ADVANCE UP TRENCH

British Columbian Battalion Makes Valuable Gains of Ground.

By Stewart Lyon, dian Headquarters in France, ondon, May 22.—Several minor ions have been carried out on the Canadian left front, in the vicinity of the electric station, to the southwest of Lens, which, in the aggregate, have resulted in a considerable gain of ground by our men on the most difficult part of the line.

In the tangle of railway embankments, pit mouths, miners' houses, and heaps of shale, thru which the Canadians must advance, a regularly defined front line trench, properly wired, is almost impossible. The enemy creates defensive positions with tireless energy, and from our point of view the German wire is enough of an obstacle to our advance without adding a Canadian strip of wire to it. Our men put outposts into "No Man's Land" and forward positions of the enemy and steal the ground by night surprise attacks. A number of houses in which German snipers had quarters were taken in a rush and our outposts now occupy saps south of the electric station.

Hand-to-Hand Fighting.

How is it to be enforced? The measure is not down yet, so the details are not available. One thing seems clear, however, that such a measure cannot be satisfactorily enforced by a party government, and particularly by the present administration at Ottaws, whose management of the war has been so flagrantly partisan as to call for denunciation by its friends.

Further, wealth, as well as men, should be preased into service, so that equal be preased into service, so t

* WAR SUMMARY *

THE DAY'S EVENTS REVIEWED

N the present interval between big infantry actions the British are following the policy of conducting raids at widely separated points of the front, as if feeling out the German positions for the next offensive stroke, probably on a wider front than ever. June, it is expected, will see the heaviest fighting yet experienced in the western theatre of the war. The British conducted their raids at three points yesterday, at Vermelles, east of Bullecourt and northeast of Epehy. By excellent aerial work they turned soldiers, Privates Patton, J. found the site of a big German ammunition dump on the Arras-Cambrai road, northeast of Queant, and they blew it up with an explosion which was felt for a great distance behind their lines. Since the enemy has already found great necessity for husbanding his ammunition, he will feel the loss of this accumulation more than usual.

The Canadians, on their left wing, have been carrying out several minor operations, and these have given them a considerable gain of ground on the most difficult part of the line; that is, near the electric station southwest of Lens. The district is a mass of miners' houses, pit mouths, heaps of shale, and railway embankments, and it presents a formidable obstacle to the Canadian advance, especially since the Germans assiduously keep forming new defensive positions. A British Columbia battalion has gained valuable ground in a recent advance. Canadian outposts have also gained saps in the electric station.

Premier Ribot told the French Parliament when it reopened yesterday that the government had reorganized the French higher command in order to relieve it of everything not concerned with the military operations. He admitted that there had been some excessive hopes and some C.P.R. Employes Secure errors of execution in the last offensive, and he said that the government had made the changes which it thought should be made. Speaking of peace he said that France wished it to be durable, but did not wish milltary dispositions to endure, capable of disturbing the peace when once made. If the German people comprehended this, it would make peace easier to attain. This is the view of Russia. He then said: "Let Russia make her offensive and we will be able to talk of peace, not in an equivocal manner, but openly; and this peace, if they do not ask it of us, we will

The Russian foreign minister has telegraphed Premier Ribot the thanks of Russia to France for attracting to the west the enemy masses, thanks of Russia to France for attracting to the west the enemy masses, thus permitting the Russian forces to gain time for reorganization. The idea of peace without annexation does not preclude France from regaining the provinces recently annexed by Germany, nor for imposing on the get an advance of about twenty-five enemy indemnities for the devastation wrought to invaded previnces and per cent.

On the Italian battlefront the inevitable lull between advances has set in, and only the rival artilleries are keeping active. The Austrians are striving to create a diversion in the Trentino, but their attacks so far have merely been demonstrations. The Austrians, it is said, have half a million men, or 36 1-2 divisions, opposed to the Italians, or just one-half their force at present under arms. The wholesale surrenders of Austrians to the Russians in Galicia last year compelled a permanent reduction in the strength of Austrian army, so that it is at least half a million, and demand an all-round increase of five cents per hour.

