; of a Single Hemisphere, 133—increase, 26 ; Classical and Scriptural, 214—increase, 57 ; other charts and maps, 387—increase, 116 ; Globes, 109—increase, 44 ; sets of apparatus, 68—increase, 25 ; pieces of school apparatus, 496—increase, 317 ; historical and other school lessons in sheets, 8,019—decrease, 1,000 ; number of volumes of prize-books, 58,871—increase, 14,270. The following is a summary tabular statement of what has been done in this branch of the Department during the twelve years of its operations, to provide for the wants and promote the efficiency of the schools :—

XV. TABLE P.—THE SUPERANNUATED OR WORN-OUT TEACHERS OF COMMON SCHOOLS.

This table shows the age and service of each pensioner, and the amount which he receives. It appears that 233 teachers have been admitted to receive aid; of whom 87 have died, 9 were not heard from and 5 resumed teaching or withdrew from the fund before or during the year 1866.

2. The system according to which aid is given to worn-out Common School teachers is as follows:—

The Legislature has appropriated \$4,000 per annum in aid of superannuated or worn-out Common School teachers. The allowance cannot exceed \$6 for each year that the recipient has taught a Common School in Upper Canada. Each recipient must pay a subscription to the fund of \$4 for the current year and \$5 for each year since 1854, if he has not paid his \$4 in any year; nor can any teacher share in the fund unless he pays annually at that rate, commencing from the time of his beginning to teach, or with 1854 (when the system was established) if he began to teach before that time. When a teacher omits his annual subscription, he must pay at the rate of \$5 for that year, in order to be entitled to share in the fund when worn out.

3. The average age of each pensioner in 1865 was 69 years; the average length of service in Upper Canada was 21½ years. No time is allowed applicants except that which has been employed teaching a Common School in Upper Canada; though their having taught school many years in England, Ireland or Scotland, or other British Provinces, has induced the Council, in some instances, to admit applicants to the list of *worn-out* Common School teachers after teaching only a few years in this country—which would not have been done, had the candidate taught, altogether, only a few years of his life. The report in former years contained the names of the parties on whose testimony the application in regard to each case was granted, together with the county of each pensioner's residence. That part of the table has been omitted to save expense in printing, though the record is preserved in the Department.

XVI. TABLE Q.—DISTRIBUTION OF THE LEGISLATIVE SCHOOL GRANT, TOGETHER WITH THE SUMS RAISED FROM LOCAL SOURCES AS AN EQUIVALENT, AND OTHER MONEYS PROVIDED BY MUNICIPALITIES AND TRUSTEES.

This presents a complete view of all the moneys which have been received and expended, and from what sources derived, in connection with the Normal, Model, Grammar and Common Schools of Upper Canada.

It may be seen at a glance, from this table, that the public money has not been expended in any favoured localities, but has been impartially expended in all the counties, cities, towns and villages throughout the Province according to population and upon the principle of local co-operation. The people of Upper Canada provided and expended in 1866, for Grammar and Common School purposes, irrespective of colleges, academies and private schools, \$1,759,643—increase, \$91,791.

XVII. TABLE R.—EDUCATIONAL SUMMARY FOR 1866.

This table exhibits in a single page the number of Educational Institutions of every kind, so far as I have been able to obtain returns, the number of students and pupils attending them, and the amount expended in their support. The whole number of these institutions in 1866 was 4,800—increase, 114. The whole number of students and pupils attending them was 405,267—increase, 7,275. The whole amount expended in their support was \$1,820,006—increase, \$102,800. The whole amount available for educational purposes in 1866 was \$2,050,125—increase, \$137,374.

XVIII. TABLE S.—GENERAL STATISTICAL ABSTRACT OF THE PROGRESS OF EDUCATION IN UPPER CANADA, FROM 1842 TO 1866 INCLUSIVE.

It is only by comparing the character and number of institutions of education at different periods, the number of pupils attending them, and the sums provided and expended for their support, that we can form a correct idea of the educational progress of a country.

By reference to this brief but important table the reader can ascertain the progress of education in Upper Canada in any year or series of years since 1841, as far as I have been able to obtain returns. As an illustration, take a few items for the last fifteen years:—In 1853, the school population between the ages of 5 and 16 years, was 268,957; in 1866 it was 431,812—increase, 162,855. In 1853, the number of Grammar Schools and pupils were respectively 64 and 3,221; in 1866, the numbers were respectively 104 and 5,179. In 1853, the number of Common Schools was 3,093; in 1866 their number was 4,222; in 1853, the number of Common School pupils was 194,736; in 1866, their number was 372,320. In 1853, the number of *free* schools was 1,052; in 1866, their number was 3,741. In 1853, the amount provided for Common School purposes was \$617,836; in 1866, the amount for these purposes was \$1,387,233. I refer to the Table for various details.

XIX.—THE EDUCATIONAL MUSEUM.

Nothing is more important than that an establishment designed especially to be the institution of the people at large—to provide for them teachers, apparatus, libraries, and every possible agency of instruction—should, in all its parts and appendages, be such as the people can contemplate with respect and satisfaction, and visit with pleasure and profit. While the schools have been established, and are so conducted as to leave nothing to be desired in regard to their character and efficiency, the accompanying agencies for the agreeable and substantial improvement of all classes of students and pupils, and for the useful entertainment of numerous visitors from various parts of the country, as well as many from abroad, have been rendered as attractive and complete as the limited means furnished would permit. Such are the objects of the Educational Museum.

The Educational Museum is founded after the example of what has been done by the Imperial Government as part of the System of popular education—regarding the indirect as scarcely secondary to the direct means of forming the taste and character of the people.

It consists of a collection of school apparatus for Common and Grammar Schools, of models of agricultural and other implements, of specimens of the natural history of the country, casts of antique and modern statues and busts, &c., selected from the principal museums in Europe, including the busts of some of the most celebrated characters in English and French History; also, copies of some of the works of the great masters of the Dutch, Flemish, Spanish, and especially of the Italian schools of painting. These objects of art are labelled for the information of those who are not familiar with the originals, but a descriptive historical catalogue of them is in course of preparation. In the evidence given before the Select Committee of the British House of Commons, it is justly stated that “the object of a National Gallery is to improve the public taste, and afford a more refined description of enjoyment to the mass of the people;” and the opinion is, at the same time, strongly expressed that as “people of taste going to Italy constantly bring home beautiful modern copies of beautiful originals,” it is desired, even in England, that those who have not the opportunity or means of travelling abroad, should be enabled to see, in the form of an accurate copy, some of the works of Rafælle and other great masters; an object no less desirable in Canada than in England. What has been thus far done in this branch of public instruction, is in part the result of a small annual sum which, by the liberality of the Legislature, has been placed at the disposal of the Chief Superintendent of Education, out of the Upper Canada share of the school grants, for the purpose of improving school architecture and appliances, and to promote art, science and literature by means of models, objects and publications, collected in a Museum connected with the Department.

The more extensive Educational Museum at South Kensington, London, established at great expense by the Committee of Her Majesty's Privy Council of Education, appears, from successive reports, to be exerting very salutary influence, while the School of Art connected with it is imparting instruction to hundreds, in drawing, painting, modelling, &c.

A large portion of the contents of our Museum has been procured with a view to the School of Art, which has not yet been established, though the preparations for it are completed. But the Museum has been found a valuable auxiliary to the schools; the number of visitors from all parts of the country, as well as from abroad, has greatly increased during the year, though considerable before; many have repeated their visits again and again;

and, I believe, the influence of the Museum quite corresponds with what is said of that of the Educational Museum of London.

XX.—REPORTS OF LOCAL SUPERINTENDENTS OF COMMON SCHOOLS.

I need do little more than repeat the remarks I made under this head in my last report.

1. *Value of these extracts.*—I refer to Appendix A for extracts from reports of Local Superintendents of townships, cities, towns, and incorporated villages—a most important and essential part of my report—as containing a practical exposition of the actual working of the school system in nearly five hundred municipalities in Upper Canada. The Local Superintendents, in many municipalities, have made no remarks in transmitting their statistical reports. It may, however, be fairly assumed that what is stated in the extracts given, is applicable to all the municipalities. The value attached to the Local Reports, in the oldest and most advanced of the neighbouring States, may be inferred from the fact that more than one-half of the Annual School Reports of the States of Massachusetts and New York consist of extracts from local reports.

2. *These extracts show the inner life and practical working of the School System.*—These extracts from local reports, which I have given impartially, as is clear from the diversity of sentiment, contain the language and sentiments of persons appointed and paid by the local elected and Municipal Corporations, and state, from personal observation and experience, the working of the school system, its obstacles and defects, and the views and feelings which more or less prevail among the people in the various sections of the Province. These extracts exhibit the inner and practical life of the people in several respects, especially in new settlements, as well as that of the school system; the various hindrances to its operations, from newness of settlements and poverty in some instances, from ignorance and indifference in others; the noble way in which people exert themselves, generally, to educate their children. The different working and results of the same system and of the same measure in the different townships, cities, towns and villages, show how far the obstacles to its progress arise from any defects in the system itself, or from the disposition, intelligence or circumstances of the people and of their elected Trustees. These extracts also illustrate the local voluntary character of the school system, which, like the municipal system, is a power and agency given to the people to manage their own affairs in their own way, doing or spending much or little for the education of their children, as they please, while the Education Department is an aid to prompt and facilitate their exertions, and a social help to those who endeavor to help themselves in the great work which lies at the foundation of the country's freedom and progress.

3. In addition to the foregoing considerations, these extracts from local reports present several other important facts connected with the operation of the school system.

First.—Importance and Office of County Boards.—Progress.—Third Class Certificates should be limited and given only in extreme cases.—They exhibit a very gratifying improvement in the mode in which County Boards of Public Instruction conduct the examination of teachers and give them certificates of qualifications. It is essential to the elevation of both the teachers and the schools that there should be the highest possible standard of the qualifications of teachers, and that depends on the County and Circuit Boards of Public Instruction. If they are lax in their examination of teachers in the subjects of the official Programme, and give certificates of qualifications to teachers who pass any sort of examination, they send forth into their respective counties, with their endorsement, teachers unfit to take charge of their schools, unable to teach many of the more advanced pupils in the recognized subjects of a common school education; they thus wrong individuals who are taxed for the support of the schools, degrade the office of the teacher, and bring a really unqualified teacher into competition with one well qualified, to his injury and to the great injury of the schools themselves. If, on the contrary, County or Circuit Boards are thorough in their examinations, and will give a certificate of qualifications to no teacher who does not come up fully to the prescribed standard, and will not give a third-class certificate to any teacher, except from one Board meeting to another, and only for one school, and that only on the application of the Trustees of such section, satisfying the Board of their inability to employ a teacher of higher qualifications—if County and Circuit Boards will thus act intelligently and patriotically for their respective sections

of country, the office of teacher will become more and more elevated, its ranks will be pruned of incompetent and unworthy members, and the efficiency of the schools will be proportionably promoted. No programme of examination, however high, can elevate the character and qualifications of teachers without the intelligent and cordial agency of the County and Circuit Boards of Public Instruction. They are the practical guardians of the schools, so far as the character and qualifications of teachers are concerned. It is a maxim founded on experience that the teacher makes the school, and it is the County and Circuit Boards that (legally) make the teacher. I earnestly hope the County Boards will advance in the noble cause which so many of them seem to have pursued during the last year, and the schools will soon be freed from the nuisance of an incompetent teacher, who often obtains a second or third class certificate through the laxity of some County or Circuit Board, and then sneaks from one school section to another endeavouring to supplant some really competent and efficient teacher, by offering to teach at a lower salary; and when such *supplanter* meets with Trustees as mean as himself, a really worthy teacher is removed to make way for an unworthy one, to the great wrong of the more advanced pupils and their parents, and to the great injury of the school. Such a teacher is unreasonably dear at the lowest price; and if any Corporation of Trustees can yet be found to sacrifice the interests of the children committed to their trusteeship by employing such a teacher, it is to be hoped that no County or Circuit Board of Public Instruction will put it in their power to do so by again licensing such a person at all as a teacher.

Second.—Evils of Rate-bills.—It is not possible for any person to read these extracts from local reports without being impressed with the serious loss to the school, and many children of any section, by the continuance or re-establishment of a rate-bill. Whatever may be the reader's views on the abstract question of free and rate-bill schools, the perusal of these extracts from local reports must convince him that the free school has immensely the advantage of the rate-bill school; that whatever other means may be employed to secure the education of all the youth of the land, the free school is one absolutely essential means to accomplish that all-important end.

Third.—Evils of employing cheap Teachers.—These extracts illustrate the evil of employing what are mis-called *cheap teachers*. It is well known that one horse at a cost of one hundred dollars is cheaper than one at fifty dollars; that one clerk at a salary of five hundred dollars is cheaper than one at two hundred and fifty dollars—that one coat at ten dollars is cheaper than another at five; so it is with teachers: one teacher at a salary of from five to eight hundred dollars is often cheaper than another at half that salary, by teaching children *how* to learn as well as *what* to learn; by aiding them to form proper habits as well as to make rapid progress. Yet, many Trustees are so deluded by a narrow-minded selfishness, that they act differently in the employment of teachers from what they do in the employment of clerks, or even labourers, or in the purchase of common articles of use—they sell the priceless time and habits of children—not to say their principles and the social interest of their neighborhood, for the sake of a few dollars in the salary of the teacher. In an American School Report it is justly observed: "We have learned to distrust cheap things, as likely to prove most costly in the end. Contractors for cheap clothing have earned and received the just maledictions of the Government, while no man probably feels himself the richer for the service of this class of operators in the market. Cheap literature and cheap ornaments are enormously expensive at any price; but of all things, we believe cheap teachers—cheap as to their attainments and qualifications for the duties of the school-room—are the most expensive luxury with which parents ever indulged their children. We would not deny that the merits of a teacher are not to be measured by his salary. Moreover, we do not forget that the most accomplished and successful teacher was once a beginner, labouring as faithfully for the improvement of his pupils as he now does with five or ten times the amount of his former salary. But this is no reason why we should adopt a system that makes the small sum at which a teacher can be had his chief recommendation. This is trifling with a trust that is second to none in importance. If we are sick, let us invite the novice to experiment upon our case, at the cost of health and its blessings; if we have a fractured bone, let us commit it to the hands of one unskilled in surgery, at the expense of a life long deformity; but let us not commit the welfare of the rising generation to a mere adventurer in the art of teaching, even though he may be secured at moderate wages."

Fourth.—Evils of changing Teachers.—These extracts from local reports illustrate also the evils of frequently *changing Teachers*. It is true an incompetent teacher or a teacher of bad manners or bad morals (if there be any such), should be changed as soon as possible, and as soon as possible removed from the ranks of teachers; but a faithful and efficient teacher should be retained as a rare and valuable treasure. No college or private school would be considered worthy of confidence that changed its instructors once or twice a year; nor can any Common School prosper or be efficient under such a system. In a Massachusetts local School Report, the committee, while urging the retaining of the same teachers for a number of terms, remarks: "The schools of other townships are reaping the benefits from this plan, and the course is an obvious one; for each teacher has a way of his own, and must spend about half a term tearing away the superstructure of his predecessor, and rearing another, which, perhaps, is not superior to the one superseded, and a great loss of time to the school is the result."

Fifth.—Prizes to Pupils in the Schools.—I refer likewise to these extracts from local Superintendents' Reports, for illustrations of the system of *libraries* and *prizes*. In some instances but little benefit appears to be derived from the libraries, while in the great majority of cases the most salutary influence is exerted by them. In but two instances is objection expressed to the distribution of *prize books* as a reward of merit to pupils of the schools, and in but four instances is doubt expressed as to the beneficial influence of it. In these exceptional cases, the evil, if any, has doubtless arisen from an exceptional mode of distributing the prizes—being the act of the teacher, or of persons equally liable to the suspicion of partiality. But where the examinations for the *prizes for proficiency* are so conducted as to give no room for the suspicion of favoritism, and where the record is so kept, and so adjudged in regard to prizes for *punctuality* and *good conduct*, as to be equally above any reasonable suspicion of unfairness, the distribution of prizes as rewards to pupils for proficiency and good conduct must exert the most beneficial influence; and this, with the exceptions referred to, is the all but unanimous testimony of the local reports, as it is the universal experience of colleges and the best schools in both Europe and America. It is the order of Providence, in every day life, that while the slothful hand hath nothing, the diligent hand maketh rich; and *merit and attainments* are the professed grounds of all prizes and rewards and distinctions which are bestowed in civil and political life. For any person, therefore, to object to encouraging diligence and good conduct in schools, by the distribution of prizes (and these prizes consisting of good books, obtained at half price), as the rewards of successful diligence and good conduct, is to object to the principles of Holy Scripture, and the rule of Providence, and the universal practice of civilized mankind in all other matters of common life. The distribution of *prize-books* in the schools is the means of diffusing a great deal of useful and entertaining knowledge among the young, while it exerts a powerful and wide-spread influence in favour of diligence and good conduct among the pupils of the schools. In some schools this influence may be more limited than others; but it will always be more or less felt for good, where the system is properly administered. There are, indeed, many murmurers and envious persons against the wisdom and even equity of the distributions of Divine Providence; and it would be surprising, indeed, if there were not some who would be dissatisfied and envious at distribution of rewards and distinctions among the pupils of schools; but this is no more an argument against the system of rewards and distinctions in the schools, than in the Divine and human government of mankind.

Sixth.—Uniformity of Text-books.—In all the local reports referring to Text-books in the schools, the importance of *uniformity* is mentioned. There appears to be but one opinion and one wish among Local Superintendents, Trustees, and Teachers, on the subject. All appear to agree and insist that there should be but one series of Text-books for the schools; and in several instances the evils of allowing more than one text-book on the same subject (as has hitherto been permitted), are referred to as being injurious to many schools, and embarrassing to the teacher. The wish is strongly expressed, not only that there should be a uniform series of authorized text-books for the schools, but that the Council of Public Instruction should not, as heretofore, as in some instances, sanction more than one book on the same subject. On this important feature of our school system, I refer the reader particularly to the extracts from the reports of the Local Superintendents of the South Riding of the County of Hastings, of Oro in the County of Simcoe,

of the East Riding of the County of Elgin, and of the Second District in the County of Grey.

Seventh.—Want of School-house accommodation.—In a large number of these Reports, the Local Superintendents refer to the wretched character of many of the school-houses, and the absolute necessity of more and better accommodation for pupils. I refer, specially on this subject to the reports of the Local Superintendents of Mountain, in the County of Dundas; of March and other townships, in the County of Carleton; of Kitley and Bastard, in the County of Leeds; of Drummond, in the County of Lanark; of Sheffield and Camden East, in the County of Addington; of the South Riding of Hastings; of the County of Durham; of the North Riding of Wellington; of Hay, in the County of Huron; of Bosanquet, in the County of Lambton; of Nissouri West, Dorchester North, and Adelaide in the County of Middlesex. These reports contain some of the many references to this subject; and some of them offer useful suggestions for the removal of the evils complained of. In one instance the Local Superintendent states, that on entering a schoolhouse, he was met by such a volume of vitiated air that he had to retire and desist from examining the school. In such a heated and poisonous atmosphere, how is it possible that a teacher can teach or pupils learn? The school-house becomes the hotbed of disease, instead of being a healthy and agreeable place of instruction, and the pupils must dread and hate, rather than seek and love it. Thus the greater part of the time of children is wasted, the teacher's labour thrown away, and an aversion to learning is begotten in the minds of youth, and all through the misguided economy and meanness of those who should provide proper school-house accommodation; for it appears from the local reports referred to, that this absence of the requisites of a good school does not arise from inability to provide comfortable school-houses, but from apathy and penuriousness on the part of Trustees and some of the wealthier of their constituents who do not send pupils to the school. If the national progress and welfare requires the property of the country to be liable for the education of the country—the vital principle of universal education—a competent and properly qualified school-house, as well as teacher must be provided for that purpose; and where the disposition to do this is wanting, the law should interfere for the protection of the many against the avarice and selfishness of the few. It is clear that the regulations which have recently been enforced with so much advantage in regard to Grammar School accommodation, must be applied, for much stronger reasons, to Common School accommodation,—namely, that no school shall be entitled to share in the School Fund unless proper accommodation (defined in the Regulations) be provided for all the pupils, to the satisfaction of the Local Inspector or Superintendent.

Eighth.—The Reports from Cities, Towns and Incorporated Villages.—While reports from the townships and counties show the expansion and progress of which the School system is susceptible wherever the people are deeply impressed with the duty and importance of educating their children, the reports from cities, towns and incorporated villages exhibit its adaptation to these, more densely populated and compact municipalities; previous reports show the salutary influence of the prize book system, and the successful introduction of Military drill in several instances. Among the reports for the past year I beg to refer specially to the reports of the Local Superintendents for the Cities of Toronto and Kingston, for the Towns of Brockville, Port Hope, and Sarnia, and for the Villages of Mitchell and Strathroy.

XXI.—MILITARY DRILL IN THE SCHOOLS.

What I said in my last Report on this subject may be repeated this year with renewed emphasis.

It is a well known maxim that "to be prepared for war is one of the most effectual means of preserving peace." The events of the last four years have drawn the attention of the Legislature and of the whole country to this important subject. Military exercises to some extent have formed a part of the Gymnastic instructions in the Normal and Model Schools; but during the last two years a Military Association has been formed among the teachers in training in the Normal School, and the Government has furnished them with the requisite arms on application, through Brigade-Major Denison, who has visited, inspected and encouraged them with his usual skill and energy. The Board of Common School

Trustees in the City of Toronto (as may be seen by referring to the Report of their Local Superintendent) have, with praiseworthy intelligence and public spirit, introduced a regular system of military drill among the senior male pupils of their schools. The Board of Trustees in Port Hope have done the same. The extracts from the Report of the Board of Trustees of the City of London, C. W., show the admirable measures adopted for introducing military drill among the pupils of their Central School, and the great success of it. The system of military drill can be introduced into the schools of all the cities, towns and villages in Upper Canada, and perhaps in some of the larger rural schools; and the military training of teachers in the Normal School, together with the large number of persons who are being taught and certificated in the Government Military Schools, afford great facilities for making military drill a part of the instruction given in the Grammar and Common Schools referred to.

In the neighbouring States, this subject is engaging the anxious attention of the Government and Legislatures; and military drill is likely to become a part of the system of education in all the public schools of their cities and towns. The Legislature of Massachusetts, at its last session, passed a resolution directing the State Board of Education "to take into consideration the subject of introducing an organization of scholars, about the age of twelve years, for the purpose of military drill and discipline." The Board appointed a Committee (of which the Governor of the State was Chairman) to investigate the subject, and to inquire into the result of an experiment which has been tried for two or three years in one of the towns of the State—the town of Brookline. The result of the inquiry is thus stated: "The boys in the older class can already be selected from their playmates *by the improvement of their forms*. Habits of prompt, instant, and unconditional obedience are also more successfully inculcated by this system of instruction than by any other with which we are acquainted. A perfect knowledge of the duties of a soldier can be taught to the boys during the time of their attendance at the schools, thus obviating the necessity of this acquisition after the time the pupil has become more valuable. A proper system of military instruction in the schools of our commonwealth would furnish us with the most perfect militia in the world; and we have little doubt that the good sense of the people will soon arrange such a system in all the schools of the State."

The Committee adds the following remarks, which are as applicable to Upper Canada as they are to Massachusetts:—

"The public schools are maintained at the public expense, in order to prepare youth for the duties of citizenship. One of these duties is to aid in the defence of the Government whenever and however assailed. Surely, then, there can be no incongruity, no want of reason, in introducing into the schools such studies and modes of discipline as shall prepare them for the discharge of this, equally with other duties which the citizen owes to the State.

"But can this be done without detriment to progress in other branches? Can it be done without loss of time? The committee is satisfied that it can, and that thereby a large amount of practical knowledge and discipline in military affairs may be attained; and, at the same time, a very great saving of time and labour be effected which, under a system of adult training, would be withdrawn from the productive industry of the country."

XXII.—REPORT OF THE INSPECTOR OF GRAMMAR SCHOOLS.

The Report of the Reverend G. P. Young, the able and indefatigable Inspector of Grammar Schools, is a document so important and so exhaustive in regard to the present state of the Grammar Schools—their defects, and the obstacles to their efficiency and progress—that, instead of inserting and referring to it in the Appendix, I deem it my duty to insert it in this place, and to solicit the attention of the Members of the Legislature and of all friends of sound education to Mr. Young's profound and practical observations, in which he has gone to the very root of the evils connected with the operations of the Grammar Schools, and analyzed and elucidated in a masterly manner what has been stated by every previous Inspector as to the evils of Union Grammar and Common Schools as now regulated, and the disadvantages and unadvisableness of the intermingling of large boys and girls in those schools.

I think it needless for me to add anything in this place to what I have said in Section

VII., and what the Inspector has so well and so forcibly said in regard to the Grammar Schools; though it will be my duty to consider carefully what can be done to give effect to the suggestions which he has made for their improvement.

The Report is as follows :—

REPORT AND SUGGESTIONS WITH RESPECT TO THE COUNTY GRAMMAR SCHOOLS
OF UPPER CANADA, FOR THE YEAR 1866.

By the Reverend GEORGE PAXTON YOUNG, M.A., Inspector.

SIR.—During the year 1866, all the Grammar Schools in Upper Canada, with a very few exceptions, were twice visited by me, in the discharge of my duties as Inspector. Detailed reports, showing the state in which I found the several schools, have already been placed in your hands; and I have now the honor to submit a few remarks on some of the general features of the Grammar School System, suggested by what has fallen under my observation since I addressed you last year.

A.—*The Grammar School Law, and Regulations of the Council of Public Instruction.*

As I shall have occasion, in this report, to trace the operation of the existing Grammar School Law, and of the regulations of the Council of Public Instruction, it may be well, at the outset, to state succinctly those provisions of the law, and those regulations of the Council, to which I am to refer.

1. By a regulation of the Council, boys in the Grammar Schools, with an exception so slight that it need not be considered, are required to study Latin or Greek; but girls may be admitted to the Grammar Schools, to study French and the English branches, without taking classics.

2. The 7th section of the Amended Grammar School Act provides as follows:—"The apportionment of the Grammar School Fund, payable half yearly to the Grammar Schools, shall be made to each school conducted according to law, upon the basis of the daily average attendance at such Grammar School of pupils in the programme of studies prescribed according to law for Grammar Schools; such attendance shall be certified by the Head Master and Trustees, and verified by the Inspector of Grammar Schools." Girls, pursuing the prescribed course of classical study, are taken into account in the apportionment of the Grammar School Fund; though, as appears from the *Journal of Education* for May, 1866, only fifty per cent. of the average attendance of girls for 1866 is to be reckoned in making the apportionment for 1867, while the full attendance of boys is reckoned. The attendance of those girls who study merely French and English, is not counted in the apportionment of the public money.

3. An important clause, which I may term *the one-half clause*, in the amended Act, made it a condition of the apportionment being paid to any school, that a sum equal, at least, to half of the apportionment, shall be provided from local sources, exclusive of fees, for the salaries of teachers.

4. By the Grammar School law, still unrepealed, the Board of Common School Trustees may unite with the Grammar School Board; and the joint Board has the power of raising money, by rate, for Grammar School as well as Common School purposes; though the Grammar School Board alone has no power to levy a rate.

B.—*Direction in which the Grammar Schools are drifting.*

Let me now respectfully call your attention to the way in which these provisions of the law and regulations of the Council of Public Instruction, are working, in conjunction with other causes, to impress a very peculiar character on our Grammar Schools. I say a "very peculiar character." There is nothing like it, as far as I am aware, in the Educational Institutions of any other country; and my impression is that, if the tide which has set in continues to flow as it has been doing for some time past, the interests of sound education in the Province of Ontario will be seriously affected. Three great tendencies, distinct from one another, yet closely connected, are developing themselves.

1. *First Tendency.*—The first is, a tendency in favour of Union Schools. This is a natural consequence of the one-half clause, which requires that a sum equal, at least, to

half the Grammar School apportionment, shall be provided from local sources, for the salaries of teachers. I presume that the object of this clause was, not only to augment the salaries of good teachers, but also to secure that Grammar Schools should not be recklessly established, or, if established, should not continue to be maintained, in localities where they are not needed, and where therefore the rate-payers are not likely to be eager to tax themselves for such institutions. But, if the latter of these objects was contemplated by the framer of the Act, he appears to have overlooked an escape from check (to speak in the language of the game of chess) which was open to schools of the class against which his attack was directed. Not a few schools, to which the one-half clause would have inevitably given the finishing stroke, have been enabled to avoid checkmate, by their union with the Common Schools; for, as has been stated above, while a Grammar School Board cannot impose a rate for Grammar School purposes, a united Common and Grammar School Board has power to do so. As the union of the Common with the Grammar School is thus the means, in many cases, of enabling the latter to obtain the local contributions, without which it could not exist, and which, if it stood alone it would ask in vain, it is not surprising that the tendency should be for Union Schools to increase rather than to diminish in number.

2. *Second Tendency.*—The second tendency which is developing itself in our Grammar Schools is a result of the first, taken in connection with the statute which requires that the semi-annual apportionment of the Grammar School Fund shall be made on the basis of the average attendance of pupils in the programme of studies prescribed according to law. It may be described as a tendency in Union Schools, for all the pupils, except those in the most rudimentary stages of English, to be drawn into the Grammar School department. Pupils seeking admission to a Grammar School which has not the Common School united to it, will ordinarily be those whose parents really desire them to pursue a Grammar School course of study. But, where the schools are united, the case is frequently very different. In not a few such Schools, all the pupils in the Common School department, boys and girls alike, are, as soon as they have got the merest smattering of English grammar, driven like sheep into the Grammar School, and put into Latin in order to swell the roll of Grammar School pupils, and to entitle the school to a larger share of the Grammar School Fund. I may be told that Grammar School Masters and Trustees have no power to compel children to leave the Common School and enter the Grammar School. This is true. But it is also true that, as a matter of fact, there are many schools in which things take place exactly as I have described. Every child in the Common School department, boy or girl, who is supposed to have any chance of wriggling through the meshes of the Inspector's examining net, is transferred to the Grammar School, and enrolled as a classical pupil. I take it for granted that the parents do not object. The children themselves, of course, obey orders.

This feature of the Union School system—the tendency, namely, for all the pupils, male or female, except those who are in the merest elements of English, to be sucked into the vortex of the Grammar School department—is of so grave a character, that I think it right to give an example, for the purpose of enabling you more thoroughly to realize the form which our educational institutions are assuming. I visited the Grammar School at St. Mary's about the end of September, 1866. After I had examined for entrance those pupils whose names were on the Grammar School roll, but who had not been previously passed by the Inspector, I was informed that an additional class, containing the most advanced pupils in the Common School, to the number of above 20, was prepared for entering the Grammar School. I proceeded to examine them as the law requires. They were asked to parse the sentence: "I always do my work well." The following are specimens of their answers:—*First boy*: "I" third person singular, nominative to "always." "Always," a noun. On second trial: "always," an adjective. And so on. *Second boy*: "I" third person singular, nominative to "always." "Always," a regular transitive verb. And so on. These two young gentlemen were not a whit worse than their companions; and the result was, that I was obliged to reject the entire class. Now, I find no fault with the teaching in the Common School department of the St. Mary's Union School. If I am not mistaken, the teacher who was at the head of that department at the time of my visit, holds a first-class certificate from the Normal School; and, as far as I can judge from the slight intercourse which I had with him, I think it likely that he is really a

superior teacher. He had not been long in St. Mary's, when my visit was paid to the school. I am blaming nobody. I am only anxious to assist you to realize the fact, that, under the influence of the causes which have been described above, the Common School department, in a large number of the Union schools, is reduced to a low condition, all the pupils, who are far enough advanced to be able to parse an easy English sentence, being systematically drained out into the Grammar School. I give St. Mary's, as it was in September, 1866, as an illustration of this.

3.—*Third Tendency.*—The third great tendency which is developing itself in our Grammar Schools has been partly indicated already, and is seen in the influx of girls into the Grammar Schools, connected with the circumstance that a large and increasing proportion of such pupils take the classical course of study. It is in the Union Schools chiefly that girls abound; the drafting process so extensively practised in these schools being, for the most part, applied without distinction of sex. While I do not for a moment question the sincerity of those masters—some of them men of high character and generally sound judgment—who contend that a classical course of study is desirable for girls as well as for boys, it would be mere affectation for any one to profess to doubt, that the new-born rage for Latin, among the female pupils of our Grammar Schools, is intimately associated with the regulation of the Council of Public Instruction, which provides that those girls who study French and the English subjects in the Grammar School programme for boys, without Latin, shall not be taken into account in the apportionment of the Grammar School Fund. The following table, compiled in the Education office, from the semi-annual returns made by the Grammar School Masters and Trustees, shows the daily average attendance, for 1866, of boys and girls respectively, in classics, for twenty schools, in all of which, except four, it will be observed that the average attendance of girls studying Latin is in excess of that of boys. The only schools in the list which are not Union Schools are Kemptville and Stirling:—

	Boys.	Girls.		Boys.	Girls.
Bath - - -	1½	10½	Norwood - - -	13	17
Beamsville - - -	6½	8	Oshawa - - -	26½	28
Cayuga - - -	4½	6	Perth - - -	19	36
Farmersville - - -	7½	9	Port Rowan - - -	5	8
Iroquois - - -	18	16½	Scotland - - -	5	5½
Gananoque - - -	9	21	Stirling - - -	8	8
Metcalf - - -	7	8½	Strathroy - - -	8½	6
Morrisburgh - - -	8½	11½	Uxbridge - - -	7½	11
Mount Pleasant - - -	8	10	Whitby - - -	23	37½
Newcastle - - -	8	7½	Kemptville - - -	5½	7

4.—*Summary.*—In the sketch given above, of the tendencies which are moulding the form of our Grammar Schools, I have avoided, as far as possible, expressing an opinion on particular points. It seems to me important to keep facts, which are indisputable, apart from inferences which may be disputed. My aim, therefore, has been, in what has been said thus far, to lay before you a simple historical statement, which may serve as a basis for discussion. I shall be expected now to bring forward the principal reasons which lead me to regard the tendencies that have been shown to exist as very unfortunate. This I shall do; only first let me give a brief summary of the facts which have to be considered. The number of the Union Schools is increasing, and is likely to increase. In many of the schools of this class, all the Common School pupils, boys and girls alike, who have obtained a smattering of English Grammar, are systematically drafted into the Grammar School. The consequence is that, in localities where such a system is followed, there is no mere Common School education (observe, I say *mere* Common School education) given to any pupils, boys or girls, which is not of the most elementary description; and, not only have the Grammar Schools thus become, to a great extent, girls' schools as well as boys' schools, but—what is especially note-worthy—the girls admitted to these schools are, in a majority of instances, put into Latin as a matter of course; in other words, the study of Latin is made practically a condition of their admission into the Grammar School.

C.—Degradation of the Common Schools:—The possibility of obtaining a good English education made virtually conditional on the study of Latin.

1. Will any man say that this state of things is satisfactory—a state of things in which the Common Schools are degraded, by being suspended from the exercise of all their higher functions? Unless I misunderstand the object of the Common School law, the Common Schools are designed to furnish a good English and general education to those desiring it. But how can this end be accomplished, where the Common Schools are subject to arrangements, under which the highest stage of advancement ever reached by the pupils is to be able to parse an easy English sentence? I have pointed out that in many of the Union Schools, the machinery of the union is managed in such a way as systematically to empty the Common Schools of all moderately advanced pupils, male and female, and therefore to leave only very elementary work to be done by the Common Schools. If, in an important and flourishing place like St. Mary's, the highest class of boys in the Common School department of the Union School, were, in September last, utterly unable to parse the sentence, "I always do my work well," it may be imagined what the state of things is in ruder localities. Is this an example of the good English and general education which the Legislature desired, through means of the Common School System, to place within reach of all the children of the Province?

2. It may perhaps be said that though, in cases like that referred to, nothing but the most meagre English education is furnished in the Common School department of our Union Schools, the defect is remedied by the instruction given in the Grammar School department, into which the pupils are drafted from the Common School. Mark, if you please, what this involves. All the boys entering the Grammar School, with an exception so slight as not to be worthy of consideration, must study Latin. As a matter of fact, in the majority of the Union Schools, the study of Latin in the Grammar School department, though not legally, is yet virtually, made imperative on girls also. If not literally compelled to take Latin, they are put into it, and they accept the arrangement. Only "moral suasion," as an excellent teacher explained to me—not, I think, without some veiled humour—is employed to induce them to take Latin, "*that being sufficient.*" The plea, therefore, that the degradation of the Common School department, in many of the Union Schools, is counterbalanced or relieved by the facilities afforded in the Grammar School department, amounts to this, that the possibility of a decent English education being obtained by our Canadian children may properly be made conditional on their studying or professing to study Latin. Such an idea, when nakedly put, must be felt to be monstrous.

3. There are two aspects in which the Common Schools may be regarded. They may be considered either as having a complete and independent work of their own to perform, namely, to impart a good English education to those desiring it, or as stepping stones to something further—institutions designed to prepare pupils for the Grammar Schools.

It will not be denied, I suppose, that the former of these offices is incomparably the more important of the two. Yet, in Union Schools of the kind which I am criticising, this, the chief and proper business of the Common School, has wholly ceased to be performed, in so far as the upper parts of what may be called a fair Common School programme are concerned. I look upon this as an excessive evil. I have such a sense of the importance of maintaining a high standard of education in the Common Schools, that, rather than see them degraded—rather than see the goal, beyond which their most advanced pupils are not to pass, fixed at the point where an easy English sentence can be parsed,—I would be willing that all the Grammar Schools in the country should perish. I protest against making the Common Schools, in all above the most primary classes, mere hotbeds to force forward seedlings for the classical field.

D.—False show of Classical Study in the Grammar Schools.

If the current, under which the Grammar Schools are at present drifting, operates, in so many cases, to the degradation of the Common Schools, how is its influence on the Grammar Schools themselves to be characterized? I am obliged to state, that it leads, in a painful degree, to a show of classical study, where the reality is wanting. Of course, I make no charge of wilful deception. All that I wish to indicate, is, the existence of a state of things which is not truly what it holds itself forth as being. There is a good deal of such false show in some Grammar Schools which have not Common Schools united to

them; and I do not know that the evil could be wholly prevented on any system; but, by the Union system, it is directly generated and fostered. In illustration of this, I lay before you some examples, selected from the history of the past two years.

1. In the latter part of October, 1865, I visited the Grammar School department of the Union School at Consecon. There were on the roll, for the current term, 18 pupils in Latin. Here, then, was what professed to be a classical school; but (as my volume of Reports for 1865 will show) the whole thing was a farce. There were two divisions in Latin; the senior, consisting of three boys, all of them in Sallust, and two of them reading Virgil also; and the junior, of thirteen pupils, were beginners. The representatives of the junior division, who were present, were children, whom it would have been judicious and kind to have left in the Common School. They had learned the Latin Grammar in a loose sort of way, as far as the verbs; but none of the girls in the class could tell me any of the terminations of the second declension; and the decidedly best boy did not succeed in going through *servus* without mistake. Of the three boys in the senior division, all of whom were present, one was examined in Sallust. The memorandum regarding him in my note-book is: "very bad; nothing could be worse." The two other boys were examined in Virgil. Their translation was inaccurate; their parsing bad; and the whole of their work unintelligently performed. The truth is, that there appears to be no field for a Grammar School at Consecon; and but for the Union of the Common and Grammar School Boards, I do not suppose that the establishment of anything else than a Common School would ever have been thought of.*

2. I visited the Grammar School department of the Union School at Cayuga, on the 30th May, 1865. There were 50 pupils on the roll for the current term; but 16 of these had left; so that, at the date of my visit, only 34 were actually in connection with the school. Of the thirty-four, twelve were professedly studying Latin. A sort of semi-classical character was supposed to be imparted to several of the others, by the circumstance that they were learning the Latin roots of English words. Of the twelve fully fledged Latinists, six were little children, who were struggling with the difficulties of the first declension. Of the six senior pupils, only two were present; a boy who was read Cæsar, and a boy in Arnold's first-book. Permit me to transcribe some remarks which I made regarding these pupils in my Reports for 1865. The boy in Arnold "had read nothing. He was as far on in the Grammar as Adjectives of the 3rd Declension. He could decline neither adjectives nor nouns." The boy in Cæsar "could make nothing whatever of the lesson for the day. The master opened up another, and the boy got through the translation of it with difficulty and imperfection. His Accidence and Syntax were utterly bad." It is plain from these details, that, in May, 1865, the Cayuga Grammar School, was merely an upper division of the Common School, with such a sprinkling of nominal Latin as was technically sufficient to enable it to draw a share of the Grammar School Fund.

3. Prior to the year 1866, the number of classical pupils in the Grammar School department of the Union School at Lindsay was small. I visited the school in January, 1866, and again in June of the same year. On the former occasion, there were twelve pupils in Latin (9 boys and 3 girls) on the roll; on the latter, fifteen (11 boys and 4 girls). These numbers are probably a fair exhibition of the *bonâ fide* demand for classical learning in Lindsay. You may judge, therefore, of my astonishment, when, on returning to the school in April, 1867, I found that the number of pupils on the roll—all of them studying classics—had sprung up to 58; 31 boys and 27 girls. What was the process by which this remarkable "Revival of Letters" had been brought about? A new master was appointed in the beginning of the year 1867. That gentleman, who possesses not a few of the qualities of a good teacher, and who, in particular, is distinguished by zeal and energy, not relishing the sight of empty benches, paid a visit to the Common School, and transferred a promiscuous crowd of children from the Common School to the Grammar School. In this way, his house was filled—if nothing else was accomplished. Of those on the roll, I was obliged to reject a considerable proportion as unqualified to pass the entrance examination. In Latin, none of the pupils on the roll were further advanced than Harkness' Arnold, except two boys. As the mass of the pupils had been only a

* The Grammar School at Consecon, is now extinct.

short time in the Grammar School, their Latinity was, as might be expected, of a very infantile description. But it is really a serious question: what proportion of a mixed multitude, gathered into a Grammar School in the manner described, will ever become classical scholars, in any proper sense of that expression? I do not profess to look with much horror on the operation performed by the Grammar School master at Lindsay, though certainly it is not one of which I approve. Even Grammar School masters are but men; and if you make it a person's interest, or the interest of the institution with which he is connected, to pursue a certain course, which may not be the best, and then ask me to sit on the jury that is to try him for taking that course, I say: Not guilty.

4. When Dr. Crowle, a more than usually accomplished teacher, to whose general merits I bear willing testimony, ascended the throne, as Grammar School master and Principal of the Union School at Bowmanville, the Grammar School was in a languishing state. Plato, in one of those occasional myths which contribute to the charm of his dialogues, tells us that Plenty was the son of Poverty and Planning. Poverty, once upon a time, went, cold, hungry, and in rags, to a feast of the Gods, to see what she could pick up. There, while lingering on the outside of the banquetting hall, she fell in with Planning, who made her his wife, and of their union Plenty was the fruit. Dr. Crowle, perhaps remembering Plato, and looking wistfully to the Grammar School Fund—that feast of the Gods, in the estimation of starveling Grammar Schools—appears to have followed out, though not in the same wholesale manner, something of the “plan” which I have mentioned as having been adopted in the Lindsay School. In October, 1864, the number of classical pupils on the roll, for the current term, was only 12. In June, 1865, after Dr. Crowle's appointment, it had risen to 29; and, when I visited the school in March, 1866, at which time the statute providing for the apportionment of the Grammar School Fund on the basis of attendance had come into operation, it had sprung up, by one great bound, to 60. Of those on the roll at the last-mentioned date, I was obliged to reject a considerable proportion as unqualified to pass the entrance examination; and the following quotation from my volume of Reports for 1866 will show the light in which the policy that had been pursued, appeared to me at the time:—“The number of classical pupils is very great. I told Dr. Crowle that I was strongly of opinion that a large number of those studying Latin, both boys and girls, ought not to have been put into Latin. I am convinced that the pecuniary interests of the school have been consulted at the expense of the real profit of the pupils.” If I am not mistaken, Dr. Crowle himself would now admit that the view taken in my Report was correct.

These may serve as illustrations of the manner in which, through the union of the Common and Grammar School Boards, pupils are unnaturally forced into the Grammar Schools and induced to learn Latin, without any consideration of their fitness for the study, or of the suitability of the study for them: a state of things under which it is inevitable that a large amount of the classical work held forth as going on in the Grammar Schools must be a miserable false show.

E.—*Apportionment of the Grammar School Fund.*

The evils which have manifested themselves in the Grammar Schools, while resulting in part from the statute authorizing the formation of United Common and Grammar School Boards, are due, also, in some measure, to the clause in the amended Act which determines the principle on which the Grammar School Fund is to be apportioned, and to the regulations of the Council of Public Instruction on the same subject.

1. The law provides, generally, that the Fund shall be apportioned on the basis of daily average attendance. In making up the daily average for the several schools, account has hitherto been taken, under a special regulation of the Council, of the attendance of girls studying Latin, but not of those studying French and the English branches merely. This has the twofold disadvantage of being inequitable, and of affording encouragement to a course of study which is not the most suitable for girls. In illustration of the manner in which the regulation works, let me compare the Oshawa and Whitby schools with that at Port Hope. In the Oshawa school, when I visited it on the 16th of May last, I found on the roll 78 classical pupils, of whom 38 were boys, and 40 girls. In Whitby, on the 15th of May, there were 80 classical pupils on the roll. I did not note down the number of girls among these; but the proportion of girls to boys was, at least, as great as in Oshawa.

In Port Hope, which I visited on the 1st of March, there were on the roll 42 classical pupils, of whom 38 (exactly the same number as in Oshawa) were boys. If, therefore, the attendance of boys alone were reckoned, the three schools mentioned would be entitled, for 1868, to about equal grants from the Grammar School Fund. But, if the attendance of girls studying classics be taken into account, the grant to Port Hope will fall greatly below the grants to the other two schools. This is not equitable. It may, perhaps, be said, ought not the Whitby and Oshawa schools to be remunerated for the education of girls as well as for that of boys? I answer, certainly; but girls are educated in the Port Hope school, too. All of these schools are Union Schools; and in each of them there is a large number of girls qualified, as far as age and ability, to pass the preliminary examination are concerned, to enter the Grammar School Division. The difference is simply this: that, in Whitby and Oshawa, the influences to which the girls are subjected induce them to pursue a course of classical study; while, in Port Hope, the influences to which they are subjected induce them to take a non-classical course. The question, therefore, is not whether Grammar Schools should be remunerated for the education of girls; but whether they should be remunerated for the instruction of girls in Latin, and not remunerated for instructing them in French and English. In my opinion, a non-classical course is the most suitable for the generality of girls; and, therefore, I look upon the Port Hope school as suffering, in a pecuniary point of view, for doing what is right.

2. Another objection to the present plan of making the apportionment, is, that in many instances, it puts serious obstacles in the way of the efficiency of the Grammar Schools. I have shown, by the examples of the schools at Consecon, Cayuga, Lindsay and Bowmanville, how the natural desire of Grammar School masters and Trustees to secure an ample share of the Grammar School Fund has the effect, particularly where the Common and Grammar School Boards are united, of forcing into Grammar Schools multitudes of boys and girls, who rank as classical pupils, but from whom nothing more than a nominal study of Latin can be expected. Where the movements of a school are clogged by the presence of such materials, its efficiency must necessarily be greatly impaired. They not only get little good themselves, but, like weeds in the field, they hinder others from getting good.

3. It seems plain, therefore, that, in the distribution of the Fund, the attendance of girls studying Latin ought not to be more highly estimated than the attendance of those who study French and the English branches merely. The recognition of this principle would remove the objection, on the score of equity, which attaches to the present system, and would also deliver girls from the undue pressure—or, let us say, “moral suasion”—which is at present so generally exercised to induce them to take Latin. While they would be at liberty to take Latin if they chose; neither Trustees nor masters would have any end to serve, by driving them into a line of study for which they have no inclination, and on which it is commonly a mere waste of time for them to enter.

4. Here of course, it will be urged that equity knows no distinction of sex; and that, if the attendance of girls who do not study Latin, is entitled to rank on a par with that of girls who do, the attendance of girls, whether belonging to the one class or the other, should be reckoned as of equal value with that of boys; and, therefore, that the Fund should be distributed in strict proportion to daily average attendance, whether the pupils in attendance be male or female. This plan has the merit of being simple; and it carries such an appearance of justice, that persons unacquainted with the elements that constitute the real difficulty of the problem under consideration will be ready to look upon it with favour. But I believe that, if adopted, it would lead to grievous abuses. Under the regulation of the Council, which admits girls to the Grammar Schools for the study of French without Latin, floods of little girls would be poured into those Grammar Schools which are least worthy of support; Green's Ollendorf would be put into their hands; and they would be reported as pupils in French.

5. A return to the old method, of first distributing the Fund among the different counties in proportion to population, and then dividing the sum falling to the share of a particular county among the Grammar Schools in the county, is not, in my opinion, to be thought of. Such a plan would leave wholly untouched the inducements which at present exist, for the introduction of unsuitable pupils into the Grammar Schools. Besides, it seems unreasonable, that if two counties, M and N, have the same population, but M has three Grammar Schools, and N only one, the single school in N should get thrice as great

a revenue from public sources as any of the others, while perhaps it is far behind them, both in attendance and general character.

6. I have come to the conclusion, after having devoted much thought to the subject, that, until *educational results* are combined with *attendance* as the basis of apportionment, it will be impossible to devise any scheme of distribution, that shall not be open to grave objections. More than a year ago, you asked me to consider whether results might not in some way be reached with sufficient accuracy to be taken into account, to a certain extent, in deciding the grants to be made to the several schools. I stated to you my conviction that it could not be done, with the present provision for the inspection of Grammar Schools. But I feel no doubt that, if the Provincial Legislature were willing to make an additional annual grant of one thousand or eleven hundred pounds for Grammar School inspection, or if such a sum could properly be deducted from the Grammar School Fund, a system of inspection could be organized, that would make the blood flow in a new style through every limb of the Grammar School body, from Windsor to L'Orignal, and from Owen Sound to Port Rowan, and which, at the same time, while leaving several perplexing questions to be settled on their own merits, would render a just and right apportionment of the Grammar School Fund possible.

F.—*Proposed new System of Inspection.*

1. In round numbers, there are one hundred Grammar Schools in the Province of Ontario. These might be divided into three groups, having London, Toronto, and Ottawa, respectively, as their centres, and each group put under the charge of an Inspector. The services of three District Inspectors would thus be required.

2. Each of the District Inspectors would visit all the schools in his group thrice or (if that should be found impossible) twice a year; and, at each visit, he would make a thorough individual examination of the pupils present; the examination being conducted (where the nature of the subject and other considerations permitted) in writing. The Inspector would prepare a statement, according to a prescribed form, of the values of the answers received by him; and would, upon a conjunct view of the whole, determine the position of the school in what may be called the scale of educational merit.

3. A certain point should be fixed upon, as the zero point in the scale of educational merit; and no school, failing to obtain a position above the zero point, should be entitled to any allowance from the Grammar School Fund. This regulation would probably lead to the shutting up of several of the schools which have been established in localities where no real demand for Grammar School education exists; and a considerable saving of the public money might thus be effected.

4. The Fund at the disposal of the Chief Superintendent should be distributed among the schools which had a position assigned to them above the zero point; the apportionment proceeding, according to special regulations, on the two-fold basis, of the daily average attendance at the several schools, and of the place they had obtained in the educational scale.

5. An examination conducted by a Single Inspector, however high his character and qualifications might be, would be very liable to question or suspicion; especially where the principal part of the income of a school, perhaps the very existence of the school, depended on the Inspector's report. To prevent, therefore, perpetual jarrings, it seems indispensable that there should be some provision for guarding against the possibility of error or partiality on the Inspector's part, and satisfying reasonable public anxiety as to the correctness of his decisions. In University examinations, it is common for two Examiners to be associated together. This gives confidence in the verdicts rendered. An arrangement exactly in this form would not be possible, and, in some respects not desirable, in the case of our Grammar Schools. What I propose, therefore, is, that, besides the three District Inspectors, there should be a General or Principal Inspector, with whom the others should communicate, and to whom they should in a certain sense, be subordinate; he himself, of course, being responsible to the authority appointing him.

6. It would be the duty of the Principal Inspector to take a general management of the work of Grammar School Inspection, so as to secure that it should possess, as far as possible, a character of unity throughout the Province. He would advise with the District

Inspectors in regard to all details of their work, in which his counsel or co-operation could be of service.

He would receive from the District Inspectors their Reports, showing the places assigned to the various schools in the educational scale, together with the written papers on which these Reports were founded. He would examine, at his discretion, and as extensively as circumstances allowed, the written papers so received, and compare his own estimate of them with that of the District Inspectors; and in the event of any material difference between himself and a District Inspector, he would correspond with the District Inspector on the subject. In this way, a powerful and honorable stimulus would be furnished to the District Inspectors to a careful discharge of their duties, and perfect and universal confidence would be produced in the correctness of their classifications.

Such, in barest outline, is the plan that I would suggest for the Inspection of the Grammar Schools. It will be time enough to deal with minute details when there is a prospect of the proposal being favourably regarded by the Legislature, and of the necessary funds being obtained. The scheme may very probably be judged to be of too large a character for the Province of Ontario, in present circumstances; but our choice lies, I believe, between some such scheme on the one hand, and incurable disorder and chronic difficulties in the Grammar Schools on the other. On general grounds, a plan of the nature of that which I have proposed, would be desirable, altogether apart from special sources of trouble; for, as you do not need to be informed, no educational principle is either more evident in itself, or more thoroughly established by experience, than this,—that the efficiency of a system of schools cannot permanently be maintained—whatever other conditions of success be present—without regular and searching inspection; inspection, whose results are made public, and which is attended with financial consequences.

G.—*Union Schools.*

If the method of Inspection at present in force is to remain unchanged, and the apportionment of the Grammar School Fund is to continue to be made on the basis of attendance simply, it seems plain that an alteration in the law which authorizes the formation of Union Boards must be contemplated.

Where the Fund is apportioned on the basis of attendance simply, the temptation to manage the Union School machinery, so as unduly to swell the nominal attendance in the Grammar Schools, is so great that no class of men should be left exposed to it. The interests, therefore, of genuine Grammar School Education, and the interests—still more important—of advanced Common School education, agree in demanding that the law which provides that Common Schools may be united to Grammar Schools should undergo revision. In too many instances, a Common and a Grammar School, united to one another, are like Siamese twins, whose connection is inconsistent with the play of free, healthy, natural life in either. Of course, I do not mean that any change in the law regarding Union Schools should be made hastily, or without regard to existing arrangements. I would not separate the twins with a butcher's cleaver. Union Schools have established themselves so extensively throughout the Province, that a rude interference with them would convulse the whole Grammar School system. But, through wise legislation, the formation of Union Schools in future might be prevented, and influences might, perhaps, be brought into play which, in a gradual and easy manner, would lead to a dissolution of Unions at present existing.

With more complete arrangements for the inspection of the Grammar Schools—arrangements that would reach results, with sufficient accuracy to enable results to be used, in connection with attendance, as the basis of the apportionment of the Grammar School Fund, and that would render mere numerical strength, without attainments, of little account—the temptation to draft unsuitable pupils from the Common School into the Grammar School would be very much taken away. And thus also, the other great evil which has been shown to grow so frequently out of the Union of the Common to the Grammar School, namely, the degradation of the Common School would be lessened; for, in proportion as the Grammar Schools restrained themselves from plundering the Common Schools, the instruction given in the Common Schools would become of a higher type.

H. *Girls in the Grammar Schools.*

In the sketch which I gave of the direction in which the Grammar Schools are drifting, I referred to the great influx of girls into the Grammar Schools. Out of 102 schools which were in operation during 1866, 85 were mixed schools, that is, schools open to both boys and girls; and in the mixed schools, taken as a whole, though girls have the option of studying French without Latin, the daily average attendance of girls studying Latin, was to that of boys in the proportion of about 5 to 12. This phenomenon will be admitted to be worthy of attention.

In my Report for 1865, referring to the co-education of the sexes in the Grammar Schools, I stated, that, in schools conducted by teachers possessing weight of character, I had no reason to believe that the general moral tone of the pupils was injuriously affected by boys and girls being taught together. This is my opinion still. But, out of the hundred Grammar School Masters in the Province, some of them young and inexperienced, it is certain that individuals will here and there be found, who are destitute of the weight of character requisite for conducting a school in which girls of 15, 16, or 17 years of age, may be associated with boys of the same ages. For this, among other reasons, I cannot look upon the great influx of girls, that has recently taken place, into the Grammar Schools, as affording no ground for concern. I desire to treat this subject now, as I did last year, in the most temperate manner. I have not taken up the trumpet of the alarmist. An outcry, based on anything that I have witnessed, would be unwarrantable. In none of our mixed Grammar Schools did a single breach of decorum fall under my observation during the past year; and in many of them the appearance of the girls was very pleasing. But I must avow, nevertheless, that my feeling is in favour of the education of grown-up girls apart from never-up boys, wherever that is practicable. The risk of moral injury resulting in carelessly conducted schools, from the co-education of the sexes, though it may be easily exaggerated, is an element that cannot be neglected. Schools, it may be said, ought not to be carelessly conducted. True. But *what ought to be* and *what is*, are different things. We live in a world, where, if we expect always to find things as they ought to be, we are likely to be disappointed. It is not so much, however, any gross and palpable departure from the ordinary moralities, that is to be feared in mixed schools, as the loss of the higher moral refinements. I can hardly describe what I wish to indicate; but every one will understand it, who has been accustomed to associate with cultivated women:—an ever present delicacy, married to an intelligence which at once strengthens it and liberates it from constraint. That the atmosphere of the generality of our mixed Grammar Schools is favourable to the growth of this, the flower of all female accomplishments, I do not believe.

As it is principally in the United States that the experiment of co-education has been tried, I was anxious before giving in this Report, to examine all the more important testimonies that have been published, in regard to the working of the co-educational system there. I have not been able, however, up to this time, to obtain a sufficient amount of exact information, to warrant me in thinking that a summary of the documents which I have consulted would be of any material value. I shall therefore merely refer to three distinguished witnesses. A weighty authority on the side of the mixed schools of the United States, is De Tocqueville, member of the French Institute, and author of the well known work on "Democracy in America." On the other side we have the Rev. James Fraser, who was deputed by Her Majesty's Commissioners of Education, to inquire into the Common School system of the United States and of the Provinces of Upper and Lower Canada, and whose Report to the Commissioners has recently been published. Mr. Fraser says: "There is one point, however, directly connected with the American School System and their general theory of education, of the effects of which I entertain great doubts. I refer to the effects on the formation of individual character, and the general social influences of mixed schools, and particularly of the theory and practice adopted in America on the subject of the education of girls." Probably the most eminent name in the United States, which has been brought forward on the side of the co-education of the sexes, is that of the late Horace Mann. From an examination of some of his works, I am not disposed to attach much importance to his opinion. He is no doubt an eloquent writer. I am aware that he is very generally regarded as an authority on educational subjects. His

views on education, are, in many instances, both admirable and well-expressed, but what I have read of his writings has not impressed me with the conviction, that he had the disciplined, unprejudiced, sober mind, necessary for dealing with a question like that of the co-education of the sexes.* On the whole, with my present light, I put faith in Mr. Fraser.

Considerable alarm has been created in various quarters by official documents, from which it has been inferred that the Grammar Schools may possibly be shut against girls; and I have been urged to bring under your notice certain reasons why such a course should not be adopted. It is alleged that the Common Schools are, in many parts of the country, over-crowded; that the teachers in such schools being frequently engaged (or "hired," as the elegant expression is) from considerations of economy rather than fitness, are incompetent to give their pupils a good English education; that, even if they were competent, they would be unable, from the large number of young children whom they have to teach, to pay proper attention to the more advanced pupils; and therefore, that, if girls were denied admission to the Grammar Schools, parents, particularly in the rural districts, who were anxious to give a good education to their daughters as well as to their sons, would have no means of gratifying this natural and laudable desire. These considerations seem to merit attention. I doubt whether in existing circumstances, girls could obtain, anywhere else than in the Grammar Schools, the education which the highest interests of society render it important that they should receive. While my own feeling is, that it would be better for them to pasture, if they had the opportunity, in separate Academic fields, I would not, while they are without such opportunity, debar them from sharing the pasture of the boys. Only—the yoke imposed by circumstances should be accepted as something to be thrown off at the earliest opportunity. In all things, it is beneficial to keep a true ideal in view. Though we may not be able to realize it at once, the time may come, and perhaps come soon, when we shall be able to do so. The thought and expectation in the minds of enlightened men, of an improvement at present out of reach, hastens its advent.

I have the strongest possible impression, that the study of Latin by the great majority of the girls, who are at present taking the classical course in our Grammar Schools, is a waste of time. I have the same impression in regard to a large number of Grammar School boys. I am not prepared, however, to suggest any alteration in the programme of Grammar School studies. It would be useless for me to attempt anything in that direction, until I had some idea whether there was a likelihood of a new system of inspection being adopted. The introduction of a scheme of inspection such as I have sketched above, would almost necessarily be accompanied with a revision of the programme of study. Could we learn anything from the High Schools for English and the High Schools for Latin in the United States?

My apology for the unusual length, to which this report has extended, must be found in the importance of the matters which it discusses, and in the extraordinary features which the Grammar Schools are at present exhibiting.

XXIII.—CONCLUDING REMARKS.

1. In no preceding Report have I been able to present more gratifying facts of progress in the schools than in this Report; and especially in respect to the increased circulation of useful and entertaining books as prizes for encouraging and rewarding punctuality, good conduct, diligence, and success of pupils in the schools; the increased means for supporting both Common and Grammar Schools; the commencement of what I think will

* The following passage, pointing out what the writer considers to be the natural consequences of the system of punishment prevailing in the Schools of Great Britain, is an instructive illustration of Mr. Mann's judgment, on points where prejudice and imagination have room to come into play.

The passage occurs, not in a fourth of July oration, where, to talk nonsense might be thought necessary, but in a calm discourse: "Is not the British nation celebrated, the world over, for the aggressive spirit of its policy, and with many beautiful exceptions, for the unamiable character of its people; and is it not in the schools of Great Britain that punishments are more frequent and severe than in any other part of Christendom? I know it is said that this severity in the discipline of children is accompanied by great hardihood of spirit, and by distinguished martial bravery in men.—Look into British factories and British mines and see by what else it is accompanied!"

prove an excellent system of meteorological observations, which has been established under the Grammar School Improvement Act of 1865, and the operations of that Act in improving the Grammar Schools under the efficient inspection of Mr. Young.

