## Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x

The copy filmed here has been reproduced thanks  
to the generosity of:

Library  
Agriculture Canada

This title was microfilmed with the generous  
permission of the rights holder:

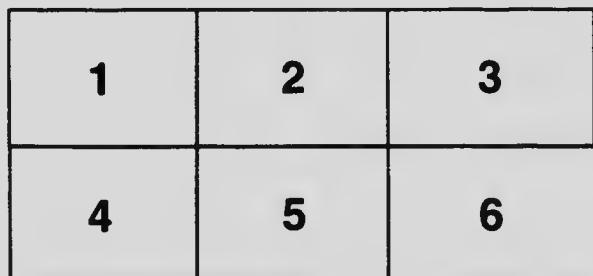

Wm. C. Gussow

The images appearing here are the best quality  
possible considering the condition and legibility of  
the original copy and in keeping with the filming  
contract specifications.

Original copies in printed paper covers are filmed  
beginning with the front cover and ending on the  
last page with a printed or illustrated impression, or  
the back cover when appropriate. All other original  
copies are filmed beginning on the first page with a  
printed or illustrated impression, and ending on the  
last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall  
contain the symbol → (meaning "CONTINUED"), or  
the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be  
entirely included in one exposure are filmed begin-  
ning in the upper left hand corner, left to right and  
top to bottom, as many frames as required. The  
following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la  
générosité de:

Bibliothèque  
Agriculture Canada

Ce titre a été microfilmé avec l'aimable autorisation  
du détenteur des droits:

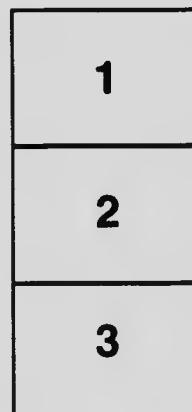

Wm. C. Gussow

Les images suivantes ont été reproduites avec le  
plus grand soin, compte tenu de la condition et de  
la netteté de l'exemplaire filmé, et en conformité  
avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en  
papier est imprimée sont filmés en commençant  
par le premier plat et en terminant soit par la  
dernière page qui comporte une empreinte d'im-  
pression ou d'illustration, soit par le second plat,  
selon le cas. Tous les autres exemplaires origin-  
aux sont filmés en commençant par la première  
page qui comporte une empreinte d'impression ou  
d'illustration et en terminant par la dernière page  
qui comporte une telle empreinte.

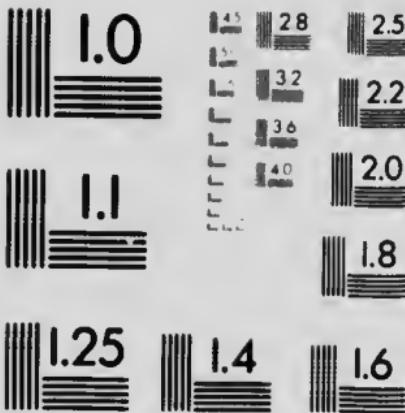

Un des symboles suivants apparaîtra sur la  
dernière image de chaque microfiche, selon le cas:  
le symbole → signifie "A SUIVRE", le symbole ▽  
signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être  
filmés à des taux de réduction différents. Lorsque  
le document est trop grand pour être reproduit en  
un seul cliché, il est filmé à partir de l'angle  
supérieur gauche, de gauche à droite, et de haut  
en bas, en prenant le nombre d'images  
nécessaire. Les diagrammes suivants illustrent la  
méthode.

## MORDECAI CUBITT COOKE

(1825-1914)

H. T. GESSOW

WITH PORTRAIT, PLATE I

There is carved upon a certain tombstone in St. Mary's Islington Cemetery at East Finchley, England, the representation of a lowly and obscure plant. The image excites the curiosity of the visitor for it embodies a toadstool. Why, among all the beautiful and ornate members of the Vegetable Kingdom, should the choice fall on such an unattractive member?