Montreal, May 22.—Two hundred and fifty C.P.R. freight handlers, and a hundred and fifty in the employ of the Dominion Transport Company, stituent assembly, the country's finan-most of them employed on the docks, went on strike today for higher pay. They have been receiving thirty cents an hoar for day work and thirty-five cents at night, and demand an all-round increase of five cents per hour. On the Italian battlefront the inevitable lull between advances has ment. While Austrian strength has thus declined, Germany, owing to a policy of sacrificing her allies in preference to her own troops, is a year or at least six months behind Austria on the road to exhaustion.

On the Russian front fusillades only break the calmness of the pro ceedings, but in the rear of the Russian lines feverish work is proceeding to restore the discipline, morale and cohesion of the republican forces. It is expected that Brusiloff will undertake the offensive to assist Italy in June, according to Colonel Repington. It is inconceivable that the officers of the mental capacity of Brusiloff and his lieutenants would allow demoralization to spread very far in the troops under their control. They require greater preparation for a greater effort this year than last, for besides advancing in Galicia and Volhynia, they will also have to advance in Rumania to make their line conform. It is doubtful whether Austria activity. in her present weakened condition would continue to hold up her head if subjected to reverses equal to those suffered last year, but would rather collapse.

Turkey is engaged in a considerable offensive under Von Mackensen's direction against the Russian position in the Caucasus. Hardly a day ning of the war Denmark has lost 150 passes but the Russian official communications record some repulse of the Turks. The enemy has made no progress in his campaign; otherwise his official communications would have given full particulars, with copious details of prisoners taken and territory overrun. details of prisoners taken and territory overrun.

The foreign office of the new Russian Government has addressed a communication to the Government of the United States to assure Amerito assert that Russia is fighting not for conquest, but to liberate oppressed nations and to bring about a lasting peace. Four members of the Russian have arrived in the United States. Arrangements will be likely as a major to the liberate oppressed to make the liberate opposed to make the liberate oppose

proceed to make up to Russia her deficiencies in the matter of supplies.

An intermittent cannonade and the bombing of Bulgarian camps by British and Serbian aviators marked the total of the operations on the Balkan front, according to the communication issued at Paris. Bad weather, it seems, still retards the development of the campaign. No official signs have appeared to show that the allies have postponed that campaign, as some persons believe.

Stomach Troubles Due to Acidity

SO SAYS EMINENT SPECIALIST.

So-called stomach troubles, such as indigestion, wind and stomach-ache are in probably nine cases out of ten simply evidence that fermentation is taking place in the food contents of the stomach, causing the formation of gas and acids. Wind distends the stomach, and causes that full, oppressive feeling sometimes known as heartburn, while the acid irritates and inflames the delicate lining of the stomach. The trouble lies entirely in the fermenting food. Such fermentation is unnatural, and acid formation is not only unnatural, but may involve most serious consequences if not corrected. To stop or prevent fermentation of the food contents of the stomach and to neutralize the acid, and render it bland and harmess, a teaspoonful of bisurated magnetia, probably the best and most effective corrector of acid stomach known, should be taken in a quarter of a glass of hot or cold water immediately after eating, or whenever windor acidity is felt. This stops the fermentation, and neutralizes the acidity in a few moments, Fermentation, wind and acidity are dangerous and unnecessary. Stop or prevent them by the use of a proper sufficial, such as bisurated magnesia, which can be obtained from any druggist, and thus enable the stomach to de its work properly without being hindered by possonous gas and dangerous acids.—M. F. P. SO SAYS EMINENT SPECIALIST.

One Hundred and Eighty Four Men Apply for Examination.

UNIT LEAVES TORONTO

Departure of Q.O.R. Battalion for East Has Been Ordered.

Seven doctors at the Toronto mobilization centre examined 184 men for service with the Canadian forces yesterday. Of these 87 were attested and distributed among various units, but of the remaining 37 few were rejected, a large number appearing for medical examination only. More than half of the total number visited the armories during the morning and the office was closed at five in the afternoon as usual.