2. During the past and part of the present year, I have been permitted to make a fourth tour in foreign countries, to examine anew their systems of public instruction, with a view of still further improving our own, as far as possible. A summary and results of my observations and inquiries will form the subject of a Special Report; but I may here remark that the general conclusion at which I have arrived is, that little is required in the way of legislation to improve our public school system, the foundations and general principles of which ought to be maintained inviolate; while increased power, in some respects, may be advantageously given to Municipalities, the constitution of County Boards of Public Instruction may be simplified and improved; and provision should be made for the education of the Deaf and Dumb and Blind, as also some provision to secure the education of vagrant and neglected children.

I have the honour to be,
Your Excellency's
Most obedient, humble servant,

E. RYERSON.

^a Approximation.

^b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane.

^c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds.

REMARKS.

JANUARY.

Barrie.—The observer reports strong gales on 20th, 22nd, and 23rd, from W. The excessively low temperature is given as reported; the minimum thermometer will shortly be re-tested. The ordinary thermometer indicated 27°.3 at 7 a.m. same day. Observation omitted 12th, 13th.

Stratford.—The observer reports that the above reading of the Barometer (29.875) is the highest recorded at his station. 15th and 16th, storm of wind and snow, wind E, veering to S.W. Storm on 19th, 20th, 21st, and 22nd. 19th, mild and foggy till 11 p.m. when violent wind rose from W. 30th, 4 p.m., sudden storm of wind and snow for two hours from N.W. 1st, indistinct solar halo at 8.30 a.m. Fogs on 9th, 11th, 12th, 19th, 23rd, and 30th.

FEBRUARY.

Barrie.—Storms of wind on 4th and 13th; on the latter day a heavy and clearly defined mist over the Kempenfeldt Bay. The 4th was a wild and severe snowy day; wind W by N, very stormy, temp. -5. Same day in Toronto much milder, with gentle breeze and no snow. On 10th, heavy snow at night.

Belleville.—Frequent strong winds, particularly between 9 p.m. and 7 a.m.

Stratford.—Storms of wind and snow on the 1st, 2nd, 3rd, and 4th. Wind N W, W, and S W, lulled each evening and violent in morning. Very severe storm of wind and snow began on 14th, at 1.30 p.m. and continued, (except from 3.30 to 6.30 p.m. of 14th) till 5 p.m. of 15th. The maximum velocity observed at 8 p.m. of 14th.

NOTE ON AURORAS.

The following extract from the Instructions issued to the observers will explain the classification of Auroras in the monthly abstracts. The general directions referred to need not be reproduced here, but can be furnished to persons willing to co-operate in the work of observation:

"The classification of auroras to be employed (See Art. 13) is that adopted by the Smithsonian Institution, and which will be understood by the following remarks of Professor Olmsted, in the Smithsonian Contributions to Knowledge. The general directions in Art. 14, also used by the Smithsonian Institution, were principally adopted from those recommended by Captain Lefroy, when Director of the Toronto Observatory.

The Aurora Borealis presents itself under six different forms:

- 1. Auroral Twilight.**—A light in the north, resembling the dawn of day, and of various degrees of intensity.
 - 2. Arches.**—Arcs, or circles, or zones, formed at various altitudes, between NE and NW, being sometimes the mere boundary of a segment, at other times a dense pillar of light, forming a grand columnar arch, which spans the heavens from east to west. It frequently moves from north to south, usually advancing but little further than the zenith.
 - 3. Streamers.**—Acute cones or spindles, usually shooting up from an arch, or from a dark smoky cloud, which lies along the northern horizon or rises a few degrees above it.
 - 4. Corona.**—A circular zone around the pole of the dipping needle, formed of wreaths of auroral vapor, either of pure white or of various prismatic colors, with streamers radiating from the circumference.
 - 5. Waves.**—Undulations which commonly flow upwards, towards the centre of the corona, along the line of the streamers, but sometimes course along the line of an arch, from east to west.
 - 6. Auroral Clouds.**—A milky, vapory bank, in the north, the quantity and apparent depth of which afford a prognostic of the intensity of the approaching aurora. These clouds are sometimes of a smoky hue, especially in front, while the margins are luminous.
- Art. 13.—We shall find it convenient to distribute the different forms of aurora into four distinct classes.
- CLASS I.** This is characterized by the presence of at least three out of four of the most magnificent varieties of form, namely; arches, streamers, corona, and waves. The distinct formation of the corona is the most important characteristic of this class; yet, were the corona distinctly formed, without auroral arches or waves, or crimson vapor, it could not be considered as an aurora of the first class.
- CLASS II.** The combination of two or more of the leading characteristics of the first class, but wanting in others, would serve to mark the second. Thus the exhibition of arches and streamers, both of superior brilliancy, with a corona, while the waves and crimson columns were wanting, or of streamers with a corona, or of arches with a corona without streamers or columns (if such a case ever occurs) we should designate as an aurora of the second class.
- CLASS III.** The presence of only one of the more rare characteristics, either streamers or an arch, or irregular coronations, but without the formation of a corona, and with but a moderate degree of intensity, would denote an aurora of the third class.
- CLASS IV.** In this class we place the most ordinary form of the aurora, as a mere northern twilight, or a few streamers, with none of the characteristics that mark the grander exhibitions of the phenomenon."

TABLE K.—ABSTRACTS OF REPORTS OF DAILY METEOROLOGICAL OBSERVATIONS AT COUNTY GRAMMAR SCHOOLS IN UPPER CANADA, DURING 1863.—Continued.

OBSERVERS—*Barrie* (Lake Simcoe)—Rev. W. F. Checkley, B.A.; *Belleville* (Bay of Quinte, Lake Ontario)—A. Burdon, Esq.; *Cornwall* (River St. Lawrence)—Rev. H. W. Davies, B.D.; *Hamilton* (Lake Ontario)—A. Macallum, Esq., B.A.; *Simcoe* (near Lake Erie)—Rev. J. G. Mulholland, M.A.; *Stratford* (inland)—C. J. Macgregor, Esq., M.A.

a Approximation. b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. d If there are contrary motions of clouds, the higher current is here entered.

REMARKS.

BARRIE.—On 6th, brilliant Aurora, two distinct arches reaching respectively 30° and 15° elevation, with an interval of 10° between them. Very bright streamers shot up rapidly toward the zenith; the whole slightly tinged with prismatic colouring. Bright meteor passed through aurora at 9 20 p.m., moving S E. 14th, fog; 19th, the brightest point of aurora about 25° west of north; 20th, heavy hail storm, with lightning and thunder, began 10 p.m., lasting about two hours; great quantity of hail fell; stones not large.

BELLEVILLE.—20th, very heavy thunderstorm, lasting about two hours, from 11 p.m. to 1 a.m.; lightning very vivid; sleet falling fast during and after storm; depth of sleet and snow, 21st, 2½ inches.

CORNWALL.—3rd, Fog; 6th, Aurora particularly beautiful; 16th, tremendous storm of wind in the night for about two hours; snow storm set in from N W at 4 p.m. on 17th. The observer does not refer to a storm on the 20th. Crows were seen here 27th February. Observations omitted 26th to 31st.

HAMILTON.—3rd, Pigeons announced; 5th, Crows first seen; 15th, hail; 20th, during day some rain and hail, and about 11 p.m. violent storm of rain and hail with very vivid flashes of lightning and loud claps of thunder; 31st, return of the Robin (*Turdus Migratorius*) first observed.

SIMCOE.—15th, dense fog; 20th, thunder and lightning with hail or rain.

STRATFORD.—1st, Crows first seen and heard; 7th, 8th, 9th, storms of wind with blasts of snow; 16th and 17th, storms of wind and snow from W and NW; 17th, Parhelia visible at 5.50 p.m., also, on 25th, from 5.40 to 6.10 p.m.; 20th, violent storm of wind, snow, hail, rain, thunder and lightning; 25th, storm of snow and wind; 30th, lunar halo at 9 p.m.

^a Approximation. ^b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. ^c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. ^d Where the clouds have contrary motions, the higher current is entered here.

REMARKS.

BARRIE.—On 1st, frost; 5th, heavy fog in morning; 6th, thunder and lightning, 30 minutes; 12th, thunder and lightning in morning and at night; 13th, lightning at night, no thunder; 16th, thunderstorm and heavy rain; 21st, first appearance of fire-fly; 26th, thunderstorm, with violent wind, 4.30–5.30 p.m.

BELLEVILLE.—On 6th, thunder, lightning and rain, commencing at 1 p.m. 13th, thunder for a few minutes about 8 p.m. with occasional flashes and few drops of rain, the wind for 40 hours previously was E, and for the next three days W and SW; 26th, severe thunder storm, with much forked lightning for two hours, at 6 p.m., passing from W or NW towards SE; afterwards the horizon illumined by sheet lightning; barometer 29.565 at 1 p.m.; 29.391 at 9 p.m.; 29.303 at 7 a.m. next day; but little rain or change of temperature during storm; frequent showers in the night, rain from 6 p.m. to 9 a.m., being .530 in. High winds from W and SW, from 20th to 26th. The month was showery and vegetation rapid; crops better than for many years.

CORNWALL.—On 7th, storm of thunder and wind. 13th, thunder, lightning and rain. 14th, storm of wind towards evening. 15th, lightning and rain, 16th, heavy rain with hail. 18th, lightning alone. 26th, severe storm of thunder, lightning, rain and hail, of short duration, hailstones very large. Month unusually rainy, and in many low lands the crops have been spoiled. Observations on 6th omitted.

HAMILTON.—Fogs on 4th, 5th, 11th. Storms of wind on 6th, 13th, 14th, 15th, 18th, 21st, 23rd, 25th. On 12th, lightning alone. 13th and 14th, lightning and thunder followed by rain. From 20th to 27th, excessive heat. 25th, thunder and rain storm. 26th, lightning alone. 27th, at 1.30 a.m., a meteor of ordinary size and brilliancy seen falling from zenith towards North. 29th, thunder, lightning and rain. The blossoming of the potato (*Solanum tuberosum*) first observed on 29th. The heat and moisture of the latter part of the month occasioned very rapid growth of plants.

PEMBROKE.—On 5th and 6th, fogs. 6th, lightning, thunder and rain; 16th, thunder and lightning. 21st, lightning alone. 25th, storm of wind. 26th, thunder, lightning and rain. 27th, thunder and rain or hail. 22nd, shooting star, altitude 70° NE. Vegetation rapid during month, yet two weeks late. Health generally good, crops not very promising.

PETERBOROUGH.—On 1st, hoar frost, last of season, the forest leaves only now fully out. 7th, acacias and other late trees only just out in full leaf. 9th, lightning and thunder at 5.30 a.m. 13th, lightning alone at NE horizon at 9 p.m. for 3h.10 min. 14th, lightning, thunder and rain at 3 a.m. 19th, indistinct lunar halo. 26th, thunder, wind and rain storm; about 5.30 p.m., dense cloud at NW horizon rose very slowly, wind S, cloud at 6.22 extended along horizon from SW to NE, the lower part being at a height of 25° and intensely black; at 6.30 sudden darkness and rain, with strong wind from W, continued till 7.12 p.m. with much thunder and lightning; at 7.30 splendid rainbow, double at southern end, with frequent forked lightning to southward.

SIMCOE.—On 1st, frost. 5th, fog; thunder, lightning and heavy rain at night. 8th, lightning alone. 12th, lightning during evening; thunderstorm with vivid lightning and heavy rain for two hours, began about 11 p.m. 15th, thunder, lightning and shower began at 9 p.m. 21st, thunder, lightning and rain. 25th, heavy storm of thunder, lightning and rain for about two hours, preceded by oppressive heat. 27th, thunder, lightning and rain. 29th, thunder, lightning and very heavy rain for three hours.

STRATFORD.—On 1st, frost. 5th, lightning and thunder with rain. 8th, lightning. 12th and 13th, lightning. 15th, thunder, lightning, hail and rain, from 8.30 to 9.10 p.m. 16th, thunder, lightning and rain. 17th, rain from 4.45 p.m.; high SE wind during night. 22nd, indistinct lunar halo at 9.30 p.m. 25th, thunder and lightning with few drops of rain at 1.35 to 3.20 p.m. 26th, at 7.45 a.m., thunder; at 4.20 p.m. thunder; at 9 p.m. lightning at horizon. 29th, lightning at South to West horizon. Average rain in June for four preceding years, was 2.6065 inches; rain in June 1866, 3.7162 inches; excess 1.1097 inches.

WINDSOR.—On 12th, 13th, 15th, and 30th, lightning alone. 21st, lightning, thunder and rain. 23rd, severest thunderstorm of the month, lightning struck a building within two miles of station. 25th, thunderstorm came up suddenly from SW with slight rain, and ended in heavy gale of wind, velocity 8, lasting 12.30 to 1 p.m. 26th, high wind, velocity 7 at 11.50 p.m. 27th, strange appearance of clouds in NW, at 7 p.m., and afterwards, changing from light blue to orange; high cirro-cumuli moving from SW, lower strati rapidly from NE. 30th, thunder cloud threatened to storm at 6.50 p.m., a few drops of rain fell; storm cloud passed from SW to NE; cloud is of NE beautiful orange tint; double rainbow observed in NE at 7.30 p.m.

a Approximation. b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. d Where the clouds have contrary motions, the higher current is entered here.

REMARKS.

BARRIE.—On 4th, lightning. 5th, lightning, thunder and rain. 7th, lightning and rain. 13th, lightning. 16th, thunder. 17th, lightning and thunder. Rain on 2nd, 4th, 5th, 7th, 8th, 17th, 18th, 21st, 22nd. Barometer very steady during month; on 10th, at 1 p.m., 29.340.

BELLEVILLE.—On 5th, thunder storm with lightning and rain at 1 a.m. 6th, thunderstorm with rain between 1 and 4 a.m. 8th, (Sunday) lightning, thunder and rain. 13th, lightning and thunder between 2 and 3 p.m. with gentle rain for 10 minutes. 16th, distant thunder in NW commenced about noon and continued till rain began at 2.30 p.m.; during following evening and night, much sheet lightning. 18th, heavy thunderstorm with very vivid chain lightning from about 10 a.m. to 2.30 p.m. 25th, occasional thunder from 2 to 3 p.m. with some rain and a little lightning; neither barometer nor thermometer apparently affected; the wind, previously from W, soon quite ceased. 28th, thunder from about 4 to 4.30 p.m., apparently approached from W; a little lightning; the wind, previously N, began to blow very gently from W after thunder commenced. Rain on 4th, 5th, 6th, 8th, 13th, 16th, 18th, 22nd, 23rd, 25th. Showers were generally gentle.

HAMILTON.—On 4th, at 8.45 p.m., wind being S, velocity 3, and clouds cumulo-nimbi, extent 6, lightning was observed in N; at 9 p.m. lightning and thunder in W; at 8.45 p.m. dense black cloud rose from W, and in 30 minutes covered seven-tenths of sky, the clear part being southward; at 9.05 p.m., the time between perception of flash and sound was 50 pulsations; at 9.15, 35 pulsations; at 9.20, drops of rain, wind being still S, velocity 3; at 9.30 p.m. wind had changed to W, velocity 2, and half the sky W and S was clear; northward, clouds very dark and chain lightning very vivid, pulsations 25; at 9.40 the cloud had passed towards NE, and while the play of the lightning among the lower clouds was incessant, the great flashes from the passing cloud were at intervals of 3 or 4 minutes, pulsations 45, wind still W, but velocity reduced to 1; at 9.45 clouds disappearing, flash still seen, thunder inaudible, no wind; at 9.55 p.m., cloud scarcely visible, and at 10 quite clear. On 12th, the observer being at Mount Pleasant, latitude about 43° 5 and longitude 80° 15, describes a brilliant and very peculiar appearance of the sky at sunset, 7.40 p.m.; on same evening at 9.30 observed an aurora in two distinct arches, the lower about 5° above horizon and 5° wide at the north point; extremities about 30° apart; the higher arch, about 20° high extended about 50°, and 10° wide; at first the higher arch was defective in NE, but complete in 15 minutes; at 10.10 p.m. appearance the same; at 10.30 higher arch had disappeared; the lower arch continued the same till 11 p.m. when it was last observed. On 13th, morning clear, very warm, wind SW, velocity 1; at 9.30 a.m., wind rose and cumuli appeared in SW; wind, heat and clouds increased; at 1 p.m., clouds more about horizon; at 2 p.m. cumuli moving fast, cirro-strati more distant and stationary; wind continued high in the afternoon; at 5 p.m. wind lessened to velocity 3, and at 6 p.m. had changed to S and fallen to 1; thunder now heard in N, dense cumuli in N at horizon; storm passed to N; 7 p.m., wind S, gentle breeze, very distant thunder in NNW; at 9.30 lightning and thunder passed to N; at 10 p.m. lightning still in NE. On 14th, heat, clouds wind and force much the same; also on 15th, till 4 p.m., when clouds more dense in SW; at 5 p.m. thunder in SW; at 5.30 p.m. lightning, thunder and rain for 30 minutes. 16th, very warm, wind and clouds as above; thunder at 4.40 p.m. followed by rain at 6.15 p.m. 17th, heat, clouds and wind much the same, at 5 p.m. dense and murky, lightning in SW, thunder and rain at 5.20 for 40 minutes, and showers in night. Rain on 2nd, 3rd, 4th, 5th, 7th, 8th, 13th, 14th, 16th, 17th, 18th, 19th, 21st, 25th, 28th, 31st. Storms of wind on 2nd, 3rd, 4th, 6th, 7th, 13th, 16th. Rainbow on 7th at 7.30 p.m. and on 16th at 7.30 p.m. Cherries (Oxhearts) ripe on 2nd; uncultivated cherries ripe on 18th. Chestnut trees in bloom on 19th. On 20th, Indian corn tassels appear; pumpkins and cucumbers in bloom.

PEMBROKE.—On 4th, thunder and rain. 6th, thunder and lightning. 12th, frequent sheet lightning at evening in the east. 16th, lightning. 17th, thunder and rain. 24th, lightning. 27th, lightning, thunder and rain. Rain on 2nd, 4th, 5th, 8th, 17th,

18th, 22nd, 27th, 31st. Storms of wind on 5th, 9th, 12th, 28th and 30th. Some very heavy rain storms occurred during the month in this vicinity. Crops generally good.

PETERBOROUGH.—On 4th, lightning. 5th, lightning; lightning and rain; thunder and rain. 8th, (Sunday) heavy rain in forenoon. 12th, faint aurora with sudden wind. 13th, brilliant and incessant lightning in bank of clouds at SW horizon. 14th, very faint aurora at 10.30 p.m. 15th, (Sunday) lightning. 16th, thunder, heavy thunder, lightning, rain and wind storm from W; silent lightning in the evening. 17th storm of thunder, lightning, wind and rain from W; much thunder and lightning during the day. 20th, heavy dew with fog. 21st, lightning. 22nd, (Sunday) thunder shower in afternoon. 24th, lightning. 28th, lightning, with thunder, wind and rain shower at 2.20 p.m. Rain on 2nd, 4th, 5th, 8th, 16th, 17th, 18th, 22nd, 23rd, 28th. Fogs, 20th, 24th, 26th. Solar halo on 19th, 20th and 31st. A few small shooting stars observed on the nights of the 15th, 25th and 30th.

STRATFORD.—On 3rd, rainbow at 7.40 p.m.; lightning in W at 8.30 p.m. 4th, imperfect rainbow at 6.15 p.m.; lightning in E at 8.30 p.m. 5th, forenoon very sultry and oppressive; about 11 a.m. dense nimbi appeared at horizon; but passed to NE and SE; about noon dense nim. again appeared in NW, and at 12.15 p.m. a few peals of thunder heard, accompanied with a few drops of rain, wind being SW, velocity 3; at 2 p.m., thunder heard in NW where dense nim. appeared stretching from W to NE, temperature of air, 79°; at 2.30 p.m., sky overcast with dark nimbi, low, moving from NW to SE rapidly; wind changed suddenly to NW and became very violent, velocity rising to 7, rain also began to fall and lightning was first observed; at 2.45 p.m. rain very heavy and thunder loud, lightning very vivid till 3 p.m.; at 3.20 p.m. wind W 2, temperature 68°; at 4 p.m. rain ceased, depth, .2673; lightning in W at 8.20 p.m. 7th, thunder at 7.30 a.m., 6 p.m., 11.15 p.m.; very heavy rain at 10.55 p.m., for 9 h. 20 min., depth 1.5349 in. 13th, lightning and thunder. 16th, warmest day for six years; thunder heard in W. 17th, at 2.20 p.m., thunder in S where dense nim., wind NW, velocity 1; 3.10 p.m. rain began; 3.20 p.m., wind SSE 3; 3.30 p.m. wind ESE 1; 3.35 p.m., lightning, thunder very heavy in NW; 3.45 p.m. wind ESE 1; nim. very low, moving slowly from W to E, rain very heavy from 3.40 p.m.; 4.08 p.m., dense nim. in NW moving to SE very rapidly, wind NE 3; 4.10 p.m. wind suddenly veered to W and NW and increased to 7, rain drifting through the air like snow; 4.12 p.m., wind N 7; 4.25 p.m., wind N 5, gentle rain; 4.30 p.m. wind NE 4; 5.30 p.m., wind S 2; 6 p.m., wind S 1, rain ceased, depth 1.0948 in: the changes of the wind during the storm were very remarkable, it having gone round the compass twice since 1 p.m., the direction of change (except 4.12 p.m.) being contrary to that of the hands of a watch. 22nd, (Sunday) at 3.30 p.m. thunder and lightning in NW; 3.50 p.m. rain; 4.05 p.m. wind W velocity 6, rain very heavy; 4.08 p.m. heavy rain and wind ceased; 5.40 p.m. rain ceased, depth, .5283 in.; this storm was very destructive in the adjoining counties of Wellington and Waterloo. 28th, thunder and lightning. 29th, thunder. Rain on 2nd, 3rd, 4th, 5th, 7th, 8th, 17th, 18th, 21st, 22nd. Fogs, 26th and 27th. Wind storms on 3rd, 5th, 17th, and 22nd.

WINDSOR.—On 3rd, thunder, lightning and rain. 7th, severe thunder, lightning and rain storm, reaching greatest height at 4 p.m., building struck by lightning at about 150 yards from observatory; no remarkable thermometric or barometric change observable; clouds came up rapidly from SW 8th. sudden change of wind from SE to NE 10th. sudden change of wind from NE to S. 11th, wind exceedingly variable, sudden change from S to NW 12th, Aurora at 10.30 p.m.; night exceedingly calm and clear; arch from NE to NW; at first neither waves nor streamers, but at a later hour slight waves to the NE; dark cloud forming low on N horizon, under the arch of Aurora. 13th, lightning; meteor from zenith to SW horizon. 17th, lightning, thunder and rain. Rain on 1st, 3rd, 4th, 17th, 18th, 27th.

α Approximation. δ Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. ϵ 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. δ Where the clouds have contrary motions, the higher current is entered here.

REMARKS.

BARRIE.—On 4th, meteors accompanying aurora. On 6th, lightning. Rain every day except 5th, 6th, 7th, 8th, 10th, 11th, 15th, 16th, 20th, 25th. Barometer very steady. Observation omitted at 9 p.m. on 25th.
BELLEVILLE.—On 29th, dense fog in morning, lasting some hours, and clearing off about 8 a.m. Rain on 1st, 3rd, 4th, 6th, 8th, 9th, 12th, 13th, 14th, 18th, 19th, 22nd, 24th, 27th, 30th.
HAMILTON.—On 12th, 13th, and morning of 14th, dense fog for about 60 hours; clouds began to break up about noon on 14th. On 13th, sunflowers in bloom. Gales of wind on 1st, 2nd, 6th, 27th. On 23rd, hail at 6 p.m. for a few minutes. 24th, at 10.30 a.m., hail or very fine snow for a few minutes. 31st, dense fog. Rain on 1st, 2nd, 3rd, 8th, 12th, 13th, 19th, 21st, 23rd, 26th, 30th, 31st. It is feared that maize, potatoes, plums, apples, and grapes, will not ripen well.
PEMBROKE.—On 14th, fog, lightning, thunder and rain. 16th, frost. There was frost two miles from Pembroke on the mornings of 15th, 16th, and 17th; that of the 17th injured the crops, and was so severe twenty miles up the Ottawa that a considerable crust was formed on the ground. Frost also occurred on the mornings of the 23rd and 25th, two miles from station. On 24th, rainbow at 6 p.m. 27th and 28th, lightning, thunder and rain. 30th, lightning. The aurora of the 31st occurred at 10 p.m., when a belt of light appeared extending from west to east horizon, passing the zenith, bright and as wide as a rainbow. An unusual number of shooting stars during the month; six seen on evening of 10th. Storms of wind on 1st, 3rd, 6th, 7th, 10th, and 22nd. Rain on 4th, 10th, 13th, 14th, 15th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 30th, 31st. Much grain damaged by the wet; the crops, however, are unusually good; wild fruit in superabundance. The atmosphere has been remarkably cool; health generally good. Wild pigeons numerous during latter part of month; a few sea-gulls and some cranes seen; partridge plenty.

PETERBOROUGH.—On 1st, lightning; frequent falling stars. 4th, falling stars. 6th, partial rainbows several times, from 4.45 till 6 p.m.; constant lightning at SE horizon, 9th, strong auroral twilight; frequent falling stars, two very brilliant, resembling rockets. 11th, auroral twilight; falling stars. 16th, falling stars. 19th, lightning. 20th, observed that swallows had left the town, but a few were seen about the back lakes on 31st. 21st, very perfect and bright rainbow at 6.30 p.m., double at north end. 22nd, very brilliant rainbow at 6.10 p.m., double from end to end, about 14° high, and extending from NNE to SE horizon. 23rd, very slight hoar frost, first of season. 26th (Sunday) halo round sun. 28th, lightning at NW horizon, at 8.16 p.m. 30th, auroral twilight. 31st, fog in morning; faint auroral twilight about 8 p.m. Rain every day except 5th, 6th, 7th, 19th, 11th, 15th, 16th, 17th, 29th, 31st.
SIMCOE.—Observations at this station not resumed till 14th August. On 17th an aurora of class IV was seen for a short time. 21st, lightning, thunder and rain at 9.30 p.m. 22nd, lightning, thunder and rain. 23rd, aurora, class IV. 24th, cold rain; hail about four miles hence. 25th, frost. 29th, aurora, class IV. Rain on 19th, 21st, 23rd, 24th, 26th, 30th.
STRATFORD.—On 3rd, lightning and rain. 12th, thunder and rain. 14th, perfect primary and imperfect secondary rainbow at 7.45 p.m.; lightning at 8.30 p.m. 16th, hoar frost, first of season. 17th, fog. 19th, thunder and rain; at 5.15 p.m. perfect primary rainbow; at 6 p.m. perfect primary and indistinct secondary rainbow. 20th, at 4.20 p.m., imperfect primary rainbow. Rain every day except 5th, 6th, 7th, 10th, 11th, 15th, 16th, 17th, 25th, 29th, 31st.
WINDSOR.—On 6th, meteor from Z to S; also on 12th. 14th, lightning, thunder and rain. 21st, lightning. Storms of wind on 1st, 14th, 15th, 16th, 20th. Rain on 1st, 3rd, 4th, 8th, 11th, 12th, 13th, 14th, 19th, 20th, 30th. Temperature for the month usually low; the rains cold and drizzling, and quantity measured small in proportion.

TABLE K.—ABSTRACTS OF REPORTS OF DAILY METEOROLOGICAL OBSERVATIONS AT COUNTY GRAMMAR SCHOOLS IN UPPER CANADA, DURING 1866.—Continued.

Macallum, Esq., B.A.; Pembroke (River Ottawa)—Alfred McClatchie, Esq., B.A.; Peterborough (inland)—Ivan O'Beirne, Esq.; Simcoe (near Lake Erie)—Rev. J. G. Mulholland, M.A.; Stratford (inland)—C. J. Macgregor, Esq., M.A.; Windsor (River Detroit)—A. McSween, Esq., M.A.

SEPTEMBER.

Table with columns: STATION, North Latitude, West Longitude, Elevation, Barometer at temperature of 32° Fahrenheit (Monthly Means, Highest, Lowest, Range), Temperature of the Air (Monthly Means, Daily Range, Highest, Lowest, Range, Warmest Day, Coldest Day).

Table with columns: STATION, Tension of Vapour, Humidity of Air, Winds (Number of Observations, Surface Current, Motion of Clouds), Estimated Velocity of Wind, Amount of Cloudiness, RAIN, AURORAS, WHEN OBSERVED.

a Approximation. b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. d Where the clouds have contrary motions, the higher current is entered here.

REMARKS

Barrie.—On 10th, fog. 12th, at 4.25 p.m., violent hailstorm, with very high wind from W; aurora very bright. 14th, hail. 29th, fog. Storms of wind on 12th, 13th, 14th. Rain on 2nd, 7th, 8th, 11th, 12th, 13th, 15th, 16th, 17th, 19th, 20th, 21st, 22nd, 25th, 26th.
Belleville.—On 1st, thunder, lightning and rain. High winds from S and W from the night of 11th to evening of 13th. On 12th, from 8 to 8.45 p.m., furious storm of wind and rain, with occasional peals of thunder. 14th, violent thunder storm, commenced at 5.30 p.m. and ended a few minutes after 6 p.m.; noise of peals terrific; lightning unusually vivid, rain fell fast, sky dark and gloomy; a short distance north from station, and at same time, hail fell over a strip of country from one to two miles in breadth, and in some places to depth of an inch, stones said to be of unusual size, wind NW. 17th, between 3 and 4 a.m. some thunder in distance, with lightning while raining. 21st, between 3 and 4 a.m., some loud thunder and occasional lightning while raining. 28th, dense fog at 7 a.m., but soon cleared, again forming a little after sunset, continued till morning of 29th. Rain on 1st, 3rd, 5th, 7th, 8th, 11th, 12th, 14th, 16th, 17th, 18th, 20th, 21st, 25th, 26th. Some very heavy showers this month; harvest operations retarded, and crops much damaged, particularly pease and potatoes; returns, however, above an average.
Hamilton.—1st, fog; in morning lightning and thunder passed over city from SW to NE; lightning alone in evening in E, and still later in E and NW. 7th, gales of wind to velocity 5; leaves beginning to change colour. 9th, at 8.20 p.m. an ordinary shooting star seen in SW, 45° high, trail 5°, fell towards the SW. 11th, fog; gales to 6, lightning at 8 p.m. in W. 12th and 13th, gales to 7, S and SW. 14th, gales to 6. 15th, 7 a.m., ice the eighth of an inch thick on boards. 16th, gales to 7. 26th, gales NE. 22nd white frost. Fog on 28th and 29th. Rain on 1st, 3rd, 5th, 7th, 8th, 11th, 12th, 14th, 16th, 18th, 19th, 20th, 25th, 26th; the greatest fall was from 1 a.m. on 25th, for twenty-six hours, wind NE at 3 p.m. N, at 6 p.m. NW; depth, 2.3551 inches.
Pembroke.—On 2nd, at 3 p.m. heavy storm of thunder, rain and wind, velocity 7. 10th, fog; frost. 12th, lightning and rain. 14th thunder and rain; fog. 16th, hoar frost in morning; ice quarter inch thick. 17th, frost. 23rd, dense fog. 24th, frost. 25th, light fog. Storms of wind on 5th, 12th, 13th, 15th, 21st, 22nd. Rain on 1st, 2nd, 4th, 6th, 7th, 8th, 11th, 12th, 13th, 14th, 16th, 17th, 20th, 21st, 25th. Most summer birds gone. Health generally good. Atmosphere cool. Crops injured by wet, but tolerably good.
Peterborough.—On 1st, very vivid lightning in evening from every quarter but west; thunder and rain at 1 p.m. 2nd, partial rainbow about 3 p.m.; small shooting star seen. 3rd, halo round sun; auroral twilight. 5th, two falling stars seen. 6th, auroral twilight. 8th, a little sleet at 12.15 p.m. 9th, shooting stars. 12th, lightning, thunder and rain; auroral twilight in early part of night; about 10, light increased, covering N part of sky, with irregular patches of bright light interspersed. 15th, a gale of wind, velocity 8, from NW during greater part of last night, calmed down towards morning; halo round moon. 22nd, ice first observed. 26th, halo round moon. Fogs on 4th, 16th, 28th, 29th. Frost on 14th, 16th, 20th, 22nd, 23rd, 24th, 27th, 28th, 29th. Rain on 1st, 2nd, 4th, 5th, 7th, 8th, 11th, 12th, 14th, 16th, 17th, 20th, 21st, 25th, 26th.
Simcoe.—On 1st, thunder storm, with lightning and heavy rain for 3 1/2 hours, from SW calm. On 14th, lightning, and heavy

rain. 15th, frost in morning. 16th, at night, lightning, thunder, and heavy rain. 22nd, hard frost in morning; minimum thermometer, 32°. 23rd and 24th, frost. 28th, fog. Rain on 1st, 2nd, 5th, 7th, 8th, 11th, 12th, 14th, 16th, 17th, 18th, 20th, 25th. Very heavy rain for 24 hours on 25th.
Stratford.—On 1st, at 8.20 a.m., thunder in SE; 7.40 p.m. lightning W—NE till 9 p.m. 13th windy. 14th at 1.30 p.m. distant thunder in NW, dense nimbi from W to E horizon fringed towards Z by cumuli moving from W to E, cumuli scattered along the rest of horizon, wind W, and velocity 2; at 1.40 p.m. rain began, wind W, velocity 8, nimbi covering nearly all the sky except from E to SW horizon, where cumuli were seen; at 1.42 p.m. hail very heavy, stones small; at 1.45 p.m. lightning with thunder; at 1.46 p.m. hail ceased; at 2 p.m., wind lulled to velocity 5; at 2.40 p.m. rain ceased; at 3.30 p.m., wind NW, velocity 3; at 5.45 p.m., distant thunder again heard. 15th, frost; at 9 p.m. observed an arch of white light in the southern part of sky, extending from SE to W horizon, elevation at highest part about 45°, breadth of arch 10°, dark on upper edge; the light was similar to auroral light, and remained visible for half an hour. 16th, thunder, lightning and rain. 20th, high wind, E, from 9.30 a.m. to 4 p.m. 21st, hoar frost in the evening. 22nd, ice on the pools of water, first of season. 23rd, storm of wind. 26th, at 7.15 p.m., aerolite seen in S. 29th, frost. Fogs on 1st, 6th, 10th, 14th, 24th, 28th. Rain on 1st, 2nd, 4th, 7th, 8th, 11th, 12th, 14th, 16th, 17th, 18th, 19th, 20th, 21st, 24th, 25th, 26th. Continuous rain from 6.45 p.m. 24th to 5 a.m. of 26th; depth 2.3423 inches. The following is a comparative statement of rainfall at Stratford in September for seven years:—
September, 1860, 11 days..... 8.9915 inches.
Do 1861, 15 do..... 2.9688 do
Do 1862, 11 do..... 4.0108 do
Do 1863, 7 do..... 1.8841 do
Do 1864, 10 do..... 3.9274 do
Do 1865, 9 do..... 3.1064 do
Do 1866, 17 do..... 5.3225 do
The only month (since August, 1860) in which the rainfall exceeded that of September, 1866, was March, 1861, when rain and melted snow measured 5.3839 inches.
Windsor.—On 1st, lightning, thunder and rain. Meteors on 3rd, 14th and 28th from Z to SW. Meteor on 5th from Z to W. On 8th, lightning and rain; double rainbow observed in NE at 6 p.m.; wind N, dark cumulo strati, golden edged, passing rapidly from SW. 11th, lightning and rain. 12th, aurora at 9 p.m. for one hour, an arch with streamers, at 10 p.m. dark strati rose from N horizon, obscuring the sky. 15th, frost for the first time this season affected vegetation. 22nd, frost. 28th and 29th remarkably heavy fogs. Fog on 29th. Rain on 1st, 3rd, 4th, 7th, 8th, 10th, 11th, 13th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 24th, 25th, 26th. Harvest retarded by rain, but loss slight. Indian corn, near Detroit River, ripened, but in the interior considerably injured by frost. Month remarkable for a low temperature, with considerable variations; days sometimes warm, but nights cold.

TABLE K.—ABSTRACTS OF REPORTS OF DAILY METEOROLOGICAL OBSERVATIONS AT COUNTY GRAMMAR SCHOOLS IN UPPER CANADA, DURING 1866.—Continued.

OBSERVERS—Barrie (Lake Simcoe)—Rev. W. F. Checkley, B.A.; Belleville (Bay of Quinte, Lake Ontario)—A. Burdon, Esq.; Cornwall (River St. Lawrence)—W. Taylor Briggs, Esq., B.A.; Hamilton (Lake Ontario)—A. Macallum, Esq., B.A.; Pembroke (River Ottawa)—Alfred McClatchie, Esq., B.A.; Peterborough (inland)—Ivan O'Beirne, Esq.; Simcoe (near Lake Erie)—Rev. J. G. Mulholland, M.A.; Stratford (inland)—C. J. Macgregor, Esq., M.A.; Windsor (River Detroit)—A. McSween, Esq., M.A.

Table with columns for Station, North Latitude, West Longitude, Elevation, Barometer at temperature of 32° Fahrenheit (Monthly Means, Highest, Lowest, Range), and Temperature of the Air (Monthly Means, Daily Range, Highest, Lowest, Range, Warmest Day, Coldest Day).

Table with columns for Station, Tension of Vapour, Humidity of Air, Winds, Number of Observations, Estimated Velocity of Wind, Amount of Cloudiness, Rain, Snow, and Auroras.

Approximation; Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane; 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds; Where the clouds have contrary motions, the higher current is entered here.

REMARKS.

Barrie.—If Sunday observations are reckoned, the result from maximum and minimum thermometer are as follows: mean maximum, 44.°22; mean minimum, 31.°27; mean range, 12.°95. Lowest temperature, 18.°3, on 25th (Sunday); monthly range, 46.°3. On 13th, fog. From the morning of 13th to that of 16th, the barometer fell 1.113 inches; this was the period of the meteoric shower; the wind rose a little, but not as might be expected from so great a fall of the barometer. On 14th, during early part of the night, the sky was overcast; the clouds cleared away between 10 p.m. and 11 p.m.; about 30 meteors were seen between 12 p.m. and 3.30 a.m.; they all radiated from the constellation Leo, but, with one remarkable exception, they were not particularly bright; the meteor referred to moved towards the zenith, and was of great brilliancy, its trail remaining visible for over a minute. On 17th, brilliant meteor, 10 p.m., towards NE; burst with loud report. 21st, halo round the moon, very large and distinct. Rain on 3rd, 11th, 14th, 15th, 16th, 19th, 20th, 27th, 28th, 29th. Snow on 3rd, 24th, 30th.

blew a gale from SE till daylight. 11th, many falling stars. 12th, partial rainbow at 7 a.m., at NNW horizon. From 7 a.m. on 13th to 7 a.m. 16th, continuous fall of barometer, range for the period being 1.289 inches. On 13th, auroral twilight appeared early in the night, and about 2 a.m. fringed with light streamers; between 1 and 4, frequent falling stars observed, one of which flashed very brightly; nothing remarkable except that they were more frequent than ordinary; the sky became partially clouded soon after 9 p.m., and continued so till 1, when it cleared and remained so till 4.34, when again almost overcast. On 14th, sky heavily overcast, and raining all night; no observation of the meteoric phenomenon could be made. Storms of wind 1st and 11th. Fogs 6th, 13th, 28th. Rain on 1st, 2nd, 11th, 14th, 15th, 16th, 19th, 20th, 26th, 28th, 29th, 30th. Snow on 2nd, 3rd, 17th, 22nd, 24th, 30th.

TABLE K.—ABSTRACTS OF REPORTS OF DAILY METEOROLOGICAL OBSERVATIONS AT COUNTY GRAMMAR SCHOOLS IN UPPER CANADA, DURING 1866.—Concluded.

OBSERVERS—Barrie (Lake Simcoe)—Rev. W. F. Checkley, B.A.; Belleville (Bay of Quinte, Lake Ontario)—A. Burdon, Esq.; Goderich (Lake Huron)—John Haldan, jun., Esq.; Hamilton (Lake Ontario)—A. Macallum, Esq., B.A.; Pembroke (River Ottawa)—Alfred McClatchie, Esq., B.A.; Peterborough (inland)—Ivan O'Beirne, Esq.; Simcoe (near Lake Erie)—Rev. J. G. Mulholland, M.A.; Stratford (inland)—C. J. Macgregor, Esq., M.A.; Windsor (River Detroit)—A. McSween, Esq., M.A.

Main data table with columns for Station, Elevation, Barometer, Temperature of the Air, Tension of Vapour, Humidity of Air, Winds, Clouds, Rain, Snow, and Auroras. Includes sub-tables for Monthly Means and Daily Range.

a Approximation. b Velocity is estimated, 0 denoting calm or light air; 10 denoting very heavy hurricane. c 10 denotes that the sky is covered with clouds; 0 denotes that the sky is quite clear of clouds. d Where the clouds have contrary motions, the higher current is entered here.

REMARKS

Barrie.—On 8th, sudden fall of barometer during night—wind in morning E, 1, veered round to W at 10 a.m. and blew almost a gale. 14th, brilliant meteor SE, trail visible about thirty seconds; lightning in SW, no thunder. 22nd, continuous rain from 2 p.m. till night of 23rd. Heavy snow storm and high wind from noon 27th, to night of 28th. Rain on 4th, 6th, 8th, 22nd, 23rd. Snow on 13th, 16th, 21st, 24th, 26th, 27th, 28th, 29th. Reckoning the Sunday observations at this station, the mean maximum temperature was 30°62, the mean minimum 16°96, and mean range 13°66.

16th, 18th, 19th, 22nd, 25th, 26th, 27th. Much sickness and a number of deaths in the neighbourhood this month. Sleighing not good; very little snow; none up the Ottawa a few miles. Streams unusually high for the season. Peterborough.—On 4th, thermometer suddenly fell 3°, at about 6.30 p.m., and suddenly rose again at 6.50, when it commenced blowing a gale in gusts till about 8.40, force 8. 5th, deep purplish haze, tipped with crimson, all along WH at 7 a.m. 7th, the same again. 8th, at 12.50 p.m. after rain over, the clouds began breaking (wind SE. 2), it seemed to begin blowing suddenly at the elevation of the clouds, though the wind on surface of the earth was comparatively light. A deep roaring sound was audible, resembling a storm at a distance among the tops of the pine trees, the clouds began to swirl and surge and toss over and over and to break into fragments in a very remarkable manner, and the wind immediately shifted from SE to SW. 28th blew a gale after 10 p.m. during night. Falling stars observed 10th, 11th (very many), and 13th. On 14th, a very fine meteor at 9.20 p.m., passed across Z rapidly, illuminating the atmosphere like a flash of lightning, and leaving a long streak of light which faded away gradually and very slowly. 15th, halo round moon. 21st partial halo round sun. Rain on 4th, 6th, 8th, 22nd, 23rd, 24th. Snow on 9th, 10th, 12th, 22nd, 24th, 25th, 26th, 27th, 28th. Simcoe.—Rain on 3rd and 4th. On 5th, solar halo at 1 p.m. 8th, rain with south wind began about 3 a.m., ended 9.30 a.m., when wind changed to SW and WSW with velocity 6 or 7; clouds broke up and passed rapidly in same direction; occasionally during day clear sky; occasional light showers; thermometer fell suddenly during night after the storm, which continued till after midnight. Light showers with scarcely any intermission from 2 p.m. 22nd till 1 p.m. 24th. On 27th, aurora in the form of a northern twilight from 9 to 9.30 p.m. Snow on 9th, 11th, 16th, 19th, 24th, 25th, 26th. Stratford.—On 19th, mill-pond frozen. 16th, snow from 6 a.m. to 6 p.m., depth 2 inches. On 22nd rain began at 8 p.m., and ended 23rd at 9 p.m., depth .6429 inches. Violent storms of wind 8th and 9th. Storms of wind also on 10th, 11th, 15th, and 16th. On 27th, violent storm of wind and snow began at 11 a.m., and ended during night between 28th and 29th; good sleighing 27th. Rain on 3rd, 4th, 6th, 8th, 22nd, 23rd. Snow on 8th, 9th, 10th, 11th, 12th, 16th, 19th, 24th, 25th, 26th, 27th, 28th, 29th. Fog on 23rd. A lower indication of barometer than is noted in the table above was observed here on Sunday, 23rd, at 9 p.m., viz., 27.945. Windsor.—Month remarkable for cloudiness. Rain on 3rd and 22nd. Snow on 13th, 15th, 16th, 19th, 24th, 26th, 27th. Storms of wind on 3rd, 4th, 8th, 10th, 11th, 12th, 15th.

TABLE L.—THE NORMAL SCHOOL FOR UPPER CANADA, 1866.

ABSTRACT No. 1.—GROSS ATTENDANCE OF STUDENTS, CERTIFICATES, &c.—Continued.

THE SESSIONS OF THE NORMAL SCHOOL FOR UPPER CANADA.	Who attended formerly.			WHO LEFT.			Who received Provincial Certificates.					
	Total.	Male.	Female.	Regularly.			Irregularly.					
				Total.	Male.	Female.	Total.	Male.	Female.			
From the 1st to the 34th Session, inclusive.....	1471	668	803	840	520	320	274	209	65	2208	1169	1039
Thirty-fifth Session, 1866.....	70	13	57	41	26	15	6	1	5	99	37	62
Thirty-sixth Session, 1866.....	74	27	47	23	10	13	5	3	2	86	35	51
Grand Total.....	1615	708	907	904	550	348	285	213	72	2393	1241	1152

* Of this number 49 were admitted by fees, 420 received "Certificates of Standing in Classes," from the Masters, before Provincial Certificates were issued, and 2194 received weekly aid, amounting to \$43,369.50. But of the whole number of admissions, a very large proportion have attended two or three Sessions—some even four and five—so as greatly to reduce the aggregate of individual attendance. And the same is true, in a lesser degree, of the number of Provincial Certificates in the aggregate of the last triple column; the number of these actually valid on the 31st of December, 1866, being 1506, of which a considerable number have lapsed by deaths, and become otherwise unavailable by removals.

233	Patrick Shirreff	66	23	36	40	*77 40	\$45 for 1865 and 1866.
Net amount of Pensions paid in 1866.....						\$3726 34	

NOTE.—In the above table, where the number is omitted, the pensioner is either dead, has resumed teaching, or has withdrawn.

* Pensioners receive, for the first year in which they are placed on the list, an amount at the rate of \$6 per year of service. After the first year they receive a smaller amount, as the fund does not admit of continuing the high rate.

* Balances due, but not collected, were included until 1858, but from that date Nos. 18, 19, 20, 21, 22 and 24 represent actual payments only. If we add to the Grand Total [24] the unexpended balances, we should have an available sum of \$2,650,125 for Educational purposes during 1866; and for 1865, \$1,912,751—the increase in 1866 being \$137,374.

Note.—The Returns in the foregoing Table, up to the year 1847, are not very complete, but since that period they have been sufficiently so to establish data by which to compare our yearly progress in Educational matters. The Returns are now pretty extensive, and embrace all Institutions of Learning, from the Common School up to the University; but hitherto the sources of information regarding this latter class of Institutions have been rather private than official, which should not be the case. The Annual Report of a Department of Public Instruction should present, in one comprehensive tabular view, the actual state and progress of all our Educational Institutions—Primary, Intermediate, and Superior.

PART III.

—

A P P E N D I C E S .

1866.

APPENDICES TO THE ANNUAL REPORT
OF THE
NORMAL, MODEL, GRAMMAR,
AND
COMMON SCHOOLS
IN
UPPER CANADA,
FOR THE YEAR 1866.

APPENDIX A.

EXTRACTS FROM THE REPORTS OF LOCAL SUPERINTENDENTS OF COMMON SCHOOLS AND BOARDS OF SCHOOL TRUSTEES IN UPPER CANADA, RELATIVE TO THE STATE AND PROGRESS OF EDUCATION IN THEIR RESPECTIVE TOWNSHIPS, CITIES, TOWNS AND VILLAGES, FOR THE YEAR 1866.

I. COUNTY OF GLENGARRY.

1. *Hector McRae, Esquire, Charlottenburgh.*—I feel happy to state that the schools in Charlottenburgh are generally advancing in progress and efficiency. The average attendance for the past year, you will perceive, is rather on the decrease; but that was owing mostly to the measles and small-pox having been in some of the school localities during the summer, and also partly owing to controversies existing between some Trustees and their constituents, regarding the selection of teachers. It sometimes happens that Trustees engage teachers, regardless of their efficiency in respect to method and organization, but they consult how cheaply they can purchase a teacher for the time being. This manner of selecting teachers is now and then adopted, and is it not therefore to be wondered at, that those who are desirous to procure for their offspring the most effective education they can afford to give them, should complain and murmur against the selection of inferior teachers, however cheaply such might offer their services. The school law, no doubt, allows Trustees the privilege to engage teachers at such remuneration as they may agree upon, but at the same time, they ought to consider the real and special wants of the sections of which they are the representatives, rather than their own selfishness and niggardly desires. These selections of inferior teachers are, however, exceptions, and not the general rule; and I make bold to express, that there are in the Township of Charlottenburgh, teachers, male and female, who are truly a credit to the profession. The regulations in regard to religious instruction are not followed in this township. The revised programme for County Board examinations is duly observed; the examination questions are not printed, but the questions are taken down in writing within a limited time. There are no libraries with the exception of the Martintown one, which is duly appreciated by the inhabitants of the School Section. There were five schools in which prizes were distributed the past year, and both teachers and Trustees spoke very favourably of the influence derived from them.

2. *Angus McDonell, Esquire, Kenyon.*—All the schools in this township but one have been in full operation during the past year; and I am happy to have to say that an increase

of learning and of average attendance were the results. Prizes have been distributed in School Section No. 10, at two public examinations, during 1866, and I can safely say that the system introduced a spirit of emulation among the pupils of the school, from the lowest class to the more advanced; and I am certain that the system would produce similar results in other School Sections, should Trustees give it a fair trial. There are 1,239 children of school age in this township: 1,215 of these children received a good share of education during the past year, leaving only 24 children not attending any school, a number that is hardly worth noticing; and, as my annual Report will shew, about 800 of these pupils received education, on an average, for eight months during the year, and the remaining 415 pupils received education, on an average, for five months, so that I should suppose no compulsory system would be needed so far as this township is concerned. Yet I regret to say that a number of our school-houses are in a bad state at present, owing to the want of maps; but I trust before long to see all of them supplied with this necessary furniture. I transmit my sincere thanks to yourself and to Mr. Hodgins for your prompt answers to all queries I had occasion to make from time to time, relating to our Common Schools, during the last twelve years.

3. *The Reverend Duncan Cameron, Lochiel.*—In the Township of Lochiel, all the schools were in operation during the year, and all on the free system, except three. Prizes were distributed in a number of our schools to the most deserving scholars. On the 15th November last, there was a competitive examination, to which all the scholars of the township were invited. A large number of scholars and teachers, with a fair representation of the leading men and friends of education in the township, met and heard the scholars examined in the different branches taught in the schools. Prizes were given to the successful competitors. The examiners and friends of education were well satisfied with the manner in which the scholars acquitted themselves. The examination gave a powerful stimulus to the cause of education among us: it will have a more salutary influence upon the teachers and pupils, and it will be the means of arousing and bringing into vigorous play the talents and powers of mind of teachers. A teacher who has even an ordinary degree of the spirit of educational rivalry, self honour and respect, cannot observe the scholars of his fellow teachers to be always the successful competitors, without being stirred to make, if possible, his own pupils equal, if not superior, to all other competitors. Such examinations will be a powerful incentive to bring to light and cultivate the emerging and growing talents of the youthful mind to grasp at and fully master every branch of education in which it is exercised. Such examinations will be the means of raising the standard of education; of reaching the hearts and bringing forth the liberality of Trustees and School Sections. When Trustees of School Sections see a large number of scholars in another Section carrying off the first prizes, and their own the last, or none at all, the principle of emulation and educational proficiency is struck as with an electric spark. Considering their own sons and daughters as clever, and possessing the same aptitude to learn as those who have been successful in obtaining the first prizes, they will at once resolve to be more liberal, and get as good teachers as they possibly can. I am glad we have the prospect of having such another examination. D. A. McDonald, Esquire, Member for the County of Glengarry, has given \$80, \$20 for each township in the county, to purchase books for prizes. The examinations are to take place on the 1st of March.

II. COUNTY OF DUNDAS.

4. *The Reverend Christopher R. Bell, Mountain.*—Nearly all the school-houses in this township are log, and generally in a very dilapidated condition, some indeed are disgracefully so; very many have no proper seat or desk for the teacher; only one has a place to lock up the books, &c., in, so that they are left to the mercy of the people who attend certain meetings held in the school-house from time to time; many of the doors of the school-houses are without even a fastening of any kind; and not one of the schools has conveniences for the children. I repeatedly bring these circumstances before the different Trustees, and earnestly entreat them to remedy these defects, and I hope by continually pressing this matter, that in time we shall see a change. All our seventeen teachers (excepting three) hold Second Class County Certificates, and thirteen are females. I am sorry to say the great majority of the teachers, are of inferior

attainments; this I attribute to the low standard of our County Board Examinations, and also to the fact, that the Sectional Trustees *will* engage cheap teachers (I mean in the vulgar acceptation of the term). It is the intention of our present Board to raise the standard of the examinations for the future, and only grant certificates to those who are really qualified. We have not hitherto introduced printed examination papers, but hope to do so soon. I have been greatly surprised and disappointed, to find that very few of the candidates can read really well, or write, or even spell correctly. The Trustees of our School Sections, and the people generally, mostly aim at fulfilling the school law at the least possible expense to themselves; so long as they can say, "we have a school and a teacher," it appears that they care very little whether they have a good school or an able teacher; and the parents of the children, as a rule, will not trouble themselves whether their children have books or not, or whether they attend as they ought. Many will not send their children to school at all. I have had to attend one arbitration case between Trustees and Teacher this year, 1866, and in another instance to adjust a disagreement between Trustees. The Trustees, I think, without an exception, throughout the township, appropriate the school rate, which is determined upon at the annual meeting in January, for the past year's expenses instead of the current year's; thus they necessarily cause the teacher to wait always to the end of the year, before he obtains the principal part of his salary, and sometimes far into the following year; this is very unjust, and puts him to great inconvenience: disputes frequently arise in consequence, and the annual returns come in very tardily. The system of "boarding round" for the teachers, as it is termed, I think, is not good, especially for females, and should be glad to see it abolished. There is a general lack of maps and school apparatus of every kind throughout, five schools only out of the seventeen, having maps. There is not one township or sectional library, and only four small Sunday School Libraries. With one exception, prizes are not given in any of the schools. This is to be regretted. In my visits to the schools, after the examination of the children, I always give a short lecture upon their studies, and at the same time endeavour to impress upon Trustees and Teacher, the importance of their fulfilling their duties with zeal and ability, pointing out their short-comings, and setting before them their privileges. An annual lecture is also delivered in each School Section. Considering the amount of work which a Local Superintendent performs, if he does his duty, I certainly think the minimum per school to be paid him, according to Act of Parliament, is decidedly too small. I hope to have a more favourable report for you next year.

5. *John J. McLaughlin, Esquire, Williamsburgh.*—I regret that I cannot add much of educational progress, in our schools for the last year, to the remarks in my former Reports. The literary grade of our teachers is much the same as before, and our Trustees for the most part seem to appreciate and patronize that grade, which meets their proper estimate of dollars and cents. Here lies the barrier that impedes our intellectual progress; we can appreciate everything truly valuable, costly clothing, the most approved implement of husbandry, encourage and patronize agricultural exhibitions and fairs, and compete with each other in all articles exhibited in those places; and yet when the cultivation of the mind comes under consideration, our pecuniary strength grows little by degrees and beautifully less; dollars and cents assume vast proportions, and we become so poor, that not infrequently we feel unable to employ the cheapest teacher we can find, save for a few months in the year. These remarks are appropriate and applicable to too many of our School Sections. I feel proud, however, to inform you, Reverend Sir, that we have some noble exceptions, exceptions which I would gladly mention and particularize were it customary to do so; and I am still of the same opinion that all Teachers and Trustees who distinguish themselves by their devotion to the duties of their office, should be honorably mentioned in the Superintendent's Report. From the cause and intention of the above remarks, I need scarcely say that some of our schools are progressing admirably; others as might have been anticipated by the contracting parties at the beginning of the year. If we sow sparingly we must expect to reap sparingly. If we employ a teacher whose labour is amply rewarded by the payment of eight or ten dollars per month, it would be absurd to expect the same literary remuneration, as we would from one whose instruction is cheap at twenty-five or thirty dollars per month. I have still to reiterate my regret in reference to a township or local library. The matter contained in daily and weekly papers, seems

amply varied and satisfactory enough, to suit our business and political tastes, hence real mental food is uncalled for and out of the question. You will observe that the number of non-attending school children is on the decrease, and the cause of non-attendance, in my opinion, is not that usually ascribed by parties writing on this subject, such as "indifference of parents," "natural inclination to vagrancy," "hatred of scholastic discipline and control," but that which is for the most part both natural and common to humanity, namely, false pride. No parent except the most abandoned, and wishes to see his or her child clothed like his or her neighbour's, and if stern poverty denies the poor parent the means of clothing his child agreeable to his wishes, he prefers to detain him at home, rather than expose his destitution by the nakedness of his child. This I term false pride, and it is both natural and legitimate, and no compulsory school law will ever prove powerful enough to eradicate this principle from the human heart. The law which compels children to attend school, must provide those children with food and clothing, otherwise it will prove to be a mere abortion; and although such a law would prove an inestimable blessing to the child, it will never satisfy the independent aspirations of the parent. Some parties complain that they do not receive the *Journal of Education* regularly. I am glad to see your valuable paper so eagerly sought for; it proves there is an increasing interest in its contents.

6. *The Reverend William Fergusson, A.M., Winchester.*—I am happy to state that there is a marked improvement in all the schools save two. My suggestions have been well received, and acted upon with beneficial results. Systematic classification has taken the place of hard formalism, and the teachers are finding that it is their duty to educate as well as instruct. They see that the rules and examples on the black-board save instead of waste the time; and they who are the most conscientious in the discharge of their duty, feel in their success a reward commensurate with their labour. In every school the revised programme has been carried out, and the authorized books alone employed. One return, indeed, gives a Campbell's Geography as having been used; but I believe this is a mistake of the Trustees. While the progress in the schools is satisfactory, and a vigilant superintendence keeps up the diligence of the teacher, I am constrained to say that evils creep in, notwithstanding the excellence of our school system. We have first the desire for cheap teachers—mere boys and girls—who pass the lowest requirements of the Examining Board, and receiving their certificate of qualification, travel about from one Section to another, literally underbidding each other; thus degrading the profession, and affording material for grumblers to complain at the annual meeting of the Section, if an experienced teacher has been engaged on higher terms. Again, we have Trustees casting aside an experienced and successful teacher to make room for a raw boy, because the latter is a family connection of the Trustees. Nay, in some cases it is shrewdly suspected, when advanced wages are given, that the Trustees with whom the teacher must lodge have their reward in the large amount which the teacher pays under the name of board. This will show, whether surmise or fact, the need of such an alteration as has been proposed in our present school law. In regard to the half-yearly examination of candidates for the office of teachers, I have to state that it is in a more satisfactory state than when I joined the Board. The examinations are conducted principally in writing, yet with a part orally. I may mention one fact to show that we required to be strict in our examination. At the last meeting of our Board, eighteen candidates for first class certificates presented themselves, and of these no less than thirteen were rejected, and only five passed the ordeal and were admitted to the desired grades. I found also the practice tolerated of allowing young persons, who were thought to be the crack scholars of their school, and who were under age and could not legally become teachers, to mingle with the candidates, and pass through their trial exercises, and receive testimonials of what their standing might have been, if they had been of the legal age. I conceived that the duty we were bound to perform concerned only those who were in a position, if successful, to become legal teachers; and we but wasted the time we were bound to give to those who were *bonâ fide* candidates, in gratifying the vanity of a teacher, and the easily excited ambition of a boy or girl. Education must ever be imperfectly conducted, where its professors look to its profession as a merely temporary occupation; as a make-shift for want of a better, or a disagreeable

field, whence may be dug the ore that shall buy their entrance into a more lucrative employment. We need larger incomes for our teachers,; we need that they should be secure in their position, when faithfully and successfully discharging their duty. What has been done in Canada has been well done, but more yet remains to be done. The time has now come when alteration in our laws regarding schools may be moved, considered, discussed, and accepted.

III. COUNTY OF PRESCOTT.

7. *James H. Molloy, Esquire, Plantagenet South.*—I am sorry that the schools of which I am Local Superintendent, do not show evidences of greater progress. The attendance for last year has been very unsatisfactory. Indifference of parents is the invariable answer in the reports of the Trustees, as the cause of non-attendance. It is hardly fair, however, to believe such a sweeping assertion; I am convinced that the cause of non-attendance may be traced to the following unavoidable circumstances, viz.: Residing at too great a distance from the school-house, the want of warm or decent clothing, and in very many instances, the pressing care of providing for their bodily wants. I sincerely hope that the people of this municipality will in future more highly appreciate our noble system of education, and avail themselves of its advantages, by their exertions in placing within the reach of all, the means of acquiring that knowledge which elevates man to his proper position in the scale of intellectual existence. In two of the schools the business of the day was opened and closed with prayer. Some people object to extemporaneous prayer, others to set forms, and some object to prayer altogether. I am sorry to have to report on public libraries,—there seems a perfect indifference amongst the inhabitants of this township, to the pleasure derivable from a well selected library. The inhabitants are principally composed of a class of men, who have received little or no education; such, therefore, take no interest in establishing a library which would exert a most salutary influence, and be eminently beneficial to all.