Yet this little toadstool, linked with the name of the man resting beneath the tombstone, has a history, and with reverence the interested visitor will remember this. To us the toadstool is a *Coprinus*, or to be quite scientific, *Coprinus micaceus* of Fries, and its clump will remind us of the little wooden which adorns the cover of the "Handbook of British Fungi" of which he, who lies beneath the tomb, was the author—Mordecai Cubitt Cooke, the veteran mycologist and pioneer of British Mycology.

Mordecai Cubitt Cooke's life affords several generations of botanists as well as the present, ample food for thought. His unique training, his phenomenal interest in the natural sciences, his zeal in imparting such interest to the young, his untiring pen and his retiring nature stand out prominently among the characteristics of this remarkable man.

He was born at Horning, Norfolk, England, on the 12th of July, 1825. His father Mordecai Cooke was a member of an old respected Norfolk family which in past times spelled their name Coke. Mordecai—an old Semitic name—was a traditional one, which had been in the family for many generations. Mordecai Cooke, senior, was in early manhood connected with the manufacture of bombazine, once a thriving local industry. He married Mary, daughter of William Cubitt, a schoolmaster of the neighboring village of Neatishead. On his marriage he opened a village store,

which is now the Horning Post Office, and it was here that their eldest son Mordecai Cubitt Cooke was born in 1825.

At an early age he went to a local dame's school where he remained until 1834. From there he went to Ilford to continue his education under an uncle, the Rev. James Cubitt, a Baptist minister, who, being learned in classics and mathematics, afterwards became a tutor at the famous Spurgeon's College.

In 1838 young Cooke returned to Horning taking with him from his learned uncle a useful knowledge of ancient languages, algebra, and a love for observations and study of art and science. We then find him attending a local school at Neateshead.

In 1840 he was forced through circumstances to interest himself in the trade of a wholesale draper, to whom he was apprenticed, but this occupation proved heartily distasteful to a young fellow of his natural inclinations. In 1845 he again went back to London. Young Cooke was a romantic youth in character like certain heroes portrayed by Ibsen, mayhap likeliest of all to Peer Gynt—impressionable, loving freedom and yearning for knowledge.

At the age of twenty-one he published a volume of verse (I am told of no particular merit) entitled *The Struggle of Freedom and other Poems*.

He interested himself greatly in poetry and literature generally and we find him lecturing and writing thereon; at that time, no doubt, augmenting by these means the meagre income which he earned in his capacity of copying clerk in a solicitor's office.

The next few years the young man spent in the search for some more congenial and permanent occupation. He made himself acquainted with the system of education of Pestalozzi, and for a brief period taught this method as a pupil teacher in an infant school, kept by an uncle and aunt of his, at Stockton-on-Tees.

He then was fortunate in securing an appointment as headmaster of the National Schools at Lambeth, where he remained during the years 1851-1860. He continued with fervour his botanical studies, gained first class certificate in botany and founded the Society of Amateur Botanists. Here he became acquainted with Worthington G. Smith, another ardent lover of nature, and a botanist of no mean achievement. It is natural that this association led him to become more specially interested in the study of micro-fungi and fungous parasites. During this time he prepared a comprehensive account entitled *A Plain and Easy Account of British Fungi*, of which the fourth edition appeared in 1860.

No doubt, his famous little books for the young, small octavo shilling mammals by "Uncle Matt," evolved during this time too. Cooke loved children to his old age, and his simple language was certainly calculated

to endear his books to the children. From his *Down the Lane and Back in Search of Wild Flowers* his kindly interest in the young is apparent. Charming words are contained in the preface:

"Dear children, this book is for you. I have written it for you, to help you to learn a little more about the wild flowers than you know, and yet not to trouble you with any more hard words than I can help. You love flowers, and so do I, and the more you know of them the better you will love them. I have pointed out the way to Cissy, how she was to find out their little secrets, and what I have said to her I say also to you. If you will follow her to do as she did, you may learn, as she learned, that the most common weed has a story to tell which may be told to a child; that nothing to Him, who made it, is common or unclean; and that wayside weeds have their place to fill and their duty to do in the world if only —

To comfort man, to whisper hope whene'er his faith is dim;  
For Who soareth for the flowers will much more care for him.