While the number was not nearly as large as the previous day, recruiting officials pointed out that Monday has always been the great day for volunteers. Records show that the best Tuesdays were experienced in the early part of 1916, some being: January 11, 138 men accepted (the record for that day); February 9, 82 accepted; February 16, 98 accepted; March 8, 103 accepted.

ANTI-CONSCRIPTIONISTS ARE ACTIVE IN QUEBEC

Resolutions Opposing Government Measure to Come Before Municipal Bodies.

Montreal, May 22.-A Quebec despatch says: "Ald. Dussault, at last night's meeting against conscription, announced that on Friday he will present a motion to the city council asking that said council register against conscription. He also announced the near creation of an anticonscription league thruout the entire district."

Meetings against conscription were held last night in Montreal. The Club Letellier agreed to ask Mayor Martin to introduce a resolution in council against obligatory military overseas service. At a meeting on St. Law-rence boulevard it was decided to organtze a mass open air meeting in Parte Lafontaine on Wednesday evening against conscription. -A petition from a number of oiti-

zens, was filed at the city half today demanding that the council go on re cord as protesting against conscrip without a referendum.

at on the night of May 11 was was examined. The evidence disclosed that on the night of the fire he and a Franch-Canadian by the name of D. Trembley had been working at the same bench, employed in cleaning shells with gasoline. The gasoline was contained in a garbage can which held two gallons, and there was additional gasoline under the bench, which workers during the day had used.

Mappa stated that a few minutes before the fire broke out Trembley had asked him for a match, and he was smoking a cigaret. A short time after siving the match the fire broke out between the two men, the bench, which was saturated with gasoline, having become ignited. So quickly did the fire spread that Mappa's clothes caught on fire before he had an opportunity to get away, and he was aligntly burned.

Didn't Enforce Rule.

Up to the present the rule forbidding smoking in munition factories has not been rigorously enforced. During the daytime, when the danger is least, the law is fairly well observed, but at night men are practically free to act as they choose in this matter. This lax system had developed, according to the deputy fire marshal, because of the competition among employers in the petition among employers in the ring of workmen. It was difficult et laborers for the night shifts, consequently employers were into be more lenient with these The remedy for this, said Mr. Lewis, rested with the imperial muni-tions board, which should pass a law prohibiting smoking in all munition plants both day and night, and thus relieve the proprietor of the responsibility of securing men by catering to their individual tastes in this respect.

WEDNESDAY MORNING, MAY 23.

Men and Money.

Recruiting has received a health; ment of the government that conscrit tion was to be applied to the problem of raising the necessary drafts for our army overseas. The decision of the prime minister has precipitated a right resolution in many minds. No longer can any man excuse himself with the plea that there is no need. The need is so great that Canada has had to about don a cherished tradition and adopt the compulsory plan of service. It is obvious, therefore, that volunteers were needed all the time, and that those who held back, being aware of the need, were doing violence to their consciences. No man of honor can longer hesitate when his duty is placed squarely before him as the government announcement places it, the government announcement places it, the government announcement places it. esolution in many minds. But do not let us confuse the is-sues, or for a moment fall into the erfor of suggesting that all the rich man's millions could equal the service of our poor man's son.

The Treason of Division.

There are no greater traitors to the ountry at the present time than those who are striving to make the military needs of the country a means of party advantage. It matters not whether their views be pro or con, it is the rankest treachery at the present time to place any interest before that of the nation, and the humanity that the nation has pledged itself to defend. We can only suppose that it is failure to understand the gravity of the emergency, if not ignorance of the whole international situation, that leads anyone just now to attempt to make political capital of the duties of the hour. There never was a time when na tional unanimity was more requisite, yet the jibes and jeers, the doubts and insinuations of one party and another are still to be heard above the never-ceasing

Can We Shorten the War? Sir Ernest Shackleton is of the opin blem comparatively fresh after his Antarctic travels and this is how strikes him. He may not, perhaps, have fully realized what tremendous strides the allies have made since September 1914, when, outnumbered and outgunner it seemed that the French and Britisl genius of Joffre saved the situation by the strategy of the Marne. Since ther Britain has increased her forces from zero to millions, and her munitions from a quantity inconsiderable in comparison with the German stores, to what

Must Have a Beginning

Do not postpone the opening of a savings account simply because of the smallness of your first deposit. All things must have their beginning. The big things of today were the little things of yesterday. We have many large accounts which have grown to their present proportions gradually from very small beginnings. For this reason we cordially welcome the deposit of a dollar knowing that in most instance the incentive of a savings account, and the regular addition of interest, will insure a steady increase in the balance at the depositor's credit. being considered preferable to placing the bread in the window as had been at first proposed.