8. *The Reverend J. Gilbert Armstrong, M.A., Hawkesbury West, Caledonia, &c.*—As regards the examination of teachers, the system, as pursued in Universities and the Normal Schools, was introduced by myself when I became a member of the Board of Public Instruction here some years ago. Although old members of the Board were opposed to it, yet there is now a feeling of general satisfaction, and the result has been, that we have more efficient teachers, and a greater degree of satisfaction experienced by the Trustees and parents throughout the country. There are two suggestions which I would offer for what they are worth, as the result of some thirteen years' experience as a Local Superintendent of schools under the present system: 1st. That in altering or amending the present School Act, some clause requiring the Trustees and Teachers to make some affirmation, or something tantamount thereto, as regards their reports and returns, would be extremely beneficial, and tend to greater correctness in the compiling of these documents. 2nd. That no person should be appointed a Local Superintendent of Schools, who does not possess a University degree, or a certificate of qualification from a Board of Examiners similar to that before which Grammar School teachers, not having degrees, must appear.

IV. COUNTY OF RUSSELL.

9. *James McCaul, Esquire, Clarence.*—I beg leave to report that one new school has been opened in this township during the past year, and that a majority of the schools are efficiently conducted and have made favourable progress during the past year. The great evil teachers in this township have to contend with is the irregular attendance of the children in some of the schools; and the sole cause, almost in every instance, is the negligence of the parents; for, generally, those at the nearest and convenient distance to the school-house are the most irregular in their attendance. Parents, also, are much to blame in listening to every trivial complaint made by their children against the teacher on their return from school, and some parents are so blind to their own responsibility towards their children as to withdraw them altogether from the school, to the great discouragement of the teacher and their own irreparable loss. All the schools, with one exception, are in much need of more maps and apparatus. Prizes were distributed with good effect in some of the schools.

The libraries in School Sections Nos. 1 and 2 have good effect. The books are well taken care of, and are covered and labelled; but an addition to the number of books is much needed. The revised programme for County Board Examinations is observed: the questions are printed, and the answers given in writing. Religious instruction in the schools is not much followed, except so far as reading the Bible and Testament and opening and closing the school with prayer, in the English schools. In the three French schools, more religious instruction is given. All of which is most respectfully submitted.

10. *The Reverend James C. Smith, M.A., Cumberland.*—The annual Report which I herewith transmit, bearing upon the state of education in the Township of Cumberland, does not materially differ from that of former years. It is to be deeply regretted that the evil of which I complained on former occasions, viz., holding out contemptible salaries as a bait for inferior teachers, still continues to a large extent. This serious obstacle to progress must continue so long as men of a low intellectual grade are intrusted with the management of schools. Under this impression, I embrace every opportunity of advocating the selection of such men as Trustees as are best fitted in point of intelligence and moral worth to elevate the public sentiment. Some of our teachers, I am happy to say, begin to manifest a practical appreciation of the intellectual method of instruction. The non-attendance or irregularity against which there seems to be so general an outcry, is attributable, at least in this township, to the wretched condition of the roads, rather than to parental indifference. The school-houses are in tolerably good repair. Section No. 5, united with the Grammar School, enjoys the advantages of admirable accommodation, and the healthful superintendence of the Head Master. No school libraries are as yet established in any of our sections: the township library is, however, exercising a powerful influence for good. The revised programme for County Board Examinations is strictly observed, and the mortification experienced by several candidates on being plucked at each sitting of the Board cannot fail in stimulating to studious habits and wholesome emulation among those who aspire to be teachers.

V. COUNTY OF CARLETON.

11. *The Reverend C. P. Emery, Fitzroy.*—I have much pleasure in stating, that there has been excellent progress made in several of the School Sections. Foremost in the ranks, is that of No. 6, under the tuition of Mr. R. Wilson. Too much praise cannot be awarded to this gentleman, not only for his skill and ability in teaching, but for the admirable way in which he has succeeded in instilling a thoroughly good education into the minds of both young and old. He has earned quite a fame for himself. The result has been an overflowing school, a steady good attendance, far surpassing any other school under my charge; and a fine spacious brick school-house has been erected. The Trustees have shown their appreciation of his worth, by increasing his salary. The next in order of advancement and success, is School No. 8, under Mr. A. Henderson; a very marked improvement has been made; Mr. Henderson is a first-rate disciplinarian, and is clever. The good results accordingly are very observable. The majority of the remaining eight schools have made a quiet steady progress; whilst the minority have somewhat gone back, in consequence of defective teaching and removal of teachers; some, I am sorry to inform you, for becoming victims to bad habits. As regards the good resulting from the different lending libraries, there can be no doubt, as seen in the advancement of ideas gained by the populace, in the reading of such interesting and edifying works put at their disposal by the enlightened and efficient Board of Education. Two new frame and commodious school-houses have been erected, another is in course of erection. I look for further advancement from a superior class of teachers, growing up under the Local Board of Instruction, which has made considerable advancement in raising the standard of education in those who present themselves before it for certificates to enable them to teach schools. As regards third class certificates, I consider that in the present advanced state of the people, they ought not only to be discouraged, but disallowed by those in power.

12. *The Reverend John May, M.A., March and Torbolton.*—All the schools under my charge have been in operation during the past year, except when prevented by sickness, with one exception. This school, however, was reopened last month, and is once more in successful operation. The attendance at many of the schools has been indifferent enough,

the causes, I presume, are the usual ones—home labour, want of shoes, section squabbles, niggardliness and indifference; to which I would add (though last not least) the wretched hovels here dignified with the name of school-houses, yet these are not worse than in scores of other places. The man who first designed a Canadian school-house, of the ancient type, deserves a monument. It seems a pity that childhood's innocent days, the beginning of life, should be condemned to these dismal dungeons, and the first buddings of thought blighted, the fountains of health poisoned, and the efforts of the friends of education well nigh frustrated, through the neglect or penuriousness of those whose duty it is to provide for the well being and education of the young. In one of these huts discipline is simply impossible, especially in winter, when the attendance is usually largest. A stove, often ill-provided with fuel, stands in the centre, around this clusters shivering youth; Boreas showers her darts through gaping chinks or broken panes; the teacher looks on in dismay. One advantage these buildings certainly possess above all others,—children taught in them are sure to carry away, and retain through life, very vivid ideas concerning the difference of climate, and little else. In our schools here maps are scarce, black-boards scarcer still; no globes or apparatus. In one school the average number of text-books to each learner is less than two. I am of opinion that such a school forfeits its claim to Government aid. I am also inclined to think that the time has come when good and well furnished school-houses should be made one of the conditions of state assistance; and I feel assured that could the Council of Public Instruction see these dismal institutions as we backwoods Superintendents see them, they would soon cease to exist; the Council have power to prescribe what text-books shall be used, have they not also the power to fix the size and accommodation (I mean the minimum) of the building in which these shall be used? The general regulations in regard to religious instruction are not followed in either March or Torbolton. The revised programme is followed by the Board, and the examination papers are printed. In times past the examination of teachers, seems to have been too lax. The Board is now determined to make examinations more severe. The ignorance displayed by many of our teachers is very palpable: I saw three mis-spelt words in a single copy line, a few days ago, written by a first (?) class teacher. We have but one Common School Library in March. The books are all numbered, and have been extensively read, no doubt with good results, although it must be confessed these are not as yet distinctly visible. Prizes were given in the same section last summer; and yet this is the section in which the children attend school with a book and a half each, and in which near one hundred dollars of a paltry salary are still due the teacher for his last year's work. The whole number of schools in March and Torbolton, is ten; two tolerable school-houses, and one school, at all near what a school ought to be. This is No. 1, in Torbolton, the building is large and well furnished; the teacher, a young man, is far above the average; his salary, \$280. Long experience convinces me that young teachers are the best. In no calling does a man become a machine so rapidly as in teaching. And I have observed that nothing is so hard to remove as a teaching machine, since it goes by strict rule, but the grist it grinds is seldom good for food. Without life, energy, enthusiasm in the teacher, the fruits of his work, though fair to the eye, are but as ashes to the lips. A good many schools were closed for a short time last year, on account of the prevalence of the small-pox and scarlet fever. This winter, thus far, we are happily free from these disorders, and we have a prospect of increased regularity of attendance. We have already taken steps to bring about a township competitive examination in March, which it is hoped will give a fresh impetus to education in these parts.

13. *The Reverend William Lohead, Marlborough.*—The township is very poor; only one male teacher has been employed, at a salary of \$300. A great contrast to thirteen female teachers, four of whom receive an average of \$57 and boarded in the sections; the other nine receiving an average salary of \$110.50 without board. At such salaries good teachers cannot be obtained. Some of these female teachers deserved much higher salaries than they received, while others received more than they deserved. Only section No. 5 has a public library and very little interest is taken in it. Only twelve of the inhabitants have availed themselves of the privilege.

14. *The Reverend James Godfrey, A.B., Huntley.*—In reply to the query as to religious instruction, I have nothing satisfactory to report. My impression is, there is very

little of any kind of religious knowledge communicated, except in the Roman Catholic Sections, Nos. 6, 7, and 8. This, in my opinion, is the weak point of the Canadian School system. Hereditary religious instincts, and the influence of Sunday Schools may retard but cannot prevent the ripening of the fruit of this mighty defect and error in the system. This fruit is already, I think, plainly growing all round us. Here and in the States probably, it has not manifested itself to any great extent, in a more repulsive shape than a general irreverence for religion and all that belongs to it. Fenianism indeed, in the States and in Ireland, is most likely greatly indebted to it; for I cannot conceive of Roman Catholics before the national system came into operation in Ireland, giving in to such decided opposition to their priests as those traitors have shown. But the most deplorable results of the want of "training up a child in the way he should go" are to be seen in England. There is the sad spectacle to be seen of men sworn to teach the doctrines of Christ, and paid for so doing, yet teaching directly the contrary. And worse still, we have seen the Privy Council upholding these views, and virtually giving them a dispensation to commit perjury. Surely no reasonable man can suppose these things could happen if the parties alluded to had received proper religious instruction in their youth. Nor would they have dared to act as they have done had there been a sound system of religious instruction in the schools of the country. The public conscience, if I may so speak, would have been too enlightened to have permitted it. The revised programme is followed by this Board, and the questions are printed. I take pleasure too in stating, that there is an increasing carefulness in the examination of candidates for certificates. Several were rejected at the last examination held in Richmond.

VI. COUNTY OF GRENVILLE.

15. *Robert E. Brown, Esquire, Augusta.*—It affords me much satisfaction to state that the schools in this township for the past year have been, with a few exceptions, in a healthy and efficient condition. The average attendance of the pupils for the year has been greater than usual for the previous year. I attribute this to the fact that the teachers have aimed to do their duty, and consequently the people have more fully appreciated their efforts. I think if the local Boards had the power to license none but those candidates who are qualified to hold a first or second class certificate, it would prove a real benefit. It is true that those schools in sections where the rate-payers number as low as twenty, cannot, without increased taxation, employ teachers as well qualified as those schools in sections where they number as high as eighty. This evil would be removed by the introduction of the change you propose in the School Act; and, in my opinion, the sooner that change takes place the better it will be for the Province, and particularly for this township.

16. *William B. Inrie, Esquire, Edwardsburgh.*—Of the schools, one pleasing feature is the number of them that are free, being the whole, save one, and even that one partly so. The attendance has been good, the progress fair, and a general desire has arisen to obtain good, experienced teachers. An attempt, to this end, was made at the beginning of the year to procure some that had been trained at the Normal School; but the applications were made too late to obtain such as were suitable, though I trust another effort in the same direction will be attended with a different and happier result. We have a scarcity of male teachers, there being, as you will observe, only four out of twenty-one employed. The female teachers, however, I am happy to say, have improved very much, and generally conduct their schools in a very orderly and efficient manner. Indeed, I may say, with regard to the whole of them, both male and female, that great harmony prevails between them and the Trustees, no difficulty having arisen for a long period to call for any interference on my part. There is still a great need of maps and other school requisites, which have often been promised to be obtained from your Department, and I still continue to urge upon them the necessity for them, as great aids to intelligent and successful teaching. The loss of our fine library, I fear, will not soon be replaced, a circumstance we must all regret. I take pride in stating that our Clergy Reserve Fund, the interest arising from which this year, is \$583.90, amounts now to \$8,694.33, and is chiefly invested in bank stock and Government debentures. Other townships, who applied their money to road and other purposes, when they see how we have husbanded ours, are sorry for their misapplication, when too late.

17. *Herman McCrea, Esquire, Wolford.*—It is with some considerable degree of pleasure that I am able to inform you that the schools under my charge, more particularly the year past, have been satisfactorily progressive; indeed, I feel very much gratified in retrospectively the work accomplished by the various schools in this municipality. There is one evil which I have noticed, and which I think generally prevails throughout our schools, and that is the lack of proper religious training. I do not by any means advocate the introduction of sectarianism into our schools, but those principles which adorn the christian character, and that a high moral tone should characterize all our schools. I have laboured assiduously with the Trustees for the introduction of maps and school apparatus into the different schools, and, I am pleased to say, not in vain. This is an important consideration, for it is almost impossible for the teacher to make his or her school a success without those appendages, as the most skilful mechanic his trade without the proper tools. If Trustees expect the teacher to conduct their school efficiently, they must place the necessary implements in his hands. Carelessness and indifference are the reasons generally assigned by Trustees for non-attendance of pupils at the schools. The Free School System, in a short time, will be adopted altogether in this township; the people are beginning to see that it is the only proper basis upon which a school can be satisfactorily supported. It is apparent to me that if the system of appointing Local Superintendents could be so changed that the right man in the right place could always be secured, it would be very desirable; but the selection is frequently made upon political grounds, the question of merit and qualification not being taken into consideration. That Reeve should certainly be held culpable who only looks to the political creed of the aspirant. I look upon the present School System of Canada as being admirably adapted to her wants, if only carried out in accordance with her well understood wishes, and that any great change in the same would not be advisable.

VII. COUNTY OF LEEDS.

18. *The Reverend John Carroll, Leeds and Lansdowne Front.*—I am happy to be able to state that our schools are evidently improving and becoming more generally useful to the community, notwithstanding some serious difficulties and disadvantages under which they labour. Amongst these disadvantages, two in particular may be mentioned. *First*, incompetent Trustees. Were you to see the annual reports from which I am obliged to make mine, I am certain that you would admit the necessity of some change. *Secondly*. The teachers of this locality, generally speaking, are not so competent as they should be, for their position, yet still I must admit, a better class could not be expected for the small salaries which the Trustees are willing to give. There is a sad want of trained teachers; several doubtlessly pass creditable examinations before the County Board, but for the most part, they are deficient in a knowledge of systematic teaching, and school organization. It appears from the Trustees' reports that there are 89 pupils in this municipality not attending any school, and a variety of reasons are assigned for their non-attendance, but particularly that disgraceful one "indifference of parents." The general regulations, with regard to religious instruction, are not followed at present in this locality. The revised programme for County Board Examinations is observed, and the examination questions are printed. I am sorry to be able to report only three School Sections at present possessing school libraries; the books are labelled and covered. It appears to me that some improvement might be made in the school registers. In some schools they are very quickly destroyed, and when a new one is obtained, the old one is usually cast away. Now if the registers were strongly bound and carefully preserved, they might be found useful as public records at some future period.

19. *The Reverend Albert Spencer, Bastard and Burgess South, &c.*—With a few exceptions, the schools of the townships under my superintendency are very far from being in a satisfactory state. Many reasons may be assigned for this state of things: *1st*. The incapacity of the teachers. Many of them are mere boys or girls, who have never fairly digested the scanty stock of knowledge they already possess, and are totally unfit, therefore, to instruct other children. The Board of Public Instruction, which meets at Farmersville, is endeavouring to remedy this by degrees, and has, within a few years, I am told, wrought a great change for the better. The questions for examination are printed, and the revised programme is observed. *2nd*. Another cause for the present unsatisfac-

tory state of the schools may be attributed to the neglect of the Trustees to provide suitable buildings and other requisites for carrying on schools. In consequence of this neglect, the very best teachers (and we have a few such in these townships) have to contend with some most discouraging circumstances. Few of the school-houses are adapted, either in size, furniture or arrangement, to the wants of the School Section in which they are situated; many—even of those reported as built of stone—are cold, comfortless buildings, and bare of almost everything to make them either attractive or useful. I need scarcely add that there are neither libraries nor prizes anywhere in either township, excepting Newboro', which is a Union Section, with the school-house in North Elmsley, and excepting also one or two instances in which the teachers have themselves procured a few cheap prizes by their own exertions. The prizes distributed in the Newboro' school (vide *Journal of Education* for August or September) have had, on the whole, a beneficial influence, though I think it would have been wiser not to have commenced on quite so large a scale, and thus compelled the pupils to put forth more strenuous efforts before they were rewarded with so many prizes, and those of so costly a description. 3rd. Of course, the ultimate cause of the low standard of our schools lies yet deeper, and is to be found really in the apathy which exists among the great mass of our population on all matters connected with education, and of which our inefficient teachers and Trustees, and (I may add) Local Superintendents, are only manifestations. This apathy is, in my opinion, only to be removed by making the office of Local Superintendent more of a reality than it is, and this can never be until there is a change made in the mode of appointing and paying them. Being liable to removal at the end of each year, without regard to the ability or zeal they may have shown in the discharge of their duties, they have no special inducement to the exhibition of these qualities. Not only ought candidates for this office to be thoroughly tested as to their fitness for executing its functions, but they ought also to be required to give their whole time and attention to it; and then, of course, they should have a locality assigned them, and be paid accordingly. The cause of the non-attendance of children is reported in almost every case "in-difference of parents"; yet I think that, in many cases, poverty and distance from the school-house are the real causes. With respect to religious instruction: in three or four schools the Ten Commandments are taught, and in a few more the Bible is used, and the daily exercises opened and closed with prayer. In a great many instances, however, the teachers themselves are utterly destitute of all religious sentiments, and I fear this class is on the increase. Allow me to make one more suggestion. Does not the system on which the public money is distributed tend to make Trustees and teachers dishonest? Is there not actually an inducement given to persons whose moral training has not been of a high order, to act dishonestly—an inducement strengthened by the extreme difficulty of detection? Parties who make exaggerated returns will always be careful, of course, to make their Register correspond; and the people of the School Section, who are the gainers by the fraud, will, you may be sure, take but little pains to detect or expose it, especially when informers are held in so much contempt. There is, at least, one case in the Township of Bastard and Burgess in which I have strong reason to suspect that exaggerated returns of the attendance are made, and that this has been practised for years, and yet there seems to be no way of actually proving the guilt of the parties.

20. *Charles N. Hagerman, Esquire, Escott Front.*—It is impossible that the regulations with regard to religious instruction, could be followed and carried out in a mixed population such as occupy this township; with a few exceptions, where they can be and are followed, the moral learning of the pupil is perceptible. The revised programme is observed at Circuit Board Examinations, and the questions are printed. The number of children not attending any school is considerably in excess of former years; and as it occurs mostly in the river and island sections, I charge it directly to habits contracted by mixing more or less with emigrants from the United States, who came amongst them during the late war. One new brick school-house has been built in Section 19 the past season; in fact the old structures, which were never worthy of the name (school-house) are fast giving away to more permanent structures. On the whole, although the interest apparent in the cause of education is not what it should be, the sentiment in most of the sections, is for better houses and better teachers, a consummation devoutly to be wished.

21. *David F. Bogert, Esquire, Kitley.*—In making my Annual Report upon the

condition of Common Schools in the Township of Kitley, I am not aware that I have any circumstances to report worthy of special notice. It is probable that the Common Schools in this township are not singular in their general management, or particular mismanagement. There is no little annoyance experienced by Local Superintendents, arising from sometimes the inability, sometimes the inactivity, of Trustees. As a rule, however, I must speak favourably of the interest apparently taken in their respective schools by the Trustees. And when Trustees are really in earnest one can bear with and assist them in their oftentimes most trying situations. In those sections where the Trustees take the greatest interest in the welfare of their schools, a system of giving prizes has been instituted with the happiest effects. Of course, as in all competitive examinations, some of the children are dissatisfied, and the teacher often wrongly blamed; but still one cannot fail to observe the good results which flow from the system, in an increased attention to study, a more earnest striving to excel, and a more systematic and orderly mode of working, both on the part of teacher and pupils. And this leads me to speak of the influence for good or ill, exerted by parents indirectly as well as directly. One can tell very quickly, upon entering a section, and talking to the children and teacher, whether the parents take that interest in their school which they should, and which is most necessary for the real success of the school. This is especially noticeable upon public examination days, and it is to be sincerely regretted that the parents, as a rule, take such a little interest in the education of their children. Another point which calls for a remark, is the manner in which school-houses are too often neglected. We have some school-houses in this township, which are comfortable and creditable to the sections in which they stand; but we have also many school-houses which are a disgrace to the freeholders and householders of their sections. And to range to say, it not unfrequently happens that the largest and richest section has the poorest and most discreditable school buildings. I make this a point of special notice in visiting and delivering lectures, as well as in private conversation with Trustees and property-holders. In speaking upon the subject of teachers much might be said, yet one must content one's self with noticing a few general points, and first of all, let me protest most strongly of the manner in which certificates have in times (now perhaps happily) past been granted. I am not saying too much when I state, that persons have presented themselves as candidates for certificates already holding certificates, who could neither spell decently nor read creditably. The circuit has been flooded with teachers unfit to teach and too indolent to seek a livelihood in other ways. Too indolent to work and content to teach school even (as one of them remarked to me) if they only got one dollar per month. Such a state of things, I am happy to say, has been greatly upset by the systems of paper examinations recently instituted, and also by the system, not yet popular in every township, of appointing as Local Superintendents men not only capable of examining candidates, but also conscientious enough to deal impartially and treat every one alike. And this brings me to speak lastly (and it will probably be my last opportunity as it is my first) of the light in which my office and all other municipal offices are regarded by too many of the inhabitants. The office of Local Superintendent, like the office of Township Clerk or Treasurer, or any other, is looked upon as worth so much in dollars and cents, and therefore in appointing him, the Reeve seems to say to himself, not who will be the fittest person for the office; not who will try most to raise the tone of our Common Schools and the standard of education for teachers; not who will be most acceptable to parents, Trustees and children, but rather (as it would certainly appear very often) who most needs the seventy or eighty, or one hundred dollars? who is the fittest person to have the money? It is looked upon as a commercial speculation. The interests of education seem little thought of, the number of dollars the office yields, seems the only thing worth considering. As I have held the office only for one year, of course many things, both of duty and of interest to the Department, have been possibly over-looked, and it seems a pity that the Local Superintendent should be changed so frequently. To say the least, for like a constant changing of teachers, the cause of education cannot but suffer under such conditions. Is the day soon to arrive when some person shall have the superintendency of schools, whose whole time shall belong to the Department, and whose whole duty it shall be to attend to the Common Schools in his own district?

VIII. COUNTY OF LANARK.

22. *The Reverend Alexander Mann, Pakenham.*—During the last year, the schools under my superintendency were generally conducted in a manner which gave satisfaction to the parties chiefly interested. One of them was taught with distinguished ability and success. The teacher's services were also duly appreciated. This was evinced by the numbers who attended the public examinations of his school. I think that there were more present on these occasions than what his annual report indicates, and all seemed to take a lively interest in the proceedings. It affords me pleasure to learn, that his Trustees have increased his salary for the current year. This indeed is only an act of simple justice. I may add that the teacher to whom reference is made holds a second class Provincial Certificate from the Toronto Normal School. As regards school libraries, I have nothing favourable to state. It is but too evident that they are not answering intended purposes. To what it is attributable I cannot tell, I am satisfied, however, that the inhabitants of this township are not wholly in fault. I am of opinion that there are not a few of those, who would esteem it a privilege, to obtain the perusal of books containing interesting and instructive information. With respect to children of legal age who do not attend schools, some reside too far from the school-house of their respective sections, while others are necessarily engaged in assisting their parents in agricultural work. I believe that almost everywhere, where the parents are in favourable circumstances, the younger members of the family are not deprived of the benefit of a Common School education. The revised programme for examination of teachers is observed, but the questions have not hitherto been printed; I may mention, that in addition to those, candidates for certificates have been subjected to an oral examination. The reason of this is, that parties who can acquit themselves creditably in some respects, are often very deficient in first principles. In so far as religious instruction is concerned, it appears to me that all that can be done is done, that the holy Scriptures are read daily, and that the schools, with one exception, are regularly opened and closed with prayer.

23. *The Reverend John McMorine, D.D., Ramsay.*—Having, in consequence of advancing years and infirmities, resigned my office of Local Superintendent, I beg in this my last Report to congratulate you that under the the judicious measures passed by the Legislature, on your recommendation, followed up as they have been by much executive zeal and diligence on your part, our educational system is doing a vast deal of good work in the country; and the good is progressive. Teachers are becoming more numerous and better qualified; those who pass them are becoming more stringent in their examinations; school-houses are gradually being built more neat and roomy and comfortably finished than before; and they are better furnished with the apparatus necessary for educational purposes. And yet all is not as it should be. In this new country, where the physical is more looked to than the intellectual, many parents come far short of the ambition they should have for a healthy and elevating education for their children. Comparatively few make it a point to carry their children up to the full advantages offered them by the Common School. Most of the pupils are taken away from the schools just at that stage when the dryness of what is rudimental is passing into the interest of what is gratifying to an ingenious mind. In consequence, no taste for reading is generally acquired, and animal pleasures are resorted to instead of the purer delights to be found in perusing works that inform the judgment or cultivate the higher principles of our nature. There is still a lamentable irregularity in the attendance of children at school. The irregularity is becoming allowed and systematic. It is reaching the farce of an established rule. A very little now takes away a child from school: no shame is felt by the parent in doing so. The disease, I believe, will be cured only by a law that enforces attendance. It is almost needless to repeat that in the country the regulations about religious instruction are a dead letter. Their execution is an impossibility. The revised programme and printed questions are now always used, and with good effect. In general, the school libraries are well cared for, books being covered and labelled and properly numbered, but in some cases there are marks of neglect. The influence of the school libraries is difficult to trace; it is not striking, or at all apparent. Prizes have been given in very few of our schools in the Township of Ramsay; but they have a good effect in stimulating the children. I may remark, in closing, that some given to intemperance still find their way into some schools. Being sometimes good teachers,

and having contrived to get a certificate of moral character, they pass the Board and are chosen by Trustees. Local Superintendents wait for a complaint or charge against them; but none comes. In consequence, they are allowed to retain their situation, while it is notorious to all that they sometimes fall into the grossest extremes of intemperance. I may say, however, that very few indulge in such habits among our teachers.

24. *The Reverend James A. Preston, M.A., Beckwith.*—The Common Schools in the Township of Beckwith have all been open during the past year. I think I can safely say that upon the whole, there is a marked improvement in their character, and in the style of education imparted in them. In very few indeed, have prizes been given at the examinations, but where this has been done, notwithstanding the usual envy on the part of the unsuccessful, towards the successful pupils, has been somewhat apparent, yet the stimulus to exertion, which has been afforded by means of rewards distributed as the result, not only of examinations, but of the marking for the whole year, has produced a salutary influence. The Township Council of Beckwith, has granted the sum of ten dollars towards the purchasing of reward books, to be adjudged as the result of a competitive Township examination, to be held in the ensuing summer; ten dollars more will be added by the liberality of private individuals. There are very few libraries in the township, and I regret to say, that even these are not taken advantage of. The books are in most instances neither numbered nor covered, and, indeed, as a general rule, not even read. The revised programme is used in the examination of Common School teachers, the plan adopted being that used in the collegiate examinations, by establishing a maximum and minimum of marks in each class, and assigning a value in figures to each question. There is also a distinction made in the first class, an additional paper being added for those who desire to have the certificate "with honors." There is a disposition on the part of the Board of Public Instruction at Carleton Place, gradually to elevate the standard of qualification each half year, and by so doing improve the class of teachers; and this, with the systematic plan of examination by marks has produced a marked improvement thus far. A rigid scrutiny is also made into the moral qualifications of candidates, with a view to make the teachers as far as possible, persons who will teach by example as well as by precept.

25. *Edward Byrne, Esquire, Burgess North.*—I may here remark that the total population of the township, as near as I can ascertain, is 1,400. Out of that number there are reported to me, by the Trustees of the different School Sections, 280 children of school age, of whom 265 attend school, more or less, during the year, and fifteen are reported as attending no school. By some Trustees no cause whatever is assigned why they are not attending; by others, neglect of parents; the latter must necessarily be the principal cause, for all the schools in the township, Union and otherwise, are conducted upon the Free School principle, consequently, parents cannot assign poverty as a cause for not sending their children to school. In a pecuniary point of view they pay as much when they do not send them as when they do. Comparatively speaking, it is a small number that do not attend school, but I see no reason why it should be so large in a township where the schools are all free. In School Section No. 2 prizes were given, and with flattering results—I might say great success; and I here speak, first, from personal knowledge, and, secondly, from the unanimous testimony of several parents with whom I consulted, their answer invariably being, that their children made more progress during the six weeks they were contending for the prizes than they did for as many months before. The revised programme for the examination and classification of teachers is duly observed; questions are all printed, and the examinations are exclusively conducted by written questions. At the examinations held in Perth, thirty-four applicants presented themselves for certificates, the majority of whom were females,—a large increase of females over previous meetings of the Board. The conviction is forcing itself upon many thinking persons that the increase in female teachers is not adding much to the efficiency of many of our country Public Schools. Female teachers shine to most perfection in teaching young children, but where they have to contend with advanced boys they invariably fail.

26. *The Reverend G. W. White, B.A., Elmsley North.*—I cannot be expected to say much concerning the state of the schools in the Township of North Elmsley, as this is the first year I have held the office of Local Superintendent. I shall, therefore, content myself

with a few remarks on the changes in the school law recommended by yourself. In the first place, I believe that the time is come when the third class certificates should be abolished, as there are plenty of the higher grades to supply the schools, and many are thus enabled to engage in teaching who would be more profitably employed at something else, while those who have fitted themselves are often unable to find a situation. By abolishing third class certificates this would be remedied, as it would either be impossible for Trustees, however economical, to engage a teacher with such limited qualifications, or at so low a salary: there would be a greater demand, and, consequently, the change would be a benefit for those who have qualified themselves. Notwithstanding that the general adoption of written examinations by the Board of Public Instruction has done much to raise the standard and to secure a better class of teachers, I think County Boards and a uniform set of examination papers would be a still greater improvement. It would benefit the good teacher, because his certificate would be Provincial; he would not be subjected to the vexation and expense of frequent examinations; it would make teaching more of a profession; it would benefit the sections, because they would see that the certificate was well earned; it would benefit the municipality, because it would lessen the expense of printing. I should also be glad to see Township Boards of Trustees established, as I believe the schools would be better managed; the profession of teacher would be more permanent, and therefore more desirable, as it would not be considered so much a stepping-stone to other callings as it is at present. As to the reasons for irregular attendance or absence, I should attribute it to (1st) the great size of the section, caused by the sparseness of the population, and, therefore, the great distances which many have to travel, often in deep snow or mud; (2nd) to the fact of the assistance of the children of both sexes being needed as soon as they can help their parents, as the majority of them are not well off; (3rd) to the general feeling of indifference so often mentioned.

27. *The Reverend James A. Preston, M. A., Drummond.*—The Common Schools in the Township of Drummond, ten in number, are, as a general rule, in a very satisfactory state, as far as the method of instruction, qualification of teachers, and progress of scholars are concerned. I am sorry to say, however, that in some sections the old log school-house still stands, although the adjoining farm-houses of frame and stone bespeak the growing prosperity of the inhabitants of the section. In my visits to the schools spoken of, I inculcated as strongly as possible the necessity of erecting a better style of school-houses, as much on the ground of health as a matter of good taste and improvement in style. Some of these miserable old structures I found dreadfully overcrowded. I hope my advice will be taken, and that ere long they will be replaced by better buildings. There are but few libraries in this township, and those that do exist are not so much appreciated as they might be. The revised programme is observed in the examination of teachers, and the scrutiny into the qualifications of the candidates, moral as well as intellectual, is strict and searching. The examinations are conducted on paper, and an honor list is attached to the first class. At the Village of Innisville, in this township, the enterprise of the people has induced them to replace their old log school-house with a commodious, well-ventilated and comely school-house, in a very good style of architecture, an example which might be followed by the people of other sections with advantage to themselves and benefit to their children. The Township Council of Drummond have kindly granted the sum of ten dollars for the purchase of rewards, to be adjudged at a competitive township examination, to be held during the ensuing summer, to which special prizes will be added by the liberality of private individuals.

28. *The Reverend Solomon Mylne, Montague.*—I have to report that there are seventeen schools in this township. The teachers were examined by printed questions, and the answers were an improvement on any previous occasion. The schools are better conducted, and the lessons explained to the children more carefully year by year. In the large sections this is specially the case, and as the teachers in the smaller sections have not the advantage of revising the subject of examination by classes of an advanced character, I have appointed quarterly meetings of the teachers at a central school, where we have the different subjects of study revised. I would take the liberty of recommending to the teachers, to meet together thus, to improve themselves and encourage one another in their arduous and noble work.

IX.—COUNTY OF RENFREW.

29. *George Brown, Esquire, Adamston.*—I have much pleasure in reporting that the

schools in this township are generally improving. The parents of the school population seem to be more impressed with the importance of educating their children; and as the extent of the School Sections renders it impossible for the young children, residing at the extremities of the sections, to attend the school, especially in the winter season, the time when their parents can most conveniently dispense with their assistance at home. Several applications have been made to the Township Council, for the formation of new School Sections, which I think will be granted. The distance of some of the children from the school-house, with the inability of some of the parents to provide proper clothing for their children, and the carelessness of others, are the causes of some of the children of school age not reaping the benefit they might derive from our excellent school system. You will observe from my report, that in four of our schools, the general regulations in regard to religious instructions are followed, and most undoubtedly they have been followed with good results; in the other four, religious prejudices prevent the fulfilling of this great and important duty. The books of the libraries are labelled and numbered, and the circulation of them, I am assured, has a most beneficial effect on the adult population. In our schools, where the merit ticket system and the distribution of prizes have been adopted, the very best results have followed. It is most astonishing to see the energy they infuse into the children; producing early and regular attendance at school, and increased diligence while in it. I have pointed out to the Trustees and teachers the good results that would follow if this system were adopted in all our schools, which I hope will ultimately become general. Upon the whole, I have much pleasure in reporting that our schools are doing well, and improving.

30. *The Reverend Thomas S. Campbell, Wilberforce.*—The attendance in the schools under my charge has been better than usual, owing to the fact that I have persuaded the people at last to believe that a good and efficient teacher is the cheapest, and as that was the object many desired to attain, the result has been satisfactory to all. I am happy to say that the general regulations in regard to religious instructions are followed as far as practicable. The examination questions are written and the revised programme is used. I regret to say that prizes have not yet been distributed in this part of the Province, but hope that they soon will be. I conclude by thanking the Department for the promptness and kindness with which all my communications have been attended to during the year.

X. COUNTY OF FRONTENAC.

31. *William Deighton, Esquire, Barric.*—It is difficult to keep the schools open the whole year, owing to the small population, consequent upon so many leaving the township. Our Municipal Council established two new sections last year, which will be a benefit to a part of the township that could not attend school. The people of School Section No. 2 have elected their Trustees and intend opening the school, which has been closed upwards of two years. I am sorry to see the small salaries paid to teachers, but the sections are so poor that economy is the rule. Application has been made to me to procure some aid from the Poor School Fund, which is much needed, for parents, with very few exceptions, are obliged to work out to support their families. The school-house of Section No. 1 was burnt down two years ago, and they have never been able to rebuild it, but have used private houses, without success. I hope you will grant us some aid in building and maintaining our schools, for we have never had funds to get maps, &c., consequently, the lower branches of instruction only have been taught. The schools are all closed at present, but I will endeavour to stimulate Trustees and parents to open their schools, do their duty, and impart instruction to their children, who are, in many instances, entirely neglected.

32. *George Malone, Esquire, Wolfe Island.*—This is the sixth Report I have had the honour of presenting for this township, and in taking a retrospect of my time in the office of Local Superintendent of schools, I must say that the cause of education has made, on the whole, a very apparent advance. Section No. 1, on Garden Island, where a large and well conducted school is in full operation, now forms a separate municipality. The village schools here, one Separate and one Common, are working well, and deserve commendation and encouragement. One of the Sections is kept in constant turmoil by the meddling interference, for political purposes, of a non-resident freeholder, who possesses more wealth than prudence, and whose influence, long felt, I hope to see snubbed by the

proposed changes in the school law. No. 11, as you may see by their report, cannot hold out as a Section any longer, so that this township will only number fifteen instead of seventeen sections next year. On reading over the Annual Report of the Chief Superintendent, I find that Local Superintendents, in their communications, anticipate great results from the very searching examinations teachers have now to undergo at the County Boards. Now I submit that although this is a step in the right direction (for a man cannot teach what he does not know) yet questions in history, chronology, &c., are often missed by teachers far superior to those who may be blessed with memories, and who gain higher marks for their answers. To my mind the greatest drawback to the efficiency of our teachers is not a want of knowledge, but a want of uniformity of system in organizing and conducting schools; and this cannot be expected where every teacher is allowed his own way, based, as it may be, on the school where he himself was trained; and also where discretion is allowed in the choice of text-books. Let it be made imperative on teachers to attend a Normal and a Model School, afford further facilities for that purpose, and have only one text-book of each kind, and then, with the proposed alterations in the school law, we may reasonably look forward with confidence for good and permanent results.

33. *The Reverend Thomas S. Chambers, Storrington.*—The cause of education in this township, although presenting no marked features of progress, is, I believe, advancing. The teachers in a number of the schools are prosecuting their work with commendable diligence and faithfulness, and good fruit will, without doubt, be forthcoming. I intend in my next tour among the schools to make a fuller investigation into the working of the school system. Most of the emendations in the proposed new School Bill will commend themselves, I trust, to the good sense of the people, but I have great doubts as to the benefits contemplated in the substitution of County for Local Superintendents. Were it not that my motives would be liable to misconstruction, I would offer some objections against the proposed change, which, in my view, are weighty. I will rest content at present with saying that it will be found, if adopted, to be more expensive and less efficient. With all due deference, I cannot refrain from saying that I take exception to the slanderous fling made at ministers, among the reasons assigned for realizing this change. Most of the valid objections urged against the present mode of superintendence could be obviated by plans more suitable than the one proposed. Indeed I believe that not a few will be removed by the adoption of the new method for the Board of Examination. During the latter half of the year there was a considerable diminution in the attendance, owing, I believe, not to any decrease of interest in education, but to the urgent necessity of employing all available help for the ingathering of the abundant harvest. It is considered impracticable in country places to carry out the provision made in the school laws for the religious instruction of the young,—parents, pastors, and Sabbath school teachers, are expected to undertake this duty. The Board of Examination makes use of printed questions, and are doing all in their power to raise the standard of qualification among the teachers. Only a few of the candidates at the last meeting of the Board were successful in their efforts to obtain certificates. This faithfulness on the part of the Board may expose them to some odium and ill will, but they are determined to perform their duty fearlessly and honourably. It is a public curse to let loose upon society a batch of unqualified teachers. Libraries are at a discount in this township. This is an unfavourable sign. I look upon the reading of good books, accompanied by reflection, as needful to promote intelligence, refinement, and many practical virtues. The same spirit that thinks lightly of a good library leads the people to disregard the plan of giving prizes. It needs a little sacrifice for both objects, but money expended for such purposes would be wisely invested, and would be returned, in the way of benefits, with compound interest. Would that the people were more alive to the importance of having a sound comprehensive education. Then would they cheerfully contribute of their means for the attainment of this object. May the Divine blessing rest upon our institutions of learning, that they may prove a lever for the elevation of society, that through them useful knowledge may run to and fro and be increased.

34. *David Osborne, Esquire, Kennebec.*—I am glad to have it to say that there is a manifest change for the better in the interests of education. Two or three years ago, many of the people took no interest in the education of their children. I heard one of the most able men say he had managed to get along, and he did not know but his children could do

so to. However, since some of his poorer neighbours' children have the blessing of Free Schools, they have been able to shew him that learning qualifies even children to fill a useful position in society, so that now he is anxious to have his children educated. We have three schools, besides one Union School, in Olden and Kennebec. Upon the whole, our schools are exerting a good influence, and ere long we may reasonably expect to compete favourably with our more wealthy neighbours in intelligence and good morals.

35. *John Canning, Esquire, Olden.*—I am happy to be able to report progress in the majority of schools under my supervision; you will see by my Annual Report there are four full schools and two Union. Of one of the schools, No. 6 section, I am not able to report favourably; it is a mixed section of Protestants and Roman Catholics, and the difficulty is in choosing teachers; if a Protestant teacher, the Roman Catholic party give trouble. The Trustees have had both persuasions of teachers, and I have been called upon several times to settle differences. This section only kept their school open six months, owing to not agreeing about a teacher, and the section has a great many children in it who attend well when the parents agree. No. 2 Section was the best school this last year, both for attendance and progress. I attended an examination at the close of last year; the mistress gave prizes of her own purchasing, and the pupils acquitted themselves well in spelling, reading and writing. No. 1 Union is doing well; prizes were distributed there, purchased by the mistress; they were given merely as prizes of merit, for good attendance and good behaviour. The giving of prizes will have a good effect, as it causes emulation. I return, as an estimate, seventeen children not attending school; what reason to give I scarcely know, unless it be carelessness of parents. My lectures impress on the parents' minds the wrong they do their children by not sending them to school. I always assure them that the better they keep their children at school the less they will have to pay. I find a good deal of trouble to make out my Annual Report, and have the financial accounts—in fact, any part of them—correct, or nearly so. There is not a Trustee in the township, except one, that can make out the Annual Report. I make my Report under the circumstances as best I can. The schools are all doing well, with the exception of No. 6, which is now open, with a male teacher, who, I am inclined to think, will do better than a female.

36. *William Armstrong, Esquire, Oso.*—I am happy to say the few schools under my charge are all in good working order. The cause of non-attendance, I think, is not altogether indifference, as stated by the Trustees; the want of proper clothing is, in most cases, I think, as some such cases have come under my own observation. There has been one school-house built last year in No. 5, and about to be opened in the spring. No. 6 is getting the material ready, and expects to open in May. In the revised examination programme each applicant is furnished with a printed copy of the questions; three of the teachers hold third class certificates from the County Board, and one is teaching a private school. The library of School Section No. 3 has only about eight or ten volumes; owing to the light binding, they have gone to wreck, and some are mislaid. As regards the religious instruction, it is adhered to in three of the schools, Nos. 2, 3 and 4; No. 1 is about applying for the Map of Canada, or a small library; I have urged the other sections to do the same. The female teachers are giving every satisfaction to the Trustees and parents, and the latter hope there will be no change in the present system, especially as regards third class teachers, as they are not able to pay for higher, the school rate in this section being four cents on the dollar. We thank you for the aid from the Poor School Fund last year, and also for your prompt and kind attention to all communications.

XI. COUNTY OF ADDINGTON.

37. *George W. Sweetnam, Esquire, Denbigh, Abinger and Ashby.*—This being a new country it is not very thickly settled; last year was the first of our organizing a Municipality, the Councillors dividing off the sections. There are but two sections that are able to keep school, the other sections having but a few inhabitants, and being very poor; it makes it bad for the children, as they are growing up into manhood without education. The sections are large, so that is the cause of the children not attending the schools, as well as having no roads. You will see from our Report that we have no libraries; the people are too poor to purchase books. The examination programme is duly observed, and the questions are printed.

38. *George Bretherton, Esquire, Anglesea and Kaladar.*—I have much pleasure in presenting these few remarks upon the state of our schools, as I believe they show an improvement upon the report of last year, in some respects. The cause of non-attendance of children, is distance, and the badness of the roads; this is also the reason why the schools in three sections are closed during the winter months. It will be seen from the report that the teachers, in several sections, hold only third class certificates. I urged upon the County Board, with the co-operation of the Chairman, the necessity of granting third class certificates for this municipality; otherwise, these schools would have been closed on account of the difficulty of getting better qualified teachers, in consequence of the low salaries offered. The general regulations, with regard to religious instruction, are not followed so well as I could wish. This, in some measure, may be accounted for by the fact, that the schools are attended by almost an equal number of Protestant and Catholic children, and the teachers are fearful of giving offence. There is only one school that is opened and closed with prayer. The revised programme for County Board examinations is observed, and the questions are printed. The influence resulting from the distribution of prizes has been good, so far as respects exciting a spirit of emulation, and increasing industry in the prosecution of studies. The prize-books, of which \$48 worth were distributed, were awarded to successful competitors in the elementary branches, at a very well-attended public assemblage of five out of the six schools in these townships. The other school, Section No. 3, being very remote, I held a separate examination there, at which I distributed the apportionment of prizes due to this section. Although the school-house is situated, and the inhabitants of the Section reside, in the wildest and most sterile part of a somewhat barren region, yet, I must say, that the children stood the test of a careful examination, in a way that did credit to themselves, and teacher, who, by the bye, has only a third class certificate.

39. *Reuben N. Neely, Esquire, Sheffield.*—I am happy to say that we are progressing a little, but not as much as I would wish. We have so many little log shanties, it is impossible for the teacher to do justice to the pupils in his charge. I have been trying to persuade them to build better houses in many sections; but it is impossible to move them in that direction. The people are very poor: generally, the Township of Sheffield is classed among the poor townships of Canada West. Many of the inhabitants appreciate education, and many are very careless about their children, whether they receive any education or not, and if it were not, for our good school system many would grow up in ignorance and without education. The revised programme has been faithfully attended to, and the questions are printed. The regulations are very poorly observed in some of our schools. There have been a few prize-books given out this year, and I have been trying to get the Trustees to send to the Department for prize-books and maps, to encourage the children in their studies; but the cry is that they are too poor. I think a few of the sections will send this year to the Department for maps and prize-books. Our examinations, the parents and guardians pay little attention to. When I visit the different schools I generally give them a lecture. Our schools are all in operation but one, and that will be in a few days. We have had an application to our council to establish another section. Then we shall have in all fourteen sections.

40. *The Reverend Thomas Stanton, Camden East.*—After one year's experience of the working of the schools in this township, I may be permitted to say that the state of education here is not altogether satisfactory. Yet, perhaps, our schools have done as much as could reasonably be expected of them, all things considered. A large proportion of our children are now receiving public instruction, and almost all, if not all, have attended school and learned less or more of useful knowledge. But partial success should not blind our eyes to defects and short-comings which may be remedied, and which ought to be, without unnecessary delay. What they are, the follow statements will partly discover. We have in this township some school-houses which their owners would consider unfit for any other purpose, and few, if any, with proper school furniture or apparatus, and not one school library, as far as I know; there are two or three belonging to Sunday Schools. Of moral and religious teaching I fear there is very little. Most of our schools, it is true, are opened and closed with prayer, and in some, portions of scripture are read daily. Our teachers, generally, receive small wages, and, perhaps, deserve less, being, for the most part, mere youths, without experience, and only casuals. Before the art of teaching has been thoroughly acquired, they accept other or more lucrative

situations, and so make way for a fresh supply of boys and girls to run the same course. This, indeed, is the inevitable result of a penurious policy, which is apparently very dear to most of our Trustees and School Sections: it may be of necessity in some instances, but not assuredly in all. At any rate, teachers have not, like other men, a life profession; and they are not likely to have it till cheapness takes its proper place among the motives which influence us in school matters. The County Board is endeavouring to remedy the evil, by observing the authorized programme for examination of teachers, by carefulness in granting certificates, and by withholding third class certificates, except under peculiar circumstances. The examination questions are all printed.

XII. COUNTY OF LENNOX

41. *Augustus Edgar, Esquire, Fredericksburgh North.*—The schools under my charge have, with a few exceptions, been working favourably; the average attendance has been very good, considering the very busy season we have had. I report forty-three who have not attended any school; too large a number by far for a township of this size. The main cause of their non-attendance appears to be carelessness of, or on the part of, their parents. It is astonishing that parents will be so blind to their children's best interests as to deprive them of the greatest blessing they could bestow upon them, viz., a good education. The general regulations in regard to religious instruction, as you will see, with three exceptions, are strictly observed, and with good results to both teacher and pupils. The revised programme for County Examinations is strictly observed and the questions are printed. The library branch is not very strong in this township, as you will see. The books are all properly covered and numbered, and a great deal of good has already been realized from this branch, and I hope to see a great advance made in this direction, in the course of a few years. There have been prizes distributed in a few of the schools, which show already their good effect in the energy which stimulates the scholars, and a promise of further good results.

42. *John O. Sexsmith, Esquire, Richmond.*—I am happy to be able to inform you that the schools are mostly in a prosperous condition, evincing a good deal of life and vitality. As you are aware, while in Toronto last September, I purchased \$80 worth of prize-books and \$20 worth of merit cards. Toward this amount the Hon. B. Flint contributed \$20, the Township Council \$20, and myself \$10. The merit cards I divided among the School Sections, to form a basis upon which I proposed distributing the prizes, having first called a meeting of the teachers, and submitted my plans. The time for awarding them being fixed for the 21st of December, the children went to work with a will, no weather preventing their attendance at school. I was informed by many of the teachers, they had not half the trouble in keeping order they previously had. I divided the books according to the average attendance, and then gave the first prize to the pupil of each school holding the greatest number of cards, as reported by the teachers. As the above is the principle upon which I acted, it appeared to give general satisfaction. It was an interesting sight to see the children coming from the various sections to the Town Hall to receive the reward of their toil and anxious solicitude. When the pupils were all arranged in proper order, the teachers at the head of their schools, and the books placed in packages before them on the table, corresponding with the number of the section for which they were intended, appropriate and interesting addresses were delivered by the Rev. Messrs. Chisholm and Kennedy, and E. Storr, Esq. The prizes were then handed to the teachers, who gave them to those who were entitled to them, when was sung "God save the Queen," and all were soon on their way home, as the day was very cold. It is in contemplation to take the same course this year also. R. J. Cartwright, M.P.P., has placed in my hands ten dollars for this object, and I propose adding ten more out of my salary. I have reason to hope the Township Municipal Council will grant twenty, which will make \$80 when the 100 per cent. by the Department is added; this will bring us a nice lot of books for prizes. I would just remark it is my firm conviction, if our public men would appropriate a portion of their money in this way, it would be much better for the morals of the community, than to spend it in the manner many of them do, in gaining seats of honour which are not lasting.

XIII. COUNTY OF HASTINGS.

43. *Frederick H. Rous, Esquire, South Riding.*—*Libraries*—These remain in much

the same state as when last reported, not available for use in the various sections, from the want of proper arrangements on the part of the Township Councils. The reports on the Sunday School Libraries are not very reliable; I am pretty certain there are two or three times the number reported as in operation. If you are inclined to take an estimate, I think you would be safe in multiplying the total number reported by three, for Sydney and Thurlow, and by two for Tyendinaga. Prizes are occasionally distributed in a few of our schools, and where this is done systematically, as proposed by the Department, in connection with their different series of Reward Cards, &c., I believe an advantageous result is generally obtained; such, at least, is the testimony of the teachers who have adopted this plan, and it is confirmed by my own observation of the state of discipline in their schools. Our *School-houses* continue to improve, large and good new ones taking the place of small and badly constructed old ones. The internal arrangements for desks, &c., are so far improved that we have now but few school-houses left where the seats and desks are not arranged upon the plan of two scholars as the maximum for each desk. The greatest deficiencies in the schools at present are the want of proper ventilation and suitable outbuildings. In these two particulars, the great majority of our school-houses are still far behind what is required, and will probably remain so until the abolition of School Sections, the arrival of the Millenium, or some equally desirable change. The *School Books* now in use are, in almost every case, those authorized by the Department. I have heard many expressions of satisfaction that the Educational Department is moving in the direction of greater stringency in this respect, and I certainly think that such a course is due to the country. In grammars, it would be a great boon if the sanction of the Council was at once withdrawn from all except two,—say Robertson's large and small; so, too, with all the other books—Geographies, for example—so soon as Lovell's Maps are what they should be. A great deal of interest is felt in this county with regard to the revision of the Reading Books. There is a general feeling among experienced teachers that the Fifth Reader is not adapted for teaching reading, and that it is better to have Philosophy, Physiology, and, perhaps, History, taught from other text-books. The long and detailed account of the Jewish History is also felt to be out of proportion to the sketch of General History given, and is, perhaps, the less necessary, on account of its having comparatively few points of contact with the other portion. There is a suggestion which I should like to make with regard to these Reading Books, arising out of the fact that the sequel to the Second Book is not generally used in our schools. Teachers are not acquainted with it, and do not think of it, because it has no number in the series. They go, naturally, from the First to the Second, then to the Third, and so forth. Now, as I think the sequel has a valuable place in the series, I would suggest that in the revised edition the sequel be made the Third Reader; the present Third Reader the Fourth, and the present Fourth, the Fifth. The scholars are so often hurried forward through one book after another, in utter disregard of the official programme, that the getting another volume into use in the earlier stages will be a valuable delay to them, and tend to promote *thoroughness of teaching*. This "thoroughness" of teaching, is still the great desideratum in our Common Schools. If ever the time should come when our Common School teachers will not spend a large proportion of their own and their pupils' time over lessons which they are sure to forget again; if it should become the general practice to work in the spirit of the old exhortation,—“Line upon line, precept upon precept, *here a little, there a little*,” instead of discursive incomplete study, with rapid passing from subject to subject, getting a glimpse of many truths, a quick examination of very few, and a permanent impression of a much smaller proportion. Such a revolution in our schools will produce a change more important in its future influences than will ever result from the grand experiment of Confederation, with all its obvious advantages and the prospective benefits that are to follow in its train.

XIV. COUNTY OF DURHAM.

44. *The Reverend George Blair, M.A., County Superintendent.*—Without reckoning the separate municipalities of Bowmanville, Newcastle, and Port Hope, each of which has an excellent Union School, there are in this county ninety-five rural School Sections, all now provided with school-houses, of which forty are of brick, one of stone, thirty-five frame, and nineteen log. In general, the brick buildings are good, and a majority of the thirty-five frame school-houses are also comfortable and commodious modern structures. Indeed, several of the log houses are as good as can be expected in the present circumstances of the sections to which

they belong, and may serve a useful purpose yet for some years. But this cannot be said of all of them, and I hope to see those houses, both frame and log, which are totally inadequate for school purposes, and insufficient for the accommodation, health, and comfort of the children, soon replaced by better. In the course of the past year, four new school-houses have been erected, two of which are very superior brick structures, one frame, and one log, but with desks in modern fashion, and it gives me pleasure to state that I know of some other sections in which new school-houses are contemplated, and will be built soon. In our ninety-five rural schools, there are ninety-nine teachers, of whom seventy are male and twenty-nine female teachers. On the whole, the tendency in this county is to an increase in the number of female teachers, who are admirably qualified to instruct the younger children; but I have found that in some of our School Sections young men excused themselves for not attending school on the ground that a female teacher was employed and they felt ashamed to go. In 1866, seventy-four of the ninety-five schools in the county were free, or the parents were merely required to supply fuel; and in this category were included all the schools in Manvers and Cartwright, fifteen of the eighteen schools in Clarke, fourteen of the seventeen in Hope, twelve of the twenty in Darlington, and ten of the seventeen in Cavan. In general, the better class of schools are very well supplied with maps and other necessary apparatus, and I have had the pleasure of getting these requisites introduced for the first time into many of the smaller schools, in which they were previously unknown; so that there is now scarcely any school in the county, not even the humblest frame shanty or log cabin in the forest, that has not at least a Map of the World and a Map of the British Provinces, along with a small globe and some other useful auxiliaries to instruction. I have also strongly recommended the renovation and liberal use of the black-board, which was almost neglected in some schools. I have lectured in every School Section in the county which offered any encouragement to do so, or any prospect of an audience. Sometimes I have lectured to half a dozen people, in a church or meeting-house; sometimes to interesting and attentive audiences, in a forest cabin; sometimes to large and respectable congregations in school-houses, in which there was not a single Trustee present. Unfortunately, those who stand most in need of lectures are those who do not attend them. Both in my lectures and visits I have laboured to disseminate the fundamental principle, that good discipline is not only essential to good teaching, but that it is itself the most important lesson which can be taught in school, and without which all the other lessons are comparatively useless. It gives me pleasure to state that in my later visits, I have found generally a very marked improvement in discipline, and I think there are very few sections in this county in which the idea prevails, that a person may be a good teacher, although not a good disciplinarian, as if the culture and development of those habits and qualities which good discipline implies—order, punctuality, silence, cheerful obedience, respectful attention, and steady, patient working—were not the most important evidences and aims of a good and faithful teacher. The branches in which I have found the most marked deficiency in our schools are reading, spelling and grammar. I have, therefore, made the elementary subjects occupy a very prominent place in my examinations, and think I can say sincerely that I begin to observe signs of improvement. In connection with the material furnishing of the schools, I have hitherto made it my chief care to see that they were properly supplied with text-books, slates, copy-books, maps, tablet lessons and other requisites, without which the daily operations of the school cannot be efficiently carried on. I propose now to direct my attention to two objects of primary importance:—(1st) To encourage the distribution of merit cards and prizes in every school, so as to create a healthful emulation, and (2nd) to procure, if possible, the establishment of public school libraries in every section. At one time there existed in Darlington a township library, which was afterwards divided among the different School Sections; but the books are now almost entirely lost. In some cases they were finally disposed of by being given away as prizes. At present, I regret to say, there are not above a dozen School Sections in the whole County of Durham, which have anything in the shape of a library. Considering the facilities which are offered for obtaining so valuable a privilege, this is a deplorable state of things, and I hope to have a different account to render next year. In this county, our examination papers are printed, and all necessary precautions are now taken to insure perfect impartiality, and the imposition of a thorough test of qualification. Third class certificates are granted with great reluctance, and only in special cases, and for very limited periods. In my Report for 1865, I remarked that the most serious defect in the working of our present school system was the frequent

change of teachers, entailing a virtual loss of time of two or three months per annum on most of our School Sections, and very much obstructing the work of the Superintendent. At the beginning of the year 1867, I find that of the ninety-five schools in the county no less than forty-two have received new teachers; or, in other words, the changes in the county at the end of the year amount to forty-four per cent. This is, undoubtedly, a very great evil; and, until the position of the teacher is made more permanent, we cannot expect much further improvement in our educational system. A school will improve one year under a good teacher, and will fall off the next two or three years under a bad one. A teacher who, by his apathy, has suffered his school to decline will often find employment in another school, even in the same township; at, perhaps, an advance of salary, if he happen to know a leading Trustee. It is one result of the frequent change of teachers, that the returns on many of the points embraced in the Annual Report are, I fear, very unreliable. A teacher who is merely sojourning in a section for a year, will not take the trouble to inquire minutely into details which would be deeply interesting to a teacher having good prospects of permanence. I have not much faith, for example, in the returns given of the number of children not attending any school; and yet a more momentous question could not engage the attention of a faithful and conscientious teacher. In the new course of visits and lectures which I am about to commence, I intend to call attention to the very great importance of inquiring more carefully into certain statistical matters, and rendering the reports more accurate.

XV. COUNTY OF PETERBOROUGH.

45. *Robert Casement, Esquire, Douro*.—The general cause of non-attendance of pupils in this township at the school of the section in which they reside, is the distance from residence to school-house. I do not think the regulations as to religious instruction are followed in any of the sections. From what I have seen and know, I am of opinion that if the distribution of prizes were more generally practised it would have a very beneficial effect on both parents and children; but as a general rule Trustees are so anxious not only to keep down, but to lower the expenses, that even when money was given these last two years to each section to buy prize-books, on condition that the same amount would be added by the Trustees, I believe, with only one exception, the money apportioned was added to the general funds of the school corporation.

46. *The Reverend Frederick Burt, Lutterworth, Galway, &c.*—This northern portion of the County of Peterboro' is well supplied with schools, and these, with few exceptions, are being taught by teachers who may be reported as good. The majority are females, who are painstaking and careful in teaching the little ones,—I mean those to whom school life is really hard—the alphabet classes, with those of the First and Second Books. Moreover these hold second class diplomas, are respected by Trustees, parents, and pupils in their several localities, and appear to be in their vocation. Three male teachers are also at work in my district; two are well advanced in years, one of whom has spent a lifetime in the useful mission of teacher. These three hold second class certificates but scarcely do so well with regard to popularity as the female teachers. One good sign, I must mention, is the continuance of the same teacher in the same school for a second, and in some instances for a third year. Our school-houses are good, cleanly kept, well warmed, decorated, and the education of "taste" is carried on in many cases by ornamental work produced by the scissors on paper, to the good of the elder girls in particular. I commend the teacher in these cases publicly, and recommend to the children like action in their own homes, rooms, or it may be bookshelves. The small minority of indifferent teachers included the case of a young person, engaged on the principle of cheapness; but parents and Trustees are so disgusted with the trial, that the healthy adage, viz., "The best teacher is always the cheapest," will henceforth be their rule. Referring to school-houses as a separate item, I can report five new ones,—a credit to the country, both as to manner of building and enterprise, when the newness of this part of the country and failure of crops is taken into consideration. The present generation are pioneers, and are surrounded with difficulties. Trustees, too, can be spoken of as men fitly chosen, in many cases zealous and ready to exert to the utmost their influence for the good of education. Instances constantly occur showing that no hasty reformation can be effected in minor school matters, as fencing the yards, building sheds, &c., yet there is hope that as the townships fill in with settlers, more money will be available, the outside of all our school-houses will please the eye, and so a love of order and tidiness be produced consonant with the

daily teachings within school walls. Religious instruction is not so general as the Education Office would, I am proud to say, have it to be. In favoured spots are Sunday Schools. The clergyman of the Church of England, at Minden Village, takes advantage of the "Minute 22, Ap. 57," and on Fridays attends the Common School and gives Bible lessons to all who please to stay, and nearly all the pupils do so. The Superintendent has just commenced a series of moral and religious lectures, once a week, on the twelve general rules placarded on the school walls, taking one rule each time. He has also lectured on education in several places, and as a pattern to teachers and an example of what parents should wish to see adopted, he has given an object lesson. This is also meant to shew the mental training (and an aid to spelling and writing) that the teachers should seek to infuse into their methods of treating all subjects. I am endeavouring to raise the standard of writing in this district: it is at a very low ebb. I believe, if Trustees would provide head-line copy-books of the several grades, and insist upon their being used carefully, and consider them the property of the school, until the quarterly examination days, then to be examined in detail by the Local Superintendent, visitors and Trustees, commented upon, and then be given up to the writers whose names they bear, that the bad writing of the present would vanish in six months. The *Journal of Education* is well received; but many teachers even yet do not receive it for "Friday readings," because the Trustees retain it. I am trying to obviate this for the new year. This district is far from your standard in the matter of libraries. Time must, I find, be given the people on this subject; yet I shall not fail to press the matter. Through the noble incentive of the Honorable B. Flint, M.L.C., who gives \$10 whenever a Board of Trustees or Township Council gives that amount for the purchase of reward books, nearly all my schools had rewards. Little ones had been gladdened with the possession of a beautiful book, looked for, worked for, and then valued the more because handed to them by the Local Superintendent before schoolmates, parents, and Trustees, accompanied with a recital of their marks and a kind remark into the bargain. These books are read at home, and lent sometimes, therefore we may hope for benefit from their distribution. The revised programme for County Board examinations for certificates is duly observed, and examination papers are printed. An adjourned meeting of the County Board is to be held annually at the nearest chief point to this backwoods locality. The first trial meeting was held at Bobcaygeon, when quite a number of teachers attended. Teachers suffer much from heavy expenses and the bad roads at the times which the Board has fixed for its chief session, so that the adjourned sitting is quite a boon. I need scarcely say that all the schools in my district are free, and but very few children are non-attendants. Two new sections are about to erect school-houses; thus progress is the order of the day. I must mention that by far the greater portion of our schools are enlivened by the singing of appropriate school pieces, all moral, some religious. I set a value on this, and say so when inspecting. I hope next year to report some under the elements of drill. We are loyal, though living far back. May the cause of education prosper in our day, for with it is wrapt up our country's weal.