While in Lambeth he made the acquaintance of P. L. Simmonds, author of *Economic Products of the Vegetable Kingdom*, and in 1861 he was engaged by Dr. Forbes Watson of the India Office to catalogue raw vegetable products, and so forth, that were sent to England for exhibition purposes. On completion of this work he was appointed to a post as Botanical Assistant in the India Museum at Fife House, Whitehall, London. During the years from 1862-1868 he acted as Editor to *Science Gossip*.

About 1865 he became actively interested in fungi, no doubt greatly stimulated by Berkeley with whom he became intimately acquainted and later closely associated. Then follow in rapid succession—his energy as it were a pent up flood suddenly released—numerous works from the pen of this “inveterate” writer. *Our Reptiles; Manual of Structural Botany; A Fern Book for Everybody; Manual of Botanic Terms; Rust, Smut, Mildew and Mould*.

In 1872 he commenced *Grevillea*, first published monthly, later on quarterly. This journal of Cryptogamic Botany has a wide circulation and brought Cooke specimens of Fungi from all over the world, and the number of new genera and species described by him was immense. In consideration of his interest in American mycology some singular honours were conferred upon him. The University of St. Lawrence in 1870 gave him the honorary degree of Master of Arts; in 1873 Yale conferred the same honour; and in 1874 New York University made him an honorary LL.D. In 1877 the Linnean Society elected him an Associate, and Mycological Societies all over the world made him an honorary member. In going over this long list it is curious to find that no German Society appears to have likewise honoured Cooke.

In 1880 Cooke's career nearly came to an end; the India Museum was discontinued, and the staff was placed on the pension list, or dismissed. However, in that year appeared the first part of what Cooke termed "the most ambitious work of his career"—a book, the likeness of which in its completeness was never produced in any other country—the *Illustrations of British Fungi*, a monumental work of eight volumes with 1200 plates, completed in 1891. No doubt, this work attracted Sir Joseph Hooker's attention, who asked for the transfer of Cooke's services to the Royal Botanic Gardens, Kew, where he filled the post of first Cryptogamic Assistant until 1893. In 1883 *The Myxomycetes of Great Britain* appeared, an appreciation of Rostalinsky's methods. In 1889 this spirit, roaming and revelling in the natural kingdoms, published his *Tides in the Sea*; in 1892, *The Vegetable Wasps and Plant Worms*; in 1893, *Romance of Low Life Among the Plants*; in 1894, *Handbook of British Hepaticae*, and *Edible and Poisonous Mushrooms*; in 1895, *Introduction to the Study of Fungi*; *Talks About Wild Flowers*, *Botanical Wall Charts for Use in Schools*; in 1906, *Fungoid Pests of Cultivated Plants*; in 1908 *Catalogue and Field Book of British Basidiomycetes for Use of Collectors*, etc., etc., etc.

In 1902 the Royal Horticultural Society conferred on him the Victoria Medal of Honour (V.M.H.), and in 1903 the Linnean Society honoured him with their gold medal.

During his long life he collected and preserved many thousands of fungi and other plants. In 1898 Kew acquired his private collections of some 16,000 specimens. He estimated that he drew over 14,000 figures as illustrations for his various works.

It was during his later years that I became intimately acquainted with this indefatigable man. We met twice monthly at that useful and interesting Institution of the Royal Horticultural Society, its Scientific Committee, which he attended in all sorts of weathers. He was a modest, kind old gentleman with a pronounced sense of humour. Unfortunately during his later years he was unable to work owing to the failure of his eyesight. The vision of one eye became totally obscured by cataract and the other partially so. He resignedly accepted the expert's dictum, saying "I have left my eyes behind in my microscope."

In 1912 through "inadvertence" Cooke's obituary notice appeared. But he remonstrated that this account was exaggerated and premature.

His faculties and his sense of humour remained with him until the very end. On the 19th of October he had a severe heart attack, and passed away quietly and painlessly on the 12th of November, 1914. Thus ended the career of another of our respected and valued pioneers in mycology.