The exhibits made a fine showing and many comments were made on the generally good appearance of the loaves. Shortly before five o'clock the judges began their work, their method being much admired by those privileged to see them at their work. A comment made by the judges was that many of the loaves got out of the running because they were not baked enough. A number of the loaves, however, were of such uniform good quality that they drew many compliments from the experts.

Little Notes.

Some of the loaves had little notes attached giving particulars as to their ingredients and upon, what kind of stove they had been baked. These were not taken into account by the judges, but they showed the interest taken in the competition by the contestants. Some to had been to the starts.

Ottawa, May 22.—Both sides in the house of commons today were evidently waiting for the proposals of the government in respect to conottawa. May 22—Both sides in the house of commons today were evidently waiting for the proposals of the government in respect to conscription and meanwhile were marking time. The day was spent in committee of ways and means upon the budget resolutions, amending the wartax on excess profits. They called a personal income tax, which the government has no intention of introfucing at the present session. During the debate, however, Sir Thomas White announced that the act establishing the war tax on business profits expired with the calendar year thouse of the war continued longer than was anticipated. Other sources of revenue, he said, would have to be found.

Demand for Ships.

Still Discussing Inter-League Series

BASEBALL RECORDS

All International Games Post-Pain again stopped the Leafs and Newrk from playing yesterday. The other rain.

Local baseball fans will miss an old, or rather a young, favorite when they next journey to the Island Stadium to see the Leafs in action. Irving Trout. utility player of the Toronto team, is the latest to be realessed. He goes to the New London club. Trout, since joining the Toronto team about six years ago, has been a favorite with the fans because of his ability to play any position and do it well. He came to the Leafs as a catcher from the Canadian League and was with the Toranto team in that circuit. It was found that he was too light for catching and was converted into an outfielder. Then later it was found necessary on a number of occasions to work him in the infield when one of the regulars was unable to play. He seemed able to go into any position and play splendidly, but when given a regular position he invariably fell away, both in his fielding and butting. He has played every position but pitcher since joining the Leafs.

SOCCER ON SATURDAY.

Varsity Stadium tomorrow, when the Toronto and District Football Association will stage the first game of the local international series. This year the first game will be between teams representing Scotland and England, and, judging by the teams selected, the game should be a hummer from start to finish. The teams will take the field as originally selected, with one exception, Lewis of Toronto St. Ry. taking the place of Harrison, who is accompanying the Toronto team to Montreal on account of Steve Walker being unable to go, thru illness. Both teams are confident of winning, and, as all the games played between these teams have been productive of some excellent football, a visit to the stadium tomorrow should satisfy the most ardent soccerite. The game is called for 3 p.m.

IT LOOKS LIKE NO INTER-LEAGUE BALL

President Barrow Agrees to Abide by Majority Decision of American Association.

Chicago, May 22.—Chib owners of the American Association will meet here next Saturday to approve or reject President Hickey's action in calling off the inter-kague series with the International League.

The meeting was cated by President Hickey tonight, after he apparently felled to adjust the situation in informal conferences with several of the club owners. There has been strong opposition from three of the club owners to President Hickey's move in canceling the scries. James C. McGill, president of the Indianapolis club: O. H. Wathen, of Louisville, and Roger Bresnahan, of Toledo, are demanding that the series be played.

Hickey tonight advised Edward G. Barrow, president of the International League, that five of the American Association clubs. Milwaukee, Kansas City, Minneapolis. St. Paul and Columbus, had agreed to call off the series. As only a majority vote is required, there is every evidence that Hickey's action will be approved.