¶7 *The Reverend M. A. Farrar, Asphodel.*—I do not know that I have anything to add to the remarks made in my last year's statement. The same benefits and disadvantages continue to operate. The most mischievous feature in our Common School system seems to be the fact of the constant change of teachers. From what I saw and had occasion to observe it does an infinite deal of harm; and I see no way of putting a stop to it, except by getting the teachers to take a lease of their office. If you could be sure of securing a good teacher, this plan would work, I should think admirably; but I foresee that if, on the contrary, you fall in with a bad teacher, you would only be rendering permanent an evil which before was only temporary. We are trying hard, by raising the standard of demand, to get our teachers to remedy this disease for themselves, and to work themselves up into a fair competency for their posts. With what success time only can tell. The causes of absence from school are the old ones; indifference of parents, to which may be added the inability of parents to contro their children, who in many cases seem to go to school or stay away, just as they like. In spite of all this the schools generally are prospering; a few are in an excellent state of efficiency and have vigorous constitutions. The use of the Scriptures is not general. Libraries are beginning to be set on foot, and, if encouraged a little more, would soon produce good effects. But your Common School Trustee is a perverse animal, requiring nice management of his

bigotries. He is much terrified by the prospect of expense, and the spectacle of a disappearing dollar usually brings on a fit of temporary insanity.

XVI.—COUNTY OF VICTORIA.

48. *Richard Delaney, Esquire, Carden.*—I only hope that the time is not far distant. When your plan of Township Trustees will be adopted, instead of the present system of Section Trustees, and once more repeat what I mentioned before, that it is easier to get three Township Trustees than twenty or thirty such as are elected under the present system. And whilst I do advocate a change in the present system of electing Trustees, I likewise advocate payment; for in this age of money making, it is not fair or just that Trustees should be called upon to give so much of their time for nothing, hence the cause of the great indifference of Trustees, "want of pay." The cause of the non attendance of children at school is the same as in other places, want of means and clothing in some instances, and in other instances indifference of parents. I am sorry to say, in the backwoods of Canada, there are many such parents, but I hope, as the times get better, and a merciful and kind Providence blesses the poor man's labour with the return of good crops, the schools will be better attended, and thus will the rising generation have cause to bless and pray for the welfare of the founders of the Common School system in Canada. And, as a Roman Catholic, I heartily approve of the present system of Common School Education, for it tends to do away with sectarianism on both sides; for where the Protestant and Roman Catholic youth are educated in the one school they will contract a friendship for each other, which will make them loving friends and good citizens. There are five schools open this year; School Section No. 6, had no school last year, but is open this year; another school-house is being erected in Section No. 3, which will be ready some time in the summer. There is no school-house in operation in the Township of Dalton, so there is no use in sending a report for that township. In conclusion, I must once more thank you for your very great kindness to me as a Roman Catholic (as well as to the poor of this township), and pray that the Almighty God may protect you from your enemies, and spare you many a year to come, for the good and welfare of the poor children of Canada, for many and many a child owes its education to your kind attention. And when you have closed your earthly career, may it be said of you, as was said of old, "Well done, good and faithful servant. Enter thou into the joy of thy Master."

49. *Robert Johnson, Esquire, Bealey.*—I have now been four years Local Superintendent, and during that time I do not think that I have received one Trustees' Report filled up correctly, so that it is useless to try to get a correct Report until we have more intelligent Trustees.

50. *Edward Stephens, Esquire, Digby and Lawton.*—With regard to the progress of education in this municipality, I have to say that the march is rather slow. By my Report you will see that the total number of pupils registered during the year was 163, which is a very limited number for five sections. The Trustees in their Annual Reports have neglected to report the number of children not attending any school; the number of such children in the majority of our sections, I believe, is more than it is supposed to be. Only two of the five schools have been kept open the whole year, two nine months, and one six months. However, during the time they have been kept open, I am sorry to say the attendance in most cases has not been more than half what it should have been. The causes of non-attendance are various. Many of the larger children have to be kept at home to work; and in many instances where the larger children do not attend, the smaller cannot; and during some seasons others have to stay within doors for want of shoes and clothes. Distance and the state of the roads also operate on the attendance. However, there is a goodly number in the different sections that do attend somewhat regularly, and consequently are advancing rapidly. Some of our sections are too small, together with being thinly settled, so that they are unable to keep school open more than six months in the year. There has been no school as yet opened in Digby, but the Trustees of Section No. 1 have a school-house nearly completed, and expect to have a school in operation by the 1st of May. The school-houses are all built of logs (although there is no lack of stone) and may be said to be comfortable, comparatively speaking; they are provided with black-boards, and mostly with maps, but I regret to have to say they are very deficient in libraries. The system of free schools is adopted in all the sections, which gives great satisfaction. The authorized books are used exclusively in most

of the schools. With regard to prizes, there are seldom any granted, consequently, the effect is imperceptible; and while there are some things that may be deplored there are other things that are not so deplorable. May we not hope that, with advanced civilization and increased material prosperity, at least some of the obstacles that now retard the progress of education will be removed for ever.

51. *The Reverend J. B. Irvine, Eldon.*—I have visited and carefully examined the ten schools in this township, and I am happy to state that the result has been highly gratifying to me, and creditable both to teachers and taught. I regret to state that in one or two of the School Sections there is a considerable amount of non-attendance. The causes of this are varied; (1) Want of proper clothing; (2) bad roads; (3) indifference on the part of parents. A compulsory statute to make such parents send their children to school, would, I believe, be a great Legislative boon in Eldon. The general regulations in regard to religious instruction are followed, and with the most satisfactory results. The revised programme for County Board Examinations is exclusively observed, and the examination papers are printed. The examiners do not, however, confine themselves to the printed papers, but orally or on the black-board, put questions to the candidates for certificates. I may here state that it would be most desirable if all our teachers had attended one or more sessions at the Normal School, Toronto. The want of this training on the part of our teachers is one defect in our excellent school system. The library books are mostly covered, all labelled and numbered, and are very useful in those sections where they are. I could wish, however, to see more interest taken in the library. The influence, however, which the school libraries of the section have exerted, is of the most satisfactory and healthful character. I hope all the sections will avail themselves of the facilities afforded them by the Educational Department, of having libraries, and increasing the number of library books. With one exception, prizes are not given in the schools of this township. In the school where they are given, the scholars work hard, there is a healthy rivalry among them, and I hope the Trustees will, ere long, give prizes in every section, to every school.

52. *The Reverend John Vicars, Verulam.*—I am at length enabled to report a decided improvement in the general educational aspect of this township. For some years matters seemed for the most part at a stand still, but during the last twelve months, decided progress has been visible. Four new school-houses have been erected, another enlarged, and three new sections formed. The parents exhibit a very general desire to send their children; the settlers in the rear of the township, a new and, till recently, undeveloped region, exhibiting as great alacrity as any other. The County Board of Public Instruction has been gradually raising the standard of qualification for teachers, who are all, in consequence, persons of considerable efficiency and doing their duty well. School libraries are not as numerous as we could wish, but this may be accounted for from the fact, that the township is rather backward, and the inhabitants scarcely independent enough to appropriate money for that purpose. The frequent change of teachers still militates against the success of some of our schools. I have frequently urged upon Trustees, how desirable it would be that teachers should be made more secure in their posts. The evil will doubtless exist until the establishment of Township Boards. I can see no other remedy. Prizes have been distributed in several of the schools, with, I believe, excellent effect; a more regular attendance has, in this way, been secured. Altogether the appearance of things is far more encouraging than hitherto.

XVII. COUNTY OF ONTARIO.

53. *F. Oakley, Esquire, M.D., Brock.*—On the whole the Township of Brock is arousing to the importance of education, and it is time. The school-houses are very inferior, and the apparatus and furnishing miserably deficient. There is not a school section library in the township worthy the name. Most of the schools are supplied with maps; but globes, object lessons, and diagrams are scarcely thought of. Prizes were only given in one school in the township last year, and in that one school their distribution was attended with the most beneficial results. The attendance for the year, taking all things into consideration, was good. If the school-houses were comfortable, better furnished, and prizes regularly distributed, I am convinced there could be little reason to complain on that score. Our County Board has strictly adhered to the revised programme for the examination of teachers—so strictly that the status of our teachers, as a whole, has been gradually falling during the

last two years, so that now the greatest part of our schools are filled with second class teachers. The want of uniformity in the County Board examinations, and the frequent change of examiners, are, I think, evils that deserve the serious consideration of the Department. I know more than one teacher who held first class certificates two years ago, and who have been since improving their minds and gaining experience as teachers, yet are at the present time teaching under second class certificates. This, together with the fact that teachers are so frequently subjected to the ordeal of County Board examinations, is humiliating and annoying, to say the least, and is causing some of our best teachers to give up the business altogether.

54. *The Reverend K. A. Campbell, Mara and Rama.*—The schools in Mara and Rama keep pace at least with the general progress of the municipality. During the past year there were ten schools in operation, including a Separate School in School Section No. 5; they were all in a pretty efficient condition. In the course of the year a very commodious and substantial frame school-house was erected in School Section No. 3, so that now we have four good frame school-houses in the municipality; the others are log, but I think of a neater and better class than you generally find buildings of the same material in other newly-settled localities; indeed, the school-houses form a striking contrast with most of the dwellings of the inhabitants in the various neighbourhoods in which they are situated. The free school system was adopted in all the schools for the past year, and it is likely to be continued, as it seems to meet with general approval. Some few only of the schools were opened and closed with prayer, and as to religious instruction, it was not given in any of them. The revised programme for County Board Examinations is observed, and printed questions are proposed before each examination, by a Committee appointed for that purpose by the Board. The cause usually assigned by Trustees in their reports for the non-attendance of children at school is "indifference," a stereotyped expression, capable of various interpretations. It is not often that we meet parents who are totally indifferent as to the education of their children; such degraded beings, however, there may be. But the indifference is as often towards the teacher or towards the school, on account of the manner in which it is conducted. In my opinion, the prevailing cause is the poverty of parents, who are mostly all new settlers, struggling with various difficulties in efforts to procure the necessaries of physical existence, and to whom the labour of school-age children is often of very considerable value. Many parents are not able to provide suitable clothing for their younger children, to enable them to make their appearance in the school-room, and from some, at certain seasons of the year, the schools are too distant, owing to the bad state of the roads and the inclemency of the weather. Prizes were distributed in two of the schools, with a most beneficial result. I consider that the distribution of prizes has a most excellent effect upon children, as it stimulates to exertion which can rarely by any other means be got from them.

55. *The Reverend R. H. Thornton, D.D., Whitby East.*—In regard to non-attendance of those within school age, there are only two causes of which I am aware affecting this, viz., indifference on the part of parents, and the rate-bill, where such exists. It is quite remarkable to what extent the latter cause operates, even with those who are well able to pay. With respect to free schools, the principle may be said to be established. Why, then, it may be asked, are they not all free? The answer must be one very discreditable to those who frustrate the carrying out of the principle: it is nothing but selfishness. The proof of this is abundant. In several sections the free system is regularly opposed by some who at one time voted for it, but whose families being now grown up, no longer derive direct benefit from a school. I have dealt earnestly with many such, but with small success, although several have been brought to admit that, after all, their tax was not materially lessened by the small rate-bill. This kind of reaction selfishness prevailing over judgment has had a very serious influence in some sections. Where the rate-bill has again been adopted the attendance is invariably greatly reduced, to frequently a considerable extent. One section, for example, which, under the free system, a few years since, kept up an average of forty-five and fifty, now, under one of our best teachers, does not through the year average over fifteen to twenty: last summer it was frequently as low as twelve. Facts of this kind clearly shew that it would be a general blessing to many sections were the free system simply law. In one section of the class referred to a most resolute effort has been made for two seasons to get the system abolished. Four or five large families have given up,

and for a time the school must be small ; but could the free system prevail in it, the numbers would be still respectable. "The revised programme for County Examinations" has always been followed. Indeed, the question about the fact surprises me, as I could not conceive that any County Board would feel at liberty to do otherwise. Our questions are printed, and the examinations thorough. We have no library since the township was divided. I regret to notice a gradual lowering of teachers' salaries for the last few years, I think in all our sections. It commenced with dull times, and continues. The supply of really good teachers has not been so large as to occasion the reduction. In my lectures I have invariably insisted upon the importance of obtaining teachers of good ability, and of granting such remuneration as may secure their continuance in the section.

56. *The Reverend John Baird, Pickering.*—It will be seen that about nine per cent. of the children of school age are reported as not attending any school. The cause usually assigned for this state of things is doubtless the true one, the indifference of parents. Where so many of our schools are free there can be but few cases arising out of inability to pay. The general regulations in regard to religious instruction are but partially followed. Much depends on the teacher. Where the rules are followed in a right spirit, much satisfaction is felt, and great good cannot but follow. The County Board Examinations are carefully attended to, the questions printed and the answers strictly valued. The four school libraries seem to be valued "at least by those who apply for books." It is to be hoped that much greater attention will be paid by Trustees to the formation of libraries, and to their increase when established. Indifference in this respect is a bad sign in any section. The presence or absence of a library may be taken as a sure test of the degree of advancement in a community. In only seven schools have prizes been distributed. In some cases bad feeling has arisen, but generally, and especially where care has been taken in regard to the principle of distribution, satisfaction has been expressed. Emulation has its use as well as its abuse, and the judicious teacher will not deprive himself of so powerful a principle in the administration of his school. During the past year there has been considerable falling off in the attendance ; some of the decrease, if not all, may be accounted for by the fact that one school of considerable size has been closed for the whole twelve months, and by the prevalence in some sections, during the summer and autumn, of disease among the children, of a severe character. Two new school-houses have been erected and the erection of another is being prepared for. One of them is a very superior building, and may compete with any in any rural section. Three-fourths of the school-houses are more or less good, and the remaining fourth should speedily be renewed. As to the teaching, my attention has been specially directed to the three principal requirements of a Common School Education,—reading, writing and arithmetic. With regard to the first of these, in some schools it is very respectable, but in too many it is very imperfect. Much of this must be the fault of the teacher, but at the same time allowance must be made for the irregular attendance. In arithmetic there is generally good progress made. The principles seem to be well taught. The formation of the figures is careless. In regard to writing I am sorry to say it is very far from what it ought to be ; with some exceptions, it appears generally to occupy a very inferior place. Too little time is given, and the pupils, during the exercise, are left very much to themselves. They throw themselves into the most awkward positions, and seem anxious only to finish as speedily as possible. I cannot but blame, for much of this, the exceedingly inconvenient form of the new desks. It is almost impossible to write upon them correctly ; might not a special desk for writing be fitted up alongside one of the walls, and so made as to fold down when not in use? In few cases are copy lines used ; their absence necessitates loss of valuable time to the teacher, and a proper pattern to the pupils. Most of the copies set by the teachers are themselves not worthy of imitation. In regard to other subjects I have nothing particular to write. Perhaps in some cases too much is attempted. Were less aimed at, more would be attained. In general, the teachers apply themselves creditably to their work, and with varying degrees of qualification and amidst some disadvantages, discharge the duties to which they are appointed.

XVIII. COUNTY OF YORK.

57. *Duncan McCallum, Esquire, Vaughan.*—You will see that our schools were all open the full time, and that they were all "free" excepting four of them. In the free schools I find that the aggregate attendance was larger than in the rate-paying ones, but not at all

so regular. Indeed it is to be regretted that the very persons who should enjoy the privilege are the ones that appear to value it least; this is an evil not easily remedied; but when a community throw open their schools free to all, they have a right to see that this privilege is enjoyed as it ought. Our schools are doing pretty well, but I am satisfied that a good deal may be done. However this requires time, care, and attention from all concerned. I find that most of our schools are opened and closed with prayer, and in all except one, the Bible and Testament are read morning and evening. The libraries appear as if they did a good work; it would be well if they were replenished, say with about a hundred volumes each. In some of our schools prizes have been given, but with what result I am not prepared to say.

58. *The Reverend George S. J. Hill, M.A., Markham.*—My Annual Report for 1866 proves that the interest taken by the inhabitants of Markham in our Common Schools continues unabated. In those schools where prizes are distributed the practice is found to be beneficial, and I hope it will be adopted in every section. The papers used at the County Board Examinations are printed, and the programme laid down in the School Act is followed. It is a matter for regret that so little interest is taken in the superannuated fund for disabled teachers, by those most interested in it. It seems to me that if an entrance fee were exacted from every candidate for examination at a County Board, and the proceeds devoted to the above fund, it would be found very advantageous. In every other profession candidates for admission have to pay large entrance fees, and this after a long and expensive college course; there is no good reason why teachers should be exempt from a similar payment, more especially since the fees are to be applied, not as perquisites for salaried officials, but to their own peculiar benefit. About one hundred candidates apply in each year for certificates in the County of York. If the forty-two counties in Canada West averaged half this number, a fee of four dollars from each candidate would produce upwards of \$2,000 per annum, to be applied to the above fund. This regulation might lessen the number of candidates applying for certificates, but this would be no loss; the country is now overrun with teachers holding certificates, which, while they are in some degree evidence of scholarship, are useless as proofs of ability in the art of school-teaching. These persons, in many instances, offer their services at a very low rate, to the great injury of the skilled, experienced teacher, who is deprived of his school because he will not accept the same salary as the inexperienced youth, that is ready to supplant him for a paltry remuneration. To reduce the number of such persons would be highly advantageous, while the fact of having to sacrifice the entrance fee in case of failure would cause candidates to prepare themselves more carefully. The examiners at County Boards are continually annoyed by having to look over the badly-executed papers of candidates, utterly unfit to perform the duties of a teacher. The parties who only intend to teach for a few years might object to this fee, but it seems only fair that those who make use of school-teaching as a stepping-stone to something else, should do something for the profession of which they have made a convenience. Many candidates who apply for certificates have no intention of teaching, they are chiefly the senior pupils in the Grammar and Common Schools of the neighbourhood, they go to the examination to try their strength, and exhibit their certificate as a diploma of merit, and it is only just that these aspirants after scholastic honors, should pay some small fee to be applied as above. Every school teacher thus having, at his first outset, to contribute to this fund, would feel that, having so contributed, he had an interest in it, and might, from that circumstance, be induced to follow up the practice by small annual payments, which would entitle him, in his old age or in ill health, to a pension (increased by the fees I speak of) worthy of his acceptance, instead of the miserable pittance which is all the fund in its present state will admit of.

59. *William Watson, Esquire, York.*—I am happy to say I believe the cause of education in this township is making steady progress. This is more manifest in those sections where the teachers avail themselves of the advantages of attending our monthly Township Teachers' Association. Not unfrequently teachers allude to beneficial changes in their schools, with the remark, "I adopted this from what was said at a recent meeting of the Association." Why any teacher whole-hearted in his work is ever absent, unless unavoidably so, I cannot comprehend. The frequent change of teachers, so common in rural sections, is an evil—a great evil, and one often expatiated upon; most writers, however, impute the cause to some defects in our excellent Common School system. This, I think, is mainly erroneous; for, out of seventeen changes which have recently come under my notice, two only were the act of the

Trustees, the others the wish of the teachers, though urged to remain; occasionally an increase of salary has retained one for a time. It would greatly facilitate the efficiency of our schools if teachers could be induced to remain permanently, or at least for a number of years. In reference to the contemplated series of authorized text-books for our Common Schools, I think it will be well to keep them as limited as possible on each subject; the frequent interference by others with the Council of Public Instruction in this matter is much to be deprecated.

XIX. COUNTY OF SIMCOE.

60. *Robert T. Banting, Esquire, Essa.*—I have much pleasure to be able to state that the schools in this Township were never in a better or more prosperous position. All the schools were open during the teaching days of the past year, and there appears a very laudable desire on the part of parents and Trustees to secure the services of first-class teachers, and never had we as good a class of teachers as at the present. In visiting the schools lately I was most agreeably surprised at the rapid advancement made by the pupils of each school; indeed there is nothing to retard education in this township but the desire of some people to have a school-house upon, or convenient to, each one's own lot; a desire that, if gratified, would split the township into such small sections as would leave it impossible for them to be able to pay the salaries they now do, and consequently they would be unable to secure the services of proper or first-class teachers. But, fortunately for them, every effort of the kind is thwarted by the Reeves; and I may here add that much of our prosperity is owing to the exertions of our present Reeve, who is a zealous advocate for the cause of education. In conclusion, permit me to say that your excellent school law is highly appreciated in this township, and more particularly so since the contemplated amendments were spoken of.

61. *The Reverend James F. Bayley, Morrison and Muskoka.*—In looking over the state of the schools in the municipality under my charge, I am glad to be able to report a considerable improvement in them, generally, since last year. The two sections in operation in 1865 have had an average attendance somewhat larger in the year just closed than before. A third small section has had a school open for a short time; the Trustees of the remaining section also have provided good school accommodation in the course of the past year, and, early last month, engaged a good teacher for the rest of the present year. The principal cause of non-attendance is distance, aided, in a few cases, by indifference of parents. I am inclined to look with hope to the future; it must be a long time before we can equal older townships in more favoured parts of Canada, but most parties seem willing to put a shoulder to the wheel, and when such is the case such things generally prosper.

62. *The Reverend Jacob Poole, Innisfil.*—I am much pleased in being able to say that the Common Schools of Innisfil, thirteen in number (not including the Union School at Cookstown), are all in an improving state, some of them making rapid advancement in the different branches required by law to be taught therein, especially that at Bell-Ewart, Section No. 5, where they have an active and efficient teacher, who intends to make teaching his one great business; this, however, is not the case with all teachers in the township, as some of those intend hereafter to pursue another and more lucrative calling, and consequently are not equally interested in the future welfare of their pupils. This is the fault of the Trustees, who but too often aim at having cheap teachers. I think it would be a very desirable change in the school law to do away altogether with third-class certificates, as the effect would be a better class of teachers. I am pleased to be able to say that all the schools in this township are free, by taxation of all the available land in each of the sections, thereby enabling every child of school age to attend. What a pity it is that all who are parents or guardians of children do not wake up to their privileges, and see that their children are educated. In my visits to the schools I have particularly examined the children in the elementary branches of spelling and reading, knowing that it is sometimes the case that they are far advanced in the theory of grammar and at the same time very defective in the spelling of simple words and in reading, imagining that the more rapidly they can go through their lesson the better readers they are. I regret to have to say that some of the teachers do not avail themselves of any of the religious instructions which the Board of Public Instruction allows; in some of the schools there is not a lesson given in either the old or new Testament, nor in any book proving the authenticity of revealed religion, neither are all the schools opened or closed by prayer. These

things ought not so to be. The omission lies with the Trustees, whose duty it is to enjoin it on the teachers. There is one thing more that is much to be regretted, and that is that so many parents send their children to no school at all; this is almost a universal complaint, and will continue to be such until the Prussian law comes in force in Canada.

63. *William Harvey, Esquire, Floo.*—The general cause of non-attendance is distance from the school. Carelessness or neglect of parents, I am happy to inform you, is the exception; but in some sections where the school-house is five, six, or even seven miles from the residence of the children, it is impossible for them to attend, but this state of things is being remedied by forming new school sections; one has been formed in this township in 1866, and it is in contemplation to form one or two more new School Sections in the present year, which will afford good school accommodation to all the settled parts of the township. Prizes were distributed in two of the sections with, I would say, very beneficial results.

64. *The Reverend James Ferguson, Oro.*—I have the honor to report that the schools in this township are progressing favourably. They have been all open during the year, and the free system is the general rule, without exception. There is a new Union School being formed, partly from this township, and partly from Medonte. The number of children not attending any school is gradually diminishing. Considerable attention is paid to military drill in several of the schools. In this township, teachers are underpaid, and first class teachers have little encouragement to offer their services. Three log school-houses have given place to substantial frame buildings, which may be termed first class, both for elegance and suitability. I deliver public lectures as I find time, and I feel much encouraged by the lively interest taken in them. Prizes were distributed in four of the schools, and it is to be hoped, we will soon have them in all. There is no doubt they would, in the hands of able teachers, help to foster and maintain a spirit of general emulation and competition, so desirable and necessary for the furtherance of the cause of education. Well-selected works to the value of eighty dollars have been added to the township library. I cannot conclude without expressing my hope that the efforts put forth to destroy the uniformity of our school books may prove unsuccessful.

65. *The Reverend Alexander Maclellan, Toronto.*—There was an increase of attendance in all our schools in 1866. This very desirable change is the result of the active use of several means, some of which cannot be traced out or described; but there is not the least doubt, that the very liberal distribution of prizes which has been made in this township this year, is prominent among the most effectual. Prizes were distributed in each section, and at a township examination besides. The amount thus expended is very considerable, when the extent of the township, the number of its population and children under sixteen, and the attendance is taken into consideration. It was known to the teachers, and thus communicated to all the pupils of the different schools at a very early period in the year, that regular attendance, diligence and good conduct during 1866, would be acknowledged, encouraged and rewarded at the closing examination by awarding valuable prizes. The result was favourable, as some of the usual obstacles to attendance were thus removed. But while we believe that a considerable portion of the said desirable "change" is due in a manner directly to the prudent and liberal distribution of prizes; yet we feel confident, that there were other vigorous and co-operative means, and we regard the distribution of prizes as an inducer of some of these. For when there prevades a general indifference as to the value and progress of education, money expended for its advancement and encouragement appears to be a waste, and is in reality but little better on account of surrounding influences, which will not fail to produce their own natural consequences and indifference. Under such circumstances, offering books, &c., for the purpose of encouraging diligence, is generally like sowing good seed in barren, uncultivated and unwatered soil; but when the soil is also good, &c., &c., the result is invariably very different,—it is encouraging—there is fruit. To the mere speculator it is probable, but to the faithful observer it is evident that in the absence of a general interest in the progress of education, prizes are not apt to be offered, and if this is done, the result is not very encouraging; but where there is a true interest, rewards, in the form of useful books will in all probability be offered, and when this is done, the result will scarcely fail to be favourable. Thus, we think, we can report not only an increase of attendance, but also a more lively interest in our schools. The *Journal of Education* is received regularly in each section.

XX. COUNTY OF HALTON.

66. *Daniel McLeod, Esquire, Nelson.*—The prevailing answer to the question respecting non-attendance is, indifference of parents. There are fourteen schools in the thirteen School Sections; of these, five have reported that regulations respecting religious instruction are observed. I may here remark that I was appointed *pro tem.*, by the wardens, last June, and although re-appointed by the County Council at their late sitting, I have not yet had the most favourable opportunity of observing the results of religious instruction in the schools, but there can be no doubt that, where it is accompanied by a suitable deportment in the teacher, it cannot fail to exert a salutary influence. The revised programme for County Board Examinations is strictly observed and acted upon, with the best results. Five schools have had prizes distributed, and where I have had the opportunity of witnessing the distribution of prizes, it exerted a laudable spirit of emulation among the pupils, and a happy feeling among the parents and spectators. It is a matter of regret that there is no Common School library in the township. I was much pleased on visiting the different schools in this municipality, to find such a marked improvement in all relating to them, since I visited them in 1841-2, as School Commissioner, and in 1843-4, as Township Superintendent. The school-houses, now valued at \$7,700, are far superior, not only in appearance and value, but also in all that is essential to comfort and convenience for study. All now have maps or other school apparatus and furniture,—scarcely any at that time had; all now have funds, public funds, wherewith to assist in paying their teacher,—at the time referred to, or rather before that time, there were no such funds. Before the time above named, when a teacher wished to engage a school, he had to go round and get as many as he could to subscribe for such a number of scholars as he thought would be necessary for his support, or for a particular sum, and if he succeeded in getting the promise of a sufficient number, or a sufficient sum, he commenced his school, and was amenable, not to Trustees, for there were no School Trustees, but to every man, woman, and child in the neighbourhood, and sometimes, yea oftentimes, the teacher found he had to serve hard masters. There is, too, a great improvement in the standing and the qualification of teachers. Although there were some good school-masters previous to the passing of the first School Act, yet the School Commissioners found some employed by the people as above, that could go no further in arithmetic than reduction, and knew nothing of grammar, geography, &c. The extent of the advantages derived from our present admirable school system cannot, perhaps, be more justly estimated than by a comparison of what our schools then were, and what they are now accomplishing.

67. *David Robertson, Esquire, M.D., Nassagaweya.*—I feel justified in saying that the schools in Nassagaweya are steadily progressing, great improvement having taken place in the class of teachers engaged, and consequently a corresponding improvement in the schools. We have two Normal School teachers, and the others, with one or two exceptions, hold first class certificates. Trustees seem to realize now that the cheapest teacher is by no means the best for a school, and seem willing to give fair salaries to competent teachers. All the schools are free, having been so for years. The attendance is not what it should be, the causes attributed being, as usual, indifference of parents and guardians, and too distant school-houses. Now, the latter of these assumed causes has no reality, as none in the township are so distant from schools but that they could be reached easily, were the effort only made. The great cause, and only cause, can be nothing but the carelessness and ignorance of the parents or guardians. The general regulations in regard to religious instruction are generally followed, with good influences. The revised programme for County Board examinations is observed, the questions also being printed. There is a public library in each section, but it is of no practical utility, as no interest is taken in it by either teachers or people. The books remain unread; or, if taken out, very often are not returned. The books are labelled and covered. Prizes are given in most of the schools, and seem to do good, by creating a healthful rivalry among the pupils, especially when distributed judiciously. Again, they do no good, if not mischief, by the way in which they are given. Too often the result of one day determines the prizes. They should be given to those only who have earned them during a certain time: that is, the result should depend on every day's study, dating from the last distribution. The township examination passed off quite satisfactorily, and the people all evinced a strong interest in it. This year another similar examination has been held. This is the third competi-

tive examination for the township; the council seems determined to continue it. It has much to recommend it; and as much, again, to condemn it. I find teachers are opposed to it, with few exceptions: the reason is that justice cannot and is not generally done to all sections in the short period allowed for examination: it should continue two days at least, or only a few branches be taken; then it would prove far more unobjectionable. On the whole, I think it has done good in the township, and yet will do good, if continued. Means will be taken, I think, to get a county examination. This, allowing plenty of time, would accomplish much good, I am sure.

68. *John Askin, Esquire, Trafalgar.*—I am happy to be able to give a favourable account of the schools under my superintendence. It is gratifying that our Trustees are now appreciating the services of efficient teachers. The same teachers are continued five years in the same section, with increased salaries. This is a move in the right direction: it pleases me to see a good teacher continued in the same school. I believe it would be wise for the Legislature to abolish the rate-bill and enforce the adoption of the free school system. This would put an end to much wrangling at annual meetings. The non-attendance of some children in this township is not to be attributed to the indifference of parents altogether. In many cases, parents unreasonably take offence at teachers and, therefore, cause their children to remain at home. This cannot be entirely prevented. My endeavour has been to cultivate a spirit of mutual forbearance in all cases, so that our educational affairs should be managed as quietly as possible. We have had prizes and merit-books awarded in many of our schools; this has been productive of good results; it has induced greater regularity of attendance, and more zeal in study on the part of the pupils.

XXI. COUNTY OF WENTWORTH.

69. *The Reverend John Porteous, Beverley.*—Our free schools are nine, and six partly free. As I stated last year, it seems to me, that the Legislature of the country should pronounce them all free. I am happy to notice that the Trustees' reports are much more accurate than they were a few years back; that teachers are more promptly paid their salaries, and that the columns under the heading "Trustees' debts" present a gratifying number of blanks, a majority of sections having no debts at all. This arises, not from the increasing wealth of the country so much as from the tact and better management of the School Officers. They feel more easy in their harness, and are better acquainted with the details of their duties. I call on you to notice very particularly, that all the schools in this township have been kept open for twelve months during the year 1866, a fact which says much for the general appreciation of education felt by this community. This is the first time I have had the pleasure of giving you such a favourable report in relation to this matter. Indifference is still the reason why some parents do not send their children to school, perhaps also poverty, in a few cases, could be pleaded; but I must add, poverty for which parents themselves are responsible. As formerly reported, the revised programme for County Board Examinations is observed, and the examination questions are, and always have been, printed, in the County of Wentworth. The rules are also observed respecting the Common School libraries. I judge that prizes must be deemed advantageous from the fact of more schools having them distributed every year.

70. *The Reverend George Cheyne, Binbrook and Saltfleet.*—In transmitting the Annual Report of schools in the Townships of Saltfleet and Binbrook, I have much pleasure in stating that they have been in efficient and successful operation during the past year. The inhabitants exhibit an increasing interest in the education of the rising generation, and seem to appreciate more the advantages of having superior and successful teachers. The teachers in these townships are well qualified and efficient; the frequent change of teachers is greatly complained of, and much to be regretted when a school is prospering. It is therefore gratifying to report that, with only two exceptions, the same teachers have been continued, and some of them for the third or fourth year. It would be of great benefit, without any loss—even with profit—if each School Section were to provide a comfortable dwelling-house and a lot of land near the school-house for the teacher. It would be a means of preventing the tendency in teachers to turn their attention to other employment when they get married. It will be seen by the Report that the schools in Binbrook have been in operation on an average of twelve months, within a small fraction, which is very creditable to the Trustees and inhabi-

tants. In Saltfleet, the average, from unavoidable causes in some of the sections, is not so high, being only a little over ten and a half months. It will also be seen that the average attendance of scholars in both townships is somewhat less. This may be accounted for by the scarcity of labourers during the past season. The Trustees' Annual Reports are greatly improved; they are much more carefully and accurately drawn up. The school system is working admirably, and no doubt will be productive of great and beneficial results. All that is necessary to secure this, with the blessing of God, is that it be effectually carried out. The only change that seems desirable is, that the schools be made free by law. This has been already so nearly attained that no great objection would be made to it, and it would prevent a good deal of contention and some bad feeling at annual school meetings. Indifference is often assigned as the reason why many of school age do not attend school. This may be so in some instances, but, I think, is not the general cause, but occupation at home of those above the age of thirteen or fourteen, who have already got a pretty good education. It is a great error to suppose, as some seem to do, that such are growing up in ignorance. When we consider the great demand for labour, it is a matter of congratulation that the number is not greater. The religious instruction of the scholars by the clergymen of the different denominations is not attended to in the school-room. This is not easily attainable in the country, nor is it necessary or, perhaps, desirable: it is to be regarded as more the duty of parents, on whom God has devolved it, to instruct their children in the knowledge of God and his will, and to be superintended by the clergymen of the different denominations to which they belong. Sabbath schools are now also so general that they afford an opportunity to all to receive religious instruction. It will also be seen that prayer and reading the Scriptures have become more general, at least in these townships, those in which they are neglected being a small exception. Prizes have been given in many of the schools, and I believe with beneficial results. It is also of vast importance that the authorized books only should be used, and the people and teachers seem disposed to comply with the rule. The introduction of a variety of books, as text-books, is a very great injury, as well as an unnecessary expense. The revised programme of examination is adopted by the Board of Public Instruction for the County; the questions are printed, and answers returned in writing, and a new set of questions is proposed at each meeting of the Board. The libraries, where they exist, are read more or less extensively, but not so much as is desirable, and there is no doubt they will be productive of good in some degree, in proportion to the extent to which the books are read. A reading population will be an intelligent people, and *vice versa*. It is to be regretted that so many School Sections do not avail themselves of the opportunity which the Legislature has afforded them, of getting libraries at a reduced price.

71. *The Reverend Robert Grant, Flamborough East.*—As I have only discharged the duties of Local School Superintendent since September last, it is impossible to form any correct estimate of the progress made by our schools during the year. There are seven schools under my charge; six were kept open the whole year, and one about eight months. As you will see from my Annual Report, there is a large number of children in this township who never attend any school. In two sections, Nos. 3 and 5, only about one-half of the children of school age have their names in the school register. The chief cause of non-attendance is the criminal carelessness of many parents. There may be other minor reasons in some cases, but this certainly is the chief one. Owing to the peculiar manner in which the township is divided into sections, some families reside at a very considerable distance from their respective schools, and in severe weather regular attendance is impossible. The rate-bill has a bad effect among the poorer classes, but notwithstanding all this, if parents took the interest in the education of their children which they ought to take, we would not have the shameful fact to state, that in any section half the children grow up in ignorance. The school accommodation is not good in proportion to the material wealth of the township. In Section No. 6 a very good school-house was erected last summer. In Sections 3 and 4 the school-houses are comfortable, but in all the other sections the school-rooms are positively unfit for use. This state of things cannot be remedied as long as Trustees are annually elected, because they make solemn vows to keep down all taxation. The time certainly has come when all schools should be made free by legislative enactment, and perhaps the "compulsory clause" would be a decided improvement. Prizes were given in some of the schools; and from all parties interested, I learn that a good effect was produced. I am of

opinion that the system of giving prizes is decidedly beneficial. The revised programme is used by our County Board, and the examination papers are all printed.

72. *The Reverend John Lees, Ancaster.*—It is gratifying to observe from the Annual Report, that the average attendance of pupils at school in this township is gradually increasing, and that all the schools in the township were open for twelve months during the year. It is quite evident to every one acquainted with the matter, that in many of the School Sections both the Trustees and parents are now taking a deeper interest in education than they did in former years, and this cannot fail to be a stimulant and an encouragement to their children. Although the attendance at school is on the increase, yet there are still in most of the sections children of school age, who attend no school, and the reason assigned for this is indifference on the part of parents. Nearly all the schools are opened with reading the Scriptures and prayer. The County Board met twice during the year, for the examination of teachers. The examination papers were all printed, and the answers were all written. There was no new school library purchased during the year. There are school libraries in four sections, and in three of these the books are all covered, numbered and labelled; in four sections there are Sabbath School libraries, and there is reason to believe that they are exerting a favourable influence upon the minds and actions both of parents and children where the books have been carefully read. Prizes procured from the Department in Toronto, have been given to the pupils in five sections, and there are grounds to believe with general satisfaction and good results.

73. *The Reverend Alexander McLean, M.A., West Flamboro.*—The direct and apparent cause of the non-attendance of numbers of children of school age, is indifference of parents; but the primary cause is dram-drinking, which induces poverty and disgrace, and hence recklessness of all personal and relative duties. I have to regret the general neglect of the noble opportunity afforded for religious instruction by clergymen of the various denominations; few even visit the schools. Our programme of printed questions is renewed for each half-yearly examination by the county. The influence of prizes, where given on character and conduct as well as scholarship, is good. The success of libraries in our township is very circumscribed, the public seems to have no taste generally for literary advantages, and too generally the newspaper is the beginning and end of the vast majority's reading.

XXII. COUNTY OF BRANT.

74. *The Reverend John Armour, Burford.*—*Cause of the non-attendance of children of school age.*—The entire blame of this great evil must rest with the parents, and the parents living in a section where the school is free to all (and there were seventeen such schools in this township last year) must be culpable indeed. The negligence and thoughtlessness of children ought to be overcome by the determination of the parents. *The general regulations in regard to religious instruction.*—These are followed, so far as is known to me; but there are no clergymen that I have heard of who regularly seek an opportunity to instruct in religion either the children of their own adherents or others. There is no systematic effort put forth in any or all of our Common Schools. There are, however, sixteen Sunday Schools, which, with their libraries, I believe must exert a great religious influence. The revised programme for the County Board examinations is observed, and the questions are printed. The library books are covered, labelled and numbered, and the regulations are strictly observed. The influence the library exerts must be good in proportion as the books are read: good books, if read, must produce a good effect. The influence of the distribution of prizes, there cannot be a doubt, is both great and good. They not only impart edification to the recipient, but they have a great influence to call forth exertion and labour, to make progress, and to form character.

XXIII. COUNTY OF LINCOLN.

75. *Eli Gregory, Esquire, Louth.*—Most of the schools in this township are in a prosperous state. Six sections have had first class teachers, who have been of great benefit to the sections where they were employed; the other two sections being unsuccessful in getting good teachers, or keeping them any length of time, thereby allowing the children to lose their valuable time, and their parents their money. But I see one section has been

benefited by its misfortunes, and hired a first class Normal School teacher for the present year. There appears to be a large number of children not attending any school; but I am satisfied that some of them have attended school out of the section where they reside; still there is a neglect and want of energy in the parents to provide suitable clothes for their children, for it would seem that that was all that was required of them, for, in all the schools, those that are not able to pay are admitted free. The general regulations in regard to religious instructions are not generally followed. The Bible is but little used in most of the schools. There is a splendid township library, the works in which are labelled, numbered, and distributed in the different school sections. This has had a good influence on the young as well as the old. There was a resolution passed in the Council requiring all librarians to return their books at least once a year. There have been prizes given in several schools, with good results.

76. *James Wynn, Esquire, Niagara.*—For the time I have had the honor of being Local Superintendent, I should judge that the schools in my division are generally in pretty good condition, and am in hopes, after a short time, that each section may be induced to adopt the free system.

XXIV. COUNTY OF WELLAND.

77. *Gilbert W. Cook, Esquire, Crowland.*—I avail myself of the privilege of remarking upon the condition of the schools, which I am enabled to do, not so much from my present as from my former relation thereto, having been engaged in teaching about fifteen years in the County of Welland, and nine years of this time in this township, during which, by visiting schools, attending examinations, and otherwise associating with my fellow-teachers, I have been enabled to witness the progress of the schools and the improvement made in teaching and governing them. Our teachers (most of them natives of this township) all hold first class certificates from the County Board except two, and one of these is a second class from the Normal School. A marked improvement is noticeable in respect to thoroughness in teaching, and a disposition to avoid the too prevalent error of allowing the pupils to go ahead faster than they are able (or made) completely to master their lessons. Prizes are distributed but seldom, and only from the private means of the teachers, and I have but in one case heard them spoken of as having a good effect. The distribution of prizes is attended with much difficulty; and while it stimulates a few, it disheartens the majority, who have no hope of winning. It creates jealousy and ill-feeling among children, and sometimes between parents towards each other as well as towards the teacher, who is likely to be charged with partiality, and thus injured in his reputation. I may briefly state, in closing this part of my remarks, that experience and observation have convinced me that the *injurious* far outweighs the *beneficial* effects arising from the distribution of prizes in our Common Schools. The cause of non-attendance is said to be the indifference of parents and guardians. Our schools were all free but two. There is a very general desire among the rate-payers (even some of those who vote against free schools) that the schools of the Province should be made free by Act of Parliament. A majority of the schools are opened, &c., with prayer; and in most of those which are not, the fault, I believe, is not with the teachers. The duty of clergymen in visiting schools, and the opportunity thus afforded of exerting a healthful influence upon the rising generation, are sadly neglected in this township, not one visit appearing to the credit of any minister of the gospel in any of the Annual Reports of 1866.

78. *Owen W. Fares, Esquire, M.D., Humberstone.*—In reply to the question in respect to non-attendance of children at schools: it is owing, I think, to distance, ignorance, and indifference of parents. The general regulations in regard to religious instruction, in most of the schools, are not observed. The revised programme is observed, and the examination questions are printed. The distribution of prizes has been practised in two of the schools, with, I believe, very beneficial results.

79. *The Reverend George Bell, Stamford.*—The revised programme is observed by the County Board (Welland), and most of the questions are printed. The schools of the township are generally in a prosperous condition.

80. *The Reverend Donald I. F. Macleod, M.A., Willoughby.*—I am unable to discover

any marked improvement in the condition of the schools within the last year. Competent teachers are employed, and I have always found them diligent in the discharge of their duties. But the changes which are constantly being made, interfere very seriously with the progress and efficiency of the schools. This difficulty exists in all the sections, for in no single instance is the same teacher employed in the same school in which he was engaged this time last year, and in one instance three different teachers, have been employed in the course of last year. I am strongly of opinion that the change proposed by the Chief Superintendent, of having one efficient Board of School Trustees for the Township, would, if carried out, remedy this evil to a very great extent. But perhaps the greatest difficulty under which teachers labour, which only time will mitigate, is the mixed nature of the population of the township. In four, out of the six sections, a majority of the children are unable to speak English fluently, as they have been accustomed from infancy to hear nothing but Dutch spoken by their parents and relatives. The attendance of the pupils has been most irregular, and the causes assigned in the Reports of Trustees are various,—indifference of parents, field-work, distance from school, badness of the roads (which, indeed, at some seasons of the year are quite impassible). The revised programme for the County Board is strictly followed, printed questions are used, and each year the examination is conducted with greater strictness, with a view of admitting none to the profession of teacher, who is not competent to discharge its duties. It is, however, a matter of regret, that this object is not always gained, and I am of opinion that the change proposed by the Chief Superintendent would be most beneficial, for, constituted as it is, the examination by the County Board will always be unsatisfactory. I regret that with all the facilities offered by the Department, no public libraries have been established, or prizes procured.

XXV. COUNTY OF HALDIMAND.

81. *Thomas C. Pinkett, Esquire, Canborough.*—The remarks which I have to make are,—1st, as to the cause of non-attendance at school, it is generally indifference; 2nd, as to the general regulations in regard to religious instruction, they are not attended to in any of the schools; 3rd, the revised programme for examination is observed, and the questions are printed; 4th, there are no school libraries in the township; 5th, as for prizes, neither good nor harm can arise by the way they are distributed (to all the scholars). I think, on the whole, the parents and Trustees are taking more interest in the schools—endeavouring to keep them better sustained.

82. *The Reverend John Flood, Dunn and Moulton.*—The children in the townships for which I am Local Superintendent, are not pressing forward to great attainments in the higher branches of education. There are very few whose parents wish them to occupy much time in studying Geometry and Algebra: nevertheless, it would be wrong to infer from this that many of the people are indifferent to intellectual improvement. They have a steady desire and are making very laudable efforts for the instruction of the young and for expanding their minds. They wish them to be intelligent; but to follow those callings in which they have the best prospect of comfort and success. One chief hindrance to the greater prosperity of our schools is that teachers of energy and ability soon leave their occupation for some employment in which they hope for better remuneration and more independence. Our Board of Instruction, with great labour and repeated examinations, had worked up many young men and women to such a degree of improvement that they were very useful as teachers, and if they had remained would have done a great amount of good in the county; but many of the best of them have gone away, and we are under the necessity of accepting younger persons, and endeavouring to raise them to the state at which the others had arrived. In the Trustees' Reports this year, the cause of non-attendance is said to be distance from the school. The general regulations in regard to religious instruction are not followed, except where I observe them myself. In these instances, however, the results are manifestly good. The revised programme for County Board examination is observed, and the questions are printed. The books in the libraries are labelled, covered, and numbered, and the regulations are strictly observed. The library has evidently an enlightening influence in the neighbourhood, and is producing a greater taste for education. The distribution of prizes sometimes does good and sometimes does evil.

XXVI. COUNTY OF NORFOLK.

83. *James Covernton, Esquire, Charlotteville.*—I am again enabled to direct your attention to the gratifying circumstance that my Report displays in exhibiting an increase in the average attendance of scholars, on the Return for 1865, of nearly twenty per cent. It also shows that for the first time, all the schools were free. A perfect unanimity of feeling on the subject of such schools does not, however, exist, and a reaction has taken place in one wealthy School Section, because the free school was found to have entailed an increased charge of one third, and because two or three families would not avail themselves of its advantages. Some measures for coercion, it is to be hoped, will be devised, and introduced in the new School Law, for the purpose of compelling all persons to give their children a certain amount of annual instruction. If it should be enacted that all schools shall be free, then a mere financial consideration would suggest the equity of imposing a rate on the parents of all children, who neither attend private schools nor the school of the section, and that such a charge be made for each absent scholar as would more than compensate the School Section for the loss of public money each absentee from the school occasions to it. The members of the Board of Instruction for this county have, for some time past, endeavoured to make the public examinations of candidates, for certificates of qualification as school teachers, in rigid accordance with the programme of the school law, and by so doing have secured a beneficial result to the public; but they are quite powerless in the matter of remuneration to teachers, which will be seen (by reference to the returns made under the head of salaries) rather to have receded than advanced. The principle that justifies the existing school law in fixing a minimum of remuneration to Local Superintendents, might, I venture to suggest, be extended to school teachers, and a minimum of pay fixed that shall be given to a first and second class male teacher, and to a first and second class female teacher. Much difference of opinion exists in the township on the subject of the substitution of a Township Board of Trustees for Sectional Boards. I think the balance of sentiment is hostile to the change. It is asserted by many that if the Board of Trustees is to be nominated at the Township meeting, other considerations than those of fitness for the office will influence the appointment.

84. *The Reverend Jacob VanLoon, Townsend.*—In this township the schools are in a very satisfactory state of progress; a higher standard of qualification of teachers is eagerly sought, indicative of a growing appreciation of well qualified teachers. During the last year three very excellent school-houses have been completed and are now occupied, two brick and one stone. Very little interest is taken in public libraries, except Sunday School libraries, which are in growing demand, as we have Sunday Schools in nearly all our school-houses. A good moral and religious influence is exerted upon our school pupils by most of our teachers, and through addresses delivered at quarterly examinations, by clergymen, teachers, and other professional men, as we generally have a number present on such occasions. Our County Board of Examiners have aimed at a higher standard of qualification for third class teachers, as inducements to improvement on the part of such teachers, which is attended with good results. Our schools have greatly improved within the last five years, in the number of pupils and efficiency. I think we should give more encouragement to instruction in local music in our schools, an element highly entertaining and useful.

85. *The Reverend William Craigie, Woodhouse.*—The cause of non-attendance in most cases is the parent allowing the children to stay at home for some trifling service, or for want of clothing. The regulations for religious instruction are not followed in any case in this township. The revised programme is strictly observed, and the questions are printed. The library books are labelled, and the regulations are observed. The distribution of prizes has a stimulating influence, and greatly aids the teacher.

XXVII. COUNTY OF OXFORD.

86. *The Reverend John Hunt, Oxford East.*—The schools in this township, I am glad to say, are conducted most efficiently. The teachers all seem to have due respect for their calling, and have the interests of their pupils at heart. The public examinations are well attended, generally, and throughout the township much interest prevails among the parents and guardians of the children. The scriptures are used and religious exercises conducted in the schools. Prizes have not been distributed during the year; but some of

the schools have recently obtained an excellent supply of large maps. On the whole, I have been much pleased with the degree of interest manifested in the various sections, and am happy to believe that the Common Schools here, as elsewhere, are doing a great and a good work.

87. *The Reverend John Wilkinson, Norwich South.*—It appears that in some instances (though too rare) the Bible and Testament are more or less in use, and some of the schools are opened and closed with prayer. I intend to encourage this duty on the part of the teachers to a greater extent throughout the township, if spared to lecture again in their presence, and hope for the future to give a more cheering account of this section of the country, as far as religious instruction is concerned. It appears that the free school system is taking the lead altogether in this township. It is desirable that the community would avail themselves of its advantages by suffering no straggling children to roam abroad in the street uncared for, as is the fault of some parents, there being nothing legal done to prevent it. Yet, all things considered, the non-attendants are not very numerous, compared with the general attendance. As regards the results, *pro* or *con*, of the distribution of prizes, as yet I have had but little experience. I was present at the Otterville examination, when about eight dollars' worth of prizes were being distributed in the presence of parents and guardians, with seeming satisfaction to all concerned. I am inclined to think the practice should be more generally observed, and the expense less regarded, for no doubt the effect would be profitable and happy. As regards the question of public libraries, with their advantages, as yet I can say but little; but I fear there is not the interest taken in the matter the nature of the case demands. So it is with many other important items of which I could wish to speak or write more favourably; and yet, upon the whole, the community have great cause of thankfulness that there is such effort made for greater degrees of perfection in all the departments of education.

88. *The Reverend Thomas Baldwin, Oxford West.*—I cannot give the reason why the religious instructions are not followed, except a want of interest in religious things in the minds of teachers. The cause of non-attendance of children at school, given by several of the teachers, is the indifference of parents; 1st, in want of government at home to force the children to go to school; 2nd, in their want of appreciation of education. The revised programme is followed in this Grammar School Circuit of the county in the examination of teachers, and the questions are printed. I cannot say much about the schools, since this is my first year of office, and I shall not continue in office beyond April. It is an unwise custom in this township, the changing of Local Superintendents every year. I am impressed with the fact that it would be better for the school meetings to appoint the Local Superintendent, and not leave it solely with the Reeves to choose and appoint their friends, as is, I fear, too often the case, without care for, or reference to the future good of the school.

89. *The Reverend William Graham, Zorra West.*—On the whole the schools are in a healthy and progressive state. Indeed, some of them are in a high state of efficiency. Three substantial and commodious brick houses have been built during the year, and one or two others will be erected during the ensuing summer. The most serious difficulty in the working of our Common School system is the too frequent change of teachers, and this will continue to produce its evil effects, until some remedy is provided: it entails a loss of time, and more or less prevents the improvement of those schools where it exists. I wish Trustees could be prevailed upon to give larger salaries to properly qualified teachers. This in my opinion to some extent would remedy the evil. The revised programme is observed, and the questions are printed. Nothing is stated in the Trustees' Reports respecting the influence resulting from the use of prizes. The regulations of the few libraries in the township are observed. In the course of my visits, I have been a good deal disappointed in finding so few libraries, and have taken occasion to point out the advantages of having such auxiliaries established in every school. The regulations with regard to religious instruction are, I am happy to say, generally attended to by the teachers. Maps are wanting in some of the schools. I have recommended the Trustees to procure a supply, and trust they will do so. In the schools under my supervision the daily proceedings are either opened or closed by prayer, or reading the Scriptures. There is unquestionably much irregularity of attendance on the part of the scholars; this, however, only is the case in reference to two or three of the schools; bad roads, bad weather, and distance from school as well as indifference of parents,

are said to be the causes, but principally I should say the disposition of parents to keep their children from school to attend to other matters at home. In nearly all the School Sections under my care, the children who never attend any school are becoming fewer in number every year. On the whole we are improving here; school matters are in very good working order, a healthy interest in education is manifested, and I hope this will continue and increase.

XXVIII. COUNTY OF WELLINGTON.

90. *A. Dingwall Fordyce, Esquire, North Riding.*—The schools have shown a commendable amount of life in the pursuit of school duties, and I am happy to observe that a "Teachers' Mutual Improvement Society," established in Garafraxa, has been well sustained, and that one has likewise been organized in Peel and Maryborough. The Association for the North Riding has been kept up: but it has been discouraging to those steadily attending its meetings that greater interest has not been exhibited by others, and more determined efforts not made to be present. While in most cases in which I have made inquiry, the school library has been described as giving satisfaction and being made use of, I regret to find a remark in the report from Section 3, Garafraxa, that the library is "completely destroyed or worn out." I feel the more surprised as I recollect, only two years ago, I think, their getting a catalogue, in order, as I understood, to procure an additional supply of books. In several of the schools you may observe, during the past season, a solitary map reported, where there was not one before. A Map of Canada (by Tackabury), I find, has been procured, giving the scholars some knowledge of the geography of their own country and its minuter sub-divisions; although it may be questioned whether it would not have been better to have purchased from the Educational Department. Several school-houses have either been built or occupied for the first time during the past year, having been prepared for occupation during the course of the year before. These are in Section 15, Garafraxa; 6 and 9, Luther; Miller's Corners, Minto; 14, Peel, and 2, Pilkington. In the last-mentioned section it has been in contemplation to build a new school-house, and steps were taken for the purpose, when the old school-house was burnt down, in the month of April: it was not ascertained by what means. The use of a small building close by, which had been occupied some years since as a Separate School, was obtained till the new building should be ready, and at considerable inconvenience the school was kept up in this way till the month of November, I think, when the other could be taken possession of. It is a handsome stone building, 42×28 inside, and lofty; and, when fully seated, will be, as it is already, a great acquisition. The new school-house in Section 14, Peel (a section, as mentioned last year, made up of the Peel portion of two dissolved Union Schools), is a neat, well finished frame building, well seated and proportioned, on the Elora and Saugeen Grand Road. The school was opened just before the end of June. The school at Miller's Corners, in Minto, it was observed last year, had been carried on before the section came into legal operation, for six months or so. The school-house is commodious and well furnished, and the section likely to be a good one and to maintain a good school. The school-houses in 6 and 9, Luther, I have also reason to speak favourably of. They have been put up economically; and yet very satisfactorily. The former was opened in July, when the latter was closed, the same teacher moving from the one to the other, and returning shortly to No. 9. The sections are very weak; but the supporters of the school are very anxious to do their part. Since the present year has commenced, another school has been opened in Luther, in Section 7, and still another is to be opened next month in Section 8. Section 6, Maryborough, has been broken up, the school-house, &c., disposed of, and the section joined partly to the Rothsay school (15, Maryboro') and partly to the disorganized portion of what used to be Section 14, Peel and Maryboro'; and in this new section (to be known as 14, Maryborough) a school-house is to be erected this season, on the Elora and Saugeen road. Union School, No. 9, Peel and Garafraxa, has likewise been broken up, the Peel Section having been cut off by the Municipal Council, in order to form a new section, with the old number 9, Peel, partly out of this, and partly out of Section 12. School has been commenced in a Methodist Church (the use of which has been obtained till a school-house can be built) on the 16th Concession of Peel. In Section 12, Peel, the school has been discontinued since November; and as I have not had the report of any annual meeting, I feel doubtful whether any effort will be made to keep the section

distinct; it may, however, yet be done. It was for the two schools last mentioned (12, Peel, and 9, Peel and Garafraxa) that you were so good as to make a small allowance, at my request, which enabled both to keep school open rather longer than might otherwise have been the case. It is satisfactory to state that the other school, which was reduced from similar causes, and to which an allowance was likewise made (No. 6, Pilington) was kept open the whole year, and, so far as I know, will still continue in operation. In Section 9, Arthur, the school-house was burnt down in June, having accidentally caught fire, while it was impossible to save the house, although it happened while the teacher and scholars were there. I find by the Annual Report that it is proposed to rebuild on the same spot. The building was a log one, not altogether finished; an old shanty in the near neighbourhood has been made to answer for a school-house in the meantime. After some time there may be a change of arrangements, as the section is partly a Union with Luther, and the Arthur part not so united in effort as might be the case if they were of one religious belief. Having a desire to ascertain the size of the different school-houses within my bounds as Superintendent, being satisfied that many of them were far from what they should be in several respects, but especially in height, I took the dimensions of 68 during my summer visit, and found these to vary in length from 18 feet 9 inches to 50 feet; in breadth, from 15 to 35 feet; and in height, from 6 feet to 16 feet. In height, five were between 6 and 7 feet; fifteen, between 7 and 8 feet; twenty, between 8 and 9 feet; ten, between 9 and 10 feet; and eighteen, over 10 feet; of the latter, nine were between 10 and 11 feet 6 inches high; four were 11 feet 6 inches; three were 12 feet; one was 14, and one 16 feet in height. The school-house lowest in height of all, being only 6 feet inside, was only 24 × 20 feet; and yet, in that confined space, the teacher told me he had ninety-seven scholars present on the 21st of June. Surely there is a crying need for some improvement here. A school-house which is manifestly unsuitable—even detrimental, at certain seasons—to the health of the scholars, may be kept up, notwithstanding, by a majority of the Trustees resolving in such cases to abide by the express wish of the section, which very frequently is regulated in such matters by pecuniary considerations. The belief is entertained by some, that Government assistance to the school can in such cases be withheld, and so a compulsory and necessary change effected; but, I am not aware of any provision of the law of that nature; nor any official sanction intrusted to the Local Superintendent, of condemning a building, although his sentiments expressed on such matters are often regarded as a virtual condemnation of it. I should have very much wished that some of our most recently built country log school-houses had been loftier than they are. Two of those I have mentioned, however, as erected in Luther, are unexceptionable. Although the number of schools which procure prizes for the scholars is not very great, it is gratifying to observe, now and then, instances in some sections where there is really some effort made in this direction. I find, at the annual meeting in Section No. 4, Amaranth, a resolution was adopted that five dollars should be appropriated by the Trustees towards procuring a map of Canada and prize-books for the children, while, on the other hand, a mistaken policy, as I cannot help thinking, has in one case frustrated the desire of the Trustees to have a School Section library provided. No more would have been sought than forty dollars, which, I understand, would have only cost the rate-payers one mill more on the dollar; however, a resolution was carried that a library be dispensed with. It is gratifying to find that, when Trustees do their work faithfully and perseveringly, it is not always left unrecognized. I observe a resolution passed at one annual meeting that a vote of thanks be given to the retiring Trustee for the satisfactory manner in which he has served as Trustee for the last six years; this may be more common than I am aware of, as, generally, the report made of the proceedings at the annual meeting contains no more than the form prescribes; in some cases the resolution has been come to, to proceed this season with building, and this, I am very happy to find, in one instance at least, where it was greatly wanted; in other cases, further postponement has been the order of the day, on some plausible pretext or other. Advantage has been taken by the teachers of twenty-five of the schools reported, of the provision of the law for visiting other schools. If any more have done so, it does not appear on the Semi-annual Returns. Seventy-six days were thus employed by the teachers referred to; of those teachers, six took the whole five days; three teachers took four days each; six teachers took three; six took two; and four took

one day for the purpose. I think it would be well to direct attention to the propriety of invariably mentioning in what month the visits are paid. If this were always done, the allowance in consequence, to the schools, would be more equitably distributed, as the attendance varies so very much in some months; nor might it be out of place to have the particular school stated, which has been visited; it might be a salutary check if any were disposed to regard the *five days* as a perquisite, requiring no particular duty to be attended to in return for the privilege. There is another suggestion which I would take the liberty of making, in case it should meet with your concurrence, as I think it would often save trouble and time; it is a very customary occurrence for copies of the School Law to be required, those belonging to the section having been lost or mutilated, and the Local Superintendent is expected to provide others; in general, I refer those applying to me to the Educational Department, telling them to send the price with their address and it will be forwarded; but it might be still better if Superintendents were furnished with a certain number, say twelve, at once, to be accounted for as sold, or handed over to their successors in office, if not disposed of when their tenure of office expired. You will remark that the number of lectures, acknowledged by Trustees, to have been delivered by the Local Superintendents during the year, is small; and as I sent you a copy of a lecture I had got printed, with a view to distributing among the schools under my charge, in hopes that the desired end might be somewhat better attained than I had found it in lecturing orally, owing very often to the small number that could be got to attend, and the other difficulties arising from *short* notice, absence from home of those who would have been present, pre-occupation of the school-house for other purposes, and so on,—it may be proper to state in how far these hopes have been realized up to the present time. I sent a copy to each teacher, and a copy to each of the Trustees of every school under my superintendence, using, in this way, 400 copies for the rural districts and the village of Fergus, and I intrusted 1500 copies to the several teachers referred to, in addition, in parcels of from 10 to 25, according to the size or population of the section, asking them to dispose of them to any rate-payers in the section, at the rate of five cents per copy, to cover (partially) the cost of printing. Wherever I learnt that teachers had a number of copies on hand, having only disposed of a few on the proposed terms, I desired them to distribute them gratuitously wherever they considered they would be received and prove of service. The copies sent to the teachers themselves, and to the Trustees, were free of charge, and from the 1,500 given in distribution otherwise, I have received \$26 on account of the \$35 which it cost to print 2,000. This shows that 520 copies have been taken on the terms proposed, and I hope most of the rest circulated in such a way as to be productive of some good. In one case I learnt that the Trustees had sent me the cost of 25 copies sent them, having charged the section with the \$1.25, and distributed them gratuitously. This, of course, I would not have permitted, had I known of it in time. It appeared to them the simplest and best way, not seeing any objection to it, as I did. I concluded that none who had the amount by them would grudge the trifle required, as they would have the lecture (such as it was) in more permanent shape than if orally delivered, and without the trouble of going out to hear it. My design, however, is to embrace what seem to be favourable opportunities for delivering such lectures as the School Law requires, in the very limited time that can be got while I am engaged in visiting the schools. If there were not insuperable obstacles in many cases, I am fully persuaded the provisions of the law would prove, when carried out, exceedingly beneficial.