President Hickey made public a tele-

over 24 Different Makes.

There are a very few old instruments, besides the organs and squares, suitable only for summer cottages, or where it is only a temporary affair. These have been overheaded very carefully and put in good playing condition. But by far the great majority of instruments are almost new, and are equal to new in value. Some have been but little used. Others have been used for rentals, or for the use of artists at hotels or concerts. Then there are a few new pianos, never yet sold, that either show slight signs of floor use or are sample styles, not yet listed as regular stock.

All in all it is a splendid variety mostly standard/makes known through out Canada. And every instrument that is famous for its work.

Prices Show Big Savings.

About the most conclusive and clearest illustration of the actual saving you make by purchasing during this sale is to tell you that every instrument has been reduced \$50 or more (except the organs, squares and a few uprights) from their present prices and that the prices before the reductions were at least as low as prices quoted elsewhere for the same values. These reductions are made possible and profitable (both for you and Wil-

"Nature" chose

Scientists tell us that Assam in 'northern India was the original home of the tea plant. Thousands of years ago "Nature" chose the climate and soil of this favored region as most suitable for growing tea.

It is, therefore, natural that the hillside gardens of Assam (see picture) grow the teas which to-day are famous for their flavor, fragrance and rich strength.

It is of these Assam teas, skilfully blended with choice Ceylons, that Red Rose Tea consists. It is this rich Assam strength that users of Red Rose Tea must thank for its splendid economy—for the greater number of cups it yields to the pound, fully one-third more than ordinary teas.

To make certain that these Assam qualities are fully preserved for you we put Red Rose Tea into dust, odor and air proof sealed packages. Red Rose Tea reaches you pure, fresh and full strength-we guarantee it.

Note this view of the mechanism of the receiver hook on your telephone. Years of testing have developed this part of the telephone set to combine strength with the delicacy of instant response.

The Receiver Hook.

But often when the receiver is "banged" into the hook its careful adjustments are loosened and destroyed. And if the receiver strikes the hook a lateral blow before it is down far enough to break the contact and the person at the other end still has his receiver to his ear, he will hear a "bang" that is very unpleasant.

You can help to safeguard the quality of your telephone service by care in replacing the receiver.

London Papers Not Hopeful

London, May 22.-While most of the morning newspapers editorially, welcome an Irish convention as a hopeful means for settling the diffi-culties in Ireland, none of them express confidence in its success and none regards it absolutely certain that the convention will meet.

It is pointed out that altho the speeches in parliament showed a remarkable change in the atmosphere and that the discussion and outlook on the whole is encouraging the crux of the difficulty, namely, the exclusion of northern Ulster, remains.

Developments Operating Costs Per Ton Reduced in Spite of Abnormal Conditions.

Owing to the fact that the Schumacher Gold Mines, Ltd., directorate decided to move the end of the company's financial year ahead three months, to March 31st. the second annual report which has been sent to shareholders covers a period of only nine months. By a coincidence, however, the previous report covered a similar period which will admit of comparison between the two statements.

The operating statement shows that gross production amounted to \$169,186, as against \$153,777 in the last statement. Costs, however, of mining and development absorbed the greater part of this amount, leaving \$15,747 net profit. After allowing for \$10,000 depreciation and other adjustments, \$3,079 was carried forward to surplus as against \$31,932 in the previous report.

The Consumers' Gas Co. announced yesterday that it will issue 19,528 shares of new steck at \$75 a share, par value \$50 a share. This will be offered to share holders in the proportion of one share of new stock to every five shares of old stock held by stockholders. The money to be raised by the sale of this stock is for the purpose of liquidating indebtedness shown in former financial statements of the company, which has preferred to borrow from the banks instead of financing thru sale of stock since war broke out. The last sale of Gas shares by auction was made in December, 1915, when only \$167,000 worth was sold at an average price of close to \$162. low at 17.