XXIX. COUNTY OF GREY.

91. *Thomas Ryan, Esquire, Bentinck, &c.*—There are at present fifty-one schools in operation in this District; all of these schools are open during the entire year, except two (R.S.S.S.) in the Township of Normanby. There are six first class teachers, thirty-eight second class, two third class, one Normal School, and four R. C. S. school teachers, three of whom are second class teachers, and one third class. Of the aforesaid teachers thirty-three are males, and eighteen females. The schools, with the exception of a few, are supplied with maps and black-boards. The old and ill-suited school-houses are gradually disappearing, and are being replaced by commodious brick, stone, and frame edifices. Although there is great cause to be thankful for the wonderful progress in educational matters during the last twelve years, there yet remain many impediments, which time and more matured knowledge will tend to

remove. The office of school teacher requires a longer tenure than the present. How is possible that a teacher can give his whole heart to the work, when he has no assurance of holding his appointment beyond one year? Township Boards of Trustees would, I feel assured, be a great boon to teachers; it would be the means of destroying local prejudices and individual interests which, under the present system, too frequently operate against the teacher. It is well known that, in many instances, the teacher is expected to *board* with a certain influential party, to be his creature; the moment he becomes restive and assumes his proper position he is a doomed man, and the sooner he leaves the better it will be, as regards his fair fame and future prospects. In a few years of such intolerable ill treatment, our most promising young people get disgusted; they look forward—there is no hope in the prospect, and they very naturally look out for some other less irksome employment, perhaps not more lucrative, but decidedly more congenial. I am ignorant of what material the generality of County Boards of Public Instruction are composed; much depends upon the capability of County Councils to make a proper selection. I trust I shall not be charged with egotism when I assert that the Board of this County stands second to none in the Province. Assuredly any person of ordinary acquirements must acknowledge that four dollars (\$4) per school is very inadequate remuneration for any gentleman qualified to discharge the important duties of Local Superintendent; and it is no matter of surprise to find, in too many instances, numbers of incompetent applicants for the office, the salary being so far below the real value of an educated person's services that he will not accept the office. However, it is most devoutly to be wished that, when reform *does* come, the Local Superintendent's office will have its due share of attention. There has been considerable excitement in various parts of the county respecting the necessity of a change of text-books, and in favour of the introduction of books not sanctioned by law. However desirable such may be, I have not sanctioned the introduction of any other than the legal text-book,—not in deference to any person's opinion, nor to flatter the Department, but simply in obedience to the law. I trust that the Council of Public Instruction will dispose of this troublesome affair as early as possible. There is one thing I would beg to observe respecting our present text-books: In English Grammar, we have about half a dozen authors; several Arithmetics, Spelling Books, Algebras, Histories, &c.; consider the trouble to teachers and pupils of such a variety in one school. If only on these grounds, I would strongly oppose the indiscriminate introduction of text-books, no matter how capable parents, teachers or trustees, might consider themselves to make a selection. As regards the public rights of publishers, the question of monopoly does not fall within the limits of any province; that which is just and of greatest public benefit I trust to see ultimately accomplished.

92. *John George Francis, Esq., Derby, Holland, Keppel, Sarawak, Sullivan and Sydenham.*—Of the forty-nine schools reported in this School Division of the County of Grey, only three were closed during the latter half of the year; the average time during which the schools were open was ten months. They were taught by thirty-four male and fifteen female teachers, the average salary of the latter was \$173, and of the former, \$235; twenty-one hold first-class and twenty-two second class certificates from the County Board, which I might here state, hold semi-annual meetings in February and October, for the examination of teachers; the questions are printed and the answers are required in writing; a new set of questions are prepared for each examination. There are generally about sixty applicants at each session, about twenty of whom apply for first class certificates; the examinations are conducted in a searching manner; about one-fifth of the first class applicants obtain the coveted honor of a first class certificate, which is granted for a period of four to eight years: second class certificates are granted from one to four years, third class certificates are only granted on the request of the Trustees of a School Section, to the effect that they are unable to pay a high salary, and that a person holding a third class certificate will meet the requirements of the section. The total number of children returned between the ages of five and sixteen was 3,776, the number on register of school age, 3,248; other ages, 231, shewing a total of 3,479; but the average attendance for the year was only 1,025, or less than one-third of the number on the register. The answers to question No. 56, relative to children not attending any school, were in many instances evidently incorrect. If I deduct the number on the roll (between 5 and 16 years old) from the reported school population, it would leave 528 as the number of children not attending any school, but I am convinced that this is an error; the population of the section is often the conjecture of the Trustees,

and not the result of careful enquiry; but after making due allowance for errors, there is a large percentage of children not attending any school.

93. *William Ferguson, Esquire, Artemesia, Melancthon, Osprey, Proton.*—I am happy to observe that a retrospect of the past few years, while it shows much room for improvement, nevertheless produces the pleasing conviction that decided progress has been made in educational matters in these townships. An evidence of improved literary taste and habits is seen in the increasing number of persons choosing teaching as a profession, notwithstanding the high standard adopted by the County Board, and the impartiality with which the three days' examinations are conducted. Formerly it frequently happened that parties who found it more difficult to retain or obtain positions in townships near the capital, would migrate to this northern county of the western peninsula, as possibly demanding fewer intellectual and moral acquirements; while now cases occur of parties honored with "First Class for life" certificates from the frontier, who find their literary qualifications barely sufficient to enable them to obtain limited second class certificates in this county. Again, I am happy to notice in my visits to the schools, that, though in some cases the teaching is merely mechanically performed, with little attention to the cultivation of the intellect, yet I find many instances where increased attention is given to the moral and intellectual, as well as the mechanical portion of the teacher's duty, and on the part of the community, a growing attachment to the educational institutions of our country. Finally, I would remark that the Board, at its last session, earnestly recommended to teachers and Trustees, the introduction of "military drill" in all the Common Schools of the county.

XXX. COUNTY OF HURON.

94. *The Reverend John Ferguson, Grey, Morris, &c.*—I have visited all the schools twice during the past year, and you will observe by the Annual Reports that the distribution of prizes is becoming more general, which circumstance argues well in favour of the results. I have, in the course of my remarks to the Trustees and parents, urged the necessity of providing the schools with a wholesome stimulus, and certainly nothing could be employed to gain this end better than the prospect of rewards at the several examinations. In Grey, the schools are provided with a library, granted by the Municipal Council; each section has about forty-two volumes, and they are frequently called for and read by both pupils and parents. The amount of good which would arise from each school being supplied with a proper library is incalculable, and is, moreover, a matter to which sufficient attention has not been hitherto paid. The religious instruction attended to in these schools is, perhaps, more nominal than otherwise, arising principally from the mixed persuasions of teachers, pupils, and others concerned. On the whole, the condition of the schools under my supervision, everything considered, is pretty satisfactory.

95. *R. D. Bonis, Esquire, Hay, &c.*—The schools in these townships are well supported, and many of them are all that can be expected of rural schools. The libraries are a valuable auxiliary to the teacher, and will, I trust, become a permanent institution. In two of the townships the Trustees have not reported the number of children of school age not attending any school; but I believe there are very few (if any) of school age, who do not attend some school during a part of the year, except those who are too young to travel the requisite distance. A few good school-houses have been lately erected in this district, but the provisions of the School Act, relative to borrowing for building purposes, are entirely inoperative, and the Trustees are obliged to levy the necessary amount in a single year. If a majority of the rate-payers had power to determine the amount requisite for building, the rate of interest, and the time of repayment, it would have the effect of replacing the present inconvenient and unsightly school-houses, by a class of buildings superior to anything that can be attempted under the present system.

96. *Cyrus Carroll, Esquire, Howick.*—I am glad to observe that teachers, having certificates from the Normal School are enquired for, and that two have been employed in Howick this year. The schools (fifteen in number) were all kept open the whole year, or as nearly so as possible, and all seem to work harmoniously and prosperously; the only difficulty being the general want of regular attendance. I think that some new legislation is required to meet the difficulty. In the first place, under the present system, the teachers

are paid for their time. If they have fifty or five scholars their pay is the same, and very many whose manner is naturally repulsive would gradually be superseded by others who have a natural facility of attracting children to school, if the salary was made up in part, in proportion to their success in securing average attendance. Competition might be brought about by abolishing the restriction as to attendance in any particular section. If this were done every teacher would be appreciated according to his success, and it would be of vital personal interest to so conduct the school as to secure the largest attendance. It might be requisite to require attendance at only one school for the whole year. This permission to attend any school in the township would save the scholars a great deal of travel in many cases, and would doubtless greatly augment the average attendance of the whole township. In proof of this I will mention a case that has come under my own observation. Section No. 13, is four and a half miles long, and one and a quarter wide, with the school-house nearly in the centre—say three-eighths of a mile from either side of the section. Now, children in another section, only living three-quarters of a mile from that very school-house, have to travel two and a half miles to their school-house in their own section. I think it will at once be conceded that these children would attend more regularly if allowed to go to the nearest school. It is, I think, worthy of consideration, whether it would be advisable to rate every child in the township of school age, at one cent per day for the period of, say two hundred days in each year. Then give credit of one cent per day for every day of actual attendance, and for every day lost by reason of sickness or stormy weather—or such other reasonable excuse as might be satisfactory to the Trustees, and collect the balance for the general school-purposes of the township, to be equally divided amongst all the sections, and added to the apportionment for the last half of the year. The fact is apparent to every one interested in the education of youth, that some change is required. I think that the reforms you contemplated in your official tour last winter would cover some of the suggestions I have made. Prize-books have been distributed in some of the schools, and with very good results. I think I can induce more of the Trustees next year to provide prizes. “Drill” is regularly practised in School No. 1. It is pleasing to see the regularity of the movements, and the aim at perfection on the part of every scholar. It seems to me to give a tone of regularity to all the exercises of the school. I wish a small book were published, containing such movements as could be executed in the school-room. I have visited all the schools twice during the year.

97. *The Reverend William Barr, Ashfield, &c.*—The schools under my superintendence are generally in a prosperous condition. They are usually well attended, and during the winter months a number of lads, who have out-grown their school-boy days, return to peruse old studies, and to make still further advancement. Let us hope that such a procedure may awaken within them a thirst for knowledge, which may continue to grow after they have left school never to return. Still the schools are not altogether in that satisfactory state we could wish or expect, especially when we take into account the organization of the school system, and the equipment of our schools, thus affording facilities for education, such as are seldom to be met with in the history of the youth of any country. The indifference of parents, and hence the irregularity of attendance on the part of the children, which is too palpable, together with the too frequent change of teachers, are causes continually at work to retard the steady advancement of our youth in their educational acquirements.

98. *The Reverend Mathew Barr, McKillop, &c.*—In each of these townships there have been eight schools in operation during the whole year. In Tuckersmith, a new section has been set apart, namely, C.S.S. No. 4, in which a commodious school-house has been erected, at a cost of \$600, and which was open during the last six months. In this township there were twenty-seven children between the ages of five and sixteen years not attending any school. I regret that in six of the sections in McKillop the number of children between these ages not attending any school was one hundred and nineteen; this number, though by far too large, is a very great decrease from that of last year's report. The assigned cause is parental indifference to educate the children; and, though lamentable to contemplate such blind fatuity, still I think, in this case, it will be difficult to point out any other cause, as the schools in McKillop are all free, no persons are reported as indigent, and the roads are not worse or the schools at greater distance apart than in other sections,

in which all the children attend school. Only ten of the whole seventeen schools were opened and closed with prayer, and in only six of these were the Bible and Testament used. Religious instruction is very little attended to in any of the seventeen schools. The revised programme for County Board Examinations is observed, and the questions are printed. The books in all the libraries are covered, numbered and labelled, and where the regulations in regard to libraries are strictly observed, the influence is beneficial and gratifying. In Common School Section No. 2, McKillop, the volumes are open to the whole section, whereas in Union School Section No. 7, Tuckersmith, the volumes are open only to the pupils. Perhaps it may not be owing to this difference that the separate applications for volumes during the year amounted, in the former section, to 418, nearly three times the number of separate applications for volumes in all three sections having libraries in Tuckersmith, namely, 142. Prizes are distributed, according to merit, in most of our schools, and with very beneficial and gratifying results.

99. *The Reverend C. C. Johnson, Goderich.*—The schools which have come under my superintendence during the past year have, I think, with an exception or two, made satisfactory progress. The regular attendance, however, has not been, as a general thing, what either teachers or myself would desire. Wherever anything is said about it in the Trustees' Annual Report, they attribute negligence as the cause. In my addresses to them and the children (when visiting the children), I have dwelt much upon this subject of complaint, and endeavoured to point out the injury and loss this irregularity brings upon the section at large. The prevalent idea, it seems to me, is that, because the cost of education is directly light upon them, to keep their children one, two or three days out of school in the week is a matter of little concern, and can easily be made up again at some future time. I have attempted to deliver public lectures, but have been very much baffled this winter by the storminess of the weather and the blocked-up condition of the roads. The difficulty and slowness of giving notice by post of the Superintendent's coming visit has a good deal to do with defeating his object. He may find it out of his power to send out his "programme" of visits and notice, to warn out the people, more than four or five days beforehand; and when he arrives, it will often be to find that they have never heard from him, the Trustees not having been to the post in that time; and whenever notice does carry, there is not that alacrity in the parents to meet the Superintendent which the importance of the object demands. I must, however, make an exception to this in favour of the Trustees. As far as my experience goes, they are most anxious and ready to do their part, giving up both their time and attention to the work. The regulations as to the County Examinations are, I believe, fully carried out, being, as far as practicable, conducted on paper; but it seems the general impression that the standard of education would be raised in the country if the granting of third-class certificates to teachers were entirely done away with. I am glad to be able to report that, with two exceptions, the schools are opened and closed with prayer, and in one of these two it is closed (though not opened) with prayer. The Bible or Testament is read in all, perhaps, but one. Let this principle be more fully recognized in all our schools throughout the country, and we will expect a blessing to rest upon our land, and success—in the highest sense of the term—to attend our educational interests in this highly-favoured Province.

XXXI. COUNTY OF BRUCE.

100. *William Bull, Esquire, Albemarle and Amabel.*—The Reeves of the townships, with the Local Superintendents, have lately attached part of an adjoining School Section of Arran, to School Section No. 3, Amabel, so that I hope for the future the Trustees will be able to have an efficient school in the section, with less expense to the rate-payers. Since my last Report, the Trustees of School Section No. 1, Albemarle, have provided their school with maps, &c., and I have urged the Trustees of the other sections to do the same, and I am led to believe that they will do so immediately. There are at present but three schools in operation, but I expect there will be two more opened during the year.

101. *The Reverend William Fraser, Kincardine.*—We use the programme of examination required by law, and print our papers. Both the schools and teachers are advancing rapidly. In a short time mensuration, book-keeping, algebra, geometry, composition and

the highest elements of grammar and geography, will be taught in all our schools; therefore one-half of the present run of teachers will go there only to learn, not to teach. For this and some other reasons, I would hesitate before I would intermeddle much with a system which is doing so well, and which for great work, by small means, is second to no other system in the world. At the same time some few corrections might be made. Yet one Local Superintendent for each county is not likely to meet with favour as he would be from three to six times the present expense if a first class man. The extent of the field will require his whole time, and his needful local character will be destroyed. Salary and travelling expenses will be allowed, and after all he may not be one straw better than many of our present officials, and in not a few cases be inferior to a great many members of the present Boards. Almost the whole clergy, the leading worthy literary men of weight and character in the community, would be at once excluded, and the legitimate and highly useful influence they exert over the common education of the country for ever cease. All this in favour of a few inferior men, out of the schools, whom the mere knowledge of letters, as a general rule, will make but very poor Local Superintendents. I say inferior men, because the most worthy and superior classes are otherwise employed by the people in other important callings. A great many of the last are and may be Local Superintendents of a few townships, without any injury to those callings; but a whole county would require a man's whole time. Finally, the ease and elasticity of the present principle in removing an official at the end of the year, who becomes distasteful to the people and rulers is given up in favour of a Government official, perhaps put and kept over the people, in spite of them, and worse still if at their own expense. It would be natural to suppose that much partiality and abuse might exist in such an office before a change could be made.

102. *John Eckford, Esquire, Brant, Carrick, Culross, &c.*—It affords me pleasure to be able to report that the schools under my supervision are, with few exceptions, in a prosperous state; this is to a great extent attributable to the teachers, who, in scholarship and the art of instructing, are generally very superior to their predecessors some years ago. It was a very judicious decision to allow teachers a few days to visit other schools; here is perhaps a Normal School man of high class, whose school is nearly a perfect model of what a school ought to be; there is another without this distinction but not a whit behind him, who has been instructed and trained for the profession under some distinguished master; elsewhere are certain others of much experience whose hearts are in the work, and who have successfully availed themselves of every means of advancing their proficiency. Now, whether other teachers visit these or are visited by them I perceive very good results. I am sometimes asked to name five schools which may be visited with most advantage; and whereas, in past times, I often found it necessary not only to speak aside with teachers and make suggestions, but also by conducting the exercises endeavour to show them a more excellent way, I now find to a great extent this occupation gone. Associations of teachers for mutual instruction and incitement have also helped forward in the same direction; hence, there is now a greater uniformity in the modes of instruction, and these modes the best we are acquainted with. I do not unduly magnify the importance of good teachers, when, with a thorough knowledge of what they profess to teach, they are conscientious, earnest and devoted, possessed energy and tact, and what is also of the greatest importance, capable of winning the esteem and affection of their pupils. In such cases we find not only great progress and proficiency, but also well-attended schools; and but few reasons of non-attendance reported in the returns. The population of these townships (estimated) is about 16,000, and 4,735 have been more or less regularly under instruction during the past year. I am not aware that the education of any family has been totally neglected. I have to bear testimony to the great results of attention on the part of the teachers to the "prescribed order and classification of studies," and also that oral elementary instruction of the very young children is practised extensively, and with no small success. There is a greater and more advantageous use of the black-boards. You will perceive that a few of the schools have only been open from six to nine months; these are the least prosperous. Good teachers are under no necessity of accepting appointments where they are to be thrown out of employment for several months; and those of an inferior class and obtainable at inferior salaries are engaged. Change of teachers is also more frequent, and when with such facts we take into account the long vacations, no

surprise will be expressed that they only prosper in a very small degree. Look at the schools of New York State—all of them (those in cities and towns doubtless excepted, of which I know nothing from personal inspection) from twenty-six to thirty-week schools—four-fifths of them taught by females with salaries ranging from 150 to 190 odd dollars in greenbacks. I examined on a recent occasion the state of as many as I could overtake chiefly in the South-eastern Counties, and so far as my observation went I am disposed to class them with those of our own, of which I now write. However it may be with those of other States, these of the Empire State are not equal to the generality of schools in Western Canada. This evil of which I complain is being remedied by the earnest endeavours of our Municipal Council to alter boundaries and enlarge the weaker and poorer sections. The distribution of prizes, which has an excellent effect, is becoming more general, but, we still continue in almost every case to give smaller books, cards, &c., to all the others, and cheer them onwards to a place in the prize list; this answers more than one good purpose. I have no very favourable report to make of the libraries of the district. They are neither so numerous, so well kept, nor so enlarged as they ought to be. I forgot to mention in the proper place that teachers' salaries have a slightly upward tendency.

XXXII. COUNTY OF MIDDLESEX.

103. *The Reverend William Fletcher, McGillivray.*—The schools in McGillivray are steadily progressing; we have now five first class school-houses, and hope to have another built this year. Our class of teachers is also improving. First class female teachers are being employed in our smaller School Sections, instead of males of an inferior class. Our schools are all free, and most of them open for the whole year. The attendance for the first six months of last year was good, being an average of 566, and only \$477 Government Grant. Could we not have the Government Grant divided among the schools of Upper Canada, according to the work done? We think School Section boundaries might be ignored as regards attendance, and schools declared free and open to all, if the Government Grant and county assessment were doubled, so as to leave only a small deficit to be made up by local tax. This would be a great inducement to Trustees to employ only efficient teachers, and be a step in the direction of the proposed change to Township Boards. The County Board has raised the examination of teachers as much as, we think, the class of applicants will bear. The questions are not printed but written, numbered and valued, and when dictated to the class, time is limited for each subject.

104. *Charles Hardie, Esquire, Nissouri West.*—I have the satisfaction to remark that the average length of time the schools have been open, is eleven months and sixteen days; that they have been free and have been generally taught by excellent teachers, and that great advancement in learning has been made by the pupils in many of our schools during the past year. On the other hand I feel sorry to state, that the average attendance does not equal one-third of the names enrolled; that eight teachers out of twelve schools have resigned their situations, some of whom, I believe, relinquish the profession for ever. Knowing that many new teachers oftentimes fail to succeed for a length of time, and some never succeed in their avocation, I deeply lament that so many causes exist to produce such injurious changes. Some from cramped, contracted and non-ventilated school-rooms, feeling their health declining, retire; some failing to please certain Trustees and parents, by introducing improved methods of teaching, because these were not taught so in their youth, have opposed the teachers in every effort to impart a comprehensive education to all, and not as in former times for the few to obtain what the majority failed to acquire; some have betaken themselves to other pursuits, their salaries being inferior to that of a labourer—by which the ever-changing occupation of teaching may be substituted for those of greater permanency, producing more remunerative incomes. I find that a great deal of failure arises from pupils being permitted to pass through their studies, before they are properly grounded in the elementary principles. By examining them therein in many cases, I have been amazed that teachers could conscientiously allow pupils to pursue a course that ends in disgrace, and in a distaste for further improvement. As I have never before alluded to the subject of prizes, I now make a few remarks relative thereto. I have always found under the old system of awarding them on the report or decision of the teachers, or by underhand preparatory exercises,

dissatisfaction ensued (as too frequently occurred, the children of the teacher's patrons succeeded), therefore, if any method is unobjectionable it must be founded on the principles recommended by yourself. On a recent occasion, when examining a school, and finding the best scholar at the foot of the class, I enquired of the teacher what was the cause, to which he gave the following important information:—"He kept a book to record the marks of merit, good conduct, &c., from one period to another, so that any pupil on receiving the highest mark on any day, had to go to the foot of the class on the following, and no marks could be given to the same pupil until the head place was again attained, and no mark would be given to any pupil, however high the standing in the class, who would make infractions of the rules of the school, by which means the greatest order and improvement prevailed, and hope and every inducement to improve and excel were given to all." The County Board examination questions are not printed, but each member of the Board has a particular class and subject assigned him, from time to time, so that the collective judgment of the Board on the merits of teachers is not now so generally consulted as formerly. I may state, for your information, that I have not been on terms of unanimity with their decisions for some time, owing to some members, in direct opposition to proof, giving higher certificates of qualification to many teachers than the programme would permit. Whether you may succeed or fail in promoting a more generally sound education to every School Section throughout the Province, I can from experience testify that the majority would acquire, what only a part now realize, if your contemplated changes could be properly established.

105. *Harrison Thompson, Esquire, Metcalfe*.—I think from the mode in which the schools are conducted that the rising generation will form a better staff of Trustees. You will see in my Report that there are twelve children who did not attend any school; the cause was indifference of parents. The general regulations in regard to religious instruction are not attended to. The revised programme for County Board Examinations is observed, but the examination questions are not printed. The library books are covered, labelled and numbered, and the regulations are strictly observed. The library appears to create a very good influence in the neighbourhood, as all the books have been read by quite a number of persons. In the school where prizes were distributed they gave general satisfaction, stimulating a desire in the pupils to strive who would make the best progress in his studies. I am using my influence with the Trustees of every School Section in the Township of Metcalfe to get prize-books for all deserving pupils. The schools under my charge appear to be in a very efficient state, and I can notice a marked improvement since my visit in June last. You will perceive in my Report that School Section No. 9 has no school-house. The Churchwardens of the English Church at Keatsville are very kind in allowing the Trustees to hold school in it, but the Trustees intend to build a new one this year.

106. *The Reverend A. Sydney Falls, Adelaide*.—I am of opinion it would be very desirable that Trustees, or the inhabitants of well-to-do sections, should be compelled to provide proper school-houses, with the necessary adjuncts. There are, at least, two in a very wretched state in this township; one, a small open log cabin, which the section should have been ashamed of years ago; the other, a small frame, but here there are signs of improvement, for a contract has I believe been given for a new one.

107. *The Reverend James Gordon, Dorchester North*.—I beg to remark that all the Common Schools in North Dorchester were in operation during the last year; and, with two exceptions, they have been open for nearly the whole teaching period. In general, the teachers have been painstaking and efficient, although their attainments are not very high. Being a comparative stranger in this part of the country, I am not in a position to speak regarding progress; the intelligence and interest that I have witnessed on the part of many Trustees, in school matters, have afforded me much pleasure, and lead me to hope that a higher standard will soon be reached. My public lectures have been well attended, when held in the evening, and much interest manifested in the topics discussed. The school-houses, four excepted, are inferior; low in the ceiling, badly planned, poorly furnished, and some of them much too small for the number of pupils, and without any ventilators, except the openings arising from dilapidation, which, fortunately, are numerous, in some of the most crowded. I now feel it my duty to speak very plainly in reference to the wretched condition of the school-houses, not only as affecting the progress of the pupils in

education, but as injurious to their health, and likely to sow the seeds of disease that will bring many to a premature grave. I have reason to think that, in some sections at least, these evils will be remedied very soon. Some time ago the Township library was divided among the different sections, and the remains are all that exist in the shape of public libraries; as might be expected, the reports show little interest felt, and little good done by them. Where prizes have been distributed (which has occurred in a few schools) the influence has been good. By seeing their children bring home nice books, parents are often led to take a greater interest in the education of their children, whilst in the pupils a healthful emulation is created, that incites to diligence and regular attendance. Indifference, distance from school and imposition of a rate-bill, are the chief causes assigned for non-attendance. For the most part the schools are free. A keen contest was carried on in two sections between the advocates for rate-bill and free schools, which has been hurtful; in my opinion, this bone of contention should be removed as soon as possible. The revised programme for the examination of teachers is not observed, nor are the questions printed. The changes proposed in the School Act are generally unpopular; this I attribute (in part) to ignorance of their true merit, and the misrepresentation of certain journals, whose political bias seems greatly to influence them in dealing with public measures. A uniform standard of qualification for teachers should be adopted for the whole Province, which can only be done by some such measure as you propose. Compulsory attendance is a necessary prop to few schools, and is generally regarded with favour now. A change that would remove sectional boundaries so as to permit parents to send on equal terms to any school they might select, would be a boon for which many would be thankful; and if salaries depend in part—as in my opinion they should do—on the numbers attending school, a wholesome rivalry would be created among teachers; in some instances it would be a safety-valve to let off the disaffected. The greatest desideratum to the elevation and thoroughness of our schools is some such change as you propose regarding Trustee Boards, so that the teacher ought to be less dependent upon local influences, and have a guarantee that his situation would be permanent, so long as he conducted himself properly and was efficient in the discharge of his duties. As it takes time to show results where work is thoroughly done, the good teacher is often less popular than the superficial, and frequently has to go away when he might be most useful to the pupils and reap the fruit of his labour. The present system is fraught with many evils to both pupils and teachers; the former are greatly retarded in their progress by frequent change, while they too often get chaff for wheat, the latter even when talented and energetic often fail, and when they do not, they are apt to regard teaching as an unsatisfactory and temporary occupation, instead of an honorable profession, to which they might devote their time with pleasure and profit. Now, as the whole machinery of the school system exists mainly with a view to the teacher's efficiency, that must ever be defective which does not encourage men of talent to become and continue teachers, by placing them in a position that skill, fidelity and energy, may win distinction and success, and secure their legitimate rewards.

XXXIII. COUNTY OF ELGIN.

108. *A. F. Butler, Esquire, East Riding.*—I believe I can safely report a condition of steady and increasing prosperity of the schools in East Elgin. A large majority of them are free, and the feeling in favour of free schools is yearly gaining ground. The attendance, therefore, is fair—the number not attending any school being quite small in comparison; and of this number, it is probable that nearly all attend school a portion of their time during the period of their school age. The causes assigned for non-attendance, are the same as usual. Prizes were given in some of the schools, with the good and bad results which generally attend the giving of prizes. Successful teaching depends more upon the personality of the teacher, than the methods he uses. Many of our Trustee Boards are beginning to see that both tact and talent are necessary in school management, and when this is properly understood by all, teachers possessing these qualities in the profession will be retained as rare treasures. The Normal School is doing much towards teaching the art of teaching. Among the sixty schools of the East Riding there are, at present, fourteen conducted by teachers holding Provincial Certificates, and these teachers, successfully managed, are generally superior to those who have

not had the advantage of Normal training. At the last meeting of the County Board of Public Instruction, the candidates for certificates were requested to write numbers, instead of names, upon their papers; the name of each applicant remaining unknown to the Board until the papers were examined and graded; the examination was thus rigid and impartial, meritorious papers being the only price of a good certificate. Printed questions have long been used by this Board, and the standard is being raised as fast as practicable, with a view to driving out of the profession those teachers who have mistaken their calling. The regulations concerning religious instruction are not followed. The clergy, however, frequently visit the schools, and attend the public examinations, and at such times their influence is felt for good. I regret to say, we have but few school libraries, newspapers being read more than books; of course, an acquaintance with newspaper literature is not in itself a disadvantage; but a proper intellectual culture demands also a knowledge of books, for "Books, we know, are a substantial world, both pure and good; round these, with tendrils strong as flesh and blood, our pastime and our happiness will grow." Many of our teachers and school authorities are looking forward anxiously to the promised revision of the National Readers, hoping they will then better meet the wants of the schools, by furnishing a more interesting variety of prose and poetical pieces, as aids in elocution and training, and in developing a taste for reading, and a love for the good, the true, and the beautiful in literature.

XXXIV. COUNTY OF KENT.

109. *Edmund B. Harrison, Esq., County Superintendent.*—It affords me pleasure to say that the plan of frequently changing teachers, which has proved such a serious obstacle to the advancement of the schools, is giving place to that of retaining teachers as long as possible, hence, the changes have been fewer than heretofore, thereby much valuable time has been saved to the children, and the efforts of school visitors better directed. The expected change from School Section Boards to Township Boards will, I trust, render the teacher's situation more permanent. So far as I am able to judge, our teachers in general are doing the best they can to improve themselves for the more efficient discharge of their duties. From the returns of the number of volumes taken out during the year, and from personal observation, I am led to believe that the libraries are not doing all that could be desired. This might be attributed to the want of a fresh supply of books: many have received no additions for years, but where new books were procured, an immediate demand was made for them. It is the intention of one of our sections to add to its library every year. It would prove beneficial if the Trustees of the different School Sections were allowed to sell old books, and with the proceeds obtain new ones from the Educational Depository. Notwithstanding there has been an increase of 615 pupils attending school during the year 1866, yet, owing to sickness and bad roads, the aggregate attendance from July to December shows a decrease of 15,867 from what it was for the corresponding period in 1865. The usual causes assigned for non-attendance are neglect or indifference of parents and bad roads. The system of granting rewards by means of records, tickets, and prizes is becoming better appreciated. The general regulations in regard to religious instruction, so far as they relate to reading the Bible or Testament, and opening and closing the school with prayer, are followed in many of the schools. I am sorry to find among the amendments to the School Law, no discretionary power is given to the Trustees to permit the summer vacation to be taken in July instead of August. In this county the harvest commences in July; consequently, the schools are either closed in July, or the attendance is so small as to be discouraging to both teachers and scholars. The schools which are closed in July are generally opened in August, during the vacation, but as that attendance cannot be returned, a deduction from the average attendance is the result. By placing compulsory attendance in the hands of the municipalities all is done that can be done; to have made it imperative, would be the means of doing much injury to the struggling rate-payers in the newer parts of the country. First, place the rate-payers in a position to send, then punish them for not sending.

XXXV. COUNTY OF LAMBTON.

110. *The Reverend Peter Goodfellow, Bosanquet.*—It will be seen by the return that,

in so far as statistics are an indication, the schools in the township are still making progress. For the past two years the attendance has been nearly twenty per cent. over any former year, and the twelve months now expired shew still an advance on the preceding. This is satisfactory, so far as mere attendance is concerned, and I believe an equally favourable report can be made in regard to efficiency. We have a larger proportion of first class teachers than in any former year, and, while one or two schools may be said to have declined, the majority have made very respectable progress. I wish as much could be said of the school-houses; but the same old dilapidated buildings which have been in existence since the township was first settled are made to answer for that purpose, and no effort is made to improve or replace them by others of a better sort. The fact is, that the work of teacher and scholars, to say nothing of the health and comfort of both, is greatly retarded by a want of sufficient accommodation. The school-house in No. 2, one of the largest and wealthiest sections in the township, is a positive disgrace to the community, and that in Section No. 6 is very little better. In the former, the scholars can barely manage to crowd themselves in, even in the most compact manner; and then how they can learn, or the teacher maintain order, is a question I leave for the Trustees to answer. I need scarcely add that where the school-houses are so bad the apparatus is of the most meagre description. The system of prizes is still adhered to in several cases; but, owing to the defective method, as I consider, of awarding them, they do not accomplish the results which might otherwise be expected from them. At the last public examination which I attended where prizes were awarded, they were distributed to the whole school, and apparently without much, if any, effort to distinguish between the merits of the different scholars. While this may please parents and children generally, yet I think the beneficial effects are in a great measure lost. The industrious are not encouraged, nor the indolent roused and stimulated. The more diligent feel there is a sort of injustice done them when, under the name of rewards, they receive a prize which places them on a par with those whom they have left far in the rear; while the backward, since they receive prizes of equal value with the more advanced, are not in any degree stimulated by them. And now about the library: I am sorry to say there is nothing good to report of it—I mean of its management, for the eleven or twelve hundred volumes, when read, can never be productive of anything but good. The books were originally divided into five portions, and distributed to each of the five township wards—an objectionable arrangement from the first, since so many of the people have several miles to go in order to get access to them. However, that division is still maintained, and I have just paid a visit to the different librarians and carefully examined the condition of the books, so many of them, at least, as were to be seen, and regret to have to notice the wretched condition in which I found them. About one-fourth part of the books, as nearly as I could ascertain, in some of the wards, are destitute of covers; considerable numbers are tattered, torn, and pencil marked, or otherwise disfigured; and not a few have been lost altogether.

111. *James Dunlop, Esquire, Plympton.*—The schools, generally speaking, are in a poor condition, the fault lying principally with the Trustees, who commonly labour to be elected to serve some selfish end, instead of the good of the school. They take more pleasure in winning an election and then annoying their opponents by their subsequent actions, than in seeing that the school is properly conducted. The main recommendations of a teacher to a Trustee are, whether he will board with him, trade with him, if he has a shop—rent his house, or pay a debt he owes him; in fact, the school generally comes in third in order of consideration: first the Trustee, then his friend, then the school. The Electing Trustees generally divide the section into two parties, and create a good deal of personal enmity, and cut of spite the losing party soon find an excuse to keep their children at home, or send them to another section—a very common cause of non-attendance at the school in their section; the other chief cause of want of attendance, is the distance from the school, which for young children is too much, being sometimes two miles.

XXXVI. COUNTY OF ESSEX.

112. *Alexander Craig, Esquire, Tilbury West.*—The schools in this Township have made, on the whole, satisfactory improvement during the past year. They were all free, and are the same this year. They are all in operation with the exception of one, and that

is closed for the want of a teacher, whom they have not as yet got. The one they had was severely hurt by a horse, and had to give up teaching a few days before the close of the year, but the Trustees have advertised for one. The Trustees of this new School Section were building their school-house the first six months, and could only keep school open the last six months of the year. The general attendance of the children at the respective schools is more regular, and there is a growing desire on the part of the parents and guardians to send them to school. Children who live within a reasonable distance attend the school. The Sections are so large and thinly settled, and roads so bad, with a complication of other causes, that it is nearly impossible for some children to attend school. One section was divided into two, and in these two sections there was not so much as one child of school age that did not attend school. Other three sections are proposing to do the same, which will give all the children the privilege of attending school. I am not in favour of small sections: they are expensive; but certainly they are more convenient for the children. I am not against compulsory attendance, if it could be known how the children of the indigent are to be provided with suitable clothing, to enable them to go to school; but, query, where are the requirements to come from. Measures might be taken to enable the children to go to school, which, in all likelihood, would reconcile the many that are opposed to it, and probably would organize the system. Trustees are anxious to discharge their duties in school matters, and are eager to employ good efficient teachers, as far as their finances will admit. The services of the teachers were duly appreciated; the intelligence of their pupils and the progress made evinced that their duties had been conscientiously discharged. When the examinations are accompanied with pic-nics, we have a large auditory, but otherwise they are thinly attended. Prizes have been distributed in three sections during the past year, with satisfactory results, and especially when each pupil receives one, however small, the distribution is very acceptable and stimulates to exertion. Regulations regarding religious instructions are not followed out to any great extent, the clergy who have charges in this township living at a distance, which renders it almost impossible for them to attend to the schools. We have Sabbath School libraries, (but no other as yet) which are well read and do much good. The disposition of the Board of Public Instruction is, to raise the Standard of Education, and to pass none but efficient teachers. The *Journal of Education* is a welcome visitor.

113. *Denis Downing, Esquire, Sandwich East.*—All the schools in this township are now free, and for the first six months of the past year were well attended. The teachers in Sections 1 and 4 were changed during the past year. It is one of the greatest evils of our schools to change teachers, for each new teacher is in the habit of introducing new methods of teaching. I find much trouble with the Trustees' Annual Reports, for half the financial matters are not properly filled. Prizes were given in some of the sections, which had a good effect. The school-houses in this township are comfortable frame buildings, except one hewed and weather-boarded house, and one of round log. The average attendance for the year shews a gradual increase. The revised programme for County Board Examinations is observed, and the examination questions are printed. All second class teachers are notified to attend the meeting of the Board in June next.

XXXVII. THE CITIES.

114. *The Reverend James Porter, Toronto.*—In reviewing the attendance for the whole year, it is satisfactory to find that, while the aggregate number of pupils on the registers was less by 238 than in 1865, the daily average attendance was larger in 1866 than in 1865, to the extent of 143. I regard this fact as furnishing pleasing evidence that no little effort was put forth by the teachers to promote the regular attendance of the registered pupils. I have the pleasure again to report, that the Rev. Mr. Boddy has continued to supply religious instruction at the Park School, on Friday afternoons, his course having been interrupted only during his temporary absence from the city; and that the Rev. Mr. Baldwin has continued to afford similar instruction at the Victoria Street School, on every Wednesday afternoon. Brigade Major Denison again furnished, throughout the usual season, suitable instruction in military drill to the senior pupils of the several schools. My conviction of the great benefit of such instruction to the individual, and the community, remains unaltered. The wonted liberality of Jesse Ketchum, Esq., has again

been manifested in the form of Bibles, Testaments, and various religious, moral, and entertaining books, which were distributed among the several schools by himself or his agent, the Rev. Dr. Richardson, to the extent in value of \$160.11. The following resolution was inserted in my last Annual Report, as adopted by the Board on Nov. 15:—"That in the opinion of this Board, it is of very great importance, that means be early adopted for the education of the many untaught children who are now wandering about the streets of our city; and that it be an instruction to the Committee on School Management, to ascertain what means are practicable, in order to accomplish that object." When this resolution was passed the announcement of the Chief Superintendent of Education respecting the subjects to be considered in the County Conventions, which that officer was then about to hold, had not, I believe, been made. The consideration of the subject of compulsory education at those conventions was intended to prepare for advanced Provincial legislation. Until such legislation be accomplished, probably little can be done towards carrying out the above resolution of the Board. In endeavouring to promote the improvement of those untaught and unemployed children who have not yet subjected themselves to restraint, in due course of existing law, it may be well to ask for some legal enactment which shall deal with their ignorant and idle condition, as the consequence of a degree of criminality, less indeed their own than that of their parents and guardians. How far the contemplated introduction, by the Chief Superintendent, into the School Law of Upper Canada, of the principle of compulsory attendance, will assist the solution of the difficult social problem before us, remains to be seen. The Chief Superintendent, when announcing in December, 1865, his intention to hold a School Convention in each county, early in the present year, states, as among the subjects to be considered in such Conventions, "It is proposed to consider whether each Municipal Council should not be invested with the power to bring to account and punish by fine, or requiring to work on roads, parents who do not send their children, between seven and fifteen years of age, to some school, at least four months in the year." And in the *Journal of Education* for March last, it was stated that "of forty County Conventions, thirty-four affirmed the principle of the duty of the state to render penal the neglect of parents to avail themselves of the opportunity afforded for the education of their children." Two Conventions declined to take action in the matter, and a few had not then reported their minutes. The legal provision here contemplated appears to consider especially the wants of rural sections, but surely it will not overlook the case of untaught children in cities and towns. The following is an instructive extract from the laws of the State of Massachusetts which provide for compulsory education in certain cases:—"Each city and town may make all needful provisions and arrangements concerning habitual truants and children not attending school, or without any regular and lawful occupation, or growing up in ignorance, between the age of five and sixteen years; and also all such by-laws respecting such children as shall be deemed most conducive to the welfare, and the good order of such city or town; and there shall be annexed to such by-laws suitable penalties not exceeding _____ for any one breach; provided that such by-laws shall be approved by the superior court of the county." Other and more minute provisions follow, which it is unnecessary to quote. May it not be hoped that, as early as practicable, after the consummation of that Confederation of the Provinces of British North America to which we are generally looking forward with such eager expectation, the Legislature of Upper Canada will address itself to this momentous subject, and will provide the necessary buttress to that imposing structure of public education already erected in this country, without which it may be in danger of crumbling into ruins. No theory, however, on the duty of a Legislature in connection with this matter can affect the great responsibility of parents or guardians for the neglect of children. Many parents, while not altogether devoid of instinctive natural affection, seem to regard their children merely as a species of property with which they can do as they will, provided they do not violate that public law which will protect children, as it will other domestic animals, from sheer barbarity. Public opinion too, and their own interests, constrain them to do something towards the feeding and clothing of their offspring, but, themselves, in some instances, without the rudiments of ordinary education, they have no sense of its necessity in order to the well-being of their children, and they embrace the earliest opportunity to make the labour of their little ones contribute to their own pecuniary support; if indeed they do not carelessly allow them to run hither and

thither, regarding the region around them as a kind of common from which their children may pick up what they can towards the satisfaction of their very inconvenient cravings. Thus their children grow up, as much accustomed to street life as to life at home, and, if they undergo any home training, it is chiefly of an injurious and vicious character. But while, for the most part, the parents of such children are highly culpable, it must not be forgotten that there are not a few parents, who, with respect to their arrangements for their children, are rather objects of pity than subjects for blame. Their honest purpose and earnest efforts to provide, by the sweat of their own face alone, enough for themselves and for those who are directly dependent on them, are not always crowned with full success, and thus they are sometimes induced and even compelled to avail themselves of the help which even a child can give towards the solution of the question—How shall both ends meet? I cannot but agree with a recent English writer that “It does occasionally happen that a child is receiving the best education, when sacrificing his book and pen for the sake of contributing to family wants.” Such a case, however, is exceptional and extraordinary. And I must also agree with another equally able writer who says, that “As a general rule, it is not inability that weighs with the parent, but the desire to profit from his child’s earnings. Moral suasion has been the favourite instrument in bringing scholars to school; but, in these days of great demand for juvenile labour, it has but little weight. In the presence of the vast amount of ignorance and consequent vice, so distinctly brought out by statistics and reports innumerable, various schemes have been set on foot to check this ever swelling tide. There can be no doubt that, theoretically, the best security for the education of every child will be found in the parents conviction of the inestimable value of that education, and the resolution to make every sacrifice necessary to its attainment. But such a happy condition universally, can only be found in Utopia, or at the Millenium; meanwhile, we must take human nature as we find it.” The urgent educational question at present is not, how shall we provide the highest possible culture for the few, but, how shall we ensure that the many shall avail themselves of that measure of instruction which is unspeakably important, if not indispensable for all? And, in the solution of this question, might not more be done by the several sections or by the numerous individuals composing the Christian community? I cheerfully acknowledge that a considerable amount of benevolence and religious zeal is put forth on behalf of Sunday Schools, whether held in direct connection with the several Christian congregations of our city, or conducted as Mission or as Union Schools. All honour to those who, at the cost of much time, self-denial, money and labour, thus endeavour to diminish the mass of ignorance, vice, irreligion, and misery, and to increase the sum of knowledge, virtue, religion, and happiness. But there are seven days in every week; and there is much reason to fear that there are very many children around us, who either are not comprehended within the range of Sunday School influences, or, are, on all other days, without instruction and without restraint. For these I cannot but think united Christian charity might do something, though by no means all that is necessary. Nor do I make this suggestion theoretically merely, or in the absence of fact and precedent. In the populous and busy city of Manchester a society entitled “The Education Aid Society,” has existed for upwards of two years, the object of which has been well described in a recent review of its operations, as the extension of the benefits of education downwards through the successive strata of society, until even the lowest is reached; until, indeed, the foulest sin of which a community can be guilty—that of child neglect—shall be wholly removed.” “It is in its mode of action, however, that the Education Aid Society differs from other philanthropic movements. The committee accept the agencies already existing and aid them instead of directly establishing new agencies. Children are sought out by domiciliary visits, their parents are conversed with on the duty of sending their children to school, and are offered aid according to their circumstances. The number of children sent to school by the agency of this society was nearly doubled in the second year. Yet the committee and agents of even this society find that, “in some localities, parents and children are alike unimpressible.” Our schools, it is true, are nobly free to all, and none are excluded from them who are in a state of common cleanliness and decency. But there are, probably, not a few children in our city whose parents find it difficult to furnish them with comfortable clothing, especially during the winter months; or with the few books which are necessary for their instruction.—Christian philanthropy of an unsectarian character, especially if properly organized, might

doubtless do much in the visitation of parents and children at their homes, in pleading with parents who are insensible to the advantages of education for their children, and, in providing such clothing, books, or other aid, as may be required, in order to secure the regular school attendance of many children, who are now exposed to the malign influences of idle and vicious street associates. But it is not a little remarkable that the conclusions arrived at by the thoughtful and earnest philanthropists of Manchester point to the necessity of compulsory attendance at school. Such is the result of full two years' labour of a band of peculiarly enlightened and active educational volunteers. Among their conclusions, which are as applicable here as in England, are these: 1. "That no private or voluntary effort can reach the depths of this evil in the social constitution. 2. Further legislation is urgently needed to provide for and, as far as possible, secure the primary education of every child in the community. 3. There must be a mild and gentle kind of compulsion or pressure to bring the children to the schools. And, 4. That no child should receive wages who cannot read and write." Here, say these practical philanthropists, education is already provided, and we are now at a stand still "because of the indifference or inertness of parents as to the education of their children." Of our city it may also and especially be said "here is education provided, yet it is by no means universally received, because of the indifference and inertness of parents." Our legislation provides for the building, furnishing and maintenance of school-houses, for the employment and payment of competent teachers,—in a word, for all the machinery for useful education; but much of the material to be educated is withheld through parental indifference or parental cupidity, or it may be, in some few instances, by parental poverty; and the obvious and painful consequence is, that juvenile idleness, vice and crime, abound, and numbers of children who should be in the school-house are on the streets, or prowling about the lanes and yards of the city, or on the watch for mischief and plunder: objects of mingled pity and dread to the citizens, thorns in the flesh of the police magistrate, rising candidates for the Gaol, the Reformatory and the Penitentiary, and a reproach to our vaunted civilization and professed christianity. It may be well that I should add that, during this very month (December), at a meeting of the citizens of Manchester, convened by the Mayor, in accordance with a requisition signed by a large number of the most influential men in that city, of all political opinions, and belonging to almost every religious denomination, chiefly also large rate-payers, it was, on motion of Mr. Alderman Bennett, the President of the Education Aid Society, resolved, by a large majority: "That it is desirable to provide for primary instruction by means of local rates, with legal power, in cases of neglect, to enforce attendance at school." From Mr. Bennett's address in support of the motion I make only the following brief extract: "He thought it only fair that if payment was to be made compulsory on the one hand, attendance should be made compulsory on the other hand. The Education Aid Society gave it as their deliberate and unanimous conviction that, such was the apathy and indifference of a large proportion of the parents, nothing but compulsion, in one form or other, would bring their children within the pale of education." The inevitable conviction thus arrived at by the proverbially benevolent and active men of Manchester, will prove, I am thoroughly persuaded—after nearly nine years of growing familiarity with the subject and the locality—similarly inevitable in the judgment of the more thoughtful and earnest of the citizens of Toronto. The work of the schools has been faithfully performed throughout the year by the several teachers in the employment of the Board. I lament that a still larger number of children have not partaken of the great benefits of Common School education, as provided in this city; but trust the day will yet arrive when unsectarian Christian benevolence and enlightened and just legislation will secure the extension of those benefits to very many who are still strangers to the wholesome restraints and mental and moral culture of well-conducted and regulated schools. The County Grammar School having become, under the operation of the new Grammar School law, the Grammar School of the City of Toronto—the affairs of which are administered by the City Council, through Trustees whom the Council appoints—the Mayor, on behalf of the Council, was pleased to accept, as beneficiaries of the city, seven of the senior pupils of the City Common Schools, who were recommended by the Examiners to receive the special distinction of Grammar School Scholarships, and were nominated accordingly by the Board of Common School Trustees.

115. *Samuel Woods, Esquire, M.A., Kingston.*—In transmitting my first Annual Report of the schools of this city, I deem a few preliminary remarks necessary. I was appointed Local Superintendent last July, and almost immediately afterwards the Semi-annual Examinations commenced. In these I was engaged for over three weeks, and thoroughly tested the schools in every respect; I was anxious to find out exactly the status of the various classes, and for this purpose I conducted the whole of the examination myself, selecting such questions and exercises as seemed most likely to be within the comprehension of the greatest number of pupils. By these means I was enabled to arrive at a very satisfactory estimate of the amount of work actually performed, and anything approaching to the system of cramming for examinations was entirely impossible. The result was very satisfactory in nearly every case, and on the whole the strictness of the examination was far more satisfactory to the Trustees than if it had been conducted in any other way. The Board has now superior accommodations for the pupils of the city, and although the assessment for Common School purposes during the last few years has been high, still, that is a matter which will work its own cure. The Board has been purchasing school sites, and building school-houses, and in addition has been paying the teachers comparatively large salaries. The amount of real property possessed by the Board is nearly of the value of \$20,000, and the annual expenditure for salaries is over \$3,000. The total number of the pupils on the roll of all ages during the last year was 2,445. The attendance has been regular, and consequently the amount of work done proportionally greater than in previous years. Since my appointment I have advised the teachers to insist upon a note for every case of absence, and I find it works admirably. The attendance has materially increased since the adoption of this precautionary measure. The average attendance during the year has been large, and in the second half year it has been proportionally greater than in the first. In the higher branches of study, also, there is a very gratifying improvement, and there is no reason to doubt that this favourable state of affairs will continue. With regard to religious instructions in the schools by ministers of the gospel, I am sorry to report that nothing of the kind has been attempted; this is certainly to be regretted. The children, however, in all the schools are thoroughly drilled in the Lord's Prayer and Decalogue, and in one or two, selections from the old and new Testaments are recited once, at least, in each week. In regard to the County Board Examinations, the printed regulations are strictly adhered to. This Board, at least, is bound to do away with that greatest obstacle to Common School progress in Canada—*cheap teachers*. No third class certificates are granted, unless under very peculiar circumstances to accommodate our back townships, and even then no certificate is given unless the candidate distinctly names the section in which he or she may be engaged to teach. The Board then grants a certificate restricting the bearer to that particular section, and only in force till the next half-yearly meeting. At our last meeting only three first-class certificates were obtained out of seven applicants. The library is a most popular institution. The books are all properly covered and numbered, and are most eagerly sought for. The taste thus acquired by the young for wholesome reading is continued during after years in a great many cases, as is evidenced by frequent application for books by former pupils. The system of giving prizes is not pursued in the schools, but instead, the Board distributes, for regularity of attendance and general efficiency in studies, *merit cards*; these are eagerly contested for, and however others may judge of the evil influence of prizes, I cannot permit myself to think that a wholesome distribution can ever cause any harm; and the Board in instituting *merit cards* are of the same opinion; for this is a prize and one so dearly cherished that it is no unfrequent thing to see them framed, and hung up in the most conspicuous places in oftentimes a humble abode possessed of no other decoration. No lectures were delivered last year in the schools by the Local Superintendent. Mr. McEwan died during the first quarter, and his successor only held office a few weeks; I have, however, made arrangements for a frequent discharge of this most important duty, and in my next report I hope to be able to announce the delivery of the usual number of lectures. It will be seen that during the year only forty-eight visits have been made by the Local Superintendent. These were chiefly made during the six months, ending December 31st, few being made in the first half year, owing to the changes in the office. A practical teacher myself, I take sincere pleasure in such a duty, and in carrying it out to its fullest extent, am only dis-

charging a pleasant duty, the most agreeable of the many connected with the primary education of the young.

116. *William Cousens, Esquire, M.D., Ottawa.*—The School Report for this city, for the year just past, shows a small increase over that of the year 1865, in the number of pupils attending the Common Schools; but the average attendance has not been so good, caused, in many cases, by small-pox, measles and other diseases, prevalent among the children in this city during last spring and summer, as well as the negligence of parents. The number of children not attending any school during some part of the year, according to my computation, does not amount to over 129, as a proof of which, I give the following figures:—

Number of pupils in Common Schools, as per Report.....	1,449
Number of pupils in Separate Schools, as per Report.....	1,930
Number of pupils attending Private Schools	420
Number of pupils attending Grammar Schools.....	72
	3,871
	129
	4,000

This is not a large number for the population of this city—it would be well if it were less. The Board has purchased a school site, for a central school in Lower Town, for which they have paid in cash \$2,200, and have contracted for the erection of a building thereon, the cost of which, with outbuildings, &c., will be about \$8,000; they have also purchased a site on which they intend erecting an infantile school, adjoining the village of New Edinburgh, as the distance would be too much for very young children to walk to the central school. This site cost \$500, payable in instalments. It is the intention of the Board, as soon as the present undertaking shall have been completed, to purchase a site and contract for a similar building to be erected thereon in Upper Town. The supporters of Common Schools are much indebted to the worthy Chairman and the Board of Trustees for the year 1866 (several members of the Board are among the largest rate-payers in this city), for the liberal spirit they have shown, and after many fruitless efforts made by former Boards during the past twelve years, in taking away from us the reproach in regard to our poor school accommodation. The schools are closed and opened with reading the Scriptures and prayer. The City Council having last year granted a sum of \$600 in aid of the Grammar Schools, the Trustees of that school informed our Board, that they would give sixteen scholarships to be competed for by the pupils of the Common and Private Schools. Several of the boys succeeded in obtaining scholarships, and at the Christmas examination of the Grammar School, one of those boys obtained very favourable mention. I hope when we shall have completed our two centre school-houses, an effort will be made by our Board to imitate the example of other School Boards in this Province, in establishing a library in each of those schools—a very necessary appendage to all schools, for the education of the rising generation. Some of our schools are supplied with globes, and all of them with maps, tablet-lessons (on card), on natural history, geography, &c.

117. *The Reverend W. Ormiston, D.D., Hamilton.*—In no locality in the Province have the provisions of our excellent school law been more fully and more faithfully carried out, than in the City of Hamilton. The Board of Trustees, year after year, have been laudably desirous of making the Public Schools of the city as efficient as possible; and, while aiming at economy, have ever manifested a wise and discriminating liberality in sustaining them; and the result of this policy is, that the condition and prospects of the schools are at present highly satisfactory and encouraging. The number of pupils is constantly increasing, so that additional school-rooms have to be provided. A large and handsome building is just now being erected for the use of the Grammar School, as the rooms in the central school hitherto occupied by it, are now required for divisions of the Common School. Additional school accommodation is also being provided in other parts of the city. The teachers are all trained, and well qualified for their work; most of them hold certificates from the Provincial Normal School, and not a few are eminently successful. Mr. McCallum,

who has held the position of principal for the last two years, has still the oversight and charge of all the schools,—central, intermediate and primary,—and discharges his duty with great diligence and fidelity. The progress of the pupils, as well as the ability, skill and fidelity of the teachers, is tested by semi-annual examinations of each division, with a view to promotions. The books in the library, though not all covered, are properly kept, and generally well read by the pupils and their friends. The influence of the school library is silent, but effective, and aids not a little in the education of those who have passed beyond their school-boy days. A good, well-selected library should be attached to every Common School. The number of children in the city, who do not attend any school, is not very great, and is, in my opinion, diminishing. Still, as it is a matter of painful regret that any of our youth should be allowed to grow up without the advantages of a Common School education, the question whether attendance at school should not be enforced by municipal authority, deserves and demands the most deliberate consideration. It is a matter of earnest gratulation and honest patriotic pride to every Canadian to know, that, though much remains to be done, ere our educational institutions be all we desire to see them, yet, our country has already attained a high rank for her wise adoption and liberal support of a national system of Common Schools—based upon the principle that the state owes to each and all of its citizens—such an education as may enable him to read and understand the laws he is required to obey. Earnestly do I express the hope that the time may never come, when a good Common School education will not be regarded as every Canadian's birthright.

XXXVIII. THE TOWNS.

118. *The Reverend Alexander McGregor, Brockville.*—The Victoria School of our town, I am glad to say, is in a high state of efficiency. Under the judicious principalship of Mr. Brigg, it has been steadily consolidating for the last six years; until now, its power is so much felt, that no private school can be sustained in town. The Statistical Report for the year, amply justifies the terms in which I have spoken of it. The midsummer examinations are now looked forward to by the community with great pleasure; one good influence this, resulting from the distribution of prizes, which then takes place. Here they say, that in the senior department alone, of the school, it is the intention to award prizes (which are now under competition) to the value of \$100, next June. The very best results to the pupils arise from the stimulus thus presented to diligence and perseverance. There exists in our midst, a very warm and general interest in the cause of education; very many of us are anxiously watching to discern the signs of the times, in their influence on those institutions, which already have done so much to enlighten the mind, and mould the characters of those who are to constitute, and now constitute, the bone and sinew of our patriotic and loyal people. God bless Canada and her schools!

119. *J. H. Laurence, Esquire, Collingwood.*—It will be noticed that there are very few children not attending some school. Our Common Schools are *free*, and our great difficulty is, in inducing regular attendance. Hitherto our population has been a floating one—continually changing, and hence the small average, as compared with the number entered on our books. A very few do not attend from the indifference of their parents; others are too poor. The general regulations in regard to religious instruction, are not strictly followed,—a fear exists of a threatened separate school, if they shall be put in force. The only attempt, is an order that the Bible shall be the reading book one day in the week. The revised programme for the County Board is observed, and the examination questions are printed. The Common School library books are all neatly covered, labelled, and numbered, and the regulations strictly observed. The Trustees have carefully watched the library, and the teachers have exercised great care; a very few books have been injured, and a few lost. No facts have come to my knowledge, during the short time I have been in office, as to the influence the library exerts; but from the number of books taken out and apparently read, a wholesome influence must be the result. No prizes have been distributed for the past two years; previously an indiscriminate distribution of prize-books, caused much dissatisfaction.

120. *The Reverend Robert Campbell, Galt.*—I have nothing to say in regard to the Galt Central School, which differs materially from former statements. When I left the

town for Montreal, early in December, everything was going on like clockwork in the school. The only changes during the year, regarded the staff of teachers; two of the old ones having resigned, and two new ones, formerly pupils in the school, taking their places. The same complaints continue to be made by the teachers, as to the irregularity of attendance of pupils. Parents appear to hold the education, which can be had for nothing, very cheap, as is manifest from the fact, that whilst the number of children of school age, in the town, is 1,015, the average attendance for the year has been only 457.

121. *A. Purslow, Esquire, Secretary Board of School Trustees, Port Hope.*—While we have to deplore that about one hundred children of school age in this town, never darken a school-house door, and are allowed by the careless and wilful negligence of their parents to grow up in vice and ignorance; it is a matter of congratulation, that the daily average attendance of children at school during 1866, shews an increase of seventy over that of 1865. I attribute this increase in some measure, to the improved state of business in our town; but chiefly to the employment, by the Board, of teachers more competent and thorough, and commanding, therefore, to a greater extent, the confidence of parents. The prosperous state of the town, added to the fact, that the accommodation in our make-shift school-house, was insufficient for the number that wanted to attend school, induced the Board, in the early part of the year, to purchase a school site, and commence to build thereon, a handsome and commodious school-house. The Trustees, after an inspection of several new school-houses, decided to adopt, with some alterations, the plans of that at Napanee, by Mr. Turner Arch, of Brantford. It will be ready for occupation after this year's summer vacation, and I confidently expect, that our removal to it will increase our daily average attendance to over five hundred. The change from our present dilapidated, cramped up premises, with no surroundings that can cultivate the finer feelings of youth, but rather the reverse, to a new, handsome, and spacious school-house, cannot be other than beneficial in an æsthetic point of view to the pupils attending it, especially to those of the poorer classes. In short, the opening of the new school-house will be the opening of a new era in the history of education in this town. I have said above that many children never darken a school door, owing to the culpable indifference of their parents and friends. In stating the "causes of non-attendance" in these general remarks, I must also mention, that over fifty boys are employed either in stores, or in factories or at the wharf, where they can earn good wages by moving lumber from the rail cars to the vessels, or in sailing these vessels. The proceeds of an exhibition given by the pupils added 144 books to our library, which now numbers 757 volumes. Judging from the number of books taken out and the eagerness with which they are read, the influence of the library on this town and neighbourhood, must be both extensive and beneficial, though I often regret, that the principal demand is for books of an exciting character, rather than for books of real worth, that would elevate the moral nature, and improve and strengthen the mind. The scheme of raising money for prizes, which I mentioned in my last, was carried out very successfully. Several gentlemen offered prizes for proficiency in subjects chosen by themselves; and the prizes, taking the name of the donor, were competed for at written examinations, and the award made by the donors. I found the plan had several advantages, it enlisted the interests of the gentlemen in the school, and in the recipients, and the award being made by them, prevented heart-burning and jealousy, and rendered charges of favouritism against the teachers impossible. In short, the experiment was entirely satisfactory, and the impulse to study that it gave, was very marked.

122. *The Reverend John Thompson, Sarnia.*—Since my appointment I have frequently visited all the departments under my charge in the Union School, so that now I am familiar both with the state of education and the manner of instruction in all the School Sections, and it gives me great pleasure in bearing testimony to the high standard of both—far above the average of Common Schools in Canada. Our teachers are all thoroughly well qualified for their work, and the Principal of the Common School department is equal, in point of qualification and efficiency, to any I have yet met in the Province. I regard both his discipline, and manner of instruction, as being of the first order, and this is the great thing to be aimed at in all school teaching. The amount of information imparted is a small thing compared with the method in which it has been communicated: it is here where the real training lies, and the manner of teaching is all that could be desired. And

I am glad to have my own opinion confirmed by such high authority as our Inspector of Grammar Schools, who, in his last visit, spoke of him as being *the Prince of Common School teachers*. Such instruction always produces favourable results, and hence the annual examination was most satisfactory to both parents and teachers. I am familiar with the working of some of our best institutions, both in Upper and Lower Canada. During my connection with Morrin College, Quebec, as Professor of Mathematics, &c., I had also the charge of the Mathematical department in the High School, and was always present at the annual examinations; and at our recent examination in Sarnia, I was struck with the proficiency manifested, especially in some of the departments of instruction, and was led to compare it favourably with what I had frequently heard in schools elsewhere, of much higher pretensions. What appeared to me as particularly excellent and worthy of practice in this report were the *reading* and *spelling*,—accomplishments which are in themselves so very important, and so very rare, that I have heard men class them among the lost arts. I was scarcely less pleased with the *Geography* and *History*, and one gratifying feature of these departments is the prominence given to the Geography and History of our own country. This is a point of special necessity as tending to beget in the minds of the young, an interest in their own land, and an attachment to it which they could not have if left in ignorance regarding it. My experience of many schools, has hitherto been very much the reverse of this.—I have frequently found scholars drilled in the Maps of Europe, Asia, or the United States, while they knew little or nothing of Canada,—probably, they could not tell the county in which they lived, and that, too, in some of our best regulated schools. A vast improvement has of late taken place in many school districts in this respect. I took occasion to speak publicly of this pleasing feature of our schools, and was happy to have my sentiments confirmed and endorsed by our worthy Chairman of the Board, the Rev. G. Salter, who, during a connection of many years with the Board of Instruction, uniformly found better readers and spellers in our Common Schools than in many who came up as candidates for examination. It is Campbell's Geography that is at present used, which probably is the only book not having the sanction of the Public Board, and it is likely that Lovell's will displace it ere long. There is no religious instruction imparted in the school, other than the reading of the Scriptures, and the forms of prayer prepared for the opening and closing exercises, but this has been observed by all the teachers, and all the scholars attend, including even the Roman Catholics. We have as yet no public school Library, which I consider a great want, but hope that steps may soon be taken to secure one before another year, that the young may be provided with ample opportunities for general reading, and especially those who have recently left school; for at this season there is a great temptation to throw up study altogether, and this would be a means of securing their attention and stimulating them to continued diligence in the work of self-improvement. We had, however, a large number of prizes distributed at the annual examination. This has been an established custom for many years, and I believe, on the whole, with gratifying results. Many of our instructors of youth are adverse to the giving of prizes. The Rector of the High School, Quebec, uniformly told the scholars that if he had his will, no prizes would ever be given; for the real prize was what the pupil had gained in mental training and information. But though this be undoubtedly true, and the pupils ought to know it, yet I am favourable to the distribution of prizes, when judiciously done. They create a laudable ambition, and stimulate the minds of the young to effort, when at a time they are in danger of falling into lassitude—at least, this has been my experience. Preparing for an annual examination is a good thing, and when the stimulus of a prize is added, greater good still may be effected—facts will bear this out. The number attending school at the present time, is large—larger than at any previous period, as may be seen by the returns. Though I have no way of definitely determining the number of children not attending any school, except the usual proportion to the population of the town; and taking that as my basis, I am brought to the very gratifying conclusion, that there are very few indeed, who are not attending some school; for we have in the town, beside the public, five private schools, some of which are very well conducted, and in some cases, well attended. This gratifying result, though due in part to a deep-laid desire on the part of the parents to have their children educated, I attribute, in great measure, also, to our excellent Board of School Trustees, who, since I have become acquainted with them, have taken the

deepest interest in all that concerns the welfare of the school, and the interests of education generally. Many of them are active and zealous in their work, and the fruits of their labour are obvious, and no where more so, than in the large number who attend school. There are very few, if any parents, who systematically neglect to send their children, though I regret to add, that in a few instances, boys are taken away at too early an age, and the best interest of the young are often sacrificed to a mere mercenary spirit, but too common. My own opinion has long been, that much more remains with the Trustees than is commonly supposed; for I have invariably found, that where they are possessed with the spirit of their office, and take a deep interest in the schools under their charge, great good has uniformly followed, and they have been, in not a few cases, the means of moulding the whole section, and bringing them to a correct view in all educational subjects; while on the contrary, where the office is filled, as it often is, with ignorant men, who have no idea of what a school requires, with low, contracted views on all subjects, they dwarf every thing under their own care, and the teacher will either leave, or suffer in consequence; if he is a man fitted for his office, the former alternative will be taken, and numbers of our schools throughout the country, otherwise efficient, are often in this way made worse than useless. But we have had during the past year, a most efficient Board, and we are now reaping the rich fruits of their labour. Hitherto, we have had no Separate Schools in Sarnia, but, I believe, the Roman Catholics are now on the eve of commencing one. Of late years, they have become more numerous, from the influx of labourers in connection with the railroads, etc., and though they have generally attended the Common Schools in the town, they are now beginning to withdraw; and they have recently purchased a very commodious building, which they intend to use as an institution. They have had for some years a private school in the town, though it has never been largely attended, and I suppose it will now merge in the public one, which they are about to organize. In this county, the revised programme for County Board examinations, is observed, though the examination questions are not printed, but prepared in manuscript from time to time, by the different parties who may be appointed for that purpose.

XXXIX. THE INCORPORATED VILLAGES

123. *A. Dingwall Fordyce, Esquire, Fergus.*—The schools, as you may observe, have had a greatly increased attendance during 1866, which may, no doubt, be attributed in a good measure, to there now being free; although, partially to the discontinuance of one of the private schools, consequent on its greatly diminished attendance, when the new mode of conducting the public schools was made known. There is still a private school, which has been carried on for several years, and which is not so dependent on such a movement, as the other was in the beginning of 1866—a primary school was established, and the young lady appointed as teacher, has shown herself to be well fitted for such a charge, and been deservedly popular; while the teachers of the senior and junior school, I am very happy to say, remain with us, pursuing their labourious duties in the same efficient way as hitherto. Comparing the aggregate attendance of 1866 with that of 1865—which latter year was, with scarcely an exception, in excess of all before it—we find it to be, the *first* half of 1865, 12,952; of 1866, 17,828. This great increase necessarily caused some inconvenience during last year, but the new school-house was ready by the beginning of this year, and the whole three schools are now carried on in it; the senior and primary schools in class rooms on the ground floor; the junior school up stairs. The building cost nearly \$3,000, is handsome, commodious and convenient, and it is expected, will realize all that was wanted. The senior school is provided with desks for the scholars, made in Toronto, on the improved plan; and in all the schools there is an ample supply of black-board. The Board of Trustees judiciously procured an additional piece of ground, so that, having larger space for the scholars, there is a frontage on three streets. At present there are few buildings in the immediate neighbourhood. It has not yet been determined what use shall be made of the old school-house; it was sought by the Grammar School Trustees at one time for a school hall, but it is now unoccupied. There having been much doubt as to the real population of Fergus, a special census was taken in September, the result of which is shown in the report, and which tallies wonderfully with a special census of Elora, taken very recently as reported in the papers; that of Fergus being 1,205, and of Elora 1,254 or

thereabouts. The amounts of the Government School Grant to the two villages, showed for some years that there must have been considerable disparity in the returns of population. Some school apparatus, which was greatly wanted, has lately been procured for the schools, by means of an exhibition got up at the opening of the new school-house, consisting of recitations and singing by the scholars, and which was very successful; it is expected, also, that an addition will very shortly be made to the school library, which has been kept open as formerly, and books taken out every week, mostly by the scholars.

124. *W. C. Wright, Esquire, Georgetown.*—The Common Schools of the Village of Georgetown are in a flourishing condition. The Board of School Trustees have manifested a liberal feeling in granting free schools for the present year, and supplying well qualified teachers to instruct them. Our school-house is a poor affair, of wooden structure. We hope before long to provide a better one. Free schools are on the increase in this locality and will be a public benefit. Our schools have discarded the spelling-book, and I fear with bad results. The National Series of Books is hardly up to the times. Let us progress.

125. *Ross Robertson, Esquire, Kincardine.*—The library regulations are duly observed. The books which are properly covered are very much read, I cannot say with what effect.

126. *James Bowie, Esquire, M.D., Mitchell.*—The report, I think, will show that financially and otherwise the school is in a prosperous condition. A considerable balance is shown as remaining on hand this year. There are now three teachers employed in the school: the Principal, Mr. Dunsmore, who is engaged for his seventh year, and two female teachers, the Misses Elder and McIntyre, who, up to the present, have given general satisfaction. The whole number of pupils registered during the year was 378 (184 boys and 194 girls), and the average attendance was about 180. Indeed, so uniformly does our school continue to progress in numbers and efficiency, that everything connected with it might be expressed in the single word, prosperous. As yet there is no library connected with the school; but, this want is in some measure compensated by a good reading room and library, which is connected with the Mechanics' Institute, to which, through their parents, most of the children have access. At the last school examination the prizes were awarded on the plan I noticed in my last year's report. It appears a great improvement on the plan formerly in use, and gives entire satisfaction.

127. *The Reverend Wilhelm Schmidt, New Hamburg.*—The schools in this village, one German and two English, during the past year have made very favourable progress, the attendance in general is average. The people take a more lively interest in the schools. Prizes were distributed, and had a very animating and stimulating effect on the pupils. The revised programme for County Board examinations is observed, and the examination questions are printed. The regulations regarding religious instruction are not followed in the school-room. The good effects of the school law are yearly more visible.

128. *John Bentley, Esquire, M.D., Newmarket.*—The general management of our Common School here, and the progress of the pupils, under the care and tuition of our excellent teacher, Mr. Robert Alexander, have been so satisfactory for several years past, that we, in this municipality, have become familiarized with success, and look forward with certainty to the maintenance of good order, thoroughness and general efficiency in all the influences which belong to a school, especially in the senior department, so long as he shall continue to be head-master. The second department, under the care of Miss Frazer, gives pleasing signs of progress, and we have also a third department taught by Miss Rebecca Southard, who has under her care those youngest scholars who are learning the Alphabet and first lessons of the First Book. This arrangement contributes greatly to the efficiency of the second department, which would otherwise be over crowded. The Board of Trustees take great interest in the school which is in every respect a credit to our village.

129. *The Reverend Francis W. Dobbs, Portsmouth.*—There is nothing particular to notice this year with reference to our village schools. They are progressing favourably, and the general rules of the Board of Education are observed. Prizes were distributed last year, which gave general satisfaction—I have no doubt the effect has been beneficial.

130. *John A. Scoon, Esquire, Strathroy.*—I cannot say that all the progress has been made in education I had expected at the beginning of the year: much

sickness prevailed in the village during the summer months, which prevented the attendance of a large number of children that in a more healthy season would have attended. Another drawback was the failing health of the senior teacher in the Common School—for some months previous to the end of the year his strength was quite inadequate to the efficient fulfilment of his duties, and the school suffered much in consequence. The junior department was under the management of an excellent female teacher, and was very successful. You will perceive by the Trustees' Annual Report that a number of children attend no school. I beg to state that since the Report was filled up a correct census of the village has been taken, shewing a school population of 371, instead of 334 as reported, making a larger number who attend no school than the Report shews. The cause of non-attendance is evidently the idleness of the children growing up uncontrolled by parents, who are indifferent to the best interests of their offspring. We had a frame house of one story, 26 by 40 feet, divided into three rooms, two for the Common and one for the Grammar School; but finding that building unfitted for so large a number of pupils as attend at certain seasons of the year, the Trustees very wisely, but much against the wishes of a number of the rate-payers, erected a good brick building, two stories high, divided into four commodious class rooms, with a vestibule containing four anterooms, all well warmed and ventilated, at a cost of \$3,000, and now occupied by three teachers, giving them facilities over the old house of at least twenty-five per cent. I think in about two months we shall require an additional teacher in the Common School. There is no religious instruction given by clergymen; but the schools are opened and closed with prayer. There is great improvement in the County Board examinations, the examiners are much stricter than they used to be. The examinations are conducted according to the regulations—entirely on paper; but the questions are not printed. There is no school library: there is a small one belonging to the municipality, open to all the inhabitants thereof, but its influence is not great. There ought to be additions to libraries every year. We have now an excellent staff of teachers, and I believe in another year our schools will be second to very few in the Province. Being all free as the air we breathe, under the government of a liberal Board of Trustees, all we require to insure complete success is the power to compel attendance.—*Grammar School.*—The attendance at the Grammar School during the year was not so large as in 1865, owing in a great measure to the operation of new regulations. In other respects, however, there has been a decided improvement: the order was better; no case of serious breach of discipline occurred during the year; corporal punishment was almost entirely dispensed with. The school has been brought into conformity with the revised programme and regulations in every respect. The merit cards issued by the Education Office have been used with advantage; one merit card for punctuality was given every day to each scholar present at the opening of school both morning and afternoon; one for diligence, to all that prepared their lessons at home and were industrious during school hours; one for perfect recitation, to those who recite their lessons correctly; and one for good conduct, to all that were guilty of no irregularity during the day. Though awarded for every day, the cards, in order to save time, are issued every Monday. At the close of the sessions, the prizes given to the scholars are proportioned in value to the number of merit tickets received by each during the sessions. During the spring and part of the summer, the boys were exercised in military drill, with and without rifles, by a Captain of Volunteers, who holds a first class certificate from the Toronto Military School.

131. *Amos Wright, Esquire, M.P.P., Richmond Hill.*—During the past year the Board of Trustees had difficulties to contend with that resulted in a loss of six weeks at a season when the largest attendance is usually expected, that is, in the months of January and February; during that time our Grammar School was closed until the Trustees could procure the services of a competent teacher whose habits were such as not to be objectionable, in which they succeeded, after considerable difficulty and loss of much valuable time. Another cause of delay was an accident by fire, in one of the school departments, in the month of April, much damage being done to the Grammar School department by the hurried removal of seats, desks, and furniture. Notwithstanding these interruptions, it is a matter for congratulation to find that the attendance has been brought up to a fair average. The considerate and courteous attention which you and your officers have at all times extended to the Board of Trustees of our Grammar and Common Schools here is gratefully felt and acknowledged. You will perceive by the Annual Report, that the

Richmond Hill Grammar School is *free*, as is its Common School department. The Senior or Grammar School department is open to all pupils residing in the county, without charge. The sum raised from local sources was \$385, which, when added to the amount of the Government Grant received last year (\$295), made the total income for the past year amount to \$680, which was barely sufficient to meet the most pressing current expenses for the year, had it not been that the Board had a balance in hand from former years. It is a source of great satisfaction to be able to state that the Richmond Hill Grammar School was re-opened, after the recent Christmas vacation, with the most flattering prospects of success, under the efficient management of Alfred M. Lafferty, B. A. (Silver Medallist in Classics and Mathematics, of Toronto University). The attendance now is larger than it has been for a long time, some of the pupils having come from distant parts of the county. We look forward to the visit of the Inspector with feelings of satisfaction and confidence,—with a hope that by the termination of the current year, Richmond Hill County Grammar School will have rendered a good account of itself, and become widely known as one of the best institutions of the kind in the Province.

APPENDIX B.

THE NORMAL SCHOOL FOR UPPER CANADA.

PROVINCIAL CERTIFICATES GRANTED BY THE CHIEF SUPERINTENDENT OF EDUCATION.

The Chief Superintendent of Education, on the recommendation of the Masters of the Normal School, and under the authority of the following section of the Upper Canada Consolidated Common School Act, 22 Vic., chap. 64, sec. 107, has granted to the under-mentioned students of the Normal School, Provincial Certificates of Qualification as Common School Teachers in any part of Upper Canada :—

“107. The Chief Superintendent of Education, on the recommendation of the teachers in the Normal School, may give to any teacher of Common Schools a Certificate of Qualification, which shall be valid in any part of Upper Canada until revoked; but no such Certificate shall be given to any person who has not been a student in the Normal School.”

The Certificates are divided into classes, in harmony with the general programme, according to which all teachers in Upper Canada are required to be examined and classified, and are valid until revoked, or until the expiration of the time mentioned in the Certificate, according to the following form :—

GRADE A, (B, OR C,) OF THE FIRST (OR SECOND) CLASS.

Certificate of Qualification—Normal School, for Upper Canada.

THIS IS TO CERTIFY, that _____ having attended the Normal School during the _____ Session, 18—, and having been carefully examined in the several branches named in the margin, is hereby recommended to the Chief Superintendent of Education, as eligible to receive a First (or Second) Class Certificate of Qualification, as a Common School Teacher in Upper Canada, according to the “Programme of the Examination and Classification of Common School Teachers,” revised by the Council of Public Instruction, on the 17th day of December, 1858.

Head Master.

Second Master.

IN ACCORDANCE with the foregoing recommendation, and under the authority vested in the Chief Superintendent of Education by the 107th section of the Upper Canada Consolidated Common School Act (22nd Victoria, chapter 64),

[L.S.]

I do hereby grant to _____ a First (or Second) Class Certificate of Qualification, as a Common School Teacher, of the grade and standing above indicated, which Certificate shall be valid in any part of Upper Canada, until revoked by this Department (or for one year, as in the case of Second Class Certificates, Grade C).

Dated at the Education Office, Toronto, this (fifteenth day of
one thousand eight hundred and sixty).

Chief Superintendent of Education for U. C.

Recorded in Certificate Register A of
the Department, Number

Registrar.

Each Certificate is numbered and recorded in the Register of the Department, in the following order:—

(The list of Certificates granted prior to the 35th Session was published in the Report for 1865.)

THIRTY-FIFTH SESSION.—DATED 15TH JUNE, 1866.

<i>Males.</i>	Grade C. [Expire 15th June, 1867.]	SECOND CLASS—Grade B. [<i>Cont'd.</i>]
FIRST CLASS.—Grade A.	2239 Jessup, Elisha (1962)	2267 (See No. 2364)
2208 Hughes, James (2136)*	2240 Leitch, Thomas	2268 Becket, Elizabeth
2209 Meldrum, Norman William (2061, 2119)	2241 (See No. 2333)	2269 Beckett, Lucy Mary
2210 McLean, Peter (1876, 1929)	2242 (See No. 2242)	2270 Bell, Emma Elizabeth (2187)
	2243 (See No. 2325)	2271 Brookes, Harriet
	2244 Tremeer, Thomas	2272 (See No. 2356)
		2273 Dygent, Anna Maria
Grade B.		2274 (See No. 2350)
2211 (See No. 2308)		2275 Flavelle, Minnie
2212 Goldsmith, Stephen (2043, 2125)	FEMALES.	2276 Gunn, Sarah Sophie
	FIRST CLASS.—Grade A.	2277 Hamilton, Jessie
	2245 Dunn, Hannah Olivia [1211, 1579]	2278 Harbottle, Mary Ann
	2246 Ferguson, Margaret [2079, 2160]	2279 Harris, Frances Josephine
Grade C.	2247 Sutherland, Annie Agnes [2010, 2075, 2158]	2280 (See No. 2370)
2213 Moore, Alvin Joshua	2248 Sutherland, Jennie Helena [2019, 2076, 2159]	2281 (See No. 2371)
2214 Pritchard, John Frederick		2282 (See No. 2372)
		2283 (See No. 2351)
SECOND CLASS.—Grade A.		2284 McIntrie, Annie
2215 Campbell, William		2285 McLaughlin, Margaret
2216 (See No. 2309)		2286 (See No. 2360.)
2217 (See No. 2321)	Grade C.	2287 Moore, Martha (2197)
2218 Mackay, Robert Peter	2249 Black, Mary Elizabeth [2170]	2288 (See No. 2376)
2219 (See No. 2317)	2250 [See No. 2343]	2289 Payne, Louisa [2199]
2220 (See No. 2324)	2251 [See No. 2345]	2290 Riddell, Mary Anne (2201)
2221 (See No. 2310)	2252 [See No. 2347]	2291 Ridley, Alexandrina Sophia
2222 Palmer, John Henry	2253 Robinson, Annie [1595, 2166]	2292 (See No. 2352)
	2254 [See No. 2348]	2293 Weed, Mary Jane
Grade B.		3294 (See No. 2354)
2223 Barrett, Thomas		
2224 Barrie, George		
2225 Blatehford, William	SECOND CLASS.—Grade A.	
2226 (See No. 2311)	2255 Bentley, Kate [2085, 2169]	
2227 Clendinning, William Scott	2256 Campbell, Jane A. Jamesina	Grade D.
2228 Filer, Alexander David	2257 [See No. 2357]	[Expire 15th June, 1867]

APPENDIX C.

APPORTIONMENT OF THE LEGISLATIVE SCHOOL GRANT FOR UPPER CANADA, FOR 1867.

CIRCULAR TO THE CLERK OF EACH COUNTY, CITY, TOWN, AND VILLAGE MUNICIPALITY IN UPPER CANADA.

SIR,—I have the honor to transmit herewith a certified copy of the apportionment for the current year, of the Legislative School Grant to each City, Town, Village, and Township in Upper Canada.

The basis of apportionment to the several Counties, Cities, Towns, Villages, and Townships for this year is the school population as reported by the Local Superintendents for 1866, and I have no more generally accurate statistics of a later date. From 1862 to 1865, the census of 1861 was the basis; but the large increase of population in some localities necessitated another standard for 1866, and for the current year.

Where Roman Catholic Separate Schools exist, the sum apportioned to the Municipality has been divided between the Common and Separate Schools therein, according to the average attendance of pupils at both classes of schools during last year, as reported and certified by the Trustees.

The gross sum apportioned to all the schools this year is the same as that of last year; and, as many townships have rapidly increased in population, the apportionment in such cases has been proportionably augmented, which, of course necessitates a reduction where the population has not been increased.

The apportionment is made on the supposition that the amount hitherto annually placed on the Estimates, for the support of Common Schools, will be placed at the disposal of the department at the usual time. I hope the inevitable delay in the assembling of the Legislature, this year, will not occasion any obstacle in the payment of the school money, for which application has already been made to the Government.

I shall endeavour to have the apportionment paid at this office, to the agent of the Treasurer of your Municipality, about the 2nd of July, provided that the School Accounts have been duly audited, and that they, together with the Auditors' and Local Superintendents' Reports, have been duly transmitted to this Department.

It is particularly desirable that the amounts should be applied for not later than the third week in July, as it is inconvenient to delay the payment. There are, however, a number of municipalities which have not yet sent in their accounts of school moneys, now several months over-due, and in these cases the payment must necessarily be deferred until the law has been complied with.

I trust that the liberality of your Council will be increased in proportion to the growing necessity and importance of providing for the sound and thorough education of all the youth of the land.

I am, Sir, your obedient servant,

E. RYERSON.

EDUCATION OFFICE,
Toronto, 16th June, 1867.

APPENDIX D.

No. 1. DEPARTMENT OF PUBLIC INSTRUCTION FOR UPPER CANADA.

Documents furnished annually by the Educational Department to the School Officers of Upper Canada.

The following are furnished gratuitously by the Educational Department of Upper Canada to the various school officers, viz :

1. *The Journal of Education for Upper Canada* is sent monthly to each of the Trustee Corporations in the rural School Sections, to the Boards of Grammar and Common School Trustees, to the Local Superintendents, to the Trustees of each of the Separate Schools, and to each County Clerk and Treasurer, Exchanges, &c.—Total, 5,000 copies.

The *Journal* has been constituted the official medium of communicating all departmental intelligence. It is regularly sent by the publisher, about the first of each month, to the official address of the parties above enumerated. Should they fail in any case to receive it, immediate notification of the fact should be sent to the Education Office. Missing numbers can generally be supplied. To the public, the price is \$1.00 per annum, payable in advance. Back volumes since 1848 (the first year of its existence), can be furnished on the same terms.

2. *The School Registers*, for recording the attendance, recitations and deportment of pupils are furnished to each of the Grammar and Common Schools, and to the separate Schools in Upper Canada.—Total, about 5,000 copies. The *Registers* are sent annually to the County Clerks for gratuitous distribution, through the Local Superintendents.

The Trustees' Half-Yearly Reports are sent every six months—through the Local Superintendents—to the Trustees of each School Section. Those for the Grammar Schools and Roman Catholic Separate Schools are sent direct from the Department.—Total sent out annually, 10,000 copies.

4. *The Trustees' Blank Annual Reports* are annually sent, through the Local Superintendents, to each of the Trustee Corporations in the rural School Sections.—Total, about 4,500.

5. *The Blank Annual Reports*, from which the General Annual Report of the Department is compiled, are sent to the Local Superintendents and Boards of Common School Trustees and Boards of Grammar School Trustees.—Total number sent out annually, 600 copies.

6. *Auditors', Treasurers' and Sub-Treasurers' Returns* are sent to about 500 of those officers, to be filled up and returned.

7. *The Chief Superintendent's Annual Report* to His Excellency the Governor General, printed by order of the House of Assembly, is also sent to each of the rural Trustee Corporations; to the Boards of Common School Trustees in cities, towns and villages; to Boards of Grammar School Trustees; to Boards of Public Instruction; to Local Superintendents, and to Separate School Trustees, besides copies to other parties.—Total number sent out annually, about 4,500.

8. *Various Forms*.—Forms are also sent from time to time to Superannuated Teachers, Trustees (for maps), Normal School Students, &c.—About 800 copies.

Letters received and sent out by the Department :—

6. Auditors' and Treasurers' Blank Returns...	500	Grand Total per year.....	45,300

NO. 2—COMMUNICATIONS TO THE DEPARTMENT OF PUBLIC INSTRUCTION FOR UPPER CANADA.

THE POSTAGE LAW AND THE DEPARTMENTS OF PUBLIC INSTRUCTION FOR UPPER CANADA.

1. As but few parties in correspondence with the Educational Department comply with the new postage law, in the pre-payment of the letters (thereby increasing the postage charged by nearly 50 per cent.), the effect has been to swell, unduly, this item of the contingencies of the Department. It may be that this omission arises from the impression that the official correspondence of the Education branch of the public service, like that of the Cabinet Executive Departments, goes free. But this is an entire mistake, as

the Educational Department forms an exception, and its contingent expenses are proportionably increased by a charge from which the other Public Departments of a similar character are exempt. We would suggest, therefore, in future, that all correspondence with the Department be prepaid (as it is on letters, &c., going from the Department), and that thinner paper be used in all cases. Several letters—occupying but one page—have been received, written on large, thick paper, and embracing four pages. Foolscap paper should be used where practicable, and only such portions of it sent as may be written on; all other portions have to be cut off when the letter is filed in the Department.

PRE-PAYMENT OF POSTAGE ON BOOKS AND PARCELS.

2. According to the postage law, the postage on all books, parcels, printed circulars, &c., sent through the post, must be prepaid by the sender, at the rate of one cent $\frac{3}{4}$ ounce. Local Superintendents and teachers ordering books from the Educational depository will, therefore, please send such additional sum for the payment of this postage—at the rate specified—as may be necessary.

REGULATIONS IN REGARD TO GRAMMAR AND COMMON SCHOOL RETURNS.

All official returns to the Chief Superintendent or a Local Superintendent, which are made upon the printed blank forms furnished by the Educational Department, *should be prepaid one cent, and open at each end*, so as to entitle them to pass through the post as printed papers. No letters should be enclosed with such returns.

COMMUNICATIONS TO THE EDUCATIONAL DEPARTMENT FOR UPPER CANADA.

1. *Appeals to the Chief Superintendent of Education.*—All parties concerned in the operations of the Grammar and Common School Laws have the right of appeal to the Chief Superintendent of Education, and he is authorized to decide such questions as are not otherwise provided for by law. But, for the ends of justice, to prevent delay and save expense, it will be necessary for any party thus appealing: 1st. To furnish the party against whom the appeal is made with a correct copy of his communication to the Chief Superintendent, in order that such party may have an opportunity of transmitting any explanation or answer deemed expedient. 2nd. To state expressly in the appeal that the opposite party has been thus notified, as it must not be supposed that the Chief Superintendent will decide, or form an opinion, on any point affecting different parties, without hearing both sides—whatever delay may at any time be occasioned in order to secure such hearing. Application for advice in Township Common School matters should, in all cases, be *first* made to the Local Superintendent having authority in the Municipality.

2. *The Journal of Education* having been constituted by His Excellency the Governor General in Council, the official medium of communicating all Departmental intelligence and information, parties should refer to its pages on matters relating to the apportionment, blank reports, Depository, Normal School, &c.

3. *Communications generally.*—The parties concerned are left to their own discretion as to the forms of all communications relating to schools, for which specific instructions are not furnished by the Department, but they are requested to use large-sized or foolscap paper. In *all* communications, however, the number of the School Section and the name of the Township and Post Office, with the official title of the writer, should be given; and also the number and dates of any previous correspondence on the same subject.

4. *Communications with the Government relating to Schools* should be made through the Educational Department, Toronto, as all communications not so made are referred to the Chief Superintendent of Education, to be brought before His Excellency through the proper Department, which occasions unnecessary delay and expense.

5. *Communications relating to the Journal of Education; to the Educational Depository; to the Public Libraries; or to the Superannuated Teachers' Fund, School Accounts, Poor Schools, &c.*, should be written on separate sheets from letters of appeal, or on legal questions, in order that they may be separated and classified.

SUPERINTENDENT OF EDUCATION

FOR LOWER CANADA,

FOR THE YEAR 1866.

OFFICE OF EDUCATION,
Montreal, 29th June, 1867.

To the Honorable
The PROVINCIAL SECRETARY,
Ottawa.

SIR,—I have the honor to submit to you my Report on the state of Public Instruction for Lower Canada, for the year eighteen hundred and sixty-six.

Very few days have elapsed since I returned from Europe, and I am able to give you only a summary of the statistics compiled in my absence. In the course of a few months, probably, I shall be able to lay before you a detailed account of the accomplishment of the mission intrusted to me by the Government, in pursuance of the desire of the Council of Public Instruction: namely, that the systems adopted in Europe and in the United States, should be studied in those countries.

I left Montreal on 12th November last, and returned hither on 18th June instant. I visited Ireland, Scotland, England, France, Belgium, Italy and part of Germany.

I collected a considerable number of documents, conferred with persons whose special mission was the advancement of education, and visited a great number of institutions. A comparison of our system, taken as a whole, with those of the several countries of Europe, presents no subject of discouragement for us. The obstacles which still impede the progress and general diffusion of knowledge among all classes of society in our own country, obstacles which have been the subject of remarks in preceding reports, exist in various degrees in other countries, and the questions discussed in those parts are but little different from those which are the subject of debate among ourselves.

The question of professional education* which has been frequently raised in Canada,

* Professional education means here something quite contrary to what is understood by many persons: it implies that education which is a special preparation for the ordinary occupations of life, as distinguished from the classical education which is a preparation for "the liberal professions."

has, of late years, excited a lively interest in the Governments of France, Belgium and Prussia. In France and Belgium, efforts have been made to remedy the inconveniences of a classical education, too generally prevalent, by introducing distinct scientific courses of lectures in Lyceums and Athenæums. Recently, it has been considered necessary to add to this movement of reform the creation of numerous institutions specially destined to prepare youth for the pursuits of trade and the mechanical arts. The special Normal School at Cluny, lately founded, and at the inauguration of which I was permitted to assist, is intended to supply teachers for such special or professional establishments, as the Superior Normal School at Paris supplies the University and the Lyceums.

Prussia has, perhaps, made greater advances in this respect than any other country in Europe. It possesses three different kinds of institutions between Universities and Primary Schools: 1. The *Realshule* or schools of practical knowledge, which train the pupils for either trade or the industrial arts, or even for the civil service; the latter only requiring fuller instruction at a subsequent period in the *Gymnasium* (Classical College) or in one of the two other institutions next mentioned; 2. The *Gewerbe Shule* or schools of arts and trades, the pupils of which, if they aspire to the higher branches of mechanic art, proceed to the Polytechnic Institutes or superior schools of arts and trades; 3. The *Handel Shule* or Commercial Schools.

Throughout Europe, as here in America, the establishment of Normal Schools, the regular inspection of Schools by functionaries paid by the State, the examination of candidates seeking employment as teachers by Commissioners or School Inspectors, are the principal means employed to raise the standard of qualification for teachers, and to maintain a proper degree of perfection:

The British Government has made great sacrifices in the three kingdoms for the attainment of these important results. The inspection of schools, especially, has, within these three years, been carried on with great regularity, and the system of examinations established under the latest regulations has been attended with remarkable results. This system is extensive and minute, and highly efficient; correctly speaking, it is the main-spring of Governmental action in respect of public education in England and Scotland. Very large sums are yearly expended in the three kingdoms on the inspection of schools, and form a considerable item in the budget for public education.

In Ireland, the Central Normal School at Dublin has no less than twenty-eight branches, which, under the designation of Model Schools, effect a work analogous to its own in the great centres of population. Each Normal (or Model) School has a model farm attached to it, which is, in reality, a theoretical and practical School of Agriculture, in which the pupils receive the knowledge which they are afterwards to disseminate throughout the country, and in which they acquire tastes in harmony with their profession, and a particular aptness to become useful to the communities among whom they are to pass their lives. In the Maritime Cities there are attached to the Normal Schools schools of Navigation, and pupil teachers in training, who will in their turn dispense nautical instruction to a certain number of young persons, receiving from the Board of Trade an allowance proportioned to their usefulness. Attached to all Normal or Model School are Infant schools, in which female pupil teachers are in training, to render, in accordance with the plans pursued in these institutions, the greatest services to the poorer classes of the large

cities. The aim of the English Government in the establishment of the Queen's Colleges was the decentralization of the highest order of education, while giving a wider development to the study of general science, in combination with literary attainments. The collections, the laboratories, and all the material required for the pursuits of science in these institutions, now recently organized, have already attained dimensions which leave little to be desired. On the other hand, the new University of Dublin, so ably conducted by Monsignore Wodlock, under the direction of his Eminence the Cardinal Archbishop of that city, will probably produce hereafter, and at no great distance of time, another species of rivalry with the ancient University of Dublin. Apart from the religious question, which is so all-important, and so enthusiastically carried on in that country, we may perceive that the organization of public education is as complete as in any other country—if not, indeed, more complete—and that many of the measures there adopted are worthy of imitation.

The manner of raising the funds for the payment of the teachers, the organization of the inspection of schools—which is classed in three degrees, as I shall hereafter explain—the establishment, at Dublin, of a vast magazine of books and articles necessary for schools, and the distribution of them which takes place at regular periods from this central depôt, exactly as it is done in Upper Canada, are things worthy of our serious attention. In Ireland, as well as in France, Belgium and Prussia—nay, in all Europe—the greatest importance is attached to the teaching of linear and architectural drawing, a branch of instruction which has been rightly regarded as affording a powerful impulse to the mechanic arts, and the pursuit of all useful arts. It is well known that the cultivation of the fine arts by the working classes, and the diffusion of artistic taste among all classes of society, found great favor after the first Exhibition at London, as one of the surest means of developing the industrial talents of the nation, and enabling them to compete, in regard to elegance and beauty of form, with the skill of continentals. His Royal Highness Prince Albert had given a great degree of attention to this important subject, and, under his auspices, the establishment of the Museum of Education at South Kensington, the affiliation thereto of other institutions of the same kind, and the creation of numerous Schools of Design in various parts of the three kingdoms, have contributed to extend a taste for the arts among all classes of society.

The same movement has been felt on the continent, and several universities—among them that of Bonn, which I visited—have added to their establishments galleries of pictures and of design, with schools of design, exactly as we have done at the Normal School in Toronto with so much success. It is doubly to be regretted that nothing like this exists in Lower Canada, where so much natural talent for the fine arts exists, and where there is so much need of some new career in which the youth of the country may engage. The purpose for which these museums and schools of design were instituted has been greatly furthered, moreover, by classes and evening schools attended by adults, generally for instruction in linear drawing, geometry and architecture. Those which have been long established at Rome, by the Pontifical Government, in which the instruction given is gratuitous, seemed to me to hold the foremost rank, by the excellence of the management and, as far as I could judge, by its results. In the brief notices here presented I only touch lightly upon the matters which struck me most in my journey; I purpose to treat

more at large hereafter the different systems of scholastic organization, and the modes of tuition adopted in the primary schools. On the present occasion I shall limit my remarks to a mere list of the institutions and establishments which I visited, and to an acknowledgment expressive of my obligations to the governments and individuals who favored the accomplishment of my mission. In all places I was received with much kindness, and I am bound to declare that the liveliest interest in the future of our country, and a strong curiosity to hear details concerning our social, material and political condition were evinced, in return for the information which I sought. I availed myself of the opportunity to distribute to public libraries and distinguished writers, various works on Canada, and received in return valuable gifts for the Department of Public Instruction, the earnest of future benefits of that kind. In this behalf, particular acknowledgments are due to the Honorable R. Macdonell, Resident Commissioner of the Office of Education at Dublin (an office which corresponds with that of Superintendent of Public Instruction), to His Eminence the Cardinal Archbishop of Dublin, to Monsignore Woodlock, Rector of the Catholic University of Dublin, to Bishop Delany, of Cork, to the Directors and Professors of the Queen's Colleges at Cork and Belfast, to Sir William Thompson, Professor at the University of Glasgow, to Mr. Brown, Trustee of the Free Church Schools in that city, to the Directors and Professors of the High School at Edinburgh, to Mr. Cummin, Secretary to the Commissioners of Education, then sitting in the same city, to the Pastor of the Congregation of St. Patrick at Edinburgh, to His Excellency Mr. Duray, Minister of Public Instruction in France, to M. de la Saussaye, Rector of the Academy at Lyons, to M. Nisard, Director of the Superior Normal School, to M. Eugène Rendu, Inspector General of Public Instruction, to M. Rameau, already honorably known in Canada, to His Eminence Cardinal Reissach, Prefect of the Congregation of Studies at Rome, to Monsignore Persichelli, Secretary of the same Congregation, to His Excellency the Minister of Public Instruction for the Kingdom of Italy, to the Chevalier Corsini, Head Director of the Municipal Schools of Florence, to our Canadian Artist the Chevalier Falardeau, to M. Vandenpeerboom, Minister of the Interior and of Public Instruction in Belgium, to M. Romberg, formerly Director General of Arts and Sciences at Brussels, to Bishop Lafreté, Rector of the University of Louvain, to Mr. Alphonse LeRoy, Professor in the University of Liège, and to the Directors and Professors of that University, to M. Gillon, Chief Officer (*Echevin*) of Public Instruction at Liège, to His Excellence Dr. de Muhler, Minister of Public Instruction at Berlin, to M. Imelmann, Professor in the College of Frederick William, to Mr. Huffer, Professor in the University of Bonn, and to M. Schmidt, Chief Editor of the *Encyclopædia of Public Instruction* at Stuttgart.

I mention only the above names, although my acknowledgments are due to a great number of others both men of letters and friends of education. Those I have named displayed so much kindness and ready zeal to oblige, and evinced so strong an interest in my mission, and in all things relating to Canada, that I feel bound to proclaim their names as entitled to the gratitude of my fellow countrymen.

The entirely new and quite exceptional circumstances in which our country is placed, render the object of this mission still more important, for at the moment when the work of public instruction is about to form part of the attributes of the Local Government, the latter can, without any outside control, make all necessary expenditures to meet the great

difficulties which impede its progress, and which, for many reasons, are far more serious than in Upper Canada. I have every confidence, then, that so soon as the finances of the future Province of Quebec shall have been regulated, the Government will give its fullest attention to the various suggestions I shall have the honor to make, and carry them out in so far as the resources at its disposal will permit.

I now give a list of the institutions, schools, libraries and museums I have visited, and of which I have procured, where it was possible, the programmes, reports, annuals and catalogues.

It is right to state that, at the period of my visit to England, the public schools were closed for the Christmas vacation, which accounts for the small number of institutions visited in that country.

BRITISH ISLANDS.

The Cork Model School, subsidiary to the Central Normal School in Dublin, and the Primary Schools connected therewith.

Model farm near Cork, in connection with the Model School.

Christian Brothers' School, Cork.

The Ursuline Convent Boarding School, Blackrock.

Elementary School, village of Blackrock.

Queen's College, Cork.

Trinity College, Dublin.

Catholic University of Dublin.

The Central Normal School, Dublin, and Primary Schools connected therewith.

The Catholic Normal School, Dublin, conducted by the Sisters of Mercy.

The Catholic College of All Hallows, near Dublin.

The Model farm, Glasnevin, connected with the Dublin Central Normal School.

Deaf and Dumb Institution, conducted by the Christian Brothers, near Dublin.

Female Deaf and Dumb Institution and Boarding School for young ladies, conducted by the Religious ladies of the Dominican order, near Dublin.

Museum and Botanic Gardens of the Exhibition, Dublin.

Education Office, Depôts, stores and collections of objects used in education at the Department of Public Instruction, Dublin.

The Belfast Model School, and the Primary and Infant Schools connected therewith.

The Schools of the Christian Brothers, Belfast.

The Queen's College, Belfast.

Endowed Elementary School, near Coleraine.

University of Glasgow, Lectures, collections and Library.

Andersonian College, Glasgow,—free evening conferences at this Institution.

College of the Rev. Jesuit Fathers, Glasgow.

Normal School of the Established Church of Scotland, and Model Schools and Infant School connected therewith.

Normal School of the Free Church, and Model Schools connected therewith.

Examination of Candidates for Teacher's Certificate, conducted by the School Inspectors.

Free Church Primary School, near Napier's workshops.

Primary School of the Established Church, near the University.
 The Library known as the Advocates' Library, at Edinburgh.
 The University of Edinburgh.
 Museum of the Arts and Sciences.
 The Museum and Gallery of Paintings, of Edinburgh.
 Herriot's College, known by the name of Herriot's Hospital.
 The High School of Edinburgh.
 The Free Church Normal School, Edinburgh, and primary schools connected therewith.
 The Industrial School for poor children, Gray's Close, Edinburgh.
 Parochial Schools in the neighborhood of Edinburgh.
 Farms in the vicinity of Edinburgh.
 Evening Conferences at the Mechanics' Institute—Industrial School for adults.
 Board of Education Commissioners, sitting at Edinburgh.
 Office of the Privy Council Committee on Education, London.
 Museum of Education, South Kensington.
 University of Oxford.
 Zoological Gardens, London.
 Libraries and collections of the British Museum.

ITALY.

Office of the Congregation of Studies, at Rome.
 Regional Schools of Rome.
 Roman College.
 The Primary School and Superior School, conducted by the Providence Sisterhood,
 Rome.
 Industrial Evening Schools, Rome.
 Museum and Library of the Vatican.
 Museum of the Capitol.
 Museum of St. John Lateran.
 Galleries Corsini, Borghese, Rospigliosi and Barberini.
 Victor Emanuel College, Naples.
 Industrial Evening Schools, Naples.
 Royal Library and Museum, Naples.
 Department of Public Instruction, Florence.

 Infant Schools, Florence.
 Library of San Lorenzo.
 The Pitti, Uffizi and Michael Angelo Museums.
 Brignoli Gallery, Genoa.

FRANCE.

Lycée of Marseilles.
Lycée of Lyons, Classical division and Industrial division.
 La Martinière school, at Lyons (Arts, Science and Manufactures).
 Primary school of the Brothers of the Christian Schools, Lyons.

- Minor College of the *Lycée* of Lyons, near Lyons.
 Museum of Antiquities and Gallery of Fine Arts, Lyons.
 Office of the Rector of the Academy of Lyons.
 Evening school for adults, Industrial Conferences, Lyons.
 Special Normal School, Cluny.
Lycée of Mâcon, Classical course and Scientific course.
 Primary Normal School, Mâcon.
 Primary Normal School for girls, at the establishment of the Sisters of the Holy Sacrament, Mâcon.
 The Superior Normal School, Paris.
 Turgot School (Special Commercial School), Paris.
 Normal School for Infant Schools, conducted by Madame Pape Carpentier.
 Museums and Galleries of the Louvre, Cluny, Versailles and Fontainebleau.
 Department of Public Instruction, Paris.
 Special Exhibition of Public Instruction in the Halls of the Department.
 Departments of Public Instruction, Books, Fine Arts, Scientific Instruments, at the Exhibition.
Lycée du Prince Imperial, at Vanvres.
 Boarding School of La Congrégation Notre Dame, or Des Oiseaux, Rue de Sévres.
 Batignolles Primary School, conducted by M. Damkés, Professor to the young Prince Napoleon.
 Primary School, Rue Neuve Coquenard, conducted by M. Barbier.
 Commercial School, Avenue Trudaine.
 Conferences and Public Lectures at the Sorbonne.
 Madame Deslignières' Boarding School.
 Commercial School for boys, Faubourg St. Honoré.
 Examination of candidates for Matron's certificate for Infant Schools.
 Examination of candidates for apprenticeship bursaries.
Bibliothèque Impériale.
Conservatoire de Musique.
Conservatoire des arts et métiers.
 Sittings of the Scientific Congress of the Departments, and distribution of prizes and rewards, by the Minister of Public Instruction.
 Exhibition of works of Ingres and of Hippolite Bélanger, hall of 1867, at the Palais de l'Industrie.
Museum et Jardin des Plantes.
 Normal School for boys and Schools annexed, Strasbourg.
 Elementary Schools, Chatillon sur Loings, Adon and La Bussière.
 Primary Girls School and Infant School, conducted by the Sisters of the Sacred Heart at La Bussière.
 College conducted by the Barnabite Fathers at Gien.
 Lyceum and Minor College of Orléans.
 Museum of the Chateau de Blois.
 Primary Normal School at Blois.

Agricultural Colony of Mettray, near Tours.

Maison Paternelle, or House of Reform and Study, for insubordinate sons of families, Mettray.

Boarding School of the Ladies of the Order of the Sacred Heart, Marmontiers, near Tours.

Pension Couteleau, Bordeaux.

Protestant Primary School, Rue Pellegrin, Bordeaux.

Ecole Impériale for deaf and dumb females, conducted by Les Dames de Nevers, Bordeaux.

Protestant Infant School, Bordeaux.

Superior Communal School, Rue Pellegrin, Bordeaux.

Library of the City of Bordeaux.

Agricultural School of Grignon.

BELGIUM.

Ministère de l'Intérieure, Department of Public Instruction and Agriculture, Brussels.

Athenæum of Brussels, classical department and scientific department.

Middle School of Brussels and Primary School annexed.

School of Design of M. Hendrick (new method of instruction, with a view to arts and manufactures, recommended and introduced into France by the Minister of Public Instruction).

Crèche and Infant School of Saint Josse-ten-Noode.

Royal Museum and Gallery of Paintings, Brussels.

Industrial Museum of Brussels.

Botanic Garden, Brussels.

Agricultural School of Gembloux,

Superior Commercial School of Antwerp.

Museum and Fine Arts Academy, Antwerp.

Middle School of Antwerp and Primary School annexed.

Communal Primary School No. 4.

University of Louvain, Library, Collections and Museums.

College and Middle School of the *Frères Josephites*, Louvain.

Young Ladies' School and Primary School, conducted by the *Soeurs du Saint nom de Marie*, Louvain.

Primary School of the *Frères de la Charité*, Louvain.

Botanic Garden of Louvain.

University of Liège, Lectures, Library, Museums and Collections.

Ecole des Mines, Liège.

Primary Normal School of Lierre, and Schools annexed.

Zoological Garden of Antwerp.

Library of the City of Antwerp.

Superior Industrial School, Liège.

Middle School (free) and Elementary School, Liège.

Infant School of Liège.

Institute for deaf-mutes and for the blind, Liège.

Jardin d'acclimatation, Liège.

GERMANY.

Deaf and Dumb Institute, Cologne.

Library of *Incunabula*, Cologne.

University of Bonn, Library, Museum, and Collections.

School of Design and Gallery of Casts, and of drawings from the antique, at the University of Bonn.

Museum of Natural History, Poppelsdorf.

New Laboratory and new Museum in course of construction at Poppelsdorf.

Primary Commercial School for boys, at Bonn.

Crèche and Infant School kept by *Les Sœurs du pauvre Enfant Jésus*, Bonn.

Hospice and Orphan Asylum, conducted by the *Deaconesses* of the Evangelical Church, Bonn.

Old Museum and New Museum of Berlin.

Royal Library of Berlin.

University of Berlin.

Gymnasium (Classical College) Frederick William, conducted by Dr. Ranke.

French Gymnasium (Francosische Gymnasium) founded by the old Huguenot colony.

Real Schule of *Koichstrasse*.

Elizabethshule (school for young ladies).

Gewerbe shule, conducted by Mr. Gullenkamp (preparatory school of arts and trades).

Handelshule (commercial school), conducted by Mr. Frantz.

Seminarium, conducted by Mr. Thilo (Normal School for boys).

Normal School for Girls, conducted by Mr. Marget.

Primary Commercial School, conducted by M. Krause.

Kindergarten (Infant School), *Lindenstrasse*.

Kindergartens and *Turnhall* (Gymnasium).—*Postdam communication*.

Turnhall of *Preutzenstrasse*.

Primary Parochial School, near the Catholic Church.

Boarding School, Orphan Asylum and Normal School, conducted by the Ursuline Nuns.

Primary Commercial Schools of the Villages of Pankow, Scheemhausen, and *Francosische Buchaulz*, near Berlin.

Handelshule of Dresden.

Gymnasium of Dresden

Polytechnic Institute (Superior School of Arts and Trades), Dresden.

Royal Museum of Dresden.

Royal Library of Dresden.

Polytechnic Institute of Vienna.

Belvidère Museum, Vienna.

Museum of Antiques, Vienna.

Royal Museum of Munich.

Gallery of Paintings of Munich.

University of Munich.

Gymnasium conducted by Dr. Schmidt, chief Editor of the *Encyclopædia of Public Instruction*, Stuttgart.

Realschule of Stuttgart.

Middle School and Elementary School of Stuttgart.

Turnhall of Stuttgart.

I now proceed to the summary of the statistics of the year.

In pursuance of the decision of the Printing Committee, the statistics and extracts from the Reports of the Inspectors of Schools are published, *in extenso*, only every three years, and this more detailed publication took place two years ago.

According to the following table of the general progress of public instruction during the past year, the increase of the total number of Institutions and Schools of all kinds has been 120; it was only 102 in 1865, and 52 in 1864; that of the number of pupils reaches 4,172, which is, in appearance, less than in 1865, when it reached 5,909; but a portion of this difference must be attributed to a rather considerable correction it has been necessary to make for one of the districts of inspection, into the previous reports of which an error in excess had crept. The increase of the amount of school contributions of all kinds, which was but \$4,184.39 for 1865, is \$49,618.42 for 1866. With reference to the total number of pupils, I may state that the total of this table is, as usual, a little greater than that of the grand synoptical table, resuming the reports of the Inspectors and School Commissioners; this difference is owing to the fact that there is added to the total of the former the figures of certain independent institutions comprized in the table of Superior Education, and which do not appear in the synoptical table.

As this Report gives the results we have been enabled to attain up to the moment when we are about to enter under a new *regime*, it is well to note the total figure of 3,826 institutions and schools of all kinds, having 206,820 pupils, which exhibits, within the space of thirteen years, that is to say, since 1853, an increase of 1,474 institutions and schools, and of 98,526 pupils.

TABLE of the Progress of Public Instruction in Lower Canada, since the year 1853.

	1853.	1854.	1855.	1856.	1857.	1858.	1859.

Pupils	98526	63679	49948	4172
Contributions.....\$	481218	240301	187670	49618

The following table shews the progress in school contributions from the year 1856, giving at the same time the several sources from which they are derived. As no direct assessment or monthly fees are levied in the two great cities of Montreal and Quebec, it was necessary, in order to complete the table, to have recourse to an approximative calculation of the sums or fees paid by the pupils of all schools both independent and under control. I again allude to this fact because for want of a similar statement in preceding reports it was considered that the total sums given as levied in the cities of Quebec and Montreal, respectively, were really at the disposal of the School Commissioners of those two cities, such sums being in reality much less in amount.

TABLE of Sums levied for Public Instruction in Lower Canada, from 1856 to 1866.

Years.	Assessment to equal amount of Grant.	Amount of Assessment levied over and above amount of grant, also special assess- ment.	Monthly Fees.	Assessment for the erection of School Houses.	Total levied.

Increase of 1866 over 1865.....	1012 26	6574 70	31733 36	8943 75	49618 42

The following table contains a summary of the various branches of Public Instruction ; but I have never concealed the defective nature of the classing of the institutions, and especially how great a deduction there would be from the total of second-class education, if the results were considered from a European point of view.

In each college there are several classes which cannot be considered other than preparatory for classical education, and it has also been absolutely necessary to include in the list of institutions for superior and second-class education convents and young ladies' boarding schools which receive grants from the Superior Education Fund.

RECAPITULATION OF THE FIVE GREAT DIVISIONS.

Divisions.	Number of Schools.	Number of Staff of Instruction.	Number of Pupils.
Superior Schools.....	10	75	888

I reproduce here a statement of the Dissident Schools; it exhibits a slight increase in the number of Catholic Dissident Schools, and a slight decrease in the number of Protestant Dissident Schools. This confirms what I have several times stated, that Catholics have similar, if not equal, interest with the Protestants in dissident questions, and that within a few years, at least, the extent of that interest will increase instead of diminishing.

The Normal Schools have continued to produce satisfactory results. The following table of the number of pupils attending them from their establishment, and of the number of diplomas which have been granted, shows very little fluctuation.

Were we allowed to establish a department of female pupil-teachers at the Jacques-Cartier Normal School, as has been for a long time suggested, it be might said with truth, that our Normal Schools meet the requirements of all the various classes of the population. To effect this, it would be requisite, that the total grant to the Normal Schools should be increased.

The following table gives the number of diplomas awarded by these institutions since their establishment:—

DIPLOMAS granted to Pupils of the Normal Schools since the establishment of those Institutions.

Nature of Diploma Granted.	Jacques-Cartier.	McGill.			Laval.			Number of Male Pupil-Teachers.	Number of Female Pupil-Teachers.	Grand total.
	Male Pupil-Teachers.	Male Pupil-Teachers.	Female Pupil-Teachers.	Total.	Male Pupil-Teachers.	Female Pupil-Teachers.	Total.

Totals.....	187	51	352	403	119	199	318	357	551	908

In its worthy chief the Abbé Langevin, who has been called to the Episcopate, the Laval Normal School has lost an able director, full of zeal, perseverance and energy, and

respecting whom, any eulogium on my part, would be superfluous: His Lordship the Bishop of Rimouski has, moreover, received from the citizens of Quebec, from the teachers and from the youth of that section of the country, an expression of the most lively gratitude for the services rendered by him to the cause of public instruction by his management of the Normal School, by the teachers' conferences, by his solicitude for his former pupils when they had entered upon their new career, never denying them his counsel and active protection, and lastly, by the publication of works on the art of teaching, which do honor alike to the country and to their author. This is the second time that a Principal of the Normal School has been called to the Episcopate, and this circumstance clearly shows what great interest the Catholic Clergy feel in these institutions; called to assist in their management, the ecclesiastical authorities, upon whom demands of this nature are constantly made for establishments which are entirely under their control, have not hesitated to assign to state establishments some of the most distinguished members of their body. His Lordship Bishop Langevin will be worthily replaced by the Abbé Chandonnet, who is now at Rome, and who was formerly director of the boarding School attached to the Laval University.

The annual statistical summary of the Boards of Examiners shews a diminution in the average number of candidates examined each day, and an increase in the number of candidates rejected. No one of these boards was inspected in the course of the year in consequence of my absence from the country. I hope to resume this duty with the co-operation of the other members of the Council of Public Instruction. These examinations and the composition of these Boards constitute one of the most important of the subjects which attracted my attention during my journey, and I must with regret acknowledge that, notwithstanding the reforms which the Council of Public Instruction have by their regulations effected, much still remains to be done in order to attain a satisfactory result. The members of the Boards are certainly animated by the best dispositions, and their services being given gratuitously, it is impossible to suppose that they are actuated by any other motives than those which conduce to the public interest. But the little time which they can devote to the examinations, the great number of candidates, and other reasons, sometimes of a personal or local nature, occasions complaints still to be preferred of the admission of persons who have neither instruction nor the requisite ability, and the greater number of whom enter into ruinous competition with able male and female teachers, especially those who have been educated at the Normal schools, and prevent the raising of the salaries given by the Municipalities.

I cannot conclude this report without rendering a due tribute of praise to the ability with which the business of this department was carried on, during my absence, by Dr. Giard, whom the Government was pleased to appoint Deputy Superintendent under the provisions of the law respecting public instruction.

I have the honor to be, Sir,

Your very humble and obedient servant,

PIERRE J. O. CHAUVEAU.

Superintendent of Education.

APPENDIX TO THE REPORT

OF THE

SUPERINTENDENT OF EDUCATION.

R E P O R T

OF THE

DEPUTY SUPERINTENDENT,

ON THE

DISTRIBUTION OF THE GRANT FOR SUPERIOR EDUCATION.

To the Honorable the PROVINCIAL SECRETARY,
Ottawa.

EDUCATION OFFICE,
Montreal, 19th December, 1866.

SIR,—I have the honor to transmit herewith, six lists containing the names of the institutions which have made application for special aid from the fund for Superior Education, together with the amount I propose to give to each of those institutions, of which sums the following is an enumeration :—

1. Universities.....	\$ 4,198
2. Classical Colleges.....	13,320
3. Industrial Colleges.....	7,407
4. Academies for boys, or mixed.....	12,883
5. Academies for girls.....	10,443
6. Model Schools.....	18,816
	\$67,067

The total sum is, therefore, sixty-seven thousand and sixty-seven dollars.

Last year there remained four hundred and eighty-one dollars to the credit of the fund, which, added to the sixty-eight thousand dollars granted each year, gives a total of sixty-eight thousand four hundred and eighty-one dollars available this year.

If the amount of the lists accompanying this letter be deducted, there will remain a balance of fourteen hundred and fourteen dollars (\$1,414).

But it is to be remarked that I have not included in the lists of this year the following academies:—Sherbrooke, Georgeville, Philipsburg and Eaton, which last year received \$681. The reason which has led me to exclude these institutions is that they were conducted by teachers who had no diplomas, or who had none but elementary school diplomas. Eaton has made no report. Nevertheless, as they may hereafter give explanations of a nature to satisfy the Government, I deemed it best to hold in reserve the amount they were in the habit of receiving. I have also set aside the Model School of Ste. Hélène,

County of Kamouraska, because the teachers conducting it had no model school diplomas. It received last year \$56. I recommend that the grant made to the College of Three Rivers be raised from \$582 to \$900. This institution, notwithstanding that it is of tolerably recent origin, has put forth great efforts; but it could not maintain itself without this increase. The Hon. Mr. Chauveau, before his departure, instructed me to recommend it strongly.

I also propose to increase the grant to the Model School of St. Lambert. This parish, though poor and somewhat new, is one of those in which there is exhibited most zeal for education. It has two superior schools, one for boys and the other for girls, both conducted by pupils of the Laval Normal School, to whom reasonable salaries are paid. This result is due to the zeal of the Rev. F. A. Oliva, curé of the parish, who takes every pains to maintain these schools in a flourishing state, and who seems to me to be entitled for that reason to this slight encouragement.

I have been compelled to diminish this year, by two per cent., the grants of all establishments that received over \$100. The number of new institutions being somewhat considerable, and the grant remaining always the same, the only means of affording them a share was to diminish the grants to the old institutions.

I beg that you will recommend His Excellency the Administrator of the Government to sanction this Report, and pray that he will cause a warrant or letter of credit to issue in my favor for \$67,067, in order to enable me to pay to the several institutions the amount allotted to them.

I have the honor to be, Sir,
Your obedient servant,

LOUIS GIARD,
Deputy Superintendent of Education.

N.B.—See Table for list of distribution, annexed to this Report.