Chicago, May 22.—Automatic choking off of future delivery trade in wheat tightened to such an extent today that business was reduced for the most part to scanty dealings in a single option—September. Bearish crop advices had also a depressing effect on values. The market closed unsettled, ic to 5c net lower, with July at \$2.32 and September at \$2.07. Corn gained 1%c to 1%c to 1%c to 1%c. and oats lost 1%c to 1%c to 1%c. Provisions finished irregular, closing at 10c off to 5c to 7c up.

Predictions current that a complete stop, soon of all option business in wheat might be witnessed as a result of existing arbitrary rules, were not unanimously agreed to. Unlimited short selling is still permissible, and enough of it has been developing to cause a constant setback in prices.

As far as news had 2ny influence on the wheat market, the principal factor today was the confidence which crop advices gave that the government's May figures on the democratic yield would be exceeded to a substantial degree. Report of increased shipments from Australia to the United States had, also, a disquieting effect.

At first the oats market sympathized At first the oats market sympathized with the strength of corn, aided by slowness of shipping. Seaboard supporters were said to be out of the market in later advices from the east, however, and this had a depressing effect. WINNIPEG WHEAT MARKET. -

Buying.

Winnipeg, May 22.—The market today was exceptionally dull. There were probably no more than ten trades in October wheat, all told, and this future did not open until long after ten o'clock. The close showed a decline of 3%c for the day. Oats were very little better. The demand was limited, and prices declined %c for May, %c for July and October. May harley was off 4c, and flax was down ic for May and %c for July. These were small movements in a market that has been rising and sinking three and five cents, between bids, in the last two weeks. There was practically no change in the cash situation. Trade is light, and the nnumber of buyers for cash wheat is reduced to one, or, at most, two of the milling companies. Oats were amazingly dull and large quantities are going into the clearing house.

C. P. R. AND LIBERTY LOAN. KURDS ATTEMPT ATTACK

New York, May 22.—The Canadian Pacific Rallway has subscribed for \$1.000,000 of the liberty toan bonds, it was announced today. Another million dollars' subscription came from the American Brass Co.

THE PARIS BOURSE. Paris, May 22.—Trading was quiet on the Bourse today. Three per cent. rentes 61 frames 36 centimes for cash. Ex-change on London 27 francs 18 centimes. LONDON STOCK MARKET. "Caucasian front: Kurds attempted an attack south of Erzingan, but were dispersed by our fire."

London, May 22.—Money was in better demand today in preparation for the transfer of the funds of the recent war ioan call from the banks to the Bank of England. Discount rates were quiet.

The stock market was quietly firm. The chief features were Brazilian issues on the improving exchange situation and a broadening demand. Rubber shares, the war loan and most of the alited stocks were steady, while industrials and home rails were increasingly active. Americans were dull, but firm.

The stock exchange will be closed next Monday and the Baitic exchange Saturday and Monday, Whitsuntide holidays.

VETERANS WIN POINT. Galt, May 22.— As a direct result of a protest meeting held by the Great War Veterans' Association a week ago, W. H. Anderson, ex-aiderman, has resigned his position of sanitary inspector and Chas. J. Oughlin, veteran, has been appointed.

KAVALA PORT SHELLED BY ALLIED WARSHIPS

Twelve Airplanes Drop Bombs on Greek Town Occupied

by Bulgars. Sofia, May 22.-Today's Bulgarian war office statement, after reporting

the Macedonian front, announces that 13 enemy warships bombarded Kavala, while 12 airplanes dropped bombs on the town. Several houses in Kavala were de-

stroyed, says the statement, but no military damage was done. One hos-tile airplane was shot down.

RETURNED SOLDIER DIES.

Kingston, May 22.—Lieut. Michael Tierney, who served in the 2nd Battalion and was invalided home from the front in January last, is dead. He carried the laite Capt. George Richardson, the famous Queen's hockey player, from the field when wounded. He was 24 years old. By mistake on his way home Lieut. Tierney, after reaching Quebec, was sent without attendance to Toronto, when unable to look after himself. After sitting in the Union Station for hours a police ambulance conveyed him to the general hospital. His father found out his whereabouts and brought him to Kingston. Lieut. Therney is survived by his wife.