REPORT

OF THE

JACQUES CARTIER NORMAL SCHOOL,

FOR THE SCHOLASTIC YEAR 1865-66.

SIR,—I have the honor to submit to you the Annual Report of the Jacques-Cartier Normal School, for the year 1865-66.

I.

We admitted forty-two pupils, 17 previously matriculated, and 23 new. All belonged to the District of Montreal, except one who was a native of that of Three Rivers. If the young people of the latter District, and of that of Ottawa, do not generally avail themselves of the advantages presented by the Normal School, it is no doubt on account of the great distance of those places from it, as education must be so generally diffused in both as to enable the inhabitants to appreciate the value of good teachers.

The County of	Berthier	furnished	12	pupils.
"	Laprairie	"	5	"
"	Joliette	"	5	"
"	St. John's	"	3	"
"	Iberville	"	3	"
"	Laval	"	2	"
"	Two Mountains	"	2	"
"	Jacques-Cartier	"	2	"
"	Chateauguay	"	2	"
"	Napierville	"	1	"
"	Rouville	"	1	"
"	Richelieu	"	1	"
"	City of Montreal	"	2	"

The examination on admission showed that on an average the pupils from the County of Berthier were more advanced in their studies than the others. In nearly ten years, during which I have subjected candidates for admission to preparatory examinations, I have ascertained with great regret that many municipalities which give high salaries to their teachers, have very inferior schools. The candidates sent by them are either quite unfit to be admitted, or if admitted, with the hope that original talent will surmount the defects of their elementary education, they are in nearly all cases obliged to resume their studies a second year, to the great loss of their parents.

II.

Our pupils are classed as follows:—

Third year, 4. Second year, 12. First year, 26.

The detailed statement already transmitted to you, has informed you what are the principal subjects taught, and the number of the students. All the pupils have given great satisfaction by their assiduity, their excellent behaviour, and their quickness in learning. This is the character given of them by their professors.

Some have left the establishment in the course of the year; two on account of ill health, two to take places as teachers, three for want of pecuniary means to continue their studies; the rest because they failed to obtain diplomas at the end of the year.

We have, nevertheless, found reason to grant twelve diplomas, that is to say:—

As teachers of Academies, 2; to keep Model Schools, 6; to teach Elementary Schools, 4.

Mr. Bellerose, Director of the Academy at Chambly, who had attended his third year's course, but who had not undergone his examination at its conclusion, also received his diploma as an Academic teacher.

III.

The question of finding places for our pupils is a very important one, on whichever side it is considered. It is, in the first place, necessary to find employment for them, which is not always an easy matter; for, while the number of teachers, male and female, is steadily increasing, nearly all who have become qualified persevere in their occupation, as I had the pleasure to observe in my last year's report. The male teachers and, still more, the female teachers, who have not incurred the expense of instruction at the Normal School, are able to engage to serve for lower rates of salary. The competition resolves itself, therefore, into a question of cheap service,—too frequently without regard to the antecedents, the morals or the acquirements of the teacher. Economy is the main consideration of the managing body. It has frequently happened that, at the close of a school year, a good teacher (not from our institution only, but others) finds that his salary is cut down some dollars; an amount trivial, indeed, to a parish, but to him of great importance. This state of affairs is not irremediable; and, for my part, I think that the efforts of the *curés* and the denial of good teachers will not fail to triumph in the end. Our pupils should, above all, bear this truth in mind, which we often inculcate, that hardly any obstacle exists which may not be overcome by real qualifications, irreproachable conduct, and a professional attachment to the interests of the body.

However this may be, the Normal School is represented in nearly all the counties of the District of Montreal. Dividing the whole district into three zones, the northern employs about one-fifth; the centre, including the city, rather more than one-fifth; and the southern zone two-fifths. It is worthy of remark that the counties which send us most pupils—as Berthier and Joliette—do not employ a single master from the Normal School; and that those counties which contribute the fewest pupils—as Napierville—are those in which such masters are most in request. Some of our old pupils continue to teach in the districts of Three Rivers, Quebec and Gaspé. One of those who obtained their diplomas in the present year has been engaged at the Allumettes, in the District of Pontiac, by the efforts of the worthy *curé* of that place; another is teaching in the County of Ottawa.

I am bound to remind you, and to make mention, for public information, of the praiseworthy devotedness of Messrs. Valois, Pierre and Julien Provost, and Beaudin. Those gentlemen have, at the request of their lordships the Archbishop of Oregon and the Bishop of Nesqually, readily—I may say happily—agreed to go to those distant regions to engage in the work of education among our fellow-countrymen there, where a good teacher is scarcely to be found. Our professors and their fellow-students offer up fervent prayers for the success of their generous undertaking.

IV.

It is unnecessary, Sir, to descant upon the zeal of the Professors: you can yourself bear witness to it. It has not abated for an instant; and to that we are mainly indebted for the success which has marked the proceedings of the Jacques Cartier Normal School.

I remain, Sir,

Your humble servant,

(Signed,)

H. A. B. VERREAU.

REPORT

ON THE

MCGILL NORMAL SCHOOL,

FOR THE SCHOLASTIC YEAR 1866-7.

To the Honorable the SUPERINTENDENT OF EDUCATION :

SIR,—I beg leave to present the usual Annual Report of the condition of the McGill Normal and Model Schools. The total number of teachers in training in the past Session was..... 75

Of these were :

Males.....	2
Females.....	73
	—75
Resident in Montreal.....	42
“ in other places.....	33
	—75
In the Academy Class.....	4
In the Model Class.....	24
In the Elementary Class.....	47
	—75

Three graduates of McGill University entered for the Academy Diploma on the terms of the regulations in that behalf.

At the close of the Session we were enabled to recommend for the Academy Diploma, 6; for the Model School Diploma, 16; for the Elementary School Diploma, 24. In all 46, of whom 26 are resident in Montreal, and 20 in other places.

These additions raise the total number of diplomas granted by the school to 441, and the total number of persons who have received diplomas to 330.

The persons actually holding diplomas, and more than two thirds of whom are engaged in teaching at the present time, may be stated thus :—

Academy Diploma.....	19
Model School Diploma.....	128
Elementary School Diploma.....	183

The most satisfactory testimony continues to be received from Commissioners and others, as to the efficiency of the teachers sent out from this school; and the demand for their services has been steadily increasing in schools of all grades. It is, however, much to be regretted that when such an institution exists, with so competent professors, and so great facilities for a thorough training, so many young persons still enter into the profession of teaching without experiencing the benefits of the Normal School. Every effort should be made by the friends of education and by the educational authorities to promote a higher ambition on the part of such persons; and I think it deserves consideration whether the time has not arrived when it should be made imperative on all teachers, at least of the higher grades of schools, to receive a Normal School training.

I have reason, however, to believe that indirectly the Normal School has improved the qualifications even of those teachers who do not directly avail themselves of its benefits. It has done this by raising the public appreciation of the work of teaching, by the labors and example of those who have gone forth from the Normal School, and also by inducing the establishment of what are called normal classes, more or less imitating our methods, in several of the higher schools in the country.

Still I would respectfully invite attention to the inconsistency of placing on the same level in the classification of teachers those who have, after a competent school course, and often at much expense, taken a thorough course of training, and those who content themselves with the easy ordeal of a few hours' examination, which, as the law stands, need not be much more severe than the entrance examination of the Normal School.

I have, as usual, to express the utmost satisfaction with the zeal and devotion of the professors and teachers of the school. It is due to Mr. McGregor, of the Boys' Model School, to mention his services in attending to the teaching of classics in the Normal School, as an extra labor without special remuneration. Miss Coady, of the Girls' Model School, and one of her assistants, have also aided us by conducting a special preparatory class for the benefit of the more backward students of the Normal School. Our thanks are again due to the ministers of the city, who have carried on most regularly and efficiently the classes of religious instruction.

The arrangements for the employment of the Model School of the Colonial Church and School Society, as an additional Model School, subsist without any change, and their working is perfectly satisfactory.

The Academy Class has been carried on satisfactorily during the Session, and I have reason to be much pleased with the working of the regulation of the Council of Public Instruction, relating to the granting of diplomas to graduates of the University. Ten diplomas have been given, under this regulation, to young men of the highest qualifications for the work, some of whom have permanently adopted the profession of teaching.

Having only two male teachers in training in the past Session, I have as yet been able to do little in regard to Military drill under the regulations for that purpose. The classes in the Model School are, however, in a high state of efficiency, and the teachers in training, have to some extent, the benefit of the instruction given to these classes.

I have to express my gratification that measures have been taken for the renewal of the retaining wall of the play-ground. I regret, however, that owing to the intervention of the city authorities in regard to widening the street, and also owing to the delay in the payment of the sum granted by the Legislature, the progress of the work has been slow, and much inconvenience has resulted to the school from the condition of the play-ground:

I regret that no provision has been made for increase of accommodation to the Model Schools. It may be of some service to teachers in training to practise their art under difficulties, but this is not supposed to be the function of a Model School; and the necessity under which we now are of using all the lobbies and passages as class-rooms and waiting-rooms, is certainly not creditable to an institution of a Provincial character. I may add that a moderate increase of space would enable us to take more pupils, thus adding to our income, giving an increased educational advantage to the city, and enlarging the opportunities of practice enjoyed by teachers in training. I may farther state that the present use of the upper hall of the school, for drilling, is very objectionable. The noise and vibration interfere with the classes below and damage the ceilings. A hall or shed for gymnastics and drill would remove this disadvantage.

Considerable additions to the apparatus and library of the school would now be desirable, could a small special grant be made for this purpose.

The apparatus originally purchased by the installation fund has been carefully husbanded for the last ten years, and small additions have been made by purchase and by the labor of Professor Robins; but it has proved impossible to give any considerable sums for the purpose from the ordinary income of the school. The library has slowly increased. Professor Hicks has acted as librarian, and such additions as could be afforded have been made, as recommended, by the several professors. The total number of volumes is now about 1,000. The books are principally on subjects more or less connected with the work of the school, and are in constant use. But it would be desirable, both for the sake of teachers and students, that their number should be largely increased.

In the department of Natural History, I have hitherto contented myself with the use of specimens from the Museum of the University, there being no proper place in the Normal School for a collection in Natural History; but if the additions to the building recommended above could be made and a small expenditure incurred for cases and drawers, I could in a few years, without further expense, form a collection which would be of much service to the school, and to the interests of education in Natural Science. Had we space we might also add to the educational means of the school, by accumulating objects of art and antiquities.

I have the honor to be,

Your obedient servant,

(Signed,) J. W. DAWSON.

Principal.

REPORT

ON THE

LAVAL NORMAL SCHOOL,

FOR THE SCHOLASTIC YEAR 1865-66.

To the Honorable P. J. O. CHAUVEAU,
Superintendent of Education, L. C.,
Montreal.

SIR,—The school year of 1865-66, on which I have the honor to make this Report, has been remarkable in our Normal School, principally in three respects :

1st. The classes of the Department of female pupil teachers, were opened on the 6th September last, in a new and spacious apartment over the parlours in the main building lately erected by the ladies of the Ursuline Convent. In this there are great advantages gained in respect of light, ventilation and quietness, the old class rooms being situated immediately upon the street. Yet, I confess, it was impossible entirely to repress a natural emotion on leaving the halls in which our course, beginning on the 1st September, 1857, was inaugurated, and which had consequently afforded shelter to eight generations of female pupil teachers.

2nd. On the other hand, the removal from Quebec of the Government Departments, gave rise to the restoration of the department of male pupil teachers to the very cradle of the Laval Normal School. On the 1st May last, we resumed possession of the old *Château* from which we had removed in July, 1859 ; we there found a thousand souvenirs of the first principal—His Lordship Bishop Horan. This fresh removal necessarily imposed upon me a considerable increase of work and anxiety, both in respect of the transport of the class-room furniture and material, of the libraries, of our collections, of our museums, &c., and with regard to our installation in the *Château*. The courses had to be interrupted for some ten days. I was in hope that the apartments intended for the model school attached, in the former gardener's house, would be ready in time ; but the delay which occurred in the work, compelled me to open that school in the male pupil teachers' recreation hall. This inconvenience, however, was not greatly felt, the fine weather allowing the latter to enjoy the benefit of the garden. In respect of exercise in the open air, they are thus in a much more favorable position than when they occupied the building belonging to the Reverend Jesuit Fathers. Unfortunately, we have been incommoded by mechanics of all trades working amongst us up to the present time, although the works were begun last autumn.

3rd. There has been much sickness among the female pupil teachers in the course of the winter and spring. I do not know to what to attribute it ; possibly in a slight degree

to the different temperature of the various parts of the building, and perhaps also to neglect of out-door exercise. Our male pupil teachers, generally, also exhibit a certain degree of repugnance to all bodily exercise, which, however, would be productive of most salutary effects; it is necessary, so to speak, to compel them to practise it.

Two of them departed this life within a short space of time. On the 24th of January Mr. Jean Cauchon fell a victim to small pox, the attack having only lasted a week; and, on the 9th of February following, an attack of acute peritonitis, of three days' duration, carried off Mr. Thomas Maltais, of Chicoutimi, who expired at the school, in his brother's arms, the latter being a pupil in his second year. The two deceased had only been in the institution a few months, but they had already, by their good conduct, become the objects of universal esteem. Mr. Cauchon, a native of Deschambault, gave rise to great hopes, in consequence of his great memory, his judgment, and his great aptitude in instruction.

During the year our classes have comprised 96 pupils: 39 male and 57 female pupil teachers. Of the former 14 were in their second year and 25 in their first; of the latter 14 also were in their second year and 43 in their first.

I consider it my duty to mention to you the good disposition which has this year animated our male pupil teachers, as well as the remarkable regularity which they have exhibited, thanks, in great part, to their monitor, Mr. Stanislas Fréchette. They have also made very marked progress in the study of the English language, for which praise is due to their professors, Messrs. McSweeney and Cloutier.

This summer 18 Model School Diplomas were granted to 8 male and 10 female teachers; 14 elementary school diplomas were also conferred on 3 male and 11 female teachers. Among the 10 new female Model School Teachers is included Miss Julie Noël, of St. Antoine de Tilly, who obtained her certificate with *great distinction*, and carried off the prize instituted by H.R.H. the Prince of Wales.

Our annexed schools have continued to be frequented by a large number of children, and to produce satisfactory results.

The conferences of teachers in connection with this school continue to present many points of interest and utility to those who take part in them. Unfortunately too few give themselves the trouble to attend, nearly the same individuals being present on each occasion, and most of these cannot summon up courage to speak or to read essays.

Our pupils who are engaged in teaching, to the number of 172, generally give satisfaction by their assiduity, their good conduct and the system which they follow.

I cannot, in concluding, silently pass over the loss which the department of female pupil teachers has sustained by the death of the Reverend Mother St. André, Superior of the Ursulines. The venerable deceased had often shewn the great interest that she took in our pupils, and by her exquisite tact, correct discernment and intelligent solicitude, greatly contributed to render our relations useful and harmonious.

I have the honor to be, Sir,

Your humble and obedient servant,

(Signed,) JEAN LANGEVIN, P^{RE}.,
Principal.

QUEBEC, 1st October, 1866.

1868.

STATEMENT

(In obedience to the Order of the House, of the 16th March last),

Shewing the names of the Shareholders in the several Banks of the Dominion, with the amount of Stock held by each individual, or by Trustees, Companies or others, and the Post Office Address of all such Shareholders, with the amount paid up on such Stock.

NOTE.—The Bank Returns consisting principally of Lists of Names, it was considered that one Edition would suffice for the English and French.

ETAT

(Conformément à l'ordre de la Chambre du 16 mars dernier),

Indiquant les actionnaires des différentes banques de la Puissance, le montant des actions possédées par chaque individu, ou par des syndics, des compagnies ou autres, et le bureau de poste de la localité de tous ces actionnaires, ainsi que le montant payé sur chaque action.

NOTE.—Les rapports des banques consistant principalement en noms, il a été jugé à propos de n'en faire qu'une seule et même édition anglaise et française.

DEPARTMENT OF PUBLIC WORKS.
Quebec, 23rd Dec., 1864.

SIR,—I am directed by the Honorable the Commissioner to request you to furnish this Department with copies of all letters of instructions which may have been sent to Mr. S. Fleming, in connection with the Intercolonial Railway Survey, or, if more convenient, to give communication of all papers connected therewith.

I have the honor to be, Sir,
Your obedient servant,
(Signed,)

F. BRAUN,
Secretary.

The Honorable the Provincial Secretary,
Quebec.

(Copy of No. 73,752.)

QUEBEC, Feb. 17th, 1865.

MY DEAR SIR,—It has been suggested by Members of the Legislature and others interested in the construction of the Intercolonial Railway, that in order to enable the Canadian Authorities to form a more correct opinion, as to the cost and best mode of construction, it would be expedient to obtain, in addition to the Reports of Engineers, information on the following points, viz. :—

- 1st. The number and kind of laborers which the settlements in the vicinity of the proposed routes (in New Brunswick as well as Canada) can supply.
- 2nd. The present price of labor of ordinary laborers, per day.

- 3rd. The price of horses of a serviceable kind.
 4th. The price of hay per ton.
 5th. The price of oats per bushel.
 6th. The price of provisions, pork, flour—distinguishing the several kinds usually required in constructing public works.
 7th. The number of months in the year during which labor can be carried on in the field without interruption from frost; and, generally any information bearing on the subject and likely to be supplied by the Reports of Engineers.

You will no doubt be able to select persons, either connected with your Department or in its confidence, who will, at small cost, supply you with reliable information on the points suggested.

I have the honor to be, very respectfully,
 Your obedient servant,

(Signed,) Wm. McDougall,
 Secretary.

Hon. J. C. Chapais,
 Commissioner Public Works.

DEPARTMENT OF PUBLIC WORKS,
 Quebec, 20th February, 1865.

SIR,—With a view of placing the Canadian Authorities in a position to form a better idea of the probable cost of the proposed Intercolonial Railway, I have received instructions from the Hon. the Commissioner to request that you will proceed at once to the south shore of the Bay of Chaleurs, in order to collect on the spot, and directly from parties residing there, information on the following points, which you are to report to this Department so soon as you shall have accomplished the duties intrusted to you, and if possible before the opening of the debates which will take place during the present Session on the subject of the construction of the road:—

1. The number of mechanics, day laborers, masons, blacksmiths and carpenters each locality can furnish.
2. The current rate of wages of such mechanics and laborers per diem.
3. The number of draught horses, and the price per day for each cart.
4. The usual price of hay per ton.
5. The price of oats.
6. The price of provisions, such as flour, pork, lard and butter—distinguishing the different kinds usually required in the construction of public works.
7. The number of months during which work can be done at the ground without interruption from frost, and generally any information in relation to the subject, not likely to be included in the reports of the engineers.

You may, if you deem it necessary, associate with yourself another person to assist you in the accomplishment of your duties, which you will perform with diligence and as economically as possible.

I have the honor to be, Sir,
 Your obedient servant,
 (Signed,) F. BRAUN,
 Secretary.

Mr. Jos. Rosa,
 Superintendent, Metapediae Road, Ste. Flavie, C. E.

DEPARTMENT OF PUBLIC WORKS,
Quebec, 24th Feby., 1865.

MEMORANDUM.—The undersigned has the honor to represent, that in order to enable the Canadian Authorities to form a more correct opinion as to the cost and best mode of construction of the Intercolonial Railway,—it has been deemed necessary to obtain certain further information bearing on the subject, not likely to be supplied by the Reports of the Engineers,—and that instructions were given to that effect, to persons connected with this Department.

That the appropriation of last Session, for the Intercolonial Railway Survey, is exhausted, and that there are no funds at the disposal of this Department to meet the expenditure to be incurred in obtaining the required information.

The undersigned, therefore, recommends that a Warrant may issue in his favor for eight hundred dollars, to enable him to pay expenses incurred for the above purpose; the sum chargeable to appropriation for “unforeseen expenditure,” and to be accounted for.

Respectfully submitted,

(Signed,)

J. C. CHAPUIS,
Commissioner of Public Works.

(Copy of No. 73,866.)

Copy of a Report of a Committee of the Honorable the Executive Council, approved by His Excellency the Governor General in Council, on the 25th February, 1865.

On a Memorandum, dated 24th February, 1865, from the Honorable the Commissioner of Public Works, representing that in order to enable the Canadian Authorities to form a more correct opinion as to the cost and best mode of construction of the Intercolonial Railway, it has been deemed necessary to obtain certain further information bearing on the subject, not likely to be supplied by the Reports of the Engineers, and that instructions were given to that effect to persons connected with this Department.

That the appropriation, of last Session, for the Intercolonial Railway is exhausted, and

that there are no funds at the disposal of his Department, to meet the expenditure to be incurred in obtaining the required information; he therefore recommends that a warrant issue in his favor for eight hundred dollars (\$800,) to enable him to pay expenses incurred for the above purposes, the sum chargeable to appropriation for "unforeseen expenditure," and to be accounted for.

The Committee advise that a Warrant issue accordingly.

Certified,

(Signed),

W. H. LEE,
Clerk Executive Council.

To the Honorable the Commissioner of Public Works,
&c., &c., &c.

(Translation.)

(Copy of No. 74,482.)

PUBLIC WORKS DEPARTMENT,
Quebec, 10th March, 1865.

The Honorable J. C. Chapais,
Commissioner of Public Works.

SIR,—I have the honor to transmit to you, together with the account in duplicate herewith, my report in relation to the information you instructed me to collect in Madawaska by your letter of the 18th ult., No. 53,179½.

In pursuance of your authorization, and with a view of furnishing the information to your Department with as little delay as possible, I deemed it my duty to secure the services of Joseph Deslauriers, of St. Anne de la Pocatière, to assist me in the accomplishment of my duties.

Madawaska is composed of five parishes, namely, St. François, St. Luce, St. Bazile, Ste. Eleonor, and Grand Sault, and the three localities of Gordon, Perth, and Andover, generally known by the designation of "Tobic."

I assigned to Mr. Deslauriers the first four of these parishes, while I myself had to visit the other localities. The following is the information we have obtained:—

1st. There could be obtained in Madawaska, in the event of the Intercolonial Railway being constructed:

400 to 500 men at.....	70c. to 80 cents per day.
20 " 30 masons at.....	\$1.25 " " "
10 " 12 blacksmiths.....	1.25 " " "
75 " 100 carts.....	1.50 " " "
60 " 75 carpenters.....	1.00 " " "

2nd. The usual price of hay per ton varies from \$10 to \$12, and oats from 30 to 33 cents per bushel.

3rd. The prices of provisions, such as are usually required in the construction of public works, are as follows:

Meal, none for sale; flour, \$7 to \$8 per barrel; pork, \$24 to \$25 per barrel; butter, 17 to 18 cents per lb; lard, none to be had in Madawaska.

4th. The earth can be worked during six months of the year, without interruption from frost.

5th. Midway between Petit Sault or Edmonstone and Grand Sault, in the parish of Ste. Eleonore, within four arpents of the River St. John, there is a limestone quarry of very great extent, capable of yielding any quantity of limestone that may be required for the construction of a Railway. Two kilns, the property of a person named Cyr, were constructed at this place some three years ago. Another was also built forty miles lower down, on the banks of the Tobic River, where there is also much limestone.

6th. There is to be found almost everywhere on the shores of Lake Temiscouata and the River St. John, building stone of the very finest and best quality. It would be available, with advantage, for the construction of bridges and culverts. In many places this stone would seem to have been cut by nature, and hardly needs any working. I was enabled myself to see some of these stones which have been used in building the Grand Sault bridge,

and measuring 7, 8, and even 10 feet in length, 3 to 4 feet in width, and $1\frac{1}{2}$ to 2 feet in thickness. Most of them were laid as they were taken out, and without any working.

In conclusion, I desire to state that the above prices for provisions and hay are those at which these articles are generally sold in Madawaska, but it may well be presumed that the construction, in these localities, of public works of the importance of those proposed, will necessarily have the effect of inducing somewhat of an advance in the price of provisions, &c.

I have the honor to be, Sir,

Your most obedient servant,

(Signed,) O. DIONNE.

(Copy of No. 74,590.)

EXTRACT from a Memorandum of the Honorable the Minister of Finance, dated 5th April, 1865, submitting, for the approval of His Excellency the Governor General, of certain appropriations from the vote of credit of \$2,000,000, for the remaining service of the Financial Year, ending 30th June, 1865.

Public Works and Buildings.—Intercolonial Survey - - - \$10,000.

Truly extracted.

Approved in Council,
7th April, 1865.

(Signed)

W. H. LEE,
C. E. C.

(Translation.)

ST. FLAVIE, 12th May, 1865.

F. Braun, Esq.,

Secretary of Public Works, Quebec.

SIR,—You will find enclosed a report of my journey in the northern part of New Brunswick, in February and March last.

Press of business prevented my forwarding this report at an earlier date.

I have the honor to be, Sir,

Your obedient Servant,

JOSEPH ROSA.

(Translation.)

ST. FLAVIE, 12th May, 1865.

F. Braun, Esq.,

Secretary of Public Works, Quebec.

SIR,—In reply to your letter, dated the 18th February last, in which you instructed me to proceed to the northern part of New Brunswick, adjoining the Bay of Chaleurs, for the purpose of collecting on the spot, and directly from persons resident there, the following information, viz., the number of day laborers, mechanics, &c., and the number of draught horses which were obtainable in each locality, and the wages usually paid to such day laborers and mechanics, as well as the cost of a horse and vehicle, with driver, by the day; the ordinary cost of provisions, such as pork, butter, flour, &c.; the number of months during which the earth may be worked without interruption by frost; and generally all information on the subject of the proposed Intercolonial Railway, which would probably not be contained in the report of the Engineers, and to report thereon, I have to report as follows:

In accordance with these instructions I proceeded to New Brunswick, by the Metapediae Road, and travelled through the Counties of Ristigouche, Gloucester, Northumberland and Kent, with the view of obtaining all possible information, in conformity with your directions.

In going I passed through the interior, and on my return, by the shore.

You will find attached hereto, a table setting forth the names of the places visited, with the distances between them.

I have the honor to present the following report, based partly on the information which I obtained on the spot from reliable persons, and partly on the report of the Census of New Brunswick of 1861, and on the Reports on the Navigation and Trade of the same Province for the year 1863.

RISTIGOUCHE.

The county of Ristigouche can furnish about 300 day laborers and 90 mechanics, carpenters, joiners, masons and blacksmiths, and 300 draught-horses. The usual wages paid to day laborers are 80 cents a day; to mechanics, \$1.20 a day; and for a horse with vehicle and driver, \$1.50 a day.

Hay is worth \$10 a ton, and oats 40 cents a bushel. Pork is sold by the farmers at 7 cents a pound, butter at 19 cents, and potatoes at 40 cents a bushel. Flour, in barrel, pork and peas being imported from Quebec, follow the prices in the latter Province.

Navigation opens about the 1st of May and closes at the commencement of December.

The earth may be worked during six months and a half without interruption by frost.

The amount of importations at the port of Dalhousie during the year 1863, was \$58,788, and the value of exports, \$74,063.

This county possesses two good ports for large vessels, one at Dalhousie, at the mouth of the River Ristigouche, in the Bay of Chaleurs, and the other at Campbellton, 17 miles above Dalhousie.

The two towns of Campbelltown and Dalhousie prospered so long as the forests adjoining the River Ristigouche and its tributaries continued to yield merchantable timber, but these forests having been almost entirely destroyed by great fires, the towns in question have remained almost stationary for some years.

This county contains 1,426,560 acres of land. 614 farmers are in occupation of 77,946 acres, and of these 14,628 are under cultivation.

The population of the county amounts to 4,874 souls, of whom about 900 are of French origin. The county is almost entirely agricultural.

The produce of the fisheries yields \$11,885. It consists principally of herring and salmon. Two or three vessels a year are built, of four or five hundred tons each.

GLOUCESTER.

The County of Gloucester contains about 1,037,440 acres of land; 1,796 farmers are in occupation of 182,744 acres, of which 35,355 are under cultivation.

The population amounts to about 15,076 souls, of whom 8,500 are of French origin.

This county could furnish about 600 day laborers, and 500 mechanics, such as carpenters, joiners, masons, blacksmiths, &c., and 800 draught horses.

The daily wages are as follow:—day laborers, 70 cents; mechanics, \$1.10; and a horse with a vehicle and driver, \$1.50.

Oats are worth 35 cents a bushel, and hay \$10 a ton.

The following are the prices of provisions, viz.:—butter, 17 cents a lb.; potatoes, 35 cents a bushel, and peas, \$1.20; pork costs \$15 a barrel, and flour \$6; but the latter two articles, being imported from Quebec, vary in price according to the markets of that place.

As in the County of Ristigouche, the earth can be worked for six months and a half without interruption by frost.

Limestone abounds in the interior.

The value of imports entered at the Ports of Bathurst, Shippegan, and Caraquet amounted, in the year 1863, to \$180,272, and the exports to \$179,061, exclusive of the value of the vessels built in the county; these were five in number, having an aggregate measurement of 1,850 tons.

In 1864 eight vessels were built; these measured together 32,100 tons.

The value of the products of the fisheries in 1863 amounted to \$85,783.

Bathurst is the chief town of the county.

NORTHUMBERLAND.

The County of Northumberland contains a population of 18,801 souls, of whom about 7,800 are of French origin. It contains 2,980,000 acres of land, of which 264,371 are occupied by 1,872 farmers, who have 40,800 acres under cultivation.

This county could furnish about 1,200 day laborers, and 700 mechanics, such as carpenters, joiners, blacksmiths, masons, &c., and 1000 draught horses.

Wages average from 70 to 80 cents a day for laborers, from \$1 to \$1.20 for mechanics, and \$1.50 for a horse with vehicle and driver.

The cost of provisions is the same as in the County of Gloucester. The value of imports at the Ports of Chatham and Newcastle, during the year 1863, amounted to \$545,283, and of the exports \$430,002, exclusive of the value of sixteen vessels, measuring 9,763 tons, which were built in the County. In 1864 twenty-one vessels, measuring 16,800 tons were built. This year fourteen are in course of construction; these will measure 9,800 tons.

The Miramichi River, which is navigable to a great distance, is free from ice from the 25th April to the 1st December.

The earth can be worked for seven months without interruption from frost.

The value of the products of the fisheries, for the year 1863, amounted to \$37,803.

Newcastle is the county town; it is a small trading town, built on the Miramichi River. The town of Chatham is also on the Miramichi River, five miles below Newcastle; it is larger than the latter, and possesses a good port. The principal branch of industry there is ship-building.

KENT.

The County of Kent contains 1,026,400 acres of land; 219,918 acres are occupied by 1,994 farmers, who have 95,186 acres under cultivation. The population of the County is 25,045 souls, of whom 700 are of French origin.

This County could supply about 700 day laborers, 400 mechanics, carpenters, joiners, &c., and 600 draught horses.

Wages and the prices of provisions are the same as in the Counties of Ristigouche and Gloucester.

The imports in 1863 amounted in value to \$102,400, and the exports to \$191,147, exclusive of the value of six vessels measuring 4,341 tons.

Last year (1864) ten vessels, having an aggregate measurement of 5,850 tons. Seven are in course of construction this year; these will measure 3,600 tons.

The value of the yield of the fisheries in 1863 was \$51,635.

The articles exported from the four counties above mentioned are merchantable timber of various sorts, oats, potatoes and fish.

Richibucto, the county town, is a commercial town, possessing a good port.

A table is also attached, obtained from the Census of New Brunswick of 1861, as regards the four counties through which I travelled, shewing the total population of each county, the total number of acres of land, the number of acres in occupation, the number of acres under cultivation; the value of the products of the farm and of home manufactures; the value of the products of the fisheries; the number of men and horses disposable, and their respective wages.

I think that if the works on the Intercolonial Railway were begun, nearly one half as many men more than are mentioned above and in the table attached could be obtained.

Having given the preceding details, I take the liberty of offering some remarks respecting the *lines* in contemplation for the Intercolonial Railway.

In my humble opinion, in order that the Provinces may derive the greatest possible advantage from the construction of the Intercolonial Railway, three objects should be kept in view in the selection of the line to be adopted; first as a military road; secondly as to cost of construction and maintenance; thirdly as to the interests of colonization.

The southern line from its proximity to the American frontier is considered to be impracticable for a military road.

The Central line is a little further removed from the American frontier than the Southern line, but not however sufficiently so.

If this line is considered with respect to the cost of construction and of the maintenance of the road, as well as with respect to colonization, it is found to be impracticable, because over a distance of nearly sixty miles this line is to pass across mountains, through which cuttings must be made, and over ravines which will have to be filled up.

In these cuttings, which will be some dozens of feet in depth, considerable quantities of snow will accumulate, and if a train should be caught in the midst of these deep gorges by a snow storm, it might be delayed for several days, and possibly until assistance could be sent from one extremity or other of the road.

In such a case what could travellers, or even the employes on the road, do in an

uninhabited and uninhabitable country? They would be exposed to perish from cold and hunger, unless the Government should pay a certain number of men to reside upon the road, and should supply them with a depôt of provisions wherewith to assist travellers who might be stopped on the road by stress of weather.

Besides by this line (the central) the peninsula of Gaspé, comprising the three great counties of Rimouski, Gaspé and Bonaventure, and the fisheries of the River St. Lawrence which extend from Matane to Gaspé, and from thence along the whole coast of the Gulf, as well as along both shores of the Bay of Chaleurs, would be deprived of the advantages conferred by this great route of communication.

The northern or Major Robinson's line descends nearly parallel to the River St. Lawrence from River du Loup to Metis. Along the whole course the line passes in rear of the populous and fertile parishes of Isle Verte, Trois Pistoles, St. Simon, St. Fabien, Bic, Rimouski, St. Luce and St. Flavie.

From Metis the line crosses the peninsula of Gaspé by the Metapediac Valley, which it follows as far as the point where the river of that name falls into the River Restigouche, which there constitutes the boundary line between Canada and New Brunswick.

Of this whole distance (from River du Loup to Ristigouche) which is about 160 miles, about 100 miles are inhabited; on the remainder, there are posts in the vicinity, within, at the most, two leagues of each other; and so soon as the construction of the Railway by this line shall have been decided upon, there is no doubt that all the lands in the vicinity will be promptly settled upon, because those lands are nearly all adapted for cultivation, being generally good, and, in some places, very fertile.

About half a mile below the outlet of the Metapediac river into the Ristigouche river the line crosses the latter, and passes through the counties of Ristigouche, Northumberland, Gloucester, Kent, and Westmoreland in New Brunswick.

These five counties adjoin the Bay of Chaleurs and the Gulf of St. Lawrence; fish abounds on their coasts, but principally in the counties of Gloucester, Northumberland, and Kent.

The report of Mr. Fleming, the engineer appointed by the Government in 1863, not having been yet published, I am not acquainted with the conclusions at which he has arrived, but I am firmly convinced that Mr. Fleming, although he did not think it expedient to allow the exploration of that part of the line from lake Metapediac to the Metis river, a distance of about 24 miles and the only place where any difficulties are encountered, to be completed, will recommend this line in view of the fact that it offers more advantages than the others in every respect.

I am almost certain that in the 24 miles to which I have just alluded, a good line for a railway may, without much difficulty (and with a little good will) be found.

The whole humbly submitted.

I have the honor to be, Sir,
Your obedient servant,
JOSEPH ROSA.

INTERCOLONIAL RAILWAY.

RAILWAY OFFICE,

Halifax, Nova Scotia, June 14th, 1867.

The Honorable Charles Tupper, &c., &c.

SIR.—In reply to your enquiries respecting the steps which, with the view of facilitating the work, might at once be taken without incurring any considerable expense.

It is of course of great importance to take advantage, as far as practicable, of the present summer. Certain operations can only be done advantageously, if at all, during summer, and if these are neglected until the close of the season, one year may almost be considered lost.

When the route of the Railway remains undecided, it would not be possible to do much beyond gaining additional information by means of surveys and explorations.

I have always urged that a liberal expenditure in this way is true economy; a few hundred dollars judiciously laid out with the view of discovering the very best engineering location which the country will afford (it does not signify on what route), may save hundreds of thousands in construction and maintenance.

If, however, the general route of the proposed Railway is likely to be established at an early day (I mean through New Brunswick, where several routes are advocated), it may not be advisable to incur any great expenditure in this service. The question of route, however, need not postpone operations on that section of the line between Truro and Moncton. The surveys made under authority, by me in 1864 and 1865, and reported on last year, afford sufficient information, and they indicate very plainly the proper route for the Railway from Truro northerly, at least as far as Amherst, near the New Brunswick boundary.

The general plan of these surveys, and the report which accompanied them, dated May 1st, 1866, I have had copied to accompany this. The line tinted red on the plan in the one referred to in the report, as that which, taking everything into consideration, appears entitled to the preference. And on the general direction of this line there is nothing to prevent the location of the Railway being proceeded with at any time.

A location survey is the first thing necessary before work of any description can be done, indeed, the line should be finally located and staked out on the ground, before tenders are received or contracts let.

The next operation after the location survey is made is to clear the line of the standing timber through the wooded districts. This can only be done effectually in summer. The clearing is but a trifling portion of the cost of construction, yet it is indispensable, and must be completed in advance of other work.

It would be highly advisable, therefore, to get this done during the present summer. A comparatively small sum, about \$30,000, expended at the rate of say \$8,000 per month, would probably do the whole clearing of the line between Truro and Moncton.

The line located between Truro and Moncton, and cleared of the standing timber at the proper season might, at any convenient time hereafter, be placed under contract for the execution of the excavation, bridging and embanking, which works could be proceeded with without difficulty at a later season of the year.

The same remarks will apply to that portion of the Intercolonial Railway extending east from Rivière du Loup to Rivière Trois Pistoles. This section is some 25 miles in length, and is common to all the main routes through New Brunswick, known as the Central Bay of Chaleur or North Shore routes.

It would also be of very considerable importance to have this common portion located and cleared during the summer season.

I have the honor to be, &c., &c.,

Your obedient servant,

SANDFORD W. FLEMING,

Civil Engineer

(Copy of No. 3.)

RAILWAY OFFICE,
Halifax, Nova Scotia, June 17th, 1867.

MY DEAR SIR,—In my letter to you of the 14th instant, touching the Intercolonial Railway, and the steps advised to be taken forthwith, I forgot to observe, although I dare say it does not matter much as you [will see the omission, that the proposed immediate expenditure should be done by some one acting as it were as agent for the Government, taking vouchers and keeping an exact account, the expenditure to be embraced in the regular contracts whenever they are entered into. I mean that the contractor or contractors should be made to assume the expenditure now proposed to be made irregularly.

The English steamer is in this morning, and I thought I would just drop you this.

The steamer has come in sooner than I expected. I cannot leave before I go to Pictou and make necessary arrangements. Should you wish me to follow you to Ottawa, I shall be ready on receipt of a telegram.

Yours truly,
(Signed,)

SANDFORD FLEMING.

The Hon. Charles Tupper.

(Copy, No. 6.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 3rd July, 1867.

MEMORANDUM.—The undersigned has the honor to report, for the information of Your Excellency, that the Government of Nova Scotia caused a detailed exploration of the country lying between Truro and the boundary line of Nova Scotia and New Brunswick, near Amherst, to be made, with a view to selecting the best site for the proposed Inter-colonial Railway.

That, in May 1866, Mr. Sandford Fleming, the engineer employed to make this survey, reported that he had examined all the practicable railway lines between these two points, and recommended one of the explored lines as preferable in its main features to the others.

That the neck of land on which Amherst is situated is comparatively so narrow, bounded as it is, on the north by the Gulf of St. Lawrence, and on the south by the head

waters of the Bay of Fundy, that the proposed Intercolonial line of Railway, at this point, cannot be deviated from more than a few miles either to the south or to the north.

That Mr. Fleming has also recorded his opinion that the summer is the best time to locate and fix the site of railways, and of the various structures connected with them.

The undersigned would therefore recommend that he be authorized to employ such engineers and surveying parties as may be necessary to locate so much of the Intercolonial Railway, extending from Truro to the neighbourhood of Amherst, as may not be affected by the adoption of any of the proposed lines for the Intercolonial Railway through the Provinces of New Brunswick and Quebec, with instructions to adopt the most eligible line, giving due weight to the cost of construction, cost of future working and management, and also of general interest.

Respectfully submitted,
(Signed),

WM. McDUGALL,
Minister P. W.

(Copy of No. 4.)

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council, 3rd July, 1867.

On a memorandum dated July 3rd, 1867, from the Honorable the Minister of Public Works, stating that the Government of Nova Scotia caused a detailed exploration of the country lying between Truro and the boundary line of Nova Scotia and New Brunswick, near Amherst, to be made, with a view of selecting the best site for the Intercolonial Railway.

That in May, 1866, Mr. Sandford Fleming, the engineer employed to make this survey, reported that he had examined all the practicable Railway lines between these two points, and recommended one of the explored lines as preferable in its main features to the others.

That the neck of land on which Amherst is situated is comparatively so narrow, bounded as it is on the north by the Gulf of St. Lawrence, and on the south by the head waters of the Bay of Fundy, that the proposed Intercolonial line of railway at this point cannot be deviated from more than a few miles either to the south or the north.

That Mr. Fleming has also recorded his opinion that the summer is the best time to locate and to fix the site of railways and the various structures connected with them.

That the Minister of Public Works would therefore recommend that he be authorized to employ such engineers and surveying parties as may be necessary to locate so much of the Intercolonial Railway extending from Truro to the neighborhood of Amherst, as may not be affected by the adoption of any of the proposed lines for the Intercolonial Railway, through the Provinces of New Brunswick and Quebec, with instructions to adopt the most eligible line, giving due weight to the cost of construction, cost of future working and management, and also of general interest.

The Committee submit the recommendation of the Minister of Public Works for Your Excellency's approval.

Certified.

(Signed),

WM. H. LEE,
Clerk Privy Council.

Ref. No. 101.

Lib. 964.

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 8th July, 1867.

SIR,—I am directed by the Honorable the Minister of Public Works, to inform you, that he has obtained authority, by Order in Council, to locate and fix the site (according to the terms of said Order in Council) "of so much of the Intercolonial Railway, extending from Truro to the neighbourhood of Amherst, as may not be affected by the adoption of any of the proposed lines for the Intercolonial Railway through the Provinces of New

Brunswick and Quebec;" and "to adopt the most eligible line, giving due weight to the cost of construction, cost of future working and management, and also of general interest."

I am also to inform you that the Minister of Public Works has had under consideration your report of this Division of the Intercolonial line, dated the 1st day of May last, and addressed to the Government of Nova Scotia, and he now wishes to be informed whether you will accept the duty of locating this portion of the line.

In the event of your acceptance, you will be pleased to inform me of the same, by telegraph, and you will commence the work at your earliest convenience, selecting the most eligible line, and conforming to the terms of the Order in Council, above cited.

You will be pleased, also, to forward to the Department an estimate of the probable amount required to perform this service; and, in the meantime, you are hereby authorized to spend the sum of \$3,000 (three thousand dollars) on this survey.

You will be good enough to return your pay list according to the enclosed printed form, and forward the address to which moneys may be remitted for you.

I have the honor to be, sir,

Your obedient servant,

(Signed,)

F. BRAUN,

Secretary.

Sandford Fleming, Esq.,
Engineer, Halifax, N. S.

SAINT ANDREWS, N. B.,
July 8, 1867.

To Hon. Wm. McDougall,
Minister of Public Works, &c.

SIR,—I have this morning read a letter addressed to you by Mr. J. W. Lawrence of St. John, on the subject of the Intercolonial Railway Route, and published in the *Saint John Globe* of the 6th inst., and as Mr. Lawrence has made reference therein to an estimate of mine for the Western Route at \$33,400 per mile, I beg to place you in immediate possession of the printed paper in which that estimate appears, being a review of mine upon the three routes, Northern, Central, and Western, which I enclosed, together with a traced plan, I have recently prepared for the purpose of showing the border-population upon the frontier route, in portions of the State of Maine and New Brunswick.

I had occasion lately to communicate with the Editor of the *Montreal Trade Review and Intercolonial Journal of Commerce* upon the same subject, and in reply to an article which appeared in his issue of the 14th inst. over the initials N. B., I trust I will be excused if I place a few of my remarks to him before you now, as I think they will strengthen those already submitted by Mr. Lawrence.

"I notice in the articles above referred to that the writer infers from all that has come to his knowledge that one of the central routes will be adopted: in this section of the province, fear is apprehended that the North Shore route will be favored, and have more influential advocates in the General Government than any other more favorable line. The writer goes on to say that the central is best calculated to advance the interests of New Brunswick, and that it will open up the country for settlement, of the magnificence of which few have an accurate idea. Now, I presume Mr. Fleming, who made the late surveys, has a pretty accurate idea of the central country; and what does he say? Again, it is a much longer line to build than the frontier, 340 to 208 miles; and, if it should ever open up the country, how many years will elapse before it is settled with 80,000 people?"

"That the Central and North Shore routes cannot be made to pay as a commercial speculation, I have no doubt, the small number of inhabitants per mile, the cost per mile and in the aggregate, and the great disadvantages and obstacles opposed as winter roads, seem, when properly considered, to convince one of this fact. The engineering difficulties are admittedly greater, and so would be the course of construction, as contractors would have to cut roads of great length, and from them, from the present turnpikes to the works for the haulage of materials and provisions. There would also be the great danger of destructive fires in the woods during summers, which could not possibly escape when so many laborers' shanties would be interspersed along the line; this I have experienced

during the construction of the New Brunswick and Canada Railway, when Chief Engineer of that road."

"N. B. further says the road bed should be as substantial as possible, and the gradients and curves as easy as can be conveniently obtained. The road bed of the frontier line can, of course, be made as substantial as that of the Grand Trunk or Nova Scotia Railway, while in the matter of grades and curves it will have an unquestionable superiority over the Central, as you will perceive by my extracts from Mr. Fleming's report.

"The most important advantage however, offered to Canada, east of Montreal by the frontier line is the choice of two sea-ports, St. John and St. Andrews, both *open Winter Ports*, and while that of St. John will, on the completion of the Windsor and Anapolis Railway in Nova Scotia be ninety miles nearer Halifax by this road than round by Moncton and Truro, the port of St. Andrews would be forty miles nearer the salt water, and is sixty miles lower down the Bay of Fundy than St. John.

"Another important consideration is the probable time of construction of the road. Interest at the rate of four per centum per annum has to be paid on three millions of pounds sterling, being equal to £120,000 per annum. Whatever number of years it may take to construct the North Shore or Central route, it is certain it will occupy two years less time to build the frontier. Here, then, a great saving is effected, which must be placed to the credit of the road, and would go a long way towards the equipping with Rolling Stock, &c., or otherwise assisting in developing your grand canal projects."

I have nothing more to add than to say that I have been authorised to proceed up the St. John river to the Madawaska to obtain such information on both sides of the boundary line and river as will eventually serve to show that the frontier line in the Canada and New Brunswick division will be the best commercial undertaking.

I remain,

Your obedient servant,

(Signed)

WALTER M. BUCK.

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 19th July, 1867.

GENTLEMEN,—I have the honor to acknowledge the receipt of your letter of the 13th inst, offering to supply Portland cement, manufactured in London, England, for the use of the Intercolonial Railway; and I am to inform you that the same will be laid before the Commissioner.

I have the honor to be,

Gentlemen,

Your obedient servant,

(Signed,)

F. BRAUN,

Secretary.

Messrs. Sewell & Gairdner,
Commission Brokers, &c., Montreal.

(Copy of No. 9.)

To His Excellency the Right Honorable CHARLES STANLEY, Viscount MONCK, Baron MONCK of Ballytrammon in the County of Wexford in the Peerage of the United Kingdom of Great Britain and Ireland, Governor General of the Dominion of Canada, &c., and Vice Admiral of the same, &c.

MAY IT PLEASE YOUR EXCELLENCY :

We the inhabitants of the City of Quebec and the Town of Lévis, in the District of Quebec, beg leave respectfully to approach Your Excellency, gratefully to acknowledge the paternal liberality of Her Most Gracious Majesty's Imperial Government, in having passed the Act 30th Vic., chap. 16, being "An Act for authorizing a Guarantee of Interest on a Loan to be raised by Canada towards the construction of a Railway connecting Quebec and Halifax."

Your Memorialists relying on the justice, as well as the judgment of Your Excel-

lency and Her Majesty's other Imperial advisers, point with confidence to the enactments of the above-named law, which among other things provides "For the use of the Railway at all times for Her Majesty's Military and other services;" as well for the approval of one of Her Majesty's Principal Secretaries of State, of the in which the Railway is to be constructed, respectfully represent:

That Your Memorialists have heard with astonishment of the proposal of certain unpatriotic and selfish individuals to fix the terminus of the proposed Railway at the Chaudière Junction, or at some other point distant from Quebec, indifferent alike to the national or commercial consequences.

That in a national point of view, the determination of Her Majesty's Government to connect the two military and naval strongholds of Quebec and Halifax, for purposes of protection and defence, are unmistakeably foreshadowed in the above-named Act, as well as by the surveys and report of Major Robinson on behalf of Her Majesty's Government, published on the 31st August, 1848, wherein the termini are fixed at Point Lévis, opposite Quebec, and Halifax, Nova Scotia, respectively.

That by Major Robinson's survey and report, an easy and accessible grade is obtained from the beach at Lévis, where the terminus is fixed by that plan, running north of the Church of St. Joseph, in the direction of Rivière du Loup, and under the cover and protection of the guns of the fortifications of Quebec and Lévis.

That in a commercial point of view, the importance of a terminus at Lévis to connect with the present termini of the Grand Trunk Railroad, westward, cannot be overlooked, inasmuch as stores and provisions are essential to protection and defence as men and munitions of war: and a safe terminus at Lévis (which must ultimately as a necessity of the times be connected with Quebec by a submerged tubular or other bridge) will make the two cities commercially one, as the forts and defences, in course of erection, have already made them in a national point of view, and must lead to the erection of extensive stores and warehouses for produce, flour, grain, provisions, &c., and add greatly to the wealth and prosperity of both Quebec and Lévis.

Wherefore Your Memorialists humbly pray that Your Excellency will take the premises into your serious consideration, and adopt such action as may seem best to you, to bring this subject under the notice of one of Her Majesty's principal Secretaries of State, as well as to secure a safe and defensible terminus at Lévis, according to the plan and survey of the late Major Robinson.

And Your Memorialists as in duty bound will ever pray.

(Signed,) LOUIS CARRIER,
Mayor.

(Signed,) LÉON ROY,
Secretary.

Town of Lévis, 11th July, 1867.

(Copy No. 680.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 24th September, 1867.

SIR,—The Chairman of the Intercolonial Iron and Steel Company of Nova Scotia, has placed in my hands a copy of a correspondence which has recently passed between Mr. E. A. Jones, Manager of the Works of that Company, and yourself,—on the subject of the proposed route of the Intercolonial Railway from Truro to Amherst.

The Chairman of the Company has also addressed me directly on the subject, in a communication bearing date "Halifax, 5th September, 1867,"—a copy of which, he informed me, has been placed in your hands.

Some of the reasons given in this correspondence for preferring the line A to the line F (as designated in your map) appear to me to deserve careful consideration, and I have therefore to request you, before you incur any large expenditure in the location of the "Fally" or A line, to report to this Department on the question raised by the correspondence referred to.

Your general instructions to locate the line between Truro and Amherst, of July last, directed your attention to four points—

- 1st. The most eligible line, giving due weight to—
- 2nd. The cost of construction.
- 3rd. Cost of future working and management.
- 4th. The general interests of the country.

It may be desirable to consider the question also in view of—

- 1st. The local traffic likely to be obtained by these lines respectively.
- 2nd. The development of natural sources of wealth in the vicinity of these lines respectively by reason of their construction.

Until your report has been submitted to the Government, and one line or the other approved, I desire that your operations may take the form of a preliminary survey, rather than that of a final selection of the line.

I have the honor to be, Sir,

Your obedient servant,

(Signed,)

W. M. McDougall,

Minister P. W.

Sandford Fleming, Esq.,

Engineer, Halifax, N. S.

(Copy of No. 20.)

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council, on the 14th October, 1867.

On a Memorandum dated 10th instant, from the Hon. the Minister of Public Works, representing that it has come to his knowledge that under a Contract with the late Government of New Brunswick, certain parties are now and have been since the 1st of July, grading and constructing a line of Railway between Monctown and Sackville, in New Brunswick, with a view to its forming part of the Intercolonial Line through that Province.

That he is advised that it is at least doubtful that either the location of this work, or the manner or cost of its construction will be found to be such as to justify the General Government in recognizing or adopting it, as a part of the Intercolonial Railway, and recommending that the Government of New Brunswick be formally notified that this work will not be recognized or adopted by the Government of the Dominion as a part of the Intercolonial Railway, unless it is found to be in respect of its location, manner of construction and cost, suitable for the purpose, and therefore that the work is and must continue to be at the sole cost and risk of the Province of New Brunswick.

The Committee submit the recommendation of the Minister of Public Works for your Excellency's approval.

Certified,

(Signed,)

W. H. LEE,

OTTAWA, 5th October, 1867.

(By Telegraph from Halifax.)

To Hon. W. McDougall,
Minister of Public Works.

Received this evening your letter of September twenty-fourth (24th). The points named have been carefully considered. The location of line F is far advanced. I have five (5) strong parties engaged to complete the service before winter. The chief expenditure is already incurred. Pray confer with Messrs. Archibald and Tupper, now in Ottawa, who understand the question, and instruct me.

SANDFORD FLEMING.

(Copy of No. 27.)

HALIFAX, 22nd October, 1867.

The Hon. Wm. McDougall, C.B.,
Minister of Public Works, Canada.

SIR,—I had the honor, on the 5th of this month, to receive your letter, dated September 28th, respecting the location survey of the Intercolonial Railway through Nova Scotia. I immediately telegraphed you on the subject, and, on the 15th instant, you directed me (by telegraph) to proceed as originally intended with the service, and to see the Honorable Mr. Archibald on his return to Nova Scotia, and ascertain from him the wishes of the Government.

The Honorable Mr. Archibald has now returned to Nova Scotia, and I have learned from him your views and the wishes of the Government. In accordance therewith, and your directions by telegraph on the 15th instant, I am now prosecuting the location survey on what is known as Line F.

The survey will not be completed as early as I expected, owing to difficulties which I need not now refer to, but no time will be lost in completing the service you were pleased to place in my hands.

Upon its completion I shall report on the subject.

I have the honor to be, Sir,

Your obedient servant,

(Signed,) SANDFORD FLEMING,

(Copy of No. 43.)

To His Excellency the Right Honorable Charles Stanley, Viscount Monck, Governor General of the Dominion of Canada, &c., &c., in Council :

The memorial of the undersigned, duly delegated to represent herein the inhabitants of the County of Bonaventure, in the District of Gaspé.

Humbly represents :

That at a public meeting of the inhabitants of the County of Bonaventure, held in the Court-hall of New Carlisle, on Monday the fourteenth day of October last, for the purpose of taking into consideration the most practicable route to be selected for the Intercolonial Railway; convened by the High Sheriff of this County, pursuant to notice duly given and presided by him—George A. Corbin, Esquire, acting as Secretary. The following resolutions were unanimously adopted :

Considering that in virtue of the Confederation Act, the House of Commons will shortly be called upon to select the route to be adopted for the Intercolonial Railway, it is important for all the United Provinces that the line should be chosen which is best adapted to promote the military defense of this Dominion as well as the interests of commerce, colonization and the different branches of industry.

That the North Shore route is the only one that can safely be depended upon for the construction of a railway in a military point of view.

That the construction of the railway by the Central route will entail much more expense than the Northern route—that the Central route will offer no advantages to the local trade and very little to the through traffic. That the Central route cannot be made to pay working expenses. That the travelling public will be more exposed by that route than by the Northern route. That the adoption of the Central route would give to New Brunswick an undue advantage by passing almost entirely on its territory, to the detriment of Upper and Lower Canada, which, nevertheless, must contribute the largest share of the costs of the building and keeping it in repair.

That the Northern route by the Baie des Chaleurs being the only safe and effective military route, would offer to each Province an equal share of the advantages to be derived from the railway. That by the Northern route the railway would serve a very active local traffic, the whole way through the fisheries of the Gulf of St. Lawrence and Baie des Chaleurs, and would offer in the latter points of junction with the transatlantic vessels during the season of navigation, and even during the greater part of winter; and conse-

quently secure to the trade of the West a shorter and easier road than any in the United States. That the Northern route, with a harbor at Shippegan or at Paspediae in Baie des Chaleurs would for mail and travellers be the shortest route that can be established between the Continent and Europe.

That inasmuch as the Central route must traverse an uncultivated and mountainous country where snow accumulates to great depth, the railway could be of no avail for several months in the year.

That the Major Robinson route can be shortened and made easier, to build from Rivière du Loup to the Ristigouche by taking the land a little below Rivière du Loup and reaching the valley of the Metapediae about half-way between the St. Lawrence and the Ristigouche.

That snow can be no objection to the Northern route, as less snow and less drifts are to be found in the valley of the Metapediae than in any other part of Lower Canada.

That it is to be regretted that Mr. Fleming, the engineer appointed to survey the different lines, did not complete his survey of the Northern route by the Valley of the Metapediae, in as much as he had done so, he could not have failed to report in favor of that route in preference to another.

Your Memorialists therefore humbly pray that Your Excellency may be pleased to take the premises foregoing into consideration, and do therein as to Your Excellency in his wisdom may seem meet, and as may conduce to the public interest and of this Dominion in particular.

And, as in duty bound, Your Excellency's Memorialists shall ever pray.

(Signed,) M. SARPPARD,
Sheriff, Delegate.

“ GEORGE A. CORBIN,
Secretary, Delegate.

District of Gaspé, County of Bonaventure,
New Carlisle, 6th November, 1867.

COPY of a Report of a Committee of the Honorable the Executive Council, approved by His Excellency the Governor General in Council, on the 14th August, 1865.

The Committee of Council have had under consideration the Despatch (No. 120) of Her Majesty's Secretary of State for the Colonies, dated 22nd July, 1865, suggesting the propriety of some more positive assurance being given by the Government of Canada to the Maritime Provinces, on the subject of the readiness of Canada to ensure the prompt completion of the Intercolonial Railway in the event of Confederation of all the British North American Provinces being accomplished.

The Committee can only reiterate the declarations of the Government and Parliament of Canada, that they regard the construction of the Intercolonial Railway as a necessary accompaniment and condition of Confederation, and that not a day will be unnecessarily lost after the accomplishment of Confederation in commencing the work and prosecuting it to completion.

Certified.

R E T U R N

To an Address of the House of Commons, dated 22nd November, 1867; for Correspondence between the Government of Canada and the Principal Secretary of State for the Colonies upon the Subject of the Terminus of the Railway connecting Quebec and Halifax.

By Command.

HECTOR L. LANGEVIN,

Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE,

Ottawa, 2nd December, 1867.

Lord Monck to the Duke of Buckingham and Chandos.

(Copy.)

OTTAWA, July 15, 1867.

MY LORD DUKE,—I have the honor to transmit Copy of a Memorial which has been presented to me by a large and influential deputation from the City of Quebec and Town of Levis, respecting the site for the terminus of the proposed Railway from Quebec to Halifax, in this neighborhood.

I have informed the deputation that I would transmit their Memorial to Your Grace, but I told them, at the same time, that in all the negotiations with regard to the Intercolonial Railway, the section of the line between Quebec and River du Loup was treated as completed, and that I did not apprehend that any part of the money guaranteed by the Imperial Government, would be expended on that portion of the line.

I also told them that I felt sure that Her Majesty's Government would insist on such arrangements with reference to Stations and otherwise as would make the line most suitable for military purposes, but that subject to such considerations, I thought that those who might undertake the construction of the road would be left free to adopt whatever course might commend itself to their approval on ordinary commercial grounds.

I have, &c.,

(Signed,) MONCK.

His Grace the Duke of Buckingham and Chandos,
&c., &c., &c.

(Copy.)

To His Excellency the Right Honorable CHARLES STANLEY Viscount MONCK, Baron MONCK of Ballytrammon, in the County of Wexford, in the Peerage of the United Kingdom of Great Britain and Ireland, Governor General of the Dominion of Canada, and Vice-Admiral of the same, &c.

MAY IT PLEASE YOUR EXCELLENCY :

We, the inhabitants of the City of Quebec and the Town of Levis, in the District of Quebec, beg leave respectfully to approach Your Excellency, gratefully to acknowledge the paternal liberality of Her Most Gracious Majesty's Imperial Government, in having

passed the Act 30th Vic., chap. 16th, being an Act for authorizing a guarantee of interest on a loan to be raised by Canada towards the construction of a Railway connecting Quebec and Halifax.

Your memorialists, relying on the justice as well as the judgment of Your Excellency and Her Majesty's other imperial advisers, point with confidence to the enactments of the abovenamed law, which among other things provides "For the use of the Railway at all times for Her Majesty's Military and other service," as well for the approval of one of Her Majesty's Principal Secretaries of State, of the line to be adopted for the said Railway, respectfully represent, That your memorialists have heard with astonishment of the proposal of certain unpatriotic and selfish individuals to fix the terminus of the proposed Railway at the Chaudière Junction, or at some other point distant from Quebec, indifferent alike to the national or commercial consequences.

That in a national point of view, the determination of Her Majesty's Government to connect the two military and naval strongholds of Quebec and Halifax, for purposes of protection and defence are unmistakably foreshadowed in the abovenamed Act, as well as by the surveys and report of Major Robinson on behalf of Her Majesty's Government, published on the 31st August, 1848; wherein the termini are fixed at Point Levis, opposite Quebec, and at Halifax, Nova Scotia, respectively.

That, by Major Robinson's survey and report, an easy and accessible grade is obtained from the beach at Levis, where the terminus is fixed by that plan, running north of the Church of St. Joseph, in the direction of River du Loup, and under the cover and protection of the guns of the fortifications of Quebec and Levis.

That, in a commercial point of view, the importance of a terminus at Levis to connect with the present terminus of the Grand Trunk Railroad, westward, cannot be overlooked, inasmuch as stores and provisions are as essential to protection and defence as men and munitions of war; and a safe terminus at Levis (which must ultimately, as a necessity of the times, be connected with Quebec by a submerged tubular or other bridge) will make the two cities commercially one, as the forts and defences in course of erection, have already made them in a national point of view, and must lead to the erection of extensive stores and warehouses for produce, flour, grain, provisions, &c., and add greatly to the wealth and prosperity of both Quebec and Levis.

Wherefore your memorialists humbly pray that your Excellency will take the premises into your serious consideration, and adopt such action as may seem best to you to bring this subject under the notice of one of Her Majesty's Principal Secretaries of State, as well as to secure a safe and defensible terminus at Levis, according to the plan and survey of the late Major Robinson.

And your memorialists, as in duty bound, will ever pray.

(Signed,)

LOUIS CARRIER,

Mayor.

(Signed,)

LÉON ROY,

Secretary.

Town of LEVIS, 11th July, 1867.

The Duke of BUCKINGHAM to Lord MONCK.

R E T U R N

To an Address of the House of Commons, dated 16th March, 1868;
For Names of Engineers appointed in connection with the Inter-
colonial Railway, and Instructions issued with regard to Survey
of Route, or other matters, to such Engineers.

By Command.

HECTOR L. LANGEVIN,
Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE,
Ottawa, 16th March, 1868.

(No. 133.)

OTTAWA, March 26th, 1868.

SIR,—I have the honor to transmit the accompanying Return, called for by an Address of the House of Commons, dated the 16th instant, and by your letter of the 18th instant, of all Reports, Documents, Instructions, &c., relating to the Intercolonial Railway, of record in this Department.

The Address is returned herewith.

I have the honor to be, Sir,

Your obedient servant,

F. BRAUN,
Secretary.

The Honorable the Secretary of State, &c., &c., &c.,
Ottawa.

(Copy of No. 3.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 8th July, 1867.

SIR,—I am directed by the Honorable the Minister of Public Works to inform you that he has obtained authority, by Order in Council, to locate and fix the site (according to the terms of the said Order in Council) "of so much of the Intercolonial Railway, extending from Truro to the neighborhood of Amherst, as may not be affected by the adoption of any of the proposed lines for the Intercolonial Railway through the Provinces of New Brunswick and Quebec"; and "to adopt the most eligible line, giving due weight to the cost of construction, cost of future working and management, and also of general interest."

I am also to inform you that the Minister of Public Works has had under consideration your Report of this division of the Intercolonial line, dated the 1st day of May last, and addressed to the Government of Nova Scotia,—and now wishes to be informed whether you will accept the duty of locating this portion of the line.

In the event of your acceptance, you will be pleased to inform me of the same by telegraph, and you will commence the work at your earliest convenience—selecting the most eligible line, and conforming to the terms of the Order in Council above cited.

You will be pleased also to forward to the Department an estimate of the probable

amount required to perform this service, and in the meantime you are hereby authorized to expend the sum of \$3,000 on this survey.

You will be good enough to return your payroll according to the enclosed printed form, and to forward the address to which moneys may be remitted for you.

I have the honor to be, Sir,
Your obdt. servant,
(Signed,)

F. BRAUN,
Secretary.

Sandford Fleming, Esq., Engineer,
Halifax, N. S.

(Copy of No. 9.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 24th Sept., 1867.

SIR,—The Chairman of the Intercolonial Iron and Steel Co. of Nova Scotia has placed in my hands a copy of a correspondence which has recently passed between Mr. E. A. Jones, Manager of the Works of that Company and yourself, on the subject of the proposed route of the Intercolonial Railway from Truro to Amherst.

The Chairman of the Company has also addressed me directly on the subject, in a communication bearing date "Halifax, 5th Sept., 1867," a copy of which, he informed me, has been placed in your hands.

Some of the reasons given in this correspondence for preferring the line A to the line F (as designated on your map) appear to me to deserve careful consideration; and I have, therefore, to request you, before you incur any large expenditure in the location of the "Folly" or A line, to report to this Department, on the question raised by the correspondence referred to.

Your general instructions to locate the line between Truro and Amherst, of July last, directed your attention to four points:—

- 1st. The most eligible line
(Giving due weight to)
- 2nd. Cost of construction,
- 3rd. Cost of future working and management,
- 4th. The general interests of the country.

It may be desirable to consider the question in view:—

- 1st. The local traffic likely to be obtained by these lines respectively.
- 2nd. The development of natural sources of wealth in the vicinity of these lines respectively by reason of their construction.

Until your report has been submitted to the Government, and one line or the other approved, I desire that your operations may take the form of a preliminary Survey, rather than that of a final selection of the line.

I have the honor to be, Sir,
Your obedient servant,
(Signed,) WILLIAM McDUGALL,
Minister Public Works.

Sandford Fleming, Esq., Engineer,
Halifax, N. S.

(Copy of No. 13.)

(By Telegraph.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 15th October, 1867.

See Mr. Archibald, he knows wishes of Government. As soon as your Report reaches me, will instruct. Meantime go on as you intended.

(Signed,) W. McDUGALL,
Minister of Public Works.

Sandford Fleming Esq., Engineer, Halifax.

(Copy of No. 63.)

NOVA SCOTIA AND NEW BRUNSWICK (INTERCOLONIAL) RAILWAY,
Ottawa, 6th December, 1867.

SIR,—My attention has been directed to a Report of a Committee of the Honorable Privy Council, dated 14th October, 1867, published in a Return to an Address of the House of Commons, for copies of Papers relating to the Intercolonial Railway. In this Report it is stated that you had submitted a Memorandum, representing that it had come to your knowledge that, under a contract with the late Government of New Brunswick, certain parties have now, and have been since the 1st of July, grading and constructing a line of Railway between Moncton and Sackville in New Brunswick with a view to its forming part of the Intercolonial Railway through that Province.

As the authorized agent of the parties alluded to, I beg permission to submit for your information, that the operations above mentioned were commenced early in June, 1866, after eight months had been previously spent in surveying, and that on the 1st of July last, upwards of six miles of grading were completed. Since this time the works have been continued, and fourteen miles of the line are now constructed, and all the permanent way provided.

It is further stated that you were advised "that it is at least doubtful that either the location of this work or the manner and cost of its construction, will be found to be such as to justify the general Government in recognizing or adopting it as a part of the Intercolonial Railway." Upon this question I have, as the Engineer of the line, most respectfully to offer the following observations:—

The works are constructed under contracts made in 1865, which prescribe that they "shall be equal in point of construction and efficiency, and similar in character to those of the Line in Nova Scotia from Halifax to Truro." The grades and curves of the Nova Scotia portion not to exceed those that may be found on that line; and in New Brunswick being limited by those shewn by J. E. Boyd Esq., (the Government Engineer,) in his official survey of this portion of the Road.

The contractors have not availed themselves of the latitude thus allowed them, but on the contrary have set out the line and formed the works in a manner that will make the Railway very superior in every respect to that portion of the "Intercolonial" between Halifax and Truro, where the traffic must necessarily always be more important, and which line has been conveniently worked for many years past. It is also made on the route prescribed by the contracts, and passes through the chief population and resources of the isthmus.

I have every confidence that the work executed, and to be completed, will be found on examination to merit your approval in every respect, and will bear a most favorable comparison with that of any Railway on this continent.

I have the honor to be, Sir,
Your most obedient Servant.

(Signed,) CHARLES H. GRANT.

The Honorable Wm. McDougall,
Minister of Public Works, &c., Canada.

NEW BRUNSWICK AND CANADA RAILWAY,
Manager's Office, St. Andrew's, 7th Feb., 1868.

MY DEAR SIR,—In the event of any part of this line forming a portion of the Intercolonial Railway, I can confidently state, that this Company will, whenever required, pass

resolutions expressing their willingness to render every facility in the passage over their line of all through freight and passengers.

And further, that they will pledge themselves that Troops will be passed over this Railway, or such part of it as may form a portion of the Intercolonial at precisely similar terms as those agreed to by the Companies owning the connecting lines in Canada and New Brunswick; if these Railway Companies agree to pass Troops free, this Company will do the same.

This Company will agree to be bound by clause (No. 26) in the Intercolonial Railway Act for the conveyance of Troops, which is very similar to the clause for the like purpose in our Act.

I remain, yours very truly,
(Signed,) HENRY OSBORN,
Manager.

To John Bolton, Esq., M.P.,
St. Stephens.

(Copy.)

WHEREAS, the construction of the Intercolonial Railway, by a Route the most economical, and presenting the highest commercial advantages, is a work much desired by the inhabitants of New Brunswick; it is therefore reasonable that the Fredericton Branch Railway Company should afford every facility in its power to aid the same.

Wherefore, *Resolved*, That the use of the Fredericton Branch Line be tendered to the Commissioners or Managers of the Intercolonial Railway, for the conveyance of passengers and traffic over the said Branch Line, as part of or in connection with the said Intercolonial, upon such terms and conditions, and at such rates as the Governor General in Council may from time to time prescribe and direct.

And further, *Resolved*, That the use of the Fredericton Branch Line be also tendered in like manner for the transmission of troops, munitions of war and stores, upon the same conditions and regulations as are provided by the Act respecting the construction of the Intercolonial Railway.

And further, *Resolved*, That this Company will, and they hereby pledge themselves to obtain all necessary legislation to carry out and secure to the Intercolonial Railway, the rights and privileges mentioned in the preceding resolutions.

And further, *Resolved*, That the President transmit a copy of the aforesaid Resolutions, under the seal of the Company, to the Honorable Charles Fisher, the Member for the House of Commons for this County, with a request that he will forward the same to the Privy Council for their consideration.

The foregoing Resolutions were unanimously adopted by the Directors of the Fredericton Branch Railway Company, at a special meeting held this sixth day of February, A.D., 1868.

(Signed,) JOHN RICHARDS,
Secretary.

(Signed,) THOMAS TEMPLE,
President.

(Copy.)

WOODSTOCK RAILWAY COMPANY,
Woodstock, N. B., 6th Feb., 1868.

A true Extract from
the Minutes.

At a Regular Meeting of the Board of Directors of the above Company, held this day, the following Resolutions were unanimously passed:—

Whereas, The Board of Directors of the Woodstock Railway Company, have reason to believe that strong efforts are being made to prejudice the minds of the Privy Council of the Dominion of Canada, against the selection of the Western Route for the Intercolo-

nial Railway. Among the reasons given they believe is, that unreasonable charges will be made for the conveyance of Her Majesty's Troops; therefore,

Resolved, That the Woodstock Railway Company agree to give free transit to Her Majesty's troops over the said Woodstock Railway, provided the Intercolonial connects with the Woodstock Road; and further,

Resolved, That these Resolutions be signed by the President and Secretary, and under seal of Company, be handed to Hon. Charles Connell, M.P., for the purpose of being transmitted to the Privy Council, or some Member thereof.

(Signed,)

JAMES WATTS,
Secretary.

(Signed,)

R. A. HAY,
President.

CHAPTER XLVIII.

An Act in addition to and amendment of an Act further to amend and extend the provisions of an Act, intituled, "An Act to incorporate the Saint Andrew's and Quebec Railway Company."—Passed 30th March, 1868.

Clause VI. And be it enacted, that whenever it shall be necessary to move any of the officers or soldiers of Her Majesty's forces of the line, ordnance, corps, marines, militia or police force, by the said St. Andrew's and Quebec Railway, or any of its branches, the directors thereof shall, and they are hereby required, to provide conveyance for the said military, marine and police forces respectively, with their baggage, stores, arms, ammunitions, and other necessaries and things, at such time or times, whether the same shall be the usual hour of starting trains or not, as shall be required or appointed by any officer duly authorized for that purpose, at such prices and upon such conditions as may from time to time be contracted for between the Secretary of War or some officer duly authorized for that purpose, and the said Company.

(Copy of 153.)

SAINT JOHN, February 14th, 1868.

To the Honorable Wm. McDougall, C.B.,
Minister of Works.

SIR,—I have the honor, on the behalf of the European and North American Railway Company for extension from St. John westward, to lay before you the following propositions:—

1st. In case the Government of the Dominion should, in fixing the route of the Intercolonial Railway, conclude to adopt the line from Quebec through the Maritime Provinces along the valley of the St. John, and to the west of the River St. John, so as to make a portion of the Road of this Company a part of the Intercolonial Railway, this Company would, without delay, proceed to build a bridge over the St. John River near the City of St. John, and connect their road with the line of Railway now extending from the City of St. John to Moncton.

2nd. This Company would also be prepared in that case to make such an arrangement with the Government of the Dominion, for the conveying troops and military stores as would be satisfactory to it and the Imperial Government, and in the same manner as is contemplated in the Imperial Acts in regard to the Intercolonial Railway, the same to be guaranteed by Legislative enactment if need be.

The Railway of this Company (now being rapidly pushed forward towards completion) will extend from the City of Saint John westward, to connect with the road from Saint Andrew's to Woodstock with a branch line extending to the City of Fredericton. By an arrangement of this kind being made, and the Intercolonial Railway being so built along the valley of the Saint John, not only would the shortest route be secured but a large portion of the railways in the Province of New Brunswick would be made to form part of this

great work, the whole of them made contributory to it, and the Intercolonial Railway be put through that portion of New Brunswick which would give to it the largest amount of traffic.

I am, &c.,
Your obedient servant,
(Signed,) C. A. SKINNEB,
Secretary to said Company.

(Copy of No. 147.)

OTTAWA, 21st February, 1868.

The Honorable Wm. McDougall, C.B.,
Minister of Public Works.

SIR,—I beg to submit plans and profiles of the location survey of that portion of the Intercolonial Railway between Truro and the Boundary Line of New Brunswick, which you authorized me to make by letter dated July 8th, 1867.

I also submit a summary of the disbursements made by me in the performance of this service, amounting in all to \$26,808.56, together with paylists in duplicate and statements in detail of all incidental expenses, with vouchers.

I beg to submit also an inventory of surveying and camping apparatus, and stores remaining on hand at the close of the survey, subject to your order.

I have the honor to be, Sir,
Your obedient servant,
(Signed,) SANDFORD FLEMING,
Civil Engineer.

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 27th February, 1868.

Acknowledging letter of 14th instant, from C. N. Skinner, Esq., Saint John, N. B.

(Signed,) F. BRAUN,
Secretary.

(Copy of No. 98½.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 6th March, 1868.

MEMORANDUM.—The Minister of Public Works has the honor to submit, for the consideration of Your Excellency in Council, the following recommendations on the subject of the Intercolonial Railway:—

Under the authority of an Order in Council, of the 3rd July last, he instructed Mr. Sandford Fleming, engineer, to make a location Survey of the line of the proposed Railway between Truro, in the Province of Nova Scotia, and Amherst, near the boundary of New Brunswick. Mr. Fleming has completed this survey, and reports he has found and located a line with easy gradients and curves, and presenting fewer engineering difficulties than the previous explorations through the Cobequid Mountains had indicated as likely to be encountered. He has also obtained additional and, in his opinion, sufficient information to enable him to report respecting an alternative line, proposed by the Acadian Iron Company, which takes a more westerly route and passes the present works of that Company.

The undersigned does not now recommend Your Excellency to approve of the line located and recommended by Mr. Fleming, but he is of opinion that a comparison of the respective merits of these lines will induce Your Excellency, when the question is properly submitted, to adopt the line located by Mr. Fleming.

From Amherst to the European and North American Railway, at or near Moncton, a distance of about 33 miles, has not yet been located under the authority of this Department. But under an Act of the Province of New Brunswick in the year 1865, a company was authorized to construct a Railway from Moncton to Sackville (near Amherst), and is now proceeding with the work.

The undersigned, in a report dated the 14th October last, called Your Excellency's attention to this contract, and recommended that the Government of New Brunswick should be informed that the line they had authorized might be found unsuited to form part of the Intercolonial Railway, and that they must therefore proceed with its construction at their own risk.

Under Your Excellency's authority, a notice to that effect was communicated to the New Brunswick Government, and the reply is herewith submitted, informing Your Excellency that the Government of that Province desires to transfer the contract and its liability to the Government of Canada, in the expectation that the work on this line may be found, as regards location and other conditions, suitable for the Intercolonial.

Before the undersigned can recommend Your Excellency to conclude arrangements of the kind proposed, he is of opinion that a careful examination of the line should be made by a competent Engineer, under instructions from this Department, in order to enable Your Excellency to determine whether the proposition of the Government of New Brunswick, that this line should form part of the Intercolonial, can be accepted.

The undersigned, therefore, respectfully recommends that he be authorized to order an examination and Survey as aforesaid, and that a sum of \$5,000 be placed at his disposal for that purpose.

(Signed,) WM. McDUGALL,
Minister of Public Works.

Privy Council.

(Copy of No. 192.)

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 10th March, 1868.

On a Memorandum dated 6th March, 1868, from the Honorable the Minister of Public Works, submitting for the consideration of Your Excellency in Council, that under

the authority of an Order in Council of the 3rd July last, he instructed Mr. Sandford Fleming, Engineer, to make a location survey of the line of the proposed Railway between Truro, in the Province of Nova Scotia, and Amherst, near the boundary of New Brunswick. Mr. Fleming has completed this Survey, and reports that he has found and located a line with easy gradients and curves, and presenting fewer engineering difficulties than the previous explorations through the Cobequid Mountains had indicated as likely to be encountered. That he has also obtained additional, and, in his opinion, sufficient information to enable him to report respecting an alternative line, proposed by the Acadian Iron Company, which takes a more westerly route and passes the present works of the Company.

The Minister states that he does not recommend Your Excellency to approve now of the line located and recommended by Mr. Fleming, but he is of opinion that a comparison of the respective merits of these lines will induce Your Excellency, when the question is finally submitted, to adopt the line located by Mr. Fleming.

That from Amherst to the European and North American Railway at or near Moncton, a distance of about 33 miles, has not yet been located under the authority of his Department. But that under an Act of the Legislature of the Province of New Brunswick, in the year 1865, a Company was authorized to construct a Railway from Moncton to Sackville (near Amherst), and is now proceeding with the work. That in a Report, dated the 14th October last, he called Your Excellency's attention to this contract, and recommended that the Government of New Brunswick should be informed that the line they had authorized might be found unsuited to form part of the Intercolonial Railway, and that they must therefore proceed with its construction at their own risk. That under Your Excellency's authority a notice to that effect was communicated to the New Brunswick Government, and the reply (which he submits) informing Your Excellency that the Government of that Province desires to transfer the contract and its liabilities to the Government of Canada, in the expectation that the works on this line may be found, as regards location and other conditions, suitable for the Intercolonial.

That before he can recommend Your Excellency to conclude an arrangement of the kind proposed, he is of opinion that a careful examination of the line should be made by a competent Engineer, under instructions from his department, in order to enable Your Excellency in Council to determine whether the proposition of the Government of New Brunswick, that this line should form part of the Intercolonial, can be accepted.

He therefore recommends that he be authorized to order an examination and survey as aforesaid, and that a sum of \$5,000 be placed at his disposal for that purpose.

The Committee advise that the authority requested be granted, and the sum of \$5,000 be placed at the disposal of the Minister of Public Works for the above purpose, and be charged to the Intercolonial Railway account.

Certified.

(Signed,)

WM. H. LEE,
C. P. C.

To the Honorable the Minister of Public Works,
&c., &c., &c.

(Copy of No. 115.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 10th March, 1868.

SIR,—Referring to your Report of 1865, on the proposed Intercolonial Railway line from the St. Lawrence to the European and North American Railway in New Brunswick, I find you state that certain parts of the proposed lines, numbered three and four in your Report, have not been sufficiently examined to enable you to report conclusively with respect to their practicability, probable cost, &c.

It appears also you are of opinion that the portion of the North Shore Route between Trois Pistoles and the termination of your Survey on the Metapedia, has not been sufficiently surveyed should that line be selected.

In order to give certain Members of the Government the fullest information in regard to these three lines, or such modifications of them as a further exploration of them

may enable you to suggest, I desire you to organize the necessary staff as speedily as possible for this purpose.

You will proceed with all diligence and report frequently as to progress, and especially report by the 12th April, what progress has been made up to that time.

All such reports are to be strictly confidential, and only for the private information of the Government.

You will incur no more expense than is actually necessary.

I have the honor, &c.,
 (Signed,) Wm. McDougall,
Minister of Public Works.

Sandford Fleming, Esq., Ottawa.

(Copy of No. 112.)

DEPARTMENT OF PUBLIC WORKS,
 Ottawa, 12th March, 1868.

SIR,—The Government of the Province of New Brunswick having offered to transfer to the Government of Canada their contract with the Intercolonial Contract Company, for the building of a Railway between Moncton and Sackville, in New Brunswick, in the expectation that the work on this line would be found as regards location and other conditions, suitable for the Intercolonial Railway, it has been decided to have an examination and survey made of the line in question, in order to enable His Excellency in Council to determine whether the proposition of the Government of New Brunswick can be accepted.

The Honorable the Minister has selected you to make the survey, and directs me to request you to make your arrangements accordingly.

I am to add further, for your guidance, that assuming the point on the European and North American Railway, at which the line above referred to strikes it, to be suitable for the Intercolonial, you will be pleased to report whether a better alignment than that which has been adopted might not be made from that point to the termination of your recent survey at or near Amherst, and the reasons for your opinion, if it should be in the affirmative.

You will also report on the actual value of the work done and materials on the ground, under the contract.

I enclose herewith, for your information, certain papers and documents under No. 151, having reference to this subject.

I have the honor to be, Sir,
 Your obedient servant,
 (Signed,) F. BRAUN,
Secretary.

Sandford Fleming, Esq., Ottawa.

(Copy No. 116.)

DEPARTMENT OF PUBLIC WORKS,
 Ottawa, 14th March, 1868.

SIR,—With reference to my letter of the 12th instant, conveying the Minister's instructions regarding the examination of the railway between Moncton and Sackville, N. B., I have the honor to inform you that the Secretary of State for the Provinces has been requested to advise the Government of New Brunswick of the proposed examination, and to direct that every facility may be given you to carry it out.

I have the honor to be, Sir,
 Your obedient servant,
 (Signed,) F. BRAUN,
Secretary.

Sandford Fleming, Esq., Ottawa.

(Copy of No. 117.)

DEPARTMENT OF PUBLIC WORKS,
 Ottawa, 14th March, 1868.

SIR,—I have the honor to state, for your information, that the Minister has appointed

Mr. Sandford Fleming to examine the Railway in course of construction between Moncton and Sackville, in New Brunswick, by the International Contract Company, in accordance with the Order in Council to that effect of the 10th instant.

I am directed to request that the Government of New Brunswick may be informed of this appointment, and desired to give Mr. Fleming access to all papers, plans, and documents having reference to that Railway, and to afford him every facility in their power for the carrying out of his instructions.

I have the honor to be, Sir,

Your obedient servant,

(Signed,)

F. BRAUN,

Secretary.

Secretary of State for the Provinces,
Ottawa.

DEPARTMENT OF PUBLIC WORKS,

Ottawa, 16th March, 1868.

J. A. Beekwith, Secretary,
Fredericton, N. B.

Have instructed Mr. Fleming to report on Moncton and Sackville Railway in reference to proposal of your Government. Please give him needful information. Official letter goes by mail.

(Signed,)

WM. McDUGALL,

Minister Public Works.

(Copy of No. 160.)

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 29th February, 1868.

On a Memorandum dated February 24th, 1868, from the Honorable the Minister of Public Works, submitting, for the information of Your Excellency, that Mr. Sandford Fleming, the Engineer appointed under the authority of an Order in Council, dated the 3rd July, 1867, to make the location survey of the Intercolonial Railway which lies between Truro and Amherst, in Nova Scotia, has completed the survey in question and has forwarded his Report with plans, &c., of said Survey to his Department. That Mr. Fleming has carried out this survey with his own funds, and now submits a statement of his expenditure thereupon, with vouchers.

That the sum so expended amounts to \$26,804 56, and recommending that this sum, together with an additional sum of \$2,500 on account of salary to Mr. Fleming, be paid to him, and that the sum of thirty thousand dollars be placed at his, the Minister's, disposal, for that purpose.

The Committee submit the above recommendation for Your Excellency's approval, the amount being charged to Intercolonial Railway account.

Certified.

To an Address of the House of Commons, dated 26th March, 1868 ; for Copies of any offer which may have been made to the Government in relation to the building of the Intercolonial Railroad ; and also, Copies of all communications to or from the Government relating to said offer.

By Command.

HECTOR L. LANGEVIN,
Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE,
Ottawa, 31st March, 1868.

(No. 137.)

RAILWAY BRANCH,
Ottawa, March, 1868.

SIR,—I have the honor to return herewith the Address of the House of Commons, dated the 26th instant, calling for copies of any offer which may have been made to the Government in relation to the building of the Intercolonial Railroad, and to state that the Return sent in to your Department on the 26th instant contains all the information that this Department can give on the subject.

I have the honor to be, Sir,

Your obedient servant,

F. BRAUN, Sec'y.

The Honorable
The Secretary of State,
&c., &c., &c.,
Ottawa.

N. B.—The papers above referred to have, for greater convenience, been withdrawn from the Return made 26th March, and filed with this.

Western Extension of the European and North American Railway.

(Copy.)

CONTRACTOR'S OFFICE,
St. John, N.B., 15th January, 1868.

Hon. Wm. McDougall,
Minister of Public Works,
Ottawa.

SIR,—As I now have a contract for building 88 miles of the European and North American Railway, from St. John to Bangor, and 22 miles for the Fredericton Branch Railway Company, which will be completed early this year, I will have a large force at my disposal during the next summer, and would be glad, should the Government be disposed to make a contract for the whole or part of the Intercolonial, between the European and North American Railway in this Province and the boundary of the Province of Quebec. I have corps of engineers, for the most part of large experience, and could put one or more parties into the field to locate upon very short notice. I can also put a force of from 500 to 1,000 men upon the works, on receiving one month's notice, and would agree to complete the whole work in the shortest possible time. I would prefer the whole, as greater

control would be secured and the rates for wages would be better regulated. I can give satisfactory security for the performance of the work, if required.

I propose to locate, build and equip a first-class line of Railway, from Apohaqui, on the European and North American Railway, to the Miramichi River, in the most direct line practicable, for the sum of thirty-two thousand five hundred dollars; or, what would be more preferable, from Apohaqui to the Restigouche, including the Bridge over the Miramichi River, for thirty-three thousand dollars per mile. In locating the road, I would confine myself to curves of not less than 1,000 feet radius, and grades not to exceed sixty feet per mile; all to be subject to the approval of the Chief Engineer of the Government. This proposition to include engineering expenses and land damages, cleaning and grubbing, fencing, grading, masonry and superstructure, with iron rails, having fish-joints of the Erie pattern, and weighing sixty pounds per lineal yard; ballast, 4,000 cubic yards per mile, with all necessary sidings and station buildings; a single line of Telegraph and everything which can reasonably pertain to the requirements of a first-class line of Railway. All bridges over fifty feet span to be of iron.

Rolling stock, at the rate of two Locomotives, two first class Passenger Cars, two second class or Mail Cars, fifteen Box Freight Cars, twenty Platform Cars, one Snow-Plough, and two Hand Cars, for each and every twenty miles. I can refer you to the work I now have in hand as to my ability to complete such a contract, and for any further information to either of the Members of the Government or any of the Members of Parliament from this Province. I will be glad to hear from you at your convenience, and have the honor to be, Sir,

Your obedient servant,
(Signed,) E. R. BURPEE.

(Copy of No. 50.)

DEPARTMENT OF PUBLIC WORKS,
Ottawa, 25th January, 1868.

Acknowledging letter of 15th instant, from E. R. Burpee, Esq., St. John's, N. B.
(Signed,) F. BRAUN,
Secretary.

OTTAWA, 21st February, 1868.

SIR,—Referring to our interview with you, of this date, upon the subject of the Intercolonial Railway, we have now the honor to make formal application for the appointment of Consulting Engineers to the Government of the Dominion of Canada, in connection with such Railway.

Having acted in a similar capacity for the Government of Queensland, and for numerous Guaranteed and other Railways in India, at the Cape of Good Hope and elsewhere, and having been constantly engaged for many years in the construction of Railway works of magnitude, we believe that we can bring to bear upon the questions submitted to us an amount of practical experience which would be found of value. We have specially given our attention for many years to the improvement of permanent way, and the economical use of iron in bridges and other structures.

Our duties as Consulting Engineers would be to advise the Government upon all points referred to us, and, in consultation with the Chief Engineer, when called upon, to determine the details of allocation or of construction; to act, when desired, as referees in matters of dispute; to prepare designs from data furnished by the Chief Engineer for the iron-work details of bridges; to superintend the ordering of all materials in England or on the Continent; to carefully inspect (during manufacture) and superintend the stowage on board ship of all such materials; and to furnish the financial agents of the Government with certificates upon which, with bills of lading and policies of insurance, to pay the value thereof.

If desired, we have facilities, as in the case of the Queensland Government, for engaging freight and effecting insurances; and we have found that, by carefully watching the freight market, great reductions can often be effected. Much delay and many complaints are also avoided by having all the duties carried out by one firm.

With reference to the question of remuneration we are quite prepared to meet the wishes of the Government; but we submit the following as a fair basis upon which an arrangement might be made. In consequence of the length of the proposed Railway, and the amount of repetition that will result, we are enabled to name far lower rates than those paid us by the Government of Queensland or our various other clients.

We propose, then, that the Government should pay us, as Consulting Engineers, an annual retaining fee of £600 (six hundred pounds stg.), paying also an office and travelling expenses, and a fee of five guineas for each day spent out of London, or on arbitrations, in fulfilment of our duties. The retaining fee would thus include all ordinary consultations and reports, not involving a visit to the Dominion or to places at a distance from London.

We further propose that, to cover all expenses and time, including office and travelling expenses, inspectors' and assistants' salaries, and all other charges whatsoever, such as designs, templets, &c., where necessary, in connection with the ordering and shipment of materials, the Government should pay us the following commissions upon the invoice value of materials shipped from the other side of the Atlantic:

Upon rails, one and a-half per centum; upon all other materials, two and a quarter per centum, and we would undertake the shipment and insurance for one quarter per centum additional.

It would be understood that these sums would represent the total cost of the agency. We should rigidly place to the credit of the Government all brokerages, discounts and other allowances, usually made to agents; and by keeping ourselves entirely free in these respects, we are enabled better to serve the interests of our clients.

We shall be obliged by your bringing this communication under the notice of the Government.

And we have the honor to be, Sir,

Your most obedient servants,

(Signed,) CHARLES FOX & SONS.

The Hon. Wm. McDougall,
Minister of Public Works,
&c., &c., &c.

Proper address of the firm:—

Sir Charles Fox & Sons,
Spring Gardens,
London, (S. D.)

(Copy of No. 149.)

RUSSELL HOUSE,

Ottawa, February, 21, 1868.

DEAR SIR,—Herewith I beg to hand you the official letter, as requested, which I trust will meet the views of the Government. I have named as low rates as I can to be just fairly remunerative. The retaining fee is just the same as that paid for years by the Cape Town Railway Company for precisely similar duties in connection with a line but 52 miles long, and therefore must, I think, be considered very moderate when applied to so important and heavy a work as the Intercolonial Railway. The per centage paid by the Government of Queensland was 3½ per cent. all round.

I am unexpectedly obliged to return to Toronto to-morrow, but as I have crossed the Atlantic specially with a view to this appointment, I am prepared, if the Government think right to entertain my proposal, to come back to Ottawa to conduct the negotiations in person, and to place the services of myself, on behalf of my firm, at their disposal. I should be obliged to you if you would kindly, within the next few days, communicate with me by letter or telegraph, to care of H. P. Howland, Esq., Toronto.

I had the honor, yesterday, to present a letter of introduction to His Excellency Viscount Monck, from the Duke of Buckingham, and I am also the bearer of letters from Lord Stanley to the British Consul in New York.

I am, dear Sir,

Your's truly,

(Signed,) CHARLES DOUGLAS FOX.

Hon. W. McDougall.

(Copy of 176.)

OTTAWA, February 27th, 1868.

Hon. Wm. McDougall, C.B.,
Minister of Public Works.

MY DEAR SIR,—The enclosed telegram was recently received by me from New Brunswick.

The parties making the proposal contained therein requested me to submit it for the consideration of the Privy Council. It appears to me that a proposal of this nature should be presented to the Government by the Minister of Public Works. I take the liberty, therefore, of requesting you to take charge of it, and leave it for you to present it in such form as your judgment may deem best.

I may say that the capitalists making this offer, intend asking Parliament for an Act of Incorporation. They are now prepared to furnish the Government with evidence of their ability and means to complete the proposed work in a reasonable time, and to the satisfaction of the Government, should their proposal be favorably entertained.

I am, my dear Sir,

Yours very sincerely,
(Signed,) S. L. TILLEY.

(Copy of No. 170.)

(Care of George Laidlaw, Esq.)

TORONTO, March 2, 1868.

SIR,—We beg to acknowledge receipt of your communications of the 27th ult. (1,051-149-82), for which we are obliged. We shall be glad if you will kindly inform the Government, that Mr. Charles Douglas Fox hopes to have the honor of again waiting upon them in the course of the present month. In the meantime a letter or telegram to the address at the head of this letter will be forwarded to him in the West.

As some remarks have been made in the public prints as to a supposed connection of our Firm with contracting, we beg to inclose for the information of the Government a copy of a letter by our Mr. Fox on the subject.

We are, Sir,

Your obedient Servants,

F. Braun, Esq.,

(Signed,) CHARLES FOX & SONS.

Secretary, Railway Branch,

Department of Public Works, Ottawa.

(Copy of 175.)

MONTREAL, 5th March, 1868.

SIR,—Believing that the Government is desirous of obtaining tenders for the construction of the Intercolonial Railroad, the undersigned propose to undertake that portion of it which is between River du Loup and Woodstock, or River du Loup and Fredericton.

If the Fredericton route is taken, they propose to select the most suitable route that may offer, so long as it does not approach the frontier of the United States nearer than a distance of ten miles.

They will undertake that the highest grade shall not exceed sixty feet to the mile, with curvatures to correspond. The iron to be fish-plated, and to weigh sixty-three pounds per yard.

They will furnish rolling stock equipment to the value of twenty-four hundred dollars per mile, and stations to the value of five hundred dollars per mile.

The price asked for the complete work by frontier line to Woodstock is six millions of dollars if the Company own the road, or seven millions if it is handed over to the Government.

If the Fredericton route is selected, the cost, not including a bridge across the River at that place, will be eight millions of dollars if owned by the Company, or nine millions if it is handed over to the Government.

The free right of way in all cases to be supplied by the Government.

If this proposal is entertained, the undersigned will be prepared at the proper time to enter into details, and put the whole in a satisfactory shape.

We have the honor to be, Sir,

Your obedient servants,

(Signed,) T. MORELAND,
HUGH ALLAN,
GEORGE STEPHEN,

For selves and others.

The Hon. Wm. McDougall, C.B.,
Minister of Public Works, Ottawa.

(Copy of No. 225.)

SAINT STEPHEN, N. B., 9th March, 1868.

To the Hon. S. L. TILLEY, C.B.,

Minister of Customs,
Member of the Privy Council, Ottawa.

(No. 1.) SIR,—We, the undersigned, hereby propose and undertake to contract and equip a line of Railway by the number one Frontier Route, from River du Loup, via the western side of Temiscouata Lake and the Grand Falls, and thence along the western side of the River St. John to the terminus of the present Branch Railway at Woodstock, for the sum of six millions (\$6,000,000) of dollars.

(No. 2.) Or from River du Loup, by the same route, to Grand Falls, and thence along the eastern side of the River St. John to the Railway Terminus at Woodstock, for the sum of seven millions (\$7,000,000) of dollars.

(No. 3.) Or from River du Loup, by the Trois Pistoles River, the Squatoo R. Valley, Green River Forks, bend of Restigouche River, Salmon River, and thence along the eastern side of the St. John River to the said terminus at Woodstock, for the sum of seven and a half millions (\$7,500,000) of dollars.

These routes are colored red, blue and brown, on the accompanying Map, and numbered 1, 2 and 3, respectively.

Particulars of proposed construction.

The maximum gradient not to exceed sixty feet per mile.

The minimum radius of curvature five degrees, or eleven hundred and fifty feet.

The road-bed to be eighteen feet wide on embankments.

The cuttings to be twenty-four feet in width at formation level, where the quantity of excavation is in excess of embankment; but where embankments are in excess of cuttings, the latter to be taken out to a width of thirty feet.

The Bridges and Culverts to be of first, second, and third class masonry; pavements, rip-rapping and protection walls, of the fourth class.

Particulars of superstructure.

The quantity of ballast to be equal to three thousand five hundred (3,500) cubic yards to the mile.

The sleepers to be of cedar, hackmatack and pine, and to be laid in the proportion of two thousand one hundred and twelve (2,112) sleepers per mile.

The rails to be of the \perp pattern, sixty-three pounds (63 lbs.) per lineal yard, secured at the joints with fish-plate fastenings and screw-bolts, together with the required quantity of dog-spikes. The tenders include five per centum of the superstructure for sidings.

The superstructure of all bridges exceeding fifty feet span to be of wrought-iron girders, of approved principle.

Particulars of equipment.

The equipment to consist of the necessary rolling-stock, tank-houses, woodsheds and station buildings.

The rolling-stock for each and every 100 miles to be as follows, viz:—

- (10) Ten Locomotives ;
- (2) Two Sleeping Cars ;
- (4) Four first class Passenger Cars ;
- (4) Four Mail Baggage second class Cars ;
- (4) Four Baggage and Express Cars ;
- (40) Forty Box Freight Cars ;
- (80) Eighty Platform Cars ;
- (20) Twenty Hand Cars, for section men ;
- (4) Four Snow Ploughs.

The Station accommodation to be in the proportion of five hundred (\$500) dollars per mile.

The tenders also include the cost of preliminary surveys, locations and engineering, made and provided by the undersigned.

The whole to be subject to the approval of the Chief Engineer appointed by the Government. On the completion of the contract and the acceptance thereof by the Chief Engineer, the line and all appurtenances to be handed over to the Government.

Periodical payments to be made by the Government during the progress of the work, upon the certificates of the Chief Engineer, according to a schedule of prices assimilating the cost per mile for construction.

The rails and rolling-stock to be paid for when delivered at a terminus.

The Government to provide the right of way in all instances, and the undersigned to be entitled to all timber felled upon the site of the proposed Railway, through Crown Lands.

The undersigned are prepared to provide ample security for the due completion of the undertaking.

(Signed,)

F. H. TODD,
JOSEPH E. EATON,
HENRY F. EATON,
JAMES MURCHIE,
HENRY OSBORN,
Z. CHIPMAN,
ROBERT WATSON,
GEO. A. BOARDMAN & Co.

OTTAWA, CANADA,
14th March, 1868.

SIR,—I have the honor to state that the Intercolonial Railway can be completed, by the North Shore or Major Robinson's Line (including a reasonable proportion of Rolling Stock, and in the best manner) for the sum of \$35,000 per mile; and I hereby offer to finish the whole, including *all services* from Rivière du Loup to Truro, for a bulk sum of Seventeen Millions of Dollars (\$17,000,000).

The work to be executed to the entire satisfaction of the Chairman of the Institution of Civil Engineers (for the time being).

Should this offer be entertained, I am prepared to give ample security for the due fulfilment of the Contract.

(Signed,) I have, &c.,
A. LUDERS LIGHT,
M. Inst. C. E.

The Honorable
Sir John A. Macdonald, K.C.B.

MONTREAL, March 20th, 1868.

SIR,—Having considered the various reports upon the construction of the Intercolonial Railway; I am prepared to enter into a contract to complete it from River du Loup, on the line known as the "Major Robinson route," on the following terms, viz. :—

The line to be located by the Engineers employed by the Government and built according to General Specification to be prepared by them.

The bridges to be of wood, with stone piers and abutments.

Station buildings to be good—sufficient accommodation to be provided to meet the traffic, both at way and terminal stations.

Rolling Stock to be provided to an amount equal to an aggregate of three thousand dollars per mile.

The price to be paid to be seven thousand pounds sterling (£7,000 stg.) per mile of Railway constructed ready for opening and carrying traffic.

I am, Sir,

Yours respectfully,

R. J. REEKIE,

Contractor,

Montreal.

Hon. Sir John A. Macdonald,
Ottawa.

Western Extension of the European and North American Railway.

CONTRACTOR'S OFFICE,

St. John, N.B., March 25th, 1868.

The Honorable Sir John A. Macdonald, K.C.B.,

Premier of Canada, Ottawa.

SIR,—On the 15th of January last I had the honor to propose, in a letter addressed to the Hon. Wm. McDougall, the Minister of Public Works (a copy of which I now enclose), to build a portion of the Intercolonial Railway in this Province. Having since that time devoted much attention to the consideration of the subject, I desire now to say, that I will be willing to agree, if the Government should be disposed to make a contract, to locate, construct and equip, in the manner named in my letter to Mr. McDougall, within three years from July next, the entire line of Railway between Truro in Nova Scotia, and River du Loup in Quebec, generally upon the route explored by Major Robinson, for the sum of fourteen millions six hundred thousand dollars. I may add, that should a contract be made upon this proposition I can give ample security for the performance of the work.

I am, Sir,

Yours respectfully,

(Signed,)

E. R. BURPEE.

QUEBEC, 3rd April, 1868.

SIR,—Having associated ourselves together with D. C. Thomson, Esquire, now absent from this city, for the purpose of tendering for the construction and equipment of the Intercolonial Railroad, we are desirous of placing in the hands of the Government, at the earliest date possible, a proposition based on the surveys and explorations that have already been made.

In doing so we have confined our attention to the Northern line, as it appears to us the most favorable and practicable, and from its proximity to navigable waters and to a settled country, involving fewer items of doubtful calculation both as to the engineering difficulties and the cost of transport of materials and laborers. Nevertheless, even for this line, it is difficult as yet to reduce our estimates to the lowest possible figure, an unusually large allowance having to be made for unforeseen contingencies.

We therefore now submit an offer to construct and equip a line of Railroad, following as nearly as possible the route known as Major Robinson's line, from Rivière du Loup to Truro, equal in all respects to the Grand Trunk or any other road in Canada, for the sum of fourteen million eight hundred thousand dollars.

Further, we shall be prepared, so soon as the route to be adopted is finally decided on, to submit a formal tender, accompanied with the best of securities, to the satisfaction of the Dominion Government. The amount of such tender to be for the above-mentioned gross sum.

We have to request that you will lay the foregoing before His Excellency the Governor General and Council, and that we may be informed when an opportunity will be given to contractors to submit their tenders in detail.

We have the honor to be, Sir,

Your most obedient servants,

(Signed,)

JAMES G. ROSS,

RETURN

To an Address of the House of Commons, dated 11th May, 1868 ; for Copies of all Orders in Council and Correspondence regarding the Intercolonial Railway and the Imperial Guarantee Act, since the 1st day of July, 1867 ; also, Copies of all Correspondence held with the Imperial Government, any of the Local Governments, and with Officials or other Individuals regarding the Location and Construction of the said Railway ; and Copies of all Documents having reference to the same.

By Command.

HECTOR L. LANGEVIN,

Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE,

Ottawa, 18th May, 1868.

(With 1351.)

COPY of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 3rd July, 1867.

On a memorandum, dated July 3rd, 1867, from the Hon. the Minister of Public Works, stating that the Government of Nova Scotia caused a detailed exploration of the country lying between Truro and the boundary line of Nova Scotia and New Brunswick, near Amherst, to be made, with a view of selecting the best site for the proposed Intercolonial Railway. That in May, 1866, Mr. Sandford Fleming, the engineer employed to make this survey, reported that he had examined all the practicable railway lines between these two points, and recommended one of the explored lines as preferable in its main features to the others.

That the neck of land on which Amherst is situated is comparatively so narrow, bounded, as it is, on the north by the Gulf of St. Lawrence, and on the south by the head waters of the Bay of Fundy, that the proposed Intercolonial Line of Railway, at this point, cannot be deviated from more than a few miles either to the south or to the north.

That Mr. Fleming has also recorded his opinion that the summer is the best time to locate and to fix the site of Railways, and of the various structures connected with them.

That he, the Minister of Public Works, would therefore recommend that he be authorized to employ such engineers and surveying parties as may be necessary to locate so much of the Intercolonial Railway, extending from Truro to the neighborhood of Am-

herst, as may not be affected by the adoption of any of the proposed lines for the Intercolonial Railway, through the Provinces of New Brunswick and Quebec, with instructions to adopt the most eligible line, giving due weight to the cost of construction, cost of future working and management, and also the general interest.

The Committee submit the recommendation of the Minister of Public Works for Your Excellency's approval.

Certified.

WM. H. LEE,
Clerk, P. C.

COPY of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 28th December, 1867.

The Committee have had under consideration a communication dated 23rd December, 1867, from the Hon. the Minister of Customs, with reference to the claim of Joseph Nelson, of London, England, referred to him for report.

The Minister of Customs states, that when in London, in 1861, acting in concert with the Hon. Mr. Vankoughnet, the Delegate from Canada, and the Hon. Joseph Howe, the Delegate from Nova Scotia, urging upon the Imperial Government the guarantee of £3,000,000 sterling, towards the construction of the Intercolonial Railway, Mr. Nelson was employed by them to secure Petitions and Memorials to Parliament in favor of such guarantee.

That the Representatives from Nova Scotia and New Brunswick advanced to Mr. Nelson £100 stg. each, on behalf of the Governments they represented, for the services to be performed by him, it being at the same time understood that the Government of Canada would also bear her fair share of the expenses to be incurred in connection with this service.

That Mr. Nelson states, up to this time he has received no compensation from the Government of Canada for his services, and which he, the Minister of Customs, knows Mr. Nelson to have rendered; That if this statement be correct, he can but advise the early payment of such sum as may be deemed equitable.

The Committee recommend that Mr. Nelson be paid the sum of £300 sterling for his services, and that this amount be charged against "unforeseen expenses" for the late Province of Canada.

Certified.

COPY of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 29th February, 1868.

On a memorandum dated February 24th, 1868, from the Hon. the Minister of Public Works, submitting, for the information of Your Excellency, that Mr. Sandford Fleming, the engineer appointed under the authority of an Order in Council, dated the 3rd of July, 1867, to make the location survey of the Intercolonial Railway which lies between Truro and Amherst in Nova Scotia, has completed the survey in question, and has forwarded his Report, with plans, &c., of said survey, to his Department. That Mr. Fleming has carried out this survey with his own funds and now submits a statement of his expenditure thereupon with vouchers. That the sum so expended amounts to \$26,804.56, and recommending that this sum, together with an additional sum of \$2,500.00, on account of salary to Mr. Fleming, be paid to him, and that the sum of thirty thousand dollars be placed at his, the Minister's, disposal for that purpose.

The Committee submit the above recommendation for Your Excellency's approval; the amount being charged to Intercolonial Railway Account.

Certified.

BUCKINGHAM AND CHANDOS.

Governor, the Right Hon. Viscount Monck,
&c., &c., &c.

The Governor General to the Duke of Buckingham and Chandos.

(Copy.—No. 7.)

GOVERNMENT HOUSE,
Ottawa, 7th January, 1868.

MY LORD DUKE,—I have the honor to transmit three copies of a report to me from the Minister of Justice and Attorney General on the Act passed in the present Session of

the Parliament of the Dominion of Canada, for the purpose of carrying into effect the requirements of the Imperial Statute, intituled, "The Canada Railway Loan Act, 1867."

I also transmit three copies of the Provincial Act referred to.

Your Grace will observe that the object of the Canadian Government is to obtain, as soon as possible, the opinion of Her Majesty's Government as to whether the Act passed by the Canadian Parliament fulfils the requirements of the Imperial Statute, in order that no unnecessary delay may occur in commencing the construction of the Intercolonial Railway.

I shall feel much obliged if Your Grace will inform me, as soon as convenient, whether, in the opinion of Her Majesty's Government, this Act is a satisfactory fulfilment of the conditions imposed as the basis for granting the Imperial guarantee by the "Canadian Railway Loan Act, 1867."

I have, &c.,
(Signed) MONCK.

His Grace
The Duke of Buckingham and Chandos,
&c., &c., &c.

(With No. 3.—Enclosure in Lord Monck's Despatch, No. 7, of the 7th January, 1868.)

Report of the Honorable the Minister of Justice and Attorney General.

The undersigned has the honor to submit for Your Excellency's consideration, the expediency of transmitting, at an early day, to the Secretary of State for the Colonies, a copy of the Act of the Canadian Parliament authorizing the construction of the Intercolonial Railway, which was passed on the 21st December last, and an official copy of which I beg leave to send you, herewith.

This Act has been framed with the view of fulfilling the requirements of the Imperial Act known as "*The Canada Railway Loan Act, 1867.*" It provides for the construction of the Railway, and appropriates four millions sterling for the purpose; and by the 26th clause, it provides for the use of the Railway, at all times, for Her Majesty's military and other service.

It will be observed also, that the conditions of the third Section of the Railway Loan Act are fulfilled by the 27th, 28th, 29th, 30th, 31st, 32nd, 33rd and 34th clauses of the Canadian Statute.

As it is of great consequence that this work should be proceeded with without delay, it is important that the approval of Her Majesty's Government should be obtained with all convenient speed.

The Canadian Parliament will re-assemble on the 12th March, and it is exceedingly desirable that it should be informed that the Act in question has been approved of, or that some further legislation is necessary.

The undersigned assumes that the measure will be considered satisfactory, and in such case the only thing remaining to be done before the granting of the guarantee and the commencement of the work, is to obtain the approval of the Secretary of State for the Colonies to the line in which the Railway is to be constructed.

The Canadian Government expect to be able to transmit, for the consideration of His Grace the Secretary of State for the Colonies, before the work can be commenced in the spring, a Report of their decision as to the plan of the line of railway, together with the estimates of the cost of construction, which it is hoped will meet with his approbation.

The undersigned trusts, however, that His Grace will not wait the reception of such Report before obtaining the decision of Her Majesty's Government, whether the Canadian Act is in other respects satisfactory.

(Signed) JOHN A. MACDONALD.

Ottawa, January 6th, 1868.

(Copy.)

To His Excellency the Right Honorable Charles Stanley, Viscount Monck, Governor General of the Dominion of Canada, &c., &c., &c.

The Petition of the undersigned Inhabitants of the County of Gloucester, Province of New Brunswick,

HUMBLY SHEWETH :

That, impressed with the conviction that the future growth and prosperity of this Province very materially, if not altogether, depends upon a wise selection of the route for the proposed Intercolonial Railway, from the River du Loup to the Nova Scotia frontier, your petitioners would respectfully submit that no route yet projected can possibly combine all the advantages which that by the Northern or "Major Robinson" line may fairly claim.

That as these advantages have already been elaborately defined and published, and the information widely diffused, it is unnecessary for Your Petitioners to recapitulate them here, at the same time they would respectfully beg Your Excellency's attention to the following more prominent facts :—

1. This line if not the shortest, is nearly so, and would be found the cheapest to construct.

2. For more than half its length it is nearly level, and the grades on the remainder are much more moderate than those on either of the central lines.

3. A road on this line would be found much more free from obstruction by deep snow in winter, and damage by freshets and floods in spring, than one running through the interior, and from injury by foreign foes than a frontier road.

4. From the convenience of access to this line from the sea, commerce would at once be greatly promoted, and traffic drawn to it from a widely extended maritime region around the shores of the Gulf of St. Lawrence and Bay des Chaleur, an advantage which an interior line would not possess.

Your Petitioners would therefore earnestly pray Your Excellency that in order to secure the greatest advantage to the Dominion from this most important work, that the Northern or Major Robinson Line, and none other, may be selected as the site of the proposed Railway.

And as in duty bound will ever pray.

Gloucester, 26th February, 1868.

Signed by JOSEPH SEWELL, J. P.,
and 319 others.

(Copy.)

GOVERNOR'S SECRETARY'S OFFICE,
Ottawa, 1st April, 1868.

SIR,—I am directed by the Governor General to acknowledge the receipt of the Petition, dated February 26th, 1868, and signed by you and other inhabitants of the County of Gloucester, praying for the selection of the Northern or Major Robinson's line for the location of the Intercolonial Railroad.

I have, &c.,
(Signed)

RICHARD MONCK,
For the Governor's Secretary.

Joseph Sewell, Esq., J. P.,
County of Gloucester, New Brunswick.

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 10th March, 1868.

On a memorandum, dated 6th March, 1868, from the Hon. the Minister of Public Works, submitting, for the consideration of Your Excellency in Council, that under the authority of an Order in Council of the 3rd July last, he instructed Mr. Sandford Fleming, engineer, to make a location survey of the line of the proposed Railway, between Truro, in the Province of Nova Scotia, and Amherst, near the boundary of New Brunswick,

That Mr. Fleming has completed this survey, and reports that he has found and located a line with easy gradients and curves, and presenting fewer engineering difficulties than the previous explorations through the Cobequid Mountains had indicated as likely to be encountered; that he has also obtained additional and, in his opinion, sufficient information to enable him to report respecting an alternative line proposed by the Acadian Iron Company, which takes a more westerly route, and passes the present works of that Company.

The Minister states that he does not recommend Your Excellency to approve now of the line located and recommended by Mr. Fleming; but he is of opinion that a comparison of the respective merits of these lines will induce Your Excellency, when the question is finally submitted, to adopt the line located by Mr. Fleming.

That from Amherst to the European and North American Railway, at or near Moncton, a distance of about 33 miles has not yet been located under the authority of his Department; but that, under an Act of the Legislature of the Province of New Brunswick, in the year 1865, a Company was authorized to construct a Railway from Moncton to Sackville (near Amherst) and is now proceeding with the work. That in a Report dated the 14th October last, he called Your Excellency's attention to this contract, and recommended that the Government of New Brunswick should be informed that the line they had authorized might be found unsuited to form part of the Intercolonial Railway, and that they must therefore proceed with its construction at their own risk. That under Your Excellency's authority a notice to that effect was communicated to the New Brunswick Government—and he submits the reply, informing Your Excellency that the Government of that Province desires to transfer the contract and its liabilities to the Government of Canada, in the expectation that the work on this line may be found, as regards location and other conditions, suitable for the Intercolonial.

That before he can recommend Your Excellency to conclude an arrangement of the kind proposed, he is of opinion that a careful examination of the line should be made by a competent engineer, under instructions from his Department, in order to enable Your Excellency in Council to determine whether the proposition of the Government of New Brunswick, that this line should form part of the Intercolonial, can be accepted.

He therefore recommends that he be authorized to order an examination and survey as aforesaid, and that a sum of \$5,000 be placed at his disposal for that purpose.

The Committee advise that the authority requested be granted, and the sum of \$5,000 be placed at the disposal of the Minister of Public Works for the above purpose, and be charged to the Intercolonial Railway Account.

Certified.

(Translation.)

To the Hon. John Rose, Minister of Public Works for the Dominion of Canada, &c., &c.

SIR,—Messrs. P. P. V. Tremblay & Co., residing in the Province of Quebec, have the honor to represent to you:

That they perceive with pleasure that the Government of Canada is taking the necessary steps to cause the proposed Intercolonial Railway between Quebec and Halifax to be constructed, that road being of the highest importance to the prosperity of the confederated Provinces.

That they are in a position to construct the road more advantageously than any other Company could do. And according to an estimate of the probable cost of the aforesaid road, they are satisfied that they could construct it along Major Robinson's line, in the best manner, and with all the improvements introduced by modern art, as may be resolved upon by the aforesaid Government, for the sum of \$13,500,000.

That in consequence they offer to the aforesaid Government of Canada to construct the aforesaid Intercolonial Railway along Major Robinson's line, and in the manner hereinbefore set forth, for the aforesaid sum of thirteen millions, five hundred thousand dollars, of current money.

That they further offer good security to ensure and guarantee the completion of the aforesaid road, if the Government of Canada sees fit to award them the contract.

They hope that, taking their proposition into consideration, Your Excellency will be good enough to cause an answer to be returned to their application.

They have the honor to remain, with the most profound respect,

Sir,

Your most humble and obedient servants,

(Signed,)

P. P. V. TREMBLAY & Co.

(Copy, Letter No. 308.)

To His Excellency the Right Honorable Charles Stanley, Viscount Monck, Governor General of Canada, &c., &c., &c., and to the Honorable Her Majesty's Privy Council.

The President and Directors of "The Fredericton Railway Company" hereby propose to Your Excellency and Honors to construct and equip the Intercolonial Railroad from River du Loup to the City of Fredericton (including a bridge over the St. John River) to connect with the Fredericton Branch and Western Extension Railways, by the route known as "Fleming's route No. 5, by Keswick Valley," at and for the sum of seven millions eight hundred and sixty thousand dollars, and also, in addition if required to construct and equip the road from opposite Fredericton by the head of the Grand Lake to Apohaqui, by the route laid down in Fleming's Report for the additional sum of two millions four hundred and thirty thousand dollars.

The roads to be in all respect first class, and to be provided with the necessary amount of stations, station houses, and rolling stock. Security to be furnished for the due and faithful performance of any contract to be entered into to carry out the foregoing propositions.

Dated at Fredericton, N.B., this 3rd day of April, A. D. 1868.

On behalf of the Directors.

(Signed,)

THOMAS TEMPLE,
President, Fredericton Railroad Company.
For self and Directors.

FREDERICTON, N. B.,
3rd April, 1868.

SIR,—By direction of the Directors of the Fredericton Railway Company, I enclose to you a proposition to build and equip the Intercolonial Railroad by Fleming's Route No. 5.

This proposition is made after due consideration and careful calculations, and in good faith, and I have to request that you will lay the same before His Excellency the Governor General and Privy Council, at your earliest convenience.

The Directors have observed some very erroneous calculations and statements in the *Montreal Gazette* tending to the prejudice and injury of this section of the Province, and totally void of the semblance of truth; for your information I subjoin a few statistics bearing upon the subject, and derived from the most authentic sources.

Population of counties contributing to the Railway by Keswick Valley, viz. :—

Albert.....	13,166
Carleton.....	24,099
Charlotte.....	28,395
King's.....	28,754
Queen's.....	17,009
St. John's City and County.....	63,522
Sunbury.....	6,897
Victoria.....	11,261
Westmoreland.....	36,681
York.....	36,613

Total Population, 1868..... 266,397

Population of Counties contributing to the Railway by the North Shore route.

Albert.....	13,166
Westmoreland.....	36,681
Gloucester.....	18,076
Kent.....	20,654
Northumberland.....	23,312
Restigouche.....	13,007

Total, 1868..... 124,896

Shewing a population difference in favor of the Keswick valley route of 141,301; and to this number should be added 30,000 from the State of Maine, who would contribute at least \$100,000 per annum to the revenues of the Intercolonial, built by the Keswick valley.

You will observe that the population of the Counties of Albert and Westmoreland are included in the above, as both these counties would contribute to the road by either route.

I would now draw your attention to the difference there exists in the Exports and Imports from the counties referred to above.

Imports from counties contributing to Intercolonial by Keswick Valley route, 1867.....	\$8,994,129
Imports by counties contributing to Intercolonial by North Shore.....	1,006,655
Difference in favor of Keswick Valley Route.....	\$7,987,374

Exports from counties contributing to Intercolonial by the Keswick Valley Route, 1867.....	\$4,933,047
Exports from counties, North Shore Route.....	1,440,658

Difference in favor Keswick Valley Route..... \$3,492,389

The foregoing statements you can depend upon as reliable in every particular, and should have weight in the determining of the route of so important a line of Railway as the Intercolonial.

It would be needless for me to observe that the large amount of population of the Keswick Valley route, in excess of the population by the North Shore route, should at least have its influence on the determination of the route through New Brunswick; this, together with the enormous excess of imports and exports in favor of the Keswick valley route, with the fact that by far the heaviest portion of the burden in construction and maintenance must necessarily be borne by the population of the Southern, Western, and Eastern sections of this Province, will, I humbly trust, induce His Excellency and Ministers to adopt a line so beneficial to two-thirds the entire population of New Brunswick, as that by the Keswick valley.

I have the honor to be, Sir,
Your obedt. servant,
(Signed),

THOMAS TEMPLE.

Hon. S. L. Tilley, C.B., &c., &c., Ottawa.

(Copy of No. 249.)

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council on the 3rd April, 1868.

On the recommendation of the Hon. the Minister of Public Works, dated 1st April, 1868, the Committee advise that the sum of Ten thousand dollars (\$10,000) be placed at his disposal to meet disbursements in connection with the Intercolonial Railway Surveys now being conducted by Mr. Sandford Fleming.

(Copy of No. 243.)

OTTAWA, April 1st, 1868.

SIR,—I have the honor to forward to you the accompanying petitions in reference to the Intercolonial Railway Route, from the inhabitants of the County of Sunbury.

Your humble servant,

(Signed),

CHARLES BURPEE.

Hon. Wm. McDougall, C.B.

To His Excellency the Right Honorable Viscount Monck, &c., &c., &c., Governor General of Canada.

The Petition of the undersigned freeholders and inhabitants of the County of Sunbury, in the Province of New Brunswick.

HUMBLY SHEWETH:—

That your Petitioners have heard, with much concern, the efforts which have been

made to induce Your Excellency to adopt Major Robinson's Line (so called) as the route of the Intercolonial Railroad.

That the adoption of the road by that line will be of little advantage to New Brunswick, and will not attain the object contemplated by the Dominion in the building of the Intercolonial Railroad.

That the best interests of the Dominion demand that a *more direct line* should be adopted which will meet the commercial requirements of Canada.

Therefore, your petitioners pray Your Excellency to take the premises into consideration, and by proper surveys, and otherwise, ascertain the practicability of a *Central Route*; believing that route will best conduce to the future growth and development of the Dominion.

And your petitioners, as in duty bound, will ever pray, &c., &c., &c.

(Four Petitions.)

(Signed,)

"

(and 433 others.)

(Copy, Letter No. 235.)

The Honorable Wm. McDougall, C.B.,
Minister of Public Works, Canada.

MONCTON, NEW BRUNSWICK,
March 24th, 1868.

SIR,—I beg to request that you will be pleased to place at my credit, in the Bank of Montreal in Ottawa, the sum of (\$10,000) ten thousand dollars, to meet disbursements in connection with the Intercolonial Railway surveys now being conducted by me under recent instructions.

The expenses already incurred amount to about \$7,500, *viz.*, for camp stores and general equipment of parties now in the field, \$2,500; for Railway expenses, transporting stores and staff, \$500; and for advances to engineers in charge of parties, \$4,500, to meet current expenses. The balance of the \$10,000 now asked for will shortly be required.

I have left with Mr. Drummond, of the Montreal Bank, in Ottawa, my Power of Attorney to receive the amount and place it at my credit, to meet drafts now made and hereafter to be made.

I have the honor to be, Sir,
Your obedient servant,

(Signed,) SANDFORD FLEMING,
C. E.
